# Employment Outlook Good For '53 College Graduates

From U. S. Department of Labor

The economy of the United States is operating at extremely high levels. Employment records are established nearly every month, and unemployment is at postwar low. Consequently, the employment outlook for college graduates this year is excellent.

The main forces responsible for our present high production and employment are consumer purchases, new construction, and capital investment in new plants and equipment. All of these forces are operating at the highest levels in our history and are likely to continue so for a number of months to come. A further incentive is provided by the demand for military goods and equipment for national defense.

Such expenditures have been at a record high for peacetime, but are scheduled to edge downward with the foreseeable future.

It is traditional for Americans to look upon military service as an interruption of their civilian lives, but this service can provide significant vocational and educational opportunities. You may therefore wish to consult the latest editions of a number of official publications on the vocational and educational opportunities offered by the armed services. These are available at local recruiting offices.

**ENGINEERING** Opportunities in engineering are excellent for both new graduates and experienced men and women. During the build-up stage of the defense program the demand for engineers rose spectacularly. Over the forthcoming period of partial mobilization an average of 30,000 new engineers per year will be needed.

On the other hand, the number of new engineering graduates has been declining since the 1950 peak of 52,000 and will continue to drop, reaching a low of about 19,000 in 1954. Graduates are expected to rise again about 22,000 in 1955 and 29,000 in 1956 (assuming continuation of present Selective Service student deferment policies).

However, many of the new graduates of the next few years will enter the Armed Forces upon graduation. Therefore, the shortage of engineers is expected to continue for a number of years.

Chemical, electrical, and mechanical engineers will continue to find employment mainly in manufacturing industries, while Federal, State, and local governments will employ the largest number of civil engineers.

### NATURAL SCIENCES

Demand for personnel in most of sharply during the past 2 years, especially the natural sciences, has increased, especially in activities related to defense production and research and development. However, personnel are also needed in other kinds of scientific work, such as administration and technical sales. The demand for personnel in the natural sciences as a whole is expected to exceed the supply for several years as the defense program continues.

The need will be most intense for workers with graduate training of considerable experience. However, opportunities for persons with only a bachelor's degree will continue to remain good, particularly in view of the declining numbers of graduates with bachelor's degrees.

### CHEMISTS

Employment opportunities for chemists are greatest in such manufacturing industries as chemicals, petroleum, rubber, food, and paper. Educational institutions and government also employ substantial numbers of chemists. They are also in demand in consulting laboratories, nonprofit research institutes, hospitals, and mining companies. Though the need for persons with graduate training is greatest, those with only a bachelor's degree will find numerous opportunities.

Median income of chemists in 1951 was \$5,800 in private industry, \$5,000 in government, and \$4,900 in educational institutions. Chemists with a Ph. D. earned 6,000; those with a master's degree, \$5,400; and those with a bachelor's degree, \$4,900.

**PHYSICISTS** — The defense program has greatly increased the need for physicists, particularly for those with advanced training. The demand for persons with only a bachelor's degree also exceeds the supply. Opportunities are especially good for young physicists in nuclear physics, electronics, quantum theory, atomic and molecular physics.

Private industry, government, and educational institutions each employ roughly similar numbers of physicists. Median income in 1951 for physicists was 7,000 in private industry, \$6,300 in government,

and 5,600 in colleges and universities.

**EARTH SCIENTISTS** — Experienced geologists and geophysicists are needed especially in the petroleum and mining industries. New graduates in geology and geophysics, especially those who have had some field experience in connection with their academic work, will be in demand throughout the early 1950's. Meteorologists who are prepared for research work are finding good employment opportunities. Oceanographers capable of carrying on research work are also in great demand.

### TEACHING

The demand for elementary school teachers is greater for 1953-54 than in 1952-53. Over a million additional children will enter the elementary schools and add to the already swollen enrollment. The supply of new teachers to meet this great demand is slightly lower than it was in 1952-53. About 35,000 college students will meet the requirements for grade-school teaching in June, and many times that number are needed for new positions and the replacement of experienced teachers leaving the profession.

At the high school level the supply of newly trained teachers has dropped significantly each year since 1950. This year many vacancies exist in such subject fields as home economics, girl's health and physical education, agriculture, industrial arts, and certain physical sciences. The demand for high school teachers is expected to rise slowly over the next several years and will reach extremely high levels near the end of the decade.

