THE Egyptian

SOUTHERN ILLINOIS UNIVERSITY

Carbondale, Ill., July 6, 1951 * Vol. 33, No. 2 * Single Copy 5c

THE STUDENT CENTER is now in full operation with the installation of lights. New hours are from 8 a.m. till 9 p.m. daily except Saturday and Sunday. The Center will not be open at all on Saturday, but will have its doors open from 4 a.m. till 8 p.m. on Sunday.

Open House was held in the New Student Center May 31 and since then many organizations have made use of the building. A lounge and kitchen is located in the front part of the building, but the kitchen is not in operation as yet.

The Center has a music room which is to be glassed in, a ladies lounge, Student Center office, Obelisk office, a group of organization meeting rooms, modern rest rooms, and two telephone booths.

Future plans call for an enclosure between the barracks housing the Center and the barracks on the east. This would make possible other facilities such as game rooms and dance floor.

July 12-13 Set For Post War German Film Ed Conference Slated for Next Week

A two day Education conference will be held in the Little Theatre July 12 and 13 beginning at 8:30 a.m. The conference is sponsored by the department of education, department of guidance and special education, division of University extension, and Illinois Congress of Parents and Teachers.

The first day's conference will deal with the exceptional child. Parents and Teachers as Partners will be the theme for the second day.

Marshall S. Hiskey, chairman, department of guidance and special education, will preside at the conference on Thursday, July 12. Dr. D. W. Morris will give the welcome. Mrs. T. H. Ludlow, president, Illinois Congress of Parents and Teachers, will be the keynote speaker on Friday, July 13.

Topics for the first day include: "PTA and the Exceptional Child", Mrs. Roy Ide; "The Preface to a Life", Ill. Department of Health; "New Horizons for the Mentally Retarded", Jane Bull; "State Programs for Deaf and Hard of Hearing", Martha Black; "Opportunities for the Blind and Partially Sighted", John Nebo; "Hints for Parents and Teachers with Speech Handicapped Children", C. W. Garbutt; "Misconceptions Concerning the Epileptic Child", Dr. Herbert Kobes; "Special Education for Exceptional Children", Martha Black; and a play, "Scattered Showers", Speech department.

Program for the second day is as follows: Keynote address by Mrs. T. H. Ludlow; Panel—"What are the programs, projects and services of PTA?"; Dr. Claude Dykhouse, chairman, Mrs. Marian Harriess, Mrs. T. H. Ludlow, and Rowe M. Right; "Recent Trends in Home-School Relationships", Ethel Kavin; "The School and PTA Working Together", Clyde Winkler; play, "High Pressure Area", Speech department.

Detailed programs for the event may be obtained at the Extension service office or the Egyptian box in the crosshalls of Old Main.

This event has been scheduled for a summer meeting so that them for study might be able to school teachers returning to Southeast.

"Murderers Among Us" will be shown free of charge next Wednesday, July 11 in the stadium at 8 p.m.

The film, made in 1947, is a German movie with English subtitles. This psychological drama offers an analysis of the conflicts in the minds of the German people as they emerge from the war. It involves their attitudes toward each other and toward the question of morality in a postwar world.

The last two films to be sponsored free of charge by Audio Visual Aids and the Lectures and Entertainment committee are the "Well Digger's Daughter," French film with English subtitles, to be shown July 18 and "Fame is the Spur" to be presented July 25.

To date the following films have been shown: "It Happened One Night," "Stone Flower," "The Road to Heaven," and "Revenge."

Southern Has 568 Commuters

There are 568 students commuting this term, according to statistics compiled by the Housing office. A break-down of this number shows that there are 240 women commuters and 328 men.

Golconda which is 62 miles from Carbondale is the farthest commuting point, Murphysboro with a total of 74 has the greatest number of commuters.

Art Instructor Studies in Greece

Miss Lulu D. Roach, assistant professor of art, who has been on leave, sailed for Europe on the S. S. Nea Hellas, June 11. Miss Roach will study in Athens, Greece under Dr. George E. Mylonos, American School of Classical Studies. She is the member of a group studying under the auspices of the Greek government.

Prior to her departure, Miss Roach was studying at Washington university.

