City Council approves nitrous ban

By Aaron Butler
Daily Egyptian Reporter

The Carbondale City Council approved a ban on nitrous oxide use and distribution at Tuesday night's meeting, and, for the second time this month, voted to table an anti-lockout ordinance intended to prevent tenants and their property.

Anti-lockout ordnance set aside for now

O.J. trial coverage excessive — students

By Dustin Coleman
Daily Egyptian Reporter

Whether students are eating, studying or just relaxing in the Student Center, they cannot seem to escape the face of O.J. Simpson.

Television in the Roman Room, the TV Lounge, the Big Muddy Room and the International Lounge in the Student Center have been keeping students informed on the newest events in the trial of the century.

Adam Schindler, a junior from Hannibal, Mo., said the media coverage of the trial is overwhelming.

"I don't object to the coverage of the trial, but it shouldn't be on 24 hours a day," he said. "That's fascinations to me. But I support the trial. It's just that they are making a big deal about it. If it was anyone else besides a celebrity they wouldn't make as big of a deal."

World

BOMBING EXHIBIT TO EXCLUDE DEVESTATION

WASHINGTON - Scientists have discovered a protein in saliva that, in the test tube, prevents the AIDS virus from infecting human cells. This could open new possibilities in the war on human immunodeficiency virus through saliva that is "non-existent," Dr. Thomas McNeely of the National Institute of Dental Research in Bethesda, Md., said in an interview Monday.

FTC TO REGULATE LARGE CORPORATION MERGE

WASHINGTON - Free-market in the new Republican majority might be shocked by things that go on in the Pentagon's highly classified or "black" world. Take the merger between Martin Marietta Corp. and Lockheed Corp. The new Lockheed Martin Corp. will dominate the market for classified space satellites, and recently the Federal Trade Commission crafted conditions for the deal designed to assure that competing firms can stay in business.

CRITICS RESUME EFFORTS TO KILL THIRD SEAWOLF

WASHINGTON - The Seawolf submarine may be headed for Davey Jones' locker — again. Congressional critics of the third and final Seawolf are resuming efforts to kill it. They stard a better chance now that the Republican majority have taken over Congress, Capt. Brian Holt observers agree. The military wants $2.4 billion Seawolf not because it's needed for military reasons, but because canceling it would cause yet more massive layoffs.

GOVERNORS MAKE LITTLE PROGRESS ON WELFARE

WASHINGTON — Penetrating a potentially contentious congressional debate over welfare reform, the nation's Republican and Democratic governors failed to resolve basic questions of how to make a program all agreed is badly in need of repair. The National Governors Association ended its meeting here with an agreement that welfare reform should give maximum flexibility and clear fiscal protections to the states, and that the goal of a reformed system should be both to aid families and children and to move recipients from welfare to work.

Subjects to study
Conference aims to spark girls' interest in math, science
By David R. Kazak
Daily Egyptian Reporter

For many female junior high school students from around Southern Illinois, this Saturday will be a time to learn about science and math, at a conference organized by SIUC professors.

"The "Expanding your Horizons in Math and Science" conference will give seventh, eighth and ninth-grade girls a chance to meet professional women working in math and science fields ranging from archeology to zoology.

They also will participate in hands-on experiments like simulations of how scientists track down new diseases, studying and creating slides of microscopic organisms and accessing worldwide databases through the Internet.

Conference Organizer and SIUC Associate Professor Mary Wright said the purpose of the learning experience is twofold. The material geared toward sparking an interest in science, but even more so, in gaining an interest in women, she said.

"Broadly speaking, we are trying to break the mold of a situation where women are not encouraged to pursue careers in math or science," Wright said.

She said studies have shown a girl's interest in math and science in a fourth-grade setting is equal to a boy's up until around the sixth-grade level. "For some reason, the interest curves drop off right around that time," Wright said. "I'm strongly of the opinion that the reason is societal."

The conference will encourage the young women to look at math and science in a way they might not have previously considered, she said.

"The girls will be working in small groups of five to 10 girls," Wright said. "We have given the women mentors a chance to talk one-on-one with the girls and tell them what they can do in the field of math or science, or even the bigger questions the girls should ask themselves: How do you make a career out of this?"

The professional caliber of the women speaking to the girls is reflected in the positions they hold. Many are Ph.D.'s, from SIUC Southeast Missouri State University and John A. Logan College. Others are professionals outside of academia, including a nurse, international aid in federal government and a professional journalist.

Wright, who holds a doctorate in mathematics, believes there is value in the fee hike
By Amanda Estabrook
Daily Egyptian Reporter

The Graduate and Professional Student Council will vote on the student health service fee hike at 3:30 p.m. today in the Mississippi room of the student center.

Patrick Smith, GPSC president, said he believes the proposed $3 increase in the student health service fee will pass. He said he does not believe it will be unanimous, though.

The fee increase for fall of 1994 would provide HIV testing, a new clinical psychologist, an emergency vehicle to transport mental health patients from Harrisburg, and a residence hall nurse.

After being voted on by GPSC, the Board of Trustees would make the final decision before it could be implemented. Other business on the agenda is to make nominations for the "Outstanding Contribution to Graduate and Professional Education at SIUC."

The nominations for the award will be made today and at the next meeting. GPSC will vote on the nominees.

There also will be a vote on a resolution which would allow all registered student organizations that did not attend the Fee Allocation Conferences to be considered for funding.

There also will be nominations for executive committee seats.

The executive committee plans to hold meetings for the agenda for GPSC meetings.

Smith said there will also be discussion on the process for replacing Student Trustee Mark Koshan, if he resigns.

Black History Month begins
Panel discusses problems facing male population
By Michael D. Deford
Daily Egyptian Reporter

Today marks the beginning of Black History Month. This year's emphasis is the integration of the young African-American male back into the mainstream of contemporary American society.

Black History Month will begin its activities at noon in the Student Center's 4th floor video lounge. University Career Services and other SIUC organizations will sponsor a free teleconference presentation titled "Beyond the Dream VII: The Vanishing Black Male — Saving Our Sons."

