U.S. hostage released from Lebanon

DAMASCUS, Syria (UPI) — Moslem extremists freed U.S. hostage Frank Reed in Lebanon Monday, turning him to Syrian authorities who in turn handed the 57-year-old educator over to U.S. officials, ending his 3 1/2 years in captivity.

Reed was the sole American hostage released in eight days.

"It was lovely. It was boriing," Reed, looking pale and haggard and wearing a blue suit and colorfuI tie, told Syrian television after his release.

"Of course, I am very happy to be free," he said.

Reed, who was kidnapped Sept. 9, 1986, from the campus of Beirut University College, was freed by his captors in Beirut and turned over to Syrian troops, who drove him to Damascus to turn him over to U.S. officials.

His release came eight days after Moslem extremists in Damascus freed American hostage who taught at Beirut University, 55-year-old Robert Polhill.

Syrian officials said it was now time for the United States to return the "gesture of good will."

"I hope this second gesture of good will will be met with a similar gesture of good will (from the United States) in the process of releasing hostages," Syrian Foreign Minister. Panault Al Shaara said after delivering Reed to U.S. Ambassador Edward Djejen.

Reed was put aboard a U.S. Air Force Transport Command plane for the six-hour flight to Wiesbaden, West Germany, where Djejen said he would undergo medical checks, some debriefing and a reunion with his wife.

In Malden, Mass., Reed’s 91-year-old mother, Leota Sprague, said the family was overjoyed by his release.

"I’ve had an awful hurt since he was taken," she said, "but it isn’t going to be there any more."

In Washington, where President Bush was welcoming Polhill to the White House Monday night, Syrian and Iran for their help in freeing both hostages and said he was optimistic other Middle East hostages would be released.

But Bush said he was unaware of any deals for releasing hostages, said he could not explain what prompted their kidnappers to free Polhill and Reed, and said that a "thank you" was all Syria and Iran could expect as long as other hostages were held.

"We can’t, in terms of overall relationships between countries, expect normalcy or expect vast differences in treatment of hostages when we are free," Bush said. "We’re not in a pecuniary basis, bidding for one human life, holding out hopes only to have them dashed."

One cadet volunteers to drop ROTC

By Brian Gross

Staff Writer

Reserve Officer Training Corps programs nationwide have asked for 1,000 graduating cadets to voluntarily withdraw from the military training program, but SU-C programs found just one volunteer.

The Pentagon has requested the reduction in the number of entering lieutenants because of reductions in the 2 1/2 million armed forces.

Col. Walter N. Schechter, associate professor of aerospace studies at SU-C, said only one SU-C cadet volunteered to leave the Air Force ROTC program two months ago when volunteers were requested.

"(The withdrawal) was voluntarily offered to the graduating class the time around," Schechter said. "It is most unusual, that no other cadets were asked to leave, but this did have a mental impact on our cadets."

New computer to update library

By Omonpee O. Whitleff

Staff Writer

This summer Morris Library will say goodbye to an old friend.

On July 1, the card catalog, previously a permanent fixture at Morris Library, will be "closed" and replaced with a computer card catalog system--ILLINET Online.

The traditional card catalog system will remain in Morris Library, but after July 1, it will no longer be updated. Instead, the I0 system will receive all new entries.

The system offers access to more than 800 libraries in 35 member schools statewide. Its database contains more than 4.5 million items from the collections of small corporate libraries, public libraries and major research libraries throughout Illinois.

It is one in a series of two systems, Library Computer System and Full Bibliographic Record.

ILS is a short record circulation system for more than 30 member libraries and provides the call number, location and availability of items owned by LCS participants.

FBR, new to Morris Library, is a computerized version of the traditional card catalog. FBR's easier access to resources enables Morris Library to close its traditional card catalog.

Previously, LCS was the only computer system used and offered access only if the complete name of an author or the complete name of a work was provided.

With the addition of FBR, resources in the system can be traced using part of an author's name or a partial title of work.

Robert Wallbaas, Deputy Director of Academic Affairs for the Illinois Board of Higher Education said although none of the costs for I0 and LCS are passed to the user, the additional resources in the FBR system "is a significant improvement" of the catalog.

Government gives attention to dioxin levels

WASHINGTON (UPI) -- The government, citing new health risk studies showing cancer threats as high as one in 1,000, announced Monday to cut dioxin residues in fish and such food-related paper products as milk and juice cartons, TV din-

ner and butter wrappers.

Federal officials said the biggest cancer threat was to frequent con-

sumers of fish caught downstream of paper mills, which discharge dioxin-laced wastewater.

However, they acknowledged there also were small but signifi-

cant risks to the average consumer from dioxin residues in bleached paper containers and wrappings in which a wide vari-

e of foods are packaged.

The residues are generated dur-

ing the pulp bleaching pro-

cess began, the mine site was very acidic and consisted of mostly cob piles and slurry pits. Cob and slurry are the impurities in coal removed at the mine before shipping or storing.

Nawrot said water leaching through the cob became very acidic from the cob pyrites--

commonly known as fools gold--which has a very high sul-

fur content. He said this not only made those areas useless for plants, but damaged the areas where the water drained.

"Nobody operates a water treat-

ment plant at the site which uses chemicals to remove the acid from the acidic water, but this only works to fix the symptoms," Nawrot said.

**Baseball team earns No. 10 ranking**

By Greg Sceit
Staff Writer

After sweeping a four-game series from Illinois State, the Saluki baseball team continues to move up in the national rankings. The Salukis (38-8) are ranked 11th in the nation in Baseball America, 11th by Collegiate Baseball/ESPN and 12th by the pitchers poll. After finishing last in the Missouri Valley Conference with a 26-38 mark last season, the Salukis have established themselves as one of the best teams in the country this year.