Summer Enrollment Reaches 1,800 Gov. Stevenson To Talk at Open House For Training School Building Nov. 16

Enrollment of Southern has now reached a total of 1800 students for the summer term. In addition to this figure 164 persons are registered in the Vocational-Technical Institute. Enrollment will also be increased by persons registering for short summer courses which have not started as yet.

Men still out-number women on the campus. This summer, there are 937 men and 863 women taking courses. A break-down of enrollment by colleges shows a total of 1,040 in the college of education, 189 in liberal arts and sciences, 187 in vocations and professions, and 384 in the graduate college.

Besides the 384 students taking graduate work at Southern, 44 persons are taking post-graduate courses. The senior class is the largest class this summer with 421 members. There are 374 juniors, 309 sophomores, and 268 freshmen.

Southern Collects \$180 For WSSF

According to Jan Mayer, WSSF chairman, \$180 was collected from Southern's students for the World Student Service fund.

Although the goal of the WSSF organization was not met, the total funds collected will mean mimeograph machines, books, medical and food services for foreign students.

New Freshmen Are Guests at Supper

A supper for new freshmen was held at the Student Center last night. The event was under the sponsorship of the Student council and the Social senate. Cold watermelon was the featured dessert.

After the supper the guests were taken to the Sing and Swing club or to the movies.

Governor Adlai E. Stevenson has been invited to speak at the open house celebration November 16 of the new Southern Illinois University Training School building, according to Dr. Douglas E. Lawson, SIU chairman of the open house planning committee.

STUDENTS TO GET DEGREES ASKED TO SEE REGISTRAR

All seniors and graduate students who plan to receive degrees at the end of summer term are requested to call at the Registrar's office and apply as soon as possible, if they have not already done so, according to Marjorie Shank, registrar

Play Date Set For July 26

"Family Portrait," the summer play has been set for Thursday, July 26 at 8 p.m. in the Stadium.

The play, depicting the life of Christ's relatives, was written by Lenore Coffee and William Joyce Cowen. The unusual feature of the play is the fact that Christ's family acts and speaks as ordinary people of today.

LINDEGREN, SPEAKER AT SYMPOSIA IN ENGLAND

Dr. Carl Lindegren, chairman, microbiology, left for England June 13 to speak before the Symposium of Experimental Biology to be held July 9. His subject is "Yeast Genetics."

Dr. Lindegren is in Bristol England at the invitation of the British government. He is expected to return to Southern after the Symposium closes, July 10.

OBELISKS AVAILABLE

Students who were in school 1950-51 may still receive their 19-51 Obelisks at the journalism office, second floor of the journalism building, between 8 a.m. and 4 p.m.

Governor Stevenson's speech will climax a program of pageants, speeches, and tours in observance of the opening of what is believed to be the finest training school building in America. The building will house the entire University school, from nursery school through the 12th grade, with a capacity of 500 pupils. It will be used primarily as a laboratory for SIU students in training as future teachers. It is one of several buildings authorized by the 1949-51 General Assembly in the SIU \$7.1 million physical plant expansion program.

One of the two remaining log school houses in Illinois will be restored and erected on the training school grounds for the open house. Called the Cherry Valley School, it was originally located near Shiloh in St. Clair county and is known to have been in use in 1847. A pageant will be enacted comparing school methods of 100 years ago with those in the modern training school.

Educators from throughout the country will be invited to Southern Illinois University to participate in the open house celebration.

Student Center Holds Open House July 19

Student Center will hold its summer Open House, Thursday, July 19 from 7:30-10:30 at the Student Center.

Dancing and card games will make up the entertainment, and refreshments will be served.

In addition to entertaining the students, it is hoped that this open house will also acquaint the students with the campus and the Student Center.

Ind. Ed. Department Presents Gavel To House Speaker

A gavel made by several members of the Industrial Education department was presented to Warren Wood, Speaker of the House of Representatives in Springfield, on Wednesday, June 27. Senator R. G. Crisenberry, made the presentation.

The gavel, made of Southern Illinois walnut, banded by nickel silver, was designed by John Gunderson, industrial education instructor. The actual making of the gavel was done by Harold Kissack, student, and Richard Kohler, instructor. Inscription on the gavel reads: "Honorable Warren L. Wood, Speaker, House of Representatives, 67th General Assembly, Plainfield, Ill."