A panel of seven experts, including the Rev. Al Sharpton, will examine issues facing American males. The panel also will discuss the role academia plays in the lives of African-American males, as well as ideas to raise the number of black males in our education system and lower the number in our prisons by promoting positive role models for young males.

Severyn Bryson, executive assistant to the president of SIUC and newly elected president of the SIU's Center for Higher Education, will be the panel's keynote speaker.

The teleconference is open to all members of the public.

The protests resulted in approximately $15,000 damage to University buildings and Carbondale stores. During the protest, some of the 3200-strong crowd smashed bricks and broke the windows in the stores and buildings throughout the University and Carbondale. The protest was organized by the National Association for the Advancement of Colored People.

"There isn't one particular problem facing young African-American males today, the problems males face are a combination of race, violence, drugs and unemployment," Bryson said.

"This panel is going to discuss those issues that are unique to the population of black males in America."

"A national forum on this is held to discuss these issues and offer strategies on how to address them," he said.

The teleconference, organized through Black Issues in Higher Education, will be viewed via satellite across the nation. It will allow members of the audience to ask panel members questions by calling a toll free number.

"The teleconference is free and open to all members of the public. Sponsors for the teleconference include the Executive Assistant to the President, the Black Affairs Council, University Career Services and Black American Studies."

The event was also broadcast over the radio stations KSLU and KHRN.

The protest was scheduled to coincide with the African-American history month which is celebrated each year during February.
Apathy apparent at Halloween hearing

COUNTLESS MEETINGS, DEBATES AND LOCAL committees have centered around the issue of Halloween in Carbondale and all of the negative connotations attached to it. Many people at the University grumble that the measures — or lack of measures — offered by the city and SIUC administration are not adequate to curb the haunting holiday’s misdeeds.

Rather than meaning about others’ decisions, these individuals need to participate in the formulation of town policy for future South Illinois Avenue festivities.

The Mayoral/Presidential Task Force on Halloween is planning action Halloween 1995. Hearings were held Tuesday afternoon and evening, and students were invited to offer their input on solutions to this lingering problem. Student attendance was low however, despite publicity the task force has received in local media.

THE LOW STUDENT TURNOUT TO THE TASK force’s hearing is sad indeed when the impact of the Halloween issue on students’ present and future lives is considered. The widespread reputation of SIUC as a “party school” rather than a bastion of academic excellence should be seen as an embarrassment to all students.

Those who complain about the negative image that surrounds their school should be the first to flock to such a hearing. Those students who attended the decision-making session such as the 1994 10 p.m. Halloween bar closing ordinance being unfair or inadequate also should attend to offer alternative measures.

MANY STUDENTS MAY ARGUE THAT THEY DID not have time to attend the hearings because of class, work or studies. This argument may be legitimate in many cases but not enough for students to place the issue high on their list of priorities. These negative images may hang as a dark shadow on students’ priorities need to be weighed concerning this issue.

The number of students who offer sincere input towards mending the Halloween fiasco can determine how seriously the city and SIUC officials will take the problem.

This is my third and last letter to the editor. I don’t belong in school if I can’t get it right in three tries. I regret not asking at least 50 students if this concerns them. If everybody else feels that tuition is reflective of the service, or already know how it is used, I beg your forgiveness.

I assumed that this would be brought to the attention of a board member by word of mouth if he or she does not read this paper. Since I’ve already gone this far, I’ll try to get my three letters into the hand of a member, but will not make any demands. If I were a board member, I would respond to the police request of a student. I would be glad to type up 300 words or less on my own time. If I didn’t know the answer to the question and was not willing to do what it takes to find out, I would not write the letter.

Throughout my life, I’ve made many decisions such as the assumption is true, in that same plane would pay for the F-22 fighter plane in 40 times. Add it up. pretend that a million dollars goes into effect, Hoa, best defense wins the Super Bowl. You think the voters will catch on?

First, I have assumed that this is the case. If less was assumed and more was asked, the result would be at least a paragraph which explains what that large sum of money is going to buy. If that was backed with a warranty, you would not be writing this.

My underlying theme seems to be assumption. I can only speculate that if less was assumed and more was asked, devastations such as the S&L scandal may have been prevented. I heard this would cost every U.S. citizen $10. I am more than willing to expose myself as stupid if it reminds people of that.

I must find Nixon myself if I really am burning up over $1000 of tax money to be a stakeholder.

After knowing what is covered by fees, I’ll use a maximum of 20 dollars of tax money under the heading of tuition. The remainder will have to be spent on something I agree with, and that is not 12-figure salaries. The idea is I will become a greater asset to society, be happier and give the $12 more money to William. To continue without inquiry would be a blatant disregard to the taxpayer. I am not putting down this school.

I may have a disability which inhibits learning by conventional methods.

My apologies to the Daily Egyptian if I have tampered this paper and/ or abused this wonderful privilege by any or all of my three letters.

Balanced-budget proposal has potential to turn Congress into economic circus

By Robert Scheer
Special to the Los Angeles Times

What a wonderful circus Congress has become, full of dazzling side shows and con artists working the tribunes in the aisles. Hey, sucker, wanna balance the budget? Let Ringmaster Newt Gingrich show you how.

First, eliminate the Corporation for Public Broadcasting ($285 million), the National Endowment for the Humanities ($177 million) and that other one for the arts ($167 million), Add it up, pretend that a million is a billion and we’re outta here. You think the voters will catch on? Many people think this is a fair assumption, but will not make any demands. If I were a board member, I would respond to the police request of a student. I would be glad to type up 300 words or less on my own time. If I didn’t know the answer to the question and was not willing to do what it takes to find out, I would not write the letter.

Meanwhile, make sure that nothing serious gets cut. Certainly not military spending, like the $52 billion for the Lockheed F-22 fighter plane manufactured in Marietta, Ga. — Gingrich’s back yard. Sure, he attacks federal spending, but Gingrich doesn’t mean in his Cobb County, one of the biggest recipients of federal dollars in the country — $2.3 billion a day.

