Swinburne takes on extra responsibility

By Ray Robinson
Staff Writer

President for Student Affairs Bruce Swinburne, in an effort to more closely coordinate the activities of the Office of Student Work and Financial Assistance, has reassigned responsibility for the office from the dean of Student Life to himself.

Swinburne said the move was effective Thursday.

He said the move was not the result of any displeasure on his part with the office, "but it reflects my desire to get closer and see what kind of positive impact I can have."

Swinburne said the office is expected to distribute $27 million in financial aid to 17,000 students this year.

"It is a mission of enormous importance on this campus," he said. "I have a strong interest in it. I want to be personally involved on a day-to-day basis."

Swinburne said the position of Gordon White, who has been the director of the office since April of 1977 is secure.

White said his reaction to the move was "one of mixed emotions."

"Over time, the extra layer has taken time which has sometimes made it harder to get the job done," White said.

But, Dean of Student Life Harvey Welch had been "supportive and helpful" in bringing about changes such as the office reorganization which was undertaken in May of 1978, he said.

"I was happy to be reporting to Dean Welch at that time," White said. "But the need for that much time and support is not in existence at this time."

While added that with the current reorganization of student aid expected in the upcoming year, he thought reporting directly to Swinburne would be very helpful to him.

In an apparently related development, Swinburne said Welch, who has been ill and away from work for about six weeks, had requested a six month leave of absence on work on his doctorate in higher education.

Swinburne said Welch's request would be presented to the SIU Board of Trustees at a future meeting.

Will Travelstead has been acting dean of Student Life during Welch's illness.

F-Senate nominee to head search group

By Paula D. Walter
Staff Writer

Joann Boydston, a Faculty Senate representative and director of the Center for Dewey Studies, has been selected to head the 12-member SIU-C Presidential Search Committee.

Boydston was elected Tuesday by sealed ballot following the group's first working session with Chancellor Kenneth Shaw.

Boydston said she was pleased at being selected and is looking forward to the "major responsibility" ahead.

"I consider it (search committee) the most important committee functioning here at the University for the next seven or eight months," she said.

The committee will conduct a nationwide search for a replacement for Acting President Hiram Lesar, and select three finalists to present to Shaw by June 1, 1980. Shaw will then recommend a single candidate to the Board of Trustees for approval.

The search committee is composed of representatives from the Undergraduate Student Organization, Graduate Student Council, Faculty Senate, Administration and Professional Staff Council, Alumni Association, Civil Service Employees Council, Council of Deans and Graduate Student Council. The representatives were selected by Shaw after he received nominations from each of the constituency groups.

Boydston said she is pleased with the composition of the committee selected by Shaw.

"We have such a outstanding group and it has such an excellent balance. Some have been on search committees before and the ones that haven't will bring in a fresh point of view."

In her first action as committee chair, Boydston scheduled an open meeting at 3 p.m. Thursday in Faver 362. The meeting will be held in order to set operating procedures for the committee, she said.

Boydston said the committee feels quite confident about the forthcoming presidential search process.

"After our meeting Tuesday, each committee member felt quite confident that we will be nominating the next president of the University," she said.

Boydston, 35, is a professor of business. She came to the University in 1970 as assistant director for teacher training and has been director of the Center for Dewey Studies.

Mace requests budget cut for athletics

By Cindy Michaelson
News Editor

Funds for intercollegiate athletics this year will fall $180,738 short of the requests made by SIC and constituted a 7 percent error, Mace said.

Mace, the administrator in charge of intercollegiate athletics, said he projected student fees would generate $886,766 for the athletics program this year. On Oct. 8, he received a "firm indication" that the actual amount would be $702,981, causing a shortfall of $183,785.

The projections were made from enrollment figures provided by Institutional Research at SIU-C and constituted a 1 percent error, Mace said.

The total budget proposed by Mace was $1,061,499. For men's athletics, he proposed $530,209. From the budget submitted by Men's Athletics Director Gale Sayers, Mace proposes a $19,358 reduction in operating costs from $553,943 in scholarships.

In an apparently related meeting with Student Council of Deans and Senate, Sayers said he received a "firm indication" of a reduction in student aid from $31,223 in scholarships and $6,000 from air travel.

The revised budget deficit for both programs now totals $436,646, or 41 percent of the 1980-81 deficit of $1,061,499.

"I'm pleased," said Mace. "We have been conservative in budgeting positions that remain unfilled, and an indication of the deficit in student aid will help alleviate the deficit, Mace said.

Because the men's program is operating on an unappropriated budget with a deficit of about $389,000, Sayers was instructed by Mace's office to proceed with cutting salaries and expenses.

At a meeting with student leaders in his office Wednesday afternoon, Mace said he had "no reservations about releasing the budget in information which is timely and pertinent to the public and the day of a board meeting.

Student Trustee Bob Saal, Graduate Student Council President Gary Brown and Student President Pete Altmann were invited by Mace to discuss a proposed $10 fee to fund intercollegiate athletics and the possibility of this fee's effectiveness over a one-year period.

In a meeting next Thursday, the Board of Trustees will consider the proposed athletics budget and the possibility of this fee's effectiveness for the fiscal year 1981.
Furor over Thompson's vetoegin{align*}	ext{begins tax revolt, Burris says}
\end{align*}

By Andrew Zimner
Associate Editor / Page Editor

The furor over Gov. James Thompson's veto of legislation for the gradual elimination of the sales tax on food and medicine is "only the beginning" of a tax revolt by citizens of Illinois. Deputy Comptroller Janice L. Benson, chairwoman of the State Senate Finance Committee.

Due to an administrative change, Thompson funded WIDB's funds in a "cash account" rather than a "budget account," the radio station this year can spend only the amount of money it actually has in its account at a given time, according to Larry Juhl, assistant to the vice-president of Student Affairs.

Last month, WIDB had $11,000 in its account. It was allowed to spend funds it is anticipated to generate before the funds are actually available, Juhl said. Student activists and graduate students are placed in an entity account, the undistributed student fund pool, and the funds go in an individual intra-university accounts in order to keep bookkeeping straight, Juhl said.

