This Article is brought to you for free and open access by the Daily Egyptian 1938 at OpenSIUC. It has been accepted for inclusion in July 1938 by an authorized administrator of OpenSIUC. For more information, please contact [opensiuc@lib.siu.edu](mailto:opensiuc@lib.siu.edu).

NEWS—Thalman announces that the annual summer Child Guidance Clinic will begin here July 12. All Southern students have been urged to attend their county group meetings Wednesday. Parents and Teachers Conference ended yesterday. Frederica Martin, Loyalist Spanish War nurse, addresses groups on this campus and urges American citizens to support the cause of democracy in Spain. Heidelberg Singers give successful concert. The S. I. N. U. Chamber of Commerce will sponsor a full length sound movie Thursday night in the Shryock Auditorium. Bowen elected chairman of social studies division of college. Kappa Phi Kappa initiates eight into fraternity. Pulliam gives two addresses—one at Murphysboro and one at the Giant City CCC Camp. Vernon Peak supplies music for All-Campus dance Wednesday evening. Martha Scott to teach at Stanford University in San Francisco. Forty-five faculty members visit Cape Girardeau campus.

FEATURES—Pamberton discovers reason for calling Heidelberg Singers "Heidelberg". Wilhelm interviews Frederica Martin and gets new slant on the civil war in Spain. Oxford, former staff writer, writes from Tennessee Academy of Science at Realfoot Lake, Tennessee. Student protests in Student Opine against editorial treatment of the Giant City Park lodge. Local Lit. Lites longer. Hobbyists column contains interesting historical item this week. Alumni column regular.

EDITORIAL—concerning our share of conferences. another "thought-provoker".

SPORTS—intramurals grow more interesting as Kappa Phi Kappa vacates the collar position in favor of the Purple Raiders. The Wildcats score a 10-4 victory over the Orioles. W. A. A. sponsors ping pong and horse-shoe tourney. Miles participates in golf tournament. First football game of coming season will be September 30. statistics on intramurals—some compiled by Beyer.

Gracie Is Slipping

Last week-end Gracie's country boy friend took her out to the farm for a visit. Gracie had been gathering the eggs and helping with the chores when suddenly she came upon several milk bottles in the back yard. "Oh, look here!" she exclaimed. "I've found a cow's nest!"

Are University Degrees Preposterous?

A new battleship, a new airplane, a new radio is always an improvement upon its predecessor, according to H. G. Wells, but a new university is just another imitation of all the old universities that have ever been. He says our universities are floating above the general disorder of mankind like a beautiful sunset over a battlefield.

These critical comments came forth because he attended the centenary of his own university, the University of London, where the learned professors who came from many countries dressed up in some colorful imitation of a costume worn centuries before.

The thought came to Mr. Wells then that when it came to the director of human affairs all the universities, all these nice refined people in their lovely gowns, all this visible body of human knowledge and wisdom, have far less influence upon the conduct of human affairs than (we're not sure he's complimentary in this) an intractable newspaper proprietor, an unscrupulous group of financiers or the leader of a recalcitrant minority.

"We have," he says, "made hardly any changes in our conception of university organization, education, graduation for a century—for several centuries. The three or four years course of lectures, the bachelor who knows some, the master who knows most, the doctor who knows all, are ideas that have come down unimpaired from the Middle Ages. Nowadays no one should end his learning while he lives and these university degrees are preposterous."

Not having called the universities enough names in the previous sentences, he says that the new university is just one more mental gilt-coach in which minds take a short ride and get out again. Mr. Wells goes on to say that the universities go on to meet the tremendous challenges of our social and political life like men who go out in armor with bows and arrows to meet a bombing airplane.

Possibly, we might dismiss Mr. Wells as a mere writer, but when we find that men like President Hutchins of the University of Chicago and other leading university men are thinking along the same lines, we who are interested in the training of our young people must at least listen and do a little thinking ourselves.

What Mr. Wells wants is an adequate knowledge organization so that we shall know with some certainty more than we know now about matters that have already been thoroughly explored and worked out.