"We had 38 last year too," said Wichita State's new head coach, Tommey Jones. "Thirty-eight losses. Not often do you have the experience. We are a team that could hardly win one year, come back with the success we have had this year.

"The Salukis and Creighton are tied for the Valley lead with 12-4 records. Defending national champion Wichita State is 11-5. All three teams are nationally ranked.

"Wichita State (40-11) is seventh in Baseball America, 12th in the Collegiate Baseball poll, 13th by the pitchers poll and seventh in TSN. Creighton is ranked 17th in Baseball America and 16th in Collegiate Baseball/ESPN.

"The Salukis play defending Valley tournament-champion Indiana State (6-10, 34-17) in a pair of noon doubleheaders Saturday and Sunday at Abe Martin Field. Wichita State plays at Creighton Saturday and Sunday."

"This a great attraction for the fans because we've never had a team ranked that high that I know of," Jones said. "They used to not rank teams that much."

Jones said in the past only the eight teams that advanced to the College World Series were ranked. In 1969 when Jones was an assistant coach under Joe Lutz, the Salukis were picked to win the Series but lost their first two games.

**New Salukis**

A junior college standout and two high school players have signed national letters of intent to play baseball at SIU-C next season.

Marcus Grace of John A. Logan College was the first of the two to sign. Grace, a 6-2, 200-pounder, was the Most Valuable Player of the South- Central Region Tournament this season. Grace's signing was announced last week.

**Women's tennis takes fifth at conference finale**

By Peter Zalewski
Staff Writer

The women's tennis team competed against Wisconsin on Saturday with a 5-3 win over Eastern Illinois to place fifth in the Gateway Conference Outdoor Tournament in Charleston.

"A great day to have the team win," said Agnich. "We came back 3-1 at No. 2 doubles against the Lady Sycamores."

Women's tennis coach Jennifer Brown said the Lady Salukis had a solid showing in the regionals.

"We have had a good season," Brown said. "We have been able to compete with the competition and that's a step in the right direction."

The Lady Salukis will now get ready for the spring season and the Big Eight Conference.

**Baseball: Salukis to play Austin Peay today**

By Eric Bagger
Staff Writer

After being rained out of two doubleheaders last weekend, the Saluki softball team, ranked 18th in the nation by a variety of sports polls, will play Austin Peay at 3:00 p.m. today.

The first game of the twin bill begins at 3 p.m., with the second scheduled to follow at 5 p.m.

The Lady Salukis are 29-6 on the season and are just one away from the school record for victories.

The Dawgs were scheduled to battle Western Illinois, Gateway Conference West leader and traditional favorite, and Bradley last weekend, but rain canceled both matches.

Austin Peay is one of the few teams that have a better record than Carbondale with a 19-26 record. The Salukis are 8-0 against the Governors this year. The Lady Salukis opened the scheduled season opener to be at Austin Peay, but the game was canceled because of rain.

Last year the Dawgs routed Austin Peay 10-0 and 9-4, with senior Jennifer Brown and sophomore Dede Darnell getting the victories.

The Salukis are in the midst of a 16-game winning streak and are 10-0 in conference play.

The Salukis' three seniors will be honored as part of Senior Recognition Day this afternoon. Team captain Shelly Gibbs, Jan Agnich and Brown, the only seniors on the Salukis' young roster, will be recognized, along with family members present at the game.

Gibbs, a native of Carbondale, holds nine SIU-C career records, including games (176), at-bats (540), hits (183), home runs (12), RBIs (90) and runs (81). Gibbs' .402 batting average is tops in the Saluki lineup and ranks her among the best in the NCAA.

Agnich usually occupies the designated player spot. She has sparked this year for the Salukis, posting a .330 batting average and a .516 slugging percentage. Agnich, out of Minooka, has seven doubles, which ties her for the team lead with Gibbs, and has struck out only twice this year.

Brown, a transfer from John A. Logan and a native of Herrin, has a commanding 8-2 record, while compiling a 1.26 ERA in 66 2/3 innings of work. Opponents have been able to squeeze out a mere .196 batting average against Brown.

"Every loss we've had this year in a match with Indiana State."

Women's tennis coach Jennifer Brown said the Lady Salukis had a solid showing in the regionals.

"We have had a good season," Brown said. "We have been able to compete with the competition and that's a step in the right direction."

The Lady Salukis will now get ready for the spring season and the Big Eight Conference.

Two killed, six wounded in Nepal outbreak

KATHMANDU, Nepal (UPI) — Citizens angry that anarchists burned files possibly incriminating to the past governments mobbed the home of an official demanding the man open fire, killing two people and wounding six, witnesses said Monday. A different account by Nepal's official news agency said two people were wounded when the official's guards opened fire in the western resort town of Pokhara. Residents and official sources said after the incident, the military deployed troops Monday to patrol the town, where shops were closed.

Rebels: Ethiopian army has mass deflections

NAIROBI, Kenya (UPI) — An estimated 1,800 Ethiopian government soldiers have switched sides in the bloody fight over the country's Fann district, the clandestine rebel radio station claimed Monday. The Voice of Ethiopia radio, metodo in Nairobi, said the defecting soldiers who joined the Eritrean People's Liberation Front came mainly from three garrisons south of Massawa port, 470 miles north of the Ethiopian capital of Addis Ababa.

Former aide to HUD secretary testifies

WASHINGTON (UPI) — DaBois Gilliam, once a top aide at the Department of Housing and Urban Development, testified Monday that former HUD Secretary Samuel Pierce used political favoritism as a means of distributing agency funds. But Gilliam, currently serving a prison term for convictions arising from the Reagan-era domestic scandal, also said, "In the bottom of my heart, I don't believe Secretary Pierce ever took any gravy or kickback from anyone while at HUD.

