Action on Code Amendments Set Tuesday

The Carbondale City Council will discuss the study of the amendments to the city's housing code, proposed by the Community Conservation Board (CCB), until 8 p.m. Monday with meetings being expected to take formal action on the matter.

The amendments under consideration were proposed by the CCB with the aid of the Carbondale Citizens' Advisory Committee to bring the city's existing code up to the standards set forth in the College Neighborhood Urban Renewal Project.

In discussing Ord. 1454, council members discovered a few discrepancies between the proposed changes and standards set forth in the National Electrical Code and the National Building Code, both of which the city has adopted, chairperson of the council, Ord. 1454, a minimum of 60-ampere service is proposed for Fort Kaskaskia being built unit while National Electrical Code specifies a minimum of 30-ampere service for the same.

A 40-year-old fugitive from the Missouri State Penitentiary, Ray, murdered mentally, was on learning by the killer that he should not be returned to the United States.

Then police returned him to his maximum security cell at West Virginia and arranged for the appeal, which must be filed within 15 days.

Muzzleloaders Stop For Flag Ceremony On 120-Mile Hike

A brief rest from a 120-mile hike was provided 18 members of the National Muzzle Loading Association Tuesday afternoon when they stopped walking long enough to conduct a flag raising ceremony on SIU's campus.

The buckskin-attired members, ranging in age from 14 to 46, fired a volley as the Illinois Sesquicentennial Flag was raised in front of Old Main at 1:30 p.m.

In commemoration of Illinois' 150th birthday anniversary, members of the Association are recreating the march of pioneer George Rogers Clark by trekking from Fort Massac near Metropolis to Fort Kaskaskia in Randolph County.

Col. Clark made the overland journey 190 years ago, along with a volunteer army of 170 frontiersmen. By taking Fort Kaskaskia from the British by surprise without a shot fired they helped Americans later capture the Illinois Territory.

Immediately after the flag ceremony the hikers started out for Murphysboro where they were scheduled to spend the night. With half their trip behind them, the group was to continue on their trek to Fort Kaskaskia near Chester. Those participating in the sesquicentennial hike are not all from Illinois. Members from Michigan, Iowa, and Massachusetts, answered the challenge that was issued through the Association's monthly bulletin.

Gus Bode

Gus says he doesn't know much about muzzleloaders, but he knows a lot about being muzzled.

LONDON (AP) — A British judge approved Tuesday the U.S. government's request for extradition on a murder charge against a British citizen to stand trial for the killing of Dr. Martin Luther King Jr.

Ray's lawyers announced they will appeal the decision to Britain's High Court of Justice.

A 40-year-old fugitive from the Missouri State Penitentiary, Ray, murdered mentally, was on learning by the killer that he should not be returned to the United States.

Then police returned him to his maximum security cell at West Virginia and arranged for the appeal, which must be filed within 15 days.

'Happy Fella' Opens Friday

Thirty-three SIU forestry students are working in summer jobs. The students, according to Lonergan, are getting one job-related forestry studies at SIU. The University's four-year forestry degree program is arranged so most students have the opportunity to accept forestry-related jobs.

Southern's program includes offering the required professional forestry camp term in the spring in contrast to summer camps required in some forestry schools.

Most of the students placed in summer employment have jobs with state or federal forest services working in some phase of forest management. Others are working in recreational areas, with research organizations, as timber estimators, and with a pole line inspection company.
Activities
Programmers, Egypt Grotto
Set Meetings
Advanced registration and activities for new students and parents will be held today between 10:30 a.m. and 12 noon in the University Center, Ballroom B. Pulliam Hall gym and pool will be open for recreation between 6:30 and 10 p.m. Room 17 will also be open for weight lifting for male students.

The Saluki American Legion Post 1285 will meet between 7 and 10 p.m. in the Agriculture Seminar Room, Room 214.

The Little Egypt Student Grotto will meet at 8 p.m. in the University Center, Room C.

The Activities Programming Board will hold a meeting between 6:30 and 8 p.m. in the University Center, Room C.

Peacock Presents
Teaching Seminar
Neil D. Peacock, visiting professor of plant industries at SIU, is presenting a summer series of 10 seminars on "Improvement of Instruction." Seminars are held at 1:30 p.m. each Thursday in Room 214 of the Agriculture Building. Final session will be August 29.