Our English author suggests what he calls a World Encyclopedia. He doesn't think of this as a row of volumes, but "as a sort of mental clearing house for the mind, a depot where knowledge and ideas are received, sorted, summarized, digested, clarified and compared. It would be in continual correspondence with every university, every research institution, every competent discussion, every survey, every statistical bureau in the world. It would develop a directorate and a staff of men of its own type, specialized editors and summarists."

Well, there, we've told you enough now to stimulate your imagination. Go ahead and do your own intricate thinking.—Linotype's Shining Lines.

CHILD GUIDANCE CLINIC HERE JULY 12-14

Sukov, Clemence, Dulsky, Speakers; Thalman Chairman

The Southern Illinois State Normal University will hold another of its three-day Child Guidance Clinics on the college campus July 12-14. Three members of the professional staff of the Chicago Institute for Juvenile Research who will be here for the clinic are Dr. Marvin Sukov, psychiatrist; Dr. Stanley Dulsky, psychologist and Miss Esther Clemence, psychologist social worker.

The clinic will be opened on Tuesday afternoon at 1:45 o'clock by Dr. Dulsky, who will conduct a forum on the subject of "Vocational Guidance as Related to the Problem Child." This session of the clinic is open to the student body and faculty.

On Wednesday afternoon, seminars will be held for the practice teachers from the Allyn Training School and from the University High School. At each seminar, which will be in charge of one of the members of the professional staff, several case studies made by some of the practice teachers will be reviewed and discussed. Following the discussion of the case, suggestions for remedial measures to be used in the case will be made. It is the aim of the clinic staff to familiarize the students with the types of psychological problems they will meet in teaching and to give them an idea of how to go about correcting them as well as to benefit immediately the children brought in for diagnosis.

During the days the clinic is in session, the professional staff will study the more detailed cases which are being brought here from other towns and from other S. I. N. U. practice schools. These will receive special consideration and each case will be properly staffed.

The members of the clinic are Dr. W. A. Thalman, chairman; Dr. Marie Hinrichs; Miss Florence Dennis; Mr. Douglas Lawson; and Mrs. Wanda Ginn. Dr. Thalman, chairman of the clinic, has recently become a member of the Illinois Society of Consulting Psychologists.

Enough requests have already been received to complete the schedule of cases to be studied at the next clinic, which will be held October 26-28.

BOWDEN IS CHAIRMAN OF SOCIAL SCIENCES

Segal, Wright, Brainard, Swartz Also Named

At a meeting last week of the members of the social science division of S. I. N. U., Dr. R. D. Bowden, head of the sociology department was selected as secretary.

At this meeting, Mr. John R. Wright, history instructor and Dr. Henry Brainard, head of the economics department, were chosen to represent S. I. N. U. in the discussions in the social science department at the biennial meeting of the teachers' college faculties. The meeting will be held at Springfield this fall.

Dr. Willis G. Swartz, head of the political science department, will continue as senator of the social science division for another year.

University High Students Receive Shorthand Medals

Joy McIlrath and Dorothy Bastien, members of last year's advanced shorthand class at the University High School, have just received gold medals from the Credential Department of the Gregg Writer. The medals were given to them for passing the shorthand dictation test at 140 words per minute.

The girls were further honored at the University high commencement exercises by being awarded Rotary Citizenship medals.

DRAMA

Photo of a scene from the Little Theatre production "Petrified Forest" which was repeated among other leading American university productions in the July issue of Theatre Arts Monthly, national dramatic publication. The sets were designed and executed under the direction of Miss Dorothy Magnus.

Five Sound Motion Picture Films Will Be Presented by the Chamber of Commerce Next Thursday Night at Auditorium

Next Thursday evening, July 7, the Chamber of Commerce of S. I. N. U. will present a sound motion picture show at 8 o'clock in the Shryock Auditorium. The picture will be free of charge, and will be open to the general public. The program will be better and more inclusive than the one held on the campus during the last academic year when more than 2000 people witnessed the great Boulder Dam construction work. The program will be composed of five pictures. "Paths in Palestine" will show views of the River Jordan, the Sea of Galilee, Jerusalem, Bethlehem, and scenes of the Crucifixion. This picture will be furnished by the U. S. Government. "Materials" is a very educational and entertaining picture which was produced at a cost of \$58,000 incidentally, while the show was in Washington, D. C. congress adjourned to view it. "Trees to Tributes" will relate the history of the manufacture of paper from wood and the making of a modern newspaper. "Wonder World of Chemistry" will also be presented as well as a technicolor picture to "top" the program.

