Arch Heatster Makes His Own Cool, 'Prescribes' Air Conditioner for Dorm

Students aren't permitted to have air conditioners in their dormitory rooms, and residents of Southern Hills must have a doctor's permit to have one installed in their apartments.

However, at least one enterprising young man and his roommate have had a few days of comfort by breaking the rules. The air conditioner installed in the dorm window last Sunday brought a sudden

flood of visitors to the room.

"We even had several overnight guests who brought their mattresses in and slept on our floor," one of the men in the air-cooled room commented.

The "doctor's permit" rule went into effect at Southern Hills late in June when it became apparent that the circuits in the buildings were being overloaded by air conditioners.

A project is now under way to remedy the situation. When it is completed, the "doctor's only" regulation will be lifted.

However, persons wishing to install an air conditioner at Southern Hills must still meet several University requirements: They must own the air conditioner, it must fit a specific window in the

Finals Scheduled for Aug. 24 to 28

★ ★ Ag Fraternity Will Be Host To Convention

The SIU chapter of Alpha Zeta will be host to the national convention of the scholastic honorary fraternity for students in agriculture next month.

The convention begins Sept. 6 and will continue through Sept. 10.

Tharon O'Dell, chancellor of the SIU chapter, said 125 members from some 54 active chapters throughout the United States are expected to attend.

Sunday morning's opening convention activities include a meeting of the high counselor and a registration of all attending members.

Monday there will be business and committee meetings throughout the day. Louis Madsen, high chancellor from Washington State University, will direct committee work.

Tuesday's activities will begin with memorial services to past high officers of Alpha Zeta. Following the services, the committees will participate in group discussions.

The annual banquet will take place Tuesday evening.

Wednesday there will be a campus tour for the visitors.

The credential committee will hold its final meeting Thursday. There will follow an election of the new national officers for the coming year.

A luncheon and adjournment meeting noon Thursday will conclude the week's activities.

Present national officers of Louis Madsen, high chancellor, Washington State University; Fred LaCrosse, high censor, Oklahoma State; Fred Jeffery, high scribe, University of Massachusetts; Harry Crockran, high chronicler, Montana State; and C.B. Gililand, high treasurer, U.S. Department of Agriculture, Washington D.C.

HEADS UP — A row of bodyless heads rests under dryers in the Ag Arena where cosmetologists from around the state are undergoing extensive training at SIU's 12th annual School of Cosmetology. The school closes Friday.

Round Trip Fare: \$112

Deadline for Signing for Trip To World's Fair Is Aug. 14

Deadline for signing up for the Saluki Flying Club's charter flight to the New York World's Fair is Aug. 14.

Reservations may be made daily from 10 to 11 a.m. and from noon to 1 p.m. in the Activities Area of the University Center.

According to a club spokesman, the flight will leave either Chicago or St. Louis on Sept. 14 and return on Sept. 19.

Round trip fare for students is \$112. It includes air transportation to and from New York; four nights' lodging in a New York City hotel;

one admission to the fairground; one boat trip around the island of Manhattan; and other extras.

Fare for faculty and other adults associated with the University is \$120. In addition to all the other "extras" faculty and other adults will be given private rooms at the hotel.

The club spokesman said the hotel at which the group will stay is centrally located in New York City. He emphasized that everyone making the trip is a "free agent."

"This isn't one of those tours where you have to go with the group," he said.

Registrar Lists Exam Times For Twelve-Week Session

Final examination schedule for the 12-week summer term has been announced by Robert McGrath, registrar.

Exams will begin Aug. 24 and run through Aug. 28.

Examinations for one and two-credit hour courses will be held during the last regularly scheduled class period before the formal final examination period.

Courses with three, four and five credit hours will meet at the times listed below:

Monday, Aug. 24: 9 o'clock classes, 7:50 a.m.; GSC 101, 10:15 a.m., 12 o'clock classes, 12:50 p.m.

Tuesday, Aug. 25: 8 o'clock classes, 7:50 a.m.; Math 106, 220, GSD 108 a, b, c, and 114 a, b, and c, 10:15 a.m.; 3 o'clock classes, 12:50 p.m.; and GSC 102, 3:15 p.m.

