Budget on hold
Funding delayed for SIU health plan
By Christine Leninger
Staff Writer

More than 9,000 SIUC employees and their dependents carrying SIUC insurance are directly affected by the state legislature's decision on '92 fiscal year appropriations.

Claims on the state's Quality Care Health Plan will continue to be processed, but the checks are not being held back until state appropriations have been disbursed. At that time, all claims will be released for payment.

"There is no money to pay for the claim right now," said Vice President for Financial Affairs William Capi. "It's like a checking account—you have to wait until the check is deposited before sending the money is supposed to cover it.

The University health plan has been self-insured through state appropriations and period-member payments since 1990. Capi said if the situation is not resolved within the coming weeks, SIUC workers may not receive paychecks.

"The situation is very serious but we, SIUC, are not in a panic state yet," he said. Some employees are upset about the increase in cost of the health plan despite the lack of funds to support it.

SIUC budget director Mike Williams said, "Employees on campus aren't getting a pay raise this year, but their health benefits are costing more.

"This increased cost on benefits is like a payroll deduction. Everyone carrying university insurance is affected by this situation," he said.

Capi said there are no safeguards, but doctors are directly affected now because they have not been paid for services that already have been performed.

"The situation this year is worse than years past because of the decrease in income and the rise in spending," Capi said.

At this time of year state legislators meet to decide on a budget for the following year.

Bill would give SIU staff's kids tuition waivers
By John Patterson
Staff Writer

With a stroke of the governor's hand, qualifying SIUC employees will be able to put their kids through college for half the price.

A recent bill sponsored by Sen. Ralph Dunn, R-Du Quoin, has successfully passed the Illinois General Assembly and will face the scrutiny of Gov. Jim Edgar.

The bill allows children of employees of state-supported colleges and universities to be offered 50 percent tuition waivers. The waivers apply to undergraduate students age 25 or under whose parent has been employed at least seven years at one of the state's public universities, providing they meet the same acceptance requirements as other students.

Dunn said several private and public schools already have similar programs, and he said it provides a good break for people who don't usually get them.

With no plans for pay raises, Dunn said it is a benefit that is deserving of the employees.

"If they were all real high paid and there was money flying around, it wouldn't be necessary," he said. "But it's hard to keep good people.

"I think it is a little known program, and I guess it is an important fringe benefit," Dunn said.

Du Quoin waterski tourney attracts every level of skier

By Jackie Spinnor
Sports Editor

Nelson Bay caught the waters of the lake at the Du Quoin State Fairgrounds last weekend. As a tournament series boat sped off onto the lake, the 25-year-old Missouri water skier was pulled out of the water to start the course in the novice division of the annual Garry Lichtifer Open.

"You just have to be able to go out and have fun on the water," Bay said after the novice skiers had finished their races. The Little Egypt Ski Club and the Du Quoin State Fairgrounds were host to the Fourth of July tournament last weekend.

Skiers competed in slalom, trick and distant jumping events Saturday and Sunday. Jeff Myers, SIUC Waterski team coach, qualified for the regional waterski championship with his performance in the Men’s II slalom division. Only one other SIUC skier competed in the tournament, Matt McNichols, a senior in business management from Lynwood, competed in the novice slalom division and the distant jumping event.

McNichols said the tournament attracted a wide range of skiers with a fairly competitive field among the young waterskiers.

"My goal for this weekend is to have a chance to compete against each other and qualify for regional and national championships," he said. About 45 skiers competed in each level of competition at the tournament.

The SIUC Waterski team competes intercollegiately as part of the National Collegiate Waterski Association. The team practices at the fairgrounds in Du Quoin.

Myers said the team still needs competitive women waterskiers. For more information contact Myers at 453-4456.

Train carrying toxic waste derail in St. Louis
ST. LOUIS (UPI) — Three cars of a freight train derailed Monday on an elevated trestle just south of the Gateway Arch, prompting the evacuation of hundreds of people from an eight-block area along the city’s riverfront. No injuries were reported initially, but authorities expressed concern because the derailed cars were carrying hazardous materials.

Father admits to murdering baby daughter by stabbing
CHICAGO (UPI) — The father of a 17-month girl was in custody Monday after he changed his story from stabbing his child. The man stabbed the girl Sunday afternoon, then showed the girl’s bloody hands and declared, “God said to drink this,” police said. The child, Brittany Blake, was accorded in a bed in the apartment in the Cabrini Green housing complex. She was taken to Children’s Memorial Hospital, where she died less than an hour later.

