Thompson gets earful from callers

By David Sheets
Staff Writer

One telephone caller said she was looking for a job. Another said he was concerned about the shape of a road near his home.

Still another caller wanted to know how Thompson planned to improve the chances of Illinois artists getting their works sold.

Few questions were raised about taxes, but that’s what the man at the other end of the line was ready to talk about.

That man was Gov. James Thompson, who fielded questions for an hour from local citizens Tuesday during a telephone call-in show on WCIA radio.

The appearance was one of several Thompson made on the last leg of a statewide stump to promote his 1988 fiscal year budget, which includes a broad plan for tax increases.

In that plan, Thompson proposes to increase the personal income tax by 20 percent, to add sales taxes to non-prescription drugs, computer software and such services as haircut and shoe repairs, to increase the state gasoline sales tax by 5 cents a gallon over five years, and to increase vehicle registration fees by $1.7 a year.

Thompson also took his personal tour to the Student Center to sway the Southern Illinois Coalition, an association of Southern Illinois community leaders and business developers concerned with regional growth and development.

In both instances Thompson d: more talking about tax increases than his audiences.

“People are listening to me as I’ve simply asked them to do,” Thompson said.

The governor admitted that his budget was an example of write a book that says ‘tax and spend, tax and spend.’ I say a fiscal conservative better write a book that says tax and spend.”

Thompson, a Republican, was concentrating his budget position with the “spend and borrow” policy he said some Illinois legislators favor and “the worst of all, ‘refuse to spend,’ where you refuse to invest in yourself.

“I investing in ourselves now will pay off for our future,” he said.

“People can change the details, so long as the priority is straight.”

Gov. James Thompson listens to a caller’s comments during a call-in Tuesday morning.

EPA says smokestack meets emission limits

By Carolyn Schmidt
Staff Writer

Test results of the University of Illinois power plant’s emission of pollutants from its smokestack show that the University is in compliance with Illinois Environmental Protection Agency standards, says Pat Dennis, an EPA permit engineer.

Samples for the tests, taken last January by CSA Inc., an Ohio air testing firm, showed that the power plant’s $2 million pollution controlling “electrostatic precipitators” system is removing 95.6 percent of ash and soot particles emitted by the smokestack from coal-burning boilers.

Haynes filed a petition in February which put the ward- aldermanic referendum on the April 7 ballot.

Haynes, 57, 1215 N. Wall St., says the council doesn’t represent all “sides” of Carbondale.

“It’s a lot of garbage when candidates say ‘all the people are my constituents.’ If the city doesn’t pass the ward-aldermanic referendum, Haynes said, the city should be prepared to pay anywhere from $20,000 to $100,000 in legal fees for a law suit against the city.

Haynes said he would not file suit against the city, but said he was concerned some people who are “taking care of it,” if the referendum is not passed.

Although the ward-

Landmark decision rules against surrogate mother

HACKENSACK, N.J. (UPI) — A judge ruled Tuesday that a signed contract carries more weight than a mother’s love and rejected surrogate mother Mary Beth Whitehead’s bid to reclaim Baby M, the daughter she was hired to bear for a childless couple.

The judge awarded sole custody of Baby M to her father, William Stern, and ordered Whitehead’s legal rights as the mother of the 1-year-old girl suspended and terminated.

Minutes after the decision, Stern’s childless wife, Elizabeth, legally adopted in the 13 minutes that Baby M was a surrogate child and her husband have named Melissa.

The landmark decision, if upheld in the almost inevitable appeal to the New Jersey Supreme Court, means that Whitehead will be able to return to work soon after being cleared to visit her youngest daughter.

“She’s not a good custodian to her (two older) children. She would not be a good custodian to Baby M,” Bergen County Superior Court Judge Harvey Sorkow said in a severely worded 120-page decision read in open court.

Sorkow, placed in a Solomon-like position in deciding the nation’s first custody dispute over a child born of a surrogate parenting agreement, ruled that the $10,000 contract signed by Whitehead and William Stern was legal.

“The surrogate parenting agreement is a valid and enforceable contract under the laws of New Jersey,” the judge said. “Mrs. Whitehead was anxious to contract. This court finds she changed her mind, reneged on a contract.”

Whitehead, who was not in court, completed her last regularly scheduled two-hour visit with the child just before noon — 90 minutes before the ruling.

This Morning

Council system unfair, Haynes says

Editor’s note: This is the first of two profiles of Carbondale mayoral candidates.

Norvell Haynes, candidate for city mayor

Mayoral candidate Norvell Haynes wants to change the city’s government.

Haynes is the only city candidate actively seeking to change the mayor-council system of government to a ward-aldermanic system.

Haynes, who lives on the northwest side of town, says the present at-large system, which includes a mayor and
Jihad says Steen’s health worse, swap offer stands

BEIRUT, Lebanon (UPI) — Extremists holding three Americans and an Irish-born U.S. resident said Tuesday, hostage Adam Steen’s health is “deteriorating day after day” and offered to swap him for 400 rebels held in Israel. A statement signed by the Islamic Jihad for the Liberation of Palestine and delivered to the independent Al-Balah newspaper accused the hostages of spying and said “investigations have begun into their crimes. We ask from whoever has information about the hostages to send them to us.”

Death toll in Malaysia aircraft crash most likely 134

LONDON (UPI) — The owner of a British ferry that sank off the coast of Belgium March 6 reaffirmed Tuesday that the death toll in the disaster was most likely 134, reversing an earlier statement that the toll could approach 200. Dick Martin, an official of Towsend Thoresen, the owner of the Herald of Free Enterprise, said in Zeebrugge, Belgium, that the company may have miscalculated the number of bodies on the sunken ship and that the total could surpass 130 in addition to the 61 bodies already recovered.

Afghan plane shot down by Pakistani jet

ISLAMABAD, Pakistan (UPI) — Afghanistan’s Radio Kabul reported Tuesday two Pakistani fighter jets shot down an Afghan Soviet-made Antonov-26 transport plane, killing 40 people aboard, including the crew and passengers. The report said the plane was shot down by two Pakistani U.S.-made F-16 fighters when the plane ventured 10 miles into Pakistani airspace. In Washington, the State Department spokesman Arthur Berger said the Antonov-26 is a military transport plane sometimes used for reconnaissance missions.

Officials say guerrillas downed 24 aircraft

NEW DELHI, India (UPI) — Afghan rebels destroyed 14 Soviet and Afghan aircraft during the past 11 days, bringing to 74 the number of aircraft downed by the guerrillas this month, Western diplomats said Tuesday. Two diplomats, who gave separate briefings on the condition they not be identified, also said two staff members at the Soviet Embassy in Kabul disappeared last week, possibly defecting to Afghan resistance forces. The diplomats’ reports could not be independently verified.

Reagan seeks clear lines of control in NSC

WASHINGTON (UPI) — President Reagan ordered reforms of his National Security Council Tuesday, nearly five weeks after the Tower Commission reported that his top advisers had failed him in the Iran-Contra scandal. In a National Security Decision Directive, Reagan ordered an “NSC staff organization that imposes clear, vertical lines of control and accountability” and forbids the council from undertaking any covert operation.