Wednesday, Aug. 26: 2 o'clock classes, 7:50 a.m.; GSA 201 a, b, and c, 10:15 a.m.; and 4 o'clock classes, 12:50 p.m.

Thursday, Aug. 27: 10 o'clock classes, 7:50 a.m.; GSB 201 c, 10:15 a.m., and 1 o'clock classes, 12:50 p.m.

Friday, Aug. 28: 11 o'clock classes, 7:50 a.m., and make up examination period for students whose petitions have been approved by their academic deans, 10:15 a.m.

In case of conflict, the registrar said, students should petition the dean for approval to take one of the examinations during the make-up exam period. This does not mean that a student may decide to miss his scheduled exam time and expect to make it up during the make-up period, the registrar emphasized.

A student who has a teaching position which necessitates his being on the job prior to one or more of his finals is to be referred to his academic dean for instruction as to how his case is to be handled.

A student who otherwise misses the final examination will be given a "W12" followed by the tentative grade he was earning. Instructors are permitted to give examinations at a later date if they are satisfied that a student has a valid reason for missing the final.

All incomplete work must be completed within one year or it will remain as an incomplete grade on the student's record.

Board of Trustees Meet Here Friday

The Board of Trustees will meet at 9:30 a.m. Friday in its regular monthly session.

The agenda calls for consideration of proposals to eliminate fees and to waive fees and tuition. The Board will also consider changes in the Civil Service employee payrolls.

The Board members will also hear reports on availability of funds for a University Center at the Edwardsville campus.

SIU Power Plant Set for Expansion

Bids will be opened Aug. 27 at SIU for construction of a switch room addition to the power plant and electrical distribution modifications for the central campus area.

Willard Hart, associate architect at Southern, said the work will include construction of a new substation.

Extensive work has been in progress at the power plant since the summer of 1962. A building addition was completed and two new boilers were installed under a \$785,000 project to replace two existing 33,000-pound steam generating units with two more of the 80,000-pound size.

Students React to Attack on Ships by North Viet Nam

The far-away war in Viet Nam now seems to be much closer to home.

It is not closer in distance, but the second attack Tuesday by communist North Viet Namese on two American destroyers was felt throughout the country and the SIU campus as a direct assault on the United States.

Opinions of SIU students ranged from those of emotion-filled reaction to statements of thought-provoking interest.

A natural reaction of many students was summed up by Jim Sandrin, graduate student, when he said, "What else could we do? When you get kicked in the teeth, the only thing left is to fight back."

Another SIU student, Wendel Moran, said, "I think we should fight back—I'm tired of turning the other cheek. I'll support President Johnson all the way and what he said in his public address Tuesday evening," he added.

Joe Lauer, from St. Paul, Minn. now in training with the Peace Corps, said he watched the President's message Tuesday and consequently became "very worried."

Lauer didn't understand the real reason behind this action by the North Vietnamese, he said, "but it doesn't make sense that two of the Vietnamese boats were sunk and two more damaged while no damage or injuries occurred

to the American ships or men.

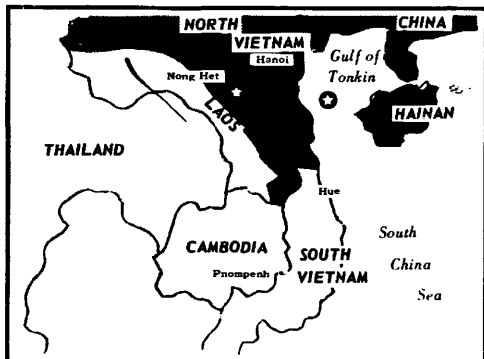

"This is what worries me," Lauer said. "There's more behind this than we hear or see on television."

A graduate assistant in history, Allen P. Cissell, couldn't think of any reason at all for this attack on U.S. ships.

"The North Vietnamese have been doing very well in their war thus far; now it appears like they made a very serious mistake," he asserted. "Surely, there is a reason for this, but at the present time it is very well concealed."

