State refuses to deduct parking fines from pay

BY JOHN AMBROSE
Staff Writer
A spokesman for the Illinois Comptroller's Office said Tuesday that the office will not withhold funds from state employees who were fined for unpaid parking fines.

By Paul Jahr, assistant director of Housing for Student Life. He said the office received a letter from Rely tampons, which distributes tampons to University Housing office, stating that they will not be able to deduct the fines from the students' paychecks.

"We sent the letter to the University on Tuesday," Jahr said. "We are not going to deduct the fines from the students' salaries because we do not have the authority to do so." Jahr said that the University has no authority to deduct fines from salaries, and that the Comptroller's Office is responsible for collecting fines from employees.

The letter from Rely tampons said that the company has a policy of not deducting fines from salaries, and that it is up to the University to decide how to collect the fines.

Jahr said that the University is looking into options for collecting the fines, such as deducting the fines from the students' dorm bills or charging the students a fee for each parking violation.

"We are looking into all options," Jahr said. "We are not going to deduct the fines from the students' salaries, but we are going to make sure that the fines are collected."
CIPS says bills might go up thanks to new shut-off rule

By Mike Anton
Staff Writer

New rules that forbid electric companies from shutting off heat to a customer when the temperature falls below freezing might bring about higher bills to area customers, a Central Illinois Public Service spokesman said Tuesday.

The spokesman said the increase could be brought on by an expected jump in delinquent payments. However, there is no way of projecting how many customers might take advance of the new rule by not paying their bills even if they could afford it, he said.

CIPS spokesman said.

The Illinois Commerce Commission ruled last week that utilities would not be allowed to turn off heat to a customer this winter on any day the temperature was forecast to be 32 degrees or below. The commission also ruled that utilities must give customers a six-day notice when they heat is being cut off. The ruling came after an experiment with a similar cutoff program last winter.

“We expected the commission to make the ruling permanent and generally we have no quarrel with it,” Ankom said. “We did see the rate of delinquency go up extensively, however, with the temporary rules last year.”

He said whatever delinquencies would occur would be figured into the honest customer’s bill.

Ankom said that while the company saw an 18 percent increase in delinquencies during the first six months of this year, there is no way to tell how much of that can be attributed to customers “taking advantage” of the new rules. He said, however, that distinguishing which customers are taking advantage of the ICC’s ruling from those who honestly can’t make payments is a “key area” in the company’s strategy to fight the problem.

He said for the “honest customer,” CIPS will offer a deferred payment plan to help meet heating costs, or an equalized payment plan to help customers budget their electric bills.

Without the power to shut off heat this winter, Ankom said CIPS would rely on increased follow-up to collect overdue bills.

“Obviously the possibility of a shut off has a deterrent effect, and there will be less of that with this ruling,” he said. He added that new methods of collection being worked on by the company now would not “take on a threatening character.”

While it isn’t necessary for CIPS to ask the ICC for an additional rate increase to make up for lost revenue at this time, Ankom said in the future “if it ever became necessary we would most likely seek one.”

State refuses to deduct parking fines

(Continued from Page 11)

will hold the funds, and second, stated that even if it did the motor vehicle regulations were so vague, that they could not have argued a convincing case in court.

The court’s decision ended with a recommendation that the University draw up guidelines for dealing with the collection of unpaid parking fines, but said parking deductions could not be used.

Rhode said the court decision can be interpreted to mean that if the University made its parking regulations less ambiguous, the legal opinion of removing funds from state-allocated salaries would be acceptable.

“The ruling came down in July of 1974, and by Aug. 1, the University had constructed new regulations,” Rhode said.

Letters will be sent to faculty and staff with more than $100 in back fines since 1974, giving them 30 days to either make the payment or work out an installment plan for paying the debt. If the fines are not paid by the end of that time, the University plans to deduct the money from paychecks.

Donew said that faculty and staff should not pay the fines voluntarily because they would lose their right to recollect the money later. But he added that if the University withheld the funds from paychecks, there would be a chance of retrieving the money through legal action.

News Roundup

Nuclear research center attacked

BAGHDAD, Iraq (AP) — Iraqi warplanes attacked Bagh-

dad’s nuclear research center in a renewal of the bloody air

war against the Iraqi capital, but the atomic reactor was not

damaged, the French Embassy reported. Iraq’s invasion

force was encountering tough resistance in Iran’s Sistan

Khuzestan province.

The Iranian flattop-bombers also pounded the city’s petro-

refinery, killing or wounding dozens of Iraqis.

In Khuzestan, Iranian troops were locked in battle with

Iranians defenders six miles south of the provincial capital of Ahwaz.

Ahwaz, 30 miles inside Iraq, is believed to be a key target of the

Iraqi offensive.

Seventy miles south of Ahwaz, hard-pressed Iranians were

reported still holding off Iraqi troops at the port of Khorramshahr and the refinery city of Ahadan, both across the Shatt al-Arab estuary from Iraq.