Some pigs will try to make a big deal of the fact that Gingrich wants 442 F-22s and cutting just one plane would pay for the arts budget. We’re talking defense, and every­ body knows that whoever has the best defense wins the Super Bowl. That’s why Gingrich wants to receive “Star Wars,” not just because it’s another Lockheed workfare program.

Don’t worry about the public re­ ceiving a new defense buildup as a budget buster. That’s why the way the budget was “balanced” for the 12 House Republicans cost the White House, and the taxpayers never noticed.

Sure, the Democrats keep point­ing out that 28 cents of every tax dollar goes to pay the interest on the Republican debt, but when was the last time you heard that treated seri­ ously on talk shows?

This isn’t about war — it’s about business, and Republicans were not put on this earth to be some bureaucrat—stop an American business­ man from making a buck. Heck, it’s my last assumption is a fair one. After knowing what is covered by fees, I’ll use a maximum of 20 dollars of tax money under the heading of tuition. The remainder will have to be spent on something I agree with, and that is not 12-figure salaries. The idea is I will become a greater asset to society, be happier and give the $12 more money to William. To continue without inquiry would be a blatant disregard to the taxpayer. I am not putting down this school.

I may have a disability which inhibits learning by conventional methods.

My apologies to the Daily Egyptian if I have tampered this paper and/ or abused this wonderful privilege by any or all of my three letters.

Student addresses taxes, tuition

Here’s how to submit a letter to the editor:

A: You
B: Letter
C: Editor

Editorial Policies

Signed articles, including letters, viewpoints and other commentaries, reflect the opinions of the writer. Unsigned editorials represent a consensus of the Daily Egyptian.

Letters to the editor must be submitted in person to the editorial page editor, Room 1247, Communications Building. Letters should be typewritten and double spaced. All letters are subject to editing and will be limited to 300 words. Letters fewer than 250 words will be given preference for publication. Students must identify themselves by last and major, faculty members by rank and department, non-academic staff by position and name.

Letters for which verification of authorship cannot be made will not be published.
Refund

continued from page 1

The deadline for applications falls within the first three weeks of each semester and is the first two weeks of the summer sessions.

Jonna Moesley, a junior in education, said applying for the refund is easy.

"I got the refund my first semester here and didn't know you could get it every semester until the next city council meeting," Moesley said. "They have my information still on file from the first time I applied, so it should be easy to do again."

"I just went in, and they already had my insurance information, so I just had to fill out the application, which took about five minutes."

Moesley said the city council uses a higher insurance deductible, or is a Preferred Provider Organization (PPO), or is a Health Maintenance Organization (HMO). "Many of these plans require they see a number of doctors or other health care providers to determine if the treatment is necessary."

"Students keep the plan, because they are young and have a higher deductible, or is a PPO, or is a HMO, or an insurance plan that takes more time."

Hall in May 1994. The ordinance was intended to discourage Carbondale landlords who locked out tenants over small amounts rather than dealing with them through legal channels.

Councilman John Yow, who voted against tabling the proposal, said the purpose of the ordinance was to "put teeth in the present system" by allowing police to issue citations to landlords who continued to deal with tenants outside the law.

Student representatives objected to a change in the wording of the ordinance, which had originally stated that police could use arrest warrants to arrest offenders, but was rewritten to say police could issue citations to landlords in violation.

Councilman Richard Morris said he saw the anti-lockout ordinance as a deterrent to landlording, but felt it would not prevent tenants from being locked out. He also noted the council should pass the ordinance or stop considering it.

"If a landlord wants to lock out a tenant, or cut off utilities, this will not stop him," he said. "If we're going to jump back and forth on it, I don't see why we're taking it seriously."

The council voted 3-2 to table the ordinance for further study, with councilman Yow and councilman Morris in opposition.

The council voted at last night's meeting to raise starting salaries of council members by $1,000 and the mayor's pay by $2,000 as part of an increase to equalize the City Council salaries with those in the rest of the state.

Nitrous

continued from page 1

UGS city affairs commissioner Michelle McEwan said the UGS would support the nitrous ban if the city would initiate a "pay-by-mail" fee system, in which users of the gas would be fined $50.

In this plan users would have the option to mail payment to the city rather than appear in court. The city attorney Sharon Hammer said she is currently working on the pay-by-mail system which would be ready by next month.

The two insurance plans, she will get about $104 that will be added to her bursar bill.

Baggott said many students elect to keep the plan for a variety of reasons, despite the optional refund.

"Students keep the plan, because they feel it's cheaper, easier, or more available, or is a PPO, or is a HMO, or an insurance plan that takes more time."

USU PARALEGAL ASSOCIATION

will meet at 5 p.m. in Lawonn 231

DATA PROCESSING Management Association will meet in Farer 1032 at 7 p.m. for a presentation on the Internet.

YOGA AND MEDITATION classes will be held from 5-7 p.m. and 7:15-9:15 p.m. at the Student Recreation Center.

COUNTRY LINE DANCING will be taught from 8-10 p.m. in the Student Recreation Center.

LIBERAL ARTS SENIORS can make appointment appointments for art classes. For more info, call Barbara Lipe 453-3388. Farer 1229.

SUIC SCHOOL OF MUSIC Faculty Concert to Benefit Music Scholarship Fund will be held at Staley Auditorium at 8 p.m. on Feb. 3rd. Tickets are $3 for students and $6 for the public.

COUNCIL MEETING - The deadline for borough council members to file for candidacy is March 14th. The election will be held on May 1st.

NIGHT CAR RACES - The races will be held at the Carbondale Fairgrounds on May 15th.

PUBLIC ART AND MUSEUMS - The opening of the 1995-96 exhibition season will be held at the Carbondale Art Museum on May 1st.

AMERICAN ADVERTISING FEDERATION will have a guest speaker on networking from 7 p.m. in room 1214 of the Communications building.

TOPS (Take off pounds sensibly) will meet at 6:30 p.m. at the First Baptist Church (105 W. Main).