An unidentified student thought this might be an "anti-

Associated Press News Roundup

U.S. Aircraft Strike Red Vietnamese Bases

WASHINGTON -- U. S. aircraft splintered two dozen North Vietnamese PT boats Wednesday and made rubble of bases from which the boats had attacked U.S. naval vessels. The retaliatory strike gave thundering emphasis to a promise from President Johnson:

"No peace by aggression and no immunity from reply."

The President issued his stern warning in an address at Syracuse, N. Y., on the heels of a Pentagon news conference in which Secretary of Defense Robert S. McNamara reported the outcome of the explosive response to two attacked by Red torpedo boats on American destroyers in international waters off the Gulf of Tonkin.

McNamara's summary: Two U.S. aircraft downed by ground fire in 64 sorties from the carriers Ticonderoga and Constellation.

Twenty-five PT boats destroyed or damaged.

Four shore bases heavily

Security Council Hears Stevenson

UNITED NATIONS, N. Y. -- The United States told the U. N. Security Council North Vietnamese attacks on U.S. warships were designed to subjugate the people of Southeast Asia to a Communist empire ruled by force and terror.

U.S. Ambassador Adlai E. Stevenson spoke after the Soviet Union demanded postponement of the session until Thursday and then suddenly withdrew its demand.

Stevenson branded the North Vietnamese attacks as "deliberate military aggression against vessels lawfully present in international waters."

The United States counter-attack, Stevenson said, "was a limited and measured response," designed only to "make it unmistakable clear that the United States cannot be diverted by military attack from its obligations to help its friends establish and protect their independence."

damaged and an oil depot wrecked.

Other highlights since the crisis reached fever heat Tuesday:

--In advance of his public report, Johnson briefed congressional leaders, and the Senate Republican and Democratic leaders agreed to seek swift approval of a declaration of support for Johnson's actions.

--Abroad, the U.S. move brought expressions of support from pro-Western quarters in Asia and threats from the Communists. The New Evening Post, published by Communist Chinese in Hong Kong, warned that "Red China will not wait until the flames of war come too close" before retaliating against what it called U.S. provocation.

It was against that background that McNamara gave his accounting of the U.S. air action Wednesday and coupled it with this warning: "Whether this will be all that is necessary is up to the North Vietnamese."

Johnson pursued the same line in his address at ceremonies dedicating a journalism building at Syracuse University.

"The attacks have been answered," he said with the broad implication that the one strike is all that will come unless provocation grows.

Tass Calls Action By U.S. 'Hostile'

MOSCOW -- The Soviet agency Tass in a statement Wednesday night called the presence of U.S. ships and planes in the Gulf of Tonkin "absolutely unjustified" and part of an openly hostile act toward North Viet Nam and Communist China.

The Tass statement, issued simultaneously with the convening of a U.N. Security Council session in New York, added: "Competent Soviet circles resolutely denounce the aggressive actions of the United States in the Gulf of Tonkin which leads to a dangerous exacerbation of the situation in Southeast Asia, tense as it is."

'OK, WE'RE HERE AS ADVISERS--WHAT DO YOU ADVISE WE DO NEXT?'

Bill McClanahan, Dallas Morning News

FBI Now Looks for Killers Of Mississippi Rights Trio

JACKSON, Miss. -- With its six weeks' search for the bodies ended, the FBI Wednesday hunted the killers of three civil rights workers.

The relentless 44-day search closed Tuesday when three decomposed bodies were dug out of an earthen watershed dam near Philadelphia, Miss. A pathologist said all three were shot to death.

The dam is about six miles from Philadelphia in the thickly wooded, often swampy back country of Neshoba

Vacancy Bill Passes Judiciary Committee

WASHINGTON -- The Senate Judiciary Committee has approved a proposed constitutional amendment to deal with presidential disability and a vacancy in the vice presidency.

Under the amendment, the office of vice president would be filled by nomination by the president and confirmation by a majority of both houses of Congress.

The amendment states that the vice president "shall become president" in case of the death, resignation or removal of a president from office.

The amendment must be approved by two-thirds of the House and Senate, and three-fourths of the 50 states within seven years.

County -- an area infested with poisonous water moccasins and rattlers.

