ERA dies
Time runs out in 10-year fight for ratification

WASHINGTON (AP) — Time ran out in the fight for ratification of the Equal Rights Amendment on Wednesday. Longtime foe Phyllis Schlafly celebrated with an "Over the Rainbow" victory banquet for anti-ERA politicians, while women's liberation leaders marked the moment with vows to turn them out of office.

Schlafly told a news conference Wednesday, "We won, and really it wasn't even close." She said the polls that showed Americans favored the ERA had been wrong and that legislators knew it.

Schlafly, a conservative writer whose stop ERA and Eagle Forum organizations lobbied against ratification, honored prominent conservative politicians and military men at a $35-a-plate Washington banquet attended by 1,000 ERA opponents.

While ERA opponents didn't dispute Schlafly's exultant assessment that such an amendment now "has no conceivable hope of passage in this century," they promised a new start and a new tactic: An effort to elect women to half the seats in the nation's state legislatures.

Around the country, both sides gathered on the occasion of the deadline of the amendment, approved by 38 states. The ERA fell three short.

In Springfield, a small group of militant women often at the center of Illinois' Equal Rights Amendment struggle in recent weeks marked ERA's death with an emotional ceremony to the lawn, they stepped outside the Statehouse or the building, were denied access to the Statehouse for a news conference.

Once they singing their ceremony to the lawns, they popped 15 balloons — one for each state that did not ratify ERA — and symbolically removed the chains they had used to link themselves and other women together in various June protests inside the statehouse.

"It was their (politician's) acts, not ours, that were 'despicable, vile and thoroughly disgusting,'" Mary Lee Sarina of Champaign said, referring to the words. Gov. James R. Thompson used to denote the blood-smearing incident.

That incident occurred last Friday after the Senate failed to override a House veto and ban sex discrimination.

The women, calling themselves the Grass Roots Group of Second Class Citizens, vowed to set their sights on defeat of anti-ERA lawmakers in the fall.

But the women said they planned to be in Springfield for future protests, claiming the group has picked up many supporters.

By last week, members of the ERA movement numbering 17 since June 3 have chained themselves together and blocked entrances to the state Senate and offices of pro-ERA Thompmon and his anti-ERA running mate, Republican House Speaker George Ryan.

By last week, members of the group had been evicted from the Capitol by armed secretary of state's police three times.

After their last ejection, which followed a judge's June 21 order that they stop the sit-ain, the women said they planned to continue their "undercount" and "despicable, vile and thoroughly disgusting," protests.

Legislators mixed on ERA future
By Bob Delaney Staff Writer

Reactions from Southern Illinois legislators were mixed when the 10-year deadline for ERA came to a close Wednesday. But most don't believe this is the last they'll hear about it.

Rep. Wayne Alstot, D-58th District, said he had heard that efforts would soon be made at the federal level to start the whole process over.

But Rep. C.L. McCormick, R-59th District, said, "I think Congress would act on starting ERA again before November.

While Southern Illinois legislators — with perhaps the exceptions of Reps. Richard Byrd, R-58th District and Ralph Dunn, R-59th District — opposed the ERA, most said they would at least consider a

Haig resignation won't change foreign policy, Reagan says

WASHINGTON (AP) — President Reagan said Wednesday's news conference by Secretary of State Alexander M. Haig Jr. has not impaired U.S. foreign policy and added that "there is going to be no change" in course because of it.

He also said that he is "sticking with" Secretary of Labor Raymond J. Donovan, calling him a man unfairly and unjustly accused of links with a union.

NOTING that Special Prosecutor Leon Silverman had found insufficient evidence to charge Donovan with any crime after a three-month investigation, Reagan declared: "That case is closed."

In foreign policy, Reagan told a White House news conference: "I think that we're progressing very well with what it is we're trying to accomplish."

He said the credit belongs in part to the departing Haig, who last Friday and said it was because the administration had shifted away from the planned course of confidence, clarity and steadiness of purpose.

Reagan announced the resignation without answering any questions, saying that he would be having a news conference this week at the State Department.

"As I said the first day, I will comment no further on that," he said.

Reagan denied reports that Haig had threatened repeatedly to resign because he was not satisfied with the degree of his authority in foreign affairs.

"He only once came in with a resignation and submitted the resignation to me," the president said.

He said there is nothing further the American people need to know about the Haig episode. But he conceded "there is no easy time for the secretary of state to resign."

Reagan said he doesn't want "pesky people" around him, but prefers discussion and debate on foreign policy and other issues.

AS FOR Donovan, Reagan said, "Certainly, I'll be sticking with him."

Area jobless rate shows no decline

By Bob Delaney Staff Writer

Unemployment figures in Southern Illinois showed little improvement in May and area labor market economists aren't optimistic about improvement in 1982. After slight gains in the near future, they are hoping for a leveling off of unemployment in the area, and perhaps slight improvements.

The unemployment rate in Jackson County rose nearly a

President Reagan said, "I think it would be much more consistent."

"That is, of course, the Secretary of Labor," he said, "and there are no other candidates for the position."
Youth is first to be charged with not registering for draft

WASHINGTON (AP) — A Southern California youth was the first man charged with failure to register for the standby military draft, according to the Justice Department.

The 19-year-old man was returned in U.S. District Court in San Diego against Benjamin H. Saray, it charged that he "did knowingly and willfully fail, evade and refuse to present himself for and submit to registration."

The violation carries a maximum penalty of five years in prison and a $10,000 fine.

The announcement was handled in a deliberately low-key way by the department, which simply released a copy of the 18-line indictment.

The draft issue is a sensitive one politically for the administration, because President Reagan campaigned against the draft but changed his mind after he was elected.

The procedure draft apparatus simply requires young men over age 18 to register in the event a draft is needed in the future. There are no current plans to actually draft any men into the armed services.