Senator R. G. Crisenberry (left) presents a gavel made by members of the Ind. Ed. Dept. at Southern to Warren L. Wood, Speaker of the House of Representatives in Springfield, June 27.

Weeding Out Process

A grading system is set up, according to our understanding, to show a person where he stands in relation to others, or in relation to where he would stand if both exceptionally brilliant and exceptionally slow persons were in the class with him.

If this is true then a person receiving a higher grade than he deserves has been done an injustice, for he is then encouraged to form a false impression of his intellectual powers.

He would come to judge himself as academically superior, when in actuality he might be only average or even below average. Then at a later date when he would be subjected to competition with the truly superior person he would be at the double disadvantage of being inferior without realizing his handicap.

If, on the other hand, he had been graded according to his true merits, he would at least realize his position and could be prepared to combat it with additional effort.

Case after case of frustration and maladjustment can be attributed directly to the cause of persons getting an early and overrated false impression of their abilities.

It seems then, that one of the most important functions of an institution of higher learning is that of weeding out by telling the brutal truth to those who do not have the innate ability to carry college work or to compete with those who do have the ability to successfully obtain a college degree.

Few will deny the possibility of the human factor entering into the grading system of a college or university. Unjustly low grades might be given due to personality conflicts between the instructor and the student, but these cases are surely in the minority.

Our contention is that much more lasting harm can be done by a teacher who consistently gives higher grades than deserved by one who allows himself to occasionally be swayed by personality conflicts in giving a lower grade than deserved.

One faculty member has suggested a very interesting experiment. He proposed to guarantee all members in any given class an automatic final course grade of "A", and then observe the resulting efforts of the individual class members. It would seem that if ever superior persons would come to the fore it would be in a situation of this type. The only trouble would be the lack of a method to recognize and reward the better work done by the superior students.

The question of a grading system is one that has been discussed from every angle. Various proposals have been made, among which is a system that would grant only failing and passing grades with no sliding scale of middle grades for comparison.

Some of the departments at Southern have been criticized for a low grade point. It is suggested that the persons who criticized the grading system of the university last fall, go to the registrar's office and compare the winter and spring grades with the fall grades. Here the weeding out process will be found, very much in evidence.

Parking Please

Lately, there has been quite a conjection of cars in front of the cafeteria, Art Center and barracks. This conjection is proving a hazard to the student body. Students crossing from behind the parked cars onto the highway are in danger.

Dean I. Clark Davis and Dr. Wm. Bicknell, chairman of the parking committee have asked us to remind you that parking is not permitted on the west side of Thompson avenue.

We feel certain that if the drivers will conscientiously park their cars correctly, there will be ample parking space on the campus and on streets adjoining the campus.