An official, who asked not to be identified, said bullets were recovered from all three bodies.

In New York, James Farmer, national director of the Congress of Racial Equality, called the slayings "a triple lynching." He praised the FBI's work.

The discovery, though expected, was chilling for many civil rights workers in Mississippi. However, leaders vowed the work would be carried on.

Two of the dead, both definitely identified, were white. They were Andrew Goodman, 20, and Michael Schwerner, 24, both of New York City.

Radio Message From Congo Says Rebels Rule Stanleyville

LEOPOLDVILLE, the Congo -- Stanleyville, key city of the northeastern Congo, was reported Wednesday night in the hands of Communist-backed rebel warriors. A message from Stanleyville airport at 5 p.m. said: "The entire city is in rebel hands."

A garbled message saying the same thing reached the United Nations in Leopoldville.

The radio message from Stanleyville Airport's control

U.S. Rushes Jet Fighters To Saigon

SAIGON, Viet Nam -- The United States rushed six supersonic Air Force F102 jet fighters to Saigon Wednesday, the Vietnamese airforce was put on alert, and tanks rumbled into the key northern base of Da Nang.

The swift air and ground military buildup was effected to meet any attacks from Communist North Viet Nam or Red China that might come with the crisis in the Gulf of Tonkin.

American military personnel in the 1 and 2 Corps regions in Viet Nam's North were restricted to their bases in an unofficial "grey alert" status that also enforced a 9 p.m. curfew.

The 1 Corps region, with headquarters at Da Nang, is regarded as a logical target for a Communist attack.

American sources reported the situation was tense in the area and that air activity on the Da Nang strip was "fairly heavy."

Some sources said it was possible that planes used to attack North Viet Nam bases Wednesday operated from Da Nang. The air base, a major one, can handle modern jet aircraft.

The five Vietnamese army divisions in the 1 and 2 Corps regions were put on alert. The Vietnamese high command in Saigon was reported to have issued top-secret directives.

South Vietnamese Premier Nguyen Khanh, after a conference with U.S. Ambassador Maxwell Taylor and an eight-hour Cabinet meeting, announced his government "supports the firm reaction of the United States."

tower said: "The A.N.C. (Congolese Army) has been pushed back."

Diplomats in Leopoldville did not consider that the messages were conclusive evidence that Stanleyville had fallen. But they took a very grave view.

Leopoldville Airport control tower, which picked up the radio message from Stanleyville tower, said the tower operator had begun calling "Help, help, help" about 20 minutes before he announced the city's fall.

The U.S. Embassy in Leopoldville has been out of touch with its five-man consulate in Stanleyville since 11 a.m. Wednesday.

Salinger Seated, But Conditionally

WASHINGTON -- The Senate conditionally seated Democrat Pierre Salinger Wednesday as the new senator from California. The roll call vote was 59-29.

Sen. Everett M. Dirksen, R-Ill., said earlier that Republicans are looking into the legality of the appointment of Salinger to fill the unexpired Senate term of the late Sen. Clair Engle, D-Calif.

The question was referred to the Senate rules committee for study. A report is due by Aug. 13.

GRADUATE STUDENT LEN GRANATO DOES HIS THESIS RESEARCH IN A LIBRARY CARREL.

End of Long Road

Summer Is Season of Big Story As Graduates Polish Off Theses

By Edward Pluzynski

Summer is the season of the master's theses at SIU.

Men and women of a wide range of ages extend their academic year to complete their theses.

"Because many of the summer students are teachers during the school year, they finish up their theses during the summer," according to Max Turner, AIU archivist.

"Most students take advantage of the summer term and take more time to finish," Turner noted from his years of experience at SIU, "especially those who plan to enter the teaching profession."

"There were about 200 master's theses completed at Southern during the '62-'63 academic year," said John Clifford, associate professor on the library staff. "The exact number for the '63-'64 year is yet unknown."

Titles of the various theses range from "The American Country Bumpkin as Comic Type in American Drama," to "The Intellectual Bases of the Progressive Movement," to "The Bedrock Geology of the Northwest One-Fourth of the Dangola."

