CSC blasts proposal to purchase Bracy

By Robert Green
Staff Writer

Two resolutions opposing the University's plan to purchase the Bracy Building in Marion were passed last Monday by the Graduate Student Council.

The building, which costs $1.6 million, would be used for library, storage and possibly construction funds. The first resolution, passed by the Graduate Student Council, requests that the University "boycott" a site in Carbondale for library storage, or preferably construct a facility on campus where stored books will be accessible to graduate students and faculty.

A second resolution, introduced by council member Carl Koserowski, suggests that the council engage in more direct action by forming a letter-writing committee whose task would be to "state the facts" to state and local politicians, the news media and state Capital Development Board.

Gun Behnke, financial analyst for CDB, was in Marion on Thursday that the council's request to purchase the building is being discussed by the board in -two weeks and that funds may be released in mid-November if the governor and the board approve the purchase.

Koserowski said, "We have to act quickly. We're beyond the stage of just suggesting that the administration take a hard look. We need to do something within our own means to turn this thing around."

He said the letter to Thompson should state that he not release funds for the building purchase if it should be approved by the CDB and hold the $1.6 million for construction of a new library storage facility on campus.

The letters to local politicians would request that they take a stand on the issue. Koserowski said, and the response would be made known to the news media.

"One thing we have going for us is that it is an election year," he said.

Koserowski said letters sent to local and Chicago media would "state the facts and ask their assistance in exposing this financial waste."

Finally, he said a letter sent to the CDB would request that the board not approve the request for funds to purchase the building and hold the $1.6 million for construction of a new library storage facility on campus.

"It's reasonable to assume that we can save the taxpayers at least $500,000 by having a facility constructed on campus," as other colleges have done, Koserowski said.

He said the Committee to Oppose the Bracy Building will meet this week and any student who wants to join can call the CSC office.

The council passed a resolution to form the committee and appointed Koserowski chairman.

A resolution which "refuses to support the $1.6 million increase in the revenue bond fee" was also passed.

The administration is considering the fee increase, or an alternative of a $10 increase in monthly housing rates coupled with a $5 decrease in the Student Center fee. The revenue fund would be used for a fund construction of the Student Center and residence halls.

After some discussion, the committee voted by a vote of 5-0 to reverse an earlier stand opposing the revenue bond fee because of concern that a $10 increase in monthly housing rates would be unfair to students living in residence halls.

COUNCIL member Fred Marx said, "I'm proud of so many of us are willing to pay a little extra for the bond fee in order to keep the building from being destroyed."

On other business, the CSC discussed a meeting that the University and the city act to improve the safety of the pedestrian crosswalk on East Grand Avenue near the Student Recreation Center.

The resolution recommends that warning signs be posted and replaced by traffic signs indicating that the crosswalk is only for pedestrians.

"We have two days left," Irvin said. "What's done in those two days will have an impact on whether or not tuition increases."

"Overall, he said that the turnout of three must be "poor" in terms of the total number of tuition. According to STA.

Irvin, student trustee.

As of Thursday, STA. students have registered through the dorms, with the beginning November 13. Irvin said the goal for the drive had been to register 3,000 students. Students still have a chance to register weekly through Monday November 19.

The student turnover during the last two days of the STA. voter registration drive will affect what happens to the cost of tuition, according to Stan Irvin, student trustee.

SIU-C grad killed in shootout; was Forest Park patrolman

By Bob Delaney Staff Writer and The Associated Press

Four weeks ago, friends of Michael Caufield, a Forest Park police officer and SIU-C graduate, threw a party celebrating his graduation from police academy.

At 6:15 p.m. Thursday, he died from a gunshot wound in the head, said Pat Hartnett, nursing assistant at Loyola University Medical Center.

Caulfield, 22, who earned an associate's degree in law enforcement from the School of Technical Careers in December 1981, had been in critical condition since being wounded early Thursday morning.

A Mount Prospect native, Caulfield had been a Forest Park Police patrolman about three weeks.

Caulfield was the second Chicago-area police officer shot and killed this year. Earlier, Chicago Police Officer Martin Darby Jr., 21, a 25-year veteran of the force, was slain Monday in a shootout with a suspected robber who also wounded three other persons.

TYLENOL from Page 1

having Tylenol with the lot number MC3200 to notify regional health officers or the state health department. The lot number is printed on the upper left-hand corner of the label that is glued to the bottle.

The manufacturer recalled nearly 4.7 million of the capsules and authorities said the case was being investigated as a "possible homicide.

Authorities said the cyanide was probably in the form of capsules left in Port Washington, Pa., where they are manufactured by McNeil Consumer Products Co.

The poison is not produced or sold in medicine.

Robert Kaffen, a spokesman for McNeil, said the company had been notified that two bottles "have been tampered with and cyanide poison added to some of the capsules."

He said the recalled lot consisted of 33,400 bottles containing 50 capsules each and that they had been distributed in Florida, Missouri, Iowa, Kentucky, Tennessee, Alabama and Mississippi as well as in North Dakota, South Dakota, Nebraska and Wyoming.

The expiration date was April 1987.

The gunman who wounded Caufield and two other police officers at the Forest Park police station before being shot to death was seen hours before by a psychiatrist who decided he was not dangerous to others, state officials said.

The suspect was David Dominiguez, 32, who had been brought to the station by two officers who saw him lurking. The officers did a radio check that showed him wanted for traffic warrants, police said.

Dominiguez grabbed an officer's .227 revolver and began firing, wounding Caufield and two others before being shot dead, according to Police Chief Richard Drake. Caufield died later Thursday at Loyola University Medical Center.

Hours earlier, Chicago police had taken Dominiguez to a state mental hospital, where he told officials he was "under pressure" by his family to seek help, a Mental Health Department spokesman said.

Dominiguez rejected Madden Medical Center's offer to admit him and then was examined by a staff psychiatrist who found that he did not meet criteria for an involuntary admission, the spokesman said. "We had no other options but to let him go," he said.

Officer James Sebastian, 30, was in fair condition with a gunshot wound to his hand, the spokesman said. Officer James McNally, 26, was treated and released.

Drane said McNally and Caufield brought Dominiguez into the station, uncuffed him and sat him in a chair in front of a desk. He said when Sebastian walked by, Dominiguez grabbed Sebastian's service revolver.

Caulfield lunged over the desk and was shot in the head at close range, Drane said, and McNally and Sebastian wrestled Dominiguez to the floor.

During the struggle, Sebastian was wounded and Dominiguez struggled and fled but was caught up, the chief said.

Officer James Sebastian, 30, and his 27-year-old brother, Adam, of Arlington Heights, died at 3:15 p.m. and 5:15 p.m. respectively Wednesday. Stanley Janus' 19-year-old brother, Thomas, 19, is hospitalized in extremely critical condition.

Mary Kellerman, 12, of Elk Grove Village, died from a bullet wound to the head Wednesday.

Theresa James was hospitalized after taking a pill. She said her brain had suffered "a great deal of damage" and she was not expected to live.

In nearby Downers Grove, Mary McFarland, 21, of Elmhurst, was dead on arrival Thursday afternoon at Good Samaritan Hospital, where she was shot after taking a pill of Tylenol.

Hospital spokeswoman Donna Hartigan said the poison was not identified as cyanide poisoning but coroner's tests were under way.

News Roundup

Economic gauges defy Reagan ideal

WASHINGTON (AP) — Flying in the face of President Reagan's predictions of recovery, the government's main economic forecasting gauge has not improved for the first time since March and a record number of Americans have lined up for unemployment benefits, officials said Thursday.