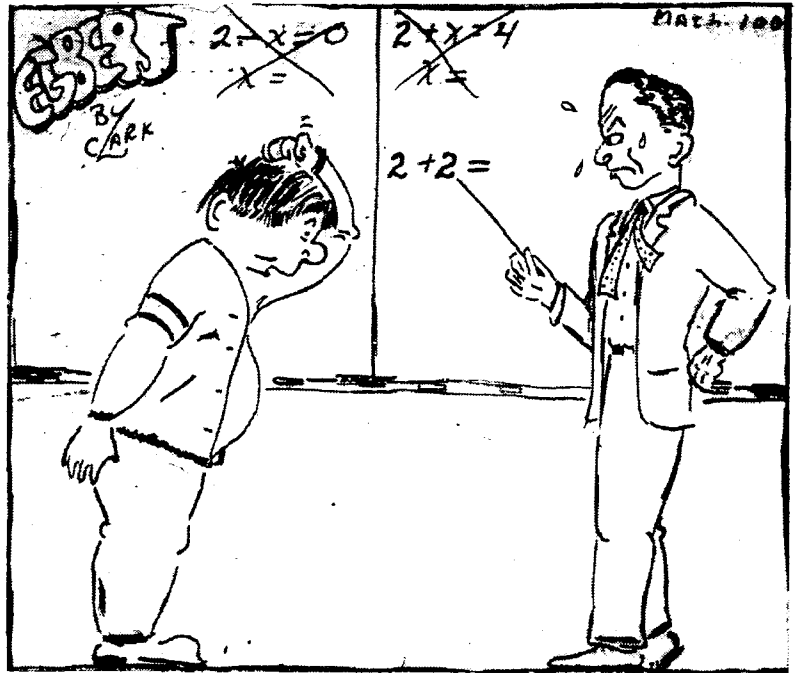

It is hoped that by fall, additional parking lots will be available and so alleviate the parking situation. Till then, the co-operation of all drivers is needed.

It could be said that an educator argues an issue while a debater issues an argument.

sat and looked at the magician, then finally said, "All right, you win! What did you do with the ship?"

Into Each Life

According to statistics, this has been the wettest June, Carbondale has known. A total of 9.09 inches of rain have fallen on Carbondale, compared to 3.79 inches last year, and 3:54 during June, 1949.

All in all, we'll say it's been a wet, wet June!

LETTERS TO THE EDITOR

Those writing a letter to the editor should drop them in the "Letters to the Editor" box in the crosshalls of Old Main or mail them to the editor, care of the Egyptian, via Campus mail.

Last week a large number of area school teachers, alumni, and first term freshmen started busying themselves with summer course work on campus. This is not an unusual event for most permanent staff members or for upperclassmen. However it may be a new experience for many summer students, and to this group the Egyptian wishes to extend a hearty welcome and invites everyone to feel that Southern has opened its doors to them.

Have you taken a cook's tour through the new Student Center? Ought to do it! You'll be surprised at what can be done in way of interior decoration in those army barracks being erected about campus. The new Center lends itself to a hospitable and cheerful atmosphere while opening much needed space for a wide variety of student and faculty offices.

Annual Book Exhibit Slated For Next Week

The Annual Educational Materials exhibit will be held here July 12-13. The exhibit will open Thursday, July 12, in the Men's gym at 9 a.m., and at 8 a.m. on Friday. The exhibit will close at 3 p.m. Faculty and students may attend the exhibit.

This exhibit features the various publications of textbooks, reference books, maps and materials used in schools. Approximately 70 firms are expected to be represented.

Highlighting the exhibit will be the smorgasbord held at Giant city park at 5:30 p.m. on Thursday, sponsored by the faculty.

Faculty Newcomers Have Get-together

Seventy-five faculty members and their wives attended the Faculty Newcomers club party held at the Jackson Country club on Friday June 29.

Square dancing and bridge featured the get-together.

The club is made up of faculty members wives who have been at Southern less than two years.

Husbands of the members were guests at the party.

In keeping with the spirit of improvement on campus, the post office is not one to be overlooked. It moved into its new, spacious quarters in the barracks on Harwood Avenue on Monday, June 25.

There were two offices in one, in the old quarters in Parkinson Lab, the post office and the telephone exchange. Here, because of the crowded condition, efficiency was at a minimum.

Increased space is one of the new and important features of the new building. There is more shelf and table room as well as more storage space. Many windows in the building give more light and ventilation and in addition there are new fluorescent lights.

Two more sections of boxes have been added to the office, bringing the total to about 300. By the end of the summer, the number of boxes will have increased to about 500. There is also an additional window for mail.

To add to the efficiency of the post office, a new and completely automatic postage meter has been installed. This meter seals and stamps envelopes automatically.

The hours for the post office are 7:30 a.m. to 4:00 p.m., Monday through Friday; and 8:00 a.m. to noon on Saturday.

The post office is under the direction of Mrs. Dorothy Butler, who is assisted by Miss Dorothy Ballard, a full-time employee, and Miss Marion Ries, a student.

Bulletins for 1951-52 Are Out

The 1951-52 school bulletins are out, according to a report from the Registrar's office. Students may receive one by going to the Registrar's office, 1st floor, Old Science building.

BSU SPONSORS BANQUET

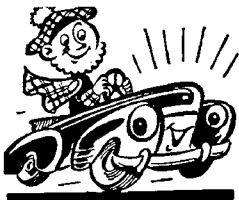

A semi-formal banquet sponsored by the Baptist Student union will be held on the lawn of Johnson Hall, Thursday, July 12, at 7 p.m.

