Officials enforcing smoke alarm law

By Jim McBride

Carbondale residents who haven't complied with the city's new smoke and heat detector ordinance should do so as soon as possible or face a possible fine, says City Code Enforcement Director Morris McLane.

The ordinance, which took effect Jan. 1, requires installation of at least one smoke or heat detector near bedroom areas of all Carbondale residences. Residents found in violation of the ordinance will be given ten days to comply or face a fine ranging from $10 to $500.

McDaniel said the city will continue to check for compliance with the new ordinance during its ongoing code enforcement program and will be routinely inspecting residences for city code violations in the next few months.

The Carbondale Fire Prevention Bureau will also be inspecting hotels, motels and off-campus dormitories.

Director Samuel Rinaldi said.

Rinaldi said the University submitted a plan to the state legislature, saying Housing Director Samuel Rinaldi.

Rinaldi said the University submitted a plan to the state legislature, saying Housing Director Samuel Rinaldi.

The state now requires that smoke or heat detectors be placed in dormitory halls, rather than individual rooms, Rinaldi said.

Installation of smoke detectors for the entire University residence hall system could be expensive, Rinaldi said.

"We're talking about $200,000 to $500,000 to install smoke detectors in all the dorms," he said.

Currently, smoke and heat detectors are in place in the air circulation system and trash chutes of Brush Towers residence halls and other dormitories on campus.

In Thompson Park, Southern Hills, Evergreen Terrace and areas housing handcapped students, Rinaldi said.

Dormitories in Thompson Point don't have smoke detectors at this time, Rinaldi said, but all dorms in that area have fire alarm stations.

Price of smoke alarms stalls room installation

By Jim McBride

The University is planning to install smoke or heat detectors in residence hall rooms pending action by the state legislature, says Housing Director Samuel Rinaldi.

Rinaldi said the University submitted a plan to the state legislature, saying Housing Director Samuel Rinaldi.

By Darci Allen

Several local ministers and members of the Counseling Center staff are trying to get magazines such as Playboy and Penhouse off the shelves of the University Bookstore because they say the magazines are pornographic and encourage violence toward women and children.

"The students of the University Bookstore and another local store which sell the magazines say they don't believe these magazines lead to violence, as opponents charge.

Susan Losberg, counseling psychologist at the Counseling Center, said she and the other people who oppose the sale of the magazines at the University Bookstore "have concerns about the university supporting and making a profit off pornography."

"If this is a university that supports the growth and the development, the advancement of people, why is the University, through the bookstore, making a profit off something that is violent toward women?" she asked.

"When people are constantly exposed to violent pornography, they tend to feel less compassion for the victim," said Losberg.

"People make choices at this university everyday," she said. "That's what we're doing. Asking the bookstore to make the choice not to sell them because of what they promote."

Karen Knott of Campus Ministries said the push for the ban was not underway for only moral reasons. "This is more of a mental health issue," she said.

The University Bookstore doesn't sell racist magazines, but they sell magazines that show women's roles in an unhealthy image," Knott said.

Introducing Priazzo™ Verona Italian pie.
A classic recipe with meatballs.
We know them as meatballs. But for centuries, Italians have known them as "polpettas." Whatever you call them, they're the meat main ingredient in our delicious, new Priazzo™ Italian pie: Verona.

First, the juicy polpettas (meatballs) are sliced into tender pieces. Then we fill the pie with a flavorful sauce—slices of polpettas, mozzarella and cheddar cheeses, green peppers and onions.

Next, we cover it with a second layer of thin, tasty dough. Then top it with still more cheese. And finally, bake it to perfection.

Try Priazzo™ Verona Italian pie. It's available after 4 PM Monday thru Friday and all day Saturday and Sunday, and even on participating Pizza Hut outlets.

Newswrap

No sanctions against Syria, State Department reports

WASHINGTON (UPI) — The State Department said Monday that no new U.S. steps are planned against Syria for supporting terrorism but the administration hopes to persuade Syria to expel the Abu Nidal terrorist group. Department officials said there is concern over reports last week leaving the erroneous impression in foreign capitals that the administration is considering sanctions against Syria similar to those ordered against Libya last week.

Carrier leads battle group to Mediterranean

WASHINGTON (UPI) — A battle group led by the aircraft carrier USS Saratoga headed for the Mediterranean Sea Monday and moved up the region for the first time in three months, U.S. officials said. The conventionally powered Saratoga's pilots took a plane to a station in the Indian Ocean on 1987 to proceed to the Mediterranean.

S. Africa civil rights targeted by churches

WASHINGTON (UPI) — Leaders of more than 30 religions and church agencies Monday reaffirmed a Churches Emergency Committee on South Africa to play hardball politics with President Reagan and U.S. businessmen on southern Africa issues. The new committee will be led by the bishops, presidents, and other heads of congregations of the participating bodies and could lead to one of the most broad-based religious coalitions since the churches' involvement in the civil rights movement of the 1960s.

Sakharov's wife OK after heart operation

BOSTON (UPI) — Soviet dissident Yelena Bonner was in satisfactory condition Monday following more than four hours of rare sexplatable bypass surgery to increase the blood flow to her heart and relieve chest pain. The wife of Andrei Sakharov, the Soviet physicist and Nobel Peace-winner, also promised to her doctors she would finally give up smoking. Bonner, 62, who was placed in the intensive care section following surgery, had been suffering daily from painful angina because her arteries were blocked.

Arson possible in ICG blaze

By John Tindall
Staff Writer

Police and fire officials are investigating the cause of a blaze that destroyed most of the Illinois Central Gulf Railroad Division office at 104 N. Washington Friday night. Arson is suspected, officials said.

The fire was discovered at 9:40 p.m. Friday by railroad employees according to police reports.

Railroad employees reportedly saw a person rummaging through the ICG building and then discovered two fires in the building.

Carbondale police are investigating the fire in conjunction with the State Fire Marshall's Office. People having information about the fire are requested to call either Detective John Kluge, Carbondale Police Department, at 49-2212 or the Arson Alert Hotline at 1-800-252-2947. A cash reward may be given for information leading to the arrest and conviction of an arsonist.

Mary McGrath, a Council seeks service nominees

Applications for the Inter-Greek Council's Service-to-Southern Award are now available at the Office of Student Development, on the third floor of the Student Center.

The applications and all support information must be returned by 4:30 p.m. Feb. 7 to the Office of Student Development.

The award is presented annually to an outstanding graduating senior in recognition for his or her participation and service contributions to Southern Illinois University. This year's award is $200.

Police said that the ICG had put the insurance company on notice. She also said that the damage was not expected to exceed the amount of the deductible that ICG had on the property.

McGrath also said the railroad had special agents assisting in the arson investigation.

Officers destroyed in the blaze are being relocated across the railroad tracks to the ICG freight house, she said.

The Carbondale Fire Department had three pumper trucks on the scene along with the city's platform truck. Murphy said firefighters manned Carbondale Fire Station No. 2 on South Oakland to free the Carbondale firefighters to battle the blaze.

According to fire department reports, firefighters remained on the scene until 11:30 Saturday, more than 11 hours after the fire was reported.

Three of the city's pumper trucks and its aerial platform truck were used to combat an 11-hour blaze at the ICG Railroad Division Office, 104 N. Washington, which began around 9:30 p.m. Friday. Railroad special investigators, the State Fire Marshal and the Carbondale police are investigating the fire for possible arson.