The Justice Department spokesman John Russell said that Selective Service System officials had sent the department the names of 225 persons in late May and early June who allegedly had refused to register.

Russell said that the Justice Department reduced that list to 160 names.

He said the remaining 160 names were sent to U.S. attorneys around the country for possible prosecution.

Russell said four names were sent to the U.S. attorney in San Diego, who found upon investigation that two of the men had never moved out of the area, leaving Saray, who was indicted.

Barry Lynn, an attorney and president of Draft Action, the national anti-draft advocacy organization in Washington, declared that "it is disgraceful that this administration is derelict in an effort to fill the prisons with men of conscience and moral commitment."

PLO reportedly will leave Beirut

By The Associated Press

Beirut's besieged PLO guerrillas said last night that "Time is running out," have agreed to pull out of the area, according to a U.S. government source.

The news was confirmed, but the United States reportedly offered Palestinian leaders a bus ride into exile in Syria.

Publicly, the Palestinian Liberation Organization stuck to a tough stand. "The Palestinian people have obtained the right to determine their own future," the PLO news agency declared.

But the intermediary, former Lebanese Prime Minister Saeb Salam, told reporters after meeting with PLO leaders that the 8,000 guerrillas in west Beirut had agreed to leave.

In Jerusalem, the Israeli Cabinet met in emergency session to review the Lebanese situation, and a government source said "Time is running out for the Palestinians."

The Israeli Cabinet seemed to back off, however, from what sounded like a 48-hour ultimatum from Prime Minister Menachem Begin on Tuesday.

In an impassioned Parliament speech, Begin had said last week that the Palestinians in west Beirut must leave. On Wednesday the official Israeli source, who asked not to be identified, said this should not be taken too literally, although "it is a matter of days."

The United States stepped up pressure for a peaceful settlement.

In Tel Aviv, United States Envoy Alexander M. Haig Jr. sent an urgent message to the Israeli government saying Washington might support a future PLO political presence in Lebanon, something demanded by the PLO but thus far rejected by the Israelis.

For the fifth day, an uneasy truce appeared to be holding.

The PLO guerrillas have shown up in positions of red earth, barricades and sandbagged positions in west Beirut's streets in a reoccupation of a house-to-house final shootout with the Israelis, who invaded Lebanon June 6 to eliminate the PLO as a military threat.

The most west Beirut residents seemed besotted of Begin's warnings Tuesday that they should "get out, get out!"
Owner of The Bar will reapply for renewal of liquor license

By Andrew Zilner
Staff Writer

The owner of Carbondale's nighclub, The Bar, said Wednesday he would reapply on July 7 to the Carbondale Liquor Control Commission for renewal of a Class A liquor license.

The Commission on Monday denied the license renewal requested by Joseph McNamara, owner of The Bar, 213 E. Main St. The Bar was ordered to close Wednesday at midnight when its license expired.

McNamara said he plans to file an appeal Tuesday with the Illinois Liquor Commission. According to state law, The Bar could stay open pending the appeal, but McNamara said he will close his bar until the July 7 Carbondale meeting.

“...I would rather work with people in Carbondale than go through the state,” he said.

There is no justification in denying our renewal except to prove that I'm not a public nuisance.”

The Bar was labeled a public nuisance by Carbondale Police Chief Ed Hogen. Hogen told the commission Monday that The Bar was cited for several incidents of underage drinking, one occasion in which alcohol was served after hours and the occurrence of a rape in one of what he called the “unisex” bathrooms on the premises.

McNamara said Wednesday the bathrooms were not unisex, but were labeled “Ladies” and “Men.” He said that water was being served in the after hours incident and that he was never notified of the underage drinking arrests. He also said the rape was reported to the police, "who didn't follow through" on the case.

Hogan said the rape victim decided not to file charges in the matter.

Calling the police "curiosity seekers," McNamara said he was the target of "indirect police harassment." He said the police were uninformed and usually didn't know what he was going on inside the bar.

He also said the commission based its denial decision "strictly on rumors."

McNamara said he would take his appeal to the state panel if necessary. He would win the appeal, he said, because the city has no real reason for denying the license renewal.

FUTURE from Page 1

modified version of the ERA. They said wording of the present amendment was a failure to pass in Illinois.

While Richmond said the three-fifths rule prevented passage of the ERA, and said it would take either a rules change or a new speaker of the house to pass the ERA, most other legislators were concerned about how the amendment would affect women and a military draft.

One plan proposed by supporters would be to add a proviso to a future draft that women would be protected from a possible future draft. Rep. Jim Ross, D-9th District, said a rewriting of the amendment may eliminate some of its opponents' fears.

While he couldn't say what he would do in any specific circumstance, he said he would look at any new version with an open mind.

Atas said that while he is opposed to the present amendment, he is not opposed to the amendment. If a modified version eliminated fears about a draft, he said he was "money-nine percent sure he would take either a fight."

Sen. Gene Johns, D-9th District, a staunch foe of the ERA, said he didn't think the ERA dead and would remain flexible should a modified version be passed by Congress.

"If it's revived and revised, Sen. Johns may see to it in his heart to take it into consideration," he said.

McQuinn said it didn't matter unless the Congress acted and that was uncertain before the November election. "It's dead for this year," said McQuinn, also a staunch ERA opponent. If a modified version should surface, he said he would look at it.

Dunn, however, said that while changes in the amendment's wording may ease passage, he...

It's too bad we didn't pass it... Ralph Dunn

didn't think it was necessary to water down the amendment and that if it might not be a good idea to add provisions concerning the draft. "It's too bad we didn't pass it," he said. "I'm not ready about that."

Dunn added that failure to pass the ERA wouldn't happen in Illinois because provisions in the state constitution already gave women equal rights.

Legislators agree that ERA supporters actions in recent weeks, such as fasting and chaining themselves, hurt the amendment's image.

Dunn said he was "a little embarrassed" about the movement and that they "didn't give ERA a good reputation."