A master's thesis ranges in length from 65 to more

than 200 pages. The average length of the thesis is about 120 pages, said a graduate student now completing his thesis.

A graduate assistant in the Department of Government explained that most theses are written for nine hours' credit, but most students spend more time in research and actual writing than nine classroom hours. He said in the average graduate course about one hour of credit is given for every 1,500 pages of readings, but while writing the thesis it's more like 3,000 pages for every hour.

The same graduate assistant described his thesis schedule from start to finish this way:

"After spending two or three quarters completing course work and reading about various subjects, I chose my general area of study.

"When I was sure that I was ready to start and would be able to complete the thesis, I chose a thesis adviser. The man I chose indicated he would be willing to work with me on the thesis. After this I received approval from the head of the department and began to work.

"I wrote a tentative outline for my proposed title.

This was done only after I had done research on the possibilities of several subjects and decided on one area. I brought the tentative outline to my thesis adviser and he approved or disapproved some parts, after which we had a detailed discussion of my topic.

"The rest of the work is fairly routine and depends on the student's ability, speed and desire to finish. You submit each chapter as you finish it; there is no time limit. You are completely on your own at this point. The adviser reads each chapter and constructively criticizes it for you.

"This same procedure is followed until the thesis is complete. The adviser is first to approve the final draft.

"Then the thesis is read by your thesis committee which is composed of the head of your department, your thesis adviser, and usually the dean or assistant dean of the graduate school.

"The final worry is approval or disapproval by the committee. After approval each master's thesis is taken to the library for binding. It is then shelved as a permanent record in the library.

SIU's Influence Is Worldwide

SIU faculty and students are in numerous places this summer. Some are in England, some in Mexico, some as far away as New Guinea. They are studying, doing independent research, or just touring. Nevertheless, they carry with them to numerous corners of the world the name SIU.

Yet the process is two-way, for the University's influences are spread not only by SIU people in foreign lands but by students from foreign lands who, for a short time, come to the United States and to SIU to study. From places such as Kuwait, Saudi Arabia, Burundi, Viet Nam, and Thailand students come to Carbondale.

The impression SIU has upon the world depends not only upon the accomplishments of the University's people overseas, but upon the success these students from foreign countries experience as students at this University. One organization doing much to help international students succeed here is English Language Services, Inc.

ELS, housed in buildings T41 and T42 on the SIU campus, teaches English to more than 75 foreign students, so they may better take advantage of the educational opportunities in this country.

ELS is a private organization. It is an American organization, for although it has representatives in 14 far-flung countries, its administrative offices are in the United States. In addition, it maintains two language training centers in this country. One is in Washington, D.C., and

the other is here in Carbondale.

English is taught as a foreign language by ELS, which uses modern methods that emphasize conversational fluency. At its SIU center, ELS maintains 12 classrooms, a 50-seat training room having audio-visual capabilities, and a 48-position language laboratory.

Most ELS students have studied English in their home countries. ELS courses help them brush up on or advance their knowledge of our language. The main course at the center is an intensive session of 25 hours a week. The majority of ELS students take this program, but ELS also offers programs of semi-intensive instruction which meet either five or ten hours a week. These are of interest mainly to foreign students already enrolled in the University who still wish to improve their English.

Students taking the intensive course are not enrolled in the University. After they finish their language training at the ELS center, many go on to other universities; many, however, choose to remain at SIU.

In addition to all this, ELS is providing the French and Hausa language training for the Africa-bound Peace Corps trainees now at Southern.

We are fortunate to have ELS at SIU. It is appropriate that an internationally minded university should have among its resources such a program to attract students from every part of the world.

Walt Waschick

Around Campus Last Week

THE SIU JUNGLE - A CASE, PERHAPS, OF NOT BEING ABLE TO SEE THE FOREST FOR THE WEEDS.

NOW WHO'D EXPECT A PENCIL SHARPENER TO BE USABLE?

W.W.

Environmental Retardation

The student at Southern may be well educated in his academic endeavors, but he lacks a total education. The words for this deficiency might be "environmental retardation." Because of lack of interest or lack of refinement, we have neglected our surroundings.