U.S. rushing radar planes to Saudi

WASHINGTO (AP) — The United States is rushing two special early warning radar planes to Saudi Arabia to help

strengthen the oil-rich country’s air defenses against a possible spread of the war between Iraq and Iran, the De-

partment of Defense announced Tuesday.

In announcing the shipment of the highly sophisticated planes, U.S. officials said the deployment is temporary and stressed that the move does not mean the U.S. is taking sides in the Iran-Iraq war.

“This deployment is purely for defensive purposes. It is designed to track aircraft for the purpose of providing additional warning for Saudi Arabian defenses.”

Rowe said Saudi Arabia has indicated its support for Iran in the fighting with Iraq.

NAACP blasts desegregation plan

CHICAGO (AP) — A school desegregation agreement

between the Chicago Board of Education and the U.S. Justice Department came under fire from the National Association for the Advancement of Colored People.

“Ath this point there is still no guarantee that there will be constitutional education in Chicago,” Thomas A. Atkins, general counsel to the civil rights group, said at a news conference.

NAACP has asked the federal court for permission to step into a lawsuit filed last week against the board by the Justice Department.
Congress approves increase in veterans’ education benefits

By Tony Gordon
Staff Writer

The U.S. Senate and House of Representatives have passed compromise legislation providing an increase in educational benefits for veterans under the GI Bill of Rights.

Don Mastrapasqua, associate director of the White House Executive Coordinating Committee for Veterans Affairs, said he expected the President to react "very favorably" to the legislation. He said the bill could be signed into law this week.

According to Richard Fuller, staff member of the House Veterans Affairs Committee, the legislation would raise the monthly stipend paid to veterans in school by five percent beginning Oct. 1. An additional five percent increase would take effect Jan. 1, 1981. Fuller said.

Fuller said the legislation was voted out of Congress Sept. 28 and sent to the White House for presidential action. Also included in the legislation are provisions for what Fuller called the "first major update of the vocational rehabilitation program for disabled veterans since World War II," and a recalculation of the benefit scale for correspondence courses and flight training.

If the bill becomes law, the stipend paid to a single veteran taking 12 or more course hours will be raised from $311 to $327 per month Oct. 1, and will increase to $342 on Jan. 1, 1981. Student veterans with one dependent would receive $389 beginning Oct. 1, increasing to $410 monthly Jan. 1. The rate for veterans with two dependents would jump to $445 Oct. 1 and to $464 in January.

The two five percent increases would also apply to the monthly rates for students taking more than nine and less than 12 hours; presently $263 for single vets, $327 for one dependent and $317 for two veterans in half-time educational programs taking at least six hours of classes would also receive the increases.

Fuller said the changes in the vocational rehabilitation program would provide for improved pre-training and post-training counseling for disabled veterans in occupational programs.

"Our goal in this part of the legislation is to insure that the veteran is suited for the job he or she wishes to train for and that they are receiving all the aid we can give them as they begin their careers," Fuller said.

Benefits paid to eligible veterans enrolled in correspondence or flight training programs will be lowered if the bill becomes law.

Fuller said the House and Senate agreed to follow the Carter Administration guidelines on those two programs, which called for a reduction in the percentage of the tuition paid under the GI Bill.

"Younger generation" too apathetic

By Vicki Woodard

Student Writers

The "younger generation" of today has been accused of being materialistic, apathetic, and cynical about the world and its changes. This may seem an unfair assessment to some; but, more often than not, it is an accurate description of today's youth.

An illustration of this apathy is the recent reaction of young men to the draft registration this spring. President Carter decided to reinstate draft registration with this type of popular policy, anti-draft groups emerged on college campuses all across the country.

At SIU, the Coalition Against Registration and the Draft began organizing meetings and picketing rallies. The rally was held on July 4 in Carbondale, but the entire crowd consisted of only about 50 people.

Considering that such a turnout would affect some 400 students, such a small number is even more disturbing. The majority of those present at the rally were not even 19- and 20-year-olds. Apathy and cynicism are seven evident among today's youth. On the other hand, criticism of this age group may be unwarranted.

While many 19- and 20-year-olds make up such a small portion of the voting public, some government officials realize that their political voices cannot possibly be marginalized by this sector. So they cater instead to the already solid block of voters the middle class of America.

After all, these are the citizens who keep government workers in Washington. With this type of thinking going on, it is obvious why the 19- and 20-year-olds of this country have disinterestedly cast themselves as pawns in a massive government chess game.

Yet, despite the misunderstanding that 19- and 20-year-olds may feel from the government, they must never yield their right to protest.

If the youth of this country believes that their concerns are useless, then they won't be better silenced. They must continue to challenge the injustices, or our system will become meaningless.

Opinions on bicycles offered

The basic theme of the article appearing in the September 19 issue of the DE entitled, "Bike en-" was "Drive alone, and you have a better chance of surviving." At least, this was the theme of the first page put forth, and by that I mean, the first three sections.