Salaries for teachers continue to increase. Average salaries for a 11-month teaching year for 1953-54 were about \$3,400, with 13 percent average increase over 1952-53. Average salaries of more than \$4,000 were received by teachers in New York, California and Delaware, lowest average were in some Southern states and states with a high percentage of rural schools.

### FEDERAL CIVIL SERVICE

The U. S. Civil Service Commission reports that the pressing needs of Federal agencies in scientific and technical positions, such as engineer (various branches), physicist, metallurgist, cartographer, photographic draftsman, chemist, mathematician, meteorologist, geologist, and oceanographer as well as in medical, dietetic, and library specialties. There are some opportunities for summer employment in the physical sciences for student aids and trainees.

Information about examinations currently open may be obtained from college placement officers, from Civil Service Commission offices, and from first and second-class post offices.

### HEALTH PROFESSIONS

Shortages of physicians and dentists existed even before the present mobilization program was begun. Expansion of the Armed Forces intensified the need for personnel in these professions. Demand is also growing for other health-service personnel — physical therapists, occupational therapists, pharmacists, dietitians, public health nutritionists, medical laboratory technicians, medical and psychiatric workers, and veterinarians. Over the long run the growth of the population, the increasing demand for health services by the population will sustain the demand for health-service personnel.

### NURSING

There is a critical demand for nurses brought on now by growing civilian needs than by the fighting in Korea. Hospital construction is expected to add about 200,000 beds by 1954, calling for 20,000 nursing recruits in institutional nursing alone. Thousands

more are needed for public health, industrial nursing, and as instructors in nursing schools.

### BUSINESS AND LAW

Industry is actively recruiting college graduates trained in business administration. Those specialized in management and in such business techniques as accounting, advertising, copywriting, market research, writing, and personnel management are particularly sought. Those who combine leadership qualities with technical skill will have best opportunity for selection by large firms recruiting for potential executives. The demand for lawyers is greatest for those who have specialized, for example, in tax, patent, administrative, admiralty, or international law. Opportunities for women in this field have improved in recent years.

### BANKING

Men graduates are in demand for trainee positions in banks leading to positions as department heads and branch managers. The continued expansion of the banking industry is creating these opportunities. However employees are highly selective, particularly for positions in the largest banks. Opportunities for women have improved since the beginning of World War II: about 45 percent of all teller positions and 7 percent of all officers posts are held by women.

### ACCOUNTANTS

The demand for accountants is expected to remain high during the defense mobilization period and for at least a year or so thereafter. College graduates with courses in business administration as well as in accounting are preferred to those trained only in accounting. Opportunities for beginning jobs in private business enterprises are more numerous than in public accounting firms. The demand for certified public accountants is strong at present and continued gains in employment are expected over the long run.

### SOCIAL WORK

An expanding field and one which offers a variety of specialization is that of social work. There is a great need for trained personnel to handle case work, group activities, and work connected with community organization for social welfare. The field also includes administrative work, teaching, and research in social welfare. The shortage of trained qualified workers is expected to continue at least for several years among welfare agencies, hospitals, and State and Federal welfare establishments.

# SIU Trackmen Set Three New Records

In their first day of the Kentucky Derby and winner Dick Star, people talk about the speed of sound without much ado. Last Saturday at Normal, Doc Lingle's track boys were concerned with speed too, but instead of verbally, Lingle's men did all their talking with spiked shoes, came up with a 79 1/4 to 51 2-3 victory, and broke three long-standing records en route.

**VERNON SPREHE**, the Saluki dash champion from Nashville, made the term, "speed of sound" seem a reality that he Saturday afternoon, and cracked the 100 yard dash record with a 9.9 shot, equaling a record held here at Southern by four men, the last of which was Gene Pavton. Pavton set the century mark in 1936. That means that Sprehe becomes one of five men ever to run the 100 in 9.9 since Southern had its beginning.

**DICK GREGORY**, who only last week ran a 1:59 half-mile, turned the trick in 1:58 at Normal, and thus becomes the first man in SIU track history to hold that mark. It is a tribute both to the men, and to their coach, because it's one of those "once in a lifetime."

**LEO WILSON**, a great all-around athlete, turned the record book over in the 120 yard high hurdles. Leo's time was 15:3, the same as Dave Aiken's in 1939. Wilson won both hurdle events in 1950, and was clocked in 25:5 in the 220 lows.