GOWER, SOUTHERN ALUMNIUS, RECEIVES DOCTOR'S DEGREE

Carl Gower, an alumnus of S. I. N. U. and a native son of Carbondale, was one of two men to receive the doctor's degree at Northern State University this spring. Dr. Gower, who is only twenty-six, received his degree in zoology at the commencement exercises at Lansing about two weeks ago.

Dr. Gower is the son of Mr. and Mrs. Roy Gower of Carbondale. He was graduated from the Community high school and entered college at S. I. N. U., graduating in 1932 after having been in school three years. Taking honors in music and geology, Dr. Gower played the first concert in the college band for five years, one of these years as a high school student. After he graduated from college with a Bachelor of Education degree, he tried to find a satisfactory position. Being unable to do so, he came back to Carbondale and has played with the college band. In 1933 Dr. Gower received an assistantship at the University of Louisiana. He stayed there one year and in 1934 went to the University of Illinois. The next two years he worked at Michigan State, also studying in the band and orchestra which was a gift of W. K. Kellogg of Battle Creek, Michigan. Dr. Gower's doctor's dissertation was finished and accepted by Christmas, 1937.

Dr. Gower is now a member of the conservation department of the state of Michigan. He is actively engaged in the state aiding in the conservation of wild life. His work includes hunting bears, deer, and trout; various diseases which are found to exist among the wild animals of Michigan.

NOTE All students are requested to attend meetings of their respective county groups next Wednesday at chapel hour. Names of the county group sponsors and the places of meeting will be posted on the auditorium bulletin board.

LENZ ATTENDS ROTARY INTERNATIONAL AT SAN FRANCISCO

Mr. Eli G. Lentz, dean of men and member of the history department here, has been attending the International Rotary convention at San Francisco this week. He went in the capacity of District Governor of the southern part of Illinois.

SPANISH WAR NURSE SPEAKS HERE; LOYALIST

Organizes Medical Bureau To Aid Spanish Democracy

A local unit of the "Medical Bureau to Aid Spanish Democracy" was organized last night at a meeting of faculty members and townspeople in the Little Theatre room. The meeting was the result of a talk Monday evening at the Roberts Hotel by Miss Frederica Martin, head nurse of the American hospitals in Spain.

The purpose of the organization is to secure funds to relieve suffering in Spain and to distribute information as to the true situation there. According to Miss Martin there is the great danger of Fascist nations destroying the democracy of Spain as well as sweeping away other republican nations in Europe.

The various units of the Medical Bureau will attempt to lift the United States embargo, this will give France the necessary justification to send aid to Loyalist Spain.

"The lifting of the embargo will not involve America in warfare," Miss Martin pointed out, "but will merely enable the Loyalist forces to fight back at Fascist enemies."

The Fascist forces are now planning to win the war by a blockade, as no other method has yet worked. This failure, Miss Martin said, was true in spite of the great odds against the Loyalist forces.

Forty-Five Faculty Members Visit Cape

About forty-five members of the college faculty and faculty wives were guests of the Cape Girardeau chapter of the American Association of University Professors at tea Sunday morning. Members of the Southern Missouri Teachers College staff took the Carbondale guests on sight-seeing trips to Cape Rock and other points of interest. A tour of the buildings on the campus was another feature of the visit.

Miss A. Eadyne Mangle, dean of women, was in charge of the Miss Mary Entsminger had charge of transportation to Cape Girardeau.

Students Play At Valier Concert

A trio composed of Billie Ruth Gill, Bill Davis, and Mr. Wendell Margrave, instructor in the music department here, played at Valier Friday night. The trio made up part of an open air concert which was directed by Lloyd Atwood, an alumnus of this school and director of the Valier high school band.