Illinois Central Gulf employees Fred Stearns (top) and Bill Woots remove debris from the 87-year-old ICG building that was destroyed by fire on Friday night.

Valuable effects lost included the building's storefront with South Central Gulf Informational signs and railroad equipment in the building.
UFA Survey"s】

A recent mail survey of faculty and professional staff intended to evaluate President Albert Somit's abilities as an administrator served only to damage the survey's credibility.

The mail Faculty Association-sponsored survey, released in December, drew only 104 responses from over 1,700 queries. And since the responses received were mostly unfavorable, it is not unreasonable to assume that most of the surveys sent back were from ax grinders.

F.D. Penrose, mathematics faculty member and chairman of the survey committee, said that the results show Somit is "not doing his job too well" and that many of the respondents with whom he talked said that most of the people surveyed did not deem it necessary to respond to the poll.

This means that either they think Somit is doing his job well, or they didn't have time to respond, or that the poll was not worth responding to at all. The latter assumption seems to ring true.

Statistical and survey experts would consider the survey invalid and certainly not-representative of respondents to the questionnaire. The sample respondents in this case were in all probability non-representative and were certainly the most active group within the population polled.

If there were a representative return for the survey, and there is no evidence that there was a poll, it would be considered valid. To ensure a representative return and thereby valid results, a carefully screened control group would have to be surveyed, a group scientifically picked to represent the opinion of all the faculty.

Any group that would support a survey such as the mail survey conducted by the UFA is merely supporting its own view. The UFA's motives were purely political in this case and the release of the survey findings were timed to coincide with the forthcoming Board of Trustees meetings in April and September. So much has been the own group in negotiations between the administration and faculty and professionals.

In fact, the release of the survey results seemed designed to enhance the UFA drive to become the bargaining agent in negotiations between the University and the faculty and professional staff.

As it was devised, the poll was not worth responding to and did neither Somit nor the collective bargaining cause any good.

President Somit is evaluated on a regular basis by the SIU Board of Trustees and on Dec. 17 was presented with a favorable review, the details of which have remained "confidential information," according to Kenneth Shaw, SIU system chancellor and review coordinator.

A properly conducted survey of faculty and staff on the president's performance would be a legitimate undertaking and thus worth knowing. But such a survey should be done right and not as a publicity stunt.

Letters

This is an open letter to personally thank the members of the Black Affairs Council and its affiliated organizations I wish I could name each and every one of you specifically, but I have not the space! I would like to go out to faculty adviser Patricia McNeil, Chris Wade, Angela Campbell, James Davis and organizational chairperson John Pinnellie Council. No words can express my sincere appreciation for all the hard work you've done during my reign.

Taking the time out of your academic and social schedules is truly a sacrifice, in my eyes. Thanks to the many ways you have helped and continue to help me financially, I can better visualize the Miss Illinois crown being placed on my head. You extended your hand of support early on, and are continually doing a super job.

By GARRY TRUDEAU

C Sure you got to your agent for change. It's always a good shot in the state. Quinn would be doing up as a Democrat, one of the state's elected executive offices. It has relative's little policy discretion and there is probably a substantive reason for the job to be filled by election. But it has served a significant function. The office has a been a stepping-stone position to higher office candidates. The four elected incumbents before Donwald all sought higher office. William J. Scott, Republican, moved on to be attorney general. Adali E. Svesenove moved up to the U.S. Senate. Alan J. Kooncee succeeded to secretary of state and then the U.S. Senate. Jerry Coentoan ran unsuccessfully for secretary of state.

It is fair to guess then, that the 1986 contenders to Donwald have the same idea. Among the Democrats, in addition to Quinn and Donwald, is Coentoan, who wants to make a political comeback by recapaturing the treasurer's job that he held from 1979 to 1983. Republican have fielded a newcomer to state level politics, the salacious and aggressive mayor of Springfield, Michael J. Houston. Quinn's most formidable challenge to Coentoan looks to be interested in less aggressive employment as the treasurer. But each one, certainly including Quinn, would be doing upper mobility.

Quinn has always taken such issues seriously. Trained in economics and marked for academic accomplishment by Phu Beta Kappa at Georgetown University in Washington, D.C., he has identified some interesting consumer issues in the banking business. Because the treasurer functions as the state's banker, Quinn could manage the deposit of state funds. That gives the treasurer leverage with state banks.

He proposes the creation of a Financial Institutions Consumer Board. Patterned after the Citizens Utility Board, FCB would seek funds from bank customers and support a staff to generate proposals for the advantage of bank services. FCB would also serve as an advocacy group before the legislature and other governmental regulatory agencies.

Quinn argues that banking services are unfairly expensive for low income consumers. He proposes to explore the idea of state government setting up its own bank. He advocates smaller fees to currency exchanges for cashing checks.

These ideas are vintage Quinn populism. He is skilled at casting economic and governmental institutions as enemies of the little people. But he appeals usually stimulate the same people. Quinn's ideas the people will get something for nothing. During the campaign to reduce popular representation in the legislature for instance, he was so loud in the media as to be itself an unfair advantage. Quinn's ideas are the people to abolish the jobs of 20 politicians and save $7 million. The savings were illusory but the loss of representation was real.

No longer an outsider, Quinn will pursue his candidacy from his current political position as a member of the Cook County Board of Tax Appeal. His issue positions should enlighten what is usually a low visibility contest. In a three-way race with Coentoan and Donwald, Quinn has a good shot at winning the Democratic nomination for state treasurer.
Threats made against U.S.

By Unico Press International

A blockade was erected around the Embassy in the Netherlands Monday after Dutch authorities warned of a "possible terrorist action" against Americans, an embassy official said. The group voiced its plans to stage attacks in Amsterdam.

Construction equipment and metal containers filled with sand were dumped in front of the Embassy in Amsterdam, and officials said the threat was that the Embassy might be demolished.

Amsterdam police stepped up surveillance of all American businesses and extra guards were posted at the Embassy, Dutch officials said.

Emassy spokesman Sam Wunder said the Dutch informed U.S. officials Sunday about the possibility of an attack.

"We have received information from Dutch authorities about possible Libyan action against the U.S. in the Netherlands," Wunder said. "We are taking all appropriate security measures." The information was serious, Wunder said, and is being treated together with the proper Dutch authorities.

Wunder said the embassy had been warned about American interests in Holland. He said the embassy and U.S. citizens are taking all appropriate action to protect American interests.

Companies charged with bias

CHICAGO (UPI) - The U.S. Equal Employment Opportunity Commission Monday charged Commonwealth Edison and two other firms with maintaining hiring practices that discriminate against blacks and women.

The EEOC filed three separate class-action lawsuits in U.S. District Court against Commonwealth Edison's generating station in northern Illinois, alleging discrimination against World's Finest Chocolates on Chicago's Southwest Side and the Rosemont Corporation in north suburban Northbrook.

The suits charge that the companies refuse to hire females and blacks on an equal basis with males and non-blacks, "a legal claim," the suits claim.

Job opportunities were denied blacks and women because the firms' recruiting methods did not inform them that jobs were available, while whites were informed, the EEOC charged.

The recruiting practices resulted in "an artificially small proportion of blacks or females applying for the job positions," the suit claimed.

The suits do not specify damages, but the EEOC said it expects back pay awards to total more than $1 million. The suits also seek injunctions barring discriminatory hiring and recruiting in the future.