Slovenian cease-fire broken; peace initiative jeopardized
LJUBLJANA, Yugoslavia (UPI) — Militia units of the breakaway Slovenian republic and military helicopters traded gunfire Monday that injured at least one civilian, breaking a cease-fire and jeopardizing a European Community peace initiative, officials said.

Baghdad opposes U.N. nuclear inspections
VIENNA (UPI) — The International Atomic Energy Agency said Monday it has sent a high-level delegation to Iraq to discuss Baghdad’s refusal to allow a United Nations team to inspect suspected nuclear facilities. Last week a team of inspectors appointed by the IAEA said it had determined Iraq’s capability was denied access to each site near four times, the I.N. said.

Raging fire in Ukrainian mine kills 31 miners
MOSCOW — A raging fire in a Donbas coal mine in the Ukraine has left 31 miners dead in the worst Soviet coal mine disaster in a decade, the official Tass news agency said Monday. Soviet Coal Industry Minimister Mikhail Shchelkov immediately spied Sunday to the Yuzhnodonskobkarya mine in one of the most politically sensitive industrial regions, where miners struck this spring for two months. The blaze which had been raging since Saturday began at a depth of about 9,000 feet and quickly spread.

Actor Landon, 54, dies of cancer at home
MALIBU, Calif. (UPI) — Actor Michael Landon, whose ascent to stardom began with his role as Little Joe Cartwright on the television series “Bonanza,” died Monday of inoperable cancer of the pancreas and liver, a spokeswoman said. He was 54. Landon, who had been undergoing an experimental form of chemotherapy, died at home at 1:20 p.m. with his wife and other members of his family at his bedside. Ron Schwiet of his manager’s office said.

Civil rights activist advises students to guide progress

By John Reeves
Staff Writer

A local civil rights activist urges African-Americans to take control of their own lives, and not wait for someone else to take the lead.

"You are the leader on your block," said former NAACP chapter president Richard Hayes, a lifetime resident of Carbondale, to about 20 Carbondale NAACP members rallying early Saturday at Lenoir Turley Park to mark the end of a five-mile membership drive.

Hayes said June was chosen for the national campaign because students feel anxious about the future of decreasing education budgets and fewer teachers, many unemployed black teachers. for the school for the summer find the only way to make money is to sell drugs, and the "Police Watch" program begins: "The police watch the black student, the NAACP watch the police."

Larry Jacobson, superintendent of Carbondale schools in Districts 95, said Monday the budget for September cannot be forecast in June, because it is decided in Springfield in September.

Because teachers are chosen in March, any decision to reduce the number of teachers will not take effect until the following year.

The number of teenagers not expected to drop in District 95 in October.

Art Wright, Carbondale Police Public Information Officer, said there is always more mischief among teenagers in general during the summer months, but that programs at the Emma C. Hayes Center on East Willow and the Life Center on Sunset Avenue aim to help kids keep out of trouble.

Hayes alleged that the Carbondale School Board is ignoring two qualified black applicants, Sandra McKinley and Hardin Davis, for the position of principal at Winkler Elementary School on West Grand Avenue.

Jacobson said that McKinley and Davis were interviewed along with other candidates. Also, that the previous experience as principal of one of the candidates was the deciding factor.

District 95 has one black administrator. Director of Special Education Deborah Matthews, Jacobson said.

John Grayson, NAACP Legal Redress representative, said he hoped people would realize the importance of non-disruption in the education system and the workplace and the seeking of gainful employment.

The NAACP benefits all, he said. When people group together they have more strength, Grayson said.

The Carbondale chapter currently has about 150 members, Grayson said.

Twenty-five new members, including five non-black people, were recruited in June in Murphysboro area. He had not counted them.

Grayson said he wants young people to take pride in their heritage through knowledge of black figures such as Alexander Drum, 19th century author of "The Caut of Monte Cristo" and The Three Musketeers, inventor of the sardine, Benjamin Banneker, and Frederick Douglass, who assisted in the layout of streets in Washington, D.C.

People need to know history in order to guide the future, Grayson said.