Assistant director of SIU-C Security Robert Harris cited an article entitled, "Bike Enthusiasts: Healthy craze as two possible explanations for a statistical increase in the number of bicycles on campus. The perhapes thought never entered Mr. Harris mind that most DE cyclists ride bicycling to be a much quicker and safer way to class than trudging on foot over three car of Illinois-irate crowds, and the heat midwestern sun.

Speeding on a bicycle is riding in last conditions. If "conditions" would only hold official, it would be to "conditions" what are they at any given moment. To make the point clear, bicycling, one must ride as fast as "conditions" will allow.

Even at the best of times, bicycling, by the way, occur on the half-hour or at an hour, when there are no of us. I would ride to get to class, but rather than walk out from the heat next corner.

I would like to reaffirm once more and closer that this letter is not intended to be a criticism of other people. It's only that I feel some points in the article in question are not to state my opinions on the matter—Michael Thorsen, Junior, Cinema & Photography

**Library article clarified**

I fail to see the literary purpose of David Kurz's letter regarding "The Books Gede in last Friday's DE."

I am responsible for the literary article involved in the inclusion of his rather unneccessary comments. It must be someone with pull and influence.

C'mon, David. A square is of such big representation and essay more of what we the students want. Ken Mac Garrigan. mail—Dan Mandell

**Let's try to be considerate**

Although we're all busy with our daily routines, we can make a little more effort to be considerate of other people. Rather than taking sides and arguing the merits of who is right and wrong, let us consider being considerate.

Being considerate is not stopping in the middle of the sidewalk to chat, playing your stereo so loud that everyone on the street has to dance to the beat of your tuned-in, walking in the middle of the road with a bike, or picking up trash as if it's our own personal property. We are all responsible for our actions.

Think about who was affected or what someone else was doing. Sometimes it's not just you, but someone else who is doing a great service.

---

**Time is changing the fortunes of nerve gas**

The Senate took a couple of roll call votes, one afternoon last week or a question that in itself was innocuous—but this was one of those uncommon moments in which the Senate wets a finger to the wind. Behold, the wind is changing. The question had to do with nerve gas.

Before the formation had ended we had a small, comprehensible glimpse of the enormously complex situation. It seems that the wrong end of a telescope, the immediate issue was small turned around, it was fearful large. A single purpose was to send a message, and in the end it was evident—as evident as a cool wind—no message had been sent. No one can say with certainty how the message will be received.

"The situation: The Senate was debating the Military Construction Authorization Act for 1970. Sen. Henry M. Jackson, D-Wash., had an amendment to the bill, which was already approved in the House, would authorize development of a new chemical weapon facility at Pine Bluff. After an hour's debate, the Senate concurred.

Note. if you did not vote to be on a roll call vote, but merely on authorization, in a $1.5 billion bill, "he recommended $1.3 million was set aside to develop a new chemical weapon facility," but it could not produce anything for three to five years. And without specific approval from the president and majority party president.

Women's enrollment increase not 'planned University policy'

By Alan Scudley

Women's enrollment has increased in almost all majors at SIUC between fall semesters of 1975 and 1979 according to statistics gathered by the Department of Institutional Research.

Brooke Swinburne, vice-president for student affairs, said that the gap has narrowed in the enrollment ratio of men to women mainly because of the increasing realization by women that they are no longer limited by sex roles in choosing careers.

"I think the fact is obvious when you look at a department like engineering and technology, where the number of women has quadrupled from 26 to 83 since 1975," Swinburne said.

Swinburne said that the higher enrollment of women is not the result of a planned University policy to close the ratio between men and women. He said figures compiled by institutional Research will be given to the Department of Admissions and Records.

Swinburne said he was not sure if the University would develop a plan to encourage continued higher enrollment of women.

Although almost every major has shown a reduction in the ratio between the number of men and women enrolled, the total enrollment of women has closed by only 36%, according to Institutional Research.

This is mainly because enrollment in the School of Technical Careers has seen the gap between men and women double from 633 in 1975 to 1,249 in 1979, and because the number of men enrolled in engineering and technology has gone from 863 in 1975 to 1,616 in 1979, offsetting gains in other majors, the statistics showed.

The College of Business and Administration has also seen the higher male to female ratio widen, with the difference between men and women rising from 877 to 1,921 since 1975.

Majors which have shown a significant closing of the ratio between men and women were liberal arts, where the gap has closed from 510 in 1975 to 256 by 1979, and agriculture, communications and fine arts, and science where the gap has closed by almost 200 between 1975 and 1979.

The Colleges of Human Resources and Education, where enrollments of women have been higher than men each year since 1973, saw the gaps widen between 1975 and 1979. In human resources the number of women over men went from 372 to 560, and in education the number increased slightly from 95 to 109.

The Division of General Studies saw the difference between men and women drop from 312 to 101 since 1975.

Women's enrollment made slight gains of 22 in the School of Law and of two in the School of Medicine.