Admission will be 75 cents each. Leona Roper, social chairman of the BSU, is in charge of the event.

Wednesday, July 14, the BSU will sponsor a picnic at Giant City State park.

'Just Curious'

Lindgren, Wife Spend 11 Years Testing Yeasts

His friends often wonder why a brilliant man like Dr. Carl C. Lindgren of Southern Illinois University should spend so much time studying the sex life of a yeast cell.

Others who aren't so well acquainted with Lindgren are inclined toward a more patronizing attitude. They think it's commendable that he should devote 11 years of his life to improving nutrition standards.

"Nothing of the sort," replies Lindgren, who doesn't know where his experiments will lead, or if mankind will benefit. He and his wife—his research co-worker at SIU—are just curious about what goes on in a yeast colony.

"IT'S THE TYPE of curiosity that gets organized and makes you wonder what's around the next corner," the 55-year-old Wisconsin geneticist explains.

The fruits of this curiosity may someday help solve the problems of food and nutrition after an atomic bombing. That's only incidental to Lindgren and his wife. Reproductive traits of yeast cells are their primary concern.

Scientists have known for a long time that yeasts were living cells which could reproduce themselves. In commercial production, yeasts are grown in vats by feeding them sugar solutions, such as molasses. Each cell produces a bud which eventually breaks off from the mother cell. The two separate cells then start a new budding process to form other cells which have exactly the same characteristics.

Dr. Lindgren introduced sex

into yeast culture when he learned there were both male and female cells. He also discovered how to extract individual cells of opposite sexes and got them to take an appropriate interest in each other.

THE SCOPE OF THIS task may be imagined when you learn that a single pound of baker's yeast contains 300 billion cells, each one 4000 of an inch in diameter. That's just the beginning, however. The big problem is selecting the female and male cells which give a desired cross-breed. By continuous experiments, Lindgren developed hybrids superior to both parents.

The immediate results of these tests in hybridization is development of yeast strains better suited as ingredients for beverages, bread and other foods. Manufacturers of medicines and baby cereals use yeast strains selected for high protein and vitamin content. The Lindgrens can only guess what lies beyond that.

THE HUSBAND-WIFE team has a dozen assistants aiding in the tedious business of graphing.

Southern Sets Up Camping Program

Forty-two West Frankfort high school boys participated in a week of camping at Southern's school camp at Little Grassy lake Saturday, June 30.

The West Frankfort group was the first group of students from eight Southern Illinois high schools to participate in the school camp program.

Other high schools to participate in the next six weeks are from Anna, Chester, West Frankfort, East St. Louis, Vandalia, Du Quoin, Marion and Pinckneyville.

Though the first contingent was composed entirely of boys, future groups will be mixed. Conservation, education, campcraft, nature lore, and recreation is being stressed in the camp program.

Features of the first week were a fishing trip led by William Lewis, assistant professor of zoology, and a wildlife and game exploration led by Willard Klimstra, assistant professor of zoology.

The camping groups live in platform tents during their stay at Little Grassy. Cabins have been built from packing crates used to ship tractors overseas.

State health department supervised the purification of water, while the state highway department contributed water purification equipment.

Food, bedding, and transportation is furnished by the respective high schools. SIU is furnishing four rowboats and has set up a temporary swimming beach.

This is the first year SIU is providing both high and grade school camping programs. The four-week University grade school program began July 2 at Giant City state park.

Head counselor for the Little Grassy program is Don Raines.

JOHN S. RENDLEMAN, recently appointed legal consul for SIU, Rendleman attended SIU and the University of Illinois, where he was graduated from the College of Law with the doctor of jurisprudence degree.

physical education instructor at the Sesser elementary school. Assisting is Miss Doris Bantel, Litchfield school physical education instructor, who will be head girls' counselor, and Miss Lura Evans, instructor in physical education for women, who will serve as program director.

Cecil Franklin, chairman of the men's physical education department, is supervising the University school program at Giant City state park.

