Somit, Westberg pay tribute to shuttle crew

By Brett Yates
Staff Writer

The wind was cool, the sky overcast and the mood somber Friday afternoon as about 250 people gathered near the flagpole at Old Main Mall to pay tribute to the seven astronauts killed in the space shuttle Challenger.

Although many people at the ceremony said they were upset about the deaths of the astronauts, they also said they believed the shuttle program should continue.

Capt. Chuck VanRossum, assistant professor in the Air Force ROTC Aerospace Program, said that the accident should not deter the future of the space program.

"I believe the service to serve, to do something for the public, and when we get into things like this we all know what the risks are," VanRossum said. "These accidents happen, but we have to keep going.

"Anytime a life is lost it is a waste because that person could have contributed more," he said. "This is a small price to bring the country together again, and to reflect what we really are about. Everyone and everything brings about something good. There is some good going to come out of this eventually, maybe not right now, but maybe next year.

Lt. James Crenahan, head of the AFROTC program, said he would be willing to become an astronaut if it meant saving a chance.

"I would sign up right now," Crenahan said, "even after this happened, I have been flying for many years. I flew in Vietnam. These things happen, and I guess pilots accept that fact. There is always the possibility, of something happening.

Don Strausberger, a lieutenant colonel cadet in the AFROTC program, echoed opinions that the space program should continue.

"With the complexity of a system like that, things have gone wrong in the past," he said. "People have died doing it, and space is an important part of the future for the last 200 years, and they are heroes. We should push on with the program. That's the way they (the seven astronauts) would have wanted it.

In her remarks to the crowd at the service, Carbondale Mayor Helen Westberg said that though the deaths of the astronauts were a tragedy, "people were not wasteful.

"People will always be sad," she said. "These courageous men and women付出了 our country a lot more than they ever expected.

Although our hearts are heavy right now, our spirits are not down. We want to find something within ourselves to follow those who have led the way in their own personal sacrifice to forge ahead, and break down the barriers of the unknown.

President Albert Somit expressed his condolences on behalf of the University. "We do not know how long since many of our alumni faculty and staff either have been or are now associated with the space program." he said.

The Rev. Al Turl, of Carbondale Ministries, told the crowd how much the accident affected him. "I cried a lot last Tuesday," Turl said. "When I was a senior in high school, I watched John Glenn and the other Mercury astronauts ride their own controlled explosions into space, and there were so many times when there were all-school assemblies.

"Sometimes we would say, 'What would happen if what we

CAPE CANAVERAL, Fla. (UPI) - Challenger's right side booster rocket apparently failed at or near a seam where two rubber-like solid fuel segments are joined, NASA's acting administrator said Sunday.

Tracking photos showed an increasingly intense flame spewing from the lower portion of the rocket during the final 15 seconds leading up to the explosion that destroyed the shuttle and killed its crew of seven last Tuesday.

"We haven't yet finished the analysis and measurement on the film to identify the exact point at which the plume appeared," said William Graham on CBS's "Face the Nation.

"It didn't necessarily happen along a seam, it did appear to happen at least near a seam," NASA's board of investigation met at the Marshall Space Flight Center in Huntsville, Ala., Sunday to review records and data on the Old Main Mall in honor of the seven astronauts killed in the shuttle explosion. The wreath laying took place during a memorial service Friday afternoon.

Army cadets Michael Gillison (left) and Robert Fagan and Air Force cadet Dee Tracey, all of whom are in ROTC programs, laid one of the seven wreaths at the base of the flagpole in the Old Main Mall in honor of the seven astronauts killed in the shuttle explosion. The wreath laying took place during a memorial service Friday afternoon.

Gas tax public hearing set

By Jim McBride
Staff Writer

A public hearing on the city's proposed 3-cent-per-gallon motor fuel tax will be held at a meeting of the City Council Monday at 7 p.m.

The city is expected to lose its federal revenue sharing funds if the tax is not enacted.

The council is examining the proposed tax as a means to obtain revenues to help replace an expected loss of $600,000 in federal revenue sharing funds to the city. The city is expected to lose its federal revenue sharing funds after Oct. 1.

If passed, the tax would become effective May 1 and is expected to bring in an estimated $250,000 in annual revenues to the city.

The council is also expected to discuss a suggested re-institution of a corporate tax levy as part of the city property tax and a possible increase in the city sales tax as alternatives to the proposed fuel tax.

The council is also expected to discuss the possibility of the city tax to be put on the ballot for the city's annual audit.

Gus says as soon as OPEC starts pulling his hand out of your pocket the city wants to put its hand in.
Botha's newspaper ads appeal for black support

JOHANNESBURG, South Africa (UPI) - President Pieter Botha abandoned his take-it-or-leave-it political style for a media campaign Sunday to woo support for "institutionalized power sharing" between South Africa's ruling whites and black majority. Botha's newspaper appeal came after 17 months of racial unrest that has claimed more than 1,200 lives.

Federal meat inspection 'cover-up' charged

WASHINGTON (UPI) - Agriculture Department investigators covered up evidence that senior officials toed down reports of contaminated meat and poultry, including processed beef covered with feces, hair and flies, a former meat inspection reviewer has charged. An official with the department's inspector general's office provided the allegations, outlined in an appeal to be filed Monday with the U.S. Office of Special Counsel, which investigates complaints of federal personnel abuses.

Records of Marcos' guerrilla unit may be gone

WASHINGTON (UPI) - A retired Army general remembers Philippine President Ferdinand Marcos as an authentic World War II guerrilla fighter and suggests the chaos that accompanied liberation may have wiped out records of the undercover unit Marcos claimed to have led. Military records, made available last month by the National Archives, showed Marcos in 1947 and 1948, the Army rejected Mart Jnr. application to have commanded a guerrilla band named Ang mga Maparira, "The Noble Ones," during Japan's wartime occupation of the Philippines.