The suit against Edison charges more than 5 percent of the generating station's 426 blue collar employees are women and 3.5 percent are black. The suit specifically cites the rejected job application of a woman for a position at the plant.

BOOKSTORE, from Page 1

violence is not a healthy portrait of the relationship between men and women.

The state's Department of Corrections, director of Christians Unlimited, a recognized single-minded group, said there is a "definitely encouraging trend in violence against women" in such magazines.

And the magazines tend to treat women more as objects rather than as human beings, he said.

Wooters said that some book is dead - the main emphasis is on getting women with children.

Residents who can't afford to buy a second detection system and who meet eligibility requirements may be able to receive one through one of the various social service organizations in the Curbandale, according to the Fire Department. An organization notified of the request will then contact the Fire Department on behalf of the family or person to receive the detector, the chief said.

McCaughan said the fire department is also willing to help disabled, elderly or physically impaired persons with installation of detectors.

Funding for the detectors is obtained through donations and through the Fire Prevention Run, McCaughan said.

ALARM, from Page 1

give the inhabitants enough time to safely evacuate, McCaughan said.

Residents who can't afford to buy a second detection system and who meet eligibility requirements may be able to receive one through one of the various social service organizations in the Curbandale, according to the Fire Department. An organization notified of the request will then contact the Fire Department on behalf of the family or person to receive the detector, the chief said.

McCaughan said the fire department is also willing to help disabled, elderly or physically impaired persons with installation of detectors.

Funding for the detectors is obtained through donations and through the Fire Prevention Run, McCaughan said.

World's Finest Chocolates is accused of discriminating against blacks in hiring and recruiting. The suit also charges the company was biased in hiring and promoting women, who are assigned to sex-segregated, lower paying job categories.

A black woman who applied for a job last year was denied employment because of her sex and the suit charges.

Rogon Corp., a plastics manufacturer, is accused of discriminating against blacks in hiring for unskilled blue collar jobs. The suit charges a "number of qualified black applicants were rejected, while less qualified whites were hired," the suit claimed.

The EEOC, a federal agency, is responsible for enforcing Title VII of the Civil Rights Act of 1964.

BOOKSTORE, from Page 1

doing something about pornography in magazines. "Others are just not willing to take the time to do something about it," he said.

Crimes of a violent nature are also at times directed at children in the magazines, the group's director, Mary Kathryn Hamilton, said.

The suit specifically cites the rejected job application of a woman for a position at the plant.

Names of vets sought for Illinois memorial

By Martin Folan
Staff Writer

The names of 164 Vietnam veterans from Illinois are currently being sought by a delegation of the Illinois Vietnam Veterans Memorial Fund so that they may be remembered at the national site.

Perry Murray, coordinator of Veterans Affairs for Jackson and Tazewell Counties, was told by the fund officials that if enough money is raised, the names of the veterans will be placed on a memorial to be dedicated at the Oak Ridge Community College on Springfield Road on Veterans Day.

The dedication will cost $1,500, said Murray, and softball games, bake sales and memorial fund drives will help raise the money.

As a veteran himself, Murray said, "It's a matter of time before we lose some of the names forever."

For those interested in helping, contact Murray at (217) 281-9104.

Bookstore operations to get review

By Tom Mangan
Staff Writer

Management of the University Bookstore could be contracted to a private firm if recommendations of an independent review of the store's operations, to be completed by Feb. 2-4, suggest such a move.

Corker says a change in University Bookstore's outside management of the bookstore is one consideration that could arise, but it was the need for an objective analysis of the store's functions that prompted the review.

The National Association of College Stores has agreed to send three managers from other stores across the country to study the store's operations, look for strengths and weaknesses and report in a month with a set of recommendations for improvements, Corker said in an interview.

The study will cost $1,500 and focus on five areas of the store's management, Corker said. First, the assessment will evaluate how the store functions within the University community and determine what its primary objectives are.

The association will look at the management's plan to accomplish its goals to see if they are effective. Third, operational procedures will be studied to determine whether management policies are clear and intended to meet the college's objectives.

Merchandising philosophy and policy will be evaluated to look for ways to improve sales, and finally, the store's financial contracts will be analyzed.

Barnes and Noble, Washington, and Follett, three professional bookstore-management companies, will also study the bookstore and make additional recommendations, Corker said.

"We want to evaluate all the information together to decide whether or not to move forward," Corker said.

A computer-based management of bookstores is typical at larger universities. Corker said. The University of Illinois, Eastern Illinois, ShU and Northwestern Illinois manage their stores, while Illinois State contracts its store's management.

Regardless of any management changes that could arise after the review, the cost of books will remain fairly constant, Corker said.

Photo processing offered in Student Center

By Elizabeth Cohrnan
Staff Writer

Students who participate in photography can now purchase film and drop it off for developing at the Collegiate Photo processing service located on the first floor.

The service opened on Nov. 19 and is located in the Student Center, near the store's current tables. It is open from 10 a.m. to 4 p.m. Monday through Friday.

The Student Center provides a variety of services including film sales, developing, reprints, enlargements and transfers of movie film into videotape.

"Collegiate Photo, which opened The Picture Place, is a student service," said Corker. In 1971 it placed its first photo-processing service at Arizona State University in March 1971 and currently services nine colleges throughout the country.

Jack Pierce, Collegiate Photo's sales representative, says that the Picture Place is a service for the students and has been very successful. Because of its convenient location and low prices. He says the prices are as low as $2.99 for 20 color prints. Other photo services in the area are:

Students like the idea of a photo-processing service on campus.

John Neff, a second-year student from the University of Illinois at Springfield, said, "It's nice to have something like this on our campus."

Springfield ill. (UPI)

Illinois economy not expected to improve

SPRINGFIELD, Ill. (UPI) - Illinois' economy is barely avoiding a recession and is not expected to improve markedly during the next 18 months, a report from the University of Illinois' fiscal arm said Monday.

The University of Illinois' Fiscal Commission's report said through October 1983, nonfarm employment in Illinois remained at an overall 179,190 job gains of 36,000. Jobs lost during the recession. The job gain compares with 1982's gains of about 203,000 and 397,700 respectively, prior to the latter two recessions.

The report said the slow employment growth can be traced to the manufacturing field, the report said.

During the first year of the recovery beginning in February 1983 manufacturing jobs increased by 6,000, but since then they have dropped by about 34,000. The net employment gain of less than 12,000 jobs represents only 3.2 percent of the nearly 364,000 jobs lost during the recession, the report said.

Even growth in the retail, wholesale trade service sector has been relatively weak.

Book prices are usually set by the publishers at 20 to 25 percent markup, which is just enough to break even after paying for such expenses as shipping, labor, utilities and promotions, he said.

Corker says 'bookstore profits come from sales of soft goods - T-shirts, sweatshirts, calendars, paper clips, cards and posters.'

In fiscal 1983 the bookstore logged a $17,306 cash surplus on sales of $3.9 million - more than half the Student Center's $6.7 million non-food service revenue. 4515, said Rutherford. Student Center business manager.

Rutherford said those profits helped fund the Student Center to help pay for utilities and other operational costs.

The University Bookstore, also located in the Student Center, no longer provides photo-processing services because it lost $1,000, said Follett.

"It's just too expensive to continue," Follett said.

Illinois economy not expected to improve because of the economy have been relatively weak.
THE OFFICE of Student Development and Student Orientation Programs is sponsoring an ongoing orientation program. Student Life Advisers will be on hand to answer your questions in activity Room D of the Student Center between 10-11 a.m. and 3-4 p.m. Monday through Friday. For more information contact Gail Fischer, Office of Student Development, 435-5714.

