SHURTLIFF LOSES TO NORMAL IN FAST GAME, 37-22

Preliminary Game Sees University High Win Over Carrier Mills

The Normal and University High Teams Took a Double Bill From Shurtleff College and Carrier Mills High School Respectively Last Friday—Both Teams Won by Easy Margins and at no Time During Either Game Did Things Look Blue For the Normal Teams.

The Shurtleff bunch showed up well on the passing game, handling the ball pretty well from start to finish. They fell down, however, on the shooting side of the game, in which the home team clearly had them outclassed. The Normal team, starting with a rush, got three baskets at the very outset, and began to amass a steadily increasing score. At no time in the game did the Central Illinois boys hold the top side of the score.

Brooks, Chance and Valentine all made a splendid showing in basket shooting. Chance seemed to have emerged from the semi-slump he showed in the Sparks and Charleston games, and displayed his old, unerring eye for the basket, ringing up seven baskets. Valentine kept up the good work he has been doing in recent games by dropping in six more during the game. Capt. Brooks also showed an increasing tendency to hit the ring, falling only a little behind the others with five baskets. Allan and Carter did much effective work in breaking up Shurtleff's strong shooting combination, and preventing short shots at the basket. Huffman went in for Chance in the last period.

As usual the Normal made her best showing in the first half, a fact that has been evident in the last four games we have played. Even in the games away from home at Sparks and Charleston, the boys seemed to find the basket better in the first than in the second half. Although in this game the home boys made more points by one foul goal in the first half, they did not seem to be able to hold the visitors as well as in the first half, allowing them eight field goals as compared to three field goals in the first part of the game.

One rather interesting feature of the game was that out of about eight fouls made by both sides together, only one was made by the man shooting from the foul line, which happened in this case to be

"Slats," shooting for the Normal. In virtue of the fact that games are often won or lost by a foul goal made or missed, this low percentage looks poor for both teams.

The next game at home will be Sparks Business College, which plays at Carbondale on the 24th. In the interim, the Normal team has two games away from home, at McKendree and at Cape Girardeau. The game with Sparks is expected to be one of the best remaining games.

High School Team Rides Rough-Shod Over Visitors

In the preliminary game between the University High team and Carrier Mills High School, perhaps the most noticeable thing about the game was the excellent showing made by "Dunk" Renfro and Johnson, substitutes whose insertion in the game was made necessary by the illness of Hickey and L. McCormick and the injury of Bryant. Renfro proved himself an excellent shot by dropping in several from the center of the floor. Johnson, quick as a cat, displayed his ability to good purpose when he went in in the second half to replace M. McCormick.

Carrier Mills played a guarding game all the way through, but was unable to prevent the home boys' offensive from getting in behind them, or of shooting unerringly over their heads, at which they appeared, it might be said, equally as good. F. Renfro and Birkner at guards did good work in breaking up shooting plays and preventing short shots. Bailey at center did his usual good work in dropping them in, long or short. Max McCormick also played an excellent game.

From the first few minutes there was little doubt as to who would annex the game. After the fashion of the Normal team, the High School boys rushed the visitors off their feet in the first half, but made an improvement on their Seniors in school in that they were able to keep it up the whole game. The game ended, 33-13.

What Was It?

A very mysterious sight met my eyes last Thursday evening as I entered the gymnasium. A large green curtain attracted by attention and I walked over to it. A queer sign directed my steps behind the screen and here many wonders of the world were unfolded to me.

Mingling with the crowds I was swept through quite an amazing number of booths, all of which were very entertaining and novel to me.

Suddenly a sign, "Palms read" caught my eye, and being desirous of ascertaining my future, I placed myself on the long waiting list. Having my palm read, I came out a much wiser person as all who tried the same will agree.

However, I was in for all the fun there was so I went in to get a "shampoo" and a "shoe shine". This was the best yet and certainly the person who invented such a diversion needs great praise.

Games such as "Wing", "Drop the Handkerchief", and "Three Deep" were played for awhile to the evident enjoyment of all who took part.

