Union Dispute Halts Work at Edwardsville

A union jurisdictional dispute has brought construction work to a virtual standstill at the Edwardsville campus.

The Associated Press reported that a spokesman said the work stoppage could seriously affect scheduled completion dates for the campus.

Junior and senior classes and some graduate students are scheduled to move into the new campus in September.

The dispute that has interrupted work on the \$25 million campus involves the International Union of Operating Engineers and the International Brotherhood of Electrical Workers.

Cause of the dispute is a crane the electricians have been using to hoist transformers. The engineers contend they had been awarded jurisdiction to run the crane.

Normally about 700 men would be at work on the campus. But only about 40 electricians were on the job Tuesday.

Workmen from other crafts began staying away Monday when the engineers posted two so-called "informational" pickets.

More than 20 unions and 50 contractors are engaged in work on the campus.

Construction work has been marked by trouble almost from the start. Four workmen have been killed in accidents.

Several weeks ago concrete forms of a building being erected collapsed and some workers almost drowned in wet concrete.

Job Center Head Speaking Today

The head of the U. S. Department of Labor's network of Youth Opportunity Centers will visit SIU today.

He will talk to trainees in Project Cause II, a program to fight youth unemployment at the neighborhood level.

Marion Parsons is scheduled to talk to the 18 trainees at 7 p. m. in Small Group Housing III, Cause II headquarters.

All but four of the trainees are from St. Louis. They were recruited by local offices of their state employment service to take the eight weeks course so they can go back to their own neighborhoods as Youth Opportunity Center "field agents."

There they will attempt to convince out-of-work youngsters and school dropouts that jobs or job training programs are available to them.

Three of the recruits are from Oklahoma City, Okla., and another is from Tulsa. Southern has one of four Cause II training programs operating in the United States under grants from the Department of Labor.

Fitzgerald Portrait To Be Published

American novelist F. Scott Fitzgerald is the subject of a biography by Henry Dan Piper, dean of the College of Liberal Arts and Sciences at SIU, scheduled for publication in New York July 26 by Holt, Rinehart & Winston, Inc.

The 320-page book is titled "F. Scott Fitzgerald: A Critical Portrait." It was undertaken by Piper several years ago under a Guggenheim Fellowship.

2 High-Rise Dorms, Dining Hall Set for Construction This Fall

WHITE AREAS INDICATE GENERAL LOCATION OF THE TWO NEW TOWER HALLS

17-Story Towers To House 1,600

Construction of two more 17-story residence halls with an adjoining dining hall is expected to get under way early in the fall.

The project, the second phase of University Park residence complex east of the Illinois Central tracks, will cost some \$10 million.

The University has advertised for bids for construction of the buildings. They will be built just north of the high rise building now nearing completion and just south of Park Street.

An official said the bids will be opened Aug. 31 and that construction will begin as soon as possible after the Board of Trustees awards the contracts and all the financial details are worked out.

Unlike the first tower, which has been named Neely Hall, they will not be surrounded by the complex of smaller dormitories.

"There will only be a dining hall in connection with the new towers," a spokesman said.

The two new towers will accommodate 1,600 students. Some 1,400 students are expected to move into Neely Hall and two of the three smaller men's dorms in September.

The two new towers will have exactly the same design as Neely Hall, a spokesman for the University architect's office said. The "Y" shaped buildings will be built of brick and natural (unpainted) cement similar to that used in Neely Hall.

To clear the way for construction several small brick homes, housing the pharmacy and the Latin-American Institute, and several unoccupied wooden houses on the south side of Park Street will be torn down.

The present Health Center building also will be removed eventually, officials said. The Health Center is scheduled to move into Building 115 in Small Group Housing in the fall.

Gus was disappointed that the Information Service couldn't tell him the phone number of his sister in Muncie.

Writes to Rusk

Sen. Douglas Criticizes AAU's Rejection Of Southern's Team of Woman Gymnasts

Sen. Paul Douglas, D-Ill., has sent a letter to Secretary of State Dean Rusk inquiring about the Amateur Athletic Union's ban of the SIU women's gymnastic team from competition at the recent AAU championship meet in Cleveland.

Douglas had received a copy of the letter protesting the AAU ban sent to President Johnson by Donald N. Boydston, SIU athletic director, last month.

Douglas said in his letter to Rusk:

"We have all witnessed the sad spectacle of bickering between officials of the National Collegiate Athletic Association and the AAU over the past years . . . I know this is somewhat out of your jurisdiction; however, I wanted to learn from your department of any specific examples of American amateur competitors being disqualified from international amateur competitions because the AAU objected to contestants who had competed in other amateur events not recognized by the AAU." Douglas closed saying, "I have had my fill of this jurisdictional dispute among officials of the AAU, and I believe that your younger generations should not continue under the harassing

vigilance of AAU officials whose interest seems more concerned with the preservation of their own prestige rather than the development of amateur athletics in the United States."