Commerce Secretary Malcolm Baldrige insisted the economy was still heading for an upturn. Some private analysts agreed, though cautioning the improvement would be relatively weak, but the chief economist for the National Association of Manufacturers said the new figures mean "we will not see meaningful recovery until 1983."

Grants to toughen drunk driving laws

WASHINGTON (AP) — The Senate on Thursday neared final passage of a bill designed to prompt states to toughen their laws against drunk driving, the leading cause of highway deaths.

The legislation, passed Wednesday by the House on a voice vote, offered $125 million over the next three years to states that adopt strict laws against drunken drivers.

The Senate was expected to adopt its House measure in order to get the bill to the White House for President Reagan's signature before Congress recesses on Friday.

Court won't decide on welfare issue

SPRINGFIELD (AP) — Ill. Supreme Court Thursday decided not to decide whether state officials can deduce welfare benefits to more than 100,000 Chicago recipients.

"Because it does nothing to resolve an ongoing controversy, it is a ruling which I predict will not resolve the problems the parties involved in this case and the circuit court of Cook County," said Justice Seymour Simon wrote in a strongly worded dissenter from the court's decision.

Congress assures business as usual

WASHINGTON (AP) — Opting instead for an evening of political partying, Congress abandoned its race against the clock Thursday to keep the government from going broke in the middle of the start of the new fiscal year.

But negotiators "the House and Senate said they expected a compromise sp xing measure would be ready for swift approval Friday morning, and a Reagan administration spokesman said there probably would be no interruption of regular government operations.

One Marine killed in bomb accident

BEIRUT, Lebanon (AP) — An unexploded part of a cluster bomb blew up at Beirut airport on Monday, killing one U.S. Marine and wounding three others who tripped on it, U.S. military spokesman said.

The casualties were reported after several hundred Marines waded ashore to help guard the field just reopened by Premier Amin Gemayel.

One of the survivors was in serious condition with a leg wound, the spokesman said.

The casualties are the first suffered by the Marines since the University from Page 1

the University to have a better program and we don’t want the horses sold,” she said.

Schurbeck said that once the University “won” the program down, they won’t have the money to bring it back.”

Mark said she doesn’t understand why the School of Agriculture decided to eliminate the horse program, while the sheep program, which the department chose to continue, “has only nine people in it.”

Mark said the program served 200 students last year. Kroming said that the group’s facts are correct and based on incomplete information. He said the horse program has been declining enrollment in the past few years, and it did not serve 200 different students, but rather “60 or 70” students who took more than one course.

Beth Baldwin, a sophomore in Animal Industries and an employee at the Horse Center, joined the two later in the day. She says the department has told the students in the horse program “in the dark.”

“They don’t tell us anything. I don’t know what the bell is going on. I mean, are we supposed to switch schools or what?”

Mark said the people displaced by the shut down of the program would be “more than happy” to help raise money to keep the program running. “We just want them to know that we need the horse program and that we really are concerned about it. We just don’t want them to say, ‘Well, that’s it’ and close the file on us.”

Our best weapon is the vote

The older generation need not have feared. Lowering the voting age to 18 did not change anything. All the efforts to gain access for 18-year-olds to the most powerful weapon in democracy, the vote, is just going down the drain.

At least that's the impression one gets looking at the voter registration at SU-U. The same sad human story. We fight tooth and nail for something we want but take it for granted once we get it.

Students are ready to spend time filling out voluminous ACT and applications forms for grants but can't find the few minutes it takes fill out a voter registration form. Simple disregard may be a waste of time if the second doesn't follow. Why should anyone else work for your student and cut if students themselves are not convinced that if they did care, what better way to express their concern than to vote.

We are proud of being the freest and most democratic nation in the world and justifiably so. But we must be prepared to put up our two bits to make that freedom and democracy work.

Letters

Students have lowest voter turnout of all

I choose to believe that there are more responsible than many people give them credit for. I think that students have the lowest voter turnout of any voting block. Is it that students just don't care? Allow me to pass on to you a short story. In early 1976, when George McGovern was running for president, the student vote was important. In South Carolina, the only county McGovern carried for hundreds of miles in each direction. That was when students voted.

When 18-year-olds were given the opportunity to vote, drinking age limits went down. More programs were geared to the student vote; educational opportunities were increased. Why? Because students voted. The new law was the result of the political campaign. All politicians wanted the student vote. Some got it.

However, since the mid-1970s, the student vote has declined to a mere 1 percent of the total voting population. All politicians knew students were going to vote, but you surely would have welcomed them with the BEAG program, student loans, scholarships. Sure. Certainly not. The cuts in education by this administration are a defiance of the student revolt.

WHERE ARE THOSE REGISTERED STUDENT VOTERS?

There comes a time when it is no longer enough to say, "I'm against it." We as student voters must come to realize it is time to say, "I'm going to do something about it." What can you do? Get involved in the local campaigns. Congressmen Paul Simon, state Sen. Kenneth Suszal and state Rep. Bruce Richmond are the legislators who have helped build SU-U and have fought for state and federal student aid. It is remarkable how students forget. These legislators need your help.

The Simon campaign is in constant need of volunteers. Where are those students who have received the benefits resulting from the hard work Paul Simon has committed to (student aid)? There are only handful of student volunteers. We must re-establish this nationally acclaimed fighter for higher education and common sense as a student volunteer.

Get registered: look at the list of the candidates and vote! - Ray Quatoulazia, President, SUU Democrats.

Book review misses many points

This is in response to a review on the Robert Heinlein book, "The Number of the Beast." (DO, Sept. 25), in the review Jeff Goiffin remarks that Heinlein did not explain the meaning of the title. I was amazed that Goiffin missed this very basic and important part of the book.

Heinlein gave a very complete and easily understandable explanation of the title. It revolves around the Greek words Zota, Zota. Zota. In the Bible the words are translated as 6:6-8; or 1's number of the Beast. Heinlein points out that at that time the Greeks understood numbers, so that through misunderstanding on the part of the translators, 666 instead of 1.00 x 10 to the 8th power. Just think of that significance. If you are only 20 years and you get the idea of how a number a large a number that really is.

The conclusions that I was want to derive from the review is that Goiffin is either not familiar with math or he is afraid of it. To this I express my regret.

I found it interesting that the reviewer did not mention religion in his review of the book. I also thought it rather humorous that the review should appear on the same day an article saying that Sonia Johnson is running for an Equal Rights Amendment. The only religion that Robert Heinlein has consistently expressed support for is the Mormon religion.

And why anyone against equal rights for women? In Utah territory, 1898 elections 25 years before an amendment to the constitution allowed them to vote. Why is anyone against women? In the United States. The world's largest woman's organization was organized by women, for women and by women. It is the oldest woman's organization in the United States.

The organization is called the Lady's Relief Society. Of course do these women over the years, surprise you? Then maybe someone in the legal department could do a review of Rex E. Lee's book.

Who is Rex E. Lee, do you ask? And why is he important to EKAI? Find out for yourself. don't take rumors as fact, but do the research. - Jake L. Jacobs, Pleasant Valley.