Each of us drew a slip of paper and then retired to the corner of the room where others of our kind were assembled. Then the four kinds of cars proceeded to run three races, two of which were won by the Fords. Clever prizes were given the winners.

Following this was a grand march, the ladies choosing their partners. Regretments of apples, popcorn and peanuts were served to all present.

After a great deal of eating and playing and the proposal of new names for membership into the society, we all went to our homes thinking more strongly than ever that the "Socratic Society" was the best society ever known.

GRAMMATICAL LOVE

Maybe none of you have ever heard of grammatical love. Anyway, here's the way it goes.

You see a beautiful girl walking down the street. If she is singular, you become nominative; you walk across the street changing to the verbal subject, and then become dative. If she is not objective in this case, you become plural. You walk home together. Her mother is accumulative; her father becomes imperative. You go and sit down and find her little brother is an indefinite article. You talk of the future. She changes the subject to present time. You kiss her and she favors the masculine. Her father is present and things are tense, and you are past participle after the active case is over.

Student Dance Coming

On Saturday of this week, the Dance Committee plans to put on what will probably prove to be the feature social event of the winter term. This committee, composed of Nyle Huffman, Carl Mason, and Clyde Brooks, and headed by Miss Jones of the faculty, has done excellent work in managing the three student dances which have been given. The management is well pleased with the smoothness with which everything has gone off, and with the attitude of the student body, as well.

For this dance, the committee has secured the Vincent's Orchestra of Cairo, a syncopating aggregation well known in Southern Illinois for their ability to please in their special line. The committee urges that the commendable attitude shown thus far in the conducting of these school dances be continued, and the student body give them a liberal support. Their advertisement appears elsewhere in this issue.

VOICE OF THE STUDENTS

Dear Students:

Fellow-students, you heard the gentleman's speech this morning about helping us when we needed money from this state. You remember he said he would help us. Now, students, how about a new gymnasium? We tried to build last year. No more dreams for us. Nothing will satisfy but the REAL thing. So inform this gentleman as to what we want and do not stop till we get it. For we all know that we need it.

TO THE FACULTY

Dear Editor:

I have been in classes under several different instructors who always make the following remark if a student fails to recite: "I fear that there is too much outside work going on." I have a few words to say regarding this. By a count of the enrollment of the different organizations there are about three hundred and fifty students who belong to organizations. That is less than one half of the student body. One reason that there are no more who belong is that they think they would surely fail in these classes if they joined. If more of the students join these organizations, the entire work would not fall on a few and thus it would be more nearly evened up.

A MONUMENTAL DISCOVERY

Not often is it given to a mere mortal to receive advance information about a world-revolutionizing discovery, as was disclosed to the Zetets at their Friday 20th meeting. The chairman stepped to the front and in mysterious language hinted at some great disclosures about to be made to them. He beckoned to a man standing near the door, the man stepped on to the stage and was introduced as Signor Delos Alphonse Frascati, as one of the co-discoverers of perpetual motion. His co-worker, Marcus Pishel Annaes Lacundios, a Spaniard, in the meantime took a seat on the stage. Signor Frascati modestly stepped to the front and, blushing like a school-girl of fifteen, began his story. He himself was born in Naples, Italy; Signor Lacundios was born in Madrid. At the age of twenty-three they were thrown together in the city of Allahabad, India, where they attended the university, studying physics. They met accidentally while looking for a room, and in the course of their conversation they discovered that both of them were of the class '89, S. I. N. U. When the audience heard this, their pleasure knew no bounds. The pandemonium that broke loose can only be compared to the enthusiasm displayed at one of our quadrennial presidential nomination conventions when a favorite son is nominated. The president could not quell the noise, but Signor Frascati quietly moved his hand back and forth a few times and the noise was stilled.

The upshot of the matter was, that they became room-mates and worked harmoniously together.

Like all great inventors these two men had their persecutors. As physicists, they made known to the world some of nature's secrets heretofore unknown to the common people. This stamped them as sorcerers. They were cast into prison and their hands chained together. They were told that if they could free themselves from their shackles they should have their liberty. They did so, and were liberated.