Officials hope Reagan’s visit will bring funds

PHILADELPHIA (UPI) — Organizers of the city’s bicentennial bash for the U.S. Constitution hope President Reagan’s visit today will spur contributions to make up a $10 million shortfall. Officials also hope the visit generates positive press for The City of Brotherly Love, which has seen some unlovely publicity the past couple years. Reagan is scheduled to address about 150 staff and volunteers of We The People 200, an agency that is organizing events to mark the historic document’s 200th anniversary.

NBC workers may join ABC, CBS in strike

NEW YORK (UPI) — About 2,600 news writers, producers and other NBC workers were poised Tuesday to go on strike, in a contract dispute mirroring the month-old strike by 525 ABC and CBS employees. The National Association of Broadcast Employees and Technicians, representing the NBC workers, said it had little hope of reaching an agreement by midnight, when the union’s old four-year contract was to expire.

American official may visit Iraq in spring

WASHINGTON (UPI) — The Reagan administration may dispatch a special State Department official to Iraq later this spring as part of an effort to enhance U.S. presence in the Persian Gulf. U.S. officials said Tuesday State Department officials said no final decisions have been made but a trip by Deputy Secretary of State John Whitehead to Baghdad is under active consideration. Whitehead would be the most senior American official to visit Iraq in 30 years.
House votes to override highway veto

WASHINGTON (UPI) - House Republicans abandoned Ronald Reagan Tuesday and joined Democrats in voting to override his veto of an $88 billion highway bill, fearing the president's action would cripple summer construction and jeopardize thousands of jobs.

The vote was 356-73 with 102 out of the 177 Republicans in the chamber voting against Reagan, including GOP leader Bob Michel of Illinois. Only one Democrat, Rep. Norman Sisisky, D-Va., broke ranks and supported Reagan's veto of the highway bill.

Reagan regarded the vote to override his veto as a test of his emergence from the Iran-Contra scandal, but some congressional leaders accused him of simply picking a fight with Congress.

Two-thirds of the lawmakers voting in each chamber must agree to override a veto for legislation to become law over the president's objections.

The real battle will be in the Senate, where Democratic leader Robert Byrd reminded lawmakers, "Government by veto is not leadership. It's confrontation."

New tax laws lead more students to file returns

By David Shocts

New tax laws mean more students will be filing tax returns, and it doesn't pay to be late or to forget the April 15 deadline.

Scholarships, fellowships or grants are considered taxable income this year, said Kris Zini, an Internal Revenue Service spokeswoman, and if you fail to report a significant amount of money, you could face a penalty.

"If you file a late return, the IRS can charge you a minimum 5 percent penalty assessed to your return," Zini said. That means the IRS can charge tardy filers an additional 5 percent of the tax they already owed each month the return is late.

If you don't file at all, she said, the IRS is obligated to notify you of the deficiency, at which time you have 30 days to pay.

Non-payment after 30 days allows the IRS to garnishe the tax debt from the tax dodger's paycheck, she said.

The IRS requires undergraduate and graduate students to declare scholarships, fellowships and grants as taxable income if the awards were given after Aug. 16, 1986.

The awards are taxable as long as they are not used for tuition and related expenses like course-required fees, books and school supplies, or if the aid was received by someone who is not a candidate for an academic degree, Zini said.

Tuition and course-related expenses specified above will be considered part of an individual's earned income subject to income tax, Zini said.

The new tax law also prohibits students who are employed and make more than $500 in wages and unearned income, such as interest on savings, accounts, but still are claimed as a dependent on their parents' tax returns from claiming themselves exempt from tax withholdings on their paychecks.

A $500 penalty may be imposed for claiming exempt status when not entitled to do so.

See TAX LAWS, Page 5

Carbondale, Illinois - The SIUC administration today proposed to replace the 2% reallocation plan with a plan to increase faculty salaries. Declaring the 2% plan an "unqualified success," a leading member of the administration, who asked not to be identified, commented that "It just didn't go far enough."

Therefore, the administration will ask the faculty Senate, at its next regular meeting, to endorse a new salary plan. This plan will be known as the "Dean of the Day" program. Each faculty member in turn will be appointed Dean for one day, with the commensurate salary increase. Upon returning to the faculty ranks, the faculty member will retain the salary and benefits he/she received as Dean - as is customary.

In this way, all faculty salaries will increase significantly in about three and a half years.

April Fools!

Periodical rip-offs hurt library quality

Robert Peters

A FAMILIAR scene. You've got a research project due tomorrow and have just waded through five volumes of Readers Guides. In divine elation over finding Volume III of the Juilliard Encyclopedia of Operas at the desk, you look up an article. But your article is gone — with only the raggedly-shorn margins of the pages left to tell you that they ever existed.

There probably is not a student at this University who has not suffered the agony of finding a mutilated periodical volume. And according to preservation librarian Jane Withers, 338 volumes were mutilated in the Morris Library during the last half of 1986. This represents an increase from 254 volumes repaired or replaced in the 1985-1986 school year, or about 41 percent more damages in half the time.

Periodical mutilation also costs the library — already so short on funds that it had to cut back 300-315 periodicals last year — $1,000 to $1,500. The two dollars per copy could get two dollars from the circulation desk and charge it to their bus's bill.

If this suggestion rattles a few nerves over at Morris Library Circulation, the rallied should keep in mind that it costs $2 to $50 to replace a page in a periodical. All libraries suffer thefts and damages to their resources, but since the Morris is in an economic slump, it is time to look for new ways to stop the page rippers.

Opinions

from elsewhere

Helmet law would save lives

Chicaco Sun-Times

Since 1969, motorcyclists in Illinois have not had to wear helmets, after the state Supreme Court struck down a mandatory helmet law (a ruling since reversed). We this summer, some motorists have proposed the helmet legislation. But that argument was rejected last October when the state Supreme Court upheld the seat belt law. We also endorsed the 1969 decision on a helmet law.

When it comes to seat belts and helmets, the overriding consideration should be safety.

Doonesbury

April 1: Doonesbury

with only the bar owners. As one of the students who flipped through, I was impressed by the careful attention to detail. The letter from Mr. and Mrs. Tuckcr on March 26, 1987, struck me as another feeble attempt by an uninformed and theologically brainwashed sector to turn all of society and its members to a singular way of existing. Thank you, Mr. and Mrs. Tuckcr. But I feel that part of being an American is having the right and privilege of being able to live as I choose. It also allows me to respond to overt and fine or imprisonment.

The letter also mentioned that faculty members warn students that replacing a page in a periodical. All libraries suffer serious questions about a student's right to privacy. It is impossible to prove that they ever existed.

Students create drinking problem

In response to Tom Mangan's "Getting tough on underaged drinking" viewpoint, which appeared in the DnE on March 13, 1987, I would like to comment. As a freshman student and a few good key points concerning the problem. However, I would also like to point out that in condemning one group of people, that is not going to do the selling, and those that are responsible for enforcing the law, and by declaring the students are "victimized" and "patted on," he has attempted to entirely pardon students from the problem.

What he has failed to touch on is the age-old problem of the students purchasing drinks in bars and package liquor in stores for those who are not yet old enough to do the purchasing themselves.

