## JOE BOREN WINS TWO FIRSTS IN LIT CONTEST

### D. E. Westwood Takes First In Remaining Class

Joe Boren, Carverville freshman, captured major honors in the literary contest conducted by the Scripps for the Scripps First Annual Egyptian Literary Supplement. The Scripps will be ready for distribution free to the student body on February 25. Boren won first in the short story division, carrying with it a prize of \$25.00 and in the article division, with a prize of \$5.

Dorothy E. Westwood, sophomore from Belleville, won the remaining first prize in the poetry division. First prize here was \$4.

Riancho Poppersack, Golconda, took second prize in the poetry division with "Honus, Honus, Harrisingh freshman, winning third. Prizes were \$3 and \$2 respectively.

Second prize in the short story division resulted in a tie between Gordon Leo, Junior from Karak, and Edwin Hall, Senior, Ernest Brasher, Harrisburg Junior, took fourth place. Second prize of \$5 will be divided between Leo and Halter.

Another tie resulted in the contest for second prize in the articles class between Benjamin Harrison Baldwin, Jr., East St. Louis freshman, and June Vick, Carbondale. Fifth place in this division was won by Anthony Venegeat, Junior from Herrington.

Judging in the contest was done by committees of three faculty members, arriving at their awards separately. No names were of the entries at any time the judging was in progress. Judges in this petty contest were Dr. D. T. Deans, Miss Charles Neely, and Dr. Evelyn H. Kellogg. Articles judges were Dr. B. L. Beyer, Dr. C. H. Cramer and Charles Neely. Miss Esther M. Power, William Schaefer, and Dr. Vera L. Peacock judged short story entries.

## LINSLEY OPENS SHORT COURSE YESTERDAY MORNING WITH TALK

Opening the Farmers' Short Course which is being held here this week, Dr. Linsley, University of Illinois, spoke yesterday morning concerning Soil Conservation and its program.

Also speaking yesterday morning, Dr. Woodworth lectured about Hybrid Seed Vera. Comprising the afternoon session, Dr. Willis G. Soyars, of this college, talked of the Problems of Governmental Reorganization, showing the necessity of enlarging the governmental units to render more capable the government of our enlarged country. President Roosevelt talked in the evening, using as the topic of his lecture "A Vision of a Richer Rural Life."

The Short Course, sponsored by the departments of Agriculture and Home Economics, cooperating with the College of Agriculture at the University of Illinois and the Farm Bureau of neighboring counties, will continue throughout today and tomorrow.

## CORRECTION

Mental Hygiene will be Education 250 instead of Education 230 as announced last week.

The Junior girls at Menard University, who fell into a deep snore every time she attended one of her lectures, finally found that the reflection of four lights on the professor's glasses was hypnotizing her.

Dorothy Westwood, Belleville sophomore, whose poems "To Autumn" were adjudged winner of the Scripps poetry prize and will be a feature of the magazine to be published February 25.

## DEBATE WORK INCREASES AS TOURNAMENT NEARS

With the addition of several inter-collegiate debates to be conducted later this year, the schedule given evidence of making for the heaviest season of debate S. I. N. U. has recently experienced. This Friday the affirmative team of Samuel and Meyer will meet a team from Washington University in a debate to be held before one of the S. I. N. U. schools.

The weekend of February 20-22 to teams from Southern will journey to St. Louis and to Lebanon for dual meets with St. Louis University and McKeon.

The climax of the years forecast activities so far as this school is concerned will be reached in the tournament held each spring by the Illinois Debate Association. The tournament this year is to be held in March with Bradley Tech of Peoria acting as hosts.

It is the present intention of the coaches to send two men's teams to represent Southern at this affair. In order to determine the negative team to be used in these future debate tryouts will be held during the week of February 15. To give opportunity to other debaters who have not yet taken out this year these trials will be open to anyone willing to devote the necessary time. For more information concerning tryouts watch the south bulletin board.

With an affirmative team composed of Frederick Meyer and Lowell Samuel and a negative team of Halter Gully and George Robinson, the S. I. N. U. Debate Club met the debate teams of Eureka College last Thursday afternoon and evening. The topic for debate was the mid-west question, resolved: The extension of consumer cooperatives would be of benefit to the general welfare.

## Library Receives 200 More Volumes

These books were picked from about 200 new volumes in Wheeler Library and were the ones that seemed to be of most general interest.

- Miles, O. L., "Liberalism Fights On"
- Mills, L. N., "Problem Solving in Arithmetic"
- Chetland, Elizabeth, "Trailing the Toddler"
- Committee on Residential Lighting, "Artificial Light and its Application in the Home"
- Metropolitan Club, "Home Plans for Metropolitan Chicago"
- Vance, R. B., "Human Factors in Cotton Culture"
- Spence, G. H., "After Roosevelt"
- Smith, D. T., "Deficits and Depressions"
- Charles Warren, "Bankruptcy in U. S. History"
- Palme, J. H., "Analysis of Industrial Securities"
- Day, C. S., "Life With Father"
- Stuffed, G. T., "Individual Exercises"
- Phillips, H. A., "Germany Today"
- Wood, "Tommy"

- Wetmore, W. W., "Sino-Japanese Controversy and the League of Nations"
- Herelle, P., "Immunity in Natural Infections Diseases"
- Winton, A. L., "Structure and Com-

## EDDIE MITCHELL WILL HEAD CAST OF 'DOVER ROAD'

Principal Cast: Eddie Mitchell, Jerry McDevitt, Leonard, Jerry Morgan, Barbara, Joan O'Connell, Nicholas, Frank Rogers, Dominic, Clark Berry.