Group to suggest funds for square

By Leslie Coip
Staff Writer

Some city staff members want to mix the past with the present for the future financing of Town Square.

Town Square, which is bordered by Illinois Avenue and Monroe, Washington and Jackson streets, is undergoing renovation to restore it to its former glory of what it was near the turn of the century.

Since April, a committee of 12 business and property owners near Town Square met three times to decide what recommendations for financing it would make to the City Council. It will make its recommendations tonight.

The committee recommended extending the hours of parking enforcement until midnight, increasing the parking rate to 20 or 25 cents an hour, installing several "pay and display" parking machines instead of individual parkers, and display the use of tokens by businesses.

The proposed "pay and display" machines would allow people to insert money, similar to the familiar parking meters. As a basis for deciding it is display the date, time, amount paid, expiration time and machine number would be included. The ticket would be placed on the dashboard of the vehicle.

Tom Hutsell, coordinator of downtown coordinator, said the city budgeted $25,000 for the parking machines. Following the parking machines could cost less, depending on the style and number.

Market offers better solution to preserved, packaged food

By Jennifer Kuller
Staff Writer

Even during these times of over-packaged and over-processed produce, one can find food fresh from the farm at the Carbondale Farmers' Market.

Peaches, blueberries, blackberries, green peppers, tomatoes, potatoes and green beans are among the various locally grown fruits and vegetables sold there.

Everything sold at the market must either be home grown or homemade, said Patrick Sweeney, director of promotions and an organic vegetable vendor at the market.

Shoppers at the market can choose from a variety of goods in addition to fruits and vegetables. Handmade jewelry, hand crafted wooden knickknacks, homemade baked goods, freshly cut flowers and herbs are also sold.

Interest in the market has increased gradually over the years it has been in operation because more people want to buy fresh local produce, said Sweeney.

Sweeney, a former produce manager in a grocery store, said some of the fruits and vegetables sold in stores can be up to three weeks old and can have one-fifth the nutrient value of locally grown produce.

The goods available at the market on any given day vary during the growing season.

Early crops such as onions, radishes and lettuce can be found in late spring, and vegetables like cucumbers and tomatoes can be purchased during mid-summer, said Ben Clatts, a produce seller from Makanda.

For those who want fruits and vegetables raised without chemical pesticides or fertilizers, there are two organic produce sellers at the market.

Sweeney said some of his customers buy only pesticides-free produce.

"I think the environmental movement has made people more aware. People are willing to support farmers," she said.

"But the only way to be fair is to collect all that information. There are a lot of things to be taken into consideration." Sweeney said.

Special situations, such as an unemployed parent or medical need by insurance, are considered when granting financial aid, said Sweeney.

While SIUC accepts all federal financial aid forms, the financial aid office is distributing the United Student Aid Fund form, Single File Form, said King.

The Single File Form is shorter than other forms and there is no bubble sheet to fill in. Other forms, however, there is no charge for processing the forms.

"The student doesn't have to pay anything to receive financial aid, and we feel that's very important," Sweeney said.

Completing the Single File Form is estimated to take 20 minutes, said Jenny Samen, junior in psychology. Also, there finds financial aid forms confusing.

"You never want to get it on the first try," she said. "You never want to have to go to your parents help or go to the financial aid office and run around in circles."

King said students can simplify the financial aid process for themselves by starting early. This will give students flexibility and time.
Computer upgrade helps all at University

THE COMPUTING AFFAIRS UPGRADE is costing the University close to $20 million during the next five years, but it will benefit the entire University.

Staying on top of technology is key to establishing strong research. Part of SIUC’s struggle to stay afloat as a noted research center involves having computing systems comparable to other major universities.

Researchers at all the colleges have more than doubled the amount of externally funded grants in the past 10 years. Growth in networking capabilities means a major increase in the amount of information available to SIUC. Computing Affairs will have to grow with the research oriented faculty.

COMPUTING AFFAIRS NOT ONLY involves research, though. Computing is needed for instruction and administration at a university. Computing systems are being used for undergraduate studies, or for courses or other uses with students in mind. Before like administration at a university. Computing systems are being used for undergraduate studies, or for courses or other uses with students in mind. Before long range plan for computing outlines is alive and well, Mr. Hoffmann.

THERE WERE PERIODS, ESPECIALLY at the end of the semester, when Computing Affairs could not meet the demand of the number of users. Computing Affairs has noticed a rise in computer usage.

