Students Here Submit Paper On Revising Government

A reorganization plan submitted by the Carbondale campus Student Council would provide for a single-voiced student government that would coordinate the entire SIU student body and coordinate activities between the two campuses.

The plan was to be submitted to the University Student Council Tuesday, according to Pat Mckenzie, student body president, to be considered by a special committee responsible for drawing up a working paper for student government.

2 Profs to Visit Off-Campus Units

Two professors will visit off-campus houses tonight in conjunction with the weekly "Meet Your Professor" program. Informal discussions will begin at 7:30 p.m. Crossman C. Foust, assistant professor of instructional materials, will be a guest at the Drill Mortgage, 708 W. Freeman St.

William D. Gray, professor of botany, will be a guest at the Mason Dixon House, 806 W. College St.

Including Television

Saluki Cage Game With Evansville Viewed by Estimated 250,000 Fans

For what was billed as a "minor" college basketball contest between SIU and Evansville College, the estimated figures of those who viewed the game, either in the packed Arena or over the television tube, are staggering.

According to William E. Dixon, chief broadcasting engineer of the SIU Broadcasting Service, approximately 500,000 persons took in the live action over the facilities of WSUI-TV. Add to this the video tape audience of Evansville's full-power Channel 7 and you come up with nearly a whopping quarter of a million viewers.

The coverage was only the second of the season for SIU basketball, with a live telecast of the Saluki-Ditka State game earlier in the season.

Asked why SIU television has limited its coverage, Dixon cited two reasons. Even with largely student assistance, the televising of a basketball game is expensive. Saturday's coverage came to "probably about $1,000," said Dixon.

Also a big factor in the sparse coverage is the possibility that regular televising would hurt attendance at the Arena.

Will games in the future be televised? "We certainly hope so," answered Dixon. "If the people show us that they are interested enough in Saluki activity to watch the Saluki Arena, we would definitely cover more live games. We could not do that now, if television resulted in drawing people from the Arena to their television sets."

EVANSVILLE FAN FINDS FEW, REPORTS CAP STILL IS MISSING

An Evansville fan, Gerald Shaffer, has offered a reward to the person returning a red cap he lost in the SIU Arena Saturday night.

"Don't know what an SIU fan would want with a red cap," Shaffer said.

Shaffer said he lost his head and his cap at the game, but later recovered his cap. "My cap is still missing," he said in a telephone conversation.

** Issue in Housing  
**Most Neglected Title Won By Married Scholars’ Wives**

The wife of a college student is perhaps the most neglected person on a campus, according to J. Albin Yokie, coordinator of university housing. Approximately 10 percent of SIU’s students are married and Yokie feels they should have as much educational opportunity as possible.

“The college housewife must be a homemaker, mother, part-time student and many times times bread winner in order that her husband achieve his educational goals,” Yokie continued, “but little consideration is given her educational desires.”

The “average married couple in college has two or more children, and most of the students’ wives experience their first pregnancy while in college,” Yokie said. “Since this can be an emotionally trying time, it is felt that there is a great need for the University to help in the education and assistance of these new mothers.”

For example, Yokie would like to see a nursery facility set up at Southern Hills. This would allow couples to take their shopping, get their hair fixed, or take additional time to hire a baby sitter. Lack of money and personnel for the job render this almost impossible at the present time. The University could remedy this situation by giving some of their time and space to this nursery to be organized and set up. The space is available, but this idea has met with little or no enthusiasm, Yokie said.

Although there are problems at SIU concerning married students, Yokie feels that few are of an extremely serious nature and that plans are in the making to relate as much of these as possible.

Another problem facing the University Housing Office in regards to married students is providing adequate and rent-related living quarters.

The primary consideration to be made is that most of the married couples are those with the husbands either in graduate school, working as graduate assistants, or working as graduate fellows. Because the income of these positions is relatively low, the University’s responsibility is to provide housing that is both comfortable and inexpensive.

“The average income of the graduate students is about $510 a month, and we feel that can be lived on very much better than half of that for shelter,” Yokie said. “This figure must include rent and all utilities.”

This interest in supporting the University’s graduate program can be met in part by the majority of available space to the graduate student. Assignment of space to Southern Hills, the housing facility at SIU, is set up to comply with this idea. Graduate students are allotted 65 percent of the apartments there, with 25 percent set aside for undergraduates. The remaining 10 percent is allotted to new faculty members.