In sharp contrast to the actions of the American AAU, the Canadian AAU has commended SIU's athletic department for its role in the promotion of gymnastics.

Raymond Gagnier, chairman of the Canadian AAU national gymnastic commit-

tee, sent a letter recognizing SIU's contributions, to athletic director Boydston.

Gagnier said, ". . . we were most fortunate to have our two most outstanding gymnast (Gail Daly and Irene Haworth both natives of Saskatchewan, Saskatchewan.) who have been practicing at your university with Mr. Herb Vogel."

He said Miss Daly and Miss Haworth ". . . did a magnificent job for promoting gymnastics in Canada. We wish to tell you our admiration for the coach who has succeeded in making our leading Canadian women gymnasts the all-around champions of Canada."

1962 Grad Named Park Naturalist

Ronald F. Nagel, 1962 SIU graduate in forestry, has been appointed a park naturalist at the Yankee Springs Park and Recreation Area near Hastings, Mich., the Michigan Department of Conservation has announced.

In his new job he will be responsible for developing nature hikes, trails and daytime and evening programs for tourists at two outdoor centers in the Yankee Springs area.

SEN. PAUL DOUGLAS . . . SPEAKS UP FOR SIU.

Shades of the Folies Bergere

Leggier Look Predicted for Fall; SIU Coeds Fear Loss of Dignity

By Pam Gleaton

"The shortest dresses since Eve."

This is how Jean Rook, fashion editor for the London Sun described the newest in women's fashions.

And, fortunately or unfortunately, all depending upon how you look at things (namely legs), she may be right.

Now that no more eyebrows are being raised over skirts that skim the knee or come a little above it, designers have decided to save themselves a bundle on material costs by cutting another two or three inches off skirts.

Even Hardy Amies, the London designer who has done some of Queen Elizabeth's most elegant clothes, has lifted hems to above the knee.

Designers in London, Rome, Florence and New York have already begun to show their fall lines. The courtiers of Paris are next. Will they join the uplift already started?

"I say the Paris courtiers will give us the biggest leg

show outside the Folies Bergere," said Miss Rook, who is often ahead of the pack and correct with her predictions.

The jet age's flight of skirts started with Andre Courreges in France last year. The girls of London have made the trend their own. Many of them are now wearing skirts three or four inches above the knee. Will the girls on a Midwest

college campus adopt the same trend? Here's what some coeds and one nonprofessional girl watcher had to say about the whole thing.

One girl, who is known for her long and lovely legs, said she thought it would be OK, if the legs were good-looking enough.

At the other end of the scale, a shorty who barely passes the 5-foot mark said, "They're fine for girls with long legs, but they present a problem for us shorties." She went on to say that four inches above her knee was not far below the tan line from her bathing suit.

Janet Ross, a June graduate of SIU, said, "I think there are too many nylon tops showing right now."

When asked about wearing the wild colored tights designers are showing instead of hose, Miss Ross said that the average leg is heavier than it needs to be anyway.

"Why add bulk to legs and then call attention to them with bright stockings?" she asked.

Marilyn Scott, who will be a junior in the fall, thought first of cold Illinois winters. Her next reaction was that "knees usually aren't very pretty, and besides, the girls with pretty ones will find some way to show them off."

Besides comfort and aesthetic considerations, Miss Scott also put in a word for dignity.

"Can you imagine how far those skirts would ride up? Some girls I know have a lot of trouble with the ones that come to the knee."

Sheleigh Clutts, a home economics major from Cobden, had only one reaction, "Oh, that's too short."

What did the girl watcher have to say? "I think its great, but not for my wife."

It's easy to see why he'd rather not use his name and why his girl watching status is now nonprofessional.

Most of the girls interviewed seem content to keep their skirts the length they are wearing them now, and not make any drastic changes until they find out what everyone else is going to do.

COLLEGIATE CHAMPION SKYDIVER - Bernie Niebur, national collegiate skydiving champion and acting president of the SIU Sport Parachute Club, drops near dead-center on the drop zone at the SIU Airport.

Jump Right In

Small Membership Cramps Parachute Club Comeback

Southern's Sport Parachute Club, organized here in 1962, is trying to make a summer comeback. But it needs more members.

"Right now, we have about a dozen members," said club member Gordon Cummings, "but we need more." Coeds as well as men are welcome, he said.

The club meets each week-end at the SIU Airport.

Cummings said the club hopes to grow in order to train for events sponsored by the Parachute Club of America, by which the SIU group is sanctioned.