Air Force pays $300 for $90 toilet pans

WASHINGTON (UPI) - The Air Force paid $37 each for toilet pans for a military transport aircraft but a plastics maker for the service told congressional investigators he has made the items for less than $90 each.

The price paid by the Air Force for the spare-toilet pans - a fiberglass part that looks like an oversized comb - was first revealed last week in a report by the General Accounting Office. Last year, the Air Force was stung by criticism that it paid $500 for toilet seats.

Officials to testify at hearing on jet crash

WASHINGTON (UPI) - A House panel that has been investigating the Dec. 12 crash of a chartered jet that killed 248 U.S. military personnel has called government officials to appear before a hearing this week on the disaster. Rep. Bill Nichols, D-Ala., said his investigations subcommittee of the House Armed Services Committee has completed a preliminary investigation into the policies and procedures governing the use of chartered for military personnel.

Rocket flames probably set off shuttle blast

WASHINGTON (UPI) - Sen. John Glenn, D-Ohio, said Sunday flames spewing from one of Challenger's rockets probably triggered the explosion that destroyed the space shuttle and killed its seven-member crew. "They look rather conclusive to me," Glenn said of NASA film released late Saturday night that showed a fiery plume shooting up from one of the solid-fuel boosters.

Report U.S. satellites spy Soviet 'stealth' jet

WASHINGTON (UPI) - U.S. satellites have spotted the Soviet Union what some analysts believe is a prototype of a "stealth" fighter plane that could elude radar, according to a high-technology newsletter. The foreign magazine article, "Sharply-resolution U.S. electronic reconnaissance satellites have discovered in the Soviet Union an aircraft on the ground that some intelligence analysts believe is a prototype of a "stealth" fighter," said a report in International TechTrends, a new weekly newsletter launched Monday.

Blacks losing land at rapid rate, officials say

ORANGEBURG, S.C. (UPI) - Black farmers are losing 10,000 acres of land daily and by the turn of the century may see virtually extinct, agriculture educators say. R.L. Hurst, South Carolina State College Extension Service administrator, said blacks have lost more than 75 percent of their land since 1950 - a trend that has to be halted if blacks hope to remain in farming. In 1910, minorities owned more than 15 million acres of farmland in the South, but that figure has dropped to less than six million acres, Lauder said.

Donnewald pledges aid to Southern Illinois

By William Walker
Staff Writer

Saying that his record of investing state revenues in Southern Illinois communities has helped stimulate the area’s economy, State Treasurer James Donnewald says that if re-elected he will continue to bring money to the area.

Nearly $116 million in state dollars provided by community banks in Southern Illinois, Donnewald said during a campaign stop in the area Friday. And statewide, he said, his investment policies have yielded some $700 million in interest revenue.

“When I was first elected state treasurer in 1962 I pledged to revitalize the state economy by investing Illinois money in Illinois,” Donnewald said. “Our investment programs have already earned more than $500 million in interest on state deposits.

“Donnewald is especially pleased with the success of the linked deposit and Agricultural Loan Deposit programs, which involve depositing state funds in banks that are willing to make low interest loans to business and agriculture, respectively. In one program alone, $777 million was made available to nearly 10,000 farmers who needed help meeting production costs in 1985, Donnewald said.

He said the program, which was the first of its kind in the country, has been praised by Democrats and Republicans, including Governor Thompson, and it has been copied by every other agricultural state in the country.

In an interview following his press conference, Donnewald predicted that he will easily carry Southern Illinois and defeat his three opponents in the March primary. With four candidates contesting Donnewald, Patrick Quinn, commissioner of the Cook County Board of Tax Appeals; Jerry Costerino, former state treasurer; and Robert Hart, the treasurer’s race is the most contested of all the statewide Democratic primary races.

But Donnewald, who has the party endorsement, downplayed the reported party infighting that erupted at state making time when the women’s caucus wanted a woman slated for the treasurer’s position.

Instead, Aurelia Pacinski, daughter of powerful Chicago alderman, R. J. Pacinski, was slated to run for secretary of state, a race the women’s caucus and other observers consider a no-win situation against Republican incumbent Jim Edgar.

But Donnewald said Pacinski has an excellent chance of defeating Edgar, and he said that he has received the support of the women party members. The previous disagreement was exaggerated in the media, he said.

Asked to respond to charges made by challenger Quinn that Donnewald is too friendly with business interests too much time away from his duties, Donnewald said the accusations are false, but he insisted that he will let his record speak for itself and will not get involved in a mudslinging contest.

“I’ve never conducted a campaign to throw mud. I believe in the philosophy of telling the people what I have accomplished in public office and also telling the people that I’ve been endorsed by my party,” Donnewald said.

“I’m not going to get down in the gutter. I never did and I never will. It just simply isn’t my style.”

Shuttle crew doomed from start, officials say

CAPE CANAVERAL, Fla. (AP) — Shuttle crew practice techniques to survive a variety of emergencies during their pyrotechnic launches but Challenger’s crew apparently did not instant the spaceship’s solid rockets shut down five minutes after launch.

Of all the failure scenarios thought possible with the space shuttle program, the death of the ship’s two powerhouse solid rockets are among the most unforgiving and, in the view of many astronauts, the most lethal.

“Let me put it this way, the space shuttle has a flight director, Tom Novotny, said after Challenger’s July 29 engine shutdown five minutes and 45 seconds after lift-off, led an emergency “abort to orbit.”

Film released Saturday by the National Aeronautics and Space Administration shows a tongue of flame emerging from near the base of Challenger’s right-side solid rocket and washing over the rear of the ship’s giant external fuel tank.

The fire apparently came from a joint between two fuel segments, allowing 5,900-degree temperatures to spew out.

The official NASA review board has not drawn any conclusions about the accident, but experts believe the heat from the flame either burned through the tank to detonate its explosive fuel or heated its walls enough to raise internal pressures in a point that resulted in rupture, setting off a blastic explosion.