**Fraternity Picks Sweethearts To Reign at 14th Annual Ball**

Hazel L. Scott has been named as the scholar sweetheart and Bernice U. Abrams has been named as the member sweetheart at the 14th annual Kappa Alpha Psi Sweethearts’ Ball. Also, these pinnings were remounted by Kappa Alpha Psi members at the ball; Jesse A. Reed to Willie Duberry, Harry G. Reid to Connie Shields, Edward E. Lang to Carolyn Y. Hughes, Gerald A. Edwards to Sylvia D. Viek, and Thomas S. Wetzel to Shirley Hawkins.

**SINGLE VOICE** *Is Emphasized In New Student Council Plan*

(Continued from Page 1) Council should have the right to request that the University Student Council any proposed bill go into effect if two-thirds of the University Student Council or a unanimous vote of the University Student Council.

**Rites Thursday**

For 3 Students  
(Continued from Page 1) in St. Patrick’s Cemetery. Friends may call at the Owens Funeral Home, Champaign, this afternoon and evening.

The Waddington Funeral Home, Tuscola will conduct services for Robert E. Williams, 20. Burial will be in the Tuscola Cemetery. Friends may call at the funeral home between 7 to 8:30 p.m. today.

Richard Eisemoner, SIU student from Tuscola and a resident of the dormitory where the students lived, will represent the dormitory at the funerals.

The three students were killed in a two-car collision on Rt. 37, north of Salem.
Activities

Events Today Cover

Sports to Religion

Inter Varsity Christian Fellowship will meet at 11 a.m. in Room E of the University Center.

The Judo Club will meet at 5 p.m. on the Arena Concourse.

Rehearsal for the Theta Xi Variety Show will begin at 5:30 p.m. in Shryock Auditorium.

The Aquelettes will meet at 5:30 p.m. at the University Pool.

The Home Economics Club will meet at 7 p.m. in the Modern Living Lounge of the Home Economics Building. Xi Sigma Pi, forestry organization, will meet at 7 p.m. in the Seminar Room of the Agriculture Building.

The SIU Amateur Radio Association will meet at 7 p.m. in Room D of the University Center.

The Women's Recreation Association will sponsor a house basketball at 7:30 p.m. in the Large Gymnasium.

Issuing, Selling, Buying Books Keeps Textbook Service Busy

By David Chester

The SIU Textbook Service, contrary to common belief, doesn't take an extended vacation immediately after the first of the quarter.

In fact, the issuance of an estimated 90,000 textbooks is just the beginning, according to Henry T. Stroman, manager.

Cards for each of the books then have to be sorted and filled into departmental and numerical order. New books, to replace worn, lost, or discontinued ones, must be brought in; returned books must be reshelved. To maintain its 150,000-volume inventory, last year alone, $270,000 was allotted for the purchase of new books.

The sale of books amounts to a substantial sum, too, totaling $45,000 since last July. Much of this comes from the sale of used or superseded undergraduate books.

Selling at reduced prices, the books disappear quickly. Occasionally, the thirst for knowledge becomes so great, bargain hunters find it necessary to enlist the aid of a nearby bushel basket to carry their purchases.

The Textbook Service also supplies books for University School, VTL, and a number of extension courses throughout Southern Illinois.

Each term it contacts department heads and obtains listings of courses and new textbook adoption dates. Departments are eligible for new texts every three years, although books for some courses, such as philosophy and literature, which aren't particularly dated, may continue without change for as long as 10 years.

Internationally, the Textbook Service has contributed books to countries and groups over the world. The Peace Corps, for instance, has received a great deal of books for use in Viet Nam, Africa, and South America.

A home economics school in Japan, directed by Slater Tollentine, the first person to earn a doctorate in home economics at SIU, has been in the past similarly endowed with texts.

Surprisingly enough, Southern's Textbook Service is one of the largest rental systems in the United States, with an inventory that approaches $1 million.

WSIU Addition Will Feature TV's Susskind

Open End, the first of a new series of programs, will be featured at 8:30 p.m. today on WSIU-TV.

David Susskind will be discussing lively, current, and controversial topics with famous people.

Other highlights:

6 p.m.
Conversations with Eric Hoffer: Philosopher, author and longshoreman. Hoffer presents some startling views.

7 p.m.
You Are There: The Boston Massacre on March 5, 1770.

7:30 p.m.
Public Affairs Programs: "Changing Worlds: Count Down Under," Efforts to explore and chart the Indian Ocean are shown.