ERA backers should continue rights battle

The EQUAL RIGHTS Amendment has met its match—for now. But the hopes and dreams of its supporters should not die with expiration of the ratification period. Those who believe ERA is right should continue to fight for its success.

Many who fought for ERA probably feel as though they've failed, and some may even feel that there is no hope for the future. They may feel that in a conservative America, there is no place for ERA—no place for something as basic and fundamental as an Equal Rights Amendment.

But they shouldn't feel that way. They should resolve to fight on—rationally.

Spraying blood on public buildings, burning the American flag, and attempting to destroy property for political reasons are not what America is about. This is certainly not what American opinion is about. The American public is a very well-behaved public.

The THE ELECTION AND legislative process is the way to go for those who support ERA, not some grandstanding tactics.

In media-oriented America, marketing and packaging are vital to the success at the ballot box. But, according to pipe dream believers, American opinion is shaped by how issues are presented in the media—and by how those who identify with issues are presented.

Indeed, large, legible, well-printed signs must be carefully packaged as something that can benefit everyone, and presented to the public by credible spokespersons.

ERA SUPPORTERS MAY have lost the battle, but if they take a rational, calculated approach the next time, they can yet win the war against ignorance.

The Bar provided sanctuary

The recent denial of a liquor license to The Bar certainly shows a lot for Carbondale People for Peace, the Liquor Control Commission.

Chief Hogan, you must carry a lot of weight. Apparently, because of the testimony of how The Bar is a "public nuisance," the Liquor Control Commission rejected a license renewal. Gee, isn't it amazing how this thing has been accused of underaged drinking and selling alcohol after closing time? The Bar was violating those strictly enforced rules.

But, I mean, if The Bar was violating those strictly enforced rules, why did the Liquor Control Commission not revoke the license years ago? Wasn't the original idea behind the liquor control laws to prevent or afford protection against the personal free will of00bdrdrdr time, they can yet win the war against ignorance.

"They may not have an idea what is available."

Faculty, PM

"We've tried to carry out the task for civil recommendations and I think we've met many of those," Clark said. "The purpose of establishing this office was to stimulate community response to the University."

One of the biggest obstacles in improving University service to the area, Clark said, is determining just what services people are interested in.

"As a whole thing, since this area is so large, is determining what people want," he said.

Planned home for wildlife will rid public of eyesore

Hoping to turn an environmental eyesore into a wildlife showcase, SIU-C wildlife researchers are working with a coal company and a state agency to reanimate an abandoned strip mine.

The Little John Mine, now a wasteland of charred vegetation, rests in rural Knox County. According to mine reclamation expert for the Illinois Department of Natural Resources and the reclamation council, the project will create a wetland—a expanse of wet, grassy acreage—which will become a habitat for waterfowl and other wildlife.

Working with university officials, the reclaimed area near Carlinville is expected to serve as a model for improving University service to the community, said director Elmer Clark.

The office was established last September after a University Task Force on Service, organized by President Albert Knox, recommended the organization of a central office to oversee University service efforts.

"We've tried to carry out the task for civil recommendations and I think we've met many of those," Clark said. "The purpose of establishing this office was to stimulate community response to the University."

One of the biggest obstacles in improving University service to the area, Clark said, is determining just what services people are interested in.

"As a whole thing, since this area is so large, is determining what people want," he said.

Evergreen Terrace gardens get care from entire family

With summer progressing, many people find "fun-in-the-sun" a daily treat. Mrs. Norindah Affandi and her son, Azmi, work in their garden, watering convolvulus. The plots for the gardens are rented to residents of Evergreen Terrace who want to cultivate summer's earthly delights.

Azmi helps his mother by watering the plants with an old Kool-Aid can converted to a water bucket, and by pulling up weeds. Mrs. Affandi said that most of the residents come out in the evening to work on their gardens, but she decided to work on theirs early.

Mrs. Affandi's husband is studying for his master's degree in education and plans to finish in August. The family is from Malaysia.

Staff Photos by Doug Janvrin
Sculptor forges his creations from scrap, via blacksmithing

By Miriam Adolphson
Staff Writer

An exhibit of metal sculptures by Aldon Addington will be on display July 4-8 at the Mitchell Gallery in Quincy Hall.

Addington, an associate professor of sculpture, will show his 18 steel sculptures at SIU-C for the first time Monday through Friday from 10 a.m. to 3 p.m.

Addington uses forging, cutting, and welding to create the three dimensionality and abstract design. He says he experiments with metals in order to explore the "intrinsic qualities of steel and make the cold and intractable become pliable and resilient."

Beginning at the scrap yard, Addington says he chooses pieces for a sculpture and recuts them in his blacksmith shop at the Glove Factory located on Washington Street behind Hangar B.

Using new pieces and some he's collected since he first began blacksmithing in 1978, Addington chooses the two elements he will use to start the sculpture.

"The joining of two elements marks the beginning of the sculpture," Addington said. "I work in a completely intuitive manner," he said. "I must consider the scale the thing is going to take, but, beyond that, I don't have any notion of how the sculpture will look."

Addington uses basic blacksmithing techniques in his work with hot metal and uses modern cutting tools to form each sculpture.

Using a pneumatic forging device, a huge hammer that presses the heated metal, he forges the heavier pieces, such as those from auto parts, into a variety of shapes.

"I don't want to keep other people from reacting to the work," Addington said. "I'm manipulating the steel. It's the viewer who decides the imagery that comes out of it."
Are scarce days ahead?

Court rules on assumable mortgages

By Louise Cook
Associated Press Writer

The assumable mortgage: It's been a boon for home buyers, a blessing for home sellers and a bane for lenders. And a ruling by the Federal Reserve Court on Monday will make it harder to find.

Almost $20 billion of the $2.3 million sales of existing homes in 1981 involved an assumable mortgage, according to the National Association of Realtors.