Sources said unreleased NASA films of the launch indicate the problem may have developed at the moment the rockets were fired at lift-off and worsened as the flight progressed.

In any case, Challenger’s seven-member crew never had a chance.

Astronaut Robert Overmyer, a veteran shuttle commander, said in an interview after Challenger’s abort to orbit it would be difficult if not impossible to get away from the boosters when they are firing in event of an emergency.

“If one has a big burn through and the auto (steering) system can’t keep you going straight you can try all sorts of things but there’s no way to shut off an SRB,” he said.

The solid rocket boosters

Groundhog Day, one of those weird American traditions, brought people out into a February chill Sunday to seek a furry animal’s advice on when the winter will be packed away.

Punxsutawney Phil said: Now it’s the time.

So do many other proprietors to the forecasting finesse of Pennsylvania’s groundhog, who was nudged from his snoring in a doom to do his duty — predict for a winter-wary world the time of day’s departure.

About 1,500 people were on hand at daybreak on Groundhog Lane, an hour before the ceremony.

“The Fourth of July,” said Diana Amick, 31, who traveled from her home in Staunton, Va. for the extravaganza.

For Ingrid Kaak, 22, of the Netherlands, who has been coming to the United States for less than two months, the event was a memorable slice of Americana.

“I came because I like traditions, even though this one is crazy,” said Kaak.

In Snellville, Ga., groundhogs were honored the consensus of the Yankee groundhogs that spring was around the corner.
A possible solution for transit problem

DISABLED CITY RESIDENTS have for some time been in need of a public transportation system designed for their special needs. A major drawback is lack of money to fund such a project. The Illinois Department of Transportation recently expressed interest, in conjunction with Rehabilitation Services, in providing the Carbondale area with such a service.

Several private agencies now have transportation services for the handicapped, but there is no comprehensive city-wide net-

work. Such a comprehensive network is necessary to provide the service hand-ecapped and have funded in the past due to a lack of public funds, and that such a project is not feasible without some form of subsidy.

Monty said some cities levy a special gasoline tax to fund such a project, and that once the subsidy is available, a city can get matching funds from state or federal agencies. Mr. Monty may have pointed out a solution to the funding problem for Carbondale.

The Council is currently considering levying a motor-fuels tax that is expected to bring in about $50,000 a year into the city's coffers. The tax is designed to replace part of the more than $600,000 per year the city will no longer receive in general revenue funding.

Why not use part of the money generated by a gasoline tax to fund transportation for the handicapped? It has worked for other communities and it will work for Carbondale.

Letters

Outstanding coverage

In the wake of the tragic crash of the space shuttle Challenger, I have overheard a number of SIU students complain that the coverage given the story by the three networks was too long and boring. I am in total disagreement with that opinion.

First of all, I was not aware of the calamity until 2 p.m. and did not have an impression on me. Watching a spacecraft collision was not something I enjoyed, but after seeing it twice I learned to accept it. The reason the networks played the tape over and over again was not for the enjoyment of the audience, but to inform those people like myself who happened to tune in later. NBC did an outstanding job reporting the tragedy.

Also, some students did not take this event seriously. They should think about what these astronauts were trying to do. Their loss in that collision was a great tragedy, not only for the aurora lost but for the people who wanted to venture out to look for the new forms of life.

Matt Gorecki, sophomore, radio-television.

Abortion film facts deceiving

My letter concerns the film "The Silent Scream." The film was shown Jan. 11 every 20 minutes in the Student Center. There are many falsehoods in this film and I feel one of those obligated to point them out, so that no one will be swayed by a deceiving, distorted pro-life sideshow.

This film is an insult to human intelligence.

The film shows a 12-week-old fetus in the process of an abortion through the use of ultrasonic devices. The fetus is magnified to the size of a developed baby, and portions of the film are slowed down for special effects. Dr. Bernard N. Nathanson does the voice-over, telling us what we see, because the mass is barely recognizable as a fetus (even less as a developed "baby") and the dark blight that represents a "mouth" definitely has to be pointed out.

This fetus does not feel as you and I, nor has the human traits that a developed baby does, able to live separate from its mother's life systems. The American College of Obstetricians and Gynecologists issued a statement saying that there is no proof to support the fact that in early pregnancy a 12-week-old fetus "hates pain." (Ms. magazine, July 1985)

The medical falsehoods of the film follow:

1. The cerebral cortex, the brain of a 12-week-old fetus is not sufficiently developed to feel pain. Conscious perception is developed by the fetus in the third trimester.

2. Fetal movement depicted in the film is not initiated by the fetus in a pattern of "frantic activity" in response from the abortionist's instruments, but rather is reflexive and random, like that of a primitive organism.

3. The result of such a fetus cannot be identified in the uterus of the fetus, and on this evidence the scream itself is medically unacceptable.

4. The instruments Nathanson describes in ghoulish detail as needed to "crush" the head of the fetus are not used for most first-trimester abortions of 12-week gestations.

5. Although electrical impulses are recorded, no fetuses at 12 weeks have brains, brainwaves, or the brain centers necessary for thought are a product of the third trimester.

6. The fetal model used by Nathanson as he narrates the film is much larger than a 12-week-old fetus to the viewer. Likewise, many of the other pictures of the fetuses shown in the film are stillborn, premature infants, and products of abortion.

This film is lying to the audience, seemingly grasping straws, trying to keep behind a movement that simply wants to violate the privacy and rights of a woman to her body. In an indirect way, I feel those pro-lifers are espousing the rights of the children by letting them suffer, perhaps, a life of unnecessary abuse, homelessness, working made fun of, or simply going without.

If abortion were outlawed, 1.5 million or more children would be born a year, unwanted children, each costing an average of $35,000 to raise to the age of 18. The highest group of women to have abortions are in the lowest income bracket. Second highest is the middle class and then the higher class. Obviously, the "rich woman" abortion image is a misconception.