As a fellow student and a cocktail waitress in a Carbondale bar, I have seen countless attempted by those of age to purchase for those too young. I have also seen the underage students order a Coke, pull out a fifth (presumably purchased by someone else) and mix the content with the Coke.

The transferring of hand stamps is another problem. Had I not seen one of these occurrences (and I think it's safe to say that many times I haven't), I might have found myself in the middle of a serious predicament. I do the best I can in trying to control the problem. Yet, what goes on that I'm not aware of and in trying to control, the problem.

The about is that I'm not aware of and in trying to control, the problem.

EMISSIONS, from Page 1

permit from Pollution Control along with the smokestack's post Approval. If the IEPA grants the power plant an operating permit, it may not be put into operation for another three or four years, he said.

The power plant should get operational status within 30 to 60 days, according to field inspectors responsive to Terry Switzer, the IEPA's in charge of enforcement.

A preventative maintenance program to monitor the condition of the equipment is a condition of approval for an operating permit, Dennis said.

"We don't want to have problems a couple of years from now, and we want the precipitators have deteriorated or broken before it's time."

If a precipitator malfunction, the University must notify the IEPA and has 24 hours to decide if the malfunction can be fixed. The plant normally operates on three of its four boilers. If a boiler with a malfunction cannot be fixed within a reasonable period, the spare boiler would have to be used, he said.

"I hope the new equipment will be more efficient," Dennis said. "We have the technology to make this plant more sensitive to the emissions."

"The difference between what they need and what they've measured is a great," Dennis said. "I hope to see them put in anything less efficient than what they did.

"The levels of ash and soot particles from the smokestack had violated IEPA regulations since 1974, releasing two or three times the standard particle emissions. In 1977, the IEPA rated the power plant one of the top polluters in Illinois while money from the Illinois Legislature was appropriated to the plant in 1976 and released until 1980.

Construction of the precipitator system was to be completed in 1984. Bankruptcy of the original Kansas City contractor in 1983, breakdown in the boiler system and malfunctioning precipitators caused the delay, said Allen Haake, University supervising engineer.

The project was completed by J & L Robinson Development and Construction Co. of Carbondale.

HAYNES, from Page 1

alderman issue is a big one in his campaign, "It's not the only issue," he said.

Haynes, a Carbondale native, lost his bid for mayor in 1981, but people are "ready for a change," he said. They've "seen the city decline socially, economically and physically in a very untoward manner," he said.

The last election showed voters were ready for the deterioration, he said, because the winning ticket mayor is too weak and has not provided "initiative."

"(The office of mayor) needs to set the direction. That's what's supposed to do and the result is what it has not done," he said.

Haynes said if elected he will offer new ideas and bring in more federal grants that would help rehabilitate the city and with urban renewal.

"The federal government has set up an experimental grant program that deals with urban renewal and the city government hasn't even applied for it," Haynes said.

"The convention center is an easy issue for the city, staff to waste a lot of time doing nothing," Haynes said.

"It's a sensitive" location on campus where people are exposed regularly to the emissions, Dennis said.

"There's no point in throwing good money after bad dollars," he said.

Haynes said transportation in Carbondale needs help, but nobody has come up with a solution good enough to earn his support.

"The west-east, which would turn West Walnut Street into a one-way street from Oakland Avenue to University Avenue would become another "Dan Ruse Expressway," Haynes said. A change is needed, he said, but destroying "old established neighborhoods just to get traffic moving is not worth it," he said.

The railroad relocation project is not feasible, Haynes said. After studying the project he found the project will cost $300,000 a year over a five year period, an amount the city's tax base can't handle, Haynes said.

The city should spend less energy attracting retail businesses and more energy attracting industry, Haynes said.

TAX LAWS, from Page 3

so or for filing a W-4 that results in less income withheld than is allowed, Zini said.

W-4 forms are filled out by the employee and tells the employer how much income to withhold from the employee's paycheck for tax purposes.

Zini said he has seen the returns "even if you didn't make enough to be considered taxable."

"That way, you're sure to get some kind of refund," Zini said.

For 1987, single individuals under 65 who claim no dependents are not obligated to file a return if they make less than $4,400 annually.

Whether a person needs to file a return or not, "you don't have to do it," Zini said.

"But if you have someone do your return for you, don't ever sign a blank return in advance. If something goes wrong, you're ultimately responsible."

Penalties on your income tax, based on the degree of error and the individual's income, can be assessed, she said.

Late filers "don't have as much time to work on it and are at a great disadvantage," Zini said, which prompts them to make more mistakes than those who file early.

"The most common error is that people forget to sign their return," Zini said.

"The most common error is that people forget to sign their return," Zini said.

New on the error list this year is that filers do not select the "0" forms for the return.

Employers provide the W-2 forms that show a person's annual income and the amount of federal tax withheld from the paycheck for the year.

Any tax forms that filers marked can be requested by calling the IRS toll free, 1-800-424-FORM. Technical questions about filling out tax forms can be answered by calling 1-800-424-1040.
Girl, 17, brings suit against store, tobacco manufacturer

BOSTON (UPI) — A 17-year-old girl who started smoking five years ago because “it was cool,” filed a suit Tuesday that accuses a tobacco manufacturer and a retail chain of breaking laws prohibiting cigarette sales to minors.

“This is very important,” said Theresa Kyte of West Newbury. “If when I was 12 years old I couldn’t buy cigarettes, I probably wouldn’t be smoking right now.”

Her lawyers said similar laws in 38 other states are being routinely violated.

The suit, apparently the first of its kind in the nation, seeks to force stores to stop selling tobacco products to children under the age of 18, as mandated by Massachusetts law.

Kyte is asking for an unspecified amount for damage to her lungs and nicotine addiction. Asked why she started to smoke, Kyte said, “I guess because I thought it was cool.” She said two-thirds of her girlfrienh’s smoke.

The suit, filed in Middlesex Superior Court, is the start of a national campaign against sales of tobacco to children, said Richard Daynard, a Northeastern University law professor and member of Group Against Smoking Pollution.

The suit alleges Philip Morris, maker of the Parliament cigarettes Kyte favors, and The Store 34 Inc., a Wallingford-based, convenience-store chain that often sold cigarettes to her, conspired to illegally sell tobacco to minors.

“I think the lawsuit is patently ridiculous,” said Mary Taylor, a spokeswoman for the New York-based Philip Morris. “We don’t sell the cigarettes directly.”

Nude pictures of coed to stay

BLACKSBURG, Va. (UPI) — Virginia Tech faculty members voted Tuesday to allow controversial nude photos of a coed and a young man — a “young woman’s exploration of her womanhood” — to remain in a lounge used by high school students and their parents.

“The show will not be censored,” said Ralph Payne, an associate professor in the Communications Studies Department, whose student took the photos. “In the end, rationality prevailed.”

A statement issued by the department after the hour-long meeting that produced a 16-1 vote said the faculty “affirms its commitment to freedom of expression within current legal limits within a university climate that encourages diversity of views and images.”

Payne said the 10 photos of Elizabeth Klaimon, part of an exhibit of 100 examples of student work in his photojournalism class, will remain on display until April 24 when a new exhibit will be displayed.