Several soloists appeared on the program, and among them was Ulysses Brannan, student at S. I. N. U., who played two trombone numbers. Mr. Margrave also appeared on the program as a soloist, playing two selections on the piano.

Lloyd Cox, another alumnus of Southern, now director of the band at hand in playing a march.

Scott And Lentz Receive Honors In Local Lodge

Dr. R. A. Scott and Dean E. G. Lentz were honored by the honorary officers of the Carbondale Knights Templar Monday night. Both are members of the faculty of S. I. N. U. Mr. Lentz was made prelate and Dr. Scott hermit of the lodge.

PARENT-TEACHER CONFERENCE ENDS HERE

Jackson, Graf Representative; Buford Also Here

Two representatives of the Illinois Congress of Parents and Teachers spent Tuesday, Wednesday, and Thursday on the S. I. N. U. campus. They were Mrs. Edward Jackson, who inaugurated the P.T.A. conference here two years ago, and Mrs. Leonard Grant, state Summer Round-up chairman.

Superintendent A. Lester Buford of Mt. Vernon, state chairman on co-operation with Illinois Educational Association, was present on Tuesday to take part in the various meetings and conferences.

Conferences were carried on with students at any hour convenient to them. Plans for the organization of Parent-Teacher Associations and special problems pertaining to local situations were discussed. These conferences were held each day, in the old science building. After dinner meetings, held each day, were open to the public and included round table discussions.

In the chapel period Tuesday Mrs. Jackson, Mr. Buford, and Mrs. Graf presented the general plan of the Illinois Congress. Mrs. Jackson in her address defined the P.T.A. as an organization of "social service, civic virtue, and patriotism." Superintendent Buford spoke on the topic "The Value of the P.T.A. to Teachers." Mrs. Graf the last speaker, reported the work of the Summer Round-up which arranges for physical examination of all children who will enter school in the fall.

Tuesday morning Mrs. Jackson and Mrs. Graf spoke to students of Dr. Thalman's 310 education class. This class studies principles of secondary education in a two-hour week, and Mrs. Jackson spoke to the class on "The Mechanical Organization of Parent-Teacher Associations," and Mrs. Graf discussed the summer rallies which are a part of the active organizations' community programs.

KAPPA PHI KAPPA INITIATED EIGHT LAST WEEK

Swells Membership Of Alpha Upsilon Chapter to 258

The Alpha Upsilon chapter of the United Fraternity, through its membership total up to 258 by the initiation of eight new members at their regular meeting June 23. Incidentally forty-eight new members have been admitted during the past academic year.

Those initiated were Dr. Melvin Smith, Florence Ashley, Harold Kaiser, Thomas Newton, class of 1939, coach at Fairfield high school and present director of the NYA residence home here in Carbondale; Charles O. Baudert, Mt. Vernon; Jerry Fugate, Rutland; Robert Gallagher, Galesville; Raymond H. Ashby, Harold Kaiser, Summerville; and Whitard A. Kerr, Brookport.

Kappa Phi Kappa has enjoyed a steady and consistent growth since its beginning in 1922 until there are now forty-seven active chapters, three of which are in Illinois. The total membership is somewhat in excess of \$600. The local chapter was established at S. I. N. U. on May 14, 1932, those most instrumental in its founding being Dr. Bruce Merwin, director of the training schools, Clarence Arnold, Richard Watson, and Clarence Kiechhofer.

Vernon Peak Supplies Music For All-Campus Dance

Vernon Peak and his orchestra supplied the music for the first summer all school dance which was held in the Little Theater Wednesday evening and was well attended. The program included a "gay acquainted" hour before the dance began. Refreshments were served at the close of the dance.

# STUDENT LEADERS CITES NEED OF CONFERENCES

## Educators Emphasize Clinical Adjustment of Behavior Problems

Officers of the Nation's leaders in child guidance and adjustment attended a "Conference on Clinical Adjustment of Behavior Problems of School Children" held in the Office of Education, Department of the Interior, June 8 and 9, at the call of John W. Studebaker, Commissioner of Education.