The club furnishes members' jumping equipment. Eventually, Cummings said, a

member probably would want to buy his own.

Classes for beginning parachutists are conducted at the airport.

Those interested can call Bernie Niebur, acting club president, at 457-2407.

Trip to St. Louis Zoo Is Scheduled Saturday

This week's Saluki Safari will be to the St. Louis Zoo.

The bus will leave the University Center at 8 a.m. Saturday and return at 6 p.m. Students must sign up in the Activities Office by noon Friday to make the trip.

6 Weeks' Stay in U.S.

Finnish Prof Here for Look At Communication Teaching

Raino S. Vehmas, a journalism professor from Finland, is visiting SIU as a participant of Foreign Leaders Program sponsored by the U. S. State Department.

Vehmas will be in the U. S. for about six weeks observing education in communication procedures at Southern and other universities.

Before coming to Southern he was at the University of Minnesota for several days.

Vehmas is the professor of journalism and mass communication at the School of Social Sciences (YKK) in Tampere, Finland.

He is visiting Southern at

RAINO S. VEHMAS

the invitation of Howard R. Long, chairman of the Department of Journalism. Long visited the school at Tampere when he toured Europe in September of 1964.

The YKK has a unique history. It was established 40 years ago in Helsinki, Finland's capital, but was moved into a new physical plant located at Tampere, 100 miles from Helsinki, just last year. It is one of the few European schools with a communications curriculum which includes journalism, drama and newly instituted radio and television

Vehmas said that the growing school has an enrollment of 3,500—an increase of 500 over last year. It offers the equivalent of bachelor, master and doctorate degrees

in humanities and the social sciences plus a vocational section which offers professional training in the social sciences.

When Vehmas returns to Tampere, besides his duties as professor of journalism, radio and television,

Tampere does not have a radio station, so the students will be using the studios of Radio, Finland located at Helsinki, 100 miles away, for their practical training.

Indian 'Powwow' For Handicapped Opened to Public

An Indian "powwow," entertainment highlight of SIU's summer camping program for handicapped children, will be open to the public July 29 for the first time in the camp's history.

The program includes a variety of skits and presentations staged by the campers themselves. The population at camp Little Giant includes physically handicapped, mentally retarded and speech and hearing defective children.

One of the powwows is scheduled in each of the three two-week sessions of summer camp. They are staged in an open area near the Little Giant dining hall against the backdrop of a campfire, teepees and other Indian symbols.

'Little Mary' Needs Ushers for Play

Ushers are needed for the four presentations of "Little Mary Sunshine," to be presented Thursday through Sunday evening in Muckelroy Auditorium.

Any male or female student interested in working at either performance should sign up at Shryock Auditorium by Thursday.

"Little Mary Sunshine," a musical satire on early operettas, is the second presentation of Southern's Summer Music Theater.

Australian Journalism School Is Topic for WSIU Discussion

Australia's first summer school for professional journalists will be the topic for discussion on "Contact" at 2 p.m. today on WSIU radio.

Other programs:

10:05 a.m. Pop Concert.

12:30 p.m. News Report.

1 p.m. Reader's Corner.

3 p.m. Concert Hall: Concerto No. 3 by Rachmaninoff, "On the Steppes of Central Asia" by Borodin and Serenade in E minor for Strings by Elgar will be played.

7:30 p.m. On Stage: A recording of a performance by Fred Waring.

8:30 p.m. The Department of Music Presents.....

SUNSHINE — Jeana Bray and Barry Bloom rehearse "I Only Hate You 'cause I Love You," one of the songs they'll sing in "Little Mary Sunshine" which opens Thursday in Muckelroy Auditorium in the Agriculture Building. She plays Nancy Twinkle and he's Capt. Billy Jester.

Experts Slated to Discuss Automation on WSIU Today

Four experts on automation will talk about tomorrow's world on "Cyberculture: Man vs. Machine," this week's "Conversations" program at 8:30 p.m. today on WSIU-TV.

Other programs:
4:30 p.m. Industry on Parade.

5 p.m. What's New: Deep sea fishing in the Grand Banks off the coast of Newfoundland.

6 p.m. Encore: "The Creative Person."

SIU Storage Barn Burns to Ground

An SIU storage barn located on the city reservoir near the Grand Banks off the coast of Newfoundland.

Carbonale fireman were called to the scene at 11 p.m., but not in time to save the building. No injuries were reported.

Cause of the fire has not been determined. The barn had been used to store farm supplies. An SIU official estimated the value of the building at \$200.

Activities

Film, Sports, On Agenda

The Inter-Varsity Christian Fellowship will meet at noon in Room E of the University Center.