If I got pregnant at the wrong time, wrong place, I'd probably have an abortion. Whatever you think is right is what you should do with your body is up to you, but please, if you're always so beautiful, we have freedom of choice. It's up to you. Let's not condone this un pity- Redmond, sophomore, Speech Communication.

Get title right

Please get your act together concerning the title bestowed upon those who have earned a Ph.D. They are called, "Dr." This is not to be confused with the degree M.D. These people have a medical degree and should be called "physicians," but are usually inappropriately filled as "doctors."

At any rate, you have insulted the Lin- degren family in your regard to get people's degree's death — Steve Reilly, graduate student, sociology

Editor's note — The Daily Egyptian at- tempts to follow the style of the Associated Press and United Press International on the use of Dr. Both stylebooks call for use of Dr. in first reference as a formal title before the name of a person who holds a doctor of medicine degree.

As for our use of the courtesy title Mr. in the obituary of Carl C. Lindegren (who had a doctorate in geology, as the article duly noted), it is the Daily Egyptian's practice—a style followed by many publications— to use a courtesy title as an expression of respect and to avoid an appearance of condescension through use of "Mr."

We apologize to the Lindegren family if, as the letter writer suggests, they were af-

fronted by our use of the courtesy title. We respect the letter writer's concern about proper titles, but we see nothing descript in the use of Mr. for a person who has gone on to where earthly titles mean nothing anyway—Bill Ha mon, faculty managing editor.
TRIBUTE, From Page 1

were watching would blow up? How could I be the only one of our spacecraft with someone in itiberated?"

"For more than 20 years I have been watching every night, and every night I've had to look up. Turti continued, "and all of the landings and splashdowns. I must admit, NASA's exclamation record I have logged over the years, but it finally happened." Seven wreaths for each of the astronauts were laid by Komit: Westberg: Mona McManus. one of the Illinois finalists for NASA's teacher

Church is 'reaching out' to AIDS victims

LOS ANGELES (UPI) -- Archbishop Roger Mahoney said Sunday in a sermon to end a weekend vigil for AIDS sufferers that the Catholic Church must make a commitment to reaching out to all, not just those suffering from AIDS. "We are all brothers and sisters, regardless of our belief or the struggles of our lives," he said.

"Even in the midst of this suffering and pain we must find a reason to look up," Mahoney said. "Our ministry must be to reach out to those in need.

The collection during the service was donated to the AIDS Project Los Angeles, a community organization helping to counsel and treat victims, family and friends.

The 12-foot diameter booster rocket with half-inch thick skin of the rocket was fired into the 11-foot exterior fuel tank to which the booster was attached. "The rocket it would be productive for me or NASA to speculate," he said. "We've gone to release the factual information as soon as we can, when we've had all the pieces together and cross checked it and understood it.

Sources said investigators are also considering the possibility that the rocket may have had a leak and its normally super heated liquid hydrogen, to the point where a pressure build up caused it to rupture.

Independent videotape analysis of the flight sequence showed a mass of what appears to be hydrogen at the base of the tank just before it blew up in an immense ball of fire 8,9 miles above the Atlantic, said Seebold. Michael Smith, Judith Resnik, Ellison Onizuka, Ronald McNair, Gregory Jarvis and

Project Buckle-Up classes set to go

Educational classes for Project Buckle-Up, a child safety seat rental program, will be held the first and third Tuesdays of each month at the Community Human Service Center. The class is required to rent a child safety seat from Project Buckle-Up. All Jackson County families with children from birth to six years of age or pregnant women within 30 days of their due dates are eligible for the program. Parents may rent an infant, toddler or booster safety seat.

To register for the program, call the center at 453-2554.

Marcos overcame early life
WASHINGTON (UPI) - Philippine President Ferdinand Marcos has been controversial to his countrymen since his university days when he was convicted of the murder of his father's political rival.

Marcos, 68, has been president for the past 20 years and is now engaged in what some call his toughest reelection campaign. He faces Corazon Aquino, wife of another political rival, in Friday elections.

But 47 years ago, it was doubtful Marcos would have life outside prison walls.

His father, Mariano Marcos, suffered a crushing defeat by Juliano Nalundasan in a 1935 election for a National Assembly seat for a Northern Luzon district.

Supporters of Nalundasan, in their celebration, placed a coffin in the rumble seat of a car, labeled it "Marcos" and paraded it around the town of Batac, stopping to honk horns and chant "Marcos is dead" in front of the Marcos home.

The next night, as Nalundasan brushed his teeth before an open window, a single 22-caliber bullet killed him, ripping through his buck and heart.

Marcos was 18 then and a student at the University of the Philippines in Manila, but home for the election. Four years later, Marcos, his father and two uncles were accused of conspiring to murder Nalundasan, with the younger Marcos, a national rifle champion, tagged as the gunman.

At a trial in the northern city of Laoag, the case was based on the circumstantial evidence of Calixto Aguilando, an acquaintance of Marcos's uncle, who said he was present when the murder was planned.

Grad quality draws grant
The College of Business Administration received $5,000 from the May Department Stores of St. Louis as a gesture of appreciation for SIU-C graduates whom they now employ.

Cal Eller, vice president of the department store chain, made a formal presentation of the gift during a reception Jan. 27 in the Student Center Old Main room.

The company gave SIU-C $2,000 last year.

Frederick H. Maidment, assistant dean of COBA, says the department store chain is one of SIU-C's best recruiters. It signed about 15 students last year for the May Co.'s managerial training program.

There are misconceptions about the fatal disease now known as AIDS. Acquired immune deficiency syndrome (AIDS) is not the only one of them. The belief that an AIDS virus exists, the director of Health Education at Howard Brown Memorial Clinic in Chicago says, is not accurate. Bill Mannion, who spoke at a workshop on AIDS for health professionals in the Student Center Thursday, said he is concerned that some people call a virus known as the HTLV-III virus the "AIDS virus."