Botanists to Hear Sears

Paul B. Sears, professor emeritus from Yale, will present the "Human Adventure" at the botany seminar at 4 p.m., Wednesday in Room 325 of the Life Science Building.
From the Ivory Tower

I knew it was going to happen sooner or later. Well, now that it has, someone should have the nerve to do it. A student organization has had the great good fortune—someday, you'll see—to answer the questions of the student. They've gone and done something right.

S.N.C.F. has picketed the "Family Fun" drive. It's a two day or two maybe three week, O.K., but they kept it up for over a week. Some of them even got arrested for it. Fun is fun, but they're carrying things to the point where they're being called by the same name as those like "justice," "equality", and "freedom." Why? Why, you've even got faculty members and civic officials giving you the "Y's" to look into this. Students have no business meaning in affairs that don't concern them.

We, as students, have a right to be censored. Why should we wait until it's too late?

Seems to me the Administration would run on something like that. Let us remain happy, faceless, and unidentifiable, as the students are. We can have plenty of fun with innocent things, and no one will take us seriously. Best of all, there will be no risk involved. We can just skip merrily, hand in hand, down a primrose path, oblivious to the fact that the roses are dusted with Strontium 90.

Lawrence Jasud

Ka Interviews:

This week, Ka interviewed Happy Appy, Chief Counselor for the United Communist Party. The following is excerpts from a speech delivered on campus by Happy Appy, earlier in the month:

"There is a spectre haunting the University today: bureaucracy and the spectre of bureaucratic expansionism. Creeping from pole to pole, it afflicts us with a cancerous growth of apathy and b.s. it's a numbing of thought."

"Students unite! Throw off your chains of conformity. Throw off the burden of your oppression. Get up BLACK!!"

"Mr. Appy, what do you mean by the great knowledge, the bureaucracies?"

"I mean to say that in the shuffle Appy or the politician, the student has been oppressed. No longer is he be considered a vital part of the university; no longer is he a worker in the university. Truly I can say that if students took the initiative they could fulfill their roles for a more efficient university operations.

"Students unite! Throw off your chains of conformity. Throw off the burden of your oppression. Get up!!"

"Mr. Appy, are you going to participate in student wages?

"Yes, I am going to participate in student wages. All right? Business is business!"

At least 4 Aircraft Lost

DA NANG, South Viet Nam (AP) — More than 160 U.S. Air Force and Vietnamese warplanes battered military installations at two points in North Viet Nam today in a powerful sequel to the February repulsed raids. American authorities said the strikes were a resounding success.

However, four or more planes were shot down. The targets were the port of Quang Khe and a muni-

tions depot at Xom Dang. Officials in Saigon estimated that from 70 to 80 per cent of the installations were destroyed. They said there will be further action against both as prime sources of Communist aggression against South Viet Nam.

Reflecting a stiffened attitude in Saigon and Washington, U.S. Ambassador Maxwell D. Taylor said the new raids were not in retaliation for the Purpose.

The American mission in Saigon and the South Viet-

amese government promised further action against both, describing them as "installations that are being used by the enemy to support its aggression, and we have bad to make a response."

One of the Vietnamese pilots said last week that the strike was aimed at the port of Quang Khe, 30 miles north of the border between North and South Viet Nam. Xom Dang is 10 miles north of the border and 15 miles east of the Laotian border.

Housing Affairs Agency

Asked for by Johnson

WASHINGTON (AP)—President Johnson asked Congress today to create a Department of Housing Affairs, proposed federal grants to help cities build basic community facilities and asked federal funds to serve part of the rent of needy persons.

Johnson said in a special message he wants to begin a program to help urban areas solve their many problems. He also urged a program of federally insured private loans to finance the acquisition and development of land for new communities and planned subdivisions.

"This program should enable us to build better suburbs," Johnson said. "And it will also make it easier to finance the construction of grand new communities on the rim of the city. Often such communities can help break the pattern of city ghettos by providing ideas and moderate-income housing in suburban areas.

He proposed an institute of urban development as part of the new Department of Housing Affairs.

He said the institute would bring together community officials in a wide range of administrative and program skills. It also would support research aimed especially at reducing costs of building and home construction through the homes for the elderly project and the university of Montreal.

"...The bill moves to restore earlier this month, by a vote of 23-8. Two Republican joined the 21 community Democrats in voting for the bill.

Most of the money is to be spent on schools serving children of low-income families, but 90 per cent of the nation's school districts would share in the $1 billion authorized by the bill for that purpose.

