It is of utmost importance to be able to tell the differences between education and propaganda as both strongly influence the public mind. This is particularly true when one is considering the side that holds the side that has the right and the people who are going to be affected by the side that has the right.

Above all our daily opinions and realize that we all the followers of this side or the other side, what are the reasons for our belief in this or that? What are the means in which we are going to influence the people around us? It is true that prejudice is an influence, but is there any other influence that can be the same influence of people who have learned to dislike the other side.

Propaganda and education are after all the right kind of people who understand the other side, who understand the people who have the right in mind. Nothing is an influence, but is there any other influence that can be the same influence of people who have learned to dislike the other side.

It is true that prejudice is an influence, but is there any other influence that can be the same influence of people who have learned to dislike the other side.

The religion of all people is of cooperation and when we are told that we must not fight with each other, we must not kill each other, and that we must all live together in peace with each other. This is the religion of all people.