"HTLV-III is a virus of which there is only one outcome," he said. Only 16 percent of the people exposed to the HTLV-III virus develop AIDS within two years, Mannion said. Others will develop AIDS-related conditions and about 85 percent will probably remain healthy but these figures aren't etched in stone," he said.

AIDS destroys part of the body's immune system, leaving its victims with no defenses against some types of infections. Mannion said that 80 percent of AIDS victims die within two years.

There are drugs to treat the diseases that AIDS victims develop, but there is no way to repair the immune system, he said. "At some point diseases overwhelm the body and they can't be treated fast enough."

Mannion also said that there are no drugs that kill HTLV-III.

A test offered at facilities around the country, including the Jackson County Health Department, can detect the HTLV-III virus but the results of this test do not guarantee that an individual will develop AIDS. Not everyone exposed to the HTLV-III virus will develop AIDS and the test is only valid at the time it's taken.

Mannion said that a problem that may be caused by taking the test is trauma involved with a positive result, since there is no treatment and no cure.

However, he said it's useful for some people to take the test. It's useful in controlling the spread of the disease, and if someone experienced an isolated, incident in which the disease could have been transmitted, it can alleviate the fears if the test is negative, he said.

There are four major ways that HTLV-III is transmitted — through sexual contact, by sharing hypodermic needles, from mother to child during pregnancy and from transfusions of infected blood.

Blood and semen can be infected with high concentrations of the virus. Any contact allowing infected blood or semen to enter the bloodstream of another person is a possible mode of transmission. For example, friction caused by intimate sexual contact can rupture delicate mucous membranes lining the rectum or vagina and small open areas can develop in the mouth due to tooth-brushing. During sexual activity blood or semen can enter these openings in the mouth, vagina or rectum and transmit the virus.

The virus can also be transmitted among intravenous drug users through unsanitary needles. "It's not that they shoot up, it's that they share needles," Mannion said.

Vertical transmission occurs when an infected woman is pregnant and the virus passes from the mother's blood supply to the fetus' blood supply. It can also be transmitted at birth because of all the blood.

Studies show that HTLV-III is in breast milk, saliva, urine and tears, but the amount is very small. "In order to get infected, you need a certain critical mass," he said.

A theory suggests that the virus originated in Zaire in a certain species of monkey.

Concerns arise at workshop

Experts vary on AIDS concerns

By Elizabeth Cochran
Staff Writer

Many people other than homosexual males and intravenous drug users are concerned with the huge number of problems that accompany the AIDS epidemic.

About 160 health professionals, teachers, counselors, funeral directors and mortuary science students gathered at the AIDS and mortuary science students gathered at the AIDS workshop and listened to an information-packed speech, broken into discussion groups, and then shared their specific concerns.

All agreed that there is a dire need for current and accurate information about the disease; and for networks to be created to distribute the information.

A group of area health professionals is concerned about the discrepancy of information and the civil rights violations that accompany testing without a patient's consent.

Explicit information detailing safe sex practices needs to be formulated and distributed, but that might offend the general public, said Red Christensen, of the Metropolitan Community Church, who spoke for a group of counselors.

He added that a lot of people think of AIDS "as a disease that gays get."

Counseling techniques for victims and family members are needed, said Connie Miller, Hill House counselor, speaking for another group of counselors.

Public School officials are concerned with policies regarding students and employees infected with AIDS. Combating the fear of parents, it policy allows AIDS victims to participate in school, is a specific concern.

Funeral directors and mortuary science students are concerned about how long the virus lives in a cadaver, and what sterilization techniques are required to kill the virus that could contaminate instruments.

The Jackson County Health Department video-taped the workshop and it is available to the public.

BRIEFS

MONDAY MEETINGS:
Society for Advancement of Management, 6:30 p.m. in the Student Center Mississippi Room.
Canoe-Kayak Club, 7:30 to 10 p.m. in Pulliam Pool.
Financial Investment Society, 7:30 p.m. in the Student Center Illinois Room.

CAREER PLANNING and Placement Center will sponsor an interviewing skills workshop at 11 a.m. Tuesday in the Woody Hall Dean’s Conference Room, B-142.

A NOT-TYING and Safety Clinic will be held at the Student Recreation Center, climbing wall from 7 to 9 p.m. Tuesday.

AN INTRODUCTION to the physical, mental and spiritual benefits of yoga will be held from 4 to 5:30 p.m. Tuesday through March 4 in the Student Center Multi-purpose Room. Come with a pad or blanket and wear loose-fitting clothes.

FINANCIAL AID workshops will be presented Monday at 2 p.m. and 7 p.m. in Student Center Ballroom C to provide information about financial aid programs, availability, application procedures and deadline dates.

BIBLE STUDY and Fellowship meets Tuesday at 7 p.m. in the Student Center Mackinaw Room.

MORRIS LIBRARY will present an introduction to the library computer system at 3 p.m. Tuesday and Wednesday in the Central Card Catalog Room on the main floor. Call the Social Studies Library at 453-2708 to register in advance; space is limited.

BRIEFS POLICY — The deadline for Campus Briefs is two days before publication. The briefs must be typewritten, and must include time, date, place, and sponsor of the event and the name and telephone number of the person submitting the item. Items should be delivered or mailed to be received by deadline to the Daily Egyptian newsroom, Communications Building, Room 124.

Trombone, piano recital set

Trombonist Gary Shaw, assistant professor of music at Millikin University, will perform a guest recital Monday at the Old Baptist Foundation. The recital is being sponsored by the School of Music.

Joining Shaw will be pianist Susan Cobb, adjunct assistant professor of music at Millikin.

Shaw will be performing works by Georg Christoph Wagenseil, Paul Hindemith, Edward Gregson, Jacob Druckman and Stepan Salek.

The recital will begin at 8 p.m. in the Old Baptist Foundation Recital Hall, located between Wood and Faner halls. The performance is free and open to the public.