UNIVERSITY CAREER SERVICES will have a job search strategies for Liberal Arts majors in 5 p.m. in Farer room 1229.

Recreation Center’s athletic Rx: Sports Medicine programs open

By Dave Katzman

If students are interested in a workout program, wanting to lose weight, or coming from a sports-related injury, the Sports Medicine Office can help.

“We can help anyone who is a pass holder at the Recreation Center for exercise testing and fitness programs,” said Matt Forrest, a student employee of the Sports Medicine Office.

Pass holders include all students of SIUC.

Injury assessment assists people who may have injured themselves while exercising or playing sports. The sports medicine staff can handle minor injuries, and they can refer more serious cases to Health Services.

The Fitness Assessment program is a seven-hour course designed to help formulate an exercise program for a person’s fitness goals.

“That’s a popular one,” Forrest said. “It takes about an hour. We test all points of physical activity — strength, endurance, flexibility and body fat.”

The Nutritional Analysis program works in conjunction with the Wellness Center.

A Wellness Center counselor goes over a student’s diet for the past three days and gives that person tips on how to gain or lose weight.

“The people from the Wellness Center are the ones doing the actual counseling,” said John Massie, coordinator of sports medicine. “We just give them a space to work in.”

Supervised Workout Exercise And Training helps people develop a workout regimen.

“It’s for people who don’t exercise regularly and are starting to get back into it,” Forrest said. “We can show you how to work all the equipment and what equipment will help you reach your desired goals.”

S.W.E.A.T. is especially helpful for those who do not understand the fitness process.

“People will come in and say, ‘I got to lose 30 pounds right here (the stomach) by Spring Break,'” Forrest said.

“You don’t lose weight in specific areas — it’s a roundabout thing.”

The sports medicine staff includes two graduate assistants who are certified athletic trainers, five student trainers and six student workers.

Despite having 14 employees, sports medicine is very busy, Massie said.

“As time from two o’clock to seven o’clock is usually busy,” he said.

“We work off an appointment schedule except for Wednesday afternoon.”

Walk-in injury assessment is available Wednesdays from 1 p.m. to 5 p.m.

For more information, call the Sports Medicine Office at 453-1520.

Winter wash: Marc Treceno, a third-year law student from Makanda, takes advantage of the warmer weather Tuesday afternoon by cleaning his car at the Wall Street car wash.
Drinking offers no solutions

By Barb Fijolek
Student Health Programs

What’s wrong with getting drunk? According to accumulated research, there is evidence that getting intoxicated can create major health problems, even if one does not diagnose alcoholics. For example, a single episode of drunkenness can result in impaired conceptual skills for 5-7 days. Students trying to cope with their academic workload may not realize that their difficulty in thinking is related to a hangover from the past weekend. Studies at SIUC show that those who drink more often lower their grades significantly.

Alcohol consumption affects beauty as well as brains. Drinking wine, beer or mixed drinks has been linked with skin problems, dull hair, bad breath and weight gain. Fat metabolism may slow down by as much as one third, even with a single drink. Science is discovering that the positive effects people often associate with alcohol are available without consuming alcohol. Experiments have been done with college students who are given non-alcoholic drinks they believe contain alcohol. The increased sociability, sexual arousal, lack of inhibition and fun reported by the “drinkers” is in the participants’ minds.

At SIUC, students are being encouraged to try new ways to feel good without the intoxication that interferes with appearance and getting A’s. There are a number of ways to change moods without substances, including special breathing techniques, muscle relaxation, mental imagery, self-hypnosis, positive self-talk, massage, bodywork and other methods. But first, ask why you want your mood to change. Certainly good moods feel better than bad moods, yet bad moods are a normal part of life and may point to something important. Moods can signal important changes in your life, and should at least be addressed. Interestingly enough, different foods can also bring about different moods.

If you feel your moods are abnormal or overwhelming, seek assistance. Powerful positive changes are possible by practicing simple exercises or listening to tapes designed to reduce stress without a hangover. For information about handling life’s challenges, call the Wellness Center at 536-4441.

Police Blotter

Carbondale Police

■ Brandon Hale, 18, of 2511 S. Illinois Ave. Lot 113, told Carbondale Police his trailer was burglarized between 5:30 p.m. Jan. 28 and 2:30 a.m. Jan. 29. The offenders allegedly took a collection of cards valued at $400.

University Police

■ Javonna C. Landry, 21, of Carbondale was arrested at 5:07 a.m. Jan. 30 for a Jackson County warrant for failure to appear on a previous charge of deceptive practice. She posted a $500 bond and was released.

■ Lionel Lambert, 18, of Carbondale and Tajuan White, 18, of Carbondale, were arrested at 8:55 a.m. Jan. 30 for allegedly fighting by agreement near the intersection of Route 51 and West Grand Avenue. They were released after they were served with a notice to appear in Carbondale City Court.

■ Anthony D. Reid, 25, of Murphysboro, was arrested at 1:43 a.m. Jan. 30 for allegedly driving under the influence of alcohol on Grand Avenue near Wall Street. He has not posted bond and is incarcerated at the Jackson County Jail.

■ Yoshimura Tadaaki, 25, of 314 N. Illinois Ave., Lot 27, Carbondale, stolen from the student’s room between 3 a.m. and 4 p.m. Jan. 29 while the offenders were entertaining friends.

BOWLING & BILLIARDS

Women’s 8-Ball Tournament
Saturday, February 4, 4pm
Winner qualifies for the regional tournament at ISU in late February.
Entry Fee: $8

Peace Corps representatives search for recruits at SIUC
Past volunteers enjoying helped others

By Rob Neff
Daily Egyptian Reporter

SIUC students who want to help humanity will have the opportunity to find their niche when the Peace Corps comes to campus in search of potential volunteers during the week of Feb. 13.

The Peace Corps currently has 6,500 volunteers working in 93 countries and hopes to recruit another 1,000 volunteers during 1995.