NASA engineers get Hubble Telescope unstack

GREENHILL, Md. (UPI) — Using everything from computer images to a homemade toy model, NASA engineers freed a camera on the Hubble Space Telescope, "a major milestone" in bringing the giant observatory to life, officials said Monday. Having solved the nagging antenna problem at 10:25 p.m. Sunday, engineers then switched on a computer on the 13-ton telescope orbiting 381 miles above Earth and took initial steps to activate its five high-tech instruments.

U.S. Supreme Court rejects appeal of Walker execution

WASHINGTON (UPI) — The U.S. Supreme Court Monday rejected an appeal on behalf of Illinois death row inmate Charles Walker, opening the way for the first execution in the state since 1962. The court rejected without comment an appeal filed by Sister Miriam Wilson, a Roman Catholic nun from Chicago; Patricia Vader, director of the Illinois Coalition Against the Death Penalty; death row inmate Ronald Barlow and others. Justices William Brennan and Thurgood Marshall dissented. Walker has asked to be executed and was not a party to the appeal. He was convicted in 1988 of two murders in St. Clair County.

Auto insurers are overcharging, study says

SPRINGFIELD (UPI) — Illinois insurance companies overcharged motorists by $546 million in the last five years as insurance premiums soared higher than those, a consumer group said Monday. The watchdog group Illinois Public Action released a study based on data compiled by the state Insurance Department that showed auto insurance premiums rose 51 percent from 1984 to 1989 while losses increased by 36 percent.

Corrections/Clarifications

Bob Strauss, above, and Anne Roosevelt speak at the fund-raiser for Sen. Paul Simon Monday at the Student Center as the senator's wife Jeanne looks on.

"It's because we are close to the people," Paul's bid for the presidency enhanced his national reputation," Strauss said. "The people of Illinois are very lucky to have him as a senator."

Anne Roosevelt, granddaughter of four-term president Franklin D. Roosevelt and campaign manager for Simon, said it was a privilege to manage his election campaign. "Simon's a fighter and we're going to run a tough re-election campaign," Roosevelt said.

The latest poll conducted by Political Media Research Inc. of 824 registered voters showed Simon leading Martin 52 to 33 percent with a 14 percent margin of error.

Candidate for treasurer: Update tax code

By Anne Ryman
Staff Writer

Illinois' current tax code was written for use prior to World War II, and needs to be updated to give relief to wage earners, senior citizens, renters and working parents with children, Patrick Quinn, Democratic candidate for state treasurer, said.

Quinn said current Illinois tax laws are biased against families with children. The Illinois Taxpayers' Initiative would double the personal exemption on the state income tax from $1,000 to $2,000 for each dependent child, which would match the federal exemption. Illinois is one of the few states that hasn't made any upward adjustments in its personal exemption in the past 20 years, said Quinn.

"Right now, you can get a better tax break by raising thoroughbred horses in Illinois than for raising kids," Quinn said.

He proposed establishing an Illinois Family Tax Credit to reduce the tax burden on working parents caused by property taxes, sales taxes and gasoline taxes. The Illinois Family Tax Credit would be modeled on the federal tax credit for low-income families included in the 1986 Federal Tax Reform Act.

A family with an adjusted gross income of $14,000 or less is eligible for the tax credit under federal law. The proposed Illinois tax credit would be 25% of the federal credit amount. This credit would help relieve the burden of income, excise, sales and property taxes, said Quinn.

The initiative would also allow renters a deduction on their state income tax. This deduction would account for the indirect property taxes paid by renters when landlords raise rents to account for higher property taxes, Quinn said.

For the first time, renters would be able to deduct 20 percent of their annual rent payments from their state taxable income.

Under the Illinois Taxpayers' Initiative, senior citizens and persons with disabilities would be eligible for a state grant by earning $18,000 or less. Currently, $14,000 is the cut-off point for eligibility. This would allow for senior citizens and persons with disabilities to receive a state grant for the amount by which their real estate taxes exceed 3.5 percent of their annual income.

The Illinois Taxpayers' Initiative would be financed by cutbacks in spending and closing loopholes.

Loopholes are potential revenue given up because of special exemptions, credits, deductions or preferential tax rates.

"In the past decade, these tax breaks haven't created any new economic growth in Illinois that wouldn't have happened anyway," Quinn said.

It took Freud 38 years to understand it.
You have one night.

The psych exam is in 12 hours. And your id wants to party. Your ego wants to conk out. But your superego knows you need to stay awake tonight to cram.

Fortunately, you've got Vivarin. It helps keep you awake and mentally alert for hours. Safely and conveniently. So all your brainpower can focus on understanding the brain.

If Freud had used Vivarin, maybe he could have understood the brain faster too.
New loan legislation preserves education

SOME RELIEF may be in sight for graduating seniors who are starting to worry about paying back all those loans they’ve accumulated during their college careers. Loans are meant to be an investment, not a financial burden. There has been a bumper crop of loan recipients within the last 10 years. When these students enter the work force, they are making decent salaries, but the committee fears that all the revenue generated by these loans is not returned to the economy.

However, with economic prices soaring and a society plagued by large numbers of illiterate, unemployed people, we need to do more than just cover the loans. Through which individuals can educate themselves. So what’s the alternative?

FORTUNATELY, the committee suggested four changes to current legislation to combat these persistent problems. These changes would not reduce the number of loans but could change the nature of the loan agreements to allow students more flexibility in repayment of loans. The committee proposes that students be allowed one year (instead of the current six months) before they must start repaying their loan. This would allow recent graduates more time to get situated in their place of employment and a chance to become economically stable before the monthly payment schedule would kick in.

Loan payments also would be on a sliding scale, so those who make less would have lower payments, albeit over a longer period of time and with more interest applied, than those whose starting salary is a higher amount.