Nancy Burris, senior editor for WIDB, said that if Thompson is technically using the funds of other groups, then none of the students' funds are being spent on non-revenue generating activities. Harris said WIDB must return the $11,000 by June 30, but expects the funds to be generated before then. Editor in Chief, Donna Kunkel, is in the last month of his graduation. Juhl explained that the university accounting system is designed to allow student groups some flexibility in using funds. With the cumulative entity account, groups that do not use all of their funds in a given budget period do not lose their money and groups that incur a deficit can "borrow" from the funds in the entity account.

Groups that incur a deficit must balance their accounts during the fiscal year budget, Juhl said, so that the funds that were "borrowed" are replaced.

Disposal of nuclear waste criticized

SPRINGFIELD, Ill. — The chairman of the Senate committee panel studying nuclear energy accused the state's largest utility, Commonwealth Edison Co., of sloppily handling shipments of low-level radioactive waste and packaging and shielding of low-level radioactive wastes.

"They've been careless," said Rep. Daniel M. Thompson, a Democrat of Springfield, Tuesday in response to the state comptroller's presentation proposing a limit on government spending when the Thompson administration decided to conduct a tax revolt rather than a tax hike.

According to comments made by Thompson in Springfield Tuesday, the rift between the comptroller and the governor is widening.

"Burrus can't add or subtract, and is now using politics and numbers rather than a realistic approach," Thompson said. He said Thompson couldn't take for no new spending programs, but the budget balance was higher than usual.

"However, a sales tax break is equal to a special program. Whereas a special program would be necessary, the tax break will bring in less," Thompson explained.

Burrus wasn't alone in taking criticism from Thompson, though. He also blamed the Legislature with irresponsible fiscal activity, saying that the lawmakers want to cut one source of revenue, not increase any more, but still spend a record amount.

"The Legislature spent $79 million more this year than last, even during recession," said Thompson.

Within the last month groups demand more money, thus there will be no tax relief," the comptroller complained.

He added that Illinois has an unprecedented amount of federal funds because of the situation, and for that reason, he supported the tax break. Burrus said 1.4 billion dollars came for a limit on government spending when the Thompson administration decided to conduct a tax revolt rather than a tax hike. He said he was "surprised" for this development on Thompson, because "the governor has control of the budgetary process."

State Treasurer and Brookville resident Ed Preckel, said that as of Monday, the state's general fund was $79 million compared to the same day total of $121 million last year. The large increase was due to inflation, which Burrus said was a "redoubt" for government.

"With inflation, the federal government has as much money as it's pathetic."

Special interest and pressure groups demand more money, thus there will be no tax relief, the comptroller complained.

Dorm air conditioning units arriving after two-month delay

By Leanne Waxman
Staff Writer

Thompson Point air conditioning units will be delivered Friday, after a strike within the company supplying the units delayed delivery for about two months.

University Housing Director Sam Rinella said the delivery of 900 units, which have been on order with the American Air Filter Co., for more than two months, will be delivered to the University at the rate of 100 per week. Four Thompson Point residence halls - Bowyer, Steagall, Pierce and Bailey - will be the first dormitories in the housing area to receive the new units. These four residence halls have been under installation and construction since July.

By August, Thompson Point residence halls, Southern Hills apartments and the Triads housing area are scheduled to be equipped with a new heating and cooling system. The new system at Thompson Point will enable residents to individually control the room's temperature rather than the temperature being controlled by a thermostat universal to three or four rooms.

The first completed installation of air conditioning at Thompson Point is 30 percent completed. Air conditioning installation work at the Triads is about 20 percent completed. Construction and installation of the new system at Southern Hills is also about 20 percent completed, Rinella said.

The completion of air conditioning at Southern Hills and the Triads has not been hindered by non-delivery of supplies because the contractors handling the project did not use the American Air Filter Co. for supplies.

Installation workers began cutting holes for the units, Felt Hall dormitory rooms this week. The holes will be fitted with metal sleeves prior to the installation of the air conditioning units. The majority of installation work at Brown Hall in Thompson Point is completed.

Work on an outdoor trench system, which will house electrical cables for the new system, began this week. The cables will be pulled through conduits and hooked up to an energy substation located near Wright Hall on East Campus.

"If we do not proceed with the work we are doing now, we will not have air conditioning by the fall of 1980," Rinella said.

Rinella said the dormitories currently under construction will not have to be supplied with an auxiliary heating system for the cold winter months. The original heating systems of these residence halls will be used until installation of the new system is completed.

Students are being notified seven days in advance that workers will be in their rooms. They are notified again 24 hours prior to any installation being done on their rooms, Rinella said.

The process of cutting the 4-foot-by-3-foot holes in the walls will vary according to the rooms. Air conditioners are being installed in 134 residence halls.

The process of cutting the 4-foot-by-3-foot holes in the walls in the dormitory rooms where air conditioners are being installed generates a considerable amount of dust and noise, according to Alan Hager, head Ukrainian, who is in charge of the project.

To help control the dust, the University is supplying residents with plastic covers to protect furniture and belongings.

News Roundup

Mexico City (AP) - U.S. Federal Aviation Administration officials focused on a severed engine Wednesday as they investigated the cause of a Western Airlines DC-10 jetliner that slammed onto a closed runway at smog-shrouded Mexico City airport, killing at least 63 of 188 or 69 persons on board.

The plane plowed into two buildings as it touched down on the runway. Shrapnel for repairs, hit a parked truck and killed its driver, then scattered chunks of wreckage in a swath over a residential housing and slum tenement district.

Workers said they did not have to be placed immediately if anyone was killed or injured on the ground.

One of the DC-10's three turbines came to rest intact near a fence about 900 feet from the rest of the wreckage. It was not known whether the engine fell from the plane before the crash or was hurled away on impact.

The U.S. Embassy here said the turbine was the tail engine of the U.S.-made jet.

Western officials here said they listed 186 persons on board, but 188 were said to have been aboard.

1-cent sales tax cut gains House OK

SPRINGFIELD (AP) - House lawmakers charged that the measure was "hiding behind the mask of tax relief," the Illinois House Wednesday after a 90 to 14 vote to cut the state sales tax from 6.5 to 5.5 percent. The measure passed the Senate last week and will go to the governor for approval.

The vote was 90 to 14 in the House of Representatives. The bill passed the Senate last week with no debate. The Illinois House yesterday adopted a resolution calling for a special session of the Legislature to consider a state sales tax cut. The move comes after a sharp drop in state revenues caused by a slowdown in the economy.