The assumable mortgage can cut hundreds of dollars from a buyer's monthly housing costs. This makes it easier for a homeowner to sell.

Here's a hypothetical example of how it works:

Suppose you bought a $50,000 house five years ago, with a down payment of 10 percent or $12,500 and a 30-year mortgage for $37,500 at 10 percent. The monthly payment on the loan would be $330.

The family wants to sell the house today for $60,000. The new buyer makes a 15 percent down payment — $9,000 — and must borrow the remaining $51,000. At 12 percent, the uncomum rate today — the monthly payment on the $60,000 mortgage would be over $900.

Suppose, however, the old mortgage can be assumed. A lender would be willing to assume the old, low-yield loans at the "allatross of the thrift industry".

To try to protect themselves against this kind of loss, many lenders have inserted "due-on-sale" clauses in mortgages in recent years, requiring the loan to be paid off, in full, when a house is sold.

In recent years, these clauses have spread and so have lawsuits. All 50 states now have laws limiting the enforcement of these "due-on-sale" clauses.

The Federal Home Loan Bank Board, which regulates savings and loans associations, ruled in 1976 that "due-on-sale" clauses in mortgages made by federally chartered S&Ls — about half of the total number of S&Ls — could be enforced.

Courts in several states overruled the bank board, saying that state laws applied even to federally chartered institutions. The issue wound up before the U.S. Supreme Court in a case involving a Fidelity Federal Savings and Loan Association of Glendale, Calif., and three homeowners. On Monday, the Supreme Court upheld the bank board, saying that the board had the power to override state law in this case.

Ernest Leff, a lawyer for Fidelity Federal, said most existing mortgages issued by federally chartered S&Ls include "due-on-sale" clauses, and he said Monday's ruling means "the federal associations will be able to enforce the due-on-sale clauses in mortgages they hold."

The ruling does not apply to state-chartered S&Ls which generally are governed by state law. Nor does it apply to commercial banks. The comptroller of the currency has proposed allowing national banks — those chartered by the federal government — to enforce "due-on-sale" clauses even when state law prohibits them from doing so.

The proposal, issued last September, is pending.

S&Ls account for a little more than 43 percent of all residential mortgage loans; commercial banks account for about 17 percent; federally supported agencies for about 20 percent; and other lenders for the balance.

Legislation also is pending in Congress to make it easier for all lenders — state or federal — to enforce "due-on-sale" clauses.

None of the changes would apply to FHA or VA loans, which do not have "due-on-sale" clauses. The new ad

Researcher seeking children with dyslexia

By Michele Eman Staff Writer

Nelson Rockefeller and Albert Einstein had the problem. So may a child close to you.

The problem, little understood but widespread, is visual synkera - the inability to translate printed language symbols into meaning. As many as 20 percent of school-age children experience dyslexia, according to literature published by the Orion Society, a professional organization concerned with dyslexia. Dyslexia applies to children of normal and above normal intelligence who have learning disorders, says Bruce McDonald, visiting assistant professor, in the Department of Vocational Education Studies. Dyslexics see certain letters backward and upside down, and words in reverse, he explained, and are frustrated with reading and writing the difficult task. Dyslexia mainly afflicts boys, McDonald said. "Girls aren't a visible beneficiary."

Because of one man, Charles Rumble, a new research project is underway at SIU-C to help persons with dyslexia. Rumble, 36, a dyslexic, enrolled in a course in fall term 1980, taught by McDonald. By chance, Rumble discovered that he could read yellow-highlighted words on a microfiche reader.

William Potter, director of the Microfilm Department, and Keith Lindsey, student intern, began working with Rumble in the summer of 1981 to learn more, said McDonald. Work consisted of developing and testing a media format which enabled Rumble to read, said McDonald. It was found that Rumble could read information projected on a microfiche reader in which a negative image was shown. A black or purple background was shown on the screen and the letters and words were shown through as the light source, McDonald related. Rumble was quoted as saying that words appeared in yellow, "are clear and undistorted and everything else disappeared.

Research by Potter and Lindsey is being conducted to determine if the process which succeeded with Rumble can be generalized and remediation materials for dyslexic children, said McDonald.

"We're looking for names of children who will come forward and be tested by the screening test to locate those children who can read better if the materials are presented in a color-highlighted negative format," said McDonald.

Those who respond to that form of visual presentation will then continue in a reading program using specially designed reading materials which incorporate the colors, media and equipment that were found to be helpful, said McDonald. Paul Bates, assistant professor of special education, will select the students for the research and development process, said McDonald. The project procedures, funded for two months by the Graduate School, will involve a vision test administered by Jerry Levelmeier, Carbondale optometrist.

The preliminary work devoted to the development of prototypes of screening test and a remediation format is totally supported by the university, said McDonald.

Nuclear reactor manufacturer accused of negligent work

NEW YORK (AP) - In lawsuits that could result in damages of $1 billion, Westinghouse Electric Corp., maker of nearly half of U.S. operating nuclear plants, is accused of negligently designing, manufacturing and installing reactors in New York and Florida.

The civil complaints filed in federal court by Consolidated Edison and Florida Power & Light Co. in Miami demand that Westinghouse pay for faulty steam generator systems that have frequently led to lengthy shutdowns and costly purchases of replacement power.

If Westinghouse is forced to pay, it could mean a break for rate-paying consumers who would be stuck for the repairs in the form of higher utility bills. The suits "may put pressure" on other dissatisfied nuclear utilities to sue reactor manufacturers rather than applying for rate increases to finance equipment repairs, said Alvin Davis, who successfully represented Florida Power in two other suits against Westinghouse.

Westinghouse has built 22 of the nation's 72 nuclear power plants. Forty-seven plants use pressurized water reactors and the remainder are boiling water reactors, which do not have steam generator tubes.

The Nuclear Regulatory Commission said in February that steam generator tube problems exist in 40 of the 47 pressurized water reactors.