Jennifer Ostermeier, spokeswoman for the Peace Corps, said the Corps offers positions in several fields to college graduates who are willing and able to travel.

"We are especially looking for people in business, agriculture and education," she said. "We also have positions in forestry, vocational technology, science and general assignments." Jennifer Ostermeier
Peace Corps Spokeswoman

"We are especially looking for people in business, agriculture and education. We also have positions in forestry, vocational technology, science and general assignments."

We are especially looking for people in business, agriculture and education. We also have positions in forestry, vocational technology, science and general assignments.

Mary Pohlmann, SIUC's Health Service medical chief of staff, said many students are complaining of colds, but she has not diagnosed anyone with influenza, the upper respiratory flu, or the stomach flu.

She said it takes most people 3 to 10 days to get over a cold. But if symptoms persist or someone is running a high fever, a physician's care is needed.

Emily Robbins, a sophomore in recreation administration graduate of SIU and a Ballston Spa native, said she has been keeping up with the news about the Peace Corps.

"I've always wanted to help out," she said. "I've also always been the underdog. I like the feeling of helping other people."

Massalone joined the Peace Corps after seeing one of their television commercials and was sent to Guatemala, where he was a physical education teacher for five different schools in five indigenous villages.

Their national sport is soccer, but I wanted to teach them other games," he said. "I had them play volleyball, kickball and volleyball. When it rained, I taught them about nutrition and health."

Ostermeier said physical education is an important part of community development because the large number of children in many underdeveloped countries.

Massalone said he enjoyed the experience so much, he decided to go back into the Corps. It was the best experience I have ever had," he said. "This time I will be working as a trainer between the Department of Education in the Dominican Republic and parent teacher organizations there."

"I'll be training on things like teacher training and fundraising to help them get more material in the classroom," he said.

Massalone will spend the first three months living with a host family to become accustomed to the language and culture of the people there. During his stay in the Dominican Republic, he will receive an allowance equal to the amount an average citizen of the republic would earn doing his job.

"They make sure you live like the people around you," Massalone said. "You can imagine their reaction if some rich American was to move in down the street."

He said the best advice he could give to anyone interested in the Peace Corps was simply to enjoy the experience.

"Accept the next years with an open mind," he said. "Enjoy it and look at it as a big opportunity to serve your fellow man."

Beginning Feb. 13, Peace Corps representatives will set up information tables at different colleges of the University. There will also be interviews on site in the Ohio Room of the Student Center from 7 p.m. to 9 p.m. on February 15.

Students interested in joining the Corps can register for an interview at the information tables or the information session at Student Center. Interviews will be conducted Feb. 16.

According to Ostermeier, applicants can expect to wait six to nine months before they receive their assignment. Applicants should expect the assignment to last about 26 months.

People interested in more information about the Peace Corps can call 1-800-424-8580, option 1.
Interest

unconscious encouragement from teachers for men to excel in math and science, but not for women.

"Even teachers who do everything they can to unselfconsciously recognize the boys when they do well, and especially encourage them to solve the problem if they answer wrong. If a girl answers wrong, then the teacher usually says, "I'm sorry, that's not right," and moves on."

Conference Co-organizer and Associate Professor Kathy Perick-Spector said when she came to SIUC in 1981 to teach mathematics, she was the only woman in the class.

"It's gotten better," she said. "Now I'd say that my classes are a 40-60 ratio. My higher level classes are usually only 15 percent women, though."

Perick-Spector said "Horizons" is going to give young women a chance to explore the opportunities that exist for women.

"They are going to see a woman doing the experiments and solving the math. They are going to get a chance to do it themselves."

Kathy Perick-Spector
SIUC associate professor of mathematics, conference co-organizer

"I like the chance to encourage young women to be a part of science and not be afraid of science," McCorvie said.

Working in the Shawnee National Forest, McCorvie researches an area before any work is done as a highway or timber sales are started to make sure nothing of scientific interest might be destroyed.

She will be speaking to the students about archeological methods and why archeology should be studied.

Illinois Department of Education Math Consultant Joyce Kumtinger said although she does not have specific details about studies done on the difference in math and science ability in men and women, she was aware of a social problem through her own experience.

"When I was in college, I had a professor who told me I had no place in his math class because I was a woman," Kumtinger said. "But that was 20 years ago."

"My experience today shows that it's hard to get anyone, men or women, involved in math and science — at least as teachers," she said. "If you go to school and get a degree in math or science, why would you want to teach? That is the attitude we run into."

"Expanding your Horizons in Math and Science" will take place Saturday, Feb. 4, at the Student Center from 8:45 a.m. and run until 2:15 p.m. Workshops will also be held for parents of the students. Topics will range from how to encourage your daughter to become involved in math and science to how to start saving for college.
Paper moon? Fraudulent claims decrease value of college degrees

By Janet Singleton
College Press Service

On television trumped-up resumes are fertile material for sitcom humor. To nab a job as a perfunctory clerk, the lead character on the show "All American Girl" claims she has worked for the rock group Aerosmith. Fox's blue-eyed housewife Marge Simpson resumes the work place with a list of accomplishments so dazzling, she's left a serious contender for the Nobel Prize.

In the real world, credentials fraud is just as common, but university registrars aren't laughing. More and more people are lying on their resumes, and it's worth being alarmed about, said Joe Orndorff, who is one of the nation's few experts on transcript security. His Cincinnati-based company produces copy-resistant documents for universities, and he gives seminars on how to foil " wannabe" graduates and phony professionals.

He just did a survey in cooperation with 47 universities to count the number of questionable inquiries received by their records offices in September. A review of calls checking on people claiming to have either attended the schools or graduated from them, he said, revealed that 15% of the individuals could not be verified.

Among the institutions surveyed were the University of Colorado-Boulder, Indiana's Ball State and Miami University. Registrars say that a portion of unverifiable inquiries result from a caller's mistake due to a student's name or school. In the maze of letters that are acronyms for southern California's university system, there are bound to be some errors, said Karen Pelza of the records office at University of California in Los Angeles. Someone may think a job applicant reported attending UCLA, when it was actually UCSD, USC, UCSC, UCSB, or another on the spot-filing list. But registrars say most errant calls represent people who have lied to potential employers about where they've attended school or received degrees. Some impostors even shoot for the Ivy League, "We say we've never heard of this person.