Supporting Cast: Third Romantic Couple, Kate Burkhardt, John Mayo, Servants, Sue Grain, Nadia Gram, majorette, James Dinsley, Frank E. Goss.

With a cast consisting of veterans and newcomers, "The Dover Road" enters into its last week of rehearsal, presenting for its presentation in Shroyck Auditorium next Wednesday.

Three of the members of the cast, Frank Burkhardt, Edward Mitchell, and Frank Thomas, were voted as last year's dramatic leaders of the campus by the Little Theatre group. Mitchell, in the leading role, is a tried performer, having appeared in numerous productions for the last three years. Geraldine Morgan made her college debut as a principal member of the cast.

The play, "The Dover Road," written by A. A. Milne, contains a mixture of humor and sentiment. It is a human and delicately ironic play woven around the eccentric father who makes it his hobby to intercept eloping couples and keep them at his country house for the purpose of convincing them that they may become more self-acquainted before taking the final plunge. The servants of the house are thoroughly trained and involved in the intrigue to the point of being accomplices in the "crime." The father has the habit of constantly saying things that are unbecomingly humorous that he astonishes the most astute of them and in so doing weaves the rope that nearly hangs himself. He finally realizes that his own weaknesses may force him to wear a sign of self protection.

There are used the commonplace mechanical devices and theatrical trickery generally associated with the ordinary mystery, present in this comedy. The trap is subtle, whimsically but logically conceived and based upon a middle class man's view of life. It has been the fruit of long experience.

- Position of "Food"
- Brewer, J. M., "Education as Gut-Dance"
- Brown, J. L., "Civilization of Japan"
- Latika, A. A., "Lafayette"

## U. OF I. AGRICULTURE DEPARTMENT SENDS EXHIBIT FOR COURSE

In conjunction with the Farmers' Short Course which is now in session here, the Department of Agriculture of the University of Illinois has sent an exhibit on soil conservation and reforestation.

The exhibit consists of high and dry-floored feet, located in the hall of the lower floor in the Main building and divided into four sections, it depicts the influence of forests in combating and controlling erosion.

The uses of terraces, the development of lawns of natural beauty, and soil conservation in orchards.

Mr. Morris, of Illinois University, is here with the exhibit, representing the Agriculture Department of that University.

The Short Course, which will last through the end of the month, is sponsored by the S. I. N. U. Departments of Agriculture and Home Economics, cooperating with the Office of Architecture at the University of Illinois and the Farm Bureau of neighboring counties.

## ENTERTAINMENT AND EDUCATION WORK CONTINUES

The entertainment program for the campus continues without marked deviation from the original plan of the committee. The program is a complete recreational program, the main source of entertainment is that of having pictures shown nightly in the Auditorium. The educational program provided by the teacher training department is continuing the majority of the time of all children from two years of age up through high school. The Home Bureau organization has been assisting in the persons of Mrs. J. S. Mcintosh, Mrs. Chandler, and Mrs. Bridges. They have conducted bridge, games, and sponsored a number of social functions. These have somewhat delayed the advancement of this program. The Home Bureau organization is national in scope with its regional base at the University of Illinois.

The committee in charge of returning the concert to the campus, under the leadership of David S. Mcintosh, Chairman, Dr. H. M. Nolan, Miss Lulu Reiser, Miss Gladys Williams, Mr. Wendell Mearns, Mr. T. L. Bryant, and Mr. C. Logan.

Swinging into the second week of rehearsal for the debut of the new regular college teachers and members of the teacher training faculty are being relieved from the extra duty as rapidly as other teachers are added to the emergency staff to take their place. Mr. C. H. Ammons, City Supervisor of Schools, at Bridgeport, has assumed the general supervision of the educational program. Miss Stiff Trout and Mr. Dilla Hall are still in charge of the Negro and white schools respectively, with Miss M. Mott handling a combined nursery and primary kindergarten school.

George Barre, who is principal of the regular college teachers and members of the teacher training faculty are being relieved from the extra duty as rapidly as other teachers are added to the emergency staff to take their place. Mr. C. H. Ammons, City Supervisor of Schools, at Bridgeport, has assumed the general supervision of the educational program. Miss Stiff Trout and Mr. Dilla Hall are still in charge of the Negro and white schools respectively, with Miss M. Mott handling a combined nursery and primary kindergarten school.

The moving pictures are in charge of Mr. C. Logan who is circulating films from the Y. M. C. A. throughout the school. The films are chosen on a three part objective, health, industry, and amusement. Efforts are being made to secure some sacred films for Sunday use.

Noting: Foyevether, M. D., "Anne at Work"; Albert, "Let Freedom Ring"; Robinson, W. A., "Voyage to Galapagos"; Sullivan, Mark, "The Twenties"; Hulchins, R. M., "No Friendly Voice"

## BARRERE LITTLE SYMPHONY WILL BE HERE FEB. 23

A little over thirty years ago a young Frenchman, declared the world's finest flutist at the time and still he lived so by many, stood at the railing of a ship which was bringing him to America to become a member of the New York Symphony Orchestra under Walter Damrosch. This man was Georges Barre, later to found the Barre Little Symphony, an organization devoted to the playing of long-forgotten works of the great masters which had passed over for a century, mainly because there was no orchestra of the size and calibre for which they were composed.