Here Signor Frascati introduced Signor Lacundios as the man who would show how they shook off their shackles. Cords were produced, their hands securely tied, but in a jiffy the cords lay on the floor. The applause was immense.

Signor Lacundios now motioned to an Indian servant standing near the door to come with their newly-invented apparatus. It was in a box somewhat like a tin box in which people keep their valuable papers. The little machine was set on the table and set in motion. The Signor said that this machine was operated neither by physical, chemical, or electrical appliances, some mysterious force in the atmosphere caused it to move. The audience was astounded at this. Heretofore, all perpetual enthusiasts were either frauds, as Keeley, of Keeley motor fame, or they were crazy. Here were men who had actually achieved

the "Impossible".

We cannot stop to explain the mechanism. Space is too valuable. Neither can we tell how the machine was operated, for that is a secret between these two men. As soon as they have it securely patented in all the civilized countries of the world, the secret will be made known to the world, and be the property of all the world, to bless all the world. They are not going to permit anyone to exploit their great discovery. A truly great discovery! Truly unselfish benefactors of mankind!

Sometime in the future these two savants will come back again to us. In the meantime they are going to rest up awhile from their labors. They left here for the jungles of Hardin County, for children of nature, as these are, do not tamely submit to the trammels of civilization.

Verily, it pays to be a Zetet.

THE CHAPEL

The work of the chapel carried on by the Y. M. and Y. W. C. A. is progressing very nicely. Mr. Hall began in September to perform his duties as Sabbath School Superintendent. The work has certainly flourished since Mr. Hall began. Each Sabbath morning are to be found in the various classes about forty-five children who show a desire to learn of the better life. Miss Templeton, who has been in charge for so long a period, and who has rendered such a valuable service to that community is always glad to see the young men and young women of the S. I. N. U. go out and lead the services.

The evening services are conducted by the two associations also. A young man from the school goes with a well-organized talk on some subjects that are practical and vital. The young men that have helped out in this work since September are Wilson Halter, Chas. Sattgast, Howard Walker, Chas. Gabbert, Guy Davies, Edgar Booker, Ralph Turner, Dilla Hall. This is an opportunity for any young man to develop his power of leadership outside of rendering an untold service to the people of that community.

It is hoped that many more of the young men here will avail themselves of this opportunity.

The chapel is located in the north-east part of town, and its doors will open to any young man or young woman who will volunteer his or her services.

WANTED

By the Illinae—Enough Agora and Forum members to escort us home on Monday night. Single men preferred. Applicants see the Committee on Escorts.

FOR GUYS ONLY

WHAT YOU'RE WORTH

Sir, I hear some fellows talk about themselves and making it appear how much they are worth. According to scientific investigation the ingredients of such fellows are:

Fat enough for 7 bars of soap.
Iron enough for a medium-sized nail.
Sugar to fill a shaker.
Lime to whitewash a chicken coop.
Phosphorous enough to make 2,200 match tips.
Magnesium enough for a dose of

magnesia.

Potassium enough to explode a top cannon.

Sulphur enough to rid a dog of fleas.
What's the answer

"Father," said little Frank, as he turned the pages of his history, "How did the cliff-dwellers cook their food?"

"Why, I guess they used mountain ranges," replied his father.

"How kind of you," said Miss E, "to bring me those lovely flowers. They are so beautiful and fresh. I think there is some dew on them yet."

"Yes," said Mr. H. in his grave voice. "There is, but I am going to pay it tomorrow."

TRAVELING SECRETARY SPEAKS TO Y. M. C. A.

Joseph Hauter, traveling secretary of the Y. M. C. A., spoke to a joint session of the Y. W. and the Y. M. C. A. Tuesday, 6:30 P. M., January 30, 1922. His subject was "Leadership."

He spoke of the appalling conditions of China and other foreign countries, emphasizing the urgent need of these countries for strong Christian leadership. Hence, the obligation of America to those countries in furnishing trained "World Christian Leaders."