Act or no Act

By John Ambrosia

Student Affairs revisions to the state Open Meetings Act being developed by the Illinois attorney general could put some "legal teeth" into law, but they would not affect a pending lawsuit against the SIU Board of Trustees involving that law, according to a representative of the Attorney General's Office.

Shawn Denney, chief of the open meetings section of the office, said proposed legislation to revise the meetings law is expected to be presented to the General Assembly for action within several weeks.

If approved by the legislature, the revised act would affect the current suit involving the Board and Margaret Honeycutt's attorney because the suit will be tried under laws existing at the time of the allegedly illegal meetings in January, 1979, he explained.

The proposed legislation, which was developed from statements made by Attorney General Tyrone Fahner Sept. 12, is designed to improve the effectiveness of the law in providing access to public meetings.

The proposal will include changes in procedure for public notice, keeping minutes and filing of lawsuits and will provide for stricter enforcement of the current act, Denney said.

Denney said the keeping of meeting minutes, including those of closed executive sessions, is one of the keys of the proposed revisions. The lawsuit pending against the Board asks that the trustees be required to keep minutes of closed sessions. The Board has since adopted a policy of keeping minutes of all meetings.

"We realize that boards have to have closed executive sessions to discuss certain matters such as personnel," Denney said, "but that doesn't mean that they shouldn't have to announce that the session is taking place through the use of public notification. And they should have to keep minutes of the meeting."

Revised procedures for enforcement of the Open Meetings Act are necessary to "give the act some legal teeth," Denney said.

Currently, the only way for a state's attorney to enforce the act is through charges against a public official who violated the law, he said.

Women's enrollment increase not 'planned University policy'

By Alan Scudley

Women's enrollment has increased in almost all majors at SIUC between fall semesters of 1975 and 1979 according to statistics gathered by the Department of Institutional Research.

Brooke Swinburne, vice-president for student affairs, said that the gap has narrowed in the enrollment ratio of men to women mainly because of the increasing realization by women that they are no longer limited by sex roles in choosing careers.

The Division of General Studies saw the difference between men and women drop from 312 to 101 since 1975.

Women's enrollment made slight gains of 22 in the School of Law and of two in the School of Medicine.

Trustees lawsuit still pending

By John Ambrosia

Student Affairs revisions to the state Open Meetings Act being developed by the Illinois attorney general could put some "legal teeth" into the law, but they would not affect a pending lawsuit against the SIU Board of Trustees involving that law, according to a representative of the Attorney General's Office.

Shawn Denney, chief of the open meetings section of the office, said proposed legislation to revise the meetings law is expected to be presented to the General Assembly for action within several weeks.

If approved by the legislature, the revised act would affect the current suit involving the Board and Margaret Honeycutt's attorney because the suit will be tried under laws existing at the time of the allegedly illegal meetings in January, 1979, he explained.

The proposed legislation, which was developed from statements made by Attorney General Tyrone Fahner Sept. 12, is designed to improve the effectiveness of the law in providing access to public meetings.

The proposal will include changes in procedure for public notice, keeping minutes and filing of lawsuits and will provide for stricter enforcement of the current act, Denney said.

Denney said the keeping of meeting minutes, including those of closed executive sessions, is one of the keys of the proposed revisions. The lawsuit pending against the Board asks that the trustees be required to keep minutes of closed sessions. The Board has since adopted a policy of keeping minutes of all meetings.

"We realize that boards have to have closed executive sessions to discuss certain matters such as personnel," Denney said, "but that doesn't mean that they shouldn't have to announce that the session is taking place through the use of public notification. And they should have to keep minutes of the meeting."

Revised procedures for enforcement of the Open Meetings Act are necessary to "give the act some legal teeth," Denney said.

Currently, the only way for a state's attorney to enforce the act is through charges against a public official who violated the law, he said.
Older students’ ranks growing

By De Griffin
Staff Writer

Who listens to lectures by day and studies by night? Who doesn’t call home for emergency money? The answer is the older student, a nontraditional one who isn’t in the 18 to 22-year-old age group. He is the one who may be returning to school after 20 years working in a career. Or he may be the fellow who never attended college, but gained his wisdom from the school of life.

And according to Dr. Patricia Cross, a visiting professor in education at Harvard University, it is no longer true that all adults have left their school days behind forever after they have graduated from college.

“By recent estimates, one of every four adults is currently involved in some kind of organized learning activity.” Cross said. “Experts expect that by the year 2000, when all members of the current population will be aged, the majority of the population, every more adults will be involved in some form of continuing education.”

Cross said, “The greatest number are young women in their early 30s who are preparing for some of the attractive jobs that are becoming available.”

The greatest percentage increase of those returning to school is among the elderly, she said.

“Mostly, I think they enjoy it as a very constructive way to fill leisure time. Also, colleges are making programs much more attractive to the elderly.”