The Barre Little Symphony which is appearing here on February 23 as the final seasonal offering of the Carbondale Cooperative Concert Association, has an interesting origin. Barre, an original member of the Paris Philharmonic Orchestra played in a concert with Olive Fremstad at Carnegie Hall under the direction of Barre, solo flutist in the New York Symphony at the time. In 1916 Barre returned to France, but remained and concentrated under that name, immediately "Little Symphonies" sprang up all over the United States, and in order to keep his organization differentiated from all the rest, he named it the "Barre Little Symphony." And ever since the symphony has been in existence.

Concerning Mr. Barre himself a biography reads, "George Barre, the world's premiere virtuoso of the flute, was born in Bordeaux, France. When a small child, he was taken to Paris by his parents where he was brought up and educated. At the age of thirteen he entered the National Conservatory, studying first in the flute class of Henry Altes, and later under Paul Taffanel. At the age of nineteen he was graduated, winning first prize, after years during which he had combined arduous studies with his flute playing. He was named first flutist and at the Concerts de l'Opera as second flutist. That year, too, he organized the first chamber ensemble of woodwinds, the Société Moderne d'Instruments a Vent. Appreciating its artistic importance the concertmaster of the Paris Opera named him an officer of the French Academy. This organization was the first of the Little Symphonies which is famous throughout America today."

After filling various posts in the Colonne Orchestra and the Paris Opera, and teaching privately and at the Schola Cantorum, Barre has assumed the general supervision of the educational program. Miss Stiff Trout and Mr. Dilla Hall are still in charge of the Negro and white schools respectively, with Miss M. Mott handling a combined nursery and primary kindergarten school.

George Barre is also a member of the faculty of the Juillard Graduate School where he conducts a special class for students of wind instruments in the art and technique of ensemble playing. His directions are given in connection with the string orchestra already established at the school.

The Little Symphony's style of concert is the subject of much comment. A delightful informality, heightened by the inimitable witty and entertaining talks between members by the distinguished conductor, makes the Barre Concerts unique in the present day musical life of the country. And musical critics the country over have much to say in favor of the group.

"These entertainments fill a unique niche in the platonic musical life of this metropolis. The charm of their informality and their intimacy heightened by the inimitable talks with which Mr. Barre prefaces each number that he conducts, has not its equal hereabouts. New York would be the poorer for lack of the Little Symphonies."—New York World-Telegram.

Arthur Kallet, Carbondale senior, who will play the leading role in "The Three Kings," musical spring presentation of the Little Theatre.

## CHAPEL PROGRAM FEB. 18 FEATURES DRAMA CRITIC

John Mason Brown, popular dramatic critic and reviewer will be brought to this campus in a chapel program, February 18, in the which number on the Entertainment Course Program sponsored by the Cooperative Concert Association.

Mr. Brown, dramatic critic of the New York Evening Post, will lecture on the subject of "Theater." He has been one of the most popular lecturers on the theatre. This popularity is due to Mr. Brown's great charm as a speaker and to his profound knowledge of the theatre. Just the most important reason for this popularity is the fact that all his subjects are novel and his material entirely fresh. He has drifted miles away from the beaten tracks of the artistic comment and criticism and has found new pathways of universal interest and appeal. The most important thing in presenting John Mason Brown to the lecture public is the fact that he is a brilliant, witty speaker who has never failed to amuse and instruct any audience whom he has addressed. Whether he is talking on the latest plays on Broadway, whether he is reviewing little known and unexpectedly fascinating incidents about the pioneer actresses in America, or whether he is installing new life into old Shakespearean homes, Mr. Brown is always entertaining, always brilliant. His criticism sweeps his audience with him so well are his word pictures and one has all the sensation of being at a good show.

John Mason Brown began his writing career as a reporter on the Louisville Courier-Journal during the last days of the Henry Watrous lecture tour. He has since then been in the theatre where he has been a member of George Pierce Baker's famous at Workshop course with a gym leader degree in 1923, he accepted a position as head of the Dramatic Department of the Summer school of the University of Montana. So began his career as lecturer.

Since then Mr. Brown has been staff lecturer for the American Laboratory Theatre, in New York City. He is now staff lecturer for the Institute of Arts and Sciences, Columbia University, the League for Theatre Education, the New York Theatre, Philadelphia Forum and the Franklin Institute of Arts and Sciences. He is head of the Dramatic Department of the latter institution. In 1932-33 he gave a series of lectures at Yale University on "The History of Criticism." He has also lectured on "The History of Criticism" and "The History of Criticism."

Probably no one has a more thorough knowledge of the history of the theatre, the stage, and the actor, and one has only to read his books, "The Modern Theatre in Its History" and "The American Theatre as Seen by the Critics," "Letters from the Shakespeare Club," and his latest book, "The Art of Playwriting" to appreciate his experience and background.

## MacDowell Club Gives Performance Of Cantata Before Farm Group

The MacDowell club gave the initial performance of the cantata, "MacDowell's Wedding Feast" before the representatives of the Farm and Home conference in the Shroyck auditorium last night. This conference was given with its delegates from southern Illinois is the first of its kind to be held on this campus during a period of twenty-one years. Mr. Muncy, head of the S. I. N. U. agriculture department is in charge of the conference which opened yesterday.

