Appendix A: "Can you see the cystic artery yet?"

Tape: #99-001b (0:08:48:10 to 0:09:55:28)

```
Attending:  Yeah (.) the other ⌈thing to do::  is make sure you have your
            cystic (.) artery out ↑too.
Resident:                      ⌊(Right there)
Clerk:      Uh huh
Resident:   ⌈Which is right back in here
Attending:  ⌊That way there is nuthin else before you h- (.) hit the edge of
            the liver
            (1.6)
Attending:  That guarantees you're safe too.
Clerk:      Can you see the cystic artery yet? I ⌈(       )
Resident:                                        ⌊It's ↑r::ight back in the:re
            (2.1)
Attending:  °(He)'ll° get it out here in a minute.
            (0.2)
Resident:   See it right there?
            (0.2)
Clerk:      U::mmmmm=
Resident:   =Right (0.2) ⌈there
Clerk:                   ⌊Okay yeah (.) yeah
            (0.2)
Resident:   That looks like the (0.2) where the money's a:t
Clerk:      Uhkay
            (0.2)
Resident:   En yih can see it's hanging out in that ⌈tract.
Attending:                                          ⌊°(That's) actually big°
Attending:  That's pretty bi:g
Attending:  That may be ri:ght (0.4)
Resident:   That's right hepatic?
            (1.2)
(Attending):⌈(Comin' up)
Resident:   ⌊The cystic may be up a little higher?=
(Attending): =(Yup)
Resident:   You can see how easy that is to do we were just talking
             about that.
Clerk:      So you jus' dissect until you'r:e absolutely sure
Attending:  Ah ⌈hah
Resident:      ⌊Yeah=
Clerk:      =Till you see both the right hepatic and the cystic and then
            (4.6)
Resident:   Remember how we talked about there's no: (.) no collateral flow
            beyond the right gastric so if you happen to clip the right (.)
            you're kind of in trouble (and) you've clipped an end artery.
            (2.8)
Resident:   Want me to take the duct down? And look up in here (.) for the
            cystic   artery?
```