Peacock, a native of Howard County, Ind., is a 1919 graduate of Purdue University. He received his master’s degree in plant pathology at the University of Tennessee in 1923, and his doctorate at Michigan State University in 1930.

He has been on the University of Tennessee faculty since 1919 in the department of horticulture. He was dean of resident instruction in the College of Agriculture for the 10 years preceding his retirement last September. During that time he gave full time to administration and to state and regional programs for improving college level teaching in agriculture.

Press With Ghetto Story

The press of America has waited too long to reply to the admonitions and recommendations of the National Advisory Commission on Civil Disorders.

Five months have passed since the Commission, after examining the factors that contributed to the 1967 Negro riots, specifically indicted the press and broadcast media for their failure "to report adequately on race relations and ghetto problems."

Television has responded to the Commission criticism promptly and with a gusto that is both heartening and impressive. A full summer of network programming will be devoted to the Negro in America. CBS offerings will include a seven-part series, "Of Black America," and a three-part study of "The City."

ABC has scheduled "Time for Americans," in depth reports on the nature of racism in America.

But sadly, while television, often considered the non-superficial arm of journalism, turns its talents full speed to the problem, the press has remained relatively silent.

And little formal response the press has given the report has come at the behest of inquiring magazines and private parties. And most of the replies have veered from the Commission's main point: a call for integration of the Negro and Negro news into all sections of the newspaper.

Editorial

Letter

SIU Deans Like Congress, Court

To the Editor:

"Our liberty depends on the freedom of the press, and that cannot exist when men are about to lose it."--Thomas Jefferson.

Although I sometimes disagree with the opinions expressed in K.A., and often found their form pretentious or wanting, I assume the right to the expression of those opinions was an important and basic one to the existence of a democracy.

The Establishment of the University is proud and has found K.A. to be a failure—and in what way we can easily imagine. And the Deans have raised again the question of whether censorship is an expression of strength or weakness.

At any rate, we need not worry about SIU's remaining a backwater institution. It is now following nicely in line with a nation-wide pattern of suppression of rights for speech and assembly. Congress and the Supreme Court can enact for us "protective" measures against ideas they do not agree with; and so, apparently, can our Deans.

What Kind of World?

How to Justify University

By Robert M. Hutchins

The president of the University of California, speaking recently at the Riverside campus, assured his listeners that a man who graduated from college would make during his lifetime $125,000 more than one who stopped at graduation from high school.

It must be said at once on President Hitch's behalf that he used the kind of language, and perhaps the only kind, the older generation can understand. If you can show us that our investment in the university is paying off in cash, you have made an unanswerable case. Since the older generation is in charge of California, and since that generation has to be propitiated, Hitchcock, perhaps, the only line that was open to him.

The alternative would have been to explain what the university is and to hope that constant repetition of the explanation would eventually convince the rulers of California that a great university is worth supporting even if no financial benefits are traceable to it.

As long ago as 1852, Cardinal Newman said, "A University is, according to the usual designation, an alma mater, Knowledge for children one by one, not a foundry or a mint or a treadmill."

That a university must still be justified as a mint or as the principal treadmill and foundry of a nationalized knowledge industry shows that Cardinal Newman lost the battle to the industrial society that was beginning to take shape in his time.

The society has aimed at material goods, at creature comforts, at riches and dominion. Its concern has been with conquering nature, with technological competence, with men as producers, consumers, statistical units and objects of propaganda, and with such welfare measures as tend toward the standardization of human beings.

The nation-state has been the sponsor of industrialization and the engine of the capacity and greed of the industrial society. National systems of education have been designed to "process" the young for industry and to make them the willing victims of its claims.

To these ideals the older generation has been committed. It has applied standards derived from these ideals to all institutions, including universities.

At this point the so-called generation gap appears. To the confusion of their elders the taste of ashes is on the lips of the younger generation among the nationalized and industrializing world: in the West, in the Communist countries and in the developing nations.

Young people everywhere are failing to respond to the established norms of industry. They do not answer the call to build up national wealth and power. I believe they are not much interested in spending four years on the academic treadmill in the hope of making $125,000 more than their less fortunate contemporaries.