PEOPLE WHO mis’ a few payments but have a good record in making previous loan payments and made consistent efforts to repay their debt should remain on good standing status instead of being put on default status. The rules should be a little flexible and loan defaulters should be allowed to get back on an individual basis, rather than just being a number on some computer.

These are just suggestions, but they are very good suggestions that go a long way toward returning the human element to a system too often dehumanizing and institutionalized process, higher education. The IBUF as a chance to act on these points during the reaffirmation of the Higher Education Act. The act establishes financial aid and loan programs under the reaffirmation process every four years. It would be an excellent opportunity to improve the lives of thousands of students in the state of Illinois.

Letters

MAPP protest highlights apathy on campus

Patrick Schaefus’ sister (Dr., April 24, 1990), bemoans the activities of the Mid-America Peace Project (MAPP) and its president, John McHale. Why? MAPP sponsors many events in support of peace and environmental interests. Mr. Schaefus chose to respond to MAPP’s concerns when he received a letter from MAPP’s restaurant in the Student Center.

We are pleased that Schaefus took the time to express himself. However, along with the privilege of free speech comes the obligation to speak responsibly. Schaefus failed to fulfill that responsibility.

Schaefus, in his letter to MAPP and MAPP for two reasons. First, Schaefus claims that students will happily buy McDonald’s products and that McDonald’s will stay in business even if the corporation “unsuccessfully ‘infiltrate’ the Student Center. These arguments are substantively correct. However, they have nothing to do with MAPP’s arguments. MAPP, as we understand it, is less interested in keeping McDonald’s out of the Student Center than in asking them to use recyclable and reusable packaging.

Second, Schaefus claims that his “carton of fries” was recy-clable. We are quite gratified that he noticed, but most of McDonald’s product packaging is either unrecyclable or, more often, too expensive to recycle. McDonald’s could rectify this problem by switching to alternatives packaging, but most of their franchises have not made such a switch.

Further, recyclable products are of little use when they are thrown into plastic trash bags which are not biodegradable, and then placed in landfills. Unfortunately, this is common practice at McDonald’s. We suspect that McDonald’s could recycle its food and beverage waste, and still make a considerable profit.

Finally, Schaefus appears to find pleasure in picturing an American company going out of business, dead from lack of shade.” We are not amused by this image. Deforestation is a global problem, and much of the problem can be traced to consumer behavior, such as ours where consumption far exceeds needs. If recycling by McDonald’s pushed prices up a few cents more, and monkeys and forests might be saved, so much the better. When we strongly support recycling.

We are neither MAPP members nor “fearless do-gooders.” However, if Mr. Schaefus believes that MAPP’s arguments are faulty, we suggest he spend his time addressing those arguments, rather than making fun of them. In the meantime, we will support the do-gooders.

Playing dead on the sidewalks and scribbling with chalk is doubtlessly preferable to doing nothing. At least MAPP got Schaefus’ attention. We hope that Schaefus will now take the time to act as a responsible advocate for the environment.

Armchair critics should react, not just condemn

On April 25, Phil Schayer wrote the Daily Egyptian in critici- zing Mid-America Peace Project’s actions against McDonald’s. He said that if MAPP really cared about the environment they would talk to someone from the corpora­ tion offices in Oakbrook, Ill., instead of protesting here. He also claimed that MAPP is “... far too late...” with their actions; that the plans for a campus McDonald’s have been finalized. I would like to present Phil with a few facts:

1) As of April 4, the date of MAPP’s “die-in” protest, no con­ tract had been signed. Why? Because MAPP’s knowledge, plans for McDonald’s is reviewed by the President’s Committee and is reviewed to make sure that all that's involved in the project will work. If the project is worth it, it will be put into a building.

2) As a result of MAPP’s protest, McDonald’s sent market­ ers to talk to people from Oakbrook to SIU on April 19. Unfortunately, her two-hour meet­ ing with John McHale, MAPP president, did little to resolve the issue.

3) A recent Daily Egyptian arti­ cle outlined McDonald’s innova­ tive program of building new facilities with construction mate­ rials made from recycled prod­ ucts. The proposed campus facili­ ty, however, is not going to be part of this program.

4) Separating trash implies that McDonald’s will recycle. They have no recycling facility in the Midwest. Why separate trash?

Phil, an armchair critic such as yourself needs to be better informed. I suggest you join MAPP (or some other worthy environmental action group) and become part of the solution.

Editorial Policies

Signed articles, including letters, viewpoints and other commentaries, reflect the opinion of the individual author. The editors of the Daily Egyptian, whose names are the student editor-in-chief, the editorial page editor, the associate editorial page editor, a news and feature editor, a managing editor and a School of Journalism faculty member. Letters to the editor must be submitted directly to the editorial page editor. Room 1247, Communications Building. Letters should be typewritten and double spaced. All letters are subject to editing. Letters must be no longer than 250 words. Students must identify themselves by class and major, faculty members by rank and department. Nonstudents must state position and affiliation. Letters for which verification of authorship cannot be made will not be published.
MINES, from Page 1

not the cause of the problem. Professor John Sandusky said, "By treating the cause, much of the damage could be prevented to be converted to good quality areas," he said.

He said to reclaim the land to the point where the 27 acres of wetlands will be able to handle the acid still being leached from the once useless site, Nawrot said.

He said a student's residence in the area. Sandusky said the reason the site was in such bad shape was because mining operations started there in 1954, before any laws requiring concern for the environment were in place. Mining operations ended in late 1987, he said.

The first laws requiring any concern for the land were passed in 1992.

Sandusky said the goal is to let Mother Nature continue to find its own way. Because of the current rate, he said, Peabody will be able to shut down the water treatment plant and close down the building off the wildlife that has moved into the area.

"We've got just about everything you want to look at that is indigenous to Southern Illinois," Sandusky said.