Other sections of the bill would provide textbooks and library books for both public and private schools, create supplementary education centers for use by all children in community and strengthen educational research.

Moon Dangers

Must Be Seen,

Astronaut Says

MILWAUKEE, Wis. (AP)—Astronaut Donald K. Slayton said today that he didn't think space scientists would be sure about landing conditions on the moon "until one of our guys gets up there and takes a look."

Slayton, 41, a Sparta, Wis., native who was in Milwaukee as honorary state chairman of the Easter Seal campaign—of which his 10-year-old niece, Barbara, is poster girl—took time out to discuss space flights.

Shrinkage in the goals of the two-man Gemini program has not hurt the Apollo moon flight effort scheduled for 1969, Slayton said. The first manned Gemini orbital flight is scheduled for late March or early April.

Originally, designers hoped to build a Gemini capsule which could be brought down on land, he said. They experimented with a kite-like folding wing and a steerable parachute, but neither will be ready in time.

Slayton, an Air Force man and one of the nation's original astronauts, was forbidden to fly in the one-man Mercury program because of a minor heart defect. He said that no decision has been made on his qualifications to fly in multimanned space vehicle.

"We've got six flight crew operations director hearing a staff of 28 astronauts and about 165 engineers.

Variety Show Is Big Operation For Performers and Planners

(Continued from Page 1)
the show, which involves much paper work.

The show is financed by a University fund, and costs around $1,000. Profits are returned to the University for some project. Past projects include the lending prints at the library and donations to the Leo G. Kaplan Memorial Fund.

Dozens of phone calls daily to members of the cast and crew, often resulting in busy signals and nobody home, are what make the discovery of aspirin a blessing at the end of the day to Drinan and Gard.

Richard Uray, operations manager for WSIU-Radio, and Charles Zoeckler, associate professor in theater, can be seen at rehearsals four nights a week.

While Zoeckler is calling to the man at the spotlight to shift the beam faster, Uray might be motioning to the narrator to move the microphone closer. At the same
time, while a chorus of singing and dancing goes on, Gard stages under the dim lights of a clipboard full of notes.

"Uray and Zoeckler have carried the weight of the production," Gard said. "Without them, we would be lost."

This year there will be three group acts, consisting of 30 to 90 people each. Four intermediate and six individual acts compose the rest of the show.

The performers of each act make their own costumes and build their own sets. They do it at home. The cost comes out of their own pockets.

The cochairmen, full-time students at Southern, have worked more total hours than any other individuals connected with the show.

When asked, "Are your grades suffering this quarter?" Gard said, "Despite the time I've put in, I'm doing better this term than ever before. You can fit it in."

When, according to the university杀死者 hates, one often results in busy signals and nobody home, are what make the discovery of aspirin a blessing at the end of the day to Drinan and Gard.

FUTURE FARMERS - Three members of SIU's chapter of the Future Farmers of America visited Campus Farm this spring to discuss an exhibit in the Agriculture Building with Thomas Fisher (second from right), Illinois FFA president from Flat Rock during a visit to campus. They are, from left, Albert D. Conigliaro, first vice president; Charles B. Moore, recording secretary; and Lindell Whitehead, Kamak; SIU chapter presi-
dent.

Evolution Traced

Early Man's Culture Helped Race Survive

Man had to develop a culture in order to survive, a world-renowned anthropolo-
 gist emphasized at a confer-
 ence on the evolution of man.

This evening will be the end of the series of lectures and will feature E. R. Hulse, an anthropologist from the Uni-
 versity of Arizona. He will discuss, "The Effects of So-
al Conditions and Cultural Behavior on Man's Biology." at 8 o'clock in Morris Library Auditorium.

"The development of cul-
ture was an important part of man's adaptation to the environment," said John T. Robinson, professor of anthro-
pology and sociology at the University of Wisconsin, Monday evening. "Culture was a direct result of man's ef-
fort to survive under different circumstances.

Robinson, regarded as the world's outstanding authority on man's earliest primate an-
cestors, spoke on, "Earliest Evidence of Man and Culture," to open the Serry and Hutchin-son Foundation lecture series.

Modern man is directly des-
cended from the austral-
pithecines which were known at the present time. Pananthropus, a more ape-
like line, did not develop fully human characteristics and eventually became extinct.

Before doing so it gave rise to a branch, Australopithecus, which is the earliest creature known to have man-like be-

havior and thought patterns. It was directly ancestral to man, Robinson said.