Two cases are pending in Florida and New York as well as two cases involving the Indian Point 3 plant, and suits have been filed in New York. Westinghouse also is fighting suits involving the Indian Point 1 and 2 units.

Con Edison also alleges that Westinghouse kept secret the results of 1975 tests that "revealed evidence of dented tubes and structural deterioration" for 18 months, and when specifically asked by Con Edison in March 1976, denied it was aware of any evidence of denting.

That concealment allowed the tubes and their support plates to corrode, enlarge and crack to the point where they became difficult to fix.

Fled May 28 without public announcement, the Indian Point action also claims defects in its four steam turbines and alleges that 80 other plant parts were "improperly designed, manufactured and installed," according to previous pressure turbines, condenser tubes, piping and circulating water pumps.

Con Edison and Florida Power, whose suit has been dropped since it was filed in 1978, claim that by its negligence Westinghouse had forfeited its contractual liability limitations for "consequential damages," such as the cost of replacement power.

We Have a New TUBBY

University Bank is pleased to announce their newest TUBBY located at The University Mall! That's right, University Bank now has a TUBBY Machine within easy access anywhere in the city.

The University Mall location will make shopping a breeze, allowing you to avoid the hassle of carrying lots of cash.

University Bank - "Bringing you new ideas in Banking."

**Director takes over Gloster duties**

Harold D. Richard, director of Institutional Research and Studies at SIU-C, has been assigned additional duties as acting director of Computing Affairs until Aug. 14. Richard will replace Arthur S. Gloster II, who was granted an unpaid leave of absence June 18 in the wake of his conviction on fraud charges stemming from a 1981 Oregon case.

Gloster headed computing activities at the University of Oregon before joining the SIU-C staff last October.

Gloster is on leave until Aug. 14, when his status at SIU-C will be reviewed, according to John Baker, special presidential assistant for budget and planning. Sentencing of Gloster is scheduled for Aug. 11. He said his attorney plans to seek an appeal or a new trial.

Gloster was convicted June 14 by a U.S. District Court jury in Eugene, Ore., on four counts of mail fraud and one count of wire fraud related to a scheme to cheat an Oregon insurance company.

He was accused of insuring $26,000 worth of silverware with American States Insurance Co. of Seattle in June 1981, then falsely reporting it stolen last September and trying to collect from the firm.

Richard assumed Richard's temporary assignment Wednesday.

Richard was chief planning officer at Pennsylvania State University before coming to SIU-C in 1978.
THE INCREDALE Edible Contest will take place July 10 and 11 as part of the University Mall's Food Fair. There are adult and junior categories, with prizes ranging from $50 to $15. Entries should be submitted at the Mall box by July 9. Awards will be made at 2 p.m. July 11. Area cooks and artists can call 528-3683 for more information.

A NEW research project has been started to help persons with reading problems such as dyslexia and will include a free screening test during the next two to three weeks for interested persons of all ages. Special materials will be developed for those students who are found to be helped by the new process. For an appointment, persons can call the Dyslexia Project at 453-3321.

ELIZABETH L. Rodgers, a May graduate of the School of Law, has been awarded the Charles A. Dana Fellowship. A one-year salary will be provided for her while she serves as executive secretary of the Association of Student International Law Societies.

A NEW course, Contemporary Polish Society: Processes and Paradoxes, Sociology 475, has been added for fall semester. The class will meet 1:30 to 4:30 p.m. Tuesdays and Thursdays and the instructor is Bronislaw Misial.

BRIEFS POLICY
The deadline for items for Campus Briefs is now two days before publication. The items must include time, date, place and sponsor of the event and the name and telephone number of the person submitting the item. Items should be delivered or mailed to the Daily Egyptian Newsroom, Communications Building, Room 221. A brief can be published only once and only as space allows.

Beg your pardon
It was incorrectly reported on page 11 of Wednesday's Daily Egyptian that a home health program provided by Quality of Life Services, care was available for 250 patients and that 60 had already used the service. The program allows for 250 visits and 60 visits had already been provided.

Some of the services included in the program and not reported are those of medical social workers and nurses' assistants.

Soviets confirm report of shuttle development

LOS ANGELES (AP) — As Columbia soars through its final flight, the Soviet Union continues its near-unsurpassed presence in space while progressing on its own version of a smaller shuttle.

Soviet officials have confirmed development of a shuttle that will be ready about five years from now. They have discussed no details, but American sources believe it will replace the little Soyuz spacecraft now used to ferry crews to and from space stations.

Such a reusable ship would be easier and cheaper than a Shuttle with little or no cargo space.

Like Columbia, with its mighty built-in engine, the Soviet shuttle would essentially be a winged version of most previous spacecraft — a life support system and launched atop rockets.

The difference would be its ability to glide back to a runway landing for reuse.

Pentagon sources reported the Soviet last month a one-ton scale model of a Russian winged shuttle. The unmanned vehicle, the sources said, carried a mock-up orbiter that successfully returned through the atmosphere.

Several European publications have described plans for a reusable space system in the sky-the-space "cosmic transport system" called Albatross.

As described, the winged spacecraft would be launched horizontally off water from the back of a high-speed boat. With a 30-ton payload, the vessel would reach orbit before meeting the Earth and gliding to a landing much as the Columbia. Soviet sources have written an analysis of the Soviet space program saying Progress is far behind such research unless "the eye meets the head."

The analyst, who asked that neither he nor his institution be identified, said the current, "single-minded" approach by the Russians is reminiscent of the "mindless" approach of the United States and the "inexperienced" approach of the Soviets.

He told reporters that 1989 was "a special year because of the 20th anniversary of the constitution."

The constitution, which had been in the custody of the Supreme Soviet for the past two years, came under purely Russian control April 17 in ceremonies presided over by Queen Elizabeth II.