They have a vision, more or less vague, of a world with different ideals, operating according to different standards.

In the past, perhaps always, young people have shown similar rebellious tendencies. But the forces of the environment have proved too much for them. The bright, eager, independent, critical youth who appeared on commencement day have been swallowed by the culture and the enormous pressures to conform.

It is too early to say whether the younger generation of today will show greater durability than its predecessors. If it can hold out, perhaps President Hitchcock may be able to retire before his retirement, which I hope may be long deferred, to speak another language to the constituency of the University of California.

Troubleshooter

May Be A New University Hero

By Mary Lou Manning

The pregnant coed was ushered into the room behind the desk looking at her application.

"You are married and pregnant," he stated.

"Yes, sir," she answered.

"And you're pregnant...forbids you to continue your studies here?"

"That's right," the girl stated, tears in her eyes.

The ombudsman is a campus troubleshooter. Employed by the administration, he works for students. His powers include inquiry, negotiation of disputes, or any measure to not include the right to make policy.

While a student comes to him with a problem, he investigates and interprets existing policy. With access to all university records, the ombudsman then decides if a change in policy or merely an explanation of an existing policy is needed.

This country borrowed the ombudsman idea from a 150-year-old Swedish concept. "When the military became irresponsible in Sweden," one reporter wrote, "the people waited on the outhouse door to protect his rights. So the Swedish government appointed an ombudsman to represent the people.

However, according to Gunnar Boahl, SUU visiting professor in sociology from Stockholm University, the idea of the campus ombudsman is not basically Swedish.

Boahl explained that in Sweden there are presently two ombudsmen—one for the military and the other for the common citizen. Each man is head of a small organization serving his area of the country.

Swedish ombudsmen review each citizen's application and then review the existing system governing this problem. It is the duty of the ombudsman, who holds a degree in law, to determine if the access should be granted. If a change is necessary, he contacts the authorities, said Boahl.

The frustrated girl stumped into the president's office.

"He said," she began, "you must do something about those vulgar, disgusting construction men."

In 1965 John S. Toll, president of the State University of New York, Stony Brook, appointed three men to be the position of campus ombudsmen to cope with the problems caused by the $50 million campus expansion. Similarly, Michigan State University appointed an ombudsmen to combat the frustration of a megalomaniac, and San Jose State College met a minority crisis on its campus by establishing an ombudsman.

Who are these budding heroes? They are professors of English, chemistry, physics and a campus methodologist. They are compassionable but not sentimental, men who can't be intimidated by the school and cannot attack it either.

"The ombudsman doesn't have a whole lot of muscle besides his own," said Chalmers McClure, professor of philosophy, who is chairman of this committee.

The committee was established in June, 1967, to explore with the administration and others the idea of this particular kind of institution and then, if it continues to attract students, to submit a recommendation to the Faculty Council. McClure said in a June, 1967, article in the Daily Egyptian.

The proposal, "A University Ombudsman for Southern Illinois University," is now completed. A copy is attached to the minutes of the special meeting May 28 of the Faculty Council. The minutes have been mailed to faculty members.

McClure, in an interview, said, "The proposal is completed but is still in the discussion stage. It's not clear if there is one on the committee that has committed himself in any way pertaining to the proposal."

The proposal outline reads: "The president can still retain from both inside and outside the university and state that the SUU ombudsman would and would not act."

"I have indicated both publicly and privately that the idea of the campus ombudsman is a good one," stated Wilbur Moulton, dean of students. "My impression is that all the groups that have worked on this have concluded that it is good."

Moulton added that no action has been taken yet, pending the committee report.

In the absence of an ombudsman, he has tried to "be of assistance."

In a speech before a group of SUU graduate students in the College of Arts and Science, Frank Eddy explained, "Based on reports from many sources in the mass media and local campus surveys, colleges today are in need of the services of an ombudsman. With growing enrollment comes the growth of problems and creating more bureaucracy and bureaucracy on campus, experienced persons should be designated to advise the student on the specific duties and powers to deal with complaints."

Eddy is a resident teacher in philosophy and chairman of the department of philosophy of college ombudsman.

The ombudsman stumped into the office. He seems he was having trouble finding a job because...