The measure is expected to generate about $2 billion in additional revenue to the state. The revenue would be used to fund programs and services, including education, health care, and transportation. The measure is also expected to have a positive impact on the state's economy, as it would provide tax relief to consumers and businesses.

The measure was supported by Governor J.B. Pritzker, who said it was necessary to address the state's fiscal challenges. The measure was opposed by some members of the House, who argued that it would lead to higher property taxes and a loss of state revenue.

Today is the deadline to turn in applications for the EL GRECO $1500 Scholarship

In appreciation of SIU student patronage

Applications can be picked up at El Greco or USO Office

The requirements are:

- 2.75 GPA
- ACT on File
- Community and/or University Service

For Information: Nick Gritti 536-3381 of USO
or Mike Howerton 457-0303 of El Greco

Sponsored by El Greco through USO
Connally's statements are reckless rhetoric

George F. Will

WASHINGTON—No one should question John Connally's intelligence, or it is permissible to be uncertain of his wisdom. And it is reasonable to conclude that his campaign is failing to threaten Richard M. Nixon.

Connally has now delivered an historic speech, making him the first presidential candidate ever to adopt a thoroughly anti-Israeli policy. His policy is extreme, reckless and self-defeating. Extreme because of its congruence with Arab extremism; it even asserts that Israel (which has been trying to negotiate for 21 years) is in the obstacle to negotiations with what Connally calls Israel's "(Gross) Foes." Reckless because it will encourage Arab extremists. (If there is old pressure directed against the United States during the primaries, Connally's statement may have made that more likely by blasting Israel in advance.)

It is deplorable, because far from making the nation and John Connally seem strong, his pronouncement makes the nation seem obsessive toward oil sheiks and makes Connally seem frantically about finding something to energize his flagging campaign.

Connally should be disappointed. He may have the support of 80 percent of theحراسةstudents at Rice University (so far, they are to exaggerate just a bit) about 80 percent of his support in a Field poll in California last spring, Connally was the only Republican candidate who garnered more negative than positive impressions. In a recent private poll, targeted at Republicans at 30 percent said they would not vote for Connally under any circumstances.

Connally's well-timed reference to Reagan's age (Reagan is all six years older than Connally) and Connally's not-at-all veiled references to Chappaquiddick ("I never drowned anybody") are nasty. Perhaps some people deserve a candidate, and the nasty constituency is not negligible. Connally may even become "the thinking person's Agnew," which is, of course, a contradiction in terms.

He enjoys saying, for example, that the Japanese should be managing their economy, and that Reagan's policies are too "soft on" the Third World, etc. Jolly fun. But as a hardhat (and an Agnew fan) I said in 1971 about Agnew: "He's a new breed of Republican."

He sounds like me shouting, "I don't want a guy like that in the White House." But as a hardhat who has been in the White House I think just because he sounds like me shouting, "I don't want a guy like that in the White House.

By playing, with characteristic vehemence, the anti-Israel card, Connally tried to give Republicans a reason to choose between him and the incumbent Nixon. But as a hardhat who has been in the White House I think just because he sounds like me shouting, "I don't want a guy like that in the White House.

The sword and slashway he presented the issues in the Arab-Israeli dispute - he opened the assumption that he is too busy to care; really, or too vain to think he needs to be. (His initial call for a five percent cut in defense spending was followed by the moratorium in this administration.) I also, Connally's pronouncement on Middle East policy suffuses in comparison, with Reagan's - there is no basis for foreign policy pronouncements, which are precise and moderate.

See, for example, Reagan's statement on SALT II, prepared with the advice of former defense director, Caspar Weinberger, of the Arms Control and Disarmament Agency. It's, by the way, typical of the kind of reasoning in the recently declassified Connally's pronouncement on Middle East policy suffuses in comparison, with Reagan's - there is no basis for foreign policy pronouncements, which are precise and moderate.

Work blends mythical and modern images

By Jeneil Olsen
Staff Writer

According to state government officials and the governor’s wife, Jayne Thompson, travel to Tokyo.

A Review

of the viewer,” explained Steve Jones, a graduate student in painting who created the painting. The painting is part of the Graduate Review exhibit now on display in the main gallery of the University Museum and Art Galleries in Fayer Hall.

Jones said his creation, entitled “The Fall of the Titans,” is a reflection of the three years he recently spent studying in Paris, France under the guidance of a former SIU-C art instructor, Patrick Retalad. “While I was in Paris, I was exposed to the visual arts of the culture to ours,” Jones said. “I felt much more of an awareness of the visual art culture around me.”

This led Jones to paint his interpretation of a changing culture. The painting is an analogy of a mythical figure and a contemporary one.

The piece is based on a Greek myth that tells the story of a titan who tried to climb Mount Olympus against Jupiter’s wishes. Because he went against orders, he fell and was swallowed up by the earth.

“The titan fell back to earth because he tried to go against the natural order of things,” Jones said. “The image of the astronaut placed with that is more or less trying to say that we can make that same kind of mistake if we try to go against the natural order.”

Jones added that the interpretation is not absolute. The painting can be seen in different ways by different people. “Even my explanation changes from day to day,” he added.

Jones noted that there is also a correlation between Greek mythology and modern technology in that there are several space satellites named after mythical figures. “I am primarily concerned with the metier, or craftsmanship, of my paintings,” Jones said. He added that he strives to make his creations as realistic as possible. “Judging by ‘The Fall of the Titans,’ his goal was reached.”

Controversial exhibit draws crowd

By Charity Gould

Staff Writer

More than 150 people came to the Communications Building Tuesday night to view an exhibit that has caused a national controversy in the photography world, including SIU's own photography department.

The show, Photograph poster Mail Exhibition by Jacqueline Livingston, was originally scheduled to be displayed in the front case of the Communications Building, but, according to Bill Horrell, photo and photography director, the department decided the exhibit should not be put up because of the possibly offensive nature of the show.

Instead, the show was set up for two hours in room 1122 because some faculty members thought students should have the chance to see the exhibit, Horrell said.

The 14 self-published posters deal with Livingston's six-year-old son (he is now 11), her husband and her father-in-law.

Pictures of her son masturbating, close-ups of her husband's genital areas and her nude father-in-law playing with seaweed on a beach are pictures included in the show.

Livingston, 36, first displayed some of her male nude pictures in an exhibit at Cornell University, where she was an assistant professor in art and architecture in 1976.