Cross said, citing Elderhostel, a program held at 30 colleges in the United States including SIU-C, where series of educational mini-courses are conducted during the summer. The elderly can take the courses and live in inexpensive accommodations as they travel from college to college.

Cross said it’s now a virtual requirement for professionals to return later to school for more information about their fields.

Public library may expand facilities

By Melody Cook
Staff Writer

The Carbondale Elementary School Board and the Public Library Board will begin negotiations for the sale of the Brush school property on West Main Street as the construction site for a new library building. The school board today authorized discussions between its property committee and the library board on terms for the two-acre property sale.

Karl Bartlesmeyer, school board property committee chairman, said he declined to say when actual negotiations would begin, explaining that the progress of negotiations is a "sensitive subject." School Board President Michael Altekruse said, however, that the property committee was "very interested in negotiations" but he also was reluctant to release any details.

"It would be like telling the game plan before the game," he said.

Betsy Mitchell, Carbondale Library Board president, said that although the library board voted at a meeting in mid-September to authorize a letter to be sent to the school board expressing interest in purchasing the property across from Memorial Hospital of Carbondale, she was not aware of any negotiations taking place.

"As far as I know, the school board has made no commitment," she said.

The school board wants to retain about one half acre of the property now used for office and administrative space, but will consider selling any or all of the remainder to the library board "if they have a desire to buy and if agreeable terms are reached," Bartlesmeyer said.

The library board will be given the first opportunity to buy the property, Bartlesmeyer said, and any part it does not purchase will be sold through normal channels at a public sale.

Brush School, extensively damaged by fire in December of 1975, has been closed since early 1977.

The library board has been interested in expanding the library at 304 W. Walnut since 1965. Library staff said that if books were not checked out, the 60,161 volumes owned by the library would overflow the present 5,620-square-foot building constructed in 1957 when the population of Carbondale was 13,000. In 1977 the population had grown to more than 29,000.

GSC to discuss

By Carol Knowles
Staff Writer

Funding for the Saluki Flying Team will be discussed tonight by George Mace, vice president for University Relations and Betsy Hill, intramural recreation coordinator, at the Graduate Student Council meeting at 7:30 p.m. Wednesday in the Mississippi Room of the Student Center.

Michael Dunn, another intramural recreation coordinator, will discuss the Recreation Center answering questions about the building and the program. A resolution is now before the council concerning an increase in the recreation fee.

A resolution concerning a 75 cent increase in the activity fee to support the Students Attorney Program will also be discussed. Elizabeth Streeter, full time law student, is expected to make a presentation to the council.

An increase in on-campus housing costs is also expected to be discussed at the meeting.

Joint doctoral plan to be topic of vote

A proposal concerning a joint doctoral program between SIUC and Southeastern Missouri State University will come to a vote at a meeting of the Graduate Council on Thursday. The meeting will be at 8 a.m. in the Mississippi Room of the Student Center.

A proposal on a change in transcript policy will also come to a vote. The proposal originated from various academic departments and the Graduate School staff.

Other council business will include a report of committee action on uses of color in dissertations and theses.

Funding, fees

fee to support the Students Attorney Program will also be discussed. Elizabeth Streeter, a full time law student, is expected to make a presentation to the council.

An increase in on-campus housing costs is also expected to be discussed at the meeting.

Researcher Helen Vergeet will speak on the topic of external funding options for graduate and professional students.
SIU professor in music uses her talents in aiding handicapped

By Liz Griffin

The woman shakes a tambourine. Her eyes search for a response. The child reaches for it and the woman smiles.

Nearby, another child begins to hit her chest to the beat of the tambourine.

They are like faraway Indians attempting to communicate through drum beats. Children’s finger paintings are attached to the walls. A pink ball hangs throughout a room.

This scene occurs at the Carbondale Special Education Cooperative. Located at the Stott Nursing Home.

The students are mentally and physically handicapped children of Illinois from the ages of three to 21. The woman is their teacher. She is using music therapy to help them.

Catherine McHugh, a professor of music, has been a volunteer at the cooperative since it was started five years ago. Before that, she worked for four years at Archbold School, a private, non-profit school for mentally and physically handicapped children that had been at the same location.

McHugh attended an international conference on music education for the handicapped from Aug. 25 to 29 at the University of Montpellier, France. At the site of the 100-year-old medical school—the world’s oldest—350 representatives from the music education, music therapy, special education, medical and psychology fields met to share their knowledge and research.

McHugh said she demonstrated instruments she has adapted to teach the handicapped, such as the pick that was intended to be a baby’s teething ring, which can easily be grasped by crippled hands to strum the autoharp.

Her goals are to help the children identify sounds, play the music, track it, develop listening skills and communicate. She takes a multisensory approach which includes tactile, auditory, visual and kinesthetic stimulation.

Her lessons are also structured to reinforce the school’s objectives, such as teaching certain movements. For instance, the push-pull movement comes naturally to most people, yet it is difficult for many handicapped children to master.