The name of the national holiday, Dominion Day, has become an expression of contempt to some Canadians who detect a tone of outdated colonialism in a people calling it "Canada Day."
China switches to computers to get accurate census figure

The song, broadcast during a pilot census program in the central Chinese city of Wuhan, speaks to people's fears that once they are registered they are trapped for life in a society not known for its mobility.

By late September the world should know how many people live in the world's biggest country, but the absolute numbers will be no surprise. The important information concerns demographics and will help China plan the future for a quarter of the world's population.

The census will guide housing, health, education, employment and industry. It also will reveal how China is succeeding in reaching its goal of zero population growth.

The census is China's first in 18 years and the first with computers. In 1964, the census counted 690.9 million. By 1984, the population reached 1.23 billion. And at the end of 1981, a count of personal registrations showed 900,000 Chinese. The very organization of China's socialist society both facilitates the census taking and creates peculiar problems and reasons to lie.

Everyone in China is required to fill in neighborhood and street committee forms. Everyone knows everyone and secrets are hard to keep.

Every household must be prepared and everyone must have a personal registration, a sort of credit-to-grave social security card. It ordains where everyone must live and entitles them to food, cotton and other ration coupons.

Without presenting personal registration one cannot get work in a state enterprise, get housing or get married.

Hundreds of thousands of people, however, are said to be living illegally in a place not stamped on their registration papers. The problem of moving one's personal registration, sometimes with the need to bribe local officials, is a theme in contemporary cynical Chinese literature.

It is often youths who have been sent to the countryside and wish to come back. They return to the cities and live without proper jobs or ration coupons, staying with their parents. Families may not report their children to census takers, out of fear they will be returned to the countryside.

Census takers face other obstacles. Although deaths are hard to hide, especially in villages where lavish funerals still are the custom, many go unreported as relatives can use previous fake and ration coupons.

China's one-child policy also inspires families to lie so they will not forfeit the material benefits of having only one child.

Anyone who signs a one-child certificate but has a second child, loses all benefits and must pay back bonuses.

Fisheries Research center gets grant for pike project

The Illinois Department of Conservation has awarded the Fisheries Research Laboratory a $33,819 grant to improve intensive rearing techniques for walleye.

The grant money comes from a federal fund developed by a tax on fishing equipment.

Walleye, a popular game fish, will not reproduce in most Illinois lakes and reservoirs. But in recent years Illinois and other states have developed and maintained walleye fisheries through yearly stocking programs.

The DOC grant is aimed at improving techniques associated with the tank culture of walleye, Illinois' new hatchery system, and selling capabilities for culturing walleye in tanks.

"One thrust of the research will be to evaluate tank environment requirements of the young fish, including the effects of various water flow patterns, prepared diets, feeding periodicity and feeding rates," said William M. Lewis, director of the Fisheries Research Laboratory.

SIU-C researchers also will study after-release survival rates of walleye raised in tanks as compared to walleye raised on natural diets, he said.

In another part of the project, researchers will stock several hundred thousand larval walleye in the University's experimental research facility at Gorham and 100,000 others in Little Grassy Lake.

China to hold census

PEKING (AP) — For centuries Chinese emperors tried to count their subjects, primarily for taxation and conscription. The results were inevitably inaccurate, as people tried to get out of paying taxes or serving in the army.

On Thursday, China's communist planners began again — this time using computers and 5.1 million census takers and other workers — to find out how many people live in the world's most populous nation. It may be as hard to get at the truth.

Loudspeakers call on peasants in the rice paddies, herdsmen in yurts and illegally drifting city youth to tell the truth for the good of their motherland. Radios broadcast happy census songs and television shows films of amiable census takers and eagerly cooperative respondents.

One census tune reveals a lot about unemployment, status, aspirations and suspicions. It concerns a girl who sells ice cream on the street — a common occupation for unemployment. It is far less desirable, however, than a job with the state since it lacks security and benefits and most boys don't want to marry poor ice cream vendors.

Don't be afraid to register your occupation, the lyrics say. Just because you are selling ice cream today doesn't mean you can't get a better job tomorrow.

The song, broadcast during a pilot census program in the central Chinese city of Wuhan, speaks to people's fears that once they are registered they are trapped for life in a society not known for its mobility.

By late September the world should know how many people live in the world's biggest country, but the absolute numbers will be no surprise. The important information concerns demographics and will help China plan the future for a quarter of the world's population.

The census will guide housing, health, education, employment and industry. It also will reveal how China is succeeding in reaching its goal of zero population growth.

The census is China's first in 18 years and the first with computers. In 1964, the census counted 690.9 million. By 1984, the population reached 1.23 billion. And at the end of 1981, a count of personal registrations showed 900,000 Chinese. The very organization of China's socialist society both facilitates the census taking and creates peculiar problems and reasons to lie.

Everyone in China is required to fill in neighborhood and street committee forms. Everyone knows everyone and secrets are hard to keep.

Every household must be prepared and everyone must have a personal registration, a sort of credit-to-grave social security card. It ordains where everyone must live and entitles them to food, cotton and other ration coupons.

Without presenting personal registration one cannot get work in a state enterprise, get housing or get married.

Hundreds of thousands of people, however, are said to be living illegally in a place not stamped on their registration papers. The problem of moving one's personal registration, sometimes with the need to bribe local officials, is a theme in contemporary cynical Chinese literature.

It is often youths who have been sent to the countryside and wish to come back. They return to the cities and live without proper jobs or ration coupons, staying with their parents. Families may not report their children to census takers, out of fear they will be returned to the countryside.

Census takers face other obstacles. Although deaths are hard to hide, especially in villages where lavish funerals still are the custom, many go unreported as relatives can use previous fake and ration coupons.

China's one-child policy also inspires families to lie so they will not forfeit the material benefits of having only one child.

Fisheries Research center gets grant for pike project

The Illinois Department of Conservation has awarded the Fisheries Research Laboratory a $33,819 grant to improve intensive rearing techniques for walleye.