And so, while most people were concerned with the Run for the Roses at Churchill Downs last Saturday, even the most casual Saluki track fan would have to admit that Lingle's boys efforts don't have to take a back seat to anyone, even Dick Star.

Now look at the record last weekend:

Marked of Southern won the mile in 4:45. Biernan of Southern won the 440 in 52.1. Sprehe won the 220 in 22.1, approaching a new record. Nicholas of Southern won the high jump with 6'3 1/2. Moore won the Pole vault for the fifth straight time this year, as he cleared

the bar at 12'. That's nine firsts, 10 if you count the mile relay, which Lingle's speedsters took in without much ado. Last Saturday at Normal, Doc Lingle's track boys were concerned with speed too, but instead of verbally, Lingle's men did all their talking with spiked shoes, came up with a 79 1/4 to 51 2-3 victory, and broke three long-standing records en route.

**VERNON SPREHE**, the Saluki dash champion from Nashville, made the term, "speed of sound" seem a reality that he Saturday afternoon, and cracked the 100 yard dash record with a 9.9 shot, equaling a record held here at Southern by four men, the last of which was Gene Pavton. Pavton set the century mark in 1936. That means that Sprehe becomes one of five men ever to run the 100 in 9.9 since Southern had its beginning.

**DICK GREGORY**, who only last week ran a 1:59 half-mile, turned the trick in 1:58 at Normal, and thus becomes the first man in SIU track history to hold that mark. It is a tribute both to the men, and to their coach, because it's one of those "once in a lifetime."

**LEO WILSON**, a great all-around athlete, turned the record book over in the 120 yard high hurdles. Leo's time was 15:3, the same as Dave Aiken's in 1939. Wilson won both hurdle events in 1950, and was clocked in 25:5 in the 220 lows.

And so, while most people were concerned with the Run for the Roses at Churchill Downs last Saturday, even the most casual Saluki track fan would have to admit that Lingle's boys efforts don't have to take a back seat to anyone, even Dick Star.

Now look at the record last weekend:

Marked of Southern won the mile in 4:45. Biernan of Southern won the 440 in 52.1. Sprehe won the 220 in 22.1, approaching a new record. Nicholas of Southern won the high jump with 6'3 1/2. Moore won the Pole vault for the fifth straight time this year, as he cleared

the bar at 12'. That's nine firsts, 10 if you count the mile relay, which Lingle's speedsters took in without much ado. Last Saturday at Normal, Doc Lingle's track boys were concerned with speed too, but instead of verbally, Lingle's men did all their talking with spiked shoes, came up with a 79 1/4 to 51 2-3 victory, and broke three long-standing records en route.

**BEER**

There—but for the grace of God, go I!

### Big Fight Over Who Bred Horse

"You didn't breed that horse. I did," says Michael J. Hogan in a claim against Warren L. Jones, Jr., master of Thermage farm at Gosdon, Ky.

Hogan filed a lawsuit Friday against Jones. He claimed that Jones did not breed and race Royal Bay Gem, a Kentucky Derby entry.

Hogan claims that he was the breeder and so is entitled to the breeder's share of the colt's earnings. The suit says the "dishonest and willful registration" of Jones as the breeder of the Derby hopeful has damaged Hogan to the amount of \$250,000.

The breeder's share of the Derby purse is \$2,000 for a winner, \$1,000 for second place, and \$500 for third.

Royal Bay Gem, owned by Eugene Constantin of Dallas, Texas was one of the few horses given a chance to race the Derby favorite, Native Dancer Saturday. He didn't though.

### Michigan Normal Takes Third in IIAC Baseball

Michigan's Normal's baseball team took their third place in the Intercollegiate Athletic Conference Friday by winning a double header from Northern Illinois.

Normal won the opener 2-1 as pitcher Paul Temple posted his third straight win.

In the seven inning nightcap Normal swapped Northern Illinois 10-1 as Bill Williams held visitors to three hits. It was William's second victory of the season.

### Greek Week Men's Sports

**No Track Events**

100	Running
200	Field
400	440 Jump
800	Broad Jump

Low Hurdles	Discus

**Tennis Finals**

Saturday—2:00 p. m.

**Valley Ball**

Tues. 7:00 p. m.

Men's Gym

Softball

To be played at discretion of teams. Games will be on old football field.

### Salukis Slam Normal Take Two Tilts

The Salukis added another feather to the nest atop the IIAC totem pole. They plucked the two feathers from the tail of Illinois Normal Redbirds Friday, 14-5 and 13-3. Southern now has a 4-0 conference mark.