THE GAY and Lesbian People's Union will be holding a General Membership meeting tonight at 7 p.m. in Activity Room B of the Student Center. Anyone interested in helping to plan events for gay week is invited to attend.

JACKSON COUNTY Youth Services Big Brother-Big Sister Program is seeking volunteers willing to make a six month commitment. For more information call Christy Levine at 437-6785.

A PANEL discussion on "Sexual Harassment" will be presented by the Women's Caucus on Wednesday, beginning at noon in the Student Center Thebes Room. A panel of students will discuss the topics "What is Sexual Harassment?" and "What can you do about it?"

A second section of Psychology 201 (Adolescent Psychology) has been arranged for Tuesday, Thursday, 9 to 10 a.m. in Pullman 4. Instructor: Dr. Carolyn Brown.

A MINI trade show sponsored by Stiles Office Art Supplies will be held in the Student Room 201 on Saturday.

A MINI trade show sponsored by Stiles Office Art Supplies will be held in the Student Room 201 on Saturday.

THE CARBONDALE Park District will be hosting the 8th Annual Illinois Park and Recreation Association Adult Men's Open Basketball Tournament on Saturday and Sunday at Lincoln Jumel High School. Entry fee is $18 and is due by 5 p.m. Wednesday at the LIFE Community Center, 200 Sunset Drive. This is a 16-team consolation type tournament. Call 549-4222 for further information.

REGISTRATION closes Thursday for the Feb. 15, 1986 Law School Admission Test. For further information and registration materials contact Testing Services at Woody Hall B 204 or phone 546-3991.

Apartment fire
under scrutiny

Carbondale police are investigating a fire of a "suspicious nature" that broke out shortly after 2:30 a.m. Monday in a vacant apartment at 507 S. Ash St.

Police say that the residents of the building were evacuated safely.

According to police reports, a fire in a garbage dumpster at 512S. Ash St. was reported.

Music class set

Recording and Engineering Class, Music 375, and Advanced Recording Engineering, Music 499, are being offered this spring semester at Audio Creations Studio in Carbondale, Ken.

The studio's facilities include a 24-track board and the latest in outboard equipment. State-of-the-art equipment shows the student the proper use of microphones, studio arrangement and board technique in equalization, separation and mixing. Students will be selected on the basis of both musical and electronic backgrounds.

Contact Jo Ellen Smith in the Music office. All told up for an application and closed class card.

Road resurfacing planned

By David Sheets
Staff Writer

A smoothie car ride on East Campus is what the University hopes to offer Southern Hills and University Park residents by the start of the summer.

Logan Drive from the Wall Street intersection to Southern Hills, a service entrance to Trueblood Hall and parking lots 25 and 26, are scheduled for resurfacing at the close of this spring semester.

Parking lot number 25 is Family Housing II South Lot and number 26 is Family Housing II Center Lot. Both are located within the Southern Hills complex.

“We plan to begin the May after school is let out,” said Clarence Dougherty, vice president for campus services, “and will be done, hopefully, by the time summer school starts.”

The project and accompanying budget request were approved by the Board of Trustees during its Dec. 17 meeting.

Estimated cost of the project is $120,000.

According to the board's resolution authorizing the project, traffic and parking revenue will be used to fully offset $20,000 in expenses repairs to Logan Drive, and the remaining $100,000 from the same source will go toward the parking lot repairs, totaling roughly $120,000.

Because of the “close proximity” of Trueblood Hall’s service entrance to the planned repairs on Logan Drive, the resolution further states, “it seems advantageous to include this needed work in the overall project.”

Student housing revenue obtained through an East Campus Business account, totaling approximately $31,000 will fund the service entrance repairs.

No state appropriations are being sought by the University to assist in the repairs.

F. T. Smith's Construction Co. of Carbondale has been contracted to complete the resurfacing project.

The plans and specifications of the project will be prepared by the Physical Plant Engineering Services.

If you miss Halley’s, it will show up again in 75 years

By Alan Richter

Shuttle astronomer catches sight of comet

CAPE CANAVERAL, Fla. (UPI) — A shuttle astronaut apparently saw Halley’s comet from the first time from orbit Monday, but his view was spoiled by failure of an instrument inadvertently set on while Columbia waited 23 days to blast off.

George Nelson photographed the comet through a window just after sunrise, but said it was difficult to see without the special device designed to make the image 100,000 times brighter.

The famous wanderer from deep space is 123 million miles from Earth and is so close to the sun that it is in view from the shuttle only four minutes at a time — between the time the sun sets and the comet sets.

‘Without the intensifier, the comet is pretty difficult to find in the window,’ Nelson told mission control. ‘I think we got it, and we got five different exposures on it. I’m not sure how bright they’re going to be.’

During a second session on the following orbit, Nelson said he aimed another instrument at the comet to identify the chemical makeup of the massive chunk of gas around the comet’s icy nucleus. But he said he never saw the comet through that instrument.

‘Maybe we got lucky,’ he said. ‘I don’t know’.

Trustees to slash chancellor candidate roster

By David Sheets

About 12 to 20 chancellor candidates will remain after the Board of Trustees meets Thursday in St. Louis.

Board Chairman Harris Rowe has called a special committee of 15 members, which will rule on the candidates.

The candidates, approved by the Board of Trustees at its meeting last Thursday, were cleared by the executive committee.

The candidates will be interviewed by the committee in December, and the trustees will meet with the candidates in January.

Ronald Sted, director of the Presidential Search Committee, said the list of candidates is not yet set.

"We are still in the process of interviewing the candidates," Sted said.

"I don't know how many candidates we will have," he added.

Northwestern University has also hired a consultant to help with the search.

The consultant will meet with the committee to discuss the candidates.

Jim Mersel is chairman of a 16-member committee, consisting of five faculty and five students.

The committee will meet with the candidates to discuss their qualifications.

Private work to be shown at art exhibit

"Our Favorite Things," an exhibit of selections from artists' personal collections, will be presented by the Associated Artists Gallery in Carbondale.

The exhibit will include watercolors, examples of Chinese calligraphy, textiles from around the world, antique woodcutting tools, Japanese wood block prints and a series of works by Dennis Kowal.

The Associated Artists Gallery, located at 233 S. Illinois Ave., is open 10 a.m. to 5 p.m. Tuesday through Saturday.

The public is invited to attend the exhibit's opening reception, Jan. 24, 5-7 p.m.

Stage Company slates auditions

Auditions for the Stage Company's production of "You Can't Take It With You," a play by Moss Hart and George S. Kaufman, will begin Jan. 27.

Nine men and seven women are needed, and auditions will be held Jan. 27 and 29 at 7 p.m., and Jan. 30 at 9 p.m. at the Stage Company, 101 N. Washington St., Carbondale.

The producer, which will be directed by Roy Weshinsky, will be performed April 4-11 and 15-20.

The company welcomes anyone interested in acting or production.

For more information, call the phone Roy Weshinsky at 457-4100.

Tickets on sale for 'Angel Street'

Tickets for the Stage Company's production of 'Angel Street' are on sale at the Stage Company box office, 101 N. Washington St., Carbondale.

The play, which revolves around a husband's attempt to torture his wife into insanity, will be presented Jan. 26, Jan. 31, Feb. 1 and Feb. 7.