The cantata, MacDowell's Wedding Feast is based on the poem of the same name by H. W. Longfellow set to music by S. Coleridge-Taylor. The tenor solo, representing Chibbloss, the musician friend of MacDowell, was taken by Frank Thomas. Miss Margaret Cline accompanied the solo and chorus parts. The cantata was given under the direction of David S. Mcintosh, head of the S. I. N. U. music department.

## ARTHUR KALLET WILL SPEAK HERE TONIGHT AT 8

"Advertising and the Consumer" will be the subject of the lecture which Arthur Kallet, present director of Consumers' Union, will give at the Shroyck Auditorium tonight. A popular in paragraphs of the quality of highly-advertised products. Kallet has become famous for years when the book "100,000,000 False Facts" which he co-authored, was published.

Kallet's excises have attracted national attention and have inspired Congressional legislation for food and drug reform. Although the passage of bills to protect the consumer from the advertiser says, "I am advised, Kallet continues to write books and magazine articles in which he analyzes and lists both acceptable and unacceptable products now on the market.

Former secretary of Consumers' Research, Kallet is now the director of a similar publication, Consumers' Union. The latter magazine not only analyzes widely-advertised products, but also gives a report on the labor conditions of the manufacturer's plants. His books, "100,000,000 False Facts" which he wrote with F. J. Schiller, a friend of "Consumers' Research" and "Counterfeit," his latest publication, and his magazine articles are compilations of research which he had done to protect the consumer by publishing scientific facts about the most highly-advertised products.

In "Counterfeit," a copy of which is on reserve in the library, Kallet presents his findings in both text and photographs which vividly impress the reader. The book is a consumer's survey of products and advertising in such fields as food, cosmetics, clothing, and cosmetics. In the conclusion the author prophesies that as long as industry is privately owned and operated for profit, inferior products will be sold to the consumer. He states that goods counterfeited will end only when it does not pay.

The lecture will begin at 8 o'clock this evening. Admission at the door will be 50 cents for persons, but student activity tickets will be honored.

## 45 STUDENTS WORK ON FLOOD RELIEF HERE

For the past two weeks about 45 students have been averaging three hours each, giving aid to the flood refugees confined on this campus. This group of students consists of F. S. A. students and volunteers who give their time to help the victims in charge of care for these people.

There are certain positions to be filled every day. Marshall Howell, whose office is on the second floor of the library, makes these appointments from the lists of students who turn in their names.

These people are sent to Holden Hospital to help the nurses. They go to the new gymnasium and four to the old gym for general duty. Six distribute clothes at the new gym. Four strengtheners work at Red Cross Headquarters. One does record-keeping at the Red House, and two promote students to orderly work.

Besides these regular positions to be filled, usually ten to fifteen calls are sent in each day for special workers wherever they are needed. Twenty-one years, Mr. Muncy, head of the S. I. N. U. agriculture department is in charge of the conference which opened yesterday.

NEW TRAINING SCHOOL NECESSARY TO KEEP PACE WITH THE TIMES

As the educational standards of the college have improved during the last twenty-five years, it has become evident that the equipment of the training schools is inadequate for the changing needs of these schools.

Provided with a new training school, the college could more capably serve the Southern Illinois schools. With proper equipment, the S. I. N. U. training schools would be the center of the educational interests of Southern Illinois preparatory schools.

With what would a model training school be equipped? It would contain plenty of land to provide playing-fields and many kinds of recreational facilities which would enable the pupils to play, safely removed from the dangers of the street.

For recreational activities, gymnasiums for boys and girls and an indoor swimming pool would be constructed. On the grounds there would be a football field for boys and a soccer field for girls as well as playing-grounds for the smaller children.

With such a training school, S. I. N. U. would give its students an excellent background for college life work. Its preparatory schools could be an example which other Southern Illinois public schools could study when they desire to improve their own standards.

QUOTABLE QUOTES

"The worst thing that can happen, it seems to me, is to have a school deal principally in terms of fear, force and artificial authority." Dr. Albert Einstein of relativity once suggests a dose with the "ill" that you if you aren't soon" sleep in schools.

Now in that fall let his retro-... President Roosevelt has a new... Supreme Court. His critics say that he is determined to force through any legislation he desires by pulling the teeth of the judicial lion.

PHILosophical Life is just the little trivial we're brought into this world without any consent or knowledge, and it's really uncertain by one's parents.

Announce Livey is "putting the time" on our best Broadway "Truth" show. He's a real "chick" here.

MAJORITY OF 1937 SENIORS FAVOR MORE DIRECTION AND GUIDANCE IN PLANNING COURSES ACCORDING TO QUESTIONNAIRE

I should have been flattered by your direction and guidance in planning my courses that I received... Objectionable because of limitations on minority religious groups... Should be discontinued at once... Would dispense with all but shopping... Choosing from another group of seven statements, the seniors again showed no uniformity of opinion as they divided their votes nearly equally among three of the seven alternatives as follows: 'Believe student assemblies similar to those now hold contribute educational and recreational values that would probably not be secured in any other way...'