"Schools like Harvard are fairly well-known and are particularly susceptible to this type of falsehood. We do take it seriously," Smith said.

"If someone out there claiming to have a degree who doesn't, it dilutes the value of real Harvard degrees. That's a problem for all universities," said the dean.

One woman who works in Yale's transcript department (who asked not to be named), says she also gets calls about phantom former students. "They pretend they've graduated when they've attended the school without graduating or they've never been here at all.

No one is sure how many false statements about degrees are never checked. But it is a toxic function in the workforce undetected.

Occasionally a fake draws media exposure due to the politics or sensitivity of the circumstances. In Denver, Joy Ching was forced to resign from Mayor Wellington Webb's office because she failed to produce the bachelor of science degree from Boston's Northeastern University that she'd listed on her resume. "The irony," Briggs Gamblin, spokesman for the mayor, said, "is a degree wasn't a prerequisite for the job.

Chang had been hired as a purchasing director when Northeastern was contacted and would not verify her claim of a degree, only that she'd taken courses.

She was given three days to produce evidence of a diploma and chose to resign. "She had the right experience," Gamblin said. "She could have had the job without the degree. It was an issue of falsification."

Another fake case left Denver's feeling a little less secure, because it centered on a phony engineer, "who was involved in the construction of the Foundation for the Embattled Denver International Airport.

Timothy Lewellen, 26, faces charges of criminal impersonation after he allegedly presented a false registration number to show he'd passed the Colorado Engineering State Examination. (Lewellen's attorney's James Stient had no comment on the case.)

Lewellen has no past criminal record and could receive anything from probation to two years in prison, according to the Denver district attorney's office.

At times, applicants to secondary or professional schools falsely report to gain admission. In late November, a federal grand jury issued an eight-count indictment against 22-year-old Jorge Chambergo for applying to the University of Pennsylvania Law School for professional schools.

Chambergo is a resident of Jackson Heights, N.Y., allegedly combined his own name with that of Dae Kyung Seo.

When providing application documents to the school, Chambergo, a resident of Jackson Heights, N.Y., allegedly combined his own name with that of Dae Kyung Seo.

Chambergo applied to Penn's law school as Dae Jorge Seo Chambergo, using Seo's social security number as his own. He then used Seo's identification to get a copy of Seo's LSAT score sent to the school.

Chambergo also submitted three forged letters of recommendation from members of the Concerned Citizens of Queens and had another from the dean of More College at Yale University, which was meant for Seo.

To make himself eligible for increased financial aid, the ambitious applicant lied about his birthdate. He also submitted a tax return on which he had written "SeoSue" next to his own name.

Chambergo has been charged with seven counts of mail fraud and one count of using a false social security number in a scheme to obtain scholarship and loan money.

If found guilty, he faces up to 40 years in prison, up to three years of supervised release and as much as $2 million in fines, according to the U.S. Attorney's Office for the Eastern District of Pennsylvania.

Chin Diver, dean of Penn's law school, says that the department occasionally receives false applications, which are usually discovered pretty easily.

"Most of the people they think have all their bases covered, but they usually don't," Diver said, adding that one department officials find a discrepancy, they forward the information to the university's general counsel.

"Unfortunately, there are a lot of people who choose to misrepresent themselves to gain access to something they have not earned out right," Colin Diver University of Pennsylvania Law School dean.

"If you want, you can sit down at a computer, crank out a transcript with above average grades, prepare a resume which is obviously inflated and create fake letters of reference."
**Food-safety testing**

**The Washington Post**

**WASHINGTON—** The Department of Agriculture announced a plan Tuesday to bring modern science to meat and poultry inspection, including requiring plants to conduct daily tests for contamination with salmonella bacteria, the leading cause of foodborne illness.

The long-awaited proposal is a major addition to the current visual-inspection system, which is widely regarded as antiquated and ineffective. Tuesday's announcement is "the most significant food-safety reform since the passage of meat and poultry inspection laws in 1906 and 1907," the department said.

Foodborne disease is a significant public-health problem in the United States, according to the USDA. Nearly 5 million cases of illness and more than 4,000 deaths may be associated with meat and poultry products each year, the department said.

**PBS funding debated**

Los Angeles Times

Republican lawmakers insist that the most popular public broadcasting shows will survive without federal support—if the stations stop giving away the store by failing to take a cut of the millions earned on licensed merchandise by producers of "Barney and Friends" and other popular shows.

Critics also point to the video earnings of producers such as Bill Moyers and Ken Burns, only a fraction of which flows back to public broadcasting coffers.

But Corporation for Public Broadcasting officials argue that their agency cannot demand a share of those revenues greater than its original investment.

"Our claim is only on CPB's share of the show, which is typically a very small part of the overall production budget," says CPB spokesman Michael J. Schoenfeld.

"The people who produce these programs take the risk. Moyers' shows typically are fully funded by outside sources. Officials say, and PBS merely pays a fee to broadcast them."

The creators of "Barney and Friends," they add, made the initial investment in the show and had an underground hit on their hands before they brought it to PBS.

Even so, CPB officials are eager to show they are not dupes. They are renegotiating the "Barney" contract, obligating the dinosaur's creators to fully reimburse PBS for its outlays on the show. And last week, the CPB board declared its intention to claim in future agreements "an appropriate share of ancillary income."

That's not enough to satisfy critics, who say that airing shows like "Barney and Friends" amounts to indirect advertising to public broadcasting should shun the profits. These critics also note that, despite its name, PBS already airs commercials in the form of "enhanced underwriting" credits, extolling the virtues of major contributors in spots that run before and after a program.

Still, the numbers that many of these critics throw out in suggesting that ancillary income could fill a $285 million federal funding gap are wildly exaggerated.