The Summer Institute in Geography will begin at 1:30 p.m. in the Seminar Room of the Agriculture Building.

The Interpreters Theater will meet at 2 p.m. in Room C of the University Center. The Indoor Olympics will begin at 7 p.m. in the Olympic Room of the University Center.

"Gunfight at O. K. Corral" will be the movie hour presentation at 9 p.m. in McCAndrew Stadium. In case of rain, the movie will be shown in Browne Auditorium.

Daily Egyptian Book Scene:

Succeeding in College

The First Years in College, edited by Harry N. Rivlin. Boston: Little, Brown and Co., 1965. 665 pp. \$8.95.

It has been recorded that 28 percent of college students drop out or are dropped by the end of the first year and less than half of the students entering college are graduated.

This book has been written by a group of educators who use the approach of helping the student see how his professors approach their subject and their students.

All the major courses a freshman is likely to study have been included and in each of these there has been an effort to have the freshman see what each course is about in terms of its main ideas or principles, philosophy, method. An effort has been made also to relate each course to the others presented.

Such are the primary goals of most programs of general

Reviewed by

**John W. Voigt,
Executive Officer,
General Studies**

education. It is my opinion the authors have been quite successful in presenting their material so as to accomplish these ends.

It is as important for teachers of required introductory classes to read this book as it is for the student. Ways are suggested of enticing freshman interest and of relating the field of study being presented to other fields. The material from each subject matter area treated in this book would be appropriate "first lectures" by those professors who teach the subjects covered in this book.

Because we are a people who measure everything in dollars and market value, it is pointed out we overstress the monetary value of an education when we should be stressing that education is its own reward. Another point made is that ours is a serious world and there is much serious work to do in college. There need be no such thing

JOHN W. VOIGT

as a second or third rate education.

An education in any college or university can be first rate if both students and instructors will it to be. Therefore, it is important for the entering student "to realize the main element in making his education a success is the attitude he brings to his first year, and the persistent way in which he manages to put first things first in arranging his campus experience."

A very important message to the student is the reason why in the first two years of college he is so often presented courses he has had in high school. First, it must be realized that learning does not take

A Little of Everything

Modern Maxims in Greek Style

The Aristos: A Self-Portrait in Ideas, by John Fowles. Boston: Little, Brown and Co., 1964. 246 pp. \$5.

John Fowles is the author of a hair-raising novel, *The Collector*, which has already been made into a movie that

Reviewed by

**George K. Plochmann,
Department of Philosophy**

has received mixed reviews. The present book is scarcely a scenario, being instead a

place by single exposures. Secondly, it must be realized that the college work even in the same subject is on a different level. High school work usually emphasizes factual knowledge, whereas college is more concerned with examination of knowledge in a critical way.

In college "the student leaves the world of tangible things for the world of theory and abstractions. It is this requirement which year in and year out probably accounts for more college departures and dropouts than any other one item."

College, it is stated, is a community where its members live together under the most enlightened circumstances. A community implies cooperation. Standards prevail and rules are held so that man can best help man.

The required curriculum presented by a college or university is one of its most important standards. "In the aims of education, found in all colleges, for the student's development of imagination, appreciation, judgement and dedication lie the perennial hopes of humanity."

The student who accepts these aims of general education for the effect they can have on his own life gives to the college he has chosen to enter the best opportunity to do its work well.

JOHN HUSTON ... A LIVING LEGEND

Zest for Life Marks Flamboyant Director

John Huston: King Rebel, by William F. Nolan. Los Angeles: Sherbourne Press, 1965. 247 pp. \$5.95.

John Huston, son of the famous actor Walter Huston, now has been involved in 34 films, either as a writer, actor or director.

Best known as a director,

he has seen six of his films—"Moby Dick," "Moulin Rouge," "Heaven Knows," "Mr. Allison," "The African Queen," "The Misfits," and "The Night of the Iguana,"—gross over \$4 million each in the United States and Canada.

Other successful films made by Huston are "The Maltese Falcon," "The Treasure of the Sierra Madre," "High Sierra," "Sergeant York," "The Asphalt Jungle," and "Beat the Devil." His next film will be the soon-to-be released "The Bible."

Author Nolan is a professional writer of successful biographies and other nonfiction. His approach in this easy-to-read story of the life of one of Hollywood's most flamboyant directors is largely anecdotal. The narra-

Reviewed by

**John Mercer,
Department of
Printing and Photography**

tive stays close to Huston, his acts and his reputation among the Hollywood craftsmen.

Nolan relates how Huston, now a citizen of Ireland, came to claim fame not only as a director but also as an actor, horseman, rancher, hunter, collector, gambler, and drinker. Between films Huston has pursued his avocations with a gusto and passion which have made him one of the great legendary figures of Hollywood.