THE TORCH BEARER' SELECTED BY SOCRATS AS SPRING PRODUCTION

The Socratic literary society has selected "The Torch Bearer," a comedy in three acts, by George Kelly... The play is about a group of people who, organized a dramatic club among themselves and hope thereby to aid in spreading the Little Theatre movement all over the country... The leading man comes home from Chicago to find that his wife is taking the place of the leading lady, who's husband has recently died... The entire production is a satire on the Little Theatre movement and the inability of the actors... The date of the play has been set for April 11th at 8:00 P.M. but don't let that fool you into staying away.

PYLON

"Errikitt errikitt!" splattered the radio. "All persons are ordered to leave Riverfront tonight. The water is at fifty-eight feet and is expected to reach the crest at sixty feet by tomorrow. Rrrrrrrrrk!"... "They can't put us out of our homes," snarled Grandma. She was a small thin woman with a sharp nose and temples... "But, Grandditt, it's for our own good they're doing this," interposed Grandma... "It was wisdom that he stood up against Grandditt, but he felt the necessity of doing so today. The water is rising so fast already in the first floor of this house. He and Grandditt had worked frantically yesterday and the day before carrying their belongings upstairs and storing them into these three crowded little attics."

"I had to wade knee deep when he went for drinking water," Grandma coughed. He was getting too old to wade through icy water and hoses, the place was probably infested with typhoid and malarial germs. Grandditt launched himself over the tiny oil heater which was all they had left... "Own good! Hoo-hoo!" snarled Grandma. "Dragging folks off from their lawful homes to some outlandish place and keeping them in charge... They shan't do that with me... Grandditt thrust through water... Grandditt said nothing. He saw the case was hopeless. But he shivered as he opened his front closet to the stairs... His hands were white and smarted and the veins stood up upon them like blue ropes. Fanny, how helpless and stiff those hands were again!"

Grandditt went ahead with her... She straightened up the parcel, everything was as straight as was possible in the first place. She found her stocking ball and sat down to darn stockings. Grandditt thought that if ever she would run out of holes to darn, she should get on more with the stockings she carried in her apron pocket. Then he put the thought aside as being distasteful... Grandditt and Grandma sat eating supper. They didn't have much—some cold meat left over from Sunday, two days ago, and a few potatoes and bread. Grandditt had made tea with the flood water and it took care for the kettle to boil on the little heater. By now the water downstairs was five feet deep. Three times during the afternoon boats had come past offering to take them to Steamtown where they could catch the train to Hillview. Grandditt had answered each with the same words. She had lived through three floods in this...

COMMERCE CLUB WILL HEAR ELDORADO HIGH PRINCIPAL TONIGHT

The group of directors of the Commerce Club has planned a program tonight featuring as their guest speaker, Professor T. Lee Dook of the Eldorado High School. Mr. Dook is the Superintendent as well as the head of the Commerce department of the Eldorado High School. He will speak on "Broad 'Selfishness' of Commercial Education." Other members of the program will be furnished by students from the Eldorado High School. There will be a ten minute debate on the question: "Resolved that all decried utilities should be publicly owned." A musical number will also be on their program.

The meeting will be held in the Altus building auditorium and will start promptly at 7:00. All students and their friends are invited.

She would manage to live through this fourth one... "That night the river reached its crest and all persons was swept under water. Nearly all the buildings had left. Tragedy stayed with those who stayed. Early next morning rescue boats plied their way among the tangles of twisted wreckage that had once been a town. From the roof of one house a groaning old woman was hauled down into a boat. Across the same roof, his parrot old hand clutched the ridgepole, lay Grandma Fulton, dead."

I saw them emptied from the cars... Of refugees from flooded regions, driven before the river's monster thirst... He had failed to move them till their homes were risen... Their only chance for survival lay in a living drowned... He had destroyed before their eyes, and naught... For food or clothes or covering could be found... From island-house-trees, then, escape and sought... With rats and boats and trains we brought them here... To safety where the floods have failed to reach... We fed and housed them, but not their souls... For lost ones, loved ones haunts the place of each... The same flood specter, still among them, traces Blank uncertainty on homeless faces.

ILLINOIS CENTRAL SYSTEM AN ILLINOIS RAILROAD

YOUR HOME IN 1876

By GILBERT VAUGHT

Along the northern boundary of the state is a strip of land, which comprises 1122 square miles and was named Boghots County. The first settlements were in the spring of the year 1830. One of the settlements was at Danium, which is now called Grandditt. The other was at Hillview and the earliest school was in a log house near there where Judith Stanley was "school marm." Later, in 1833, the Methodist Church was erected in the John Morris settlement. The Indian tribes, that were in that part of the state were the Kickapoo and Potawatomi, but they were always very friendly and soon crossed the Mississippi in 1836. The first county seat was Montgomery, which was opposite Grandditt on the prairie river. Later it was moved to Middleport and finally to Watska. There is a good coal and limestone field in the county; timber is abundant in the county; and there are also brick kilns. There is much manufacturing of blue crockery. Several streams water the county, and the soil is heavy. All grains and fruits are produced except peaches. Several railways are in the county. They are: Illinois Central, Gilmah, Clinton and Springfield, Toledo, Peoria and Warsaw, Chicago, Danville and Vincennes, and Kanakee. In 1870, the population of the county was 25,572. Watska, which was named after a beautiful Potawatomi squaw, was originally South Middleport. In 1870, Watska was adjoining Middleport. The two towns had a population of 2,800 and an annual business of \$500,000. The two towns were famous for their court house, jail, fire-proof vault, prohibition of saloons and sale of liquors. Four other cities of the county are Gilmah, Loda, Onarga and Chebanua.