Come out and join us boys, the educational value alone of such lectures will pay you well for the time spent.

TWO BRIGHT STUDENTS

"Lo, Bill."

"La, John."

"This is sure a rotten college, ain't it?"

"Yey, no pep."

"None of the guys here know anything about real college pep."

"Nope, the poor boobs."

"D'juh hear the rotten cheering at the game?"

"Pope, I didn't go."

"Neither did I."

"What's the use, there ain't no pep."

"Nope, no pep."

"Well, so long, Bill."

"S'long, John."

PERSONALS

We are in receipt of a letter from Rowena Galbraith, '21. Miss Galbraith is principal of the Highland High School. She says, in part:

"It might be of interest to you to know that I am going to give "Peg O' My Heart" some time in March. I am also directing a literary society, and am faculty advisor on the annual staff, so you see I am very busy with outside things in addition to regular class-room work."

It will be remembered that Miss Galbraith was a prominent Socrat last year.

Hershel E. Whitaker, '18, was here last Wednesday. Mr. Whitaker is superintendent of schools at Fairfield. He will be remembered as business manager of the Obelisk '18, and football letter man of '15, '17, and '18.

Lawrence Watson, '21, attended the Superintendents' meeting at Carbondale. Mr. Watson is superintendent at Sparta.

Gilbert Elliott, of Dongola High School, spent the week end in Carbondale visiting friends.

The following former students were here last week: Clare Carr, '17, Paul Foster, '21, Arthur Browne, '18, Richard Browne, '19, John Goodall, Milo Loomis, '21. They are all attending the University of Illinois.

Miss Cox: "Why did the skipper tie the girl to the mast?"

James Mackelrath: "So she would stay there."

Miss Cox to Earl McGuire: "Mr. Muckelroy, spell inveigle."

Chas. Aimo (watching the ribbon of thin sliced specimen as it came from the microtome and much impressed with its length): "Migosh! Smith's liver will make a ribbon long enough to reach to New York!"

to Miss Trovillion. The speeches will be prepared by the student himself and must be at least ten minutes long. On March 2, a faculty committee will hear the tryouts and select the speakers.

This will be a splendid experience and is well worth all the time spent upon the work. Be a booster for S. I. N. U.

The new course, Organic Chemistry, for Senior College students, was started with five members at the beginning of the winter term. Organic Chemistry is now required of all students entering the better medical schools. Three of the present class expect to enter medical school next year.

The class hopes that it can have a new laboratory, soon.

The Student Council has resolved to send out students to the neighboring high schools with a view of encouraging students to attend this Normal school. These representatives will be sent to their assigned schools during the spring vacation. All necessary expenses of the speakers will be paid by S. I. N. U.

Every student who wishes to enlist his services, is asked to hand his name

HONOR SYSTEM A SUCCESS IN S. I. N. U.

Should a visitor walk the corridors of the S. I. N. U. his eye would be attracted by a large basket of very fine apples with a small cardboard box near. The students simply walk by, take an apple and leave 5 cents. No one is set to watch. Students are on their honor. We thank you, students.

Mr. Muckleroy to Ag. Class (after going out into the lower corridor to stop a disturbance, and finding two members of the faculty in a discussion): "And I'm responsible for this lower corridor."

NORMAL HERE LEADING ONE; OFFICIALS SAY

"Aside from having the largest attendance of any Normal in the state the Carbondale Normal is the most important," declared A. M. Shelton, chairman of the Illinois Educational Commission to a representative of the Free Press during his attendance at the conference of the city and county superintendents here today.

"The teachers you graduate from this normal," Mr. Shelton said, "go all over the state and to other states and therefore it should be that the Carbondale Normal be given more attention and more assistance. The influence of the Normal here is felt as much as any Normal or teachers' college in the middle west.

Other members of the commission here today were Representative Harry Wilson of Pinckneyville from his district and Dean C. M. Thompson.

The commission is traveling over the state meeting economic and civic groups getting ideas and suggestions on educational needs of the state. These will be made as recommendations to the state legislature.—Free Press.