The conference was held for the purpose of studying how school systems throughout the United States are organized for diagnosing and treating behavior problems of boys and girls, and also for the purpose of learning how the Office of Education may help school officials and teachers in cities of all sizes to develop or to improve this type of service.

Specific questions discussed at the two-day meeting included the following:

1. What is a desirable organization for a child guidance clinic operating under the direction of the board of education?
2. What services are available from clinics operating under auspices other than those of the board of education?
3. What clinical staff is essential for the successful operation of the clinic?
4. What are some of the most effective methods of procedure in referring, treating, and following up cases?
5. What types of behavior difficulties are most amenable to clinical adjustment?
6. How can community resources be coordinated for an effective program of child guidance?
7. How can teachers participate in the activities of the clinic?
8. How can the principles of child guidance emphasized in the clinic be transferred to the classroom?
9. What is the relationship of the clinical activities of the school system to the general guidance program, and to the program of special education?
10. What special projects have proved successful in individual localities?

Commissioner Studebaker, commenting on the conference and on an address recently held in the Office of Education to discuss problems of blind, deaf, socially maladjusted, and girls in the United States, said: "These conferences have brought together representative leaders in their respective fields. Their major interest is the proper care and education of physically, mentally, or socially handicapped children. In each workshop, we have pooled the best thinking in this country in an effort to get a clear picture of the outstanding problems faced by schools and cities in the education of boys and girls who are blind, deaf, and socially maladjusted, or those who need special guidance or adjustment because of abnormal behavior. From these leaders we have gained invaluable information which the Office of Education will now use to help schools and clinics in cities, towns and rural districts throughout the nation to plan and to develop better services for the child who is abnormal in physical or mental health."

## Chemists Discover New Local Anesthetic

Omaha, Neb.—Two scientists at the University of Nebraska medical college have announced discovery of a new local anesthetic, "more pleasant and safer than many administered to-day."

The drug has a heady little label—D-ethylaminocetyl-4 ethoxy benzate—and for four years has been the subject of research and experimentation on the part of Dr. A. R. McIntyre, chairman of the department of physiology and pharmacology, and R. F. Stevens, an advanced student working under a fellowship.

Scientists say the new product deadens pain immediately after injection, whereas other drugs often take several minutes. It is sometimes effective as long as 90 minutes.

It has been used in 100 dental surgery cases without an unfavorable report.

## BADGETT TO HEAD CHEMKA FALL TERM

Chemeka, honorary chemistry fraternity, at a recent meeting elected Charles Badgett, president, Thomas Barson, vice-president; Fred Roberts, secretary-treasurer; Melvin Hentze, sergeant-at-arms; Paul Winter, chaplain.

The officers are elected every term. The fraternity meets the first, fifth, and ninth weeks of each term. At these meetings in addition to the fraternal ritual papers on chemistry are given by members of the fraternity. Usually the fraternity sponsors a chemistry show, and alternately, a chemistry inspection tour. The latter includes a two day inspection tour of some industrial field. Chemeka has visited Monsanto, and St. Louis Chemistry majors are invited to go on these trips.

The name of the fraternity has a rather interesting origin. Eke is a Greek word meaning to discover unknown facts. So the name became Chemeka meaning that the members are trying to delve into facts unknown to the general public.

Each spring the fraternity holds an open house.

## Group Goes To Many Opera

Thirty-one persons from S. I. N. U. made the trip to St. Louis on Friday to see "White Horse Inn." The group went in a bus which left Cambridge at five in the afternoon and returned late that night.

Faculty members who accompanied the group were Miss Gladys Williams, Mrs. Julia Neeley, Dr. Sina Mott, and Miss Mary Entaminger.

## Bradham, Gray Secure Positions

Miss Mable Bradham, student, and Mr. Rocco Gray, alumna of this college, have received appointments to teach at Browns, Illinois next year.

Miss Bradham will teach in the grade school and Mr. Gray in the high school there. The latter will also act as coach at Browns. He graduated from S. I. N. U. this spring with majors in English and mathematics.