The following conversations are fiction. The events on which they are based are real. Hey, did you read that stunning review of 'The Wrath of Khan' in the DE?" "No." "I think I'd like to go to a movie tonight. There are movies in town I haven't seen yet. "Have you seen 'Garp'" "No." "Have you seen 'Tro'" "No." "Well, 'Garp's at the Fox Eastgate, and 'Tro's at the Liberty. Which one are you going to?" "Which one does the DE reviewer think is better?" "Let's see. Hmm... Hmm... Hmm..." "Nothing." "Nothing." "Nothing!" "What's wrong." "Ah, I just shelled out $5.50 to see 'Batmaster,' and it turned out to be a piece of trash." "It was just a cheap rehash of 'Conan, the Barbarian,' with a little Greek mythology, a bit of 'MacBeth' and a very little morose of obligatory love interest thrown in! The plot reeked of plagiarism from this one book that was written many years ago. The reviewer was that in the captions to the editors, I'm going to try and drown my sorrows. "Beer!" "Nope. Another movie." "The Doo-Bot. I heard it's really great. No thanks to the DE, of course." "Of course." "Michael Thomas, Senior, Cinema and Photography.

More reasons to keep horses

To clarify some points made in the story concerning the horse program.

First, I received my master's degree in animal industries and had a minor in anatomy in the physiology, PhD. program which I declined because of the closing of the Horse Center. If there are no horses to work with, you have a hard time researching semen and embryo transfer.

Secondly, the figures comparing the Sheep Center and Horse Center were misleading. The facts presented were that the feed and forage costs of the Horse Center were equal to the feed and forage costs of the Sheep Center and no sheep class taught nine students last year while the three horse classes taught each semester last year taught approximately 100 students. Your reporter combined all these facts to make a general statement attributed to me saying the sheep program is a more efficient horse program. I did not make this statement nor did I mean to imply it. I did want to point out, though, the popularity of the horse courses as compared to the sheep courses.

Thirdly, I did not say there were no sheep in Illinois. I did say sheep because of their few numbers in Illinois, were not as economically important as horses were.

Fourthly, our research was funded by private donations with more private money earmarked for the program. This money will naturally go to some other university since SIU has expressed itself by closing the program. We also have had inquiries from various foreign researchers and organizations who would like to, in their own words, "collaborate" with us in exchanging frozen semen and from embryo transfer internationally. SIU could have been in the forefront of this new technology except it is not in line with SIU's goals.

Finally, the indications are that the majority of these horses will end up at the slaughterhouses. If this is indeed the case, the $40,000 that supposedly will be saved will never make up for the negative publicity SIU will receive.

Bill Borei, Marion, IL

Thanks, Alpha Gamma Rho

Times may seem tough, but I must consider myself blessed. I am a member of the Kappa Delta Rho sorority in the School of Agriculture, around and with the nicest group of people you could ever want to find on campus.

The students are, for the most part, extremely friendly, optimistic and close-knit. One special group of these students are the gentlemen of the Alpha Gamma Rho fraternity. They never fail to ask me how I am feeling and how my family is doing. They are always prompt with a "yes ma'am" or "no sir." Their cars are impeccable. I can only hope that they never relinquish their sense of humor.

I would like to take this opportunity to thank the people who make the little things they do that can make "the bad times" a little more bearable and my job a lot more rewarding. Thank-you for making life interesting.

Bessie Byars, Advisement Clerk, Agriculture.

University is not alone in pay inequity for women

In the "Wall Street Journal" of September 16, 1982, there was an article about the gap in pay for "male" and "female" jobs which cites the following example: After assisting a states secretary, Almira Butterfield of Connecticut was paid $601, sent her a letter to drive to the center and asked if she would like to, in her own words, "collaborate" with us in exchanging frozen semen and embryos internationally. SIU could have been in the forefront of this new technology except it is not in line with SIU's goals.

The facts presented were that the feed and forage costs of the Sheep Center were equal to the feed and forage costs of the Horse Center and no sheep class taught nine students last year while the three horse classes taught each semester last year taught approximately 100 students. Words are your friends

The word blackest does not appear in my old Webster's, but the words blackball, blackguard, blacklist, blacklist, blacklist, blacklist, and blacklist, do. Get my hint? These words have a certain meaning that is not the same as the meaning of the word black. These two words could have been learned together. Perhaps the word tragic, which also has a meaning not the same as the meaning of the word tragic, may have been learned more properly. Anything but "blackest." —Anonymous, Byers Metcalf, Senior, Radiol.

Bless your判断 about the "blackest" Tuesday and the blackest week.

'Blackest' is not a word

"Black Tuesday" will be a big day in D.E.'s editorial deadline for Sept. 21. On that Tuesday, Sept. 14, Monroe's Prodigal Son and Novelist John C. Gardner died from injuries in a single-vehicle accident and Lebanon's newly-elected President, Cheremsey, was assassinated.

I sympathize with the writer's grief but not with the "blackest Tuesday" and the blackest week.

Plenty of opportunity to become intoxicated

I am responding to the letter of "Whitey" who said he was outraged about the short bar hours on The Strip.

I along with other students who share my feelings believe that SIU-C students have plenty of opportunity to obtain as much alcohol as they choose. I certainly believe it is too much to ask for additional hours at the bars on The Strip! Carbonel does not want students who enjoy occasional peace and a decent environment put up with a lot of noise, outrageously intoxicated and out of control behavior.

Don't misunderstand my comments. I am not saying that all students involved in The Strip's problems. It is the individual students who cause trouble who destroy property and peace, injure themselves and others, and generally perform poorly in academicians.

I have worked with students in a college setting for many years, and I am familiar with the promises "to be good," but there will always be those students who will not cooperate. Since it is difficult to separate those who behave well when given privileges from those who misuse them, a promise to adhere to a code of conduct would be in vain.

I think students must show more maturity before they should be given more drinking hours; to do anything less than that is a great wrong to the students who enjoy occasional peace and a decent environment put up with a lot of noise, outrageously intoxicated and out of control behavior.

And, in terms of Halloween, I think students have found enough ways to use alcohol and "blow" themselves away.

Overall, I think that if students would spend more time looking for ways to use alcohol and "blow" themselves away. Overall, I think that if students would spend more time looking for ways to use alcohol and "blow" themselves away.

Where do wheelchairs belong?

At the sake of sounding cold-hearted, I would like to know — for the benefit of my fellow students and others in Carbondale, where people in wheelchairs are expected to drive. Within the past two weeks, I have seen wheelchair operators driving down the center of the divided streets, hooking up cars with their acquisitions, and one wheelchair person driving his manual chair down University Avenue, causing cars to screech to a halt in order to keep from hitting her.

Last week, as I was riding my bicycle to campus, I looked up to see a guy in his electric wheelchair driving in the bike path leading to campus. I could have passed him on the left, but I have no traffic, or on the right, allowing me one-and-a-half feet of space for the bicycle.

I chose to pass on the right, and the guy in the wheelchair verbally yelled at me that I was supposed to pass on the left. I will sometimes pass on the left, and these choices few individuals in wheelchairs who, don't know either, who's supposed to drive where — Kimberly Meyer, Senior, Public Relations.

We are continuing to question Personnel Dimensions and the 24Hr. Information Desk, and the results which result in pay inequity. We continue to study these issues, and we are concerned that these officials are made aware that this issue is imported and relevant to a large portion of the SIU community, particularly the students who come from to give the administration their equity raises and why can't money be found to give Civil Service equity raises.

We need to know where to place wheelchair.
They also believe that the leaders of the Eucharistic liturgy must be fully ordained priests, Meyer said. Many of those participating in the Eucharist do not believe in either of these things. Meyer said, making the Eucharist not a genuine sign or sacrament of unity in faith. However, Blessed Sacrament, a Liberal Catholic Church in Herrin, will participate in the World Communion Service.