How many of us know exactly where we are? Sure, we know where Crab Orchard Lake is and a few of us have ventured into the wilderness surrounding our own Campus Lake, but how much of our environment have we really explored?

Most of us condemn our recreational facilities as well as our surroundings, but we are overlooking some of the most beautiful country in our state. If Southern Illinois is a depressed area, it is not because of its scenic spots. It is blessed with numerous scenic and recreational spots which might be totally foreign to you.

It is not enough to say that you went to Southern Illinois University unless you can also say that you went to Southern Illinois. Unless you can say that you actually know your surroundings, you haven't gained a full education from your choice of schools; your reason for choosing SIU has not been fulfilled.

If a person in that awful world we call "the outside" asks you about Southern Illi-

nois, you should be able to say more than I went to school there. Familiarize yourself with such names as Devil's Kitchen, Devil's Backbone, Bald Knob, Fort Massac State Park, Giant City, and Cave-In-Rock. We are hampered somewhat by the auto ban, but this should not be a hindrance to the industrious student.

Southern Illinois is rapidly becoming a recreation spot for people from all over the country. If you don't believe it, take a look at the license plates on boat trailers the next time you're out at Crab Orchard.

If you have not taken advantage of the wonderful scenic and recreational opportunities which surround you while attending school at Southern, then you are suffering from environmental retardation. Do something about it.

Larry Henry

There should be an international exchange of ideas--everybody knows so well how to solve the other fellow's problems.

On Other Campuses

Full-year School: Good or Bad?

The grueling prospect of a 12-month school year won't be in the future of the University, according to recent studies and reports on calendar changes for colleges and universities.

The trimester system, with three terms of approximately equal length running from September through December, January through April, and May through August, has been studied and considered in schools all over the country in the past four years. Two week breaks would end each semester.

The disadvantages of the trimester system outweigh the advantages, according to the 1962 report of the Committee on Institutional Research to the Senate.

Full use of facilities all year round and greater accommodation of students seem to be the main reasons for considering the trimester system.

But most reports, like the University's, have countered the system with a plethora of problems.

Any school adopting the system would have to completely revise curriculum and accreditation, especially if the school used the quarter instead of the semester.

Student employment presents another problem. Many students depend on summer jobs to attend school the rest of the year. The working students would have to attend only two semesters a year, which would defeat the purpose of the trimester system.

"The students themselves have shown that they don't want a 12-month school year," said T.E. Pettengill, recorder for Admissions and Records.

"Only 13,000 students this year have registered for summer session which is essentially another academic quarter. If we had the demand of the 35,000 students we have during the regular year, we could accommodate them," he explained.

The immediate need for an increase in faculty and facilities would present another problem, according to the

report. The summertime lack of use of building and facilities is frequently used for repairs and construction too, according to Earl N. Ringo, assistant to the director of the Bureau of Institutional Research.

The cost of increasing the faculty and facilities might well exceed the economical benefits resulting from full use of facilities, according to a research committee from Connecticut.

Furthermore, many colleges and universities, like Minnesota, have a thoroughly adequate summer program, which gives the students the benefits of an extra quarter.

Some schools, such as the University of Pittsburgh, have recently made the transition to the trimester system. Most schools, however, have either dropped or postponed the idea, according to Pettengill, as well as from various reports from all over the country.

The Minnesota Daily University of Minnesota

SIU Witnesses Changing of the Guard

Seven Chairmen Step Down to Make Room for the New

By Ed McCorkendale

To some it seemed like the changing of the guard. Seven chairmen of departments in the College of Liberal Arts and Sciences have stepped down from their positions for various reasons.

Charles J. Brasefield, retiring chairman of the Physics Department, has seen his department grow from only three regular faculty members to its present complement of 11 regular and two part-time members.

Brasefield came to SIU in 1954 to head the department. He had been a physicist in the Meteorological Branch of the Signal Corps Laboratories. In addition, Brasefield was a research physicist at the University of Michigan, an instructor in physics at Yale University, an assistant professor at the U.S. Naval Postgraduate School and head of the Department of Physics at the U.S. Coast Guard Academy.