The 1991-1995 long range plan for computing outlines growth for all the colleges and schools. Many of the goals are for courses or other uses with students in mind. Before the upgrade, the computer system was running at 100 percent.

THE COMPUTER UPGRADE is comparable to other major universities.

Thomas from Page 1

for the Supreme Court.

"The standard for the district court and the circuit court is different than for the Supreme Court," said Chairman Joseph Biden, D-Del.

Simon, who voted for Thomas for the appeals court, said at that time he "would probably vote against him" for the Supreme Court.

SOUTHERN ILLINOIS UNIVERSITY FOR THE PRESS

Michael Ester agreed with Simon on the civil rights issues, saying Thomas and Reagan and Bush had been very conservative.

Ester said Thomas doesn't have much of a record as a judge, but while he was on the branch under Reagan, he had a pretty solid conservative credential.

The nomination was viewed as "more of the same from Reagan and Bush," he said, but added Thomas' nomination was not as significant as David Souter's.

Souter was appointed to the Supreme Court in 1990, taking the place of long-time liberal William Brennan.

Thomas at age 43 is trying to take over the seat vacated by a nearly 83-year-old Thurgood Marshall. The youth move is not surprising said, but rather a strategy on the part of Reagan and Bush to have a conservative lasting effect on the court.

However, Thomas must face confirmation in the Senate, something Ester said is hard to predict.

Although the fact that Thomas is an African-American will make liberals want him, too, his conservative history will give them something to go after, he said.

U.S. Associate Justice David S. - Belleville, also said the Senate hearings should bring out more facts on Thomas' views.

"I note with interest the president's nomination of Clarence Thomas, a federal appeals court judge, to the U.S. Supreme Court. I look forward to studying the record of the Judiciary Committee, when his children are able to tell the story, and will be interested in the outcome," stated Dole's release.

Thomas was born in poverty near Savannah, Ga. He earned his law degree from Yale, worked in Michigan first as a legal aide to Sen. John Danforth, R-Mo.

He was a controversial chairman of the Equal Employment Opportunity Commission during most of President Reagan's administration and was an outspoken opponent of quotas in affirmative action. But his management of the EEOC was strongly criticized because the agency failed to act on age discrimination cases before the time limitations had passed.

Thousands of the age discrimination cases were allowed to lapse because they were not acted upon under a two-year statute of limitations.

WELFARE, from Page 1

"It's not their fault and they're not making bad decisions they have to have for it," Nessel said.

Welfare checks and all other state payments for food, clothing, rent and other necessities were thrown into disarray late Sunday when budget negotiators in Springfield, State Capitol came to the scheduled June 30 end of their spring session without settling a state budget for fiscal 1992.

State lawmakers have split along sharply partisan lines in the budget debate, which pits a Republican minority that favors property tax relief against majority Democrats trying to prevent first-term GOP Gov. Jim Edgar from cutting hundreds of millions of dollars from a $15 billion budget.

Both parties have agreed the state must cut $350 million or more in spending to escape a predicted $1.8 billion deficit.

Republicans gained clout when the fiscal year expired at midnight Sunday because all legislation approved after that time needs a three-fifths supermajority to pass.

One funding plan state Revenue Department officials drafted for Republicans would make permanent the state's 20 percent income tax surcharge, preserve property tax deductions and would require all municipalities to hold special votes to determine if those local governments should limit property tax increases to 5 percent per year.

That is close to Edgar's original tax plan unveiled in his March budget proposal but has been attacked by Democrats who said the caps would hurt local governments at a time when they would be receiving less money from the state.

The plan would also limit local governments' share of the surcharge money and put that into the state treasury to pay bills. A second plan virtually identical to the first was directed by many lawmakers Monday would ease that pain for Chicago Rock and D-D Pan, but said GOP lawmakers have been more consistent in their budget talk -- the only major spending bill that has passed the Legislature is the property tax fund bill -- than with helping the poor.

Hodel said it will help employees who are on the short end, and he hopes better education will be offered.

Northern Illinois University, Illinois State University and Sangamon Valley Technical School offer tuition waivers for children of employees.

Acting Vice President for Personnel at FDIC, McLeod. Hodel said although it is rapidly increasing in terms of dollar impact on SIV, the tuition waiver bill would be a good recruitment tool for students and employees.