The Rev. Harold Stadelbacher, of Blessed Sacrament, said the Liberal Catholic Church differs from the Roman Catholic Church in that "we believe in the essential unity of all faiths," and permits worship with those who look at communion as a symbolic act. The churches of the Carbondale Interchurch Council are sponsoring the event, to provide "a setting where area Protestants and Catholics worship as one body."

Individual Roman Catholics may participate in such a worship event, but the two Roman Catholic Churches in Carbondale will not, said the Rev. Eric C. Meyer, of the "ewman Center.

Meyer said: "The Roman Catholic Church sees the common celebration of the Eucharist as a goal of the ecumenical movement, as something that we ourselves can do with other Christians only when all of us who celebrate will have achieved genuine unity in our faith in Jesus Christ."

The Roman Catholic Church views the celebration of the Eucharist or communion as an event in which all the participants must believe that the consecrated bread and wine become the body and blood of Jesus Christ, Meyer said.

SOUTHERN FEST II, Student Activities Fair, will be held from noon to 4 p.m. Friday at the Free Forum Area (Rain location Ballroom D). Activities will include a dunking booth, a face painting competition, a graffiti wall and more. There is no admission fee.

THE MBA ASSOCIATION is sponsoring a faculty forum from 4 to 6 p.m. Friday at the Gardens Restaurant, Route 13 east of Carbondale. Featured guests will be members of the administrative science faculty.

THE DEPARTMENT of Speech Communication’s first Pro-Seminar of the fall semester will be from noon to 1:15 p.m. Friday in Communications 47. Professor Richard R. Langston will present "Merleau-Ponty on Metajournalism: Signs, Emblems and Appeals in the Poetry of Truth," (A study in Michel Foucault’s historiography). The public is invited.

THE SIU NEWCOMER’S Club will hold a family picnic from 1 p.m. to 3 p.m. Sunday at Lake Murphysboro, rain or shine. Hot dogs, hamburgers, beer and chips will be provided. Each family needs to bring a salad or dessert. Games are planned for children. The cost is $3 per family. Reservations deadline is Friday. Persons interested in more information or reservations can call Sheri Swan at 687-1495.

"Honest Answers to Hard Questions," a panel discussion of some of the tough issues confronting Christianity, will be held at 7 p.m. Friday in the Mackinaw Room. There will be singing, prayer and fellowship; all are welcome. Those interested can call 529-1885 or 549-7403 for more information.

Blacks in Business win honors, want top prize again next year

By Sheila Washington
Staff Writer

Blacks Interested in Business won honors as the nation's top black student business organization at the National Business League's annual convention in Dallas recently.

Fifty-two student chapters competed for the Irby G. Smith, Chairman of The Year Award, which includes a $500 General Motors stock certificate.

The convention, attended by more than 50 black student business organizations, judged chapters on: relations with area business activities; and the number of students who acquired business internships.

Sonia Johnson, SUIC-senior in marketing and advertising, was elected recording secretary of the National Business League. The SUIC group has been active with the business community, she said.

Representatives from Coca-Cola, State Farm Insurance, Xerox and IBM were just a few who have come to talk with the group about business internships, Pittman said.

Recognition was not a surprise to the five members who represented SUIC in Dallas. "We knew we were going to win," said Sylvan Brown, who is the chapter president of the National Business League.

It was only last year when we received honorable mention at the conference, but we had not applied for the chapter of the year competition, he said.

Receiving top honors has not changed the organization's goals, Pittman said. "We have always set our goals high, so there will be no change in the activities we persevere with, Brown said the group focuses on tutoring, inviting business representatives to speak to their group, job and skills workshops, and its annual Minority Business Day Conference, which brings black businessmen to SUIC last year.

Brown said that there are 46 to 45 members in Blacks in Business; and they meet every other week. He said they are already planning activities for next year, and that one of their objectives is to win top honors again this year.

The club has no special requirements for membership. There is no pledge or initiation period. That would defeat the educational purposes of the organization, Pittman said.

**Sonia Johnson cancels ERA fast survivor to speak**

Those planning to see ERA proposition Sonia Johnson Friday night need to adjust their plans. Johnson had "a family emergency," according to C.J. Johnson, organizer of the event.

Replacing Johnson will be another crusader for the Equal Rights Amendment, Sister Maureen Santure. She will speak at 7 p.m. Friday in Student Center Ballroom C.

Like Johnson, Sister Siegel was an ERA proponent who lasted 30 days in Springfield. She was the main speaker for those involved in the hunger strike, Cindy Johnson said.

**Aurora Trio opens concert season**

When the Aurora Trio takes the stage at 8 p.m. Tuesday, they will open both the St. Louis Chamber Orchestra's season as the Student Center's Concert in the Hall series.

The trio is comprised of flute Linda Chens, a graduate of Yale University and a student of Joan Pieri Rampal, harmonist Annick Ordier, a graduate of Juilliard and winner of the 1974 Geneva International Competition, and harpist Cornelle White, a graduate of the Curtis Institute of Music and formerly on the staff of Juilliard.

Admission to Southern Illinois Concerts programs is by membership card only. Newcomers to the community may inquire about memberships, honored in Cape Girardeau, Mo., by calling 549-6729 or 694-3562.

The Student Diner Concert Series will provide students only with admission to the program. A buffet dinner is served in the Old Main Room in the Student Center before each concert. Students must buy a dinner-concert ticket for $6.75 per concert admission only for $2. They may also purchase a dinner-concert ticket for $7 that will admit them to all programs.

Tickets are available at the Student Center Ticket Office.

Sessions help families talk about sex

By Michele Iman
Staff Writer

The time may have come for the teaching of sex education to be
a whole different meaning.

Gilbert and Sullivan's "The Pirates
of Penzance" will make its way onto
the stage of Shrock Auditorium at 8 p.m.
or Wednesday.

The musical will be performed in
the traditional style, unlike the produc-
tion which played locally recently with
Linda Rondstadt and Rex Smith. This
is the second of the Celebrity Series
productions this season.

The production will be presented
by Gloriana Productions, a company
devoted exclusively to the presenta-
tion of works by Gilbert and Sullivan.
This production will feature a company
of 50 with a live or-
chestra and chorus. The cast
will include singers who have
performed with America's leading
opera companies, in-
cluding the New York City Opera;
Houston Grand Opera; Wolf Trap and
the John F. Kennedy Center. Washington, D.C.

Tickets in section A have
all been sold, but seats remain
in sections B and C for $11.50
and $10.50. Shrock Auditorium
box office is open 11:30 a.m. to 6 p.m.
Monday through Friday.

"Pirates of Penzance" will make
their way to Shrock

Complete with pirate kings and
lovely ladies, major
generals and readies-of-all-work, "The Pirates of Penzance" will make its way onto the stage of Shrock Auditorium at 8 p.m. or Wednesday.

Gumerman said. The next workshop will be offered in January or February. OCTOPUS started as a task force almost two years ago, Gumerman said. A group of people who wanted to work on specific problems sent out invitations to people working with teens to see who was interested in working with adolescent sexuality issues, she said. The health department then invited other agencies to meet and discuss issues.

"We were concerned with a couple of problems," Gumerman said. "One, the high number of teenage pregnancies in Jackson County and the other was the lack of sex education programs in the area, especially outside of Carbondale." OCTOPUS developed out of this task force.

We decided to work on sex education in the churches. We thought that would be an appropriate place to start because in the church you can teach sex education and at the same time talk about moral values and moral responsibility," she said.

Also, Gumerman said, churches are where families meet naturally.

Surveys done by the health department several years ago show that parents would like to teach their children about sexuality. Gumerman said and children generally want to learn that subject from their parents. But, Gumerman explained, parents often lack the skills and also the information to teach their kids.