In an interview with The Village Voice, a New York weekly newspaper, Livingston said the overall response of her photographs was positive, but a week later at a university party, only a few faculty members were supportive. "The older 40 or 50 were 'appalled, shocked, emotional and very upset.'

The photographer said even a member of the faculty who scolded figures of nude women complained about her work.

Livingston said a month later her contract came up for renewal and she was told she did not have the support of the majority of the faculty, so her contract was not going to be renewed.

"I was very surprised," she said. "On student evaluation forms, I got top range. I had a long resume of exhibits all over the country. The administration didn't ask for my resume or student evaluation forms.

According to Livingston, the administration said the reason she was not being rehired was not because of the male nude pictures. "But they gave no reason why I wasn't being rehired," she said.

The photographer was hired for another year after she filed a sex discrimination suit against Cornell.

"All together, they make a point," Livingston said about her photographs, which she is selling for $250 a set. "If you take just one image off of one poster, that's totally out of context and the whole thing can be misunderstood. It stops being my family. It gets abstracted out. It just becomes erections and poses and negative male energy.

The photographer says her worst reaction to large statements: "First, that men can be humorous, especially to another, and second, that men can be open and comfortable about their own bodies. My photos are more about love than sex. But I also want the men to appear erotic and sexy."

Leven Parian, graduate student in cinema and photography, expressed his opinion of the Photography Exhibition in the Communications Building.

"Viewers' opinions are varied"

By Charity Gould

Staff Writer

"There are very few things that offend me and this isn't one of them," Kevin Mooney, senior in photography, said after viewing Jacqueline Livingston's photographs Tuesday night.

Glancing back at the exhibit, he said, "I question what she's trying to do—whether some of the images work. They probably work for her because they're her husband and son."

Waiting 15 to 20 minutes, many of the people who viewed the exhibit left with much of the same sentiments as Mooney.

"People are not going to like it. As an event, this is great," as he scoured the line of people waiting to see the exhibit, 66 of whom were her students from Cinema and Photography Analysis.

"Her philosophy is very intriguing," Mooney added.

"Leven Parian's enthusiasm about the size of the crowd in the hall didn't overflow to the exhibit they were waiting to see.

"The work was mediocre. It has a snapshot quality about it," Harpole said. "It does nothing interesting in composition or lighting and I don't see the unity within the exhibit."

Paul Eldridge, junior in photography, said, "It could have been done better. The presenter of the family snapshots wasn't that bad. They were done more as photographs, not just for the sake of being shocking."

A sophomore photography major Allan Potash, thought "some of these are really corny.

"Some of the photographs would work individually but they don't work as a whole," he said.

Cindy Fesanco, a junior in photography, said, "I just don't understand these at all. Some are nice, like the dream sequence, but others I don't understand."
Neely House Council set to rejoin East Campus Programming Board

After about seven weeks of operating without the East Campus Programming Board, the Neely Residence House Council has voted to rejoin the ECPB.

The council split from the board over this semester when a dispute arose over the way a delivery of the council's Campus Housing Activity Fee contribution was handled by the board. The contribution allows Neely residents to participate in board-sponsored activities and events.

The council voted Monday to turn over its purchasing authorization to the board for $1,258, 99 cents less than the board originally requested from the council.

Jeff Moore, a graduate assistant working with the board, said the $400 difference in Campus Housing Activity Fee money contributed by the council is a result of the semester being a little more than half over. Since the split, Neely Hall residents have been required to pay an extra $1.50 to view board-sponsored movies, instead of the 30 cents admission charged to residents who live in dormitories participating in the ECPB.

"Not many Neely residents have attended (board-sponsored) events so far," Moore said.

"The split between the board and the Neely council occurred when the council rescinded $1,600 in programming funds after a misunderstanding occurred over the delivery of the purchasing authorization for the money earlier this semester. The board thought the council was going to drop the purchasing authorization off and the council thought the board was going to pick up the purchasing authorization."

The entire issue has made the residents aware of what the board offers and what the board's shortcomings are," Neely House Council Adviser Linda Hildebrand said.

The majority of Neely Residents were in favor of the council rejoining the board, Hildebrand said. Council floor representatives were requested by the council to canvass residents for input into whether the council should rejoin the board, which became an independent until two years ago after the East Campus Residents Affairs Council dissolved. The board was a committee of ECRAC when ECRAC was in existence.

One reason previously cited for the split by Neely House Council President Cindy Streit was the lack of advertising for board-sponsored events. Hildebrand and Moore agreed that the board has begun to advertise its events more effectively.

Another dispute between the council and the board was the inability of Neely Hall to find board representatives to serve on the board. Moore said the council will be interviewing potential representatives Sunday.

Moore said "it must be the weather" that was delaying Neely Hall from appointing board representatives.

GS program study requested

A report by the General Education Committee at SIUC has asked for a review of the general education program at SIUC and a reevaluation of the general studies program to be conducted to develop the campus constituency to the core of general knowledge needed by today's society.

The report is a preliminary study that finds general education at SIUC lacking and calls for the nation's expanded to the potential of a liberal arts education and the chances of receiving a solid core of general knowledge from general studies requirements, according to James McHose, committee chairman. Further studies will determine what those requirements should be, he said.

"The report should not be seen as a vote of confidence or lack of confidence of the general studies program at SIUC," McHose said. It stresses the need to know what type of curriculum will fulfill an adequate common core of knowledge. The next step is to develop a curriculum by reducing the options of courses in a given area. Nonessential courses would be consolidated into more basic classes, he said.

The report will be distributed to the campus constituencies for comment and additions. After a consensus has been reached, the committee will construct a curriculum. The committee will consist of instructors of departments for their advice on which courses are necessary for a common core of education, McHose said.

The revised report is to be concluded by the end of fall semester. The recommended curriculum is scheduled to be submitted at the end of the 1979-80 school year, McHose said.

BYRNE FOR KENNEDY

CHICAGO (AP) — Mayor Jane Byrne hailed Sen. Edward M. Kennedy as the “bright star of the Democratic Party” and formally endorsed him for the party’s presidential nomination.

Kennedy’s candidacy, which became official Monday with formalization of a campaign committee, “is a promise of leadership of the most decisive kind,” the mayor said.