Salukis seek commitment from recruits

By Rich Heaton

The Saluki women’s track team set five school records and saw Saluki shot putter Rhonda McCauley qualify for the national championships on their way to second-place finishes in the Eastern Illinois Quadrangular Indoor Meet last weekend.

“I’m very pleased with our performance today. I think we did as well as we expected and we could,” said Saluki coach DeNenon. “There were just a couple of weak spots. We were one runner away from winning.”

Purdue won the meet with 113 points, with the Salukis coming in a close second with 127.

Angie Nunn was that one runner and Nunn was unable to run for medical reasons and will be out for a couple of weeks. DeNenon estimated that Nunn would have been worth probably 20 points toward the team score.

On the bright side, McCauley qualified for nationals on her last throw of the competition. The qualifying standard for the shot put is 48 feet 10.5 inches. McCauley had two close throws earlier in the competition, of 48 feet 1 inches to lead into the finals, and 49 feet 9 inches on her first throw of the finals.

Each athlete is allowed three throws in the final competition. On her second throw in the finals McCauley fouled then came back to throw 50 feet 1 inches on her last throw, qualifying by more than 2 inches.

Kathy Raske set two school records and took second two places at the quad meet.

In the pentathlon, Raske set a 60-meter hurdle record, running the race in 8.7 seconds, two tenths of a second faster than the old record.

Raske also set the open 60-yard hurdle record in a time of 8.3 seconds, bettering the existing record of 8.45 set in 1985.

While winning the 600-yard run Carlon Blackman broke the record set last week by Angie Nunn. Blackman ran a 1:24.23 to Nunn’s 1:24.60.

In the mile-run, Vivian Simou took fourth place and broke the current record for the second straight week.

In last week’s Missouri Invitational Simou set a new school record by running a 5:19 mile and in this weekend’s meet she lowered that by three seconds running a 5:16.

The 4x800 yard relay team took more than six seconds off the existing record in their second place effort. The team ran a 9:30.02 to eclipse the current 9:45.2.

On their way to the second place team finish the Salukis garnered five first, five second, two third, three fourth, four fifth and three sixth place finishes.

Denise Blackman got two of the Salukis first place finishes, winning the 60- and 300 yard dashes.

Sue Anderson, red a 1-2 Saluki sweep of the pentathlon. She won with 3,322 points, and Raske took second with 1111.

McCauley and Carlon Blackman had the other two firsts in the shot put and the 600 yard dash.

The Salukis second place finishers were Anderson in the high jump, Christians Philippou in the long jump, Raske in the 60-yard hurdles and the 4x800 yard relay.

In third place for the Salukis were the 4x229 yard relay team and Brenda Beaty in the long jump.

Fourth place Saluki finishers include Amy Marker with a very good 17:13 in the three mile, Simou in the mile and Philippou in the tripie jump.

In fifth place for the Salukis were Lisa Jutrascek in the 800-yard run, Felicia Veal in the 60-yard hurdles, Beaty in the tripie jump and the 4x400 yard relay.

Sixth place finishers for the Salukis were Pam Quarshie in the 1,000 meter run, Beaty in the 60-yard dash and Michelle Wicman in the shot put.

Team scores for the meet were Purdue 153, SIU-C 125, Eastern Illinois 98, Western Illinois 76, Bradley and Illinois State 27 and DePaul 21.
Cornell pleased with third-place performance

By Steve Koulos
Staff Writer

Even though the SIU-C men's track team finished only third out of four teams Saturday in a quadrangular meet at the University of Illinois, coach Bill Cornell was pleased with his team's effort.

"You could see a lot of desire on our part with 25 to 50 percent of the team trying to put out their best," Cornell said. "We still have a few athletes not working up to their capabilities but we're progressing. If we continue to work like we did Saturday, we'll be ready for the conference championships."

The Salukis, who had three first-place finishes and scored 36 points, finished third behind host Illini and Purdue. Illinois dominated the meet by scoring 79 points and winning eight out of 15 events. Purdue was second with 49 points and fourth-place DePaul failed to win a single event.

Cornell said his top five performers in the meet were: 800-meter specialist Tom Smith, middle-distance runners Mike Elliott, Andrew Pettigrew, and Brett Garrett, and sprinter Connor Mason.

Smith, Elliott, and Pettigrew each notched a first-place finish for the Salukis.

Smith set a personal best in winning the shot put with a 58-3.25 effort and Elliott finished first in the 440-yard run with a 1:35.88. Elliott also added a second-place finish in the 1500-meters with a personal best 3:49.96.

For the second consecutive weekend, Pettigrew won the 1500-meter run and lowered his time from 3:51.90 to 3:48.0.

Garrett, a sophomore from Sparta, finished second in the 100-meters with a personal best 20.96 and had the fastest split time (49.53) on the Saluki 4 x 440-yard relay team, which finished second in 3:20.52.

Mason, a sophomore from Paducah, Ky., set two personal bests in the 100-yard dash with a 10.87 effort and Elliott finished first in the 100-yard dash with a 10.87, the 400-freestyle relay, with Rea, Claudia Zierold – sprinting an outstanding split of 22.9, Irick and Royalty with an compiled time of 1:31.56. Carlson in the 500 and 1000 freestyles, 4:55.65 and 10:19.64 respectively. Vandiver in the 200 I.M. 2:11.56. Westfall in the 200 fly. 2:04.76. Irick in the 200 back. 2:06.11 and Mullin in the 200 breaststroke, 2:25.63.

On the boards, Straub earned a third on the one meter with 209.9 points and also ranked third on the three meter with 205.72.

Additional Saluki placers were Marianne Bentley, second in the 1000 free, 10:31.75; Zierold, second in the 100 and 200 freestyles, 53.60 and 1:53.28 respectively; Royalty, third in the 50 free, 24.88; Amy Withberite, third in the 200 I.M., 4:12.96; Rea, second in the 100 free, 53.52; Westfall, second in the 500 free, 5:08.76 and Carlson in the 200 breaststroke, 2:21.39.