“I think the thing that you have to realize with all the handicapped children, as you often hear quoted, is that they walk to a different drummer’s beat, but they have the same needs,” McHugh said.

McHugh does volunteer work at the program Monday mornings.

A dollar and a stub’ll get you a double.

Bring your ticket stub from the Elton John concert to Wendy’s and we’ll give you a double for a dollar.

We’ll be open for an hour and a half after the concert. So you have plenty of time to get your feet back on the ground and down to 50th East Walnut.

Then sink your teeth into a delicious Wendy’s double. Fix just the way you like it.

Wendy’s has the taste.
"Blues Brothers" Producer
Robert K. Weiss

Takes you behind the scenes of the "Blues Brothers" and the movie industry. His presentation includes several reels of color footage shot during actual production, plus Weiss' narration and insight into the making of the film.

A record played tiny electronic music one recent morning.

"Here is your robot music. Do not relax until you can move to
it."

A small child, whose arms and legs were being moved to the rhythm of the music by McHugh, tilted back her head and smiled.

After McHugh finished her work in one room, she sang to the children, "I have got to go and see my friends. I will see you next Monday. Bye."

McHugh gathered her tampons, autoharp and angels made from pipe cleaners. Children sat in a time, using the autoharp and a
large book.

She entered the room next door. Children sat in specially made wheelchairs, staring. She began working with one child at a time, using the autoharp and a large book.

"Oh, that's so good," McHugh said.

"I would love to turn some child into looking at you; establish some

Bee hordes ready to buzz off

CHICAGO—Ap—The biggest influx of bees in about 10 years is getting ready to buzz off after having a honey of a summer in Illinois.

The swarms of yellow jackets and honey bees in the last two months were brought on by last winter’s mildness, says Philip Nixon, an entomologist with the University of Illinois Extension Service.

While people were enjoying the relatively balmy temperatures, he said, so were bees, which have a hard time surviving cold temperatures. The bees were able to emerge from the winter unsheathed and ready for action.

Until the bees leave, Nixon offered these tips to minimize stings:

—Avoid eating outdoors on sunny days. Bees, like people, enjoy the sun and fewer show up on cloudy days.
—When eating outdoors, don’t uncover food until you are about to eat. Get rid of the leftovers promptly. Honey bees have a sweet tooth, and are attracted to soft drinks. Yellow jackets eat anything and are not shy about going after it.

Laser beam uses and developments featured in lecture

David Begley, associate professor in electrical sciences and systems engineering, will be giving a lecture on the development and use of laser beams in the past, present and future at 3 p.m. Wednesday in the Mississippi Room of the Student Center.

The lecture titled “Lasers: Beyond Flash Gordon,” is part of the Forum Thirty Plus series. Admission is free.

**Campus Briefs**

The YMCA is offering an opportunity to live and work in another country as a YMCA World Service Worker for a minimum of two years and require training or experience in the following areas: group work, social work, community organization, physical education, recreation, camping, youth work, and youth work. For information on how to apply, contact Thomas Saville at the office of International Education.

The Counseling Center is sponsoring a "Procrastination’s Workshop On Time Management." The workshop will be held noon-2 p.m. Wednesday in the Missouri Room of the Student Center for those who want to manage time more effectively. The registration is not required.

The Pre-Medical-Dental Society will meet at 7 p.m. Wednesday in Activities Room A of the Student Center. There will be four speakers from the SIU School of Medicine.

SFC’s "Forum Thirty Plus," is sponsoring a lecture on lasers at 2 p.m. Wednesday in the Missouri Room of the Student Center. Dr. David Begley will lecture on the development and application of lasers in our society.

"A Life-Planning Workshop," sponsored by Women’s Services, will be available for university and community women 3:30 p.m. in the Missouri Room of the Student Center. The workshop will focus on exploring future possibilities, setting goals, and outlining a life plan guide for the future. The program is free and no registration is necessary.

A reception will be held for Kenny Withers, Director of the SIU University Press. 4:30 p.m. Wednesday in the Galley Lounge of the Student Center. The reception is open to all who are interested in becoming members of the faculty and Carbondale community to get acquainted with the new director. Refreshments will be served.

**Shogun** series aids NBC ratings

NEW YORK AP - With "Shogun" now history, NBC average rating dropped precipitously, but the network cling nonetheless to first place in the prime-time ratings competition for the second straight week, figures from the A.C. Nielsen Co showed.

NBC compiled its highest average rating ever over the week before with "Shogun," the second most-watched miniseries of all time, and rolled directly into a rebroadcast of "Centennial." another series.