Bodogins boil pulverized coffee in their largest pot, decant the liquid into the next largest and again boil it, and so on down to their smallest pot, in which the coffee becomes so strong that only a few drops are served at a time.

In Freiburg-in-Breisgau, Germany, merchants bring trout to the housewife's door, swimming in a bucket of water. They say the purchase with a potato masher.

## LOCAL LITERARY LITES

By J. B. SPEAR

"About three years ago I began taking miniature pictures I hadn't touched for a sort of camera for fifteen years since the time when, for no good reason, I laid aside my Graflex and forgot about it. In those days I had taken pictures, developed and printed them, and made a few enlargements. But some how I got interested in other things. In the interesting years I forgot most of the things I ever knew about photography," so starts Mr. Simon in his introduction of MINATURE PHOTOGRAPHY, a new book at the public library. This same book tells the type of film to use, how to load your camera correctly, what kind of film is best for the various types of subjects, and many other equally important details that confront the average individual with a new camera. This book also contains 33 full page illustrations of "good photography."

Mr. Simon goes on: "... If your camera budget is limited at \$10 or \$25 you will be better advised to buy a

3 1/4 by 4 1/4 camera of the folding type.

"One of the tremendous appeals of miniature photography is the fact that you can make a tiny negative so perfect that it will make a huge enlargement—a thing of joy and, in some cases, beauty."

Other material in the public library for the candid camera fan includes PHOTOGRAPHY by Mees, MAKING PICTURES WITH THE MINATURE CAMERA by Deschler, The U. S. CAMERAS 1935, 1936, 1937 (books of the best pictures taken that year), and LIFE.

The number and size of his coffee pots measures the prestige of a Bedouin sheik. Coffee-making among the Bedouins is a public ceremony requiring the use of many containers of different sizes.

## RESIDENTS OF ILLINOIS TALKS TO ROTARIANS ON HIGHER EDUCATION

President Roger Pulliam of the Southern Illinois Normal University was the speaker at the regular meeting of the Washington Rotary club Tuesday evening.

Mr. Pulliam chose for his theme "Higher Education" which he said was his classification as a member of the Cardinals Rotary club.

The speaker outlined the changes that had occurred in higher education in the last 30 years. Formerly the list of studies was limited and many so-called "cultural" subjects were included. The modern tendency is to greatly widen the curriculum and to make each study justify itself from a utilitarian standpoint.

Mr. Pulliam stated that some idea of the breadth of the curriculum might be gained by the statement that the number of libraries for students was established recently, more than 40 titles were included. These represented only the books that were in rotation use on the campus as textbooks.

The speaker then stressed the importance of the research facilities at colleges and universities. He cited one or two discoveries that had been made, such as the method of treating glass in the event of crystallization and the use of limestone on farming land. Both of these discoveries were made at the University of Illinois, and given to industry and agriculture free.

"It is impossible to estimate the value of the steel discovery alone," he said. "Formerly an automobile axle was good for only a few thousand miles. Now it can run 100,000 miles in safety. That discovery alone was worth literally hundreds of millions of dollars, and the men who made it were some college professors who probably never saw more than \$5,000 a year and they got nothing for it."

"Then who can estimate the value of the discovery of insulin, made by two professors at the University of Toronto?"

The speaker pointed out that the value of higher education must include this research work and must also include the tremendous benefits conferred on mankind by giving these restless, energetic, ambitious and capable young men and women a proper outlet for their activities.

"The college," he said, "offers these ambitious young people a chance to rise in the world. If we didn't have higher education we would still have these restless and ambitious young people who would soon become the leaders of discontented and revolutionary factions in our nation."

## DEPARTMENT OF AMERICAN CIVILIZATION AT PENNSYLVANIA

PHILADELPHIA, PA.—The University of Pennsylvania has created a department of American civilization to train students who wish to specialize in the development of social and cultural institutions.

The course deals with American literary, political, social and economic history, and is described as being in line "with the modern trend in education which breaks down when necessary the traditional limits of university departments of instruction in order to meet the real needs of students."