Referral specialists help direct employees with personal problems

Shelley Davis  
Staff Writer

Referral specialists, the heart of the University's Employee Assistance Program, have made the program a success in its first five months of operation, according to Deborah Lindrud, staff training and development in Personnel Services.

"The referral specialists have really made the difference," said Lindrud. "Of the 112 referrals made in the first three months of the program, 94 were made by the referral specialists." Lindrud said that these 11 specially trained employees direct other employees who need help with personal problems to the appropriate professional agency.

They are "concerned colleagues who are trained to listen, make well-informed referrals and then follow-up on the employee's behalf," Lindrud said.

Streeter named vice president

Student lawyers form alliance

By Amy Yeung  
Student Writer

Elizabet Streeter, SIU Student Attorney, was appointed one of two vice presidents of the National Association of Student Attorneys at a convention held in Las Vegas earlier this month.

Thirty-one representatives of universities around the country attended the convention from October 12-14. They included student attorneys, student government representatives, and university administrators representing schools from every geographical area except the East.

"There are now approximately 200 student attorneys in the country," Streeter said. "At the convention, we came to the conclusion that there need only be a special organization for student attorneys."

The National Association of Student Attorneys was formed at the convention. Streeter said the purpose of the organization was to "compare the successes of the programs. She said those attending discussed "the sizes of the programs, the use of publicity, and common problems that each office must deal with.

Streeter said the programs are fairly new. Streeter said the oldest program was implemented at the University of Texas in Austin 10 years ago, and most are much younger. The program at SIU is two and one-half years old and Streeter said the exchange of information at the convention was very beneficial for us."

All of the student attorney offices across the country were sent notification of the convention. However, Streeter said "many could not attend because of lack of funds or lack of time."

Streeter said the newly-formed National Association still needs to be fully organized. She said the purpose of the organization will be "to distribute a newsletter so that exchanges of ideas and information will not be limited to conventions and the like."

"However, no one has the time or the money to put into it now," Streeter said.

Streeter said that "enough" people at the convention have enough contacts with other organizations (such as the union of student attorneys in Illinois which Streeter belongs to) that we have some hope of combining groups, with mention of our activities in those organization's newsletters."

Streeter said that since the organization obtains funds from membership fees, "we should be able to distribute a newsletter, and be able to help other colleges."

Collective bargaining bill needs House approval

By Shelley Davis
Staff Writer

A bill to bring collective bargaining to public employees -- including faculty at SIU -- will be called in April "no matter what," the bill's sponsor said early this week.

The collective bargaining bill, House Bill 783, was proposed by Rep. Thomas Hanahan, D-Palmer.

Speaking from his Springfield office, Hanahan said he was, regarding the result of his bid for office of state AFL-CIO secretary-treasurer, he will still call the bill before the House in April.

There had been speculation that if Hanahan lost the election for the labor office, he would be, to not bring the labor-intensive bill before the House. Only a bill's sponsor may call a bill for consideration.

The bill failed to be, passed by the Illinois Legislature in April. The Senate at the time requested that the House amend the bill. Hanahan everything they could, "before it would, reconsider the proposal."

Hanahan said he opted to call the bill in the spring 1980 session, a session usually reserved for, monetary and emergency legislation, because he "didn't want the bill to die. Why wait another 12 months to, call it?" he said.

If the bill is passed, it will allow public employees to hold an election to see if the majority of the employees want to be represented by a union. The bill will also set up a state labor relations board to hear grievances and participate in arbitration and mediation between employees and employers.

The bill has major implications for SIU-C faculty members, who have been attempting to gain recognition for the right to bargain collectively. The Board of Trustees has said the passage of the bill will force the board to adhere to the results of a collective bargaining election, if the faculty holds one. Hanahan said the success of the bill "hinges on the support of the late Dr. Byrne." He said, "if without the support of Byrne, the Chicago leadership will not favor the bill."

"Chicago is a very important element," Hanahan said.

353 faculty members say no to plus-minus grading system

By Shelley Davis
Staff Writer

Most faculty members who responded to an opinion survey on plus-minus grading said they didn't want to establish such a system at SIU-C.

The surveys were distributed by the Undergraduate Education Policy Committee of the Faculty Senate to all faculty members several weeks ago.

Of the faculty members who responded to the survey, 353 were opposed to changing the current grading system to a plus-minus system and 293 were in favor of the change. Nearly 50 percent of the faculty returned the surveys.

Faculty Senate President Lawrence Dennis said most of those opposed to the change felt that "a plus-minus system just gives the student an eerie precision to an imprecise act."

He said other reasons for rejecting the proposal included:

--Fear that a plus-minus system would increase the number of As and differences among students and teachers. The plus should have a higher numerical value than an A-

--the system would not be a mandatory one.

Some instructors whose students voted against the proposal also voted against it. Dennis said that some of the faculty members voting for the proposal did so because it would be a mandatory system. Others said they now use the system and it seems to work well.

Frederick Williams, assistant professor of foreign languages and literature and originator of the proposal, said the plus-minus system was encouraged by the results.

He said the proposal will center on reactions of students and faculty members at schools who now use the plus-minus system.

The Undergraduate Student Organization also voted down the proposal at its last Oct. 17 meeting. Reasons for doing so included that a plus-minus system would make it more difficult to be admitted to graduate and professional schools; the fact that the system would be optional; and it would be difficult to make a change in computer grading procedures.

Carbondale man arrested following night disturbance

Police arrested a Carbondale man and charged him with disorderly conduct and criminal damage to property Tuesday night following a disturbance at Pleasant Hill Trailer Court.

Roger Hill, Route 8, is accused of breaking a window on the trailer of Sharon Crosier, senior in physical education, and of yelling obscenities and calling Crosier's name. Police said a dispute over the care of a baby in Crosier's custody had occurred.

Hill, a 22-year-old man was trying to gain entry to the trailer through the doors and windows. He hit Hill three times on the head with a bottle when he was trying to climb through a window, police added.

University police said a window was broken when they arrived at 10 p.m. Hill was transferred to Jackson County Jail and later released on $100 bond.

SIU-C security officer becomes first police emergency medical technician

By Joyce Gordon

Student Writer

John A. Hudson, 23, a nine-year veteran of the SIU-C Police Department, didn’t feel like he was doing enough to help victims of auto accidents, heart attacks and other mishaps that, without immediate first aid, can claim a person’s life.