Part III of "Centennial," followed ninth in standings for the week ending Sept. 29, with an average of 11.7 million viewers and the 16th most watched program. "Centennial," joined by the first chapter in a two-part "Little House on the Prairie" program, tied for fifth place, and a movie, "Act of Love," contributed to a rating for NBC of 7.2. ABC was second at 7.4, with CBS third at 16.
Marine-affiliated enlistment at SIU increases from past

By Steve English
Student Writer

It is not uncommon for students to join the military before they graduate, but not many students affiliate with the Marine Corps. "Semper Fidelis," is the Marine motto—always faithful. Actually, the landing of the Marines here was not a recent event for SIU. There has been a Semper Fidelis Society chapter on the campus since 1962, but interest in the group has declined recently. About 20 students have expressed interest in joining, Osmon said. There are no women in the Semper Fidelis Society. The society provides a social outlet for its members.

"Just like other people, we have common interests. Marines like to get together and run in their fatigue, drink beer and have a good time," Osmon said. The society is planning a Marine-style outing at Giant City State Park for sometime in October, with rappelling and an obstacle course on the docket. The purpose of the event will be to stress teamwork." Osmon said.

If you don't want to be there, the Marines don't want you. Those who accept commissions are obligated for three years of service in the Corps. And the Marines make it attractive by paying back pay for the years in school and a starting salary of $18,000 to $17,000 a year. Osmon said.

Requirements for membership include passing an academic qualification test and a physical examination. Members also must attend six-week sessions each summer for officer training. Members hold no Marine Corps rank but during the summer camps are considered reserve Osmon, of Macomb, an aviation management student, is an E-5 a sergeant, when he goes to camp.

The society provides a social outlet for its members. You may not have noticed, but some of your fellow students are members and other student groups, not uniforms. They're members of Semper Fidelis Society, an organization affiliated with the SIU chapter, one of about 80 such groups on campuses across the country. The chapter president, Robert Osmon, said, "I'm not sure if you have noticed, but they are on the rise. About 20 more students have expressed interest in joining, Osmon said. There are no women in the Semper Fidelis chapter at SIU, currently, but membership is open to them. Osmon said. Osmon explained that society members are under agreement with the Marine Corps—it isn't a formal contract, while they study toward degrees and toward commissions as Marine officers after graduation if they choose. "The beauty of the program is that you don't have to accept your commission, and continue on in the Marine Corps," Osmon said. "There is no formal obligating contract. If you don't want to be there, the Marines don't want you." Those who accept commissions are obligated for three years of service in the Corps. And the Marines make it attractive by paying back pay for the years in school and a starting salary of $18,000 to $17,000 a year. Osmon said.

Requirements for membership include passing an academic qualification test and a physical examination, and maintaining a C average. Members also must attend six-week sessions each summer for officer training. Members hold no Marine Corps rank but during the summer camps are considered reserves. Osmon, of Macomb, an aviation management student, is an E-5 a sergeant, when he goes to camp. The society provides a social outlet for its members.

"Just like other people, we have common interests. Marines like to get together and run in their fatigue, drink beer and have a good time," Osmon says. The society is planning a Marine-style outing at Giant City State Park for sometime in October, with rappelling and an obstacle course on the docket. The purpose of the event will be to stress teamwork." Osmon said.

Community projects also are part of Semper Fidelis Society activities. Members have taken part in community cleanup projects and will contribute to the Toys for Tots program, collecting toys for underprivileged children, Osmon said.

A belief in the need for military preparedness drew Osmon into the program. (Continued on Page 35)
Symposium to feature scholars

By Colleen Moore
Staff Writer

An international scholars and discussions on non-traditional leadership techniques will be the highlights of the Sixth Biennial Symposium at SIU during its session from Oct. 2 and 3 at the Student Center. The conference is free to SIU students; but community members must pay $5.00 according to J. G. Hunt, professor of administrative sciences and a co-chairman of the symposium.

About 80 scholars from England, Germany, Canada and other parts of the United States will discuss and share ideas on the latest developments in leadership research.

Hunt said, "This year's German, one Canadian, and two Englishmen will attend. Hunt said, "This is the first time other nations will be actively participating." Hunt said, "In the past we've primarily concentrated on the United States." The conference will focus on greater international participation in the future. Hunt said, "As for the next conference in October 1982, Hunt said, "At least half of the presentations will be by people outside of the United States." Novel approaches to leadership will be emphasized during this year's symposium. Hunt said, "One example is that we have a leadership approach that takes into account environmental technology and organizational structure in combination with leadership." Hunt defined environmental technology as the relationship of the setting and the work process of an organization. Hunt said it is helpful, if the new leadership techniques will be applied by those in managerial-type positions.

After the conference, he said, the scholars' research papers will be gathered for the sixth volume of the "Leadership Symposium Series."

USO to discuss flying team funding

By Hands Rogowski
Staff Writer

Continued funding of the Saluki Flying Team, through student fees and a "zero" in increase in the student's activity fee are topics scheduled for a meeting of the Undergraduate Student Organization at 9 a.m. Wednesday in the Student Center, Ballroom C.

Students Albert Somit and Steven Spear asked USO on Sept. 15 to review funding of the Saluki Flying Team. The team receives $13,000 a year from student fees, but the Intercollegiate Athletics Committee has recommended that it no longer receive that funding because it is not recognized by the National Collegiate Athletic Association.