Charleston Filled With Local History

By Gun Ryan

Copy Service News Service

CHARLESTON, S.C.—Everywhere you turn here, you’ll find history—important history. Remnants of both the Revolutionary War and the Civil War are everywhere.

A visitor's guide map lists 50 outstanding points of historical interest. (Gray Line tours advertise that they’ll show you 85 important points of interest in this 300-year-old seaport city.) And the chamber of commerce has outlined a walking tour of History Trail which covers some 20 historic events in history.

For instance, Sumter, the first British flag was hauled down (1775) and replaced by an American flag. And it was here that the first independent Westing was established (1776). The building where this historic marking event took place is now part of the Exchange Building, can be seen today along the History Trail. The building was completed in 1836.

Beneath the Old Exchange Building is the Provost Dungeon, where confederate soldiers were held in stockades until 1773; where General Moultrie, a Revolutionary commander, hid his powder; supply for two years under the very noses of the British just before they occupied the city in 1780; and where American prisoners were held prisoners of war.

The Civil War began here when Confederate batteries bombarded Fort Sumter on a tiny man-made island in the harbor, after Union troops occupied it, April 12, 1861. It fell to the Confederates two days later. The fort is a national monument today and tour boats run out from the mainland to the five-sided fort.

Other historic sites in the harbor include Fort Moultrie, from where the first shot in the Civil War was fired on Fort Sumter; Fort Moultrie, site of the first battle of the Civil War; and Fort Sumter itself.

The bearded student walked into the office. It seems he was having trouble finding a job because...
In this day, $20,000 deep, the past year was described and pleaded raids controversial. Flight of the Houston Armed bomber. The House Armed Services Committee ordered the release of an Air Force bomber. The Soviet government after an abortive payoffs to the United States.

The current scandal occurred during the Democratic administration of Mayor Robert F. Wagner. It did not involve his successor, Republican Mayor John V. Lindsay, nor the current top brass of the police department or the mayor's office.

Heart Transplant

HOUSTON, Tex. (AP) — A surgical team at St. Luke's Episcopal Hospital completed its fifth human heart transplant operation Tuesday afternoon. A hospital spokesman for the recipient was in satisfactory condition.

The hospital spokesman identified the recipient as George Henry DeBord, 46, a sedentary insurance salesman from New Orleans, La., near San Antonio.

Campus Councils Provide Aid

(Continued from Page 1)

"We are concerned with formulating policies affecting the graduate students," explained William Simcoe, ex officio member. This 24-member council is composed of 16 Senate members — 10 from the Carbondale campus, six from Edwardsville — and eight ex officio members. Elected members are chosen for a three-year term. Meeting monthly, the Faculty Council is concerned with all areas of graduate policy: curriculum, programs and resources. Details of the doctoral program are being reviewed.

A graduate student having a grievance can come to the Graduate Office and present his case. He will then be advised of the proper channels for his grievance.

"We do not 'make rules,' but we do 'enforce them,'" explained Simcoe. "We approve recommendations to other boards or other committees."

MIDWEST GOVERNORS

Anti-Strike Measures Urged

MILWAUKEE, Wis. (AP) — Midwest governors were warned Sunday the 13-state region must act promptly to avoid the possibility of crippling strikes by public employees.

Officials from New York and Michigan, convening at the Midwest Governors' Conference that effective collective bargaining laws are necessary to reduce the threat of strikes by state and local governmental agencies.

"It's totally unrealistic not to expect some strikes of the tragic public consequence," said Frank DeWald, personnel director for the state of Michi

DeWald said a "very ex

sive situation" existed in many states because of the absence of collective bargain

ing laws.

Ironically, Michigan Gov. Romney was forced to cancel two plans to appear at the conference because of strike-related public dis

DeWald said membership in public employee unions is growing rapidly "because of public employee unrest."

Despite the growth, he said, only about a dozen states have enacted legislation providing for "ordered arbitration" in disputes involving firemen in Lansing.

Arvid Anderson, chairman of the New York City office of collective bargaining, said the sanitation strike in New York and the garbage col

Anderson commented in a memorandum that "the hour is late" for states to act.

state conference were sched

up the three-day conference Wednesday.

LBJ Presses for Court Okays

WASHINGTON (AP) — Sen.