One of the features of the course will be the stressing of the qualities of ideas and means of determining the rightness or wrongness of these ideas. "When authorities flatly contradict each other or perpetuate errors as history, a university which

## W. A. A. SPONSORS PING PONG AND HORSE-SHOE TOURNAY

### New Handbook Being Prepared; Varied Activities

W. A. A. activities are under way. Ladder tournaments in ping-pong and horse-shoe were opened at the meeting Tuesday, and the two sets already mentioned have been made to date. Any girl wanting to enter for practice may do so by placing her name on one of the rungs of the ladder which is posted in the girls' gymnasium. Matches may be challenged at any time between either of the two sets already mentioned on the ladder. These matches may be played whenever it is convenient to do so. Winning two games out of three decides the match. The winner may take the place of the defeated player on the ladder, the object being to win the top place on the ladder.

An elimination tournament will be played later. Similar tournaments in other recreational sports are to be held later.

Informal discussion was held of the plans for other activities including an outing and possible swimming parties to win the top place on the ladder.

An elimination tournament will be played later. Similar tournaments in other recreational sports are to be held later.

## MARTHA SCOTT TO TEACH AT STANDORD UNIVERSITY

Miss Martha Scott, a member of the Poetry Department here, has been granted a teaching fellowship at Stanford University in Palo Alto, California, for the coming year. She will teach classes in biology three afternoons a week besides doing work on her doctor's degree under Dr. Danforth, outstanding geneticist and endocrinologist.

## Games Played In Ping Pong Tournay

In class tournaments of ping-pong played this week high scores are held by Emma Mazer, Helen Lucas, and Laura McKinis. Final scores will be had next week. Class tournaments in tennis will be started later.

At New, on the French Riviera, beach policemen carry measuring sticks, which they often apply, to see that women bathers do not show too much of their legs.

It is older than the nation itself has a duty to present the truth from the liberal rather than from a Tory or a radical standpoint." one of the course leaders stated.

## Many Presidents Came From Small Colleges

Students at smaller colleges can take heart from the fact that some of the less widely known institutions gave the country a number of presidents. Dickinson College, for example, produced President Buchanan; Hampton-Sydney, William Henry Harrison; Union, Chester A. Arthur, and Allegheny, William McKinley. Rufus B. Hayes attended Kenyon before going to Harvard for his law course.

To get down to the record, however, here is a list of the presidents of the United States and their respective colleges, if any:

George Washington, none; John Adams, Harvard; Jefferson, William and Mary; Madison, Princeton; Monroe, William and Mary; John Quincy Adams, Harvard; Jackson, none; Van Buren, none; William Henry Harrison, Hampten-Sydney; John Tyler, William and Mary; James K. Polk, University of North Carolina; Zachary Taylor, none; Millard Fillmore, none; Franklin Pierce, Bowdoin; James Buchanan, Dickinson; Lincoln, none; Johnson, none; Grant, West Point; Hayes, Kenyon College and Harvard; James A. Garfield, Williams; Chester A. Arthur, Union; Grover Cleveland, none; Benjamin Harrison, Miami University; William McKinley, Allegheny; Theodore Roosevelt, Harvard; William H. Taft, Yale and Cincinnati Law School; Wilson, Princeton, Virginia and Johns Hopkins; Harding, Ohio Central College; Coolidge, Amherst; Hoover, Stanford; Franklin Roosevelt, Harvard and Columbia Law School.

Paul F. Davis, who in 1937 obtained the limited elementary certificate, is teaching the seventh grade in the Rogation elementary school.

## Pharmacists Discover New Weed Antiseptic

Lincoln, Neb.—A new antiseptic derived from a weed so lowly Western Nebraska farmers do not deign to name it, has been discovered by Dr. J. B. Burt, chairman of the Nebraska University pharmacy department.

The new drug, chloromethacrycol, gives great promise, according to Dr. Burt, as a possible treatment for such skin diseases as athlete's foot, ring worm, psoriasis and impetigo.

The antiseptic is made from a milk-like weed which grows profusely in Western Nebraska. Farmers there have no special name for it, except mint, but consider it a pest because its flavor is unpalatable to livestock.