As a director, Huston belongs to the realist tradition. He would rather shoot on location. His expensive filming forays into Africa and Mexico in search of the best background for his stories, together with his insistence that his actors perform under conditions teeming with such dangers as crocodiles, fires, insects, water, wild horses and disease have given him the reputation of being a hard driving, demanding, brilliant man.

Readers who like movies, as well as those who especially like Huston's films, will be captivated by this account of the life and times of a great personality of the film world.

Historical Novel Reflects Horror of Hitler Regime

An Infinity of Mirrors, by Richard Condon. New York: Random House, 1964. 333 pp. \$5.95.

From the pen of a man who has produced five successful novels in as many years, comes still another book.

This latest novel by Richard Condon, author of *Manchurian Candidate*, *Some Angry Angel*, and *A Talent for Loving*, already has drawn praise from the pages of *The New Yorker*, has been condensed and reprinted by *Saturday Evening Post*, has taken its place on the lists of many well-known book clubs, and has become a best seller here and in ten foreign countries.

An Infinity of Mirrors is an historical novel delineating the effects of Hitler's "most dreadful legacy: the corruption of decent people who in fighting evil are themselves corrupted."

It is based on findings of four researchers who traveled and studied in five different countries for four years. It was written only after the author himself had lived in its setting for two years.

Woven among the facts and terrors of the Hitler regime is the story of how the swastika era affects a young French Jewess, Paule, and her husband, Wilhelm von Rhode, an officer in the German army. The other major characters are love, hate, fear, horror, disgust and revenge.

An Infinity of Mirrors suggests the endless reflection of horror that spread from Germany throughout the entire world and the infinite repetition of the story of Paule and Wilhelm—it happened not just to these two but to millions of others and it can still happen.

Judith M. Roales

GEORGE PLOCHMANN

nature of reality, other philosophies, the importance of art, the obsession with money, a new education and finally the portrait of the Aristos.

All this is an ambitious project, and it is plain that the author has read a good deal and knows quite a bit about classical literature. But outside of this the work is not impressive.

There is an artiness about the book reflected in such aphorisms as this, which I give complete: "Footprints in the snow;" "Marriage, as a model;" or "The inquisition; the Protestant witch-

burners; the Nazi race exterminators." Such pregnant utterances are supposed to suggest volumes to the reader, but the truth is they are a poor substitute for sound thinking.

Secondly, there is a pretentiousness. "I write in English; but this is for no one country." One begins to doubt if such a claim to a universal audience will be justified, especially as there is a third fault which is an impatience with the niceties of language; "If I write dogmatically, it is for simplicity, not out of arrogance. If I savonarolize, it is to save, not to see damned." Stylewise, this is horrible. Heraclitus—the original Heraclitus—was often called the dark philosopher, perhaps because of his obscure style. Because Fowles acknowledges him as the source, it is not unlikely that darkness broods over the face of some of these modern sayings too: "The lack of relativity of recompense is alleviated by the nature of happiness." Again "If everyone satirizes, no one satirizes."

The author also likes shocking paradox. "Peter's worst and last treachery was to found the church; but it is a treachery we are only just beginning to understand. The church has become not the body and spirit of Jesus; but a screen and barrier round him."

As a final sample of inflation, let me call attention to the book's title again. It is ***The Aristos: A Self-Portrait in Ideas***. It is all very well to describe the best man, but the implication that this description is a self-portrait should be allowed to dawn more slowly on the reader.

Goldberg Named to U.N. Post; Johnson Must Fill Court Vacancy

WASHINGTON (AP)—President Johnson named Supreme Court Justice Arthur J. Goldberg to spearhead the U.S. quest for world peace as ambassador to the United Nations, succeeding the late Adlai E. Stevenson.

Goldberg, whose appointment was announced Tuesday at a hastily called White House ceremony, pledged to work for peace under international law through the world organization.

"It is that or doom—and we all know it," Goldberg said.

Johnson's choice sent a ripple of distinct surprise throughout official government and diplomatic circles in Washington and United Nations headquarters in New York. Most initial reaction was favorable.

Goldberg is only the third man in U.S. history to give up a lifetime Supreme Court appointment for another post.

"I shall not, Mr. President, conceal the pain with which I leave the court after three years of service," Goldberg told Johnson.

But he indicated he regards the U.N. job as more challenging.

"It now comes that the President has asked me to join in the greatest adventure of man's history—the effort to bring the rule of law to govern the relations between sovereign states," Goldberg

Driver Skips Court, Prefers to Join Foreign Legion

LONDON (AP)—"I'm so fed up with these traffic jams," said truck driver David Twitchen, 22, "that I'm going to do something desperate."