Robert P. Griffin, R-Mich., said Tuesday the White House is going all out to win con

firmation of President Johnso

's Supreme Court nom

nations—and linked to this a call for a Senate executive session.

"I have every reason to be concerned that the White House is pulling out all stops," Grif

Griffin, leading a flight to block Senate approval of the nominations, added he knows of some colleagues who have received telephone calls from executives of companies doing business with the government to the effect that they got a call from "a highly placed person in the Fed organization whose mis

Griffin has obtained the sig

atures of 18 of his fellow Republican senators pledging to vote against Johnson's nom

inations on the ground that the filling of any Supreme Court vacancies should be left to the next president to be elected in November.

Griffin said at an earlier news con

ference Senate Republican Leader Everett M. Dirksen of Illinois said flatly that Ports and Thornberry are going to be confirmed.

LBJ said earlier he will not filibuster against con

firmation.

As a member of the Senate Judiciary Committee, Griffin has been a leader in the battle against the nomination of William J. Brennan Jr., a Demo

Griffin's rejection of the nomination last year is expected to have a much greater impact this year as he has emerged as one of the chief in

terest groups in the battle against Brennan.

He said, "I have yet to see a senator on the Judiciary Committee who is not willing to support Brennan's nomination in principle."

At a news conference late Tuesday, LBJ said, "The White House is pulling out all stops, and I believe they are doing so with the best intentions."

Air Force to Aid Technology Grads

The Air Force is now making it possible for graduate students in the SIU School of Technology, whose advanced education is interrupted by military obligations, to continue their education while serving on active duty.

Graduate programs in the field of technology are flexible enough to permit students to further their careers while serving in the military, according to Dean William Simeone, head of the SIU Graduate School of Sciences and Research.

Dean Simeone said it was a very useful idea because it would allow theavy to go to university personnel and it serves as an extension program while the student is in the service.

"The request has often been brought about by the Air Force concerning this type of program, and their hope is to add some reserve career men while on duty," Dean Simeone said.

The University of Southern California is making arrangements for the possibility of advanced education by interrupted military service.

Dean Simeone said this program is good only in cases where the subject being studied is relevant to the country where the study is being done. Also in these countries, European professors could be employed, giving the student a well-classified program.

In areas where a large library is needed, this program is not too good, Simeone said.

At the conclusion of the training program, the candidate is ready for employment as a teacher or is prepared to study for a doctorate degree at a university.

The program is now being extended following successful efforts in Germany and Spain. It was introduced last fall at Air Force bases in Athens, Greece, and Izmir, Turkey.

Holiday Festivities Planned Saturday at Southern Hills

Married students and families will be provided a full day of entertainment at Southern Hills residence area July 6.

All married students and their families are urged to attend, regardless of their place of residence. Reservations will be handled by the Office of Commuter, Married, and Grantees Advisor.

Back on Campus

Ronald W. Stadl, chairman of the faculty of SIU's Department of Industrial Education, recently returned from Washington, D.C., where he was given an advisory capacity to the Department of Health, Education, and Welfare.

Stadl participated in evaluation requests by colleges and universities for grants under the Educational Facilities Construction Act. He was in Washington June 23-28.

Processed Check

Is Evidence of Gun Registration

SPRINGFIELD, Ill. (AP) - If you're planning for an Illinois permit to possess firearms, you'd better write a check for the $5 fee.

The processed check will be evidence you are a bona fide applicant even if the newly created Illinois Firearms Identification Program doesn't yet send you an identity card.

The processed check, the division said Tuesday, will be stamped with your new identity number for permission to possess firearms.

The Illinois law licenses gun owners, not guns.
VTI to Get $32,000 in Recreational Facilities

A contract has been awarded for construction of recreational facilities at VTI. It will provide three tennis courts, four outdoor basketball courts, a softball di-amond, space for some small net games like volleyball and badminton and a few picnic tables.

Cost will be $32,000. The construction site will be located between the student center and the new dormitory, according to Willard Hart, campus architect.

The contract was signed three weeks ago but as yet no physical work has taken place. The construction site should be completed by the start of fall term, Hart said. A screened porch will be enclosed in the new dorm for card and ping pong tables. The porch will be used as storage space for all the interior recreational facilities of the completed construction.