THE NATIONAL WEEK OF SONG

The week of February, beginning on Sunday 19th, which includes Washington's birthday, will be one of the happiest of your life if you carry out the plans suggested for the annual observance of the National Week of Song.

Is it worth while to interest yourself in the movement? Most decidedly, yes. Why? Because America is to become a singing nation, and there is no time like the present, when the hearts of all people are full of joy to hasten the day when "all America will be singing." In other words, the time is ripe for making The National Week of Song an important institution of our national life, and this your opportunity to do your best. If you do it promptly and do it well, you will have the satisfaction and pride that every one has who does a great good for his community and for his country.

What are the purposes of the National Week of Song? Here they

follow briefly:

- First: To awaken the singing spirit and set all America singing.
- Second: To cultivate a taste for songs of the better sort.
- Third: To bring people together in their various communities and develop community spirit.

Fourth: To develop and strengthen the great American spirit and uphold this high ideals by the singing of such songs and uplift and inspire.

Fifth: To amalgamate and give special expression once a year to all the various efforts put forward to establish community singing by the various organizations throughout the country.

These are some of the things that the National Week of Song is accomplishing.

Also remember that the National Week of Song is that week in February in each year in which Washington's birthday occurs, that the week begins on Sunday, and that your help is needed to help make a success of the event.

Will you not begin at once to do what you can to insure a fitting observance of it in your community.

A CARTOON REVIEW

To be able to make a cartoon that will show originality, correctness of detail and forcefulness of idea is the desire of the beginner in cartooning.

McCutcheon, Briggs and Bud Fisher and a score of other leading cartoonists of the present day, have proven this, by their success as artists. McCutcheon and others are not paid for the drawing themselves, that they make daily, but for the thoughts and ideas that go into them. A person may be very good in drawing a cartoon, but to add an idea that will give the public something really good to look at is the requirement of a good cartoonist. Clare Briggs with his comic headings, "Oh, Skinny" and "When a Feller Needs a Friend," has given the people an idea of the present-day American boy's life. Nevertheless, his cartoons are in demand, and they help to carry away the gloom that we become affected with at different times in our lives.

Bud Fisher with his incomparable two, Mutt and Jeff, have lived with us for years; in fact, the old phrase, "Mutt, for the love of Mike, use discretion," has caused us to roar with laughter after seeing Jeff chasing Mutt wildly down a hill, with Jeff's thoughts running very high and Mutt's still higher and especially of

a more savage nature. In the writer's opinion, McCutcheon is the leading cartoonist of the present day, while Wanamaker, with his cartoons of the world war, ranks second.

A cartoon, if properly made, with the requirements as stated above, on the present day happenings, especially the peace conference, will convey as much thought as a hundred editorials or one hundred orations. In fact, a cartoon, showing the life and death struggle on board the huge Titanic, when it was sunk a few years ago, conveys more than a book of the disaster.

McCutcheon lives up to these requirements and will live with future cartoonists and historians.

PROGRAMS

Zetetic Society, Feb. 10, 1922, 6:30 o'clock

A REPORTER INTERVIEWS GEORGE WASHINGTON SMITH

When I entered the room Mr. Smith was busy explaining a map to a young student. As I approached the desk, he turned to look at me with a pleasant smile and a "What-can-I-do-for-you" expression.

"I have come to interview you," said I, "will you answer some questions?"

"Certainly," he replied, and I began.

Question: "In what year did you begin teaching school?"

He ran his fingers through his hair, produced a pencil, and did some rapid figuring.

Answer: "Let me see—oh—about 1874, I believe."

Question: "How did you feel the first day?"

Mr. Smith chuckled and replied: "Oh, there were three big girls in the class, and one was very pretty, so I was rather embarrassed."

Question: "Were you bothered with stage fright?"

Answer: "Well, no. You see I had an advantage. The man that taught before me had been run out by the pupils, and the parents assured me when I went into it, that they would stand with me."

Question: "What would you do if you had \$1,000,000?"

Answer: "I'd give part to charity. I mean by that, to people who really need it, certain forms of Education."