Tickets are $5 for weekday evening performances and $3 for Sunday matinee performances.

The box office is open 4 to 6 p.m. Monday through Friday and 10 a.m. to 4 p.m. on Saturday.

Home confinement devices
an alternative to prison

By John Tindall

A man's home may be his castle but in Jackson County it could also become his jail.

Early next month, Jackson County probation officer Byron York hopes to have an electronic home confinement device in use for criminals sentenced to home confinement. York said Monday that many times the court will order home confinement instead of a jail sentence in cases where the offender might lose his job if he were locked up or if the courts feel that the prisoner would benefit more from home confinement rather than jail or prison.

The primary reason for having the home confinement device is to save the taxpayers' money said York. Currently, York has three home confinement cases, but he said his office is too short on staff to properly oversee them. He said he hopes the electronic devices will alleviate this problem.

The electronic home confinement device uses the offender's telephone line to alert a computer in the probation office if the prisoner leaves the house. The device is strapped to the prisoner's leg, and if the device is tampered with, it will signal the computer.

York said that he had talked with an American Civil Libtic Union spokesman to say the potential for rights violations in using the devices. He said the ACLU said that the idea of home confinement was preferable to traditional incarceration as long as the device is used only to determine if the prisoner leaves his home. If the home confinement device was used to monitor prisoner's activities at home, the ACLU would find that a violation of personal rights.

York said he hopes to have the computer and 10 home confinement devices by early February.

Super Bowl glitz hits stores

INDIANAPOLIS (UPI) — A massive, two-month manufacturing blitz for Super Bowl XX has begun for the company licensed to make clothing with NFL team and Super Bowl insignia.

Logo Inc. will produce more than $200,000 T-shirts, sweaters, jackets and other items worth $1.5 million in the next three months commemorating the first Super Bowl appearances of the New England Patriots and the NFL's hottest selling team, the Chicago Bears.

“This has been absolutely wonderful to have Chicago in the playoffs because, of the city's many pro teams, this is the first one to have gone all the way,” said Michael O'Connell, Logo 7 art director.

“We found with Chicago that it is much more widespread than we expected. They have had such an exciting season that it is easy to promote. We have sold a lot in Indiana and we have people ordering from the West Coast because it is Chicago.”

Workers will be on the job in shifts 24 hours a day, seven days a week through the game in New Orleans on Jan. 29. Another six weeks of production begins after the game with items commemorating the winner.

“All of us, it's exciting to think of reserves and NCAA and the Super Bowl, and the production is going to be great after the game,” O'Connell said. "It continues to generate a snowball effect. This year for us it means we’re booked through the next two weeks and then for a month and a half afterwards.”

The stitching, stamping and printing began on Sunday, the instant the Bears won the NFC title and by Monday morning, stores in the greater Chicago area had started receiving the items.

“Your really feel the pressure to get them out immediately,” said O'Connell, whose work adorns many of the items. “For all of us, it’s exciting to see people wearing your shirts in the stands.”

The fact that neither Chicago nor New England has played in a Super Bowl before means the game's major sales markets have not been flooded with similar items in past years.

New England has not had the hype Chicago has, but the team is popular across the six-state region it represents and much of New York is seen as prime Patriots selling ground.

"It is possible that New York may be pulling for the team," O'Connell said. "Even in New York City, there may be excitement about the Patriots.”

Former LRS director dies

Donald L. Wimsor, who served as director of the Learning Resources Service, died Sunday morning in Hendersonville, N.C. after an extended illness.

Mr. Wimsor had stepped down as director of LRS in 1982 to pursue personal activities and work in media design. He had been on disability leave since 1983.

The Staten Island, N.Y. native earned a bachelor's degree at Wagner College in New York and a master's and doctorate from the University of Florida.

He served as audio-visual administrator at the University of Florida and as audio-visual director for the U.S. Air Force and Navy. He had been a dependent schools headquartered in Karlsruhe, Germany from 1961-64. He was a World War II veteran who served in the Marine Corps and Army Air Corps.

Memorials may be given to the American Cancer Society or the Heart Fund.

PUBLIC NOTICE

This is to notify the public that the SIU Arena will again be using line reservation cards for concerts during the 1986 Spring Semester. The policy of using line reservation cards is designed to promote organization and fairness. A review of the procedure for reserving a position in line is as follows:

1. Line reservation cards are distributed at the Arena South Lobby Box Office on the morning of the first day of sales at an advertised time prior to the commencement of sales.
2. Cards are drawn randomly by Arena staff—one card per person.
3. Persons receiving a card must occupy their position in line prior to the commencement of actual ticket sales, or they will be placed at the end of the line.

NOTE: Being first in line for a reservation card will not assure you of being first in line for a ticket.
Global weather ‘a giant puzzle’

MIAMI, UPI — Technological advances are changing global weather in ways scientists don’t understand and can’t predict, researchers told a meeting of the American Meteorological Society Monday: “Human activity has begun to affect the planet, producing global changes,” said John Dutton, head of Penn State University’s Meteorology Department.

What we’re trying to do here is discover how the planet works, in order to avoid having an mad-venturous experiment with the planet’s future.

Since the dawn of the Industrial Age, levels of several atmospheric gases such as methane and carbon dioxide have increased dramatically. Carbon dioxide levels, for example, have doubled since 1853, largely as a result of the burning of fossil fuel, researchers said.

These gases have helped insulate the Earth to produce an increase of 2 to 4 degrees in the planet’s temperature, a process known as the greenhouse effect.

Levels of dimethyl sulfide, which plays a role in cloud formation, also has risen steadily and could increase the Earth’s cloud cover, said Ralph Cicerone, a scientist with the National Center for Atmospheric Research in Boulder, Colo.

Scientists don’t know whether that would enhance the greenhouse effect, making the Earth still warmer, or block the sun’s rays, making the planet progressively colder.

“It probably won’t come out even,” said John Eddy, also of the research center in Boulder.

Other manmade changes, such as deforestation of the Amazon River areas and overfarming in northern Africa, are changing the amount of oxygen, sunlight and structure in the atmosphere.

“All of the Earth’s systems will be forced to adapt,” Eddy said. “We can’t predict how that adjustment will come out.”

Dutton said.

Scientists do know, however, that changes in the atmosphere have preceded great upheavals such as the Ice Age.

Scientists at the week-long meeting called for a vigorous of the various Earth sciences, including meteorology, oceanography, biology and ecology, and an interaction that scientists hope has traditionally been absent.

“We are working on a big, giant jigsaw puzzle of countless pieces. We’ve made great progress in understanding the individual pieces,” Eddy said.

“Now it’s time to concentrate on how the pieces work together. We are close to the creation of a new science.”

Tiny ‘star’ created by Livermore laser

LIVERMORE, Calif. (UPI) — The world’s most powerful laser has created its first “star” in a experiment which researchers say was “another step forward in the long journey toward harnessing fusion energy,” the Lawrence Livermore National Laboratory reported Monday.

Erik Storm, deputy associate director of the lab, and a scientist at the lab, said the Nova laser was used to create a tiny pinpoint-sized star which produced 1 trillion neutrons.

Storm said it was in excess of 10 times brighter than the previous brightest laser-made “star.”

He was referring to an early experiment with the Gekko laser at Osaka University in Japan.