He said a large variety of ani-mal and plant life are in the area. He said if it is simple, that's even better," Nawrot said.

LIBRARY, from Page 1

muralists, terminals or other related classes.

Darrell Jenkins, director of libraries for the past 10 years, Morris Library paid $210,000 dollars for the use of IU and RO TC for the first year of the terminals and training ses-sions.

Betty Glass, 10 coordinator, said training sessions have been at Morris Library for the past year. The last day for spring training ses-sion is Thursday, Glass said training ses-sions will resume at the beginning of the summer term, July 1, she said. Individuals interested in contact her at Morris Library at 435-1656.

Training sessions include both students and faculty, Glass said. The sessions had a better turnout in the fall semester, she said. "We have a big push last fall," Glass said.

"We started training the faculty first. May 22. We felt the switch did not go over well," Glass said.

Glass said there have been sever-al steps taken on her part as well on the part of the faculty and administrators to inform people about the IO system, including: mandated IO training sessions for students in certain classes.

"Currently, 83 10 and smaller classes have brought the whole class to the training sessions. Some professors have made outside class announcements and Casey to the students to "There is a lot of hate speech that I have to deal with every day and I don't have a lot of time to deal with it," says the class. The class is called "Hate Speech in the Workplace." It is a continuation of the class that was offered last year.

The class is taught by Dr. Jon C. Harper, professor of Communication and Media Studies. Harper said the class is designed to help students understand and deal with hate speech in the workplace.

"The class is about understanding and dealing with hate speech in the workplace," Harper said. "We'll be looking at how hate speech is used to create a hostile work environment and how to deal with it."
Council to review street plan
Traffic signals, highway lighting, road repair to be discussed

By Nora Bentley
Staff Writer

A program to maintain municipal improvements from May 1 to Dec. 31 and a revision of the city’s affirmative action plan will come before the City Council for approval tonight.

The summer Motor Fuel Tax Maintenance Program has been allotted $225,465 in the Motor Fuel Tax fund and is also supported by a municipal estimate of $94,687.50, both for the eight months of the 1991 fiscal year.

Included in the program are traffic signals, highway lighting, repair of street surfaces, purchase of rock to repair roadways and shoulders, street sign supplies, the resurfacing of Poplar Street, Cherry Street, Springger Street and Oak Street, to buy rock salt and for rental of the City’s street sweeper.

The council is being asked to approve the program and authorize the City Manager to solicit bids after the Illinois Department of Transportation approves the conditional agreement.

Also on the agenda is a request for a revision in the city’s affirmative action plan. The revision is in response to requests by members of the black community to see more minority business enterprises involved in bidding for construction contracts with the city.

Citizens have approached the council, the Civic Center Authority Board, and the Community Relations Officer with these comments.

The revision, which is being called for, is Minority Business Enterprise Participation Plan for City Construction Contractors, will require bidders of every construction jobs to take affirmative steps to solicit proposals from minority business enterprises.

Another request to sell liquor along Route 51 South has also made its way to the council.

Owners, a liquor license for a convenience store considered by the Liquor Advisory Board and the Liquor Commission after the status change.

A construction contract will also be awarded for the West Cherry Street water main bid. It is recommended that the council go to the lowest bidder, Bush Construction Co. of Carbondale.

Students sweep R-T competition

By Jerianne Kimmel
Staff Writer

Student broadcasters in SIU-C’s Radio-Television Department swept a recent competition, by winning first-place awards in all categories.

“We try to do good work,” said Ken Keller, assistant professor of radio-television, “and the judges agreed.”

J. Michael McCormick, a senior from Germantown, Tenn., captured first place in the visual reporting category and in the television news photography category.

Kyle Wigg, a senior from Belleville, won first place in the television sports reporting category and in radio sports reporting.

Michelle Pullen, a senior from Galesburg, received an honorable mention for her television anchoring work, while David Jecklin, a junior from Bloomington, received an honorable mention for radio sports reporting.

The WSUI-TV 15-minute newscast, the “SIU Night Report,” which covers Carbondale and the surrounding areas, dominated the student telecasting program, sweeping five categories, and competed with 30-minute newscasts.

Traci Year’s entries were judged on the basis of recentness, format, writing, and production techniques by a committee from the Iowa Broadcast News Association at the University of Northern Iowa.

Judging was sponsored by SINBA, a student arm of the Illinois News Broadcasters Association.
Briefs

THE ACCOUNTING Society will have its elections at 6:30 tonight in Room 18.

REGISTRATION FOR the June 19-23 Graduate Record Examination (GRE) will close May 8. For details and registration contact Testing Services, Woody Hall B-203, at 536-3303.

THERE WILL be a moonlight canoe run from 5 to 10 p.m. Wednesday on the Campus Lake. The cost is $5 with an SIU ID. For more details call Greg Barletzie at 536-5531.

THE SOUTHERN Illinois Latin America Solidarity Committee will meet at 7:30 tonight in the Interfaith Center, 915 S. Illinois.

A RESEARCH analyst will speak from 3 to 4 p.m. Thursday in the Student Center Auditorium about the financial stability of the social security system. The admission is $3. For details call James at 549-4068.

THE CATHOLIC charismatc prayer group will meet from 7:30 to 9 p.m. every Thursday in the Newman Center, 715 S. Washington. For details call 549-4266.

THE BAPTIST Student Ministries will sponsor a free inter­national dinner for all international students and their spouses from 6 to 8 p.m. today at the Baptist Student Center Auditorium.

BRIEFS POLICY — The deadline for Campus Briefs is noon two days before publication. The brief should be typewritten, and must include time, date, place and sponsor of the event and the name and number of the person submitting the item. Briefs should be delivered or mailed to the Daily Egyptian Newsroom, Communications Building, Room 303. A brief will be published once and only as space allows.