Sen. Larry Pressler, R-S.D., continually refers to the $1 billion a year that "Barney" grosses and $800 million brought in by "Sesame Street."

In fact, independent industry analysts say that "Barney" merchandise grossed about $500 million in 1993—but most of that was eaten up by cuts to toy manufacturers, department stores and the like.

"Barney's" producers pocketed an estimated $84 million, according to Forbes magazine. "Barney" was, in industry parlance, a fail, and that fail is fast fading fast.

One Wall Street analyst estimated that gross revenues fell to about $200 million last year, with only about $20 million going to the producers.

"Sesame Street" products—known as "evergreen" for their lasting popularity—gross about $300 million a year, according to analysts.

CPB officials say the nonprofit Corporation for Public Broadcasting Workshop grosses the $20 million it earns from those licenses back into the show, which does not receive direct federal funds (although critics have highlighted a $600,000 salary made by the CTW executive who used to be in charge of those licenses).

**Attendance Monitor:**

Graduate assistant Ernst Argo, from Ghana, West Africa, checks in student packets Tuesday outside a lecture hall. The packets are organized for students enrolled in innovations for Contemporary Environment. Students pick up their folders including various assignments or handouts before class, allowing Argo to mark attendance according to which folders are left behind by those absent. The students then return the packets after each class meeting.

American Music Award hosts, artists offer less-than-dazzling performances

By Kristi Deholy
Daily Egyptian Reporter

The 22nd annual "American Music Awards" hosted by Queen Latifah, LeAnn Rimes, and Tom Jones were held Monday night at Shrine Auditorium in L.A.

Nominees were determined by amount of radio air time, record sales and music trade publications. Winners were decided by 20,000 random ballots sent across the nation.

Boy II Men cleaned up with the majority of three awards in the category of Favorite Soul/R&B group. The song "I'll Make Love To You" went to the country charts last year. "Swear," a remake of artist John Davis, was awarded to newcomers AD-4-0ne, who sing "I Hate Myself," and lost to the winner of Favorite New Artist Award, but won for Soul/R&B.

Salt-N-Pepa and R. Kelly were the winner of Favorite New Artist and Favorite R&B Album, for the album "Album of the Year." Ace of Base won Favorite Rap/Hip Hop Album and "Missing You" won Favorite Rap/Hip Hop Single. The group "The Treachery of体会到 the moment, and if you missed it, you didn't miss much.

The performances for the show started with Tom Jones, Cee-Lo, Cat Power, Missy Elliott, Queen Latifah, Celine Dion, Tim McGraw, Madonna with Babyface as backup and a standing ovation performance by Boyz II Men.

The show also included a number by Black Men United, which included the likes of Keith Sweat, Litte Joe, Sisqo, Terrence Howard, and about 25 others. The show ended with a number by Black Men United, which included the likes of Ke-ke Palmer, L.A. Soldier, Silk, and New Kids on the Block. The show was not entertaining, but if you missed it, you didn't miss much.

**THROWERS**

continued from page 20

once event last year because the coaches voted it in," DeNoon said. "But, time has been well spent preparing for the events. When we roll around, we'll be on full year ahead!"

Of the Salukis' four meets this season, only the Arkansas State Invitational counted the weight throw as a scored event. SIUC finished first at Arkansas State.

"At APU, we scored a lot of points from that event tonight," DeNoon said. "That helped us break the spread. That's 28 points right there."

The Salukis can look forward to next year as they already see the implications the event may have on their team rankings.

"It would have made a difference this past weekend," DeNoon said of the "threescores" finishes of two, three, four, and four. "We might have been able to finish closer or overtake Indiana or Purdue."

A member of the team has scored a first-place finish in three out of four meets this season, the only non-scoring event being at Purdue last weekend. But domination of the rankings in the event may not come as easy next season when other teams focus more on training for the competition.

"Illinois State and Indiana State are taking this seriously, too, and those are conference rivals," DeNoon said.

Stems said the trip is proud of its accomplishments and has no problem getting the adrenaline flowing for the weight throw event, but not having an impact on team standings puts a slight damper on their effort.

"It's kind of upsetting," she said. "We want to compete because we're putting up a tough effort out there."

Stems said next year, her and Salaco's focus may shift from the shot put event, which is scored, to the 20 lb throw.

This year, though, the exhibition event has served as a way to keep the shot putters busy.

"All we had before was the shot put and then the meet was over for us," Stems said. "This new competition gives us a chance to compete in something else and give us something to work on."
St. Louis Rams considering SIUC as host for annual training camp

By Doug Durso
Huntington Register

The St. Louis Rams in Carbondale?

With the Rams move from Los Angeles to St. Louis the Southern Illinois area became geographically close to a professional football team, but nobody could have thought the team would be this close.

The Rams organization has asked the SIUC athletic department to prepare a package detailing reasons why the University would provide a good environment for the team's 1995 summer training camp.

Jim Hart, SIUC's athletic director, said the Rams are looking into various training sites and SIUC is one of them.

Hart said that having the Rams train at SIUC would be important for the school.

"It's a win-win situation for the University," he said. "First the national exposure SIUC will get because when everybody talks about the Rams they'll mention Carbondale, Illinois.

"It's a win-win situation for the University." Jim Hart
SIUC athletic director

"The Rams will also pay for the facilities that they use, so the gains are natural and public."

Some of the items the Rams organization wants to know in the video tape presentation, according to Hart, is what the dorms, locker rooms and practice fields are like, and what type and condition of turf the stadium has.

The Rams will eventually be playing in a new domed stadium, so McArdle's artificial turf would allow St. Louis to practice on a similar field.

In addition to the facilities, Hart said he feels that SIUC has other advantages of which a professional team would want to take advantage.

"We're going to push Thompson Field because it is really pretty with the lake and we have a Student Center and Rec Center, which should appeal to the players."

If the Rams organization likes the package the team will schedule an on-site visit, despite the fact that no "yeses" have been set. Hart said.

NFL training camps will open on July 14 and run through the middle of August.