Summer Science Program Starts

Events ranging from a watermelon feast to a pet show will be held Thursday on the Lincoln School playgrounds, 429 S. Washington, in conjunction with a summer-long recreation program.

Sponsors are the Carbondale Park District, School District 95, the Carbondale City Council, Jackson-Williamson County Community Action Agency, Carbondale Teen Center, Jackson County YMCA, SIU's Department of Recreation and Outdoor Education, and Office of University Services to the City of Carbondale. The activities are:

9 a.m.—Puppet play, "The Ringing of the Bell," and a story-telling period.
10 a.m.—Track and field meet and a Craft Wagon session.
Noon—Wieners roast and ice cream party.
1 p.m.—Bicycle rodeo for boys ages 9-12 and girls, 11-12.
3:30 p.m.—Mock fire and water battle by Carbondale firemen.
3 p.m.—Watermelon party sponsored by Mayor David Keene.
4:30 p.m.—Bring-your-own picnic.
5:30 p.m.—Show Wagon session.
7:30 p.m.—Fireworks display at the SIU baseball field sponsored by the Carbondale Lions Club. Student Activities Office will sponsor a dance featuring the "Rainy Days" following the fireworks. Free bus rides will be provided from Lincoln School.

July 4th Activities Include Fireworks, Food, Fun, Games

Events ranging from a watermelon feast to a pet show will be held Thursday on the Lincoln School playgrounds, 429 S. Washington, in conjunction with a summer-long recreation program.

Sponsors are the Carbondale Park District, School District 95, the Carbondale City Council, Jackson-Williamson County Community Action Agency, Carbondale Teen Center, Jackson County YMCA, SIU's Department of Recreation and Outdoor Education, and Office of University Services to the City of Carbondale. The activities are:

9 a.m.—Puppet play, "The Ringing of the Bell," and a story-telling period.
10 a.m.—Track and field meet and a Craft Wagon session.

Rowboats, Canoes, Bicycles Included in Lake Facilities

Lake-on-the-Campus provides many recreational facilities other than swimming, according to G. W. Thomas, director of the Student Activities Center.

Rowboats, canoes, and bicycles are available for rental at a nominal fee at the boat house at the lake. These facilities are provided for the use of students, faculty, staff and their families or off-campus guests, provided they are accompanied by authorized personnel.

The beach is open to students, faculty and staff members from 9 a.m. to 7 p.m. daily except during bad weather.

All persons must have an identification card. Those needing one may obtain it at the Student Activities Center.

Eight Take Part In Drying Course

Eight persons recently completed a one-week short course in the kiln drying of wood at SIU.

The course demonstrated the latest developments in drying techniques and equipment.

The construction site should be completed by the start of fall term, Hart said. A screened porch will be enclosed in the new dorm for card and ping pong tables. The porch will be used as storage space for all the interior recreational facilities of the completed construction.

Library Hours

Shorter Thursday

The following library hours for July Fourth have been announced by Sidney E. Matthews, assistant director of Morris Library:

General library hours 2 to 10 p.m., with entrance by south door only.

Reading Room 2 p.m. until midnight with entrance from south or north doors.

Include Variety of Sports

The Women's Recreation Association summer activ-
iton schedule is full events, according to Miss Char-
lotte West.

Southern Matmen Selected to Wrestle in Olympics

Two SIU wrestlers have been added to compete in the
Olympic Free Style and Greco-
Roman teams, both in the heavyweight division ac-
cording to NCAA officials.

Former Olympian Larry Klifatoff, a double gold
medalist at the 1960 Games, is expected to lead the
Southern team. He will be accompanied by his brother,
Mike, which will participate in the heavyweight divi-
sion of the Greco-Roman event.

Seven wrestlers who competed this year on the teams
of NCAA member colleges, have been named to the
Olympic team. In addition, seven of the other nine team
members and 10 of the 14 al-
ternates are graduates of
NCAA institutions.

The head coach for the free-
style team is Thomas Ryan,^
assistant coach for the Univer-
sity of the University.

Jean Lewis, a sophomore
from Alton, Ill., is the only
man to place on both teams.
Lewis will wrestle in the light
heavyweight class.