"We're trying to develop new programs and get them off the ground and give them the funding they need," Hodel said.第2段

FDIC Acting Vice President for Financial Affairs William Capie said SIV is as much in the dark as any other state agency.

"With the Senate action last night, obviously we're in for a rocky road," Capie said at this point it's too close to call.

Capie said the tuition has been set, Deakin said. But for spring 1992, tuition and support from budget reductions.

Tubed trees
New process helps minimize stress, water and nutrient loss
By Jennifer Kuller
Staff Writer
"Tree tubing" to reduce water loss and improve growth is a new project underway by researchers in the College of Agriculture. It is being studied on a 250-acre site in Perry County, Ky., in a project directed by assistant professor of horticulture, Barb Fijolek. "The tubes create a sort of micro-environment," Fijolek said. Researchers from the College of Agriculture are testing the process on trees at SUIC's Horticulture Research Center and at a reclamed mine site in Perry County, Ky., Fijolek said. Tree tubing could have important potential in reclamation of former mine sites from different industries, Fijolek said. Tree tubing may be helpful in reducing the chances of vegetation regrowth, which re-

Theater department in dire straits with budget cuts, lack of ticket sales
By Annette Holder

A sold-out house doesn't mean a killer year. The production of "Mirror Mirror" at the new Summer Playhouse has drawn in $140,000 last year. The remaining funding comes from the University. "Mirror Mirror" and its sister productions and Fine Arts acting dean Martin Kleinus said the theater department does a lot with a small amount of money given to it, because it is an important part of a student's education. Business Manager Joe Moore said leaseless plays without music average about $1000 performance for royalties, but a well-known musical such as "Oklahoma"

Drinking alcohol in the sun may cause death

VIENNA (UPI) — The Conference on Security and Cooperation in Europe could hold its first meeting Monday of its Conflict Prevention Center to discuss Yugoslavia's political and military force in Slovenia, at a cost of dozens of countries.

Monday's CSCE meeting, the first of its kind, is designed to encourage new dialogue and deal with problems relating to what Western delegates describe as an unresolved territorial dispute.

The new process will test the CSCE's ability to solve conflicts at the negotiating table rather than by military action.

"I am expecting that the meeting will go long into the night," said John Marzec, head of the U.S. delegation. "Austria will propose a three-point plan to solve the conflict," said Martin Vukovitch, the head of Austria's CSCE delegation.

"We would like to see an immediate cease-fire, a return of garrisons of all Yugoslav troops, and we would like Yugoslavia to invite a team of military observers from the CSCE countries to observe Yugoslavia during this process," Vukovitch said.

Conference to discuss peace plan for Yugoslav republics

VIENNA (UPI) — Leaders of Yugoslavia and their political and military allies are meeting in Prague, which hosted the historic Soviet Union and seven former Warsaw Pact was in Prague, which hosted the historic Soviet Union and seven former Warsaw Pact members, to discuss the future of the Soviet-dominated military alliance and to encourage new dialogue and cooperation between equal sovereign states.

The four-page protocol, which ends the Soviet-dominated military and political alliance, is expected to be ratified by each country's parliament before it becomes valid.

The protocol also states in the fact that the last day of the Warsaw Pact was in Prague, which became a hotbed of anticomunist activity 23 years ago. The protocol refers to the events of 1968 "Prague Spring" of political and economic reforms.

Eisenhower, Havel stress need for new production

WASHINGTON (UPI) — President Bush welcomed a joint meeting of the United States, Western Europe and Canada to discuss the future of the Soviet-dominated military and political alliance, which ended March 1, 1968, and membership of the former East Germany ended with the reunification of Germany last year. That left Bulgaria, Czechoslovakia, Hungary, Poland, the Soviet Union and Romania to witness its final days.

The military structure of the Warsaw Pact was abolished by a Bush-era protocol on March 31, 1991.

It was the 25th and last meeting of the Political Consultative Committee, which includes the countries' top political and military leaders.

President Lech Walesa, whose office announced over the weekend he would not be coming and then announced he would show up after all, made clear his interest for the event.

"This is a funeral and I don't like to go to funerals," he said. "Every funeral means something new, but I don't know what." Walesa said he would go to the funeral, which is expected to be held for a team of military observers from the CSCE countries to observe Yugoslavia during this process, Vukovitch said.