Nova techniques on Thursday fired the laser and focused 18 kilowatts of near-ultraviolet light onto a tiny hollow glass sphere. The sphere, just under 1 millimeter in diameter with a 2-micrometer-thick wall, contained deuterium and tritium atmospheric pressure.

In a billionth of a second, the laser implored the glass capsule to the star-like fusion conditions.

“This is only our first improvisation experiment,” Storm said. “Its design and purpose was to produce sufficient neutrons to test some advanced diagnostic equipment, and we were delighted with the high yield produced with Nova.”

He pointed out that scientists still had a long way to go to develop and test capsules which will produce enough energy to power a fusion reactor and provide a safe and virtually inexhaustible energy source.

But the bad news, “another way to look at what we’ve just accomplished is that we’ve taken another step forward on the long journey toward harnessing fusion energy.”

In previous experiments the Nova laser hit targets which did not contain fusion fuel. Last week’s experiment was the first in which the laser hit a target filled with fuel.

Lab scientists began experiments with the Nova last spring. They use it in an effort to better understand the physics of nuclear weapons and how to harness fusion energy, the lab said.

Reagan using King to reach blacks holiday

WASHINGTON (UPI) - President Reagan, marking a new crest of approval among blacks, began a weeklong nationwide tour to reach the black community Monday that coincides with Martin Luther King Jr. holiday he once opposed.

One week away from the first Martin Luther King Day, Reagan prepared to engage in public events to touch base with the conventional black leadership and take on a new role in a changing civil rights leader and town with a context to his policies in the past.

Reagan met with the Council for Economic Security Agenda, a group of economists, businessmen and community leaders who share his views on how blacks can best advance up the economic ladder through private enterprise.

On Wednesday, he makes the 50th anniversary of King's birth at the Martin Luther King Elementary School in Washington. The following day, he presents a posthumous award to Roy Wilkins, the late head of the NAACP.

On Friday, Reagan meets with King's widow, Coretta Scott King, who once charged the president doesn't represent America.

The activity follows publication last week of a New York Times-CBS News poll that showed Reagan's approval rating among blacks had soared to 36 percent, surpassing the 50 percent mark for the first time.

During his first term, that rating sank as low as 10 percent.

As he ballyhooed the latest figures, White House press secretary Larry Speakes brushed aside speculation that Reagan soon may risk a turn for the worse by weakening a 20-year-old executive order on affirmative action.

Despite a prediction from Attorney General Edwin Meese that Reagan would soften a 1965 requirement that federal contractors set goals and timetables for hiring women and minorities, Speakes said it is formal recommendations have reached the White House.

The matter, he said, is exactly where it has been - the subject of discussions within the Cabinet, where Meese has been at odds with Labor Secretary William Brock over his move to scrap the landmark order.

Reagan blamed his low first-term standing among blacks on poor communication or misunderstanding. Speaking to the National Council of Negro Women in July 1981, he complained of being depicted by critics as 'prejudiced, if not an outright bigot.'

His outreach to blacks also was undercut by negative reaction to budget cuts that appeared to fall disproportionately on social welfare programs and a history of opposition to major civil rights legislation.

From the start, Reagan also resisted the notion of a legal holiday to honor King on grounds that other interests would request the same kind of recognition.

While sympathetic to a national day of remembrance, it opposed 'a national holiday in the sense of business closing down and government closing down,' at an obvious cost to employers.

Tutu accuses Reagan of 'selective concern'

UNITED NATIONS (UPI) - South African Bishop Desmond Tutu accused the Reagan administration Monday of being more selective in its concern about terrorism - ignoring instances of his country's actions against Libby because a 'few white people' were killed.

"The U.S. administration has not been very even in fighting any action against South Africa," the 1984 Nobel Peace Prize winner said in a news conference after confering with Secretary General Javier Perez de Cuellar about the situation in South Africa.

In contrast, he said, "The U.S. administration is against the government of Libyan leader Col. Moammar Khadafy when he acts "without sophistry" following last month's terrorist attacks at the Rome and Vienna airports.

There is a latent terrorism in the form of apartheid which killed people with rubber bullets," Tutu said, noting more than 1,000 black South Africans have been killed in 16 months of unrest, many by security forces.

He said the world's outrage against terrorist attacks at the two European airports on which 19 people were killed by gunfire and hand grenades and more than 100 killed - was not "commensurate with the statistics."

"And then a few white people were killed and suddenly the world talked about terrorism," said the clergyman who is head of the Anglican church in Johannesburg.

Tutu is on a visit to the United States that began one week ago. He supported demonstrators in front of the South African Embassy in Washington last week and spoke to anti-apartheid groups in New York and New Jersey.

Tutu said he will deliver the keynote address next Monday in Atlanta in a ceremony marking Martin Luther King Jr. Day.

Supreme Court to hear case on maternity leave

WASHINGTON (UPI) - The Supreme Court, tackling sex discrimination from a new angle, agreed Monday to decide whether a state law that orders employers to give four months' maternity leave to women workers discriminates against men.

The justices will hear arguments next March in a case, after an appeal by a California savings and loan, which maintains the state law gives preferential treatment to women and could lead to a "departure" of women's right to the state's women's protective laws and approved sex discrimination.

State attorneys counter that the law, its argument, "ignores the fact that the statute merely eliminates a substantial penalty that only women face - loss of their job due to pregnancy disability."

The debate over pregnancy leave has waxed in recent years as both Congress and state legislatures have moved to extend protections to keep women's jobs. Some states, including California, Connecticut, Massachusetts and Montana, have adopted laws giving special treatment to pregnant workers.

The Montana law is awaiting Supreme Court action and has drawn criticism from both the Reagan administration and women's groups.

Envoy to push Libyan sanctions with U.S. allies

WASHINGTON (UPI) - Deputy Secretary of State John Whitehead will leave Wednesday on a "low key" five-day trip to Canada and Europe to discuss economic sanctions against Libya, State Department officials said Monday.

An official who requested anonymity said Whitehead was asked to apprise the allies of President Reagan's call for international sanctions to isolate Moammar Khadafy's Libya for its support of terrorism.

Many of the allies have rejected Reagan's call, but Norway announced Monday it agreed in principle to work with the Reagan initiative. Italy and France have imposed mild sanctions.

Reagan last Tuesday ordered U.S. firms not to work with others out of Libya and called on the allies to join President Reagan's call for international sanctions to isolate Moammar Khadafy's Libya for its support of terrorism.

Bears big favorite; can Patriots win?

**CHICAGO (UPI) -- The New England Patriots were obviously having such a good time early last Sunday evening that it was really a shame to even think about such a question. But in the two weeks that will lead to Super Bowl, it is the only question that really needs answering.

Do the Patriots really have enough to beat the Los Angeles Rams in Super Bowl? Honestly, now, does this season's surprise team stand a chance against the defending champs?

Well anything is possible. Village People, North Carolina State beat Houston. The Kansas City Royals beat the St. Louis Cardinals. And the Patriots have beaten the Jets, Raiders and Dolphins on the road.

So, sure, the Patriots can beat the Rams. They probably won't, but they might. And for those of you looking for hints of comfort in hoping the Pats can pull off the upset, here are a few tips.

The first has to do with the Bears' defense, which is being called the most overwhelming since Attila made the Liens such a bit with the really heavy settlers.

The New York Giants did not score against the Bears and had just one decent chance to do so. The Los Angeles Rams did not score against the Bears and they, too, had just one decent opportunity.

So what gives the Patriots hope that they can win, much less score at all?