So Hudson went into training and became the first state-certified Emergency Medical Technician-Emergency Rescue Technician (EMT-ERT) on a police force in this area. Hudson, who says he was tired of sitting on his hands, waiting for the ambulance to come to crisis scenes, invested his own time and money in an 81-hour EMT course at John A. Logan College which he completed in May of 1979. The SIU policeman went back to Logan that past spring, and after more than 65 hours of additional training, was certified an ERT in June.

Hudson says his training gives him confidence and makes him less prone to panic at the scene of an accident.

“While on duty he carries only the standard first aid kit, Hudson says, with the speed and skill of an ambulance driver, perform lifesaving functions such as clear a victim’s airway, control bleeding, treat for shock and give cardiopulmonary resuscitation. If he is at the scene before an ambulance arrives, he can give the crew details on the type and severity of injuries and assist them using their equipment, when necessary.”

Because I have had exactly the same training as the ambulance members, I can talk their own language to them, do some of their preliminary work to stabilize a victim and be an extra pair of hands for them when they need help, Hudson said.

FINANCIAL AID UPDATE

Aid checks will be available at the BURSAR’S OFFICE on Thursday, November 1, 1979 for the following aid categories:

1. (EDDS) Grant checks for students whose Student Eligibility Report (SER) was submitted to SWFA and has been processed prior to 10/79 and has not been reprocessed.

2. (EDDS) aid for students whose SER was submitted to SWFA and has been processed by 10/16/79 with a validation problem which was corrected by 10/19/79.

For students not paid in prior cycles due to cancelled registrations, ID problems, citizenship status problems, all of which were corrected by 10/19/79.

2. (EDDS) Loan Checks for students who have signed and returned their Financial Aid Award Letter to SIU-C by 10/1/79 and who have registration, ID problems, or citizenship problems.

3. (EDDS) Grant Checks to students who have signed and returned their Financial Aid Award Letter to SWFA by 10/15/79 and who have no registration, ID, or citizenship problems.

FINANCIAL AID REMINDERS

1. Aid checks will be written but not released if any of the following conditions apply:
   a. transfer students who do not have a Financial Aid Transcript mailed from school previously attended.
   b. independent students who do not submit declaration of independence.
   c. problems associated with previously defaulted loans or inconsistent information on two or more application documents.
   d. Because of aid checks from the BURSAR requirements are available to all students and a CURRENT FEES STATEMENT. Outstanding debts to the University may be withheld from any aid money due.

3. DEADLINE DATE FOR PAYMENT OF FEES DUE TO CANCELLATION OF REGISTRATION.

FEBRUARY 20, 1980.

4. AID CHECKS WILL BE WITHHELD FROM STUDENTS WHO ARE REINED FOR NON-PAYMENT OF FEES DUE TO CANCELLATION OF REGISTRATION.

5. FALL SEMESTER DEADLINES OF TUITION 8 FEES MUST BE PAID BY WEDNESDAY, NOVEMBER 7, 1979.

6. Aid checks which do not arrive in time to register for Spring 80 but are still timely and who do not register for Spring 80 will be returned to the student for Audit 8 Add/ Drop. If the student is a full-time student, the aid check will be returned to the student for Audit 8 Add/Drop and the student will be reflected in the Spring 80 schedule.

7. Spring tuition and fees payment deadlines are April 20, 1980.

8. ALL STUDENTS WHO RECEIVE AID CHECKS MUST NOTIFY THE BURSAR’S OFFICE AT THE END OF THE SPRING SEMESTER IF THEY ARE_plan to return to SIUC next year.

9. DEADLINE DATE FOR PAYMENT OF FEES DUE TO CANCELLATION OF REGISTRATION.

FEBRUARY 20, 1980.

5. FALL SEMESTER DEADLINES OF TUITION 8 FEES MUST BE PAID BY WEDNESDAY, NOVEMBER 7, 1979.

6. Aid checks which do not arrive in time to register for Spring 80 but are still timely and who do not register for Spring 80 will be returned to the student for Audit 8 Add/ Drop. If the student is a full-time student, the aid check will be returned to the student for Audit 8 Add/Drop and the student will be reflected in the Spring 80 schedule.

7. Spring tuition and fees payment deadlines are April 20, 1980.
10,000 items to be offered at book sale

By University News Service

Ten thousand books, magazines, and records will be on the block at the Friends of Morris Library Fall Book Sale on Friday and Saturday.

The sale will be conducted in the "blue barracks," east of the Grand Avenue railroad crossing. Hours will be 9 a.m. to 4 p.m. on Friday and 10 a.m. to 2 p.m. on Saturday. Some books will be held back for Saturday. Prices of most items will range from 10 cents to $3.

Jane Lockrem, executive secretary of the Friends of Morris Library, said this year's collection is the largest ever. Featured items include National Geographic magazines, a large assortment of books on religion, popular fiction, and a large number of cookbooks, she said.

The books will be divided and shelved in 15 to 20 categories to make shopping and browsing easier. Among the new sections this year are sports, humor, and black American studies. There are also a number of foreign language books, she added.

All proceeds from the sale will be used to purchase special materials.

WSIU show to go national

By Pati Winnicki
Student Writer

Tales From the Vanilla Woods, a children's radio program heard by WSIU, will soon go into national syndication on the Saluki Radio Network.

Dean Ehrenheim, producer of the show, said that the network is interested in the program for a number of reasons. "The network is looking for programs that are educational and entertaining," he said. "The show is both of those things, and it is also familiar with the theme of domestic violence.

The Women's Center serves as a shelter for battered women, housing up to as many as 20 women some nights. Payette said that the Women's Center is only able to house half of the women in the center. "There is a need for more shelter space," she said.

The task force is also involved in counseling battered women through workshops such as Synergy and the Network.

The Women's Center is only able to house half of the women in the center. "There is a need for more shelter space," she said.

Payette encourages men to work with the Women's Center and the task force and to provide ideas for dealing with the problems of the battered women.

People from legal aid are interested in looking at ways to help battered women handle the domestic violence problem through the police and the welfare system.

The task force is also involved in creative expression through workshops such as Synergy and the Network.

The Women's Center is only able to house half of the women in the center. "There is a need for more shelter space," she said.

Payette encourages men to work with the Women's Center and the task force and to provide ideas for dealing with the problems of the battered women.