Elmer Rowell, head dog salesman at the University of California, formerly gave used "hot stuff" to bent men. When his clothes caught on fire, he put out the blaze by spilling mustard on himself.

The Daily Californian evidently believes in teaching its readers by repetition. It stated five times in succession that "it is a little known fact that polo, a game of the ancient Persians, was invented by Chinese."

MY WATCH IS SLOW... TIME FLIES, and trains on the railroad fly with it. It is a frequent compliment for watches and clocks to be set according to the passage of the trains. Yet the years are constantly requiring new schedules to meet the accelerated tempo of modern business. Passengers today must measure their miles by their minutes, and freight must travel at what used to be good passenger-train speed. The Illinois Central's streamliner Green Diamond, for example, makes its daily 588-mile round-trip between St. Louis and Chicago in 590 minutes, including stops. The MS-1 (Merchandise Special, a freight) reaches Memphis overnight from Chicago, after several stops, covering the 527 miles in 830 minutes. REMINDER... To meet new needs in new ways, but with never a sacrifice of ancient virtues—that, I believe, is the greatest achievement to which the railroads can today lay claim. Speed is fast, but it's the best when backed by the safety, comfort and dependability of railway experience.

HAVEN'T HAD SUCH A GOOD TIME OR SO MUCH TO EAT SINCE THE LAST FLOOD—PHRASE LIKELY TO BECOME LEGEND IN 1937 DELUGE

By JOHN ROGERS

The hapazard phrase "Haven't had such a good time or so much to eat since the last flood" promises to become the legend of the Great Ohio Flood. As Paul Barrett, who has taken Captain William McAndrew's place says: "We keep them busy from dawn till dark. Food team, contain them, give them a good place to sleep; and they don't have much time to worry."

At present, there are about 245 colored refugees quartered in the Old Colored building approximately 325 whites in the new gymnasium. The arrangement is due to the fact that there is constant coming and going. The original total of about eight hundred has been reduced to the present 570.

The Women's Athletic Association, represented by Frances Sierkowski, has suggested the possibility of a dance for the refugees tonight and has offered to procure an orchestra for that purpose. The women and girls who are quartered in the poor's gymnasium objected to so strenuously being moved about that the refugees decided to have their dance in the northeast room, on the upper floor. Labor P. Little, who is in charge of feeding arrangements, has worked out a very efficient system of feeding the refugees. The food is prepared under the supervision of William Kaufman, dietitian, in the lean to kitchen which is located just opposite the food laboratory. In the kitchen are three "dutch ovens"—about five feet square and one foot high with stove pipes running through the roof. They are walled with brick and topped with sheet iron. The food is cooked in huge corrugated iron tubs, and cans cooked. It is passed through the window into the food laboratory. The refugees file through the laboratory cafeteria style, and receive their rations in tin cups and plates. Then, they go into the south hall or the sewing laboratory place their food on the long tables and eat with gusto.

When they have finished eating they pass their dirty dishes into the west tent. There knives, forks, spoons, plates, cups, and pans of all sizes are washed and dried by the

handmaids and carried back into the food laboratory. Utmost cleanliness characterizes all food preparation, especially baby food. Bottles are sterilized, evaporated milk, bottled water, and Kaffir are mixed by special formula. All is accomplished with great care. Colored women do most of the washing of dishes, but most of both rations are cooked in the kitchen. A colored man spends most of his waking hours chipping wooden tin stands for kitchen fuel. Sample menus: Sunday, February 7 Breakfast: Grapefruit, Eggs, Molasses, Bread—butter, Coffee—milk. Dinner: Chicken, Noodles, Sliced Potatoes, Mashed Potatoes, Pickles, Mixed Fruit, Bread—butter, Coffee—milk. Supper: Stewed Prunes, Sausage (meat), Jelly, Tea—milk, Bread—butter, TODAY: Breakfast: Grapefruit, Eggs, Molasses, Bread—butter, Coffee—milk. Dinner: Stew (Army style), Lima Beans, Pickles, Bread—butter, Coffee—milk. Supper: Stewed Prunes, Sausage (meat), Molasses, Coffee—milk, Bread—butter.

Claude A. Watson, candidate for the vice presidency of the Prohibition College, will speak in the college chapel there later this month.

Wonder if Southern will enter a rig squad in the Golden Gloves contest next year? It wouldn't be a bad idea.

Dr. B. Hample and Dr. E. L. Gibbs of the Harvard University medical school have discovered that the brain waves in a cat correspond closely to those found in man.

Approximately 80 per cent of the people who get pneumonia either contract the disease while they are having a cold or after they have recovered from one.

S. I. N. U. GRADUATE COMPLETES DISSERTATION ON TENNESSEE VALLEY AUTHORITY; WRITES OF POSSIBLE MEANS OF CONTROLLING FLOODS SUCH AS THIS ONE

The following letter from Clarence H. Lodge has special interest in view of the recent and present Ohio River flood. Mr. Lodge is an S. I. N. U. graduate of the class of 1932.

"As you know, I am finishing my dissertation here at American University on 'The Tennessee Valley Authority: A National Experiment in Regionalism'. Perhaps the readers of the Egyptian would be particularly interested in this since in following brief account of flood control in the Tennessee Valley Basin, and of legislation now under consideration in regard to similar measures in other river basins?