Rounding out a full career as an educator, Brasefield said he looked forward to traveling during the first year of retirement. After seeing Europe next spring and summer, Brasefield said, "I will try to find something interesting and useful to do."

Brasefield is a fellow in the American Physics Society and also the American Association for the Advancement of Science. He received his B.S. degree from Rutgers University, was a research fellow at Princeton where he received his Ph.D. in 1927.

"I think the mark of a good department is its staff and students," said Paul J. Campisi, former chairman of

administrative mission with the North Central Association's approval of the Ph.D. program for sociology. I also feel that I could do more for the department and the University by helping to turn out excellent students, by developing the Sociological Quarterly so that it becomes one of the finest in the country, by finishing a book on social movements and returning to a long-time involvement with sociological research, particularly community studies."

Campisi is a former Fulbright scholar who served as senior research scholar attached to the University of Turin in Italy. He is also a past president of the Midwest Sociological Society and a member of the research committee of the American Sociological Association.

Bruce Harkness, chairman of the Department of English for the 1963-1964 school year, resigned his post at SIU to accept a newly created position of associate dean of the College of Liberal Arts and

chemistry at the University of Illinois. He is a former president of the Illinois Academy of Science and has long been active in the Illinois Chemistry Teachers Association. He has also been a long-time member of the American Chemical Society, the American Association of the Advancement of Science and the National Science Teaching Association.

Neckers will remain on the staff at SIU but asked to be

JAMES W. NECKERS

relieved of the duties of the chairmanship.

Internationally known geneticist, Carl C. Lindegren, is stepping down as the chairman of the Microbiology Department. Lindegren, who became the director of SIU's Biological Research Laboratory in 1948, is frequently invited to speak to learned societies in this country and abroad.

Considered by many to be the world's foremost authority on yeast, Lindegren conducts research projects for organizations like the American Cancer Society, Atomic Energy Commission and the U.S. Public Health Service.

Born in Ashland, Lindegren received bachelor's and master's degrees from the University of Wisconsin and re-

CARL C. LINDEGREN

ceived his doctorate from the California Institute of Technology.

Lindegren has been chairman of the Microbiology Department beyond the normal retirement age.

Vera L. Peacock who has been chairman of SIU's Foreign Languages Department since 1930 when she came to Southern, has also asked to be relieved. According to J. Cary Davis, acting chairman of the department, Miss Peacock "had decided several years ago that she wanted to devote more time to teaching and research." Her duties as

chairman prohibited active pursuit of these goals.

Born in Belmont, N.Y., Miss Peacock was a Phi Beta Kappa student at Cornell, where she received her master's degree in French in 1925. She then studied at the University of Perugia, Italy, and the University of Grenoble, France. Miss Peacock returned to Cornell to get her doctorate in 1930. It was that year that she came to SIU as a professor of French and chairman of the Foreign Languages Department.

In addition to receiving numerous certificates from Universities in Paris, Mexico, and Peru, Miss Peacock is the past president of Delta Kappa Gamma, professional women's teaching organization. Miss Peacock was also three times president of the Illinois chapter of the American Association of Teachers of French. She is also past president of the SIU Honor Society.

Since Miss Peacock's arrival at Southern 34 years ago, the department has grown from five regular faculty members to 24 regular members and 20 graduate assistants planned for next year.

VERA L. PEACOCK

When Walter B. Welch became chairman of the Botany Department at SIU in 1945 there were only 30 undergraduates taking botany courses and two graduate students. "At that time there were only two faculty members and the other one was in military service." Since 1945 Welch has built the department to 12 faculty members which will have contact with some 3,000 students in the next year.

Welch received an A.B. degree in botany from the Washburn College and received his master's degree and doctorate from the University of Chicago.

Welch is a past president, vice president and treasurer of the Illinois State Academy of Science and a member and fellow of the American Association for the Advancement of Science. He is also a member and fellow of Sigma Xi research organization and also the U.S. Plant Physiologists.

Welch has been visiting professor at the University of Arizona and a visiting scholar at the University of California at Davis.