Golf enthusiasts are asked to be at the Women's Gym
every Wednesday afternoon from 3:45-5:30.

Friday nights from 7-10 is recreation with an open
portunity for girls to swim, play volleyball or basketball.

"It is part of our plan. The moment
is successful," Miss West said.
"Of course we could always use more girls."

A girl need not be a mem-
er of the WRA, only a stu-
dent registered for the sum-
mer season. Faculty women are eligible to participate
and men are welcome to come for
free recreation on Fridays.

Miss Claudia Blackman, a physical education teacher,
is in charge of the WRA activi-
ties for the ladies. Miss West is in charge of the overall pro-
gram.

Invalids May Compete Internationally

By Dave Palermo

Covering the 60-yard dash in 11.2 is not a figure that may seem like much of an accomplishment. The majority of students on the SIU campus can run it much faster. However, when one is confined to a wheelchair, the time is fast enough to set a world’s record.

Dave Williamson, a graduate student in business administration at Southern, and two other invalids set the record while tying for first place in the 12th Annual Wheelchair Games, held recently at New York.

Williamson competed in the Pentathlon, a wheelchair version of the Olympic Decathlon, which consists of the 60-yard dash, 100-yard dash, javelin, discus, shuttle race and the shot-put. Along with a first in the 60-yard dash, Williamson placed second in the shot put with a time of 1:20.6, clocking the javelin 71.6-10, for a second place, won a third in the discus with a toss of 69'-4 1/2", placed second in the 70-yard shuttle with a time of 29.1, and placed sixth in the shot put with a heave of 22'-3". The versatile athlete also weight-lifted 240 pounds, a world record, to win that event.

Competing against a field of 378 invalids of all ages, Williamson was one of four chosen to participate in the international wheelchair competition to begin November 3 in Tel Aviv, Israel. This makes the fourth straight year the personable Williamson has represented the U.S. internationally. He first participated in the games in 1965 and has been back the next two years studies kept him from international competition.

Whether or not Williamson and another wheelchair student, Shirley Roden, will go to Israel depends on their ability to raise the necessary funds. Williamson needs $500 and Miss Roden $600.

"I haven’t been training extensively because I don’t know whether or not I can raise the money," said Williamson. "I’ve been swimming regularly to keep in shape but if it doesn’t look like I’ll get the money when August rolls around I won’t go into training."

Miss Roden was selected to represent the U.S. in international competition on the basis of performances in the javelin, shot-put and discus.

One of the top wheelchair athletes in the country, Williamson has finished respectably for the last four years in national competition. He began competition while attending Evansville High School, where he participated in the rehabilitation program. In his senior year he captured four firsts and set two regional records.

Williamson is co-captain of the SIU wheelchair team, which consists of five other students: three men and two women.

Co-captain Jim Jeffers, a junior from Paden City, West Va., finished fifth in the 100-yard dash, fifth in the shot put and sixth in the discus. He placed second in the javelin and ended the 60-yard dash.

Howard Ziegler, a native of Peoria, placed seventh in the archery event while also participating in the precision javelin and the 60-yard dash.

Gene Gelangter, a junior from DeSmet, Iowa, won a first in the archery event and a sixth in the precision javelin, but did not place in the discus.

Natalie Baker, a native of New York, placed second in the breast stroke, back stroke and freestyle while finishing third in the discus. She did not place in the shot-put or javelin.

If Williamson raises the necessary money to make the trip, he does not plan to compete in the weight lifting event. "Weight lifting will cost me too many points in the other events," he said. "My major interest is in track and field, and weight lifting tightens my muscles and hurts my performance in other events."

"It’s both an obligation and an honor to compete in the games," Williamson explained. "The U.S. hasn’t done well in the past few years and I’d like to go and see if I can get some team points. A second or third is enough because I’m fortunate to do well in many different sports."

Williamson’s accomplishments aren’t all personal. "It helps those who are blind as well as those physically handicapped. I’d like to think we can look at each other’s backs, see what we’ve done, and try to develop ourselves to their fullest potential."

---

Dave Williamson, one of the most talented and versatile wheelchair athletes in the country, shows the determination of a champion as he prepares for one of the many obstacles that make up the 70-yard shuttle event. Williamson hopes to compete in the Paralympic games in Israel in November.