"People wonder why you need to teach parents skills about talking to adolescents about sex," Gumerman said. "It's because talking about sexuality to kids is sensitive, personal and difficult to talk about."

She said the parents are interested in how they can talk to their kids about sex and the adolescents are interested in issues such as relationships and love.

"Adolescents are not so much interested in birth control or sexually transmitted diseases," Gumerman said.

"We design a program for each church to meet its needs and interests," Gumerman said. "The churches seem to like the small group discussions the best."

According to Gumerman, a minister plays an important role. He talks about the moral issues and the Christian's viewpoint of sexuality.

"We find that both youth and parents are interested in knowing what the church's stance are on marital intercourse, use of birth control, homosexuality and abortion," she said. "And they're giving answers to those questions."

For example, she said, the church said it's not okay to have marital intercourse but are in favor of abortion before marriage. "Then, we do some role playing on how to say no."

OCTOPUS usually has six sessions, dealing with two specific topics each. Previous sessions have focused on the role of sex education in the schools, "did Adam and Eve give it as the church sees it," contraceptive efficacy, the dangers of becoming a teenage parent, and relationships - do they really live up ever after?"
Grusin disc is a sigh of relief
By Chet W. Skib
Student Writer

Veteran producer-writer and keyboardist Dave Grusin has been in the pop-soul scene for more than 15 years. Many consider him one of the best at what he does - that is, the music for several projects such as "The Electric Horseman." Grusin's latest album seems to be a sigh of relief from all these years of work. The term "Out of the Shadows" contains no material that is too heavy, too arrogant or too aggressive. The entire album concept seems to be "let's just make music." The album is much different in style, with a more relaxed and smooth style than that of Grusin's former work. The album's best cut has to be "Anthem Internationale." Grusin used himself in composing this selection. The same selection is where Ritenour comes through a winner. Ritenour adds melody, and Grusin stays with himself. Grusin's influence shows on this tune. Listening to "Anthem Internationale" creates the expectation of some sadistic singer to come in and belt lyrics, but it never happens. Maybe that would have destroyed the tune, but that seems to be what it needed. "Serengti Walk," ("Slippin' in the Back Door") is a seminally seductive piece of art originally composed by Harvey Mason and Louis Johnson. It seems to have been based on the War classic "Sippin' in Darkness." Though interesting, the song is repetitious and lacks flavor because Grusin doesn't introduce anything exciting, but still holds its own.

One tune that really stands out is Grusin's version of the title "Out of the Shadows." "Four Brothers" The use of an ORX synthesizer on this selection was great: it's straight-ahead jazz and it tastes good.

This is Gadd's territory and his playing testifies to that. It's nice to know that he isn't afraid to reach back and play something traditional. He hasn't played straight-ahead jazz this well since his stint with Grover Washington Jr. on the "Secret Place" album in 1976.

"Sweetwater Nights" is probably the prettiest and most sensitive selection. Its elements are warm and inviting, although commercialism creeps in now and then. Grusin managed to hide that aspect very well. Hats off to Ruben Bassini for his percussion work.

Grusin made a good musical effort on "Out of the Shadows." Slickness took a back seat and the result was up front. Thank God there's still hope for good music.

$2.00 Concert only open to the public

The Student Center and the Aurora Trio are working together to provide some of the most exciting and entertaining events on campus.

This unusual ensemble was first organized to perform in the Concert Artists Guild's St. Louis Series during 1974-75 season. Since that time, the ensemble has played in concerts throughout the area, drawing critical acclaim from the public and critics alike. The concert series proved so popular that the ensemble has continued to perform concerts regularly.

(Continued)
Demonstrations, lectures featured in Art Week '82

Saturday through Oct. 6 the museums of Faner and Quigley Halls will collaborate to feature arts and crafts as part of "Art Week '82." The week will feature lectures and demonstrations on dolls, pottery, sculpture and painting.

G.P. Jones, a doll collector, restorer, and author of books on antique dolls, will show examples of her original doll designs and talk on the history of dolls at noon Monday in Faner Museum Auditorium. The public is invited to bring dolls for historical identification.

On Oct. 8 Judy Travelstead will lecture in Faner Museum Auditorium on the history of Arizona Illinois Pottery and the Kirkpatrick family who operated it from 1893-1900.

Travelstead, an Illinois Magazine contributing editor, will also discuss the importance of pottery in folk art today and ways to indentify pieces of pottery and the market value of pieces. Beginning Monday the exhibit "German Art: 1900-1924 (Expressionism)" will be displayed at Mitchell Gallery in Quigley Hall. The print and water color exhibit is on loan from the Goethe Institute.

The work of painter Milton Avery will be on display at Faner Hall Sunday through Nov. 7. Jerry Kelley, coordinator of the Arts Week program in Faner Hall, said Avery is recognized as a leading modern master of American painting. Until Oct. 21 Faner Hall will feature sculptures of Earnest Trovel.

Gallery hours are from 10 a.m. to 5 p.m. Monday through Saturday and from 1:30 to 4:30 Sundays. Admission is free.

"Starch blockers" being confiscated

WASHINGTON (AP) — Federal agents are seizing stocks of "starch blocker" pills from producers across the country who are defying a Food and Drug Administration order to halt traffic in the popular weight-loss products.

The FDA charges that the pills, which use a kidney bean extract, are classified as a drug and are marketed illegally because they have not been approved by the agency for safety and effectiveness.

Some of the producers in the $10 million-a-year business are ignoring the FDA's July 1 order on the ground that starch blockers are a food product, not a drug requiring government approval.

The FDA announced Thursday that, at its request, U.S. marshals dispatched by the Justice Department have raided six starch blocker factories and distributors in five states since Sept. 17, and seized pills valued at $481,000.

As with most native Americans, Stephanie Autumn's philosophy is to protect the land.

She believes that the land is not for sale. Instead, it should be shared among those living on it now and be protected for future generations.

Autumn, 28, from Oraibi, Ariz., was in Carbondale last week to spread her philosophy. But her main purpose was to throw light on the Leonard Peltier case.

Peltier, 38, a prominent leader of the American Indian Movement, was convicted on April 14, 1977, of two counts of first degree murder in Fargo, N.D., in connection with the shooting deaths of two FBI agents, Jack Coler and Ronald Williams, at the Pine Ridge Reservation on June 26, 1975.

Peltier was sentenced to two consecutive life terms and was transferred to the Federal Penitentiary in Marion on June 1, 1979.

"It is because Peltier and other native leaders called the consumer and strength to stand up against the U.S. government to protect the land," she said. "He is negotiating by the authorities." Autumn said. The other leaders are Russell Means, Dennis Banks, John Trudell and Clyde Bellecourt, she said.

"We are out here to tell the people that we want to keep our land which the U.S. government is trying to take," Autumn said.

"Our land is sacred to us. We want to live and raise our children in our traditional way."

"Every year the government brings in new laws to take away our land on which we have lived for 300 years," she said. "We are not going to be choked out of our land."

Autumn's travel to bring attention to the plight of the American Indians and the Peltier case began in Pine Ridge, S.D., in April. From there, she and Junie Espinosa, who also come to the local Leonard Peltier Support Group led by Dave Baker. The group has about 100 members in Carbondale, she said.

Nationally, 22 chapters of the group with about 1,200 members are involved in the struggle to gain a new trial for Peltier. In Europe, the group has about 300 members, Autumn said. The group is headquartered in Fargo, N.D.

Autumn left Carbondale Sunday for Minneapolis to continue her journey. She would then proceed to Fargo, N.D.