"Like what?" asked his mate.

"I'm going to join the Foreign Legion."

His friends scoffed at the idea. So did Police Constable William Taylor.

"Tell you what," suggested the constable, "I'll bet you five pounds you won't carry out your threat."

"Taken," said the truck driver.

"In the meantime," said the constable, "don't forget that charge against you for careless driving."

"I won't," said the driver.

Twitchen's case came up Monday in Magistrates Court.

The clerk read a letter from Twitchen pleading guilty and offering to pay his fine —by post.

"We'd like to see him in court," said the magistrates.

There was a moment of silence. Finally, Constable Taylor spoke up saying: "His mother tells me he's joined the Foreign Legion."

"The foreign what?" asked the magistrate.

"The Foreign Legion, sir. Deserts and camels and all that. His mother tells me he went to France and joined up for five years and that he's now a Legionnaire 3rd class."

The constable then revealed the bet.

"Did he collect?" asked the magistrate.

"Not yet. I've asked for proof. I want to see a photograph of him in uniform."

Smiling, the magistrate adjourned the case—indeinitely, meaning it'll probably never come up again.

said. "I have accepted, as one simply must."

Johnson described Goldberg as a man of high national and international reputation.

Johnson had been expected to act quickly to replace Stevenson, who collapsed and died in London of a heart attack last Wednesday.

Goldberg's appointment came one day after Stevenson was buried in Bloomington, Ill.

The United Nations is now in recess and reconvenes in September.

Johnson's appointment of Goldberg ended one high-level guessing game, but created another—replacement on the Supreme Court.

"I have no idea," said White House press secretary Bill

No Word on Troop Build-Up

McNamara Calls Viet War Serious, but 'Not All Black'

SAIGON, South Viet Nam (AP)—Defense Secretary Robert S. McNamara said Tuesday the Viet Nam situation still is serious, but not all black. That was his summary of a survey aimed at helping the Johnson administration determine the extent of the new U.S. military buildup.

"Over-all, the situation continues to be serious," McNamara told a news conference on the basis of his field trips and Saigon briefings in the last five days. "As a matter of fact, in many aspects there has been deterioration since I was here last, 15 months ago. But the picture is not all black by any means."

McNamara skirted the issue of how many U.S. servicemen may be added to the 75,000 or so already on duty in Viet Nam.

"Based on my observations and discussions here, we will be making a report to the President at some time within the next few days," he said. "I can only tell you that your recommendations will be directed toward fulfilling the commitment of our nation to support the people of Viet Nam in their fight to win their independence."

Contrasting points of the war as summed up by McNamara:

"The size of the Viet Cong forces has increased; their rate of operations and the intensity of their attacks has been expanded; their disruption of the lines of communications, both rail and sea and road, is much more ex-

tensive; and they have intensified their campaign of terror against the civilian population."

—On the other hand, "The Vietnamese people continue to be willing to fight and to be willing to die in their own defense. The Viet Cong, as you know, are suffering increasingly heavy losses and the U.S. combat forces are adding substantially to the military power of the government."

The secretary headed back to Washington with his companions in the fact-finding mission.

D. Moyers when asked when Johnson might announce a successor for Goldberg.

Goldberg is a former secretary of labor, and before that a noted labor lawyer. He was counsel for the United Steelworkers Union and for the AFL-CIO before joining the Cabinet as the late President John F. Kennedy's labor secretary.

Some U. N. sources was Goldberg as a man with a liberal reputation similar to Stevenson's chosen by Johnson to try to soften criticism of U.S. military intervention in Viet Nam and the Dominican Republic.

There was no immediate comment from Arab delegates on the appointment of Goldberg, a Jew.

Valtman, Hartford Times

Sentry Satellites Will Observe Violations of Nuclear Test Ban

CAPE KENNEDY, Fla. (AP)—Two Sentry satellites were blasted into the sky Tuesday and headed for outposts in space where they will detect violations of the nuclear test ban treaty.

The two 524-pound Vela vehicles, capable of detecting nuclear explosions from the earth's surface out 200 million miles, rode an Atlas-

Agna rocket aloft in pre-dawn darkness.

They entered initial orbits ranging from 132 to 69,000 miles high.

One is expected to be maneuvered into a circular orbit 69,570 miles out by Wednesday and the other into a similar orbit Thursday.

House Approves Military Pay Raise

WASHINGTON (AP)—A 410-0 House vote Tuesday shipped a billion-dollar annual military pay raise bill to the Senate for almost certain shrinkage.

The bill's price tag is twice as big as proposed by President Johnson, whose House lieutenants made no effort to trim it down more to the administration's liking.