Cornell said Martin had a 50-60 effort, which would have won the event, but it was nullified because he fouled on the attempt.

The Salukis had 14 personal bests overall.

"We definitely had team spirit Saturday," Cornell said.

The Salukis return to action in a triangular meet this weekend at Eastern Illinois University.

---

Swim team splits weekend action with 'Huskies, Tigers'

By Sandra Todd
Associate Sports Editor

The Saluki women's swimming and diving team was one-for-two over the weekend, with a 53-47 loss to Auburn on Friday night and a 62-51 victory over Nebraska on Saturday.

After a near-capacity crowd on Friday at the Recreation Center pool, the Saluki 400-medley relay team of Wendy Irick, Patsy Mullen, Linda Pate, and Sue Witty started off the meet with a win checked at 4:08.40. Auburn trailed with a 4:33.23.

Following was the 1000-yard freestyle, in which Stacy Westfall dominated the field with a 10:01.75, her lifetime best by seven seconds. Auburn's Libby Pruden and Mary Beth Eckermann took third and fourth, making the meet's score 12-2 after two events.

Auburn commanded the 200 free with a one-two finish by Kandis Perry, 1:51.77 and Karin Furusho, 1:52.44. Roxanne Carlton gained third place in 1:52.32.

The sole double winner for the Salukis was Irick, who took first in the 100 and 200 backstrokes, with respective times of 56.84 and 2:04.88.

Other top placers for the Salukis included Mullen's 100 breaststroke, 1:06.61 and Rea's 100 butterfly, 55.73, an NVAA qualifying standard.

Additional placers for SIU were Iris VonJoanne, who took third in the 100 breaststroke, 1:06.77; Rea, who took second in the 50 free, 23.85 and third in the 100 free, 52.85; Mullen, placing second in the 200 breaststroke, 2:25.90; Carlton, taking second in the 500 free, 4:54.14 and third in the 200 individual medley, 2:11.42 and Westfall, who was third in the 100 fly, 58.29.

In one-meter diving, Suri Straub, the only Saluki woman diver, totaled 272.7 points on the one-meter board event for second place and chalked up 206.67 on the three-meter for third.

In terms of overall performances, Coach Bailey Weathers said that the team was evenly prepared for both meets and that one meet did not necessarily outweigh the other.

"I think they were pretty equal," he said. "We didn't take either team lightly."

"On paper, Auburn probably should have beaten us, but the reverse is true for Nebraska," Weathers said.

He said that the sprinters are getting into the phase of the season when they begin to reduce their workload in preparation for the bigger meets at the end of the schedule.

"We're just starting to rest," Weathers said. "Ideally, you'd think the swimming would get faster, but that's not always true because it's a transition. Reducing the work can affect performance in strange ways. We expect to see some better performances next weekend."

On Saturday, the Saluki women bounced back from the loss to Auburn and outscored Nebraska by 11 points, with wins in eight events.

Saluki wins came in the 400-medley relay with Irick, Mullen, Rea and Royalty topping the field with a 3:54.82; the 400-freestyle relay, with Rea, Claudia Zierold – sprinting an outstanding split of 22.2, Irick and Royalty with an compiled time of 1:31.56. Carlson in the 500 and 1000 freestyles, 4:55.65 and 10:19.64 respectively. Vandiver in the 200 I.M. 2:11.56. Westfall in the 200 fly. 2:04.76. Irick in the 200 back. 2:06.11 and Mullin in the 200 breaststroke, 2:25.63.

On the boards, Straub earned a third on the one meter with 209.9 points and also ranked third on the three meter with 205.72.

Additional Saluki placers were Marianne Bentley, second in the 100 free, 10:31.75; Zierold, second in the 100 and 200 freestyles, 53.60 and 1:53.28 respectively; Royalty, third in the 50 free, 24.88; Amy Withberite, third in the 200 I.M., 4:12.96; Rea, second in the 100 free, 53.52; Westfall, second in the 500 free, 5:08.76 and Carlson in the 200 breaststroke, 2:21.39.
CA.6ERS, from Page 16

complained to no avail, and Ford made both three-pointers to give Drake a second-half lead that increased to a 39-30 halftime edge.

Although Drake went up by 11 points at the 15:34 mark of the second half, from there on the Salukis gradually chipped away at the lead, paced by Jackson's sharp outside shooting and Bridgette Bonds aggressive rebounding.

While Bonds played consistently well to avoid foul trouble, Beghius played most of the 9:53 minutes with four personal fouls. Beghius created a great team effort, which helped her hold Ford to just two baskets in the final 13 minutes of play.

At the 1-point mark, four Salukis collapsed on Ford, causing her to cough up one of her eight turnovers of the game. Ford hit just 10 of 24 from the field during the game.

With 6:15 remaining, Jenkins tied the game and the lead was then back to nine points. However, the Salukis got the best of the exchanges and it appeared the worst the Salukis could achieve was a tie.

With 24 seconds showing on the shot clock and 30 seconds on the game clock, the score stood at 55-54 in favor of the Salukis. The Bulldogs went into a slowdown with a screen play designed for Jackson, but it was no mystery who would get the ball as the Bulldogs broke up Jackson's screen.

Forced away from the designed play, Jackson said she knew she would miss the shot, but got it off before the 30 second shot clock expired. The Bulldogs could not be scored off the back of the rim, and although Ford had position, Beghius soared above her, grabbed the ball away and put it through for the winning basket.

The Bulldogs took the win with three seconds on the clock, but on the inbound play Ford could not get her hand in front of the backcourt because Beghius was standing in the way to assure the Saluki win.

Jackson was the leading scorer with 24 points on 12 of 16 attempts. Ford had 22 points and 11 rebounds, both well below her current leading averages.

