Wednesday night, the South-ern All-Stars presented a jazz concert in Shrvock Auditorium as a part of the Greek Week activities.

The concert, sponsored by sigma Hau Camma fraternity, fratured student musicians from SIU, alumni and former students and other outstanding musicians of the southern Illi-

nois area. It would seem feasible that the many friends of these music-makers, on cumpus and off, would appear for the big event. At least, one would expect to see all Greeks in attendance. It not to "dig" the cods sounds, it would seem probable that they would come to support their Greek brothers.

But waren gemer Bob Walker.

But waen emcee Bob Walker announced the probable attend-ance—the number was 400 and not 1500 as it should have

Ben.

But where were they? On a party at the Lake? At Giant Ciry? Or were they at UD's listening to The Dejohn sisters and complaining about the death of entertainment and social activities here at Southern.

What made til even more through a concert of unknowns who were parasites on the Crew Cur package deal.

To compare the evenings as I ar as artistry and enjoyment goes, leaves the All-Stars a few miles in the lead. And the crowd, largeed—this for "our but when the control to th

Maybe eventually this the Greeks will pull together.

And someday maybe the whole student body will wake-up and cooperate with one another.

Punch-line to the year's hottest power story -

Chevrolet "Turbo-Fire V8"!

This is the engine that's writing a whole new chapter in the book: of automobile performance records. This is the engine that has stock car timers doing a "double take" at their stopwatches wherever experts gather to compare the abilities of the 1955 cars.

For example, in the recent NASCAR*
stock car competition at Daytona
Beach, Florida, Chevrolet literally ran
away from every other car in its class
—and a raft of others besides. In the
one-mile straightaway run (or lowpriced cars, the first two places—and
six of the first ten—went to Chev-

rolets. And in acceleration runs from a standing start against all comers, the Motoramic Chevrolet beat all other low-priced cars—and every high-priced car except one!

what's behind this blazing performance? A compact honey of a V8 that only the world's leading producer of valve-in-head engines can build. Chevrolet's new "Turbo-Fire V8".

It puts a new kind of fun in your driving life. You're in charge of 182 high-spirited horsepower - or if you're looking for even more excitement, the new "Super Turbo-Fire V8" (optional as

extra cost) puts 180 h.p. under your toe!

Pick the one you'd rather have fun with, then come in and get behind the wheel. You'll see why the Motoramic Chevrolet is showing its heels to every-one else on the road!

Young scientist works on new ways to handle "hot" radioactive fuel

Whenever uranium is "burned" in an atomic reactor, certain valuable elements such as plutonium are left behind in the "ash."

These products are highly radioactive, but they must be recovered because of their great value to the atomic energy program.

This is the job of 31-year-old H. Ward Alter, Supervisor of the Separations Chemistry Unit at the AEC's Knolls Atomic Power Laboratory, which General Electric operates in Schenectady, N. Y.

Alter's Work Is Vital, Important

Alter is doing his job well. He has already received the Coffin Award, General Electric's highest honor, for developing an apparatus that makes possible faster, safer, and efficient recovery of the valuable elements in the "ash."

The work done by Alter and his group helps lower costs, increase efficiency and expand our knowledge of the chemical processing of spent radioactive fuels.

25,000 College Graduates at General Electric

When Alter came to General Electric in 1948, he already knew the work he wanted to do. Like each of the 25,000 college-graduate employees, he was given his chance to grow and realize his full potential. For General Electric has long believed this: When fresh young minds are given freedom to make progress, everybody benefits-the individual, the company, and the country.

GENERAL 🛞 ELECTRIC