The australopithecines split into the two forms because of climatic changes on the African continent during this period. The continent dried up and extensive plains became prominent, necessitating an evolutionary change from an herbivorous to a partly carn-

nivorous diet.

"Pananthropus was a vege-
tarian, as shown by its dental pattern," Robinson said. "Australopithecus, however, had larger canine teeth and was better suited to eating meat."

"To successfully change to this new diet," he added, "it was first necessary for an ape-
man to become a hunter-to eat meat off the bones. Ape meat does not usually do this; they have little nat-
ural killing ability or tool-
using ability."

When Australopithecus first evolved, he didn't use tools. He had to develop them. In the development of tool-
making, early man first learned to use tools, then to make them, and eventually to make them for specific purposes.

The more intelligent ape-
men made better use of tools for hunting, and were more apt to survive, he explained. Thus evolution favored the improvement of intelligence.

As emphasis was placed on more efficient communica-
tion between the ape-men, an early language developed.

New officers serve Alpha Phi Omega, national service fraternity, during winter and spring terms, have been elected.

They include Jerry F. Pickar, president; Richard S. Conigliaro, first vice presi-
dent; Hugh E. Janssen, second vice president; Michael R. Moore, recording secretary; James D. Templeton, corre-
sponding secretary; and Sheldon R. Cheeky, treasurer.

Also, Kenneth K. Olson, historian; Gary W. "Oldacker, alumni secretary; and Edward L. Georges, sergeant at arms.

Govern Murphy is the organi-
zation's scouting adviser.

Robinson said, "These crea-
tures walked upright, which indicates they were not apes." From this group, two forms are known at the present time. Pananthropus, a more ape-
like line, did not develop fully human characteristics and eventually became extinct. Before doing so it gave rise to a branch, Australopithecus, which is the earliest creature known to have man-like be-

havior and thought patterns. It was directly ancestral to man, Robinson said.

**On-Campus Job Interviews**

**MONDAY, MARCH 9:**

**GARY PUBLIC SCHOOLS, GARY, INDIANA:** Seeking Teachers for Elementary grades and Elementary Art and Vocal Music. Positions include in the secondary area are: Bus. Ed. (typing & Short Hand), English, Guidance (national exam required), Home Ec., Ind. Arts, Math, Science, Social Studies, Vocational, and Drama.

**NATIONAL BANK OF DETROIT, DETROIT, MICHIGAN:** Seeking candidates in all areas of Business for placement in 1966. Please send description of needs and prepare for interview.

**SILK CORPORATION, CHICAGO, ILLINOIS:** Seeking business and LASS seniors for accounting positions.

**BLOOMINGTON PUBLIC SCHOOLS, BLOOMINGTON, ILLINOIS:** Seeking Teachers for the following vacancies: English, Math, Foreign Languages, Social Studies.

**GOODYEAR TIRE AND RUBBER COMPANY, ST. LOUIS, MISSOURI:** Seeking Business and Liberal Arts seniors for Executive Training Program in Dayton.

**U.S. ARMY ADMINISTRATION, AMERICAN ARMY, GERMANY:** Seeking Personnel for Government auditing positions. Interested candidates are invited to apply to the New Berlin Recruiting Station, 47th Street, New Berlin, Wisconsin. Please address application to: Mr. L. R. Seifert, Personnel Officer. New Berlin Recruiting Station, 47th Street, New Berlin, Wisconsin.

**TUESDAY, MARCH 10:**

**BOARD OF EDUCATION, BALTIMORE COUNTY, BALTIMORE, MARYLAND:** Seeking Elementary and Secondary School Teachers for the following subjects: English, Math, Science, Social Studies, Art, Music, Industrial Ed., Guidance, and Driver Ed., Boys and Girls. Please send resume to: Mr. John B. Howard, Superintendent, Board of Education, Baltimore County, Baltimore, Maryland.

**CLARK COUNTY SCHOOL DIST., LAS VEGAS, NEVADA:** Seeking Elementary and secondary teachers for all grades and subject areas.

**THURSDAY, MARCH 12:**

**EPIPHANY, BLOOMINGTON, ILLINOIS:** Seeking Teachers for all Elementary grades. Interested candidates are invited to apply to the New Berlin Recruiting Station, 47th Street, New Berlin, Wisconsin. Please address application to: Mr. L. R. Seifert, Personnel Officer. New Berlin Recruiting Station, 47th Street, New Berlin, Wisconsin.