People from legal aid are interested in looking at ways to help battered women handle the domestic violence problem through the police and the welfare system.

Payette said, "We want to shelter the kids, but we want to point our finger at the person who causes the problems."

Ehrenheim said that the Women's Center's work is important because it helps women to recognize their own power in situations of domestic violence.

"The Women's Center is only able to house half of the women in the center. "There is a need for more shelter space," she said.

Museum receives planning grant for botanical garden and sculpture

By Sandra Pope
Student Writer

Former SIU-C President Delcy Morris' garden will have a new home in the University Museum and Art Galleries in approved by the University.

The museum has received a $1,500 planning grant from the Illinois Arts Council to build a sculpture and botanical garden directly west of the north gallery in Faxon Hall. Morris' house and garden were originally in this area but was torn down for the garden abandoned in 1970 when construction on Faxon Hall began.

According to John Whitchlock, director of the University Museum, the idea for the sculpture garden first came into being in fall, 1977. The museum has been working with the Department of Botany on this project since 1977. Gregory M. Pierceall, a professor of landscape architecture, has been hired to prepare an extensive design of the sculpture garden, said Whitchlock. Pierceall, a former SIU-C faculty member, prepared the original design in 1978.

The garden will be designed to be completely accessible to the physically handicapped and the blind. Whitchlock said. Wheelways and ramps will be integrated into the garden, and narratives describing parts of the garden will be printed in Braille. Plans will be raised above the ground to make them more accessible to persons in wheelchairs, said Whitchlock.

Plants common to the current season will be displayed in the garden, and changed when the season changes, Whitchlock said.

The museum hopes to attract gifts of sculpture to the garden. Various sculptural forms will be integrated into the garden as they become available.

There are also plans for a small amphitheater to be built within the garden for intimate readings and concerts. Whitchlock said.

The University Museum has not yet submitted the proposal of a sculpture garden to the University administration. Whitchlock said. Once the proposal is submitted, and if it is approved by the University. Whitchlock said the museum plans to seek national, corporate, and private funding to help pay for costs.

Whitchlock stated the sculpture and botanical garden will serve as an excellent educational tool for the entire University community, as well as a model disciplinary project. The garden could be used by apartments other than art or botany. Whitchlock said the departments of speech, music, and English could also benefit from the garden.

The idea of a sculpture garden in connection with a museum is a natural thing to think about if you have the space, said Whitchlock. Many colleges in the nation such as the University of California in LA have sculpture gardens, he said.

MVC Showdown!

Buy your student tickets early for Saturday's MVC clash between the Salukis and Indiana State.

Tickets are on sale at the following times and locations:

- SIU Arena: Thursday & Friday 9:00-4:30
- Saturday 9:00-11:30

Student Center: Thursday & Friday 1:00-4:00
- Saturday 9:00-11:30

McAndrew Stadium 9:00 on
Quinn lets actions on field do talking

(Continued from Page 20)

year, after gaining 182 in a freshman All-America junior campaign. He seemed certain to gain 190 and an injury forced him to miss the final two games of the season.

Quinn said Head Coach Roy Dempsey told him last year that he would break Bullock's mark in 1979.

Quinn said, 'You're going to break the mark,' and I said, 'What do you mean?' Quinn said, there was no less to the mark. It would take it's place. People said they knew I'd get the record. I said I didn't know, I could not get hurt.'

Quinn doesn't remember which side the play went to or who threw the key block in the finest-looking play which gained four yards for the Salukis and a record for Quinn. He said he owes a lot to the offensive line's past and present, including Byron Honore, Mark Kielb, Greg Fickling, Steve Wheeler, Darrin Davis, Chris Lockwood and Mark Kavanagh — the group which allowed him to gain the necessary yardage in 1979.

Helping also was Dempsey's decision to switch Quinn from tailback to fullback for the Eastern Illinois game. At tailback, Quinn had gained only 222 yards in four games. He now is averaging 7.5 yards a carry, and has averaged 33.5 yards in the four games he's played at tailback.

'Know how it would be like that,' Quinn said of the move. 'I'm able to hit the hole quicker.' Quinn cherishes the best moments of his career the same way he does the disappointments — in his mind. He said his best game, as when he rushed for 201 yards and had two touchdowns against New Mexico State last year. His best high school effort was when he rushed for 186 yards and scored three touchdowns. His greatest disappointment was not having the opportunity to rush for 1,906 yards last year because of a knee injury.

Quinn acknowledges that it will be very tough to gain 1,000 yards this season. He has gained 576 yards thus far. He accepts this fact without emotion.

'I'm not worried about it,' Quinn said. 'Just accomplishing a lot. Just being able to play football is an honor. I don't expect to be the all-time leader. All I'm concerned now about is winning.'

A chart hangs on a mirror in the Saluki locker room, noticeable to all who enter. On it is inscribed "Five Steps to the Missouri Valley Conference Championship."

Quinn said, "It has been placed on the first step, representing the victory over Northern Illinois."

"Some say dreams come true, others don't," Quinn said. "And in every situation of the Salukis, who must best Indiana State if they are to stay in contention for the conference championship."

Even for someone who said he doesn't like to talk "because you never know what will happen," Quinn lists that a conference championship is something Quinn wants dearly.

Harriers battle for MVC title

By Scott Stahmer
Staff Writer

SIU is the king of the Missouri Valley Conference's cross-country hill now, but, according to Marigold/ Cairo's Joe Smith, the Salukis are two hours apparently hoping to steal the crown at Saturday's championship at Moline, Iowa.

"We have enough faith in our people, so I can't strip us of the favorite's role," Hartzog said. "But Drake, Iowa State and Texas State have to rate as co-favorites along with us."

Last year, the Salukis left little doubt who the best team was. SIU placed five runners. — Mike Sawyer, Paul Craig, Mike Bisase, John Fink and Tom Fitzpatrick — in the top 10 places. The Salukis finished with 29 points, 13 less than West Texas (now score wins).

This year, Marigold/Cairo's Joe Smith was the Buffaloes who finished first. The Salukis were second.

Hartzog believes the Buffs, who have two of the top three running finishers in last year's race in individual champion Johnson Bett and fourth-place finisher Joseph Barno, will be strong again this year. Bett and Barno are from Kenya.