The grant money comes from a federal fund developed by a tax on fishing equipment.

Walleye, a popular game fish, will not reproduce in most Illinois lakes and reservoirs. But in recent years Illinois and other states have developed and maintained walleye fisheries through yearly stocking programs.

The grant is aimed at improving techniques associated with the tank culture of walleye, Illinois' new hatchery system, and selling capabilities for culturing walleye in tanks.

"One thrust of the research will be to evaluate tank environment requirements of the young fish, including the effects of various water flow patterns, prepared diets, feeding periodicity and feeding rates," said William M. Lewis, director of the Fisheries Research Laboratory.

SIU-C researchers also will study after-release survival rates of walleye raised in tanks as compared to walleye raised on natural diets, he said.

In another part of the project, researchers will stock several hundred thousand larval walleye in the University's experimental research facility at Gorham and 100,000 others in Little Grassy Lake.
The Wall from Page 16

She said that most of the people who climb will come once or twice a week. She added that most people are afraid to try the climbing wall because they think they will look silly. She explained that she used to feel intimidated as well, but realized that it was the feeling silly that was silly.

"It's not all that difficult," Sbarboro said. "Most of the strength is in the arms. If people can walk up stairs, they can climb up the wall.

Most people will come and watch a few times before attempting a climb. Sbarboro said. When they do work up the nerve, they are outfitted with a harness and helmet and instructed on the best course to take up. She said there are as many as five routes leading up, and two routes across for "bouldering" - climbing without a wall.

The routes on the 30-foot high wall are constructed out of wood pegs, and are laid out across the wall for a climber, starting with a route for a person 5-6. Sbarboro said a more experienced climber might find the difficulty by choosing a higher route. The wall can accommodate two climbers at a time.

"It gets pretty crowded because it is so limited," Sbarboro said. "They're replaced Neill,今回は, and the number has been over 1,000 yards for the Buffalo Bills in Dallas, who's gone 2,300 yards for the Buffalo Bills in Dallas, who's gone 2,300 yards. When asked if this was the Sbarboro said, "It's difficult," Sbarboro said. "She's afraid to accommodate people, and it's fine with her."

"I thought it would be broken last year," said Simpson. "They're playing two more games a season now. It's going to be a very strong season, and I think it will be sooner.

There are a number of legitimate candidates — Earl Campbell of Houston, winner of the Heisman last year, running back; New Orleans' George Rogers, the 1971 rushing leader and Tony Dorsett of Dallas, who's gone over 1,000 yards in each of his five professional seasons.

But the guy Simpson thinks poses the greatest threat is Chicago's Walter Payton, a perennial rushing leader working this year under new Coach Mike Ditka, who replaced Nell Armstrong after last season.

"Walter is hungry," said Simpson. "I don't think Armstrong gave him the opportunity to play as much as he would have liked. If Ditka gives him the opportunity, he'll be a threat to the record."

"Early days are capable of doing it. Dorsett would be if he was used enough, but he's on a balanced team. The kid in New Orleans (Rogers) is big and strong enough to do it." Simpson gained his 2,003 yards for the Buffalo Bills in 1973, a season that wasn't his best season.

"I had a better year in 1975 when I finished with 1,800 and didn't have to run as much. I could have gone 2,300 or 2,400 that year."

"Why didn't he, then? I guess you can call it unlucky luck."

Simpson said there are a number of circumstances which must come together for a runner to go over that magic 2,000-yard plateau. Luck is a major part of the mixture.

Simpson said that changes in the rules designed to open up football's passing game have turned coaching philosophies upside down. When Simpson thinks his pro mark will be broken, he believes the 2,000-yard college record established by Marcus Allen at the University of Southern California will endure for awhile.

Simpson and Allen were appearing at the Hertz Number One rental service in this country's top high school athletes, an annual affair.

"His record will be tougher to break than mine," said Simpson, nodding at Allen.

"The colleges don't play as many games. If they play 10 games, a kid has to average 200 yards a game. That's not easy. It's tough for a college team to put together all the elements you need for a 2,000-yard year. The conditions have to be just right."

Allen agreed.

"The great thing about O.J.'s record is that he gained a lot of that yardage on artificial turf," said Allen. "That's so much harder on the legs than playing on natural grass."

Intramurals kick off season

By Gene Shihman Staff Writer

Play has started in four of the tournaments sponsored by the Office of Intramural- Recreational sports. The 13 and 16-inch softball tournaments were rained out Monday, but began play on Tuesday, according to Coordinator of Intramural Sports Joyce Craven. The tennis and racquetball singles and three- or three-basketball all began on Monday.

There have been big increases over last summer in two of the sports, according to figures supplied by Craven. Three-on-three basketball has increased from 14 teams last year to 25 teams this summer. Racquetball has 44 men and seven women entered in singles play, an increase of 12 over last year.

"We are happy when we reach more students," Craven said. "This increased sign-up demonstrates greater student interest in those sports and in intramurals as a whole."

Registration in the other sports has remained basically the same, said Craven. Tennis has 37 men and seven women signed up, a decrease of two from last summer. Sixteen-inch softball is up one from last year, with a total of 17 teams, nine men's and eight co-recreational. The total in 13-inch softball is 34 teams: 18 men's, 14 co-recreational and two women's, down two from a year ago.

The softball tournaments are played at the Arena playing fields from 4 to 7 p.m. Monday through Thursday, said Craven. Tennis matches are held at the University courts at 6 p.m. Monday through Thursday, while the basketball and racquetball tournaments are being held at the Recreation Center Monday through Thursday starting at 8 p.m., she said.

The individual tournaments, tennis and racquetball, will last two to three weeks, said Craven. As soon as the singles play is completed, doubles play will begin.

As for the team sports, Craven said a series of six games are scheduled so that the teams can get in some practice and get used to playing with each other. There will then be a single-elimination tournament to determine a champion, said Craven.