Question: "What forms?"

Answer: "Well, to church colleges that are struggling to exist. Of course \$1,000,000 wouldn't go very far, and I'd want to travel some."

By this time the professor was drumming quite vigorously on the desk.

My next question proved rather startling, and he rolled his pencil between his palms.

Question: "What do you think of the Flapper?"

Answer: "Abominable!"

Question: "What do you think about girls bobbing their hair?"

Answer: "I'll just tell you! It's all right for a child, a little girl, but a girl approaching young womanhood loses her dignity when she does it."

Mr. Smith refused to answer when I asked him how he had lived up to his name.

This space will be reserved for a faculty interview every week. Watch for it:

The student body seems back of us now. So just watch our paper grow from time to time. Watch for our new departmental headings. They're coming. Also we have some real live wires on our reportorial staff, who will interview faculty members and students. 'Nuff' said.

Miss Normal Keene, the popular vocalist and violinist heads this department. News, if any, which she and her sleuths fail to get, should be turned in to her department.

THE COMMON VIRTUES

Dear Editor:

If we listen to the pessimist he will tell us that in this age of wireless, aeroplanes, and automobiles, the rugged virtues of our ancestors have been submerged. According to him, Honesty and Truth are attributes of Lincoln and Washington, but have no place in the twentieth century. By force of repetition he may cause some of us to believe him. When we are almost ready to take the view of the pessimist, an example of honesty may give us courage to believe in the better things of life for a few more days.

Some time ago the writer took a pair of shoes to an advertiser in the "Egyptian" to have them repaired. After hearing of the repairs needed he estimated the cost at about \$2.50. Upon returning several days later for the shoes we were told that it would not be profitable to spend that much money on repairing the shoes. Small? All in the day's work? Possibly. But Lincoln's honesty was of just that kind. It is not being honest in big affairs alone that counts, but in small everyday dealings as well. There are still many honest people in the world.

HERMAN SPARR'S AN- CESTRY REVEALED

Mr. Sparr, (In geology): "Didn't the Indians collect the tuberous graptolites and use them for beads?"

Mr. Colyer: "Yes-yes, I think they did."

Mr. Sparr: "I know I used to collect them."

Grace Frederick (in geology): "Did you say that diamonds are of vegetable origin?"

Mr. Colyer: "Yes".

Grace F: "I have never thought of diamonds in that way before."

Herman Sjarri— cihl.xcautcDIAL
Herman Sparr: "Miss Stewart, did you get a slide of my brain?"

Jessie S. (after a test in H. S. Ed): "No, but it is too late now."

GIGGLES

A giggle is the superlative degree of a grin. It is caused by nothing and may last indefinitely. It is common among girls of a certain age. No cure is known.—Ex.

What is the difference between a mirror and a woman?

A mirror reflects without talking, while a woman talks without reflecting.—Ex.

"I have an account of all my quarrels."

"Sort of a scrap book, as it were?"—Ex.

HEARD IN THE CLASSROOM

A new building was in the course of construction on the campus. The professor showed them the structural iron, explained its uses, and gave the names of a few of these iron beams. One was the I-beam.

After they got into the room it occurred to him it might be well to ask the students whether they knew what an I-beam was. Several hands were raised to show a knowledge of structural iron. The professor asked one of them, and the boy said, "It is the beam that the Bible speaks of in your own eye."

Mr. Felts, in College Algebra class, when three members were reported ill: "I feel as bad as anybody, but I'll stay with you and never let anybody know how bad I do feel."

Herman Greer. "We are glad to have you with us, Professor."

BANQUET WAS GREAT SUCCESS

Did you attend the banquet given at the Baptist Annex last Thursday, Jan.

25 If not, you missed a rare treat. This banquet given by the Baraca and Amcma classes was their second annual affair. Mus'c was furnished by Mr. Harold Pritchard and Co., and the "Euterpe" and male quartettes.