Hart, who played quarterback for the St. Louis Cardinals and Washington Redskins for a total of 19 years, said that pro football folks like to get away from large metropolitan areas during training camp.

College campuses are good places to get ready for the season, because of the facilities available.

"Teams don't like to have all the distractions of being in a big city, with thousands of people coming to every practice," he said. "Big cities have a lot of distractions that can get players in trouble and not prepared for the season."

Hart expects to hear from the St. Louis organization some time in February.

Pac-10 rejects ESPN package

ESPN officials are amazed—and several Pac-10 Conference coaches were concerned—over the league's soon-to-be announced four-year television broadcasting package with Liberty Sports Network.

According to sources familiar with the negotiations, ESPN offered a 22-game schedule (11 games on ESPN, six on ESPN2) that would have paid the Pac-10 about $3 million over the next four years.

Under the proposal, the Pac-10 would have joined the cable sports network's "Big Monday" lineup, which currently shows games involving the Big East Conference, followed by the Big Eight Conference. A weekly Pac-10 matchup would have followed the Big Eight game.

Instead, Pac-10 officials and member schools, concerned about the wisdom of late-night tipoffs, chose to sell the television rights to the Texas-based Liberty, a division of Tele-Communications, Inc., which also owns Prime Network.

A formal announcement of the agreement is scheduled as soon as Liberty, which also owns Prime Sports, receives approval from its board of directors.

Financial terms were unavailable, but it was apparent that Liberty's flexibility in starting times helped convince conference members to endorse the package.

"It was a tough call," said a Pac-10 official, who requested anonymity. "There's a lot at stake because ESPN was college basketball. But ESPN is not the only player anymore."

"With this deal, the future we'll tip off is 8:30 p.m."
Freshman swimmer making waves

‘She can go as far as she wants to,’ says swim coach Mark Kluemper

By Cynthia Sheets Daily Egyptian Reporter

As a freshman, Melodie Dickerson has done what no one else on the SIUC women’s swim team has done this season. She has been clocked within the NCAA consideration time in the 200-yard freestyle event.

Dickerson said that she had never improved this much on her performance in three years, and is excited about the possibility.

She holds five Saluki bests this season in the 400-yard medley relay, 200-yard freestyle relay, 50-yard backstroke, and 100-yard butterfly.

Dickerson’s swimming coach Mark Kluemper has known Dickerson for several years, and remembers watching her swim in Kentucky, thinking she had a lot of potential.

“She’s a good all-around athlete,” Kluemper said. “She can go as far as she wants to. She has all the tools, she just has to put it together.”

One of Dickerson’s most vivid memories was when she competed before she started going off at the Junior Nationals. She false started and came when Dickerson was only 11 years old. Dickerson said, “That time sticks in my head.”

“I have been to Japan three times to visit my grandparents,” Dickerson said.

Dickerson is not the stereotypical swimmer. She comes from an international family — her mother is Japanese and her father is African-American.

“Since I was seven, I have learned how to use chopsticks,” Dickerson said. “My mom cooks Japanese all the time when I go home, and yes, I like sushi.”

Track trio throws its weights around

By David Vingren Daily Egyptian Reporter

Arguably the most productive group in the Saluki women’s track line-up is the trio of 20 lb. weight throwers, but it produces the most wasted words.

Junior Stefany Saracco, Amy Sterns and senior Nikki Wildermuth have spent this season dominating the weight throw event to the point where the greased chalk and the weight outfit is competing again with each other.

But this is the first season the 20 lb. weight throw is being offered at most meets and, therefore, is listed as an exhibition event which means points accumulated from the competition are not registered as team points.

That will change next year when the NCAA recognizes the 20 lb. weight throw as a scored event at its national meet. Further competitions that do the same including the Missouri Valley Conference meet.

In the mean time, Sterns and Saracco are readying themselves for next season, although head coach DeNoon isn’t doing the whole shoot out and anticipating the trio would have a heavy impact on team points this year.

In Men’s 200 yard medley relay, 100 yard freestyle relay, 50 yard backstroke, and 100 yard butterfly.

Dickerson said, “I started focusing on the weight and visualizing the swim and contemplating her strategies.”

“I didn’t score the 100 yards, I tell myself to keep my stroke long, smooth and efficient,” Dickerson said.

Being a versatile athlete, Dickerson played many different sports. But at the age of 11, she started swimming in summer leagues at the local pool. Not until she was 13 years old did she decide to seriously dedicate herself to the sport.

“I started to excel in swimming,” Dickerson said. “It came easily to me and I enjoyed it.”

“My brother and I started swimming at the same time,” Dickerson said. “Our mom wanted us to explore all sports, but my dad wanted me to become a basketball player.”

Originally from Kentucky, Dickerson is not the stereotypical swimmer. She comes from an international family — her mother is Japanese and her father is African-American.

“Since I was seven, I have learned how to use chopsticks,” Dickerson said. “My mom cooks Japanese all the time when I go home, and yes, I like sushi.”

Dawgs to face Tulsa, seek revenge for 3-point loss

By Grant Deady DE Sports Editor

It is pay-check time tonight for the Saluki men’s basketball squad as Missouri Valley Conference leader Tulsa visits the Athletic Complex Saturday — a game in which the Dawgs have a 12-point lead during the final nine minutes to fall, 94-91.

Tulsa is led by 6-5 sophomore Marcus Timmons, who says, “This will be a big game for us. We are a pre-season all-MVC selection after being one of the top-five freshman scorers in the nation last season on TU’s MVC Tournament. ‘Sweet Sixteen’ team that bowed out to eventual National Champion Arkansas.

Timmons, the Valley’s pre-season player-of-the-year, said he would have a good performance.”

Tulsa is led by 6-5 sophomore Shea Seals, who averaged 15 points per game against Saluki last year.

Seals was a pre-season all-MVC selection after being one of the top-five freshman scorers in the nation last season on TU’s NCAA Tournament “Sweet Sixteen” team that bowed out to eventual National Champion Arkansas.