Results of matches, pairings and other information can be obtained at the intramural office or the intramural bulletin board, both located at the Recreation Center. Pairings are done by computer.

"We have a really fine staff of returning employees this summer," Craven said. "She said Assistant Coordinator Brad Bennett, who is in charge of officials, is very pleased with the group of officials he has this summer.

There are a number of other tournaments in various sports coming up this summer, said Craven. The registration for ultimate frisbee closed Wednesday and play is scheduled to start July 6.

Simpson says rushing record may fall

(AP) O.J. Simpson says his National Football League 2,000-yard rushing record is going to be broken, probably this year.

"I thought it would be broken last year," said Simpson. "They're playing two more games a season now. It's going to be a very strong season, and I think it will be sooner.

There are a number of legitimate candidates — Earl Campbell of Houston, winner of the Heisman last year, running back; New Orleans' George Rogers, the 1971 rushing leader and Tony Dorsett of Dallas, who's gone over 1,000 yards in each of his five professional seasons.

But the guy Simpson thinks poses the greatest threat is Chicago's Walter Payton, a perennial rushing leader working this year under new Coach Mike Ditka, who replaced Nell Armstrong after last season.

"Walter is hungry," said Simpson. "I don't think Armstrong gave him the opportunity as much as he would have liked. If Ditka gives him the opportunity, he'll be a threat to the record."

"Early days are capable of doing it. Dorsett would be if he was used enough, but he's on a balanced team. The kid in New Orleans (Rogers) is big and strong enough to do it."

Simpson gained his 2,003 yards for the Buffalo Bills in 1973, a season that wasn't his best season.

"I had a better year in 1975 when I finished with 1,800 and didn't have to run as much. I could have gone 2,300 or 2,400 that year."

"Why didn't he, then? I guess you can call it unlucky luck."

Simpson said there are a number of circumstances which must come together for a runner to go over that magic 2,000-yard plateau. Luck is a major part of the mixture.

Simpson said that changes in the rules designed to open up football's passing game have turned coaching philosophies upside down. While Simpson thinks his pro mark will be broken, he believes the 2,000-yard college record established by Marcus Allen at the University of Southern California will endure for awhile.

Cubs fall to Stargell, Pirates

CHICAGO (AP) — Pitch hitter Willie Stargell ripped a three-run homer and Don Robinson and Rod Scurry combined on a four-hitter Wednesday afternoon as the Pittsburgh Pirates defeated the Chicago Cubs 7-3.

Stargell, hitting in the seventh inning for Mike Easler, blasted reliever Dick Tidrow's first pitch into the right field bleachers for his first home run since August 1981. It scored Bill Madlock, who reached on a throwing error by Chicago shortstop Larry Sowa, and Dave Parker, who had walked.

Don Robinson, 8-3, went six innings and gave up two hit, while striking out three and walking two. Scurry pitched the final three innings, striking out three and picking up his fourth save. Lee Smith, 1-4, took the loss.

The Pirates took a 1-0 lead in the third on Omar Moreno's RBI single. But the Cubs moved in front 2-1 in their half of the inning on Bill Buckner's two-run double.

Pittsburgh tied the score in the fourth on singles by Parker, Tony Pena and Dale Berra. The Pirates took the lead the following inning on an RBI single by Johnny Ray which scored Moreno, who had walked and moved to second on a throwing error by Smith.

Woody Wickham and Charlie West, as well as Joseph Camillo, director of student work and financial aid, were on hand to survey the area.

"We will have those responses by July 18. After that we will be able to finalize our report," Swinburne said.

Sbarboro said the OCR was asked to review the situation within several months of the original discrimination complaint and it took a while for investigators to get the facts, which in turn caused SIU-C to delay.

Sbarboro said, "It's hard to say what will happen considering whether there will be any areas that the OCR will find as significant in compliance. I would anticipate that there will be some unexpected origin for SIU-C. Our major concern is to maintain quality athletic programs for men and women."

"For the upcoming investigation, Swinburne said, "We've known about this for quite some time, and we've been waiting on it."

He said that he has been meeting with men's and women's athletic directors to begin at SIU-C.

WIMBLEDON, England (AP) — It was the old lady against the kid, and the old lady won.

For all of her many matches at Wimbledon, none was more dramatic or satisfying than Billie Jean King's 3-6, 6-3, 6-2 triumph over her 19-year-old nemesis, Bobby Riggs, in Austin, Wednesday's woman's quarterfinal on Center Court

Old Wimbledon, trembling with anticipation, packed with glee. Fans, packed like sardines, sat stunned during the spectacular rally and finally gave Billie Jean a thunderous ovation.

The match had all the ingredients of a Hollywood production.

Austin wasn't even born when Billie Jean won her first singles title at Wimbledon in 1962. But you get the idea.

And then there was the famous 1973 "Battle of the Sexes" in Houston, King's 6-3, 6-3, 6-3 victory over Bobby Riggs, which earned her millions and millions of fans over the years. She is now 37, 14 years her junior and one of the new breed of pig-tailed shot-making precisionists.

But in her 1973 103rd singles match at Wimbledon and her 90th victory. But while the day began with all eyes on Riggs' back court but running to the net, Austin got a shot past. King's backhand volley was deadly. After going to a 5-2 lead, King closed out the set, winning the deciding game at love.

King broke Austin immediately in the first game of the deciding set, and then held her own service for a 3-0 lead.

"I kept looking at that 'O' on the scoreboard, "I couldn't help thinking about my match with Tracy in 1979. We were a set apiece and then she tired then. I collapsed. "I determined not to let it happen again."

During the court changeover, Austin, standing where her mother sat with her coach, Marty Riessen, watched King play the game of tennis.

King did calisthenics, exercising knees that have cumbersome operations.

She won the important third game, battled to hold her advantage and, after a tough win, moved to her third match point with an overhead smash.