**FOUR HARDHITTERS**

Capoing Eddie Coleman, Jim Schmalbach, Verlan Zapotosky, and Jack Chor were the big guns in the Southern attack. Coleman had a double, triple and a grand slammer. Schmalbach had five hits including a double and a three-run homer. Little Zapotosky had two safeties in each game and Chor had three hits.

**NORMAL TAKES LEAD**

Normal jumped out in front in the first game with two runs on four stolen bases, two walks and five hits off starter Wayne Grandcolas. Grandcolas then settled down and did not allow another run until the ninth inning.

Southern scored first on triples by Coleman and Zapotosky. Then the Salukis slipped on their hitting clothes and scored 11 runs in the third, fourth, and fifth. Larry Burns singled with the bases loaded in the third tied the score at 4-4.

**BIG TIED INNING**

Five more came across for the Martin men in the fourth. Don Campbell's bunt, a walk to Coleman and Schmalbach's single loaded the bases with none out. Two infield errors allowed two runs to score and three more scored on Hardin's singles by Jacques Theriot and Chor, Biggenbach, 3b.

Four walks, another error and a single by Zapotosky added three more in the fifth. Two more runs Russell, p

### J. Paul Sheedy\* Switched to Wildroot Cream-Oil Because He Flunked The Finger-Nail Test

Sheedy shed crocodile tears till he had alligator bags under his eyes, because he got the goat from his girl. "I'm going to hide from you and your horrible hair," she said "and you got your hands of Wildroot Cream-Oil. America's favorite hair tonic. It's non-alcoholic. Contains no coloring. Lanolin. Keeps hair well-groomed from morning till night. Relieves annoying dandruff. Removes loose, ugly dandruff. Helps you pass the Finger-Nail Test." Paul slicked down to a snapper under good cosines for Wildroot Cream-Oil. Now he's swamped with pussie-lipped females who want him to crocodile their telephone numbers. So water your waiting for! Buy a bottle or case of Wildroot Cream-Oil, or ask for it on your hair at any barber shop. Then your social life will stop droop, and you'll scale the heights.

Wildroot Company, Inc., Buffalo 11, N. Y.

Four walks, another error and a single by Zapotosky added three more in the fifth. Two more runs Russell, p

scored in the seventh on singles by Jerry West and Chor and a walk to Burns.

**NORMAL SCORES FIRST**

In the second contest the Redbirds again scored first as Jerry Biggenbach stole first in the second. The Salukis came right back with six runs, the rally highlighted by Schmalbach's grand slam homer. Big Jim then came back to tie the score on a home run in the third. Normal picked up two unearned runs in the third and it was 11-3 going into the fifth. Southern ended the scoring with two runs on a walk to Chor, a double by Coleman and singles by Schmalbach and Zapotosky.

Southern travels to St. Louis for a game with Washington University May 5.

**ORTOMETRY IN THREE YEARS, IF YOU HAVE SIXTY-L A CREDITS**

In three college years, you can prepare for the aggressive profession of optometry. If you have a minimum of 60 credits required, Liberal Arts credits.

There is a shortage of optometrists in many States. Eighty per cent of the Nation's millions depend upon the Doctor of Optometry and his professional skill in conserving vision.

The optometrist possesses the dignity of being a professional man. He renders a service essential to the health and well-being of his community. Substantial financial rewards are obtainable almost from the beginning of his practice. Optometry is a special—attractive to women.

The U. S. Department of Defense and Selective Service grant optometry students the same consideration accorded medical students.

Chicago College of Optometry, nationally accredited, is located in the heart of the world's greatest center for teaching in the healing arts. It is famous for its eye clinic. A building program is in progress. Dormitory accommodations, apartments and other facilities are available on a large campus.

For catalog and other literature, address Registrar, Chicago College of Optometry, 1545-25 Larrabee St., Chicago 14, Ill. Adv.

Harry Pick, Centralia sophomore, is one of the six lettermen Southern Illinois University track coach Leonard P. "Doc" Lingle.

The timetable for the state prep baseball tournament series was announced yesterday by the Illinois High School Association.

A field of 360 teams, including those from 43 Chicago public high schools, will compete in the 13th annual tournament. Downstate teams will play in 56 district and sub-district meets, with the winners advancing to seven four-team sectional.

The seven sectional winners, together with one representative from Chicago, will play for the state pennant in the finals at Peoria.