"The Tennessee Valley Authority has as its chief objectives: (1) a maximum amount of flood control; (2) a maximum development of the Tennessee River for navigation; (3) a maximum generation of electric power consistent with flood and navigation control; (4) recommendations for the economic and social well-being of the people living in the river basin; (5) a comprehensive regional planning and development of an entire watershed, the Tennessee Valley Basin. It is a perfect illustration of what the Federal Government can do, by means of a Government Corporation, to control the flood waters of a turbulent river, and thereby prevent human suffering, property damage, and indirect losses resulting from interrupted traffic and business, spread of disease and unsanitary conditions in flood towns, or depreciation of land due to overflow and soil erosion, such as is now taking place down in Little Egypt.

"Prior to the creation of the Tennessee Valley Authority, flood damage on the Tennessee River and its tributaries annually reached the figure of approximately \$1,750,000, according to Army Engineers' computations. At Chattanooga alone, the annual flood damage cost \$687,000.

"The influence of the Tennessee Valley Authority is clearly seen in view that a dozen bills which have been introduced in the 74th Congress for the purpose of fostering flood control, navigation, power development, and checking soil erosion in other parts of the country. Fundamentally, they denote a growing recognition that problems of flood control and conservation of our natural resources involve public river systems and that great public benefit is to be derived from coordinated regional development and control of them. Twelve drainage basins are affected and the total area involved is equal to approximately half of the entire United States. Federal Corporations, similar

EGYPTIAN ELLA SAYS:

"Magnificent—Audge thinks that a clipper ship is a floating barber shop where sailors get their hair cut. She probably thinks also that Eve Primp Shor is top ladies only. La Von has just announced that every Monday night will be Men's Night. How about a shampoo fellows? Phone 520 for an appointment.

"Thoughtful Friend: 'My good man, why don't you take the stuffer home?' Humiliated One: 'Sir, no use. W.W.I.E. wouldn't let me keep it in the house.'"

LOOK!

through the ads in the EGYPTIAN this week and 'see' just who is willing to make a bid for your trade by purchasing space in your paper. Even right around the campus, you will see that some of the places of business are loyal to us, while others are in business to make all they can and are not willing to expend the small amount each week which is necessary to properly bid for our business.

Do not patronize the non-advertisers! They are eagerly grabbing—trying to get hold of our money—and are not sports enough to solicit us in the accepted manner. So stay out of their places... and if you do go in, don't buy anything.

BOOK REVIEW BY BETH BRUCE

INVASION. By Maxence van der Meersch. Translated from the French by Gerard Hopkins. (The Viking Press, New York.) War stories written prolifically and most times badly have cluttered up the book market since Homer's Iliad. This one is no worse and no better than those which have gone before it. It is written of the non-combatant French people, stranded behind the German lines in 1914. Despite the connotation of his name, the author, M. Van der Meerck, is a Frenchman, a citizen of Roubaix, one of the towns actually occupied by the enemy during the war.

The pattern of the story itself is rather unconvincingly developed, with a profusion of character analyses. The range of humanity depicted is from the uppermost stratum of commercial snobism to the sordidness of the lower levels. Obviously, the author's intent was to expose the mercenary practices of his fellow-countrymen while at the mercy of the German invaders. His object is clarified by a very well done contrast between the idealistic heroism of those citizens who did remain loyal to France and the mean pettiness of those who bartered with the enemy. The physical sufferings and hardships of these people are not forgotten, and M. Van der Meerck makes the most of the grim tragedy and pessimism that stalks the normally pleasant French countryside.

Measured against Erich Maria Remarque's All Quiet on the Western Front or Humphrey Cobb's Paths of Glory, this latest war "horror-story" does not suffer of comparison. It is another of those pertinent arguments for peace that are so often read unthinkingly as an adventure story.

The Granddaughter's Club at State Teacher's College, Farmville, Virginia, consists of girls whose grandmother or mother attended Farmville State Teacher's College.

Workersmen observed the front steps of Indiana University's law building to make them as smooth as they were in 1880.

A notice at the University of Illinois: "A wildlife club for students—graduate and undergraduate will be organized. Mail."

to the Tennessee Valley Authority have been proposed for the Columbia River Valley Basin; the Upper Mississippi River Valley; the Arkansas, White, and Red River Valley; the Washoe River Valley Basin, and a number of others. Surely, at this time, State and Congressional action in the matter would be opportune."

BENCHLEY SURVEY OF HARVARD CLASS OF 1912 VERY BLACK

(A. C. P.) The survey of John R. Tunst, author of "Was College Worth While?" looks like "A Prospectus for a new mining camp" compared with an "Eberling Statistics" a column in "The Twenty-First Century" press, a special publication of the class of 1912 of Harvard University, the noted humorist affirms: "Mr. Tunst, you will remember, took a good look at his class 25 years after graduation from Harvard, and found that practically nothing of value had been accomplished by his members in a quarter of a century."

Benchley, a graduate of the 1912 class himself, reported that the class produced only one Bishop of Albania, or at any rate only one Bishop of Albania who later became Prime Minister. "If I were a calvary bowler," he continued, "I could show that 72 per cent of the class were bowlers. The name, 91 per cent can't jump and that we haven't a single President of the United States."