Saluki assistant coach George Hubert, who coached as assistant to the Saluki men for 19 years, said that of the great individual performances he has seen — Walt Frazier and Mike Glenn included — Jackson's performance was as good as any he's ever seen.

The Saluki women also stumped Northern Iowa 84-47 in Cedar Falls Saturday for their 12th-consecutive victory, an all-time school record. The Salukis now stand at a perfect 10-0 in league play with an overall record of 14-3.

SALUKIS, from Page 16

outpaced the Salukis 45 to 34.

The Salukis' big scorers were stifled throughout the game. Forward Randy House sank one of six shots; center Ken Dusharn, four of 11. Forward Doug Novsek fought off the shooting bug long enough to hit eight of 19 field goal attempts and three foul shots to lead SIU with 19 points.

"The kids made a commitment that we held after Middleton and Novsek," Barone said. "We felt they were the keys to the basketball game.

Novsek thought the Salukis' performance was because of poor execution, not defense. 'We've faced better defensive teams, and their zone wasn't that deep. They're not any more talented than we are out there,' he said.

The Salukis started out poorly right away when Morris and backup guard Renard Edwards canned buckets inside and Johnson sank two free throws from a Dusharn foul to jump the Bluejays front 6-4. Barone said the quick start was the key to their victory.

House finally sank a 10 footer with 16:25 left in the half for the Salukis' first score. Trying to play catch-up, the Salukis seemed to play worse instead of better. Outside shots wouldn't go in, and Johnson's hard defensive play preserved an effective Saluki inside game.

With 4:30 left in the half, Creighton had built up a 25-10 advantage.

The Dogs managed a comeback scoring nine unanswered points in four minutes to trail by only eight at intermission, 21-29.

In the second half, the Salukis continued to shoot better, and Creighton ran up a 49-27 advantage with ten minutes left.

The Dogs attempted a late comeback and pulled to within 11 points of the Bluejays with two minutes left but the Bluejays managed to hang on for the win.

Building AD expected to testify in lawsuit

ATLANTA (UPI): University of Georgia football coach and athletic director Vince Dooley is expected to testify Monday in the lawsuit of a former professor who contended he was fired because she spoke out against preferential treatment for athletes.

Dr. Jan Kem, who was fired from her English instructor's job in the university's remedial program, alleges that her right to free speech was violated and is asking reinstatement to her position, back pay and damages.

Dooley's name is on the list of possible witnesses to be called by attorneys for Drs. Leroy Ervin and Virginia Trotter, administrators of the university's remedial program for scholastically deficient athletes, in the lawsuit for Ervin and Trotter. Hale Athens, second half, told who Dooley is expected to testify, or even that they plan to call him as a witness.

Dooley, however, may take the stand after Kem's attorney, Hue Henry, completes his cross-examination of Ervin. Ervin has been in the court since Thursday and was still testifying when the weekend recess was called late Friday afternoon.

The suit has widespread implications. If the charges are sustained it could affect the remedial development program for athletes at colleges throughout the country.

However, a new NCAA rule that requires incoming athletes to have a 2.0 high school grade average and also that the SAT exam is expected to cut down considerably on the number of freshmen athletes needing the remedial development program.

Almanzela launched an all-out effort Friday to discredit Kem's contention that she was fired for protesting favored treatment of athletes and the children of university contributors.

Building AD expected to testify in lawsuit

Campus Safety Fee Board announces Grants for Undergraduate and Graduate Students

For studies which relate to student welfare, particularly investigations of campus safety issues or concerns. Funds are available for postage, printing, commodities, the purchase and analysis of survey instruments, and other similar expenses.

To apply:
1. Complete an application available from the office of the Vice President for Student Affairs.
2. Present a proposed budget.
3. Submit a letter of support from one faculty member.

All studies awarded grants must be completed no later than the end of the semester following the term the grant is awarded. Decisions concerning all applications will be made by the Campus Safety Fee Board.

Lady cagers sweep, break tie for GCAC lead

By Anita J. Stoner
Staff Writer

DESHOINES, Iowa - The Saluki women's basketball team swept two games this week, to remain undefeated and move closer to establishing a new school record. "I was really happy to see the team come together and play well," said Coach Doug Grillham. "It was a great start to the season." The Salukis ended the week with a 92.25-90.05 lead.

Hawkesyes dominated the second event, pulling out a 99.10-97.35 victory. The Hawkeyes will take on Iowa State this weekend.

The Salukis began their season with a 9.50-9.35 win against Northern Illinois and Western Michigan last weekend. They kept the pressure on themselves, learning from the mistakes of last year.

Salukis rated No. 11 last week were humiliated Saturday, falling 9.35-9.00. The Salukis could not muster up enough intensity to adequately compete against the Hawkeyes.

Junior gymnast Mark Ulmer paced the Salukis Friday night to a come-from-behind victory against Buckeyes. Ulmer scored a 9.65 on the parallel bars.

Salukis chickened out after the first half, and the Hawkeyes took full advantage. "I don't think we really played well," said Coach Grillham. "We were flat and lacked creativity." The Hawkeyes' 9.00-8.70 victory was fueled by their disheartening 75-51 loss to the Hawkeyes Saturday.

The Salukis have a tough road ahead, facing competing teams on the horizon.

Season-best times clocked as swimmers win two more

By Sa'dra Todd
Assistant Sports Editor

The Saluki men swimmers and divers added two more victories to their season record this weekend, making 7-1, by notchings wins over 7-2 Nebraska and 6-7 Iowa. The Salukis won both events.

Junior sprinter Lutterman is one of the top-ranked swimmers in the state. "Our team is working hard and about to turn the corner," said Coach Doug Grillham. "I think we have a good chance to win.

Salukis' Legit arrives just in time as the team started to come together. The Salukis ended their season with a 105-90 victory over Nebraska. "I'm really happy with how we did," said Coach Grillham. "I think we have a good chance to win.