USO had hoped to make a recommendation to Student Senate this week, but USO Vice President Bob Quane said investigation of the issue will not be completed until next week. The funding question is being considered by the USO Student Affairs and Community Services Committee.

The Student Senate is expected to refer consideration of the proposed increase in the students' activity fee to its Campus and Internal Affairs Committee. The increase would prevent a deficit in the budget of Marines at SIU.

gain membership since Vietnam

(Continued from Page 17)

Historically, the United States has never been ready for any military conflict, he said. "Our country was not ready for World War I, Pearl Harbor and many other conflicts," Osmon said. "We have always had that pacifist movement in this country that, as has had blinding on and cannot perceive any danger."

To maintain a strong society, the United States must be able to handle trouble and conflicts, according to Osmon. "There is a growing awareness that we must be militarily prepared so that we can deploy our military to areas it it is needed," he said.

The opposition to the recent draft registration is unjustified, Osmon believes. "I don't agree with all of the opposition," he said. "Ever since the draft was first instituted back in the Civil War, there has always been opposition."

"We are one of the few countries in the world which does not require military service from its citizens," Osmon said. "In the Soviet Union, young men are required to serve two years of active duty without leave." Osmon thinks Semper Fidelis and the Marines offer a far better solution. "It is a strong symbol in the United States of the power of the people."

Wilson's case moves to high court

CHICAGO (AP)—The continuing legal battle over David Wilson's right to play quarterback for the University of Illinois football team moved Tuesday to the state's highest court.

The Big Ten Conference stripped the 19-year-old quarterback of his scholarship because he transferred to Illinois from Arizona State. Wilson, who had been dismissed from ASU for breaking team rules, appealed. An Illinois judge ruled in Wilson's favor, saying the conference had overstepped its bounds in making the decision.

The Big Ten conference appealed the ruling, and the case is now before the Illinois Supreme Court.

NCAA's freshman eligibility rule may face complete overhaul

Former high school players to reunite in SIU-NIU clash
Freshman eligibility rule may get re-evaluation

Editor's note: The following is an analysis of the efforts to ban fresh
man football and basketball players from competing in varsity sports.

By Scott Slakmer
Associate Sports Editor
Bill Thompson seemed to have it made.
A basketball star at a large high
school in a northwest suburb of
Chicago, Thompson was recruited
over 200 colleges and universities
during his senior year. An all-state
selection on the court and a 4.0 student in the classroom, he was a recruiter's dream. Thompson enrolled at a midwestern
university with a good reputation, both academically and athletically.
But something went wrong during his freshman year.
Thompson earned a spot in the starting lineup almost immediately, but his
team's fan expectations were more
than he could handle. His grades
failed and his relationship with his
coach deteriorated.
Finally, Thompson quit the team after a particularly bitter late-season
defeat and arranged to transfer to
another school.

"It's a rule in the starting lineup almost immediately, but his
fan expectations were more than he could handle. His grades
failed and his relationship with his
coach deteriorated."
--Wayne Duke

Basketball-only schools rule for one player to look for programs around favored it.

By Rod Smith
Sports Editor
When the Northern Illinois
football Huskies venture south for the Parents Day Classic with
the Salukis Saturday, both
will be coming off conference play—the Salukis defeat the Tribe of
The Holy Valley and the Huskies from the Mid-American Conference.
However, the 38th test of the
two intrastate rivals will be played with perhaps a unique hue.
Dively said.
"I knew we were going to
be
required to reunite prep rivals
who squared off in high school. The
Salukis have nine starters from
Valley teams, while the Huskies have
but five. It's a matter of pride...

"Basketball-only schools rule for one player to look for programs around favored it.

Saluki-Huskie contest to reunite prep rivals

By Glenn Jewett
Student Writer
Steve Dively met Mike
Puck at the end of the Salukis' advanced intramural tennis tournament earlier in the semester. But there was no
tournament. The first time they
ever played each other was at a
opening round of the men's advanced
doubles tennis tournament.

"I thought we were going to
get beat the first round, but we
beaten a good team from
Springfield," Dively said.
"After that, I knew we were
being for the finals.
Dively contributed the victory
to both playing well
and neither player trying to
instruct.

"We know that we are,
as are the Salukis. But we
are the Salukis."

"Basketball-only schools rule for one player to look for programs around favored it."

IM singles champs repeat in doubles

"IM singles champs repeat in doubles

---Continued on Page 19---

Tennessee football coach Johnny Majors said: "I never did like it and now even less. The rule is tough on
recruiting. The high school kids want
to find the college they'll play their first
year. It's a matter of pride...

"How much better it would be if the
kids had to concentrate on book," he
said. "I'm not a football person, but
a basketball person.

According to Big Ten
conference basketball coaches, few if
any of the players look for programs around favored it. We were
forced to accept it...

---Continued on Page 19---