Senator W. A. Spence, from Metropolis, gave an excellent address on "Religious Education." This was followed by a number of short stories (both true and otherwise) given by Profs. Feltz, Warren, Lentz, and Bryant. A complete surprise was given by Prof. Lentz when he used his moving picture machine in giving a comedy on Rip Van Winkle. We are always glad to have surprises of this nature. A general good time was reported by all.

A FRATERNITY

We see in "The Student" from the Central Missouri State Teachers' College that they have a chapter of the Sigma Tau Gamma. This is a national social fraternity among teachers' colleges and schools of education.

They recently installed a chapter in the school at Emporia, Mo.

JOEL LAY AND MISS

BRADLEY GIVE CONCERT

Joel Lay and Miss Ruth Bradley gave a concert here in Carbondale last week which was a great treat to Carbondaleites.

Miss Bradley, it will be remembered, is a former member of the S. I. N. U. faculty.

Joel Lay is the popular Chicago baritone singer, and a former student of the Carbondale U. High. His sister, Sue Ellen, is the present Y. W. C. A. president. Glad to welcome you both home, Joe and Miss Bradley.

CHEER UP! YOU!

"What is the shape of the world?" asked the teacher.

"Never was worse," replied a student.

To offset such pessimism and the gloomy predictions of many, I write the following cheering and uncopied lines.

They try to worry us about the evils that may come; they seek to fill our minds with doubt and leave our spirits glum; yet most of the predicted things that tempted men to fret, from peasants all the way to kings, have never happened yet.

The comets that were due to send this good old world to smash; the mankind's ambition rash; the cataclysms that would leave naught but the sign "To Let" upon this orb, with none to grieve—they haven't happened yet.

And when a decade hence, we view with reminiscent eyes the dangers which now seem so new and strong to terrorize, we'll look at them without dismay, we'll speedily forget the old-time bugaboo and say, "They haven't happened yet."

MAE MARSH

The Elf-Girl of the Screen, in a story of fascinating whimsicalities—

"THE LITTLE 'FRAID LADY"

"HURRICANE HUTCH" the daring death-defying, thrill a minute stunt serial. Matinee 2:30—5c and 10c.

Night 6:30, 8 and 9:30—10 and 22c

DEWEY DECIMAL CLASSIFICATION SYSTEM

Of the many ways to classify the books in a library the most practical and best in every respect is the Dewey Decimal system.

Mr. Dewey divided the field of knowledge into nine main classes and these are numbered by the digits, 1 to 9. Cyclopedias, periodicals and other classes are marked nought, and form a tenth class. The ten main classes are as follows:

- 000 General works.
- 100 Philosophy.
- 200 Religion.
- 300 Sociology.
- 400 Language.
- 500 Natural science.
- 600 Useful arts.
- 700 Fine arts.
- 800 Literature.
- 900 History.

Each of these ten main classes are subdivided into ten smaller classes. For example Natural science is subdivided in this way:

- 500 Natural science.
- 510 Mathematics.
- 520 Astronomy.
- 530 Physics.
- 540 Chemistry.
- 550 Geology.
- 560 Paleontology.
- 570 Biology.
- 580 Botany.
- 590 Zoology.

These smaller divisions are divided in still smaller divisions, the smaller divisions all being parts of the larger:

- 510 Mathematics.
- 511 Arithmetic.
- 512 Algebra.
- 513 Geometry.
- 514 Trigonometry.
- 515 Descriptive Geometry.
- 516 Analytic Geometry.
- 517 Calculus.
- 519 Probabilities.

These numbers may be divided further by use of the decimal point, thus: the number for a book on the history of Jackson county has seven figures, 977.3994. In libraries the custom is to use only five figures at the most, except in special cases.

There are two classes of books that do not have numbers, Fiction and Biography. Fiction has no label and is simply arranged alphabetically by the surname of the author. The classification number for Biography is 920 but we use the letter B and arrange alphabetically not by the author but by the subject of the biography. This brings together all books on George Washington.