She said that the government has put about 400 political prisoners in jail over the past 10 years. Violations of human rights in this nation are overwhelming, she said.

"Jimmy Carter was only concerned about human rights outside the United States. He did not care about justice or about human rights within the nation," Autumn said.

She said that violations of human rights are happening right in our backyard," she said.

Autumn's travel to the Peltier case, she said a person is innocent until proven guilty. But the court ruled that Peltier is guilty unless proven innocent, she said.

She said Peltier's attorneys Bruce Edelman and Bill Kauf- sifer, both in North Dakota, have obtained FBI files through the Freedom of Information Act.

She said the documents proved that FBI agents and U.S. prosecuting attorneys apparently perjured themselves and falsified and suppressed evidence to convict Peltier of "aiding and abetting" in the deaths of the two FBI agents in 1975, she said.

U.S. Reps. Toby Moffett and Wyche Fowler, in a supporting letter dated Dec. 12, 1980, said. "As members of Congress, we cannot permit Leonard Peltier to spend the rest of his life in prison without raising the issue of the government's conduct in this case."

Autumn said there are 150 Indian reservations scattered throughout the nation. She comes from the 7,000-member Oraibi tribe. The number of native Americans in the nation totals four million, she said.

Several demonstrators were present in Carbondale to throw light on the case. The American Indian Movement also aims at making the government honor treaties signed 100 years ago. Of the 20 treaties the Indians made with the government, not one has ever been honored, she said.

"The government is always fighting关于我们 constitutional rights and about honoring treaties."

Child development measured in motor skills assessments

By Linda Stockman
Staff Writer

Dale Ulrich says that anyone can be a good athlete.

But children who fail to learn fundamental motor skills will not fully develop in sports skills according to Ulrich, assistant professor of physical education.

"Everyone goes through the same motor skills development," he said. "When the central nervous system matures, voluntary reflexes replace involuntary ones. Motor skills don't develop naturally, as many parents misconceive, they must be taught."

Ulrich, director of the free motor skills assessment program, said that more than 10,000 children over 10, it's highly unlikely they'll ever develop the skills.

The Physical Education Department will assess children's motor skill development from 9 to 11 a.m. every Saturday in the Pullman Hall Gymnasium through Dec. 11.

Ulrich said that children start judging each other on motor skills between the ages of 2 and 7. "Children in the same levels socialize with each other," he said, "those with high levels of skills are looked at highly."

Ulrich also said that those with better skills are chosen first in picking teams.

A strong fundamental motor skills foundation is important, he said. "If a child doesn't develop adequate levels of skills, he'll form a proficiency barrier that will affect his potential sport skills for the rest of his life. "Sport skills are a combination of fundamental motor skills," he said.

Younger children won't be assessed; advanced skills in skipping and leaping Ulrich said, but 5 to 10 year-olds will be tested on all 12 skills. Skills include running, hopping, jumping, throwing, batting and catching.

The program also educates parents. "Children take cues from their parents," he said. "We're trying to impress upon them that they should reinforce their kids to do the same things boys do."

The environment plays a large role in the motor skills process. Children who are restricted to playpens may not develop locomotor skills, such as running, hopping, leaping or skipping, Ulrich said.

Similarly, children who are told to put an object down every time they pick one up may have trouble manipulating objects, such as bats, balls and racquets.

Ulrich said parents must make appointments (by calling 453-2296) for an assessment. The tests take 15 to 30 minutes. He discourages parents from asking about results from parents after the tests.

"It's important for parents to know what skills should be worked on a home," he said. Although the program is in its second year, it's not as extensive as last year due to funding cutbacks.

"Last year we paid students to work with children during Saturday," he said, "this year we have no money to provide motor skills instruction."

The program also allows parents to have their children reassessed at intervals. "If the child has gone through the maturation patters there's no reason to reassess," he said, "but younger children who haven't yet mastered the skills can be reassessed every six months to see if they're doing okay."

Ulrich also said the department can arrange to assess children at preschools or children of parents in an organization.

It takes more than 16 months of intensive training to become a fully qualified officer in the Nuclear Navy. You begin with four months of leadership training. Then as a Navy officer you get a full year of graduate-level training unavailable anywhere else at any price.

Navy training is based on more than 1900 reactor-years of experience. Right now the Navy operates over half the nuclear reactors in America. And the Navy's nuclear equipment is the most sophisticated in the world. That's why your Navy training is and must be the most sophisticated in the world.

As an officer in the Nuclear Navy, you have decision-making authority immediately. You get important management responsibility fast. Because in the Navy, as your knowledge grows, so does your responsibility.

Your training and experience place you among the country's most qualified professionals. (No surprise

that most of the men who operate the reactors in private industry started in the Nuclear Navy.)

It takes more time and more effort to become an officer in the Nuclear Navy. But the rewards are greater, too.

The rewards can begin as early as your junior year in college. Qualify, and the Navy will pay you approximately $1000/month. Plus you'll finish early.

After four years, with regular promotions and salary increases, you can be earning as much as $37,400. That's on top of a benefits package that includes medical and dental care, and 20 days' vacation earned every year. More responsibility, more money, more future.

So, if you're majoring in math, engineering or the physical sciences, and you want to know more about a future in nuclear power, fill in the coupon.

Today's Nuclear Navy is an opportunity like no other in the world.
Economic problems facing Illinois farmers will be the subject of a three-hour forum, "National Farm Crisis Day," to be held Friday, Saturday at the Carbondale Community Center, 601 E. Carbondale.

Organized by Rural America, Inc., farm alliances in 12 states are sponsoring rallies and forums Saturday aimed at gaining awareness for farmers' problems.

Two major issues facing Illinois farmers today are high prices for crops and forced farm sales by state and federal governments, said Dave Ostendorf, spokesman for Rural America's Des Moines, Iowa, regional office.

Another purpose of the forum will be, "to unite all the separate farm groups into one, more influential alliance," Ostendorf said.

"We are trying to bring attention to the disaster we're facing right now in farming. We are trying to bring farmers, labor, business and church people together, hammer out a united approach to the farm crisis," he said.

The farm organizations also want to call on Congress to enact laws that would improve farm conditions, Ostendorf said.

F.A. Foul, a Union County farmer, and one organizer of the Carbondale forum, said that parity — the relative price of farm goods — is one of the biggest issues affecting Illinois farmers today. Parr said that when parity drops below 60 percent, as it has done in 1983, "small farmers go out of business."

"The last time parity dropped below 60 percent was around 1923. First 1923 and the following year, unemployment rose to 26 percent. What President Reagan must realize is that if legislative measures are not taken soon, we will likely be faced with 20 percent unemployment. History has proven this true. It is going to happen."

In addition to Parr, candidates and members of the Illinois Senate and House will discuss farm issues and answer questions. Attending from the 59th District will be: Democrats, Rep. Bruce Rich- mond and Sen. Kenneth Rubenstein; and Republican Rep. Wayne Dunham.

Present from the 60th District will be: Republicans Rep. C.L. McCord, and Ben Brinkley, a senate candidate on the Southern Illinois Project Rights Party ticket.

Barbara Brundage, of Illinois South Project, a Herrin-based group, said that she will discuss farm legislation that her group plans to propose next year. Parr said that he hopes harvesting will not keep farmers from attending the forum, "I hope that we get a good turnout, but I have the feeling a lot of farmers will want to stay in their combines," he said.

National Farm Crisis Day to highlight money issues

Study indicates spermicides may help prevent gonorrhea

Chicago (AP) — Women who use spermicides as contraceptives appear to be much less likely to contract gonorrhea than those who use other forms of contraception, a new survey suggests.