Witness says Harris asked for help in restaurant caper

By Chris Walka
Staff Writer

Erico Wagner, formerly of Carbondale, testified Monday that Dennis Harris had asked her last October to help roj Jeremi­tus restaurant, 201 N. Washington St.

Harris is on trial for first degree murder, armed violence and armed robbery in connection with the shooting death of Jason A. Jackson, a former employee of Jeremia­tus and University student.

According to a Jackson County State's attorney, the death penalty will be asked for if Harris is found guilty.

Wagner, two forensic scientists, and an employee of Jeremia­tus were among the witnesses who testified at Monday's trial.

Wagner, serving with the U.S. Army at Fort Jackson, S.C., told the jury that Harris and Stanley Algee were with each other almost every day. They discussed plans for the robbery frequently, Wagner said.

Algee pleaded guilty to charges of first-degree murder and is now serving a sentence in the Menard Correctional Facility, Chester.

Wagner said she told Harris she did not want to become involved in the crime and that Harris had told her she would "just be there." Wagner also said Harris had asked to become involved in the crime.

Wagner said in the third week of October, she, Algee and Harris had parked in a parking lot facing the restaurant, looking at the estab­lishment and their cousin. Days later after Wagner indicated she did not want to become involved in the crime, Harris said he had found another person who would drive the getaway car.

Wagner said she and Harris were involved in a relationship since January 1989 and that they had been living together.

Wagner said she was aware that Harris might use a firearm in the robbery, and Harris had the 22 caliber revolver at her trailer one and one-half to two weeks before the robbery.

David Brundage, a forensic scientist with the state police forensic science laboratory in Carbondale, said tests were not 100 percent positive the bullet recovered from Jackson's body was fired from the weapon recovered at the scene.

Brundage said he could not say with certainty the bullet came from the gun, but neither could he rule out the possibility either. Brundage said the bullet's surface had been damaged, caused by rust in the revolver barrel.

Dr. Harry Parks, the pathologist who performed the autopsy on Jackson's body, said the shot that killed Jackson entered the left ventricle of the heart, creating a funnel that led to bleeding into a sac surrounding the heart. When the sac filled with blood, Parks said, it exerted pressure on the heart, causing it to stop beating.

Parks said this was the cause of death in his opinion.

Vietnamese communists celebrate victory over U.S.

Vietnamese students at SIU-C look, hope for changes at home

By Dale Walker
Staff Writer
In Ho Chi Minh City, Vietnam Monday there were celebrations by the communist government which marked the 15th anniversary of the South Vietnamese people 15 years ago.

But Vietnamese students at SIU-C don't feel very liberated. In fact, the U.S. involvement in the Vietnam War and recent relations.

"WE WISH TO forget the past and build a future with the American people and the American government," Linh said in an impromptu interview at the anniversary celebration.

Linh spoke in a park behind the presidential palace where a North Vietnamese tank smashed through the gates April 30, 1975, to end the 32-year war and reunite the country.

But, Linh called for an end to an American embargo on aid and trade with Vietnam, adding that Vietnam faced "many difficulties." 

HOANG KHANH Vuong, president of the Vietnamese Student Union in Chicago, disagreed Linh's call for new relations with the U.S. saying "Vietnam's new openness policy is just propaganda." 

Vuong said that soldier in the South Vietnam army and his mother escaped from North Vietnam to South Vietnam in 1954. Because his family was separated, Vuong said he would like to go back.

Vu, who is photo editor for the Daily Eagley, said the main reason many refugees leave the country is because of the poor economy.

"My mother gets one or two pounds of sugar for a month's salary," he said. "She has to work two jobs just to support herself."

Traditional socialist economic management has not worked in the economy, Vu said, adding that the currency is involved in with very little. The average annual income is from $100 to $150.

CHANGE--As in Eastern Europe and Nepal, it is likely to happen, Vu said, adding that the communist government has "learned its lesson."

"It's been 15 years since the war and the country is unbalanced. They need to open up to the world because it helps their economy," Vu said.

There is turmoil within the ranks of the government, according to reports Daily Eagley wire service.

GOVERNMENT officials said Bach's way would have led to demonstrations and strikes.

The Vietnamese leaders are widely criticized for the economic problems and the lack of discipline among party officials.

The party is ready for major personnel changes, especially with the retirement next year of Ho Chi Minh, 74, and government officials say the party will not be rushed into any changes with the government.

Dinh said the communist government will continue to fight for an end to the war.

Vuong said the changing face of communism around the world will have an effect. "With pressure from outside countries and from inside the country, the people of Vietnam will get change, but it will be right away."

Nguyen said that he was the oldest son in his family and the responsibility for caring for the younger children fell upon the oldest son.

"It's nice to change politically for the better, I would like to go back," Nguyen said.

**Language Immersion Day**

**Area high school students play games in foreign languages**

By Anne Ryman

Staff Writer

Fader Hall and the Student Center became another country for High School students from Southern Illinois who spent Immersion Day playing languages as part of Total Immersion Day.

All the students were allowed to speak only French, German, or Spanish for the whole day, Tom Thibeault, one of the event's organizers, said.

"Others thought the title is "Total Immersion" because the students must read, write and speak in a foreign language for the whole day. Students learn to communicate much more effectively by using total immersion," Thibeault said.

"It forces you to use whatever is in your head. You have to (use the language) in order to survive," he said. "It's the only situation aside from being in the country where you get to use the language in an everyday situation.

Student participants in the program were enthusiastic about the results.

"I got to interact and talk in Spanish for the whole day instead of just an hour," Anibr Zabolai, a sophomore at Carbondale High School, said. I expected it to be much harder than it was."