All of the softly lit, black-and-white photos are explicit, including several frontal views of Klaimon, of Vienna, Va.

Payne said the display was “tastefully done” and called it “entirely unreasonable” to ask that the photos be taken down.

Children show sensitivity toward animals, survey says

NEW YORK (UPI) — Most of the nation’s elementary school children oppose killing animals for research or wrecking wildlife habitats to make way for shopping malls, amusement parks or movie houses, a survey released Tuesday showed.

Some 125,000 boys and girls in grades two through six filled out the “Weekly Reader” survey form printed in the newspaper that goes to elementary schools across the nation.

The survey found that 74 percent opposed destruction of wildlife habitats to build shopping malls or movie theaters and 68 percent were against clearing wilderness for amusement parks — “some of these kids’ favorite places,” said Lynell Johnson, executive editor of Weekly Reader.

Other highlights from the report —

Seventy percent oppose killing animals for display in museums or for study.

More than 90 percent agree that it is important to have laws protecting the bald eagle, the national bird. Forty-five percent feel it is necessary to safeguard grizzly bears; 40 percent, the timber wolf.

**NBC tops Nielsen polls in rerun-dominated week**

NEW YORK (UPI) — NBC won its 24th prime-time victory in a week where more than half the top 10 shows were repeats, figures showed Tuesday.

As usual, NBC’s “The Cosby Show” and “Family Ties” were the top two shows, even though both were repeats. Other repeats included NBC’s “Golden Girls,” CBS’s “Murder, She Wrote” and ABC’s “Moonlighting” and “Growing Pains.”

At the bottom of the pack were ABC’s “Our World” and “Burman” and CBS’s “The Wizard.”

For the week ending March 29 — the 27th week of the season — NBC was win over 16.6 rating and 27 share. CBS had a 14.5 rating and 24 share and ABC had a 13.3 rating and 22 share, according to the A.C. Nielsen Co.

In news, “NBC Nightly News” with Tom Brokaw barely won the week with an 11.9 rating and 22 share.

“CBS Evening News” with Dan Rather was next with an 11.4 rating and 22 share and “ABC World News Tonight” with Peter Jennings improved to a 10.8 rating and 20 share.

NBC leads the season-to-date ratings with a 17.9 rating and 28 share.

The top prime-time shows for the week ending March 29, according to the A.C. Nielsen Co., were:

1. The Cosby Show (NBC)
2. Family Ties (NBC)
3. Cheers (NBC)
4. Golden Girls (NBC)
5. 60 Minutes (CBS)
6. (tie) Murder, She Wrote (CBS)
7. Growing Pains (ABC)
8. Moonlighting (ABC)
9. (tie) A Stranger Waits (CBS)
10. Who’s the Boss? (ABC)

**Student art showcased in exhibit**

Art work by SIUC graduate and undergraduate students will be featured in the 9th annual Student Center purchase awards exhibit which opens Monday in the Student Center’s Ballroom B.

Winners receive cash and their work becomes Student Center property for display in the building. John Sanders, fine arts chairperson for the Student Programming Council, said the volume of purchases change from year to year.

Exhibitors do not have to make art majors. Drawings, paintings, sculptures, photographs, sculpture and other two and three-dimensional pieces may be submitted.

Student entries may be brought to the Student Center, Ballroom B between 11 a.m. and 5 p.m. Sunday, April 3, and should be ready for display at that time.

Cost rules and forms are available at the SPC office in the Student Center, the School of Art, the Student Center Craft Shop and the Department of Cinema and Photography. There is no entry fee required.

Awards will be named at a public reception from 6 to 7 p.m. Monday, April 6, in the Student Center Gallery Lounge. The display runs through Friday, April 10.

**Hoosiers led to tough choice for 2 viewers**

By United Press International

TV viewers had a choice of the Academy Awards or the Indiana-Syracuse basketball game and the decision was extra hard for Indiana grads David Anspaugh and Angelo Pizzo.

They ended up with two television in Anspaugh’s Los Angeles home, watching their beloved Hoosier basketball team as it won the NCAA championship. He’s also keeping up with his movie, “Hoosiers,” which was nominated for an Oscar for musical score and for Dennis Hopper’s supporting role.

“We had to make a lot of decisions the past four to five days,” said Pizzo, who wrote the story. “We almost got on the plane to go to New Orleans. Then we said, ‘Why bother with the Academy Awards?’ We have to be there with Hopper.”

But when Indiana qualified for the championship game, Pizzo and Anspaugh, who directed the film, decided they had to see the game.

**Tens of thousands help March of Dimes**

The “Students Help the March of Dimes” Committee wishes to publicly acknowledge and thank the following Registered Student Organizations and Residence Halls for supporting the March of Dimes.

“RIDE THE WAVE” MAY 2nd
Soviets launch astrophysical lookout

MOSCOW (UPI) — The Soviet Union Tuesday launched a 2-ton astrophysical observatory that will dock with the orbiting space station Mir early next month, Radio Moscow said.

The deputy mission director, Dr. Viktor Blagov, said the linking of the self-contained astrophysical observatory with the Mir, scheduled for April 5, would "open a new chapter" in manned space flight.

The observatory, 19-feet long with a diameter of 13.6 feet, will double the working space available to cosmonauts on the Mir station. It will tie into one of the Mir's six docking ports.

One Western diplomat said the observatory's launching and docking was bound to increase pressure on the National Aeronautic and Space Administration to move forward with its own permanently manned space station.

NASA began planning a large, modular space station in 1984 but the project has been stalled in recent months because revised costs and estimates place the cost at nearly double the original $8 billion. Orbital assembly of the space station is planned for the mid-1990s.

"Anything the Soviets do successfully in this field, and they are moving along quite smartly, is going to put added pressure on the United States to begin its own program," the diplomat said.

The astrophysical observatory, called Quantum, is almost as large as the Mir station, which has been in orbit since February 1986 and is equipped with its own life support system. The Mir has been manned for the past two months by cosmonauts Yuri Romanenko and Alexander Laveikin.

Blagov said the Quantum, weighing 20.6 tons including a 9.6-ton service pod, is a major step forward in the Soviet space plan.

"The Quantum is carrying scientific equipment and experiments in a group venture with West Germany, the Netherlands, Switzerland and the European Space Agency, Radio Moscow said.

For that reason, NASA negotiated agreements with several nations early in the shuttle program for use of commercial or military airports.

"Unfortunately, there was a break-in in the equipment shelter and a good part of it is missing," Saks said.

Earn salad dressing contains ... and calories one tablespoon of jelly.

Quiz to publicize March as Healthy Ways of Eating.

Many students knew the differences between jam and jelly. Forty-two percent knew that jam and jelly have the lowest calorie toppings for toast as opposed to peanut butter, honey or butter.

"When it came to questions that pertained mostly to items that were available in the dorms, it showed a need for education," said Kate Zager, nutrition coordinator at the Wellness Center.

The Wellness Center, Health Advocates and University Housing sponsored the pop-quizz to publicize March as National Nutrition Month and to get nutrition information to students living in the residence halls.

Zager said that a large gap often exists between students in the residence halls and the management. "There is a need in the residence halls to provide education about the food that is provided," she said.