FDA: Unapproved test for AIDS being recalled

WASHINGTON (UPI) — An Oregon company said Monday it would comply with a government order to stop selling its test to companies as an unapproved saliva test for AIDS and recall any test kits that had been sold.

Epistep Inc. of Beaverton, Ore., will comply with an order issued Friday by the Food and Drug Administration that the firm stop distributing its OraSure test kits. FDA officials said they will retrieve any that had been distributed and tonotify any companies that received the kits that they should not be used, an official said.

The FDA’s action followed an investigation by the federal agency that came after an inquiry by United Press International in April about the use of the test by insurance companies.

Adolph Ferro, Epistep president, said in a telephone interview that the company was working on a formal response to the FDA letter but intended to comply with the order.

“We’ve always cooperated with the FDA and will continue to do so," Ferro told UPI.

The company hoped to meet with FDA officials to clarify the issue, he said. The company’s lawyers had advised it could distribute the kits to insurance companies while it was awaiting formal approval from the FDA to sell the kits more widely, such as to private doctors, he said.

But in the meantime, the company planned to work with the Oregon Reference Laboratory Inc. of Kansas City, which was marketing the test, to comply with FDA regulations, Ferro said. He was uncertain how many kits had been distributed.

Saliva has been found to contain disease-fighting proteins called antibodies that may play a role in the body's defense against the AIDS-causing human immuno-deficiency virus, or HIV. But the FDA has not yet approved any tests for the AIDS virus other than those involving tests on blood or blood products.

Even after receiving an inquiry from UPI, the FDA conducted inspections May 6-8 and May 15-16 at Epistep that “documented your firm had manufactured, commercialized, and distributed OraSure collection devices for use by insurance companies to test for antibody to the AIDS virus," the FDA said in a letter sent to the firm.

Judge to rule on competency of suspect in Florida killings

TAMPA, Fla. (UPI) — Danny Rolling, the key suspect in the slayings of five Gainesville college students, will return Tuesday to court where a judge will decide whether he is competent to enter a plea on an unrelated robbery and assault charge.

Two weeks ago, Rolling, 37, appeared in Hillsborough County Circuit Court for arraignment on robbery and assault charges stemming from a Sept. 2 holdup of a Tampa grocery store and a subsequent beating of the victim.

At that time public defender Mary Lou Cuellar asked Circuit Judge Harry Cire to postpone the arraignment and order psychiatric tests for Rolling to determine whether he is mentally competent to enter a plea.

Coe granted the request and ordered three mental health examiners to conduct the evaluations. Coe was scheduled to see the Tidus Tuesday based on the conclusions of the psychiatric tests.

The charges against Rolling include armed robbery, two counts of robbery, attempted robbery, two counts of assault on a police officer and grand theft auto, three counts of aggravated assault on police officers and grand theft.

He was the Tampa police car that provided prosecutors with the first bit of evidence linking Rolling to the August stabbing deaths of five students in Gainesville.

Three of the victims were students at the University of Florida. The fifth attended Fa Community College in Gainesville. Three of the victims’ bodies had been mutilated.

76ers refuse to pay Mahorn in '91

Philadelphia team can sign forward for lower salary than $1.6 million

PHILADELPHIA (UPI) — Needing room to maneuver under the NBA salary cap, the Philadelphia 76ers announced Monday they would not exercise the option on 6-foot-10 forward Rick Mahorn for his contract next season.

By refusing to pay Mahorn the $1.6 million he was to receive for the 1991-92 season, the 76ers will be able to use $1.3 million of his salary to sign a free-agent. They are expected to go after a center, their biggest need next season.

The 76ers can still sign Mahorn as a restricted free agent at any time as long as they do not sign on with another NBA team or sign to play in Europe.

This decision will allow the Sixers greater flexibility but does not guarantee Mahorn a return to the 76ers.

The Sixers, who have been greenhorns to the free agency market, said the team is committed to building a team that can win now.

SCHEDULE, from Page 12

The Salukis ended the season last year with an overtime loss to Illinois State and a conference record of 14-6, placing No. 2 in the conference.

Firth, a junior and returning player, plays center for the Salukis.

"I think he will be the key inside, and in terms of our guards, we need him all the time," said coach Frank Crittenden.