There has been some belief in the past that spermicides reduce the risk of vaginal infections, but this has been based on isolated studies or other research lacking adequate control.

The study surveyed 77 women who developed gonorrhea and a control group of 164 who did not, all of whom used the services of a group called the Health Cooperative of Puget Sound in Seattle.

Researchers who reported their findings in the Oct. 1 issue of the Journal of the American Medical Association, concede their methods for determining any link between disease protection and spermicides were not foolproof.

Nonetheless, they said, "The results are encouraging and provide further evidence favoring the idea that these substances prevent venereal disease."

One of the researchers, Dr. Hershel Jick of the Boston University Medical Center, said in a telephone interview that while the research doesn't prove spermicides prevent gonorrhea, "the results are very, very impressive — and I believe any reasonable person would believe it is something important."

However, an accompanying editorial urged some caution in accepting the conclusions of the study, which indicates that women who use spermicides had gonorrhea rates only one-fourth or less than those of women who used an oral contraceptive or had been surgically sterilized.

Both the researchers and the editorial writers, three physicians with the Centers for Disease Control in Atlanta, pointed out that study results could be tainted if the spermicide users had fewer sex partners or were less casual in their sexual behavior than the others.

The researchers believe they have eliminated some of this bias by their method of analysis, but they did not ask the women about their sexual habits.

Further, many couples who use a spermicide also employ either a condom or diaphragm.

"Much of the chemical protection (against gonorrhea) the authors attributed to spermicides may actually be due to mechanical barriers," the editorial said.

Jick disagrees, pointing out that half of the women using spermicides also obtained diaphragms from the health cooperative, so their partners weren't likely to have used spermicides alone for protection against gonorrhea, diaphragms apparently have little, if any, effect against vaginal gonorrhea, Jick said.

He said, a separate survey at the cooperative indicated that 6 percent of a group of pregnant women who used a spermicide earlier were also protected by condoms.

The editorial also said some women's groups have promoted the use of spermicides as protection against venereal disease. Therefore some women may use a spermicide with disease protection in mind, and these health-conscious women may also take additional steps against contracting sexually transmitted infections.

"The study adds to the body of knowledge . . . but it doesn't prove" spermicides protect against gonorrhea," Dr. James W. Curran, one of the authors of the editorial, said in a telephone interview.

If it's ultimately established that spermicides are helpful, he said, there's a danger of a false sense of security among users because it may not protect against other sexually transmitted diseases.

The researchers who reported their findings in the Oct. 1 issue of the Journal of the American Medical Association, concede their methods for determining any link between disease protection and spermicides were not foolproof.

Softballers aim to even score

By Brian Higgins
Staff Writer

Although Coach Kay Brechtelsbauer's 24- season record is not indicative this year's squad, that mark not likely to get much prettier this weekend at the Redbird Gateway Invitational in Normal.

The two teams responsible for 1 of the Salukis' losses, Western Illinois and Missouri, will join host Illinois State, southwest Missouri, Wichita State and SIU in the round robin tournament.

The Salukis opened the season against WIU two weeks ago and went 1-3 in the road opener, including a no- hitter. Last weekend Missouri came to Carbondale and outlasted SIU-C in the finals of the Fall Invitational, 6-2. This weekend, the Salukis have again defeated one of the Gateway participants, MU, in a 1-0 pitchers' duel during last week's tourney.

As for the other two teams involved, Brechtelsbauer could only speculate.

"Southwest Missouri is very strong. They'll give us more of a feel for our conference and the Gateway Collegiate Athletic Conference," said 16-year veteran said. "Wichita State has a fairly new program, but they're obviously doing very well. They're definitely a team to contend with."

The tourney gets under way Friday morning when the Salukies face Missouri in a revenge match. Although successful in their first two attempts at beating the Lady Tigers, Brechtelsbauer has no intention of changing her strategy.

"We're just going to watch what John can do," McGirr said. "That doesn't mean that Mike's going to be out the rest of the year." Schaefer also has played the Salukis a lot since he lives in nearby Carlyville.

McGirr is also going to use the tournament as a chance to see how some of the Salukis play.

The women's golf team is taking this weekend off. McGirr said the women have played four weekends in a row and consequently have missed a lot of school. They will resume play when they visit Lexington, Ky., to play at the Lady Kat Invitational the weekend of Oct. 11.

Golfers to compete closer to home

By Dean Kirk
Staff Writer

Last weekend, the SIU-C golfers got a chance to take a four-road trip to play three days of golf in Biloxi, Miss.

This weekend, the team will be playing a little closer to home, in Springfield. They travel to Springfield to play in the SIU-E Invitational.

According to Coach Mary Beth McGirr, the Salukis were originally supposed to compete in the Illinois Intercollegiate Golf Tournament this weekend. But problems in scheduling and in securing a course resulted in the tournament being cancelled until spring.

Despite the fact that only seven teams will be playing, McGirr is still looking forward to going to the tournament. "We're just not playing this weekend. McGirr said. "There'll be some good teams there."

The teams include Bradley, Northwestern, Eastern Illinois State, Indiana State at Evansville, SIU-E and SIU-C. McGirr has no idea how any of the teams will do.

"I don't know how any of the other teams," she said. "I don't know if any one team is capable of winning."

She said since only 18 holes are being played, a team can't make up ground. "You get one chance to hit a shot," she said. "It's a wide-open dogfight."

McGirr said the course where the tournament will be played, the Rail Golf Course, is a good one. "It's a quality golf course. There's no doubt."

The course, which is located in Lincoln, Ill., is a lot of water and open spaces which allow the wind to blow on the fairways. It is approximately 6,500 to 6,700 yards long.

With the exception of Mike Stuh, the same SIU-C lineup that played in Biloxi — Jan Issac, Scott Briggs, Bob Hammond and Tom Jones — will play in Springfield. Stuh's spot will be filled by John Schaefer.

"We're just going to watch what John can do," McGirr said. "That doesn't mean that Mike's going to be out the rest of the year."

Top challenge on tap for netters

By Brian Higgins
Staff Writer

Every coach knows the feeling of looking down the schedule at the beginning of the season and seeing a team — the team of the schedule's superpower. That team is listed so far down on the agenda that the coach can't possibly be concerned about them so early in the season. After all, what kind of coach would gear an entire season toward playing one team?

But that team lurks in the back of the coach's mind, and as weeks go by, it may even grow larger and more intimidating. After all, this is the one team that lingers at the back of the coach's mind, and as weeks go by, it may even grow larger and more intimidating.

The inevitable has arrived for women's tennis Coach Judy Auld, who will probably be riding the crest of her team's career victory when her team rolls into Evanston Saturday to face the Salukis, a superpower opponent, the Northwestern Wildcats.

The Salukis began turning up for the NU match when they faced Eastern Illinois Thursday in Charleston. Last weekend, SIU-Chmc thrashed the Panthers off the court by an 8-1 count in a match which Auld had hoped would set her team up for a season's best.

After EFU, the netters travel to Wheaton to do battle with Wheaton College. Should the favored SIU-C netters win both of those matches, Auld will have garnished her 100th win in eight seasons at the Saluki helm.

"If we should win both matches," said Auld, "we know what to expect from Eastern. We played Wheaton last year and beat them. They usually have three or four good players and drop off from there."

The Saturday morning FEST from Page 24 returns heat, and on a warm day, this ball also takes over the players. The ball also travels faster on the turf and thus can have the offensive attack of a team.