Quiz questions ranged from vitamin supplements to the sugar content of cereals to the number of calories in potato chips and salad dressing.

Richard Whyman, freshman in administration of justice, took the nutrition quiz in Grinnell Hall. "I took the test and I found out that I really didn’t know as much about nutrition as I thought," he said.

SIU Women’s Club offers $500 junior scholarship

A $500 scholarship is available for a female student through the SIU-C Women’s Club.

Eligibility requirements include a minimum grade point average of 2.7, junior standing and demonstration of leadership at SIU-C.

Applicants also must submit an application and a statement describing and documenting leadership experiences. Three letters of recommendation are necessary.

Deadline for applications is April 13. Relatives of Women’s Club members will not be considered.

Applications and additional information available from Lillie Lockhart, chairwoman of the scholarship committee, in Woody C-104.
Rebels attack army base; 44 killed

EL PARAISO, El Salvador (UPI) — Leftist rebels attacked a strategic army base Tuesday, killing 44 soldiers and a U.S. military adviser, the first American adviser to die in fighting that started 7-year-old civil war.

The military sent U.S.-supplied helicopters and attack planes to fight the rebels who bombarded the El Paraíso military base 28 miles north of San Salvador with grenade mortars.

"There were 250 soldiers inside El Paraíso at the time of the attack, 43 were killed, although the number could rise, and 35 were wounded," said Gen. Adolfo Blandón, commander of the 4th Brigade.

Blandón said an unknown number of insurgents attacked the heavily fortified base at about 2 a.m. in fighting that lasted four hours. He said the U.S. adviser was killed by mortar shrapnel.

A spokesman for the U.S. Embassy in San Salvador identified the officer as Staff Sgt. Gregory A. Freon, who arrived Jan. 6 and belonged to the 3rd Battalion, 7th Special Forces, U.S. Southern Command based in Panama.

"It began with a tremendous explosion," said Col. Gilberto Roble, commander of the 4th Brigade who was wounded in the attack. "They came from different directions and hit the hills first where our lookout posts were."

Normally, 2,000 troops are stationed at the base that protects the Corrón Grande reservoir dam and electrical facilities. At the time of the attack, three groups of 500 soldiers were on patrol and could not return to reinforce the base, Blandón said.

The guerrillas, in a dispatch from their Salpress news agency, claimed they took at least 250 prisoners and captured 360 weapons in the largest assault on the base since 1984 soldiers were killed in a January 1984 attack.

In Washington, the State Department said the American adviser was the only U.S. citizen at the base during the attack.

He was the first adviser killed during combat in El Salvador's civil war and the second American to die in the country in less than a week.

The State Department said Tuesday pilot error apparently was the cause for the crash Thursday of a Salvadoran military helicopter that killed a CIA employee.

Pope greets Uruguay with kiss

MONTEVIDEO, Uruguay (UPI) — Pope John Paul II opened his politically controversial tour of three South American nations Tuesday, kneeling in a rainstorm to kiss the wet tomb of Uruguay's Carrasco International Airport.

President Julio Maria Sanguinetti, said she was "very much" looking forward to his four-visit Wednesday. The Pope was first American adviser to visit the South American nation Tuesday.

The guerrillas, in a dispatch from their Salpress news agency, claimed they took at least 250 prisoners and captured 360 weapons in the largest assault on the base since 1984 soldiers were killed in a January 1984 attack.

In Washington, the State Department said the American adviser was the only U.S. citizen at the base during the attack.

He was the first adviser killed during combat in El Salvador's civil war and the second American to die in the country in less than a week.

The State Department said Tuesday pilot error apparently was the cause for the crash Thursday of a Salvadoran military helicopter that killed a CIA employee.

Thatcher opposes Euromissile treaty

MOSCOW (UPI) — British Prime Minister Margaret Thatcher Tuesday praised Soviet leader Mikhail Gorbatchev's moves to open Soviet society but said she opposes his terms for a treaty banning intermediate-range missiles from Europe.

"I am very well satisfied indeed with my visit so far," said Thatcher, who has met with Gorbatchev for a total of nine hours during the trip that began on Saturday. "Mr. Gorbatchev and I have achieved a very good relationship and been able to continue the same frank dialogue which we began two years ago."

The British leader, who had lunch Tuesday with dissident physicist and Nobel Peace laureate Andrei Sakharov, contrasted Soviet progress with positive developments under Gorbatchev at her news conference rather than listing Soviet human rights shortcomings.

Thatcher, who is on her fourth visit to Moscow and her first in an official capacity, said she was struck by the "much, much wider discussion" under way in the Soviet Union on the future of the country. "Thatcher called her visit "fascinating and inquiring" and said she could not remember spending more time with the leader of any other country.

"I've been able to say how very much we welcome the policies of openness, restructuring and democratization," Thatcher said.

COMPARE THE BOTTOM LINE
Third Marine guard arrested in sex-for-secrets scandal

WASHINGTON (UPI) — The No. 2 Marine at the U.S. Embassy in Moscow last year was arrested as the third suspect in the widening sex-for-secrets scandal that has prompted top-level investigations, the administration said Tuesday.

Staff Sgt. Robert Stanley Stufflebeam, 24, of Bloomington, Ill., was arrested as a "possible suspect" in the operation because he had "associations with Soviet women on several occasions" while serving as deputy commander of the Marine Corps guard at the embassy, the Pentagon said.

Stufflebeam, currently assigned to the 1st Marine Division at Camp Pendleton, Calif., was arrested and confined to that base's brig. It is uncertain whether he is violating two articles of the Uniform Code of Military Justice but has not been charged formally.

His service at the embassy from May 16, 1985, to May 24, 1986, overlapped the period when two other Marine guards accused of spy-related activities, Sgt. Clayton Lowntree and Cpl. Arnold Bracy, were part of an elite embassy guard program.

Monday, the State Department said the entire detachment will be replaced next month in a wide examination of the Marine Corps' presence at the embassy.

The Marine Corps filed four charges against Bracy, 21, of New York, accusing him of consorting with Lowntree to allow two Soviet agents to "peruse" sensitive areas of the embassy for up to four hours between January and March last year and receiving about $1,000 for his help.

The arrest of a third Marine, and the formal charges against Bracy raised questions about the breadth of the operation and what secrets may have been compromised at the most sensitive U.S. diplomatic outpost.

An investigation by the Foreign Ministry's Military Justice but has not been charged formally.

Marines' removal called 'a great defeat' by official

MOSCOW (UPI) — A Foreign Ministry spokesman Tuesday dismissed charges that KGB agents used sex to recruit U.S. Embassy Marine guards as spies, saying Washington fears "reds are under each bed."

Gennady Gerasimov told a news conference that the U.S. order to withdraw the 28-member guard contingent for security reasons — the first time an entire embassy guard unit has been ordered home — was a defeat of the famous U.S. Marines.

Gerasimov denied allegations that a diplomat in the Soviet Embassy in Paris operated a spy ring that stole secrets of the European commercial space program.

"We totally reject all the allegations of Paris. As to the case in Moscow, we can only smile at what is said about this story," he said.

"It is really funny that 28 Marines are brought back from the American Embassy because they allegedly were unable to withstand the charms of blonde spies.