Well, they have a better defense than the Giants and Rams for one thing. There is balance to the Patriots. They can attack in different directions.

The Bears wanted to make sure they stopped New York's Joe Morris. Los Angeles Eric Dickerson on the assumption that quarterbacks Phil Simms and Dieter Brock couldn't beat them through the air.

The Patriots, in short, will probably execute better than the Rams and Giants and therefore stand more of a chance to move the ball.

Then we have the home-field advantage, or lack of it. The Bears, two playoff shutouts, of course, came at Soldier Field where Chicago was unbeaten this season.

No snow will fall in the Superdome. The chill factor will not be below zero and the wind will not cause the Patriots punters to miss the ball at this own goal line or cause their quarterback's passes to flutter away from receivers. It will be a neutral field and that is the best thing the Patriots have seen in a month.
Our Art Suppliers
Have Their Hands Full...

...with everything you need to fill your class lists. In stock we have drafting instruments, newsprint & drawing pads, paints, brushes, drafting tables & lamps and that's just the beginning.

Come visit us in the Mississippi Room of the Student Center on January 14 and 15 from 8 am to 5 pm. Meet representatives from major art and drafting supply manufacturers. By Steve Merrill

The Missouri Valley Conference basketball season is off and running and in full swing, and as expected, the Bradley Bears are on top and consistent.

PLUNGING in a preseason coaches poll to win the conference hands down, the Bradley Bears have lived up to all expectations, jumping to a 13-1 overall record and a 3-0 start in the MVC.

Led by one-time MVC Player of the Week point guard Jim Les and two-time MVC Player of the Week Brian Hawkins, who ranks in the top six of seven MVC categories, the Bears have scored victories over Big Ten foes Northwestern, Big East opponent and returning NCAA champ Villanova and independent Marquette. Starting last by winning nine straight games, the Bears only loss came at the hands of Clemson during the Rainbow Classic in Honolulu, Hawaii.

The Bears broke into the top five of the UPI Top 20 ranking for their early season performances and a poll the had the Bears tied with both Kansas and Missouri in the No. 19 slot while the AP writers' poll ranked the Bears No. 22.

The Bears kicked off the MVC season with a three-point victory over SIUE and followed it up with two close wins over Wichita State (57-53) and Drake (66-67).

OFF TO a 12-2 overall start and a 2-1 MVC mark, the Golden Hurricane of Tulsa were picked to finish third in the MVC race. First-year coach J.D. Barnett built a winning program in Georgia Commonwealth, making five NCAA appearances, and has started off in the right direction of continuing the winning ways of the Tulsa basketball program.

Playing some tough schools, Tulsa has beaten Dayton and Oklahoma State while losing to teams like Louisville and Washington. In conference play, the Hurricanes were upset by West Texas State but evened their record at 1-1 with a win over Creighton. The Hurricanes then knocked off Indiana State to go 2-1 in league play.

THE REDHAWKS of Illinois State are off to a surprisingly strong 2-1-2 start, with losses to Iowa State, Chicago State, DePaul, Southern Methodist, Southwest Missouri and Wyoming.

A preseason pick to finish fourth in the MVC, the Redbirds won a 64-61 overtime thriller at Drake before falling to Indiana State 93-94. The Redbirds followed up with another thriller, beating Wichita State by a final of 99-98.

Ranked last in the conference in offensive output, the Redbirds could be hard-pressed to make a fourth-consecutive post-season appearance. Bill Brackeck, a 7-footer, is the only Redbird to rank in the top 15 MVC scorers, while ranking 90th in rebounding and first in blocked shots.

THE BRAKE BULLDOGS, picked to finish eighth in the preseason coaches poll, have been somewhat of a surprise so far this season by getting off to a 2-2 conference start and a 4-5 overall mark.

With losses to Iowa, California, Texas Christian and conference losses to Illinois State in overtime and Bradley, the Bulldogs have nothing to be ashamed of. The Bulldogs are led offensively by junior forward David Miller, the MVC Player of the Week for Dec. 16, who is averaging 15.9 ppg.

EVEN THOUGH the West Texas State 1983-84 basketball roster includes eight new faces, second-year coach Gary Moss has guided the Buffalos to a 2-2-2 start.

Picked to finish in the bottom half of the MVC pack, the Buffalos already knocked off Indiana State and Tulsa in conference play while losing non-conference match-ups to perennial basketball powerhouses Alabama Birmingham and Oklahoma. The only MVC losses suffered by the Buffalos came at the hands of the Drake Bulldogs and a two-point overtime loss to Creighton.

THE SHOCKERS of Wichita State, the defending MVC tournament champions and a preseason pick to finish second in the MVC, are off to a 1-2-1 start. With two of their five losses coming at the hands of Kansas and Kansas State, the Shockers have also lost to such powerhouses as Temple, Fresno State and MVC opponents Bradley and Creighton.

Leading the conference in home attendance, Tulsa fans may be in for a long winter, as the Shockers could be hard-pressed to live up to preseason expectations. Fans should, however, enjoy the offensive performances of 6-foot-7 Gus Santos, who is averaging 16.3 ppg and ranks 16th in the MVC field goal percentage category.

THE Sycamores of Indiana State 1-2 and 74, were picked to finish fifth in the MVC with some MVC coaches claiming that first-year coach Ron Green's cagers may be a darkhorse favorite to win the MVC title.

Led by All-MVC preseason pick and All-America candidate John Sherman.
Salukis announce football schedule
By Ron Warnick

The Saluki football team's 1986 schedule isn't as out-of-balance with consecutive road and home games as last year, but it's still tough, head coach Ray Dorr said.

"The schedule is more structured to get your team playing in every conference. There's more continuity. We won't have to prepare for that one blast at the end of the season like last year," Dorr said.

The chief decision the coach refers to is the four consecutive away games against Wichita State, Indiana State, Arkansas State and Western Illinois in the last third of the 1986 season. The Salukis lost all four games.

Though the Salukis only have two away games in a row this year, the opposition is tougher. Four of teams the Salukis will face in '86 had a better record than SIUC's 4-7 clip last year. The eleven foes had a combined 76-54-1 record in 1985.

Drake was scheduled for Sept. 6 Saluki Homecoming, but the Bulldogs dropped their 1986 football program. The Salukis replaced the open date with Austin Peay State, and the Homecoming was moved to Oct. 18 against Northern Iowa.

Highlights include an Oct. 4 game at Kansas of the Big Eight Conference, an Aug. 30 opening game at Division I-AA quarter-finalist Arkansas State and the homecoming game against I-AA semi-finalist Northern Illinois.

"It's by far the hardest schedule we've had since I coached at SIU. But I feel we have our best football players returning," Dorr said.

"And it's also a schedule conducive to national recognition and the playoffs," Dorr added.

The Salukis' first Gateway Conference game will be at Eastern Illinois on Sept. 20. The next conference game is not until Oct. 26, but the opponent is against Indiana State. Dorr sees the first game, win or lose, as an incentive in the conference race.

"When we come out to play EUR on Sept. 20, it will give us an introduction to the conference early. If we win, you go a couple of weeks without a conference opponent and finish up with four straight conference games.

"Should we lose, you know automatically you have to win all four of these games," Dorr explained.

In addition, the Salukis will play three Ohio Valley teams; Austin Peay State, Murray State and Youngstown State.

Football program too costly for Southeastern Louisiana

NEW ORLEANS (UPI) - Southeastern Louisiana University, aiming to save up to $500,000 a year, Monday dropped its 35-year-old football program.