TEACHERS WILL TOUR NEW TRAINING SCHOOL

Kindergarten and Elementary teachers will tour the new Training school Wednesday, July 11. Those wishing to participate are to meet in the Kindergarten of the Allyn Training school at 2:30 a.m.

New Faculty Members On Campus This Term

Thirteen educators from universities throughout the country have been added to the summer faculty of Southern to enable the university to offer a more diversified summer schedule of courses.

In the sociology department, Dr. Herman R. Lantz, of the research staff of Norwich State hospital, Norwich, Conn., is teaching a course on "Marriage and Parenthood." Dr. Lantz served on the SIU faculty last summer.

Miss Dorothy F. Burge, librarian at West Phoenix High school, Phoenix, Ariz., is serving as an instructor in the education department. Mrs. Leone M. Christianson is teaching a special class of retarded children. Mrs. Christianson has had 30 years experience on the elementary school level. Dr. Nathan J. Divinsky, assistant professor at Ripon College, Ripon, Wis., is teaching mathematics. He received his Ph.D. at the University of Chicago. Miss M. Ruth Grierson, of Maryville college, Maryville, Tenn., is serving as an instructor in the General Library.

Mrs. Marjory D. Lyons, of Ripon College, is teaching Physica Education for Women. Mrs. Lyons was on the SIU staff last summer. Miss Thelma A. Phillips, of the Junior college of Centralia, is serving as instructor in the University school. Mrs. Eithel Rose, head of the Home Economics department at the University of Dayton, Ohio, is teaching in Home Economics; Harold C. Smith, principal of the Elias Michael school for Orthopedically Handicapped Children, St. Louis, Mo., is serving as a lecturer in Guidance and Special Education.

Miss Amy Turnell, of Denison University, Granville, Ohio, is teaching in the physical education department for women. Dr. Margaret Wells, of Carroll college, Waukesha, Wis., is serving as assistant professor in guidance and special education. Dr. Wells received her Ph.D. from Syracuse university.

Mrs. Dorothy Jean Woods, of Kansas State Teachers college, Emporia, Kan., is teaching home economics. Miss Helen K. Zwolanek, of the University of Illinois, is serving as lecturer in home economics. She will teach a special short course in clothing construction from July 23-28.

PI KAPS TO HAVE ICE CREAM SOCIAL

Pi Kappa Sigma sorority will have an ice cream social Thursday, July 12 from 1-5 and 7-9 p.m. at their chapter house, 806 S. University ave.

The social will feature home made ice cream, cake and soda.

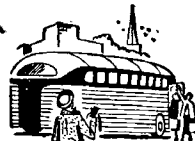

Proceeds from the event will go to paint the furniture which was ruined when the basement of the house was flooded recently.

'JUST CURIOUS' LINDEGREN, WIFE SPEND

(continued from page 3)

charting, photographing and cataloging experiments. Their work sometimes keeps them up until 3 a.m. Scientific indexes refer to 2,000 different species of yeast, but a brewery which endows Dr. Lindgren's work has collected over 20,000 types of a single species.

Lindgren's findings have given him material for a book, "The Yeast Cell," which experts consider the most comprehensive ever written on the subject. Yeast has brought him fame in the scientific world and has given his wife the dubious distinction of having isolated more yeast cells and created more yeast cultures than any other person.

Yet the Lindgrens sometimes wish they had a few juicy conclusions to offer friends who want to know what they've learned by seemingly endless experiments. They are under no illusions that their findings will make headlines.

"People only want to read about scientists who knock them off their feet with something startling," they point out.

LINDEGREN achieved only one small measure of popular acclaim—when a national magazine erroneously credited him with discovering a synthetic beefsteak during the war.

"After the article appeared, everyone refused to believe I had been working with yeast," Lindgren says. "They thought I had solved the meat shortage."

An Atomic Energy commission research grant for \$10,800 recently was awarded Southern Illinois University for extension of the work being carried on by Dr. Lindgren.

Presently, the noted scientist and director of the SIU Biological Research laboratory is in Bristol, England, at the invitation of the British government. He will speak before the Symposia of Experimental Biology to be held July 9. His subject is "Yeast Genetics." Lindgren left for England June 13 and is expected to return to SIU when the Symposia closes July 10.