"We were surprised by this order (to withdraw) which shows a defeat of the famous U.S. Marines, the former victors of Grenada.

Recently we have witnessed a loss of the capability to resist the enemy and sometimes one can fear that reds are under each bed."

Sleepy workers prompt plant shutdown

WASHINGTON (UPI) — The government ordered the shutdown of the Philadelphia Electric Co.'s Peach Bottom nuclear power station Tuesday, saying workers and their supervisors have been falling asleep in the control room.

"Continued operations of the facility is an immediate threat to the public health and safety," said Victor Stello, the executive director of operations for the Nuclear Regulatory Commission.

"Sleeping while on duty in the control room demonstrates a total disregard for performing licensed duties and a lack of appreciation for what those duties entail," Stello said in an order to the utility.

NRC spokesman Frank Ingram said the shutdown procedure at Peach Bottom, located in southeast Pennsylvania near Maryland, was started at 12:30 a.m. Tuesday.

"The company is licensed by the Nuclear Regulatory Commission to operate two units at Peach Bottom, one unit is already shut down for refueling and the other unit must be brought to cold shutdown within 36 hours under terms of the NRC order," Ingram said.

Market shows improvement after losing 100 points

NEW YORK (UPI) — Stock prices ended higher in the market showed signs of making a cautious recovery from the two-month drought that dropped the Dow Jones industrial average nearly 100 points.

The Dow average finished the day up 25.20 to 204.69. Advancing led declines, 961 to 307, among the 1,463 issues crossing the NYSE.

Broad-market indexes also rose. The New York Stock Exchange composite index added 1.33 to 165.87. And the 30-stock Dow Jones industrial average climbed 2.50 to 291.70. The price of an average share gained 34 cents.

Big Board volume amounted to 171,760,000, compared with 208,440,000 Monday.

"It was a real rally from the 100-point sell-off we've had over the last two or three days," said Ricky Harrington, technical analyst with First Interstate Securities Corp. in Charlotte, N.C.

Harrington said he expects the market will maintain resistance around the 2900 level and would have "to back and fill" in early April before retesting the 2400 level late in the month.

Traders said stock prices were supported by reports that the Japanese prime minister was taking steps to defuse trade conflicts with the United States.

"There's still a fair amount of concern about what's going to happen with the dollar and in future trade relations with Japan," said Tom Gallagher, managing director in charge of capital commitment at Oppenheimer & Co. But he said the market "has a decent overall tone."

Gallagher said the market was shocked by the 80-point drop on the opening Monday, but likely will recover "in a couple of days."

On the Big Board, Borg-Warner was the most active NYSE-listed issue, up two to 49 and one-half in heavy trading. Commonwealth Edison was second, unchanged at 36. IBM was third, down 2 and one-fourth to 150 and one-half.

Nationwide turnover in NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 302,525,660, compared with 239,829,460 Monday.

Prices rose in moderate trading of American Stock Exchange issues.

The American Stock Exchange index rose 1.49 to 332.66. The price of an average share rose seven cents. Advances led declines, 348 to 256, among the 836 issues traded. Composite volume on the American Stock Exchange was 14,377,600, compared with 16,261,600 Monday.

International Business Day set

Activities and seminars for International Business Day run from 8:30 a.m. to 4:50 p.m. today. The events will be held in the Stiler Student Center Auditorium.

Thomas Gutteridge, dean of the College of Business and Administration, will open ceremonies at 8:30 a.m. Coral Snodgrass, assistant professor of management, will follow with a welcome address.

Scheduled seminars include "Future Business Prospects in Asia" at 9 a.m., "Cross-Culture Management" at 10 a.m.; and "Export to Middle East: A Case Study" at 11 a.m.

For more information, call 351-4404.

Alfred W. Richardson, 71, emeritus professor, dies

Alfred W. Richardson, professor emeritus of physiology, died Monday at the Stilet Nursing Home in Carbondale. He was 71.

Services will be at 2 p.m. today at the Johnson-Hughes Funeral Home, 201 S. 13th in Herrin. Entombment will be at Rose Hill Cemetery in Marion.

Mr. Richardson, who was a pioneer in the field of biophysics and medical technology, invented equipment used in heart surgery and cardiovascular study. He also was the principal investigator of the National Aeronautics and Space Administration.

He received his bachelor's degree from SIU-C in 1940, and his master's and doctoral degrees from the University of Iowa in 1947 and 1949, respectively.

Mr. Richardson received the Alumni Achievement Award in 1964 for his work in biophysical and biophysical research and joined the Department of Physiology in 1966.

In 1965, he was honored for achievements in biophysical and biomedical research by being appointed to the National Academy of Sciences.

Mr. Richardson is survived by his wife, Annabelle, son John, daughter Dianne, brother Del, three nieces and one nephew.
Indiana's Coach Bob Knight, who joined John Wooden and Adolph Rupp as the only basketball coaches to earn more than two NCAA championships, needs seven more to reach Wooden's record.

Indiana's Steve Allord finished his career Monday night in the Superdome, in the Big 10 all-time scoring record held by Mike McInerney of Michigan State, 438 points.

Steve Allord scored 749 points this season, three fewer than the school record for a season set 54 years ago by the Hoosiers' NCAA championship year of 1926.

Keith Smart was selected as the Final Four Most Outstanding Player. Smart, called "the best player in the country," led his team to the Championship game.

"We played the best team in the country," said Steve Allord, "and we played them in the Supdome, in the biggest arena in the world."

UCLA IAI misses bis NCAA tournament. The UCLA Bruins coach, and Rupp's plans to return to the NCAA for the 1983-84 season, was 1-2 in 12 home games and 1-2 in 14 games.

The left-handed Bosley, 30, who had been with the Cubs since March 1963, batted .275 last season with 46 pinch hits.

The right-handed Gumpert, 28, split the 1986 season between the Cubs and the team's Triple-A affiliate in Iowa. He had a 2-5 record with two saves for the Cubs after being recalled in June.

Steve Allord had a 2-5 record with two saves for the Cubs after being recalled in June.

Minoso to bat record 6th decade.

DAVENPORT, IOWA (UPI) — Orestes "Minnie" Minoso says in three years he plans to record his final six-base hit at the major league record book.

Minoso, 64, currently holds the record as the only baseball player in modern history to swing a bat in the major leagues during five decades — from the 1940s through the 1980s.

The former Chicago White Sox star, who was the American League rookie of the year in 1951 with 126 batting hits,Disable2 126, batted .275 at last season with 46 pinch hits.

NCAA basketball championship brings out the optimism in everyone. The Final Four Monday night, a woman held two tickets, offering each for $3. The tickets ordinarily sold for $10 each.

The seats were in section 618 in the upper deck, so far from the court binoculars is an 800-seat line to watch the game.

 Asked how the seats were, the woman said, "They're not bad."

Steve Allord, Indiana's shooter in the Big 10 all-time scoring record held by Mike McInerney of Michigan State, 438 points.