Carnegie Group Makes Report On Education

New York, N. Y.—(A. C. P.)—"To avoid the emergency of educated professionals, with the tragedy that have been witnessed in Europe by the direct result of overcrediting in certain professions," is the worldwide program of organized education, the Carnegie Foundation on the Advancement of Teaching concluded in its latest report.

Because Italy has recognized the need of the "right education for the right individual" to preserve a sound social order, says the report, she has reorganized her entire educational system.

"The unrest due to overcrowding in the universities and consequently in the professions was without a doubt a contributory factor to the Nazi revolution," the report continued.

The report, formulated by I. L. Kandel, Professor of education and Associate in the International Institute, Teachers College, Columbia University, is published as "Bulletin 29: Examinations and Their Substitutions in the United States." The conclusions are:

"The problem of examinations strikes at the very roots of the whole meaning and significance of education for society. It raises the question whether society can proceed, as it has in the past, and in the past, on the assumption that there is only one pattern of culture, of liberal education, to which all must be molded, as they advance from the elementary to higher education.

"It inevitably brings up the problem of the social and economic distribution of individuals and society and the danger to social stability which may result from educational and vocational maladjustment. This issue in turn leads to the question whether it is not the function of an educational system to promote the best social adjustment of the individual by putting him in the way of the highest development of which he is capable and which will contribute to the best progress of society itself.

"To approach the problems of education in this way may be a shock to those who feel that further differentiation in education and adaptation to the interests and aptitudes of individual pupils may mean a departure

New Mathematics Course At S. I. N. U.

The first year's work in mathematics has been reorganized to give students who do not wish to major in the physical sciences an opportunity to obtain an understanding of important mathematical relations and their uses, and an appreciation of the mathematical method of approach. The Elementary Mathematical Analysis course which replaces the traditional college algebra, trigonometry, and analytic geometry gives an introduction to the meaning and applications of the calculus as well as the more important functional concepts usually given during the freshman year. Drill in purely mechanical operations is sacrificed for a richer study of meanings.

A course giving credit toward a degree is now offered for those who will be teachers of mathematics in the elementary school. A logical and historical development of number concepts is given along with a survey of methods now in use.

Courses in the mathematical theory of statistics are offered not only to broaden the prospective teacher of mathematics, but also for those in other fields of study which make use of these important applications.

The senior college courses are planned so that the students majoring in the department can satisfy those recommendations listed as desirable, as well as those listed as minimum, in the report of the Committee of the Mathematical Association of America. Majors in mathematics are urged to take the course in high school methods, which is taught by the college teachers before their work in practice teaching.

Courses in playing house, swinging, climbing, riding kiddie-kars, and blockbuilding are offered in the University of New Mexico's emergency nursery class this fall.

from the Great Tradition, meaning by that the classical tradition, a knowledge of the best that has been said and thought in the past.

"Those who profited from the Great Tradition were in the past a selected minority. Today the task is two-fold: first, to refine the concept of liberal education in terms more appropriate for the world in which we live, and second, to provide appropriate types of education for the increasing numbers who are entering on some form of post-primary education and proceeding even beyond that stage."

This means a New Tread of General Rubber is vulcanized upon your good smooth tire without heating the side wall or removing what rubber that is already on the tire. WE GUARANTEE 15,000 MILES But our Retreading runs many thousands more. Visit us for Free Inspection.

Universities Defy Uncle Sam's Tax Collection on Sports

Washington, D. C.—(A. C. P.)—Old Uncle Sam can just try and collect! That is the stand taken by the four colleges and universities who because they are state supported institutions have refused to pay the 10 per cent federal sports admission tax.

William and Mary, the latest college to object, denied the government's right to force a state institution to collect taxes or to levy and collect taxes from a state institution. Furthermore, authorities said, the Virginia college would attempt to get a refund on all levies paid the federal government in the last four years.

In Atlanta, Federal Judge E. Marvin Underwood enjoined the government from collecting taxes on football games of the University of Georgia and Georgia Tech. "Athletic programs and contests for which admission is charged, under the decision of the Court of Appeals in this case, are an essential governmental function of the State of Georgia."

Gains on luck taxes from the University of Iowa have been carried to two courts already. The University of Minnesota has been sued by the federal government.

A committee of the National Collegiate Athletic Association is studying the problem, and, according to informed sources, would like to have a test case brought before the Supreme Court.

The registrar at the University of Oklahoma proved statistically that students with the thinnest wallets get the most "As" when two state legislators complained that the \$2 "stinking fee" is a hardship on poor students.

Henry Ford the second, grandson of the automobile manufacturer, is now a freshman at Yale.

BARRERE LITTLE SYMPHONY WILL BE HERE FEB. 23

(Continued from Page One)

"The performance was refined, vivacious, and finished."—New York Times.

"Mr. Barrere's Little orchestra fits its tone, its balance, and its refinement of expression was irresistible."—New York World.

"The Little Symphony is not misnamed, for its instruments produce all the symphonic colors in pastel shades and paint with them some delightful miniatures."—San Francisco Journal.

"Some of the most charming and diverting concerts of the season are those presented by that delightful lecturer, musician, conductor and musician of the flute, Mr. Georges Barrere. The first concert of the Little Symphony Series was given before an audience which packed the Henry Miller Theatre last evening. The program was delightfully played, and Barrere's men seemed to enjoy the music as much as their audience."—New York Sun.

Mr. Barrere is now an American citizen, but still wears his long salt-and-pepper beard. It saves him time and money, he explains.