"It's hard to adjust to passing on the turf," Hiller said. "If the passes are not accurate, the team will be doing more running."
GRID from Page 24

kickoff 85 yards for a touchdown in the season opener against Rice.

"They can score on any play," said Dempsey. "They're high powered."

Dempsey could well have said the same thing about his own offense, which will operate against a non-descript defense.

Dempsey worries about a good pass rush and a pair of top caliber safeties, but calls the Cajun running defense "normal," and said "the corners at times can give you something." That pass rush might be Johnson's biggest worry, even though his protection keeps getting better, along with his own ability to avoid trouble. But this week the line will be without center Steve Pibs, who underwent reconstructive knee surgery, and left tackle Ed Weebil, who has a bruised knee.

Defensively the Salukis are recovering from bruises inflicted by Arkansas State, and will start freshman Adrian White at free safety. Also back up fullback John McGowan has been moved to defensive end and should play.

Harrier coach to face his old squad

By Dean Kirk
Staff Writer

At Friday's SIU-C-Murray State cross country meet, Saluki Coach Bill Cornell will see a lot of familiar faces. And they won't be just one the Saluki team.

Until he came to SIU-C in July, Cornell coached at Murray State for 15 years.

And among those familiar faces will be what Cornell considers Murray State's top runners Gary Ribbons, Jeff Stojp and Bob Hyson.

But Cornell said that the Salukis shouldn't have little to worry about from the Racers. He said the squad has more quantity, not quality, with a lot of freshmen.

Doug Vance, Murray State's sports information director, characterizes the Racers as "a real young team." Besides losing one of their top runners, Gary Atwell, to graduation, Murray State also lost Eddie Wedderburn and Chris Banyan to some other than SIU-C.

Vance also said that SIU-C will be as tough a team as any that Murray State will face this year.

The Racers will come to Midland Hills with three meets under their belt. They were second in a triangular meet with Arkansas and Indiana State at Evansville, sixth out of eight teams at the University of Kentucky Invitational and third out of eight teams at the Western Kentucky Invitational.

Cornell said the Salukis will have a home court advantage.

The squad did their usual once-a-week run at Midlunds on Monday when they ran a one mile loop five times.

Murray State's course, he said, is relatively flat with only two gradual hills. Runners have to face 25 hills when running the five-mile Midland Hills course.

The Salukis are in good shape with no injuries, Cornell said. He mentioned that he has been working with Gary Munson, Dave Belen, Mike Gonzalez and Mark Eliott the last few weeks for the Salukis last week — to get them to put forth more effort at this meet.

Last season Murray State defeated the Salukis 27-26 in Murray. Cornell explained that by saying the Salukis weren't really prepared that early in the season and that Murray had a better squad than the SIU-C did.

The Salukis are 34 in competition this year.

The Salukis are in good shape with no injuries, Cornell said. He mentioned that he has been working with Gary Munson, Dave Belen, Mike Gonzalez and Mark Eliott the last few weeks for the Salukis last week — to get them to put forth more effort at this meet.

Last season Murray State defeated the Salukis 27-26 in Murray. Cornell explained that by saying the Salukis weren't really prepared that early in the season and that Murray had a better squad than the SIU-C did.

The Salukis are 34 in competition this year.
**Volleyball team goal is simple—just win**

Simplicity

It is something we all strive for. When achieved it makes life so... well... simple.

"It all comes down to us just playing," assistant volleyball Coach Niels Pedersen said. "That's how simple this game is."

But the Salukis have a tendency toward the complicated. The many five-game matches have given Coach Dave Hunter more than a few grey hairs this season. The spikers have made fewer setters look like national powers, and top teams have come away from matches shaking their heads in the disbelief that this short, little team from Carbondale could have hit the ball so hard.

The short, little team from Carbondale will be in Memphis this weekend to face Missouri State and Tennessee.

"I believe we can beat these teams if we play the way we are capable," Hunter said. "Based on practices this week, we look pretty sharp."

Mississippi State, 2-5, will be the SIC-C's first opponent on Friday. The Salukis beat the Tigers two weeks ago at the Saluki Invitational 15-10, 15-7, 14-12. It was a whopping match for the Salukis though, and Hunter admits that it should not have gone more than three games.

"I have no doubt that Memphis State is much improved," said Hunter. "I have a lot of respect for individuals on that team."

One individual deserving respect is Holly Buford, the Tigers' middle blocker. The 5-11 middle blocker has a .331 spiking efficiency.

Tennessee will pose a bigger threat to the Salukis. The Lady Vols were ranked as high as 17th in the NCAA last season, and have gained mention in polls this season included among the Lady Vols' victims this season is No. 13 ranked Penn State. Tennessee is 3-2 overall.

"They are big," said Pedersen. "They don't do anything that we haven't seen yet, but they execute well."

The Lady Vols had some execution problems earlier this season when All-American setter Elizabeth Chaves was sidelined because of academic problems.

Four members of Tennessee's team played for the East team at the National Sports Festival this summer. April Chappell, a 6-0 middle blocker from California, and Bvr Roberson, a 5-8 outside hitter who transferred from Alabama, have been the Vols big guns this year. Robison was an All-Atlantic Coast Conference player last year.

"They run a multiple offense," Hunter said. "I think we are more offensively developed, but they have more brute strength in the middle."

The Salukis may have to play without middle blocker Chris Boyd. Boyd, who has been bothered by back problems. "Without Chris, we are a very different team," said Hunter.

She mentioned outgoing Bonnie Norrenbrenner from her outside hitter position to the middle, where she played last year, starting freshman Natalie Sisley is also another possibility.

Hunter also said Mary Maxwell is experiencing some instability in her knee which may limit her playing time.

Dempsey abandoned his tailback-oriented offense of yesteryear when he realized that his players were not the components of a high-powered passing attack. Johnson is on his way to breaking most of Jim Hart's records, helped by a trio of quarterbacks, the third of which is a tight end who is starting to catch passes, and a middle blocker. He also realized that his running game, handicapped by an inexperienced offensive line, was not going to be the force it once was.

"Our running game, at best, is normal," he said Thursday.

The Salukis will take their outstanding passing game and recently humbled defense contingent to Louisiana Saturday to play a surprising Saint Louis, here in the Carbondale. The kick-off is at 7:30 p.m.

"We've played pretty well," said Sam Roberston, who has coached the Cajuns to high-scoring wins over Rice, West Texas State and North Texas State.

"They've done it with an offense so wide open and so varied that Dempsey swears he hasn't seen run the same play since he was a baby."

"They have a multiple multiple offense," emphasized Dempsey, "and they seem to be able to handle it well, too."

"They have more assets than any team I've seen run the play," Hunter said. "It will be a multiple offense and we'll have to be prepared."

"In this modern time of football, with the rules set up the way they are, to run the ball at people is not the most advantageous thing to do," said Robertson.

**Saluki score depends on passing grade**

By Dan Devine

Staff Writer

Slowly but surely, SIC-C Coach Dave Dempsey has converted his team to a pass-first offense. Along with a growing number of completions and passing attempts, the Salukis' quarterback, Rick Johnson, has thrown the ball 157 times this year, and even Dempsey may be surprised by the ease with which he's moved the Salukis.

"We've been a pretty good team," said Sam Robertson, who has coached the Cajuns to high scoring wins over Rice, West Texas State and North Texas State.

"They've done it with an offense so wide open and so varied that Dempsey swears he hasn't seen run the same play since he was a baby."

"They have a multiple multiple offense," emphasized Dempsey, "and they seem to be able to handle it well, too."