"They have essentially the same team they had two years ago, and they are running well," Hartzog said. "I want to think they ran particularly well in last year's meet."

Bett must be considered a favorite to win the individual title again, according to Hartzog.

"Besides Bett, they have everybody back from last year," Hartzog said. "They've added another one. His name is Kurumi, who runs from third to fifth for them."

Hartzog believes another strong challenger will be Drake, who he said is young but talented. "Jim Minor, a runner could be the first," Hartzog said. "They also have a runner named Mike Parentel, who is running well for them."

Hartzog said the runners "will be running very well as a team." Hartzog continued. "They've got everybody back from last year. Most of their other people are from fine cross-country teams who have developed fine runners."

Hartzog said Drake's biggest edge may be that the race is being run on the Bulldogs home course. "Drake is at home, and their course is very hilly," he said. "They're very talented, but their biggest advantage is that they're at home. Drake also has a tradition of fine cross-country teams."

Besides Bett and Ivanovic, Hartzog considers Steve Collins of Wichita State as a contender for the individual championship. Salukis Mike Bisase and Karsten Schulz also could challenge for the crown, he said.

A factor which could enter into the race, Hartzog said, is the weather. Iowa's climate has been known to turn nasty in the past.

"I expect inclement weather," Hartzog said. "It rained in Des Moines earlier this week. It'll probably snow there Saturday."

Stickhandlers seek to defend state title

By Jeffrey Smyth

The Saluki women's swim team plans to do some experimenting in its home dual meet Saturday at the Recreation Building pool. Coach Rick Powers is going to place swimmers in events they aren't accustomed to.

"This early in the season we want to experiment, especially with our freshmen, in order to find people who can score points in the states," Powers said.

"Last week, Lisa Cairns finished second in the breast-stroke and I didn't even know she could swim that event." Powers said Evansville is not a strong team, and added "he would often leave two swimmers in each event. In dual meets, points are awarded for the top four positions, five for first, three for second and one for third. So by putting two swimmers from a team can score. In relays, the winning team earns seven points, while the losing team gets none.

Dual meets are a problem for the Salukis because of a lack of depth. Powers said the team would not enter the 200-yard freestyle relay because the swimmers would be tired.

High-bar. No scores were kept and winners were decided by appearance.

"The audience would approve for the gymnast that they thought deserved to win," he said.

In relays, the losing team will be held at noon Saturday at the Recreation Building pool.

Spring MCAT Classes starting in March

Our broad range of programs provides an umbrella of testing knowledge that enables us to offer the best preparation possible. No matter which course is chosen, students can learn the best strategies for answering the MCAT exam questions. Classes are taught in small groups for maximum results. Our classes are packed with assessment tests and tips to help students achieve their best results. We offer weekend classes for students who need to prepare for the exam on the weekend. Our programs include: MCAT Review, MCAT Practice Tests, and MCAT Test Prep.

Sometimes sports compete in a championship, along with the Kven Invitational at Lawrence, Nebraska, will open its season against Northern Illinois last Saturday.

Burrnell Quinn looks for an opening during the game. Quinn became the all-time Saluki rushing leader with his 116-yard performance against Northern Illinois last Saturday.

By Mark Pavich
Staff Writer

When the Missouri Valley Conference’s coaches and media personnel picked football at the beginning of the season, the Salukis’ name didn’t come up often.

They were coming off an unimpressive 3-4 season under first-year coach Dick Jamieson, and not many people figured the Salukis would be in serious contention for the MVC crown.

People are talking about Indiana State football now, however.

Not only are the Salukies in the race for the Valley title, by ISU sports the conference’s coaches and media personnel began to hyperextend the Salukies’ record for career rushing last Saturday and Sunday.

“I’m in my own little world,” Quinn said simply.

Quinn was far from ambiguous when he broke Bullocks’ record at Niu.

“Bull” after Allman out, Jamieson will have a dim spot for the touchdown. Alone with his thoughts. It’s a pleasing place to be.

Missouri’s Jamieson, said, “He’s an excellent blocker, and he’s been our top pick for a long time.”

DeTella, a senior, has shown big improvements, according to Jamieson. “George is always in the backfield, running eight room strengthening himself,” he said. “He’s having a good year, and that has a lot to do with the offensive line.

While the offensive game plan has included防控，the defensive one has a dim spot for the quarterback.

The most successful is looking at pictures of himself. Jamieson has been his routine since high school.

“I never want to think of myself as a coach,” Jamieson said.

“Sometimes I don’t see an offensive line that’s as strong as the ones we’ve had over the years. It’s a lot of hard work. I think I’m doing a good job of playing with the offensive line.”

“We have a lot of things to think about if we want to be successful,” Jamieson said.

The men’s gymnastics team will open its season at the Big 8 Invitational at Lawrence, Kan.

The Salukis, defending national champions, will be in the Valley in total offense, averaging 353.1 yards per game. The Salukies also lead in scoring offense with 22.2 points per game.

Individually, ISU has the conference’s top passer in Reggie Allen. The sophomore has thrown for 1,141 yards with 10 touchdowns and seven 200-yard passing 32. Allen’s statistics also include a 309-yard total offense performance against New Mexico State. He passed for 197 and rushed for 1.2 in one game.

Part of Allen’s throwing success can be attributed to his fine receivers. Sophomore Kirk Wright, who leads the Valley in receiving, has caught 23 passes for a 20-yard average.

Another sophomore, speedy Eddy Ruffin, who ranks sixth in the conference, also averages 20 yards whenever he catches the football.

“Our sophomore receivers have the tools and ability to play anywhere in the country,” Jamieson said.

The line is not the only weapon in Jamieson’s offensive arsenal. His corps of running backs includes the Valley’s leading all-purpose runner, Deneen Warner with 784 yards, and fullback Zack Washington, who leads the nation in all-MVC mention last season.

Warner has averaged an impressive 5.7 yards per carry while Washington has recorded a respectable 4.2.

The line that protects Allen and makes holes for Warner and Washington is big. Center Tunch Ilkin and right tackle George DeTella both weigh 243 pounds. Jamieson considers Ilkin to be one of the Valley’s best centers.

“He (Ilkin) is a lot better than people think,” Jamieson said. “He’s been very consistent, very good.”

Jamieson said he expects to be even more so this season. "We have a lot of returning players," he said. "We have some new guys, too."