Steve Allord scored 749 points this season, three fewer than the school record for a season set 54 years ago by the Hoosiers' NCAA championship year of 1926.
Tourney talk: Summitt savors win as Barmore predicts hoop parity

AUSTIN, Texas (UPI) — Tennessee coach Pat Summitt had every right to bemoan the women's Final Four. Many times, but her coaching ability had never overcome the talent of the likes of Old Dominion, Southern California and Louisiana Tech.

Sunday, Summitt said she felt as if she finally had the athletes to win a national championship. The Volunteers did just that with an impressive 67-44 victory over Louisiana Tech. Tennessee's unrelenting defense held the Volunteers to the lowest point total in championship history and caused them to hit only 33 percent of their field goal attempts.

"I don't think we've ever been the favorite going in," Summitt said. "I really felt this year we had enough talent to win." Although Tennessee has been among the elite women's college basketball programs for many years, Summitt said the Volunteers have been recognized as an outstanding team in basketball only since they qualified for the U.S. Olympic team to a gold medal in 1984. Since then, the Volunteers have won the national championship twice and four times to reach the Final Four.

Wild Dogs slip to Evansville but season may not end yet

By Darren Richardson
Staf Writer

With the re-occurring Generating of a two-hour drive away and only a few dedicated fans to cheer them on, members of the Southern Illinois Illinois hockey club still retain a fiery urge to compete. "It's more than worth the trip to see the Dogs play," said Chicago native Steve Pelkowski, a late-coming member of the Southern Illinois Wild Dogs. The Wild Dogs had traveled to the Swonder Ice Rink in Evansville, Ind., Thursday to battle the Evansville Horizons for the championship of the Tri-State Hockey League. Of the club's 18 members, 14 made the trip with the remaining four in the St. Louis area who were unable to make the trip.

"We wanted to bring the trophy back to Carbondale and we gave it our best, but it was just the Horizons' night," Pelkowski said.

The Dogs never led as the Horizons jumped to a 1-0 lead with 6:46 remaining in the first period. Wild Dog junior Darren Kahlenhorst led the scoring midway through the second period, but it was all Evansville after that.

While Thursday's game was a stop on the club's regular season play for the 16-12-1 Dogs, there was talk of a round robin tournament sometime in late April even before the puck began to thaw. The prospective tourney would feature amateur clubs from Indiana, Kentucky and Tennessee in addition to the Wild Dogs.

Pelkowski, Ferrell, and junior co-captain Scott Boehm agreed both SIU students who enjoy ice hockey action and those who've never followed the sport would have a good time seeing the Dogs play. "Look at the empty seats," Pelkowski said. "Imagine bloodthirsty college students up there cheering us on. Think how much more that would motivate us and raise the level of intensity on the ice."

If the intensity was subdued in the championship game, the players must have forgotten. After receiving a rough body check from a Horizon, senior Todd Trippany felt he couldn't let the incident pass without reacting in Trippany's more than friendly shove of the Evansville player led to a full-fledged ice war, with both benches emptied and the referee restored order.

But by the time the siren sounded to end the third and final period, the Wild Dogs showcased their good sportsmanship by shaking to congratulate the winners.

"Look at the empty seats," Pelkowski said. "Imagine bloodthirsty college students up there cheering us on. Think how much more that would motivate us and raise the level of intensity on the ice."

If the intensity was subdued in the championship game, the players must have forgotten. After receiving a rough body check from a Horizon, senior Todd Trippany felt he couldn't let the incident pass without reacting in Trippany's more than friendly shove of the Evansville player led to a full-fledged ice war, with both benches emptied and the referee restored order.

But by the time the siren sounded to end the third and final period, the Wild Dogs showcased their good sportsmanship by shaking to congratulate the winners.

"I thought that in the last 16 teams this year, 10 or 12 could have won the national championship. It's tougher for Louisiana Tech and it's tougher for everybody. I don't think they'll be any dynasty. When everybody has a chance, it's better for women basketball," said Leon Barmore, Louisiana Tech coach.

"In the old AIAW, Tennessee was beaten by Old Dominion in 1980 for the title and in 1981 by Louisiana Tech. The Volunteers reached the NCAA final in 1982 only to be beaten by USC and Cheryl Miller.

"We didn't have the great athletes. I finally realized that in 1982 when Tech beat us (69-66) in the semifinals in Norfolk. I felt we were well-prepared, but we didn't have the athletes, and they beat us by 23 points," said Summitt, the 13-year Tennessee head coach.

So she went out and recruited a quick guard in freshman Tonya Edwards, who led her team in scoring in the semifinals and final and was named the tournament's outstanding player. She also recruited a front line made up of 6-2, 6-3 and 6-4 players who were big and physical yet quick.

Tennessee, 28-6, which had more losses than the rest of the teams in the Final Four combined, should be strong again next year. The Volunteers lose only one senior, a forward and another senior reserve.

Louisiana Tech, which finished the year at 30-3 and had a 19-game winning streak snapped on Sunday, loses only two senior starters.

Despite Tennessee's youth, Tech coach Leon Barmore said it will be difficult for the Volunteers to repeat. USC won back-to-back titles in 1983 and 1984, but the talent is more evenly distributed today, he said. Defending champion Texas could not repeat even though it was playing on its homecourt for the Final Four.

"I thought that in the last 16 teams this year, 10 or 12 could have won the national championship," Barmore said. "It's tougher for Louisiana Tech and it's tougher for everybody. I don't think they'll be any dynasty. When everybody has a chance, it's better for women's basketball.

The women's games was popular in Austin, with a sellout of more than 15,000 on Friday night for the semifinal games in which Tennessee beat Long Beach State and North Carolina beatets Texas. Although Texas was not in Sunday's final, almost 18,000 fans did show up to make up the largest championship crowd.
Saluki gridders lose recruit, vets for next season

By Steve Merritt
Staff Writer

While SIU-C’s gridders make the practice field April 1, two experienced backers weren’t on hand to fill in.

Defensive lineman Pat Call, a senior last year, and senior tackle Robert Ziemann joined the San Francisco 49ers in the NFL draft. So, too, did linebacker Randy Smith, a senior. They’ve all signed contracts and will be reporting to their new teams this month.

Offensive lineman Pat Call, a senior last year, and senior tackle Robert Ziemann joined the San Francisco 49ers in the NFL draft. So, too, did linebacker Randy Smith, a senior. They’ve all signed contracts and will be reporting to their new teams this month.

The season opening against Washburn was April 1. The Salukis lost 23-7 to the Ichabods.

The Salukis are hoping to improve on last year’s 1-9 record. They finished in the middle of the Missouri Valley Conference schedule.

SIU-C’s offense was led by quarterback Ron Powell, a sophomore. Powell was 2-6 at No. 3 and 1-9 at the No. 2 spot. In doubles play, motherboard John Hardiman and Ron Powell were 3-0 for the week.

GRIDDERS, from Page 24

Mark Banbury (OL) and tailback Mel Kirkby, who led the Gateway in rushing last year, return.

Boardman, a freshman from Carbondale, Ill., had 76.2 strokes per 18 holes for four tournaments this season.

Wilhelm, a junior catcher from Wheaton, averaged .386 over four games on 7-11 hitting last week, throwing out three runners. She also registered three unassisted putouts.