"I didn't have any trouble, but some people had difficulty in the beginning. In class, we don't do much talking. We just do exercises or learn words," Namita Dhakal, also a sophomore at Carbondale High School, said.

"Some of the students were shy at first because they had only one or two years of a foreign language, but as the day progressed they became less shy. At the end of the evening, they even performed a skit in front of the entire group," Thibeault said.

The 180 students that attended the event participated in games including "Jeopardy," "Win Lose or Draw" and "Twister," all in the foreign language.

The Total Immersion day is similar to a 2-week German immersion program held in the summer for SIU-C students. Student participants learn communication skills that are generally given in grammar, Thomas Keller, associate professor of foreign languages, said.

Now may be a good time to take a closer look at yourself and begin to make changes in your lifestyle.

To Your Health

The third annual Battle of the Bars, Carbondale's version of "Battle of the Network Stars," was held Sunday at the Olympic Inn, 201 N. Washington St.

Profits from the mini-Olympics, according to Supervisor Jeremiah's, will go to the Special Olympics.

Seven Carbondale bars and restaurants—Mugly McGuire's, Fiddler's, Gatsby's, Hanger 7, Sideracks, Holiday Inn and Checkers—participated in the events. Employees from each establishment made up eight teams, with Checkers sponsoring two teams.

The games included in five "Olympic" events—volleyball, basketball free-throw, shuffleboard, tug-of-war and a relay race consisting of leg rolling, flipper running and tray carrying.

The events started at 11 a.m. and lasted until 1 a.m. Trophies for first, second, third, last place and most spirited team were given out.

High energy levels and team spirit made each event exciting to watch.

The events took place in Jeremiah's beer garden, where there was plenty of room for both participants and spectators to enjoy the fun.

Jeremiah's provided both food and drinks, and music was provided by the Sound Core.

**Experts: Parents, game plan should be to keep sports fun**

By Mike Bass

**Daily News, May 1, 1990**

You’re a parent. You want to be responsible, you want to be fair. Every parent who watches the kid go bad would do the same. But sometimes you just aren’t sure how. After all, Ward Cleaver never had it so easy. He’d just throw the Beaver off the Nostromo, or worry if Willy had found a new way to tune in to The Brady Bunch. Besides, you want to know how to get your kids involved in sports. And that’s not as simple as it sounds. 

Yes, sports. How do you get your kids involved in sports? If so, how? What do you say? What do you do? Pull them into it? Pull them out?

Some of the psychologists, sociologists and authors who have been consulting sense and crossed fingers, today you have a chance to make sure you don’t traumatize your kids when it comes to such topics as sex and drugs.

And, yes, sports.

It’s not just the psychological, medical and athletic community. Everyone has a message that stands clear:

Don’t push.

"That’s very much the issue," Ravitch told Parenting.

Sports psychologist and author who has written extensively on the topic, Ward Cleaver, "I think it’s appropriate for parents to encourage children to participate in physical activity. But it shouldn’t go so far as to be coercive. It shouldn’t be into a sport where they feel they have to play because mom and dad want them to do it."

If a child shows some interest in sports, the coach is just as important, and I would try to offer some guidance in finding a good coach," he said. "One with good coaches, appropriate equipment and an appropriate level of competition." 

Ricky Pierce wins
Sixth Man award for second time

**Milwaukee Journal**

Milwaukee Bucks guard Ricky Pierce, whose 23-point scoring average led his team and all NBA reserves, Monday won the 1990 NBA Sixth Man Award.

It’s the second time Pierce has won the award — the first came in 1987. Boston’s Kevin McHale is the only other two-time winner of the award. 

Pierce received 77 of a possible 92 votes from a statewide panel of sportswriters and broadcasters — three from each NBA city and 11 representing the national media.

Indiana’s Detlef Schrempf rounded out the vote with 61th

second in the balloting.

America’s biggest and best college program since 1868

Outside basketball, Norman was in the clubhouse with a one-shot lead over rookie sensation Robert Guzmans when Gamez held a 1-iron from the fairway at the final hole to again make Norman a victim.

And then Frost did it again Sunday in the USPGA Classic — ending a drought that had seen him miss eight cuts in a row.

If Norman never wins another tournament, his place in golf lore is secure because of what others have done to him.

Even if Norman never wins another tournament, his place in golf lore is secure because of what others have done to him. First there was Bob Tway, belting a bunker shot at the final 18th hole of the 1985 USPGA Championship to down Norman when those two players had gone six under the 18th tied.

Then there was Larry Mize, chipping in from 150 feet for birdie on the final hole to beat Norman and become the new USPGA Champion in 1987.

But Norman said better than anyone why the young players he has been fighting to win tournaments.

"That’s golf," he said.

"But just supporting your offspring’s decision to enter a sport is not enough.

"I advise that parents look at where they’re sending their kids," Novicki said. "Most of the horror stories we learn...the parents didn’t even know what was going on.

You’ve got a coach who’s not a teacher, who coaches by what someone did to him in the past, like doing the wrong thing to try to get someone ready for activities — like running until you throw up.

So, yes, they’re going to have a few general questions, his general philosophy.

If kids are taught to believe they are winners only when they win the game, it can put incredible pressure on them and can damage their self-esteem if they do not win. A coach who wants them to strive to win — and doesn’t forget they are kids — is a coach with the right perspective.

"There are a lot of well-intentioned coaches, who are just so misinformed," Martin said. "The idea of winning at all costs is so prominent in our society. You have to be careful of the insurance salesman who is coaching an 8-year-old’s soccer team, and begins to coach like Bobby Knight pushes his Indiana basketball team.”

Martin recommends setting the child’s level — which might not always match age level — be a guide. He says the average child can begin to handle non-contact sports, 8-year-olds can start contact sports (such as basketball), but no collision sports (such as football) should be played until age 10.