SIU reflects the changing pattern of education in Southern Illinois as the old guard steps aside to make room for the new.

Rehabilitation Institute Begins Here on Aug. 17

SIU's 11th annual summer institute for professional rehabilitation personnel will begin here Aug. 17, with some 50 workers from various fields of rehabilitation expected to attend.

The two-week program, conducted through SIU's Rehabilitation Institute, is designed to help those already working with the handicapped. It covers, among other things, services available to the handicapped and ways of mobilizing community resources to meet the needs of the disabled.

Cooperating with Southern as sponsors of the institute are the Illinois Division of Vocational Rehabilitation, Department of Mental Health, Public Aid Commission and State Employment Service.

Prominent speakers from other universities, various rehabilitation agencies and state and federal offices as well as members of the SIU faculty will serve as staff, according to Guy A. Renzaglia, director.

CHARLES J. BRASEFIELD

the Sociology Department. Dedicated to this end, Campisi has attempted to recruit the best faculty and students with the idea of building the graduate program at SIU.

A native of Chicago, Campisi received a bachelor's degree from the University of Arizona and a master's degree from the University of Chicago. He received his doctorate at the University of Chicago in 1947.

Campisi came to SIU in 1959 as chairman of the department and was given the directive to develop a Ph.D. program. Several prominent scholars in the field of sociology were brought here to accomplish this. Among them is the new chairman of the department, Charles Snyder, from Yale.

When asked why he asked to be relieved of the chairmanship Campisi replied, "I feel I have accomplished my ad-

High School Coaches at Clinic Stress Need for Cooperation

Football fundamentals and closer cooperation between Southern and area high school coaches were stressed during Wednesday's SIU football clinic.

More than 60 area high school coaches and assistants attended the one-day meeting sponsored by the SIU Athletic Department.

The clinic, held in the University Center ballroom, featured talks by new SIU head football coach Don Shroyer and his assistants, Don (Red) Cross, Jerry Hart and Bill Knuckles.

Shroyer, a former backfield coach with the professional St. Louis Football Cardinals, emphasized the need for greater cooperation and mutual assistance between high school football staff and high school coaches in Southern Illinois.

"A college coach is no better than the high school coaches in the area around him," said Shroyer. "SIU needs the help of area prep coaches in its never-ending search for young football talent. In return, our coaching staff here is willing to confer with and assist high school coaches anytime the need arises."

In addition to emphasizing cooperation with high school coaches, Shroyer and his staff stressed the need for mastering football fundamentals, particularly on the high school level.

"Football is a game of skill and no football program can

be successful unless the fundamentals of the game are mastered," Shroyer emphasized.

Shroyer dealt at length with SIU's practice training program, pointing out where and how fundamentals are taught and the importance of learning them.

Talks by Shroyer's assistants were centered around the different parts of the SIU football program.

Offensive line coach Don Cross discussed the fundamentals and techniques of offensive blocking, and Bill Knuckles, defensive line coach, dealt with the fundamentals and techniques of defensive line drills and tackling. Offensive backfield coach Jerry Hart discussed the professional-style passing plays used by SIU in its offensive attack.

Summertime University Rule Says 'Thou Shalt Bear Heat'

(Continued from Page 1)
front room of the apartment and they must pay the University to install it.

Residents in University dorms, such as Woody Hall and the Thompson Point dorms, have no choice but to swelter and bear it.

A spokesman for the Thompson Point housing office said because of the way the windows are installed--they crank out--it is almost impossible to fit a window fan into them. So students have to

settle for a smaller fan they can set on the desk.

It was explained that if air conditioners were permitted the circuits probably would be overloaded and blow all the fuses in the dorms.

To provide some measure of comfort, one of the two dining rooms in Lentz Hall is left open at night for students to use as a study hall. It is air-conditioned.

The only other area in TP that is air-conditioned is the offices.

Tudor Presides At D.C. Parley

Development of recreation to strengthen rural economy was stressed at a country life conference in Washington attended by William J. Tudor, director of Area Services at SIU.

Tudor presided as general chairman during the first day of activities at the 46th annual conference of the American Country Life Association, held recently at the National 4-H Club Center.