It affects the base pay of 2.6 million uniformed military personnel, plus those who wear uniforms of the Coast Guard, the Public Health Service, and the Coast and Geodetic Survey. Subsistence, quarters and special allowances are not affected.

A Gallery Of SIU Women

Most persons automatically think of pretty coeds. But this gallery of Southern Women proves otherwise. Here are a few, from a nun, to a Little Girl and, of course, the inevitable bathing beauty.

Pollution No Problem At Lake Pool

By John Ochotnicki

A man once said that "you never miss the water till the well runs dry." In the same respect, students at Southern may never miss the beach on Lake-on-the-Campus until it has to be closed.

To prevent such an occurrence the lake water is tested twice a week for pollution. Samples are taken from the deeper parts of the lake as well as from around the beach area.

These samples are taken to the Illinois Department of Public Health laboratories on the west side of campus. Tests are conducted here to obtain an index of pollution.

According to Ray Swift, microbiologist at the lab, the samples are checked for the M. P. N. (most probable number) of coliform and enterococci types of bacteria. The results are then given to William C. Bleyer, assistant coordinator of activities.

Bleyer points out that there has never been a case of pollution and the beach has never been closed for this reason. One of the factors responsible for this "clean record" is the chlorinating system used in the beach area.

Bleyer said the Lake-on-the-Campus is "one of the few open-water lakes I know of with a chlorinating system."

Cosmetology School Will Begin Monday

Advance registration indicates a record enrollment for one section of the 11th annual School of Advanced Cosmetology, which will open Monday at SIU.

The 10-day course is sponsored by SIU's Division of Technical and Adult Education and the Illinois Hairdressers and Cosmetologists Association. First, second, and third-year and post-graduate courses are run simultaneously during the session, which ends Aug. 4.

Advance registration for the first-year class is 51, the largest number since the school began in 1955, according to Adult Education Supervisor Glenn E. Willis. Total registration will be over 70.

Faculty for the school is made up of professional people from throughout the state.

Subjects covered will include hair styling, coloring and shaping, art application, record keeping, laboratory work in the chemistry of cosmetics, physics of hair, vocabulary building, parliamentary procedure and the psychology of human relations.

KEITH KLUKIS (STANDING), GRADUATE STUDENT IN ENGINEERING, CONFERS WITH BRUCE NISSEN, CEDAR FALLS, IOWA, ON AN ELECTRONICS PROJECT.

Budding Careers

Young Scientists Build Computer, Study Pollution in the Big Muddy

By Mike Schwebel

Projects ranging from the study of pollution in the Big Muddy River to the building of a small computer are being undertaken by a highly selective group of high school students on campus this summer.

The youths, juniors and seniors in high school, are taking part in a summer training program sponsored by the National Science Foundation in conjunction with SIU.

One of the major areas currently under study during the eight-week course is engineering. Herbert A. Crosby, associate professor in the School of Technology, is in charge of the study. He is aided by Keith Klukis, a graduate student in engineering. "The real purpose behind this summer training program," explained Crosby, "is to stimulate an interest in science, to these young people."

Selected upon scholastic ability, science motivation, and the completion of specified high school courses in science and math, the 16 and 17-year-olds have traveled from around the nation to pursue their summer study. "All the students have shown a great deal of interest in their work," said Crosby. His 10 students attend lab sessions every weekday morning except Wednesday, when they attend a seminar. Their afternoons are largely

taken up by work on their individual research. Working with computers for the first time, the class has caught on "very fast" according to Crosby.

Joe Duncan, Cocoa, Fla., plans to establish a career in science or math. Part of his project is the construction of a computer. Ron Ferry, of Ogallala, Neb., is also going to construct a computer, a small digital machine capable of adding, subtracting and multiplying numbers. His future falls into the electronic and electrical engineering fields.

Gary L. Gehlbach, Corpus Christi, Tex., plans to major in electrical engineering upon entering college.

James Colgate, Miami, Ariz., and Bruce Nissen, of Cedar Falls, Ia., are both involved in designing and building a converter for computer use. Both plan engineering careers.

William Fisk, DePere, Wis., is investigating the construction of a simple solid propellant rocket engine for a wide range of uses. His future plans call for science research in association with a university or industry.

Richard Burrow, West Allis, Wis., is collecting pollution data from the Big Muddy River. He hopes to make use of biological tests in his project which could help civil engineers gauge random pollution values of the river.

Philip Welch Dies; Former Instructor

A former SIU faculty member, Philip Welch, died Saturday at Anna State Hospital. He was 89.

Welch served on the SIU faculty as instructor of anthropology and astronomy and was pastor of Christian churches in Kansas, Pennsylvania and Maine. He was a native of Franklin County.