"I’m a big proponent of foot ball," said Eric Novicki, an athletic trainer at the Cincinnati Academy of Physical Education and a certified stress and conditioning specialist for Sports Therapy Inc. "But for a youngster, it is far from the most intelligent level for an all-around activity, such as soccer, swimming or running.”

At the lower levels, especially, coaches must be on the look out for participation and fundamentals. The higher, more competitive levels, do not necessarily have rules that force mandatory participation for everyone. In this reason why forcing your child to play at that level when he or she is not ready could be counterproductive.

Sports can be beneficial to children, even if they never make millions of dollars in the pros — or even play a game of high-school ball, it is absolutely necessary for them to partake in sports at all, although it helps.

"Sports are not absolutely essential for success," Martin said. "It is important for all children to develop their abilities, whether in the classroom or in sports. And early in life, you tend to develop your concepts around your physical self. Therefore, early experiences in sports are really quite important.”

**NEW ORLEANS (UPI) —**

As David Frost stepped into the huge greenside bunker right to the 18th green of the English Turn Golf and Country Club last Sunday, the Norman Nation was engaged in conversation with the executive director of tournament sponsor.

Frost needed to get up and down from the bunker on the way to tie Norman and force a sudden death playoff.

Norman has told of a sensational closing round 65, was not even looking at the 18th green as he hit iron and shot. But Norman certainly heard the roar of the crowd as the ball tricked into the cup.

Norman looked at the man to whom he had been talking and posed a simple question.

"Again?" Norman asked.

"Yes, again. Once more Norman had been delivered a dose of agony by an opponent, adding to what has become one of the most fascinating chapters in golf history," Martin said.

Even if Norman never wins another tournament, his place in golf lore is secure because of what others have done to him.

"But Norman's performance has been so consistent, even looking at the game of the player who may have bested Norman in bizarre circumstances," Martin said.

"That’s golf, I guess," Norman said later.

"But Norman and Frost move on this week to play in the Byron Nelson Golf Classic in Dallas on the Tough Course.

It will be the only second appearance for Norman in Dallas, but in his previous trip there (1987) he opened up with a 6-under par round.

Chances are he will be in contention again, but as he has learned over the last few years, a one-shot lead going to the last hole may not be enough.

Norman again ousted on final hole of tourney

NOTEBOOK

Logan Junior College in Carlisle, Pa., has been relocated to its new campus at 1000 College Dr. in Carlisle, Pa., and the campus has been named for Logan's founder, John Logan. The college has been in operation since 1921 and currently enrolls about 1,000 students.

Grace, a Metropolis native, is a locomotive engineer at the California Zephyr and has worked for the railroad for 15 years. She is a member of the Union Pacific Railroad Association.

The Salukis have signed six players to their 2019-20 roster, including Matty Webster (catcher-infielder) and Danny Espinol (pitcher) signed earlier this season.

Pitches to control

Saluki opposite-right-hander Tim Reamer uncommitted at 4-1 in Valley competition and has signed with Illinois State. Bergman is 7-4 overall.

Saluki catcher Derek Sheldon said Bergman's intelligence on the mound is a key.

"Bergman is a smart pitcher and he can make you look bad in all three things," Sheldon said. "He has a great record and his fast ball has good movement and pop. He can throw the changeup when he's behind in the count.

"He's done a good job all season," Jones said. "His immunity in those low-count situations cost him last season. He's a competitor that likes to finish games. He always has that something extra at the end." Bergman has three complete games this season.

"He's our first pitcher in a Valley game and because we feel he is the one guy that is strong enough," Jones said.

Even Mel Kiper, who never thought much of Harris' pro potential, had projected him as a fifth-to-seventh round choice as recently as February. Harris had a good showing on the draft, but Rice was devastated. At Notre Dame, little less than shock was the reaction. Asked for his assessment, Notre Dame coach Lou Holtz was virtually speechless. His conclusion was, to paraphrase, "go ask NFL personnel men.

WHAT DOES I say about a league that will play the likes of Stewart Pellegrin, Bob Giglione, and others in a season, the like of which cannot be bordered with the likes of Harris and Rice?"

"What I learned in less than a lifetime is that people are just as stupid about their opinion as you might be about yours," Hackett said. "I'm flabbergasted that (Pitt wideout) Henry Teiten didn't get drafted. You've just got to face the fact that it's a different league."

Yeah we do. We do. Too. Bad too. That league. I remember names Tony Rice and Major Harris the next time some NFL executive tells you he's in the entertainment business. He's not. He's in robotics.

Three veterans are missing from Colts mini-camp

INDIANAPOLIS (UPI) -- Quarterback Chris Chandler and running back Eric Dickerson, as expected, failed to show Monday for physical exams at the first day of the Indianapolis Colts mini-camp.

But veteran defensive tackle Harvey Armstrong failed to show as well, and team officials say they don't know why he is among the missing.

Chandler, who expected to be starting quarterback this fall, said contract hassles and the presence of No. 1 draft pick Jeff George, a quarterback who received a six-year, $15 million contract, are keeping him from camp.

Chandler is scheduled to make $150,000 in 1990 and $300,000 in 1991. He is looking for a contract extension that could give him more than $75,000.

"I'm not going to show up," he said. "I just don't feel comfortable with the way things are right now.

clubbed a 223 after a week off because of a viral infection to finish the season with a .341 batting average, a .433 on-base percentage and 116 RBIs.

Sophomore Sean Leckrone stroked a 226 and juniors Rich Knepper (228) and John Sullivan (229) finished with 229 and 236 respectively to round out the scoring for the Dragons.

The victory gives the Dragons momentum going into Valley Conference play. The Dragons' next match will be against the University of Iowa and Missouri's Truman-Jessop-Rose Golf Course in Osage Beach, Mo.