President Larry Crain said he hopes the Lions can remain a part-time member of Sun Belt Conference and stay in Division I in other sports.

He said there are no plans to drop other sports at the Hammond school.

The Lions had a 272-272-16 record since beginning football in 1955.

"These are very, very hard times for Louisiana economically," he said at a news conference, "I will not sacrifice the academic quality of our university under any circumstances even if the football program is cut.

"Crain said the money will be spent on academics, teaching supplies and expansion of the library.

"Football players will have their full scholarships honored, he said, but the contracts of the school's seven assistant coaches will not be renewed, head coach Oscar Lofton was fired this fall after making his announcement. He told them SIU would like to remain in the conference.

"We're all faced with difficult times today and I think those presidents understand," he said, adding the other presidents did not give him any indication of whether they would allow the Lions to stay in the league.

Other conference members are Nicholls State, Northwestern Louisiana, Sam Houston State, Southwest Texas and Stephen F. Austin.

Crain warned in November he would drop football unless alumni and fans pledged $2 million over the next five years. Crain said Monday only $172,000 was promised.

He said the elimination of football will not hurt SIU's fund-raising.
Bears finally get to practice in warmth of U of I bubble

CHAMPAIGN (UPI) — The Chicago Bears escape the cold and wind — and rain — by practicing this week for Super Bowl XX under a bubble at the University of Illinois football field.

The bubble, installed at a cost of $3.5 million over a year-old turf worth $75 million, was inflated this week to two days after the Illinois football team left for the Peach Bowl in Atlanta. The Illini, losers to Army in the Peach Bowl, had hoped to practice under the bubble.

The Bears, who defeated the Los Angeles Rams 24-0 Sunday, are expected to arrive in Champaign Wednesday and practice Thursday, Friday and Saturday at Illinois Memorial Stadium before leaving for the Super Bowl Jan. 26 against New England.

Bears coach Mike Ditka toured the Illinois facilities before the bubble was inflated and pronounced them ideal. But high winds and construction delays prevented the bubble from being inflated and tore both Chicago and the Illini from practicing under the dome.

The Bears practiced at the Atlanta Falcons training complex in Suwanee, Ga., in 40-degree weather for its first two playoff games and the Illini were forced inside an armory.

Besides the artificial turf — on which the Super Bowl will be played — the Illinois campus offers aerial security. Autograph seekers looking for Jim McMahon, William "Refrigerator" Perry or Walter Payton are likely to be stymied. Sherry walks through a hotel parking lot to a waiting team bus will provide the only glimpses of the Bowl-bound Bears.

The bubble covers only the field, including the bench areas and the end zones. It stretches more than 400 feet long and 250 feet wide. It can be heated up to 35 degrees and is lit by lights from the inside, although some sunlight filters through. It stands about 20 feet tall, which may prove to be a few feet too low for punters.

The bubble is intended to be installed after the last home football game and taken down in the spring.

**Saluki women top EIU**

By Anita J. Stoner

CHARLESTON—The Saluki women's basketball team defeated Gateway rival Eastern Illinois, 68-56, led by sophomore sensation Bridgett Bonds.

A banner on the wall declaring "war" for an EIU men's game must also have been the motive of the women Panthers, who waged the battle to a 30-20 halftime tie with a 12-point effort from center Sue Hynd.

We were upset at the half — just disappointed because we were missing inside shots and felt we could've been up by eight," said Saluki coach Cindy Scott after the game. "We told the kids to just relax."

With an 0-11 record against Scott's team, a gambler might say the Panthers were due. But even with the half-time tie, a smart gambler would have bet on Scott, who matched career victory No. 150 and improved to 2-0 with percentage.

"We weren't surprised by the play of Hynd. We'd seen film and knew she was going for it," Scott said.

In the second half, Scott had the strong side sag on Hynd and replaced 6-2 center Mary Berghuis with the reserve center, Cathi Footpath. "I've got to do a better job defensively on Hynd and Berghuis just hasn't been able to get the ball in the hole," she said.

Berghuis wasn't the only player on the floor with shooting problems. Two of the Gateway's top-10 scoring stars, teammate Jackson and Panther Chris Aldridge, hit just over 30 percent from the field and barely managed to tally double figures.

Even though Jackson's 14 points seemed low, she made up for it by firing seven assists and holding the Panthers second leading scorer senior guard Melanie Haffeld, to just three baskets — and in the clutch, when Aldridge hit a jumper to narrow the Saluki lead to 50-48 with just over five minutes left, Jackson matched it with a jumper on the next play. After an EIU timeout, Jackson stole the ball and took it all the way to cushion the lead, 59-50.

But with both defenses concentrating on team leaders, Bonds literally stole the show and was unstoppable.

Bonds nailed 20 points in second half for a game-high, career-high and team season-high, 38 points. She stole the ball five times to tie the team's season-high shared by Marallice Jenkins and Dana Fitzpatrick. Bonds also grabbed the team-high eight rebounds — according to the rebound total derived by the EIU statisticians.

Eight rebounds? We thought Bridgett had eight rebounds in the first half. We thought she'd rebounded like hell," Saluki assistant George Lubell said later.

Scott said, "Bridgett played like an All-American tonight — I can't say enough.

But in talking All-American for a game, and All-American for a career there's a big difference.

Lubell said, "If she can maintain her intensity, hit the boards more consistently and the main thing, stay out of foul trouble — then Bridgitt has the potential to be a bona fide All-American. She's done it the last few games, but she'll have to do it game in and game out — but she's not there yet."

**Saluki playmaker Middleton credits playground hoops**

By Ron Warnick

If sophomore guard Steve Middleton's play looks a little different from his Saluki teammates, it's probably because of leftover habits from his playground basketball days in southeast Wyoming.

"We're big on the basketball court. We've been taking it from me, but I just wanted to play it faster," Middleton said.

"The biggest thing I had to change was my practice habits," he said. "I had to slow down a bit. I like to run with the basketball more than we're allowed to.

"There's a difference between East Coast and Midwestern basketball," Middleton explained. "Most East Coast teams like an up tempo, fastbreak game. They're more willing to take a risk to get the ball up and down the court. But most Midwestern teams are more into ball control — don't lose it."

"Perhaps because of a con-

**Hitting the books pays off for All-Academic gridders**

By Ron Warnick

Saluki lineman Rick Spire, fullback Bruce Phibbs and quarterback Kevin Brown were selected to the Missouri Valley's all-academic football team on Dec. 23.

Players needed a grade point average of 3.0 or higher to be eligible.

Spireman, a junior in physical education, had a 3.37 GPA. He also led the Salukis with 105 tackles, and was named to the All-MVC Conference team.

Phibbs, a junior in marketing, had a 3.5 GPA. The hard-nosed fullback carried the ball 149 times for 679 yards, a 4.6 yards per rush average, and seven touchdowns in 1985.

Brown, a freshman red-shirt in architecture, had a 3.0 GPA. He completed 83 of 175 passes for 1,043 yards and nine touchdowns and had 10 passes picked off.

Eight players had earlier been named to the all-MVC team, including Spielman.

Heading the team were Indiana State quarterback Jeff Miller, with a 3.47 GPA as major in both math and computer science, and Tulsa running back Steve Gage, with a 3.26 GPA as a health, recreation and physical education major. Both were named The Associated Press and United Press International offensive players of the year.