Funeral services were held at 2 p.m. Tuesday at Gilbert Funeral Home in Christopher.

John E. Roberts, Assistant Manager Of Laundry, Dies

The assistant manager of the SIU laundry, John E. Roberts, 48, died Monday night at St. Joseph Memorial Hospital in Murphysboro. He had been ill for some time.

Roberts was born in Murphysboro on Jan. 15, 1917. He was a member of the First Methodist Church in Murphysboro. He was a member of Elks Lodge 572 and was the former exalted ruler of that organization. He was also a member of the Paul Stout Post 127 of the American Legion.

He is survived by his wife Harriette, a son, John, and a daughter, Joyce.

Funeral services will be at 2 p.m. Thursday at the First Methodist Church.

Friends may call at the Crawshaw Chapel in Murphysboro after 2 p.m. Wednesday.

MOUSE STUDY - Willard D. Klimstra (left) received a \$3,000 grant to study the house mouse. Tom McCloud, chairman of the National Pest Control Association's technical council, presented the grant to Klimstra.

\$3,000 Grant to Wildlife Lab to Help Finance Mouse Study

The SIU Cooperative Wildlife Research Laboratory is to undertake a study of the common house mouse.

The National Pest Control Association has granted \$3,000 to the laboratory to help finance the first year of this study. Willard D. Klimstra, laboratory director, will be the principal investigator. He will be assisted by a doctoral student and other laboratory personnel.

Klimstra said the study will include review and analysis of previous mouse studies, an investigation into the life history of the rodent and an evaluation of both current and new techniques for house mouse control.

The study could reveal much about mouse resistance to anticoagulant rodenticides, as well as information on such things as food preferences, feeding patterns, choice of feeding stations, food requirements and resistance to starvation.

House mouse control is one

Hour-A-Day

Johnny Learning to Swim In 3-Week Campus Session

The Lake-on-the-Campus, long a sanctuary for sun worshippers and admirers of the opposite sex, is also the school of swimming for youngsters between the ages of six and 12.

The youths, children of SIU students, faculty and staff, are enrolled in the second of three sessions of swimming lessons being offered by the Student Activities Center in cooperation with the SIU Newcomers Club.

William C. Bleyer, assistant coordinator of activities said this is the second year lessons have been offered.

Instruction was previously confined to three categories, beginners, intermediates and advanced. However, this year's first session saw the addition of the junior lifesaving category in response to requests, Bleyer said.

Stanley T. Nicpon, a graduate student at Southern, teaches the class. The lessons are an hour long for each class and each session runs from Monday through Saturday for three weeks. The cost of the session is \$6.00.

of the most difficult problems faced by the pest control industry as a whole.

Long range plans of the SIU project include the establishment of several mouse colonies for subsequent experimentation. Both indoor and outdoor mouse experiment facilities will be developed.

SIU Moving Up; Illini Going Down

By splitting the four-game series with league-leading Parsons College this weekend, the baseball Salukis moved to within .025 of a percentage point of third-place University of Illinois.

The Illini lost three out of four games last weekend to second-place St. Louis University.

The standings:

Parsons College	13	7	.650	...
St. Louis U.	9	7	.563	2
Illini	8	12	.400	5
SOUTHERN	6	10	.375	5

Reach .222 Mark

31-Hit Series Against Parsons Hikes Salukis' Batting Average

Southern's baseball team increased its batting average for the second week in a row last weekend against league-leading Parsons College.

The Salukis, who took an anemic .198 team batting average into the series with the Wildcats, collected 31 hits to boost the team average to a more impressive .222.

Centerfielder Nick Solis was responsible for raising the team batting average. The Brooklyn, N. Y., native collected seven hits in 13 appearances at the plate to raise his own average from .222 to a team leading .306.

Fellow outfielder Roger Schneider, who had been hitting into some tough luck before the Parsons series, also made a sizable jump. Schneider raised his average some 56 points to .267.

Shortstop Rich Hacker, who had been tied with first baseman Frank Limbaugh with a .286 average, gained six points to .292.

Limbaugh, who collected his second homerun in the series, saw his average drop from .286 to .271.

The pitching averages suffered somewhat in the series as Parsons scored 33 times in the four games. George Poe, who had a 2.10 earned run average before the start of the series, saw this skyrocket to 4.96.

Mike Lyle and Mike Stafford also saw their earned run average increase.

NICK SOLIS . . . HIKES SIU'S AVERAGE

Bob Ash, who pitched the best ball in the series, was one pitcher who lowered his earned run average. Ash limited Parsons to two earned runs to lower his average to 2.70, second best among the starters.