Boardman, a freshman from Appleton, Wis., has recorded a 13-3 overall record this spring in No. 2 and 3 singles action. She has combined with teammate Ellen Moore at No. 2 doubles for a 10-3 record.

Fresno State's powder was 2.0 at No. 3 singles and 1-9 at the No. 2 spot. In doubles play, Modified No. 1 Boardman and No. 2 were 3-0 for the week.

PHILOSOPHY, from Page 24

Since education is the primary purpose of the University, the governance of intercollegiate athletics lies with the responsibility of the Board of Trustees. Participation in intercollegiate athletics requires a prerequisite certain levels of academic achievement. The educational experience for the student athlete will be stressed at all times. The University recognizes athletics as a program on a substratum, both for the development of individual objectives in education, research and service. Further, a University offering a well-rounded program of intercollegiate athletics is a more attractive place to many prospective students, who may be attracted to the chance of retaining or landing admittance. The University recognizes that its intercollegiate athletics program either enhances or diminishes the institution as a whole.

Intercollegiate athletics provides enjoyment for participants and spectators, and fosters a spirit of unity for the student body. The intercollegiate athletic program is also beneficial to the University by providing a bond among the students and University regional community. Furthermore, the program is considered to be an integral part of the community service of the University as it provides the surrounding region with opportunities for recreation and University level competition.

With the financial resources available, a well balanced program in athletics for women and men is and continues to be a high priority. Major and minor sports will not be defined on the basis of revenue production. This is in keeping with the proper focus in intercollegiate athletics, that of fairness and equity without regard to consequences. The intercollegiate athletics program is designed to provide a substantial competitive environment for athletic excellence across a wide spectrum of sport. While the will to win is essential for honest competition, the development of the athletes and spectators as participants in striving for excellence is even more important than the objective to maximize pressures on athletes, coaches, and athletic administrators to win at all cost will be resisted.

The physical welfare, academic success, and adherence to fair play and amateur athletic competition, as defined by the NCAA rules, will rule all decisions and policies governing student athletes at SIU-C. Appropriate resources to insure adherence to this principle will be provided.

Objectives

1. The University shall strive for excellence in a balanced program of intercollegiate athletics which achieves a close integration of education and athletic competition for those directly involved. The athletic program shall seek to complement and supplement the values and objectives of educational objectives. A strong commitment to the philosophy of intercollegiate athletics and academic and student affairs programs of the University shall be encouraged.

2. The University athletic program shall strive to achieve maximum social and safety benefits to participants, spectators, and to the University and city communities.

3. The University will continue to provide, as athletic income and other funds permit, and as outlined in the University Athletic Committee budget, the financial assistance for the education of students who can contribute to the success of the teams, and at the same time meet the prescribed scholastic standards.

4. The University athletic program shall strive to achieve the following student involvement:
   a. to achieve appropriate University level competition in all sports.
   b. to maintain the highest and most honorable conduct in recruiting contacts.
   c. to recognize, with appreciation, the support of friends in the University region, to make the fullest financial support always be channeled through the appropriate University offices.
   d. to insure that the institution is committed to following all regulations of the athletic conferences and the NCAA.
   e. to make intercollegiate athletics a positive educational experience which complements legitimate curricular opportunities.
   f. to insure that all student athletes are treated with dignity and respect and informed of their rights concerning due process in all matters pertaining to their welfare.

Scrimmages to highlight grid practice
By Steve Merritt
Saluki grid fans will get their first chance to see SIU-C's fall hopefuls at 5 p.m. Wednesday when spring practices begin at McAndrew Stadium.

Four scrimmages highlight the spring schedule, culminating into the annual Maroon and Blue spring game at 1:30 p.m. May 2. Other scrimmages will take place at 9 a.m. April 11 at McAndrew and a 10 a.m. April 18 at Pickneyville High School.

At 7 p.m. April 24 and again at 9 a.m. April 25, the Saluki coaching staff will hold football seminars on running and stopping the option play. Guest speakers will include Mal Moore, an offensive coach with the Chicago Cardinals, and former offensive coordinator for the great Bear Bryant at Alabama. A 1 p.m. scrimmage at McAndrew Stadium follows Saturday's seminar.

Saluki coach Ray Dorr said he plans to accomplish much in the 30 days of practice.

"We'll work on fundamentals and develop the areas we feel we're lacking in," Dorr said. "It's much too early to be talking with our options components, but we will try to keep their style of play in mind."

Salukis look to chill Mizzou
By M.J. Starchak

The Saluki baseball team will brave the cold long enough to challenge Big Eight conference member Missouri to a doubleheader at Ahe Martin Field today at 1 p.m.

After winning 11 consecutive games, SIU-C's record stands at 15-4. The Salukis have outscored their opponents 60-19 since returning from their March 13-2 Florida trip.

Saluki coach Richard "Itchy" Jones said his pitchers have been doing a "com­ mendable job." He said he doesn't plan to allow them to go the distance in the next two games unless very few pitches are thrown.

Jones doesn't want the pitchers tired because SIU-C will take on Missouri Valley Conference foe Creighton this weekend. Six Saluki pitchers have thrown complete games since the Florida trip.

"A pitcher that throws about 40 pitches usually can't throw again for three or four days. His arm can't take it," Jones said. "We have to have all of our pitchers ready this weekend."

The coach added that he would like his team to work on charging ground balls on the infield dirt in preparation for the game at Creighton. The Bluejays have a dirt infield and Jones wants his team ready defensively.

"The ground's still kind of soft and when it's soft, it gets uneven," Jones said. "Saluki look like they're coming straight at you, they hit something and they deviate." Jones also said the Salukis need to hit consistently in order to continue the winning streak.

"We're hoping to bunt our hits," Jones said. "It doesn't matter if you get nine hits one each inning, you're probably not going to win very often."

The umpire calls Wisconsin's Carey Sadowski out even though Saluki first baseman Jim Limperis fails to touch base with his foot. Wisconsin challenged the call unsuccessfully. The SIU baseballers play Mizzou in a doubleheader today.

Tainted past spawns new athletics philosophy
By Darren Richardson

History-In 1985, amid recruiting scandals rocking the country, students finishing their athletics degrees without earning a degree and the brunt of drug abuse that some say was a serious problem among some players, a sobering realization formed.

Gridders not fooling about No. 1
By Steve Merritt

Mitchell and lineman Pete Jansens — did not letter last year because of injuries, but will return and can be expected to contribute in both spring and the fall. The Salukins won the Gateway Conference rushing crown two straight years and things look good for a third.

"There are no two better backers in our conference than Byron Mitchell and Anthony Vaughna," Dorr said. "If healthy, they'll be our biggest strength."

Mitchell racked up All-America honors and 1,211 yards in 1986 before sitting out last season with a knee injury. Vaughn rushed for 609 yards in nine games as a freshman.

The numbers were good enough to earn Vaughn the Gateway rushing title. If any slight changes are expected, spring practice will put forth an increased effort on the option play, from both the defense and offense. Work on all phases of the passing game can be expected as well, Dorr said.

With Saluki departures, the offense will hurt the most. Gone is four-year starting tackle Ralph Van Dyke, along with starters Bruce Phibbs (TE), Sebron Sapeake (SE),