Mr. Dewey through his system has placed together all the books on one subject but he goes no further. In some classes there may be two or three hundred books. Each book must

have one and only one definite place on the shelves. In order to make a definite place for each book we arrange the books on one subject alphabetically by the surname of the author. Thus a book by Abbott precedes one by Allen. But instead of writing the full name of the author on the label we use figures to represent all but the first letter of the author's name. Instead of writing Abbott we write A12, for Allen we write A42. These figures are obtained from a table arranged by Mr. Cutter.

The number for Allen's Geographical Reader on United States is 917 A42. This is termed the call number of the book.

Of course some difficulties are always present. There may be several books by one author on the same subject in the library. To distinguish among these books we add a small letter, the first letter of the title, to the author number, i. e.: M17h is the book number for McMurry's How to study.

The advantages of the Dewey Decimal system of classification combined with the Cutter author table are many but among them are the facts

that all books on one subject are together and that each book has a separate and distinct place on the shelves as shown by the call number.

MISS GLADYS POTTER WILLIAMS

We are very glad to hear of the recent success that Miss Gladys P. Williams, head of the Art Department here, has achieved in painting. Although she has been a painter of note for a number of years, and has exhibited various paintings for years, only recently has she become a professional member of one of the strongest Art Clubs in the country, that of the Art League of St. Louis. She has recently been placed on the directory of the mid-west painters, a list of the best painters of the United States. Two paintings, "Old Mackerel Fishing Wharf"—Provincetown, and "Pearl Lane"—Provincetown, are at present on exhibition in the Kansas City Art Museum. Just recently she sold Mr. Henson, a noted collector of Paintings, a painting for which she received a large price. We take these means of expressing our appreciation for the work that Miss Williams is doing in this school.

Students Dance

Planned to be the feature social event of the winter term. All students are invited to attend. Others will receive special invitation.

Music by: Vincent's Orchestra of Cairo.

Time: Feb. 11, 1922.

Place: Armory, City

NOTICE TO STUDENTS

The Egyptian staff is very sociable and is always glad to see visitors. But please remember that the office is our work shop and we do have work to do there. So do not make it a habitual loafing or lounging place. Mr. Lentz's class recited with only a double glass door between their room and our offices and I understand noise may go through. Keep this in mind.

A number of other schools' papers come to our desk. Many of these are from your home towns. You enjoy reading these of course. And after reading them just place the paper back in the desk. Don't take it with you. The exchange editor has the idea he is supposed to see these, "Don't you know." Also permit us to request that you refrain from cutting such articles as you may desire from these papers. Leave them intact. We have a number of girls on the staff and they always wonder, "what has been where the big hole now is."

JUST ONE WORD

That words have various origins is well-known to language students. Sometimes they are made out of whole cloth to serve a particular purpose; for instance, klaxon and kodak. The word quiz, which no doubt has grated upon the ears of many a student, had a peculiar origin. Mathews, in "Words; their use and

abuse": "It is said that many years ago, when one Daly was patentee of the Irish Theaters, he spent the evening of a Saturday in company with many of the wits and men of fashion of the day. Bombing was introduced, when the manager staked a large sum that he would have spoken, all through the principal streets of Dublin, by a certain hour next day, Sunday, a word having no meaning, and being derived from no known language. Wagers were laid, and stakes deposited. Daly repaired to the theater, and despatched all the servants and supernumeraries with the word "Quix", which they chalked on every door and every shop window in town. Shops being all shut next day everybody going to and coming from the different places of worship saw the word, and everybody repeated it, so that "Quiz" was heard through Dublin; the circumstance of so strange a word being on every door and window caused much surprise, and ever since, should a strange story be attempted to be passed current, it draws forth the expression "You are quizzing me." Some person who has a just aversion to practical jokes, wittily defined a "quizzer" as "One who believes me to be a fool, because I will not believe him to be a liar." Students need not be told that this is an awful word. Its import has haunted the dreams of many a "weak" student.

Valentines

Party Favors, Decorations, Invitation, Birthday and Greeting Cards. An endless variety.

Rathgeber Brothers

February Fourteenth is Valentine Day

Don't fail to see us for your Valentines. We have all kinds from the penny ones up to the better kinds. Just right for HER.