**FRIDAY, MARCH 13:**

**EPISCOPAL LEAGUE, CHICAGO, ILLINOIS:** Seeking Teachers for Elementary grades K-6. Interested candidates are invited to apply to the New Berlin Recruiting Station, 47th Street, New Berlin, Wisconsin. Please address application to: Mr. L. R. Seifert, Personnel Officer. New Berlin Recruiting Station, 47th Street, New Berlin, Wisconsin.

**WEDNESDAY, MARCH 17:**

**PARK RIDGE PUBLIC SCHOOLS, PARK RIDGE, NEW JERSEY:** Seeking Elementary teachers K-4, and Elementary Art, Music, Library. Secondary vacancies in Physics, Guidance, English, Jr. High School Social Studies, Foreign Languages, German, English, Latin, English, Developmental Reading and Reading.

**MONDAY, MARCH 29:**

**NILES TOWNSHIP HIGH SCHOOL, SIOUX FALLS, SOUTH DAKOTA:** Seeking Teachers for the following subjects: English, Guidance, Home Ec., Industrial Arts, Typing, English. Please send resume to: Mr. J. R. Bruce, Guidance Director, Niles Township High School, Sioux Falls, South Dakota.

**TUESDAY, MARCH 30:**

**JACKSONVILLE UNIT DIST., RICHARDSON, ILLINOIS:** Seeking Teachers for the following subject areas: English, Guidance, Home Ec. Please send resume to: Mr. J. R. Bruce, Guidance Director, Niles Township High School, Sioux Falls, South Dakota.

**Michigan Resort Seeks Employes**

E. D. Pugh, personnel director of Sunny Brook Farm, will be on campus Friday and Saturday, seeking students for summer employment.

Sunny Brook Farm is a family-type resort at South Haven, Michigan, about 130 miles from Chicago. The resort needs both male and female workers and those interested may apply for more than one position.

A spokesman for the Student Work Office said Pugh intends to hire about 25 per cent of his staff from SIU, a plenty of jobs are available.

**Cornell Wins 1,000-Yard Run With Near-Record Performance**

By Roy Franke

Slim Bill Cornell, who's been on the verge of track brilliance numerous times since coming to America in 1961, stands there again.

The senior from Chelmsford, England, blazed off the second fastest 1,000-yard run ever turned in on a dirt track in America Saturday as he fought his way to victory in the event at the Central Collegiates Championships at South Bend, Indiana.

The veteran distance ace's 2:09.0 was also the fourth best time in the nation this year for the event, ranking behind brilliant efforts by world half-mile and mile record holders Peter Snell of New Zealand, and speedy Canadian Bill Crothers.

Cornell's top performance was only one of several the Salukis turned in as the trackman qualified three individuals and their mile relay team for the NCAA indoor championship scheduled at Detroit, Mich., March 12 and 13.

The relay team of Frank Coventry, Cornell, Jerry Fendrich and Gary Carr continued the team's great early-season form, topping the field in their event with a fine 3:10.7.

The team's 3:10.4 effort, the Michigan State Relays still stands along with Oklahoma as the best time among college teams in the nation this season.

In the team standings SIU was third in the meet with 33 points. Notre Dame was first with 79, Western Michigan second with 77, Drake fourth and Loyola fifth.

Fendrich and Carr also qualified for the national meet as Fendrich won the 600-yard run in 1:11.5 and Carr third in the 440 with an SIU record-breaking 49.3.

One other Saluki came up with top performances, although they failed to qualify for the national. Alan Ackman ran a fine mile in 4:15.3 to finish fourth, and Carr continued his form, topping the field in their event with a fine 3:11.5.

The team will go back into action this weekend at a track meet in the University of Chicago open at Chicago Saturday. Then the nationals follow a week from Friday.

**SIU Rifle Team**

**Wins State Title**

The SIU rifle team scored 1,538 out of a possible 1,600 points to win the team title Monday at the Illinois State Gallery Rifle Championship, held at the SIU range.

Phillip E. Richards, Charles V. Green, James C. Clemens and Roy Brown turned in some 85 other teams to take the title in the Addison, Ill., contest.

Richards also fired a 985 out of 1,000 points to take the third individual round.

**Roller Skaters Offered Free Ride to Marion**

An opportunity to roller skate at a price in Marion is being offered students by the recreation committee of the University Center Planning Board.

Bus transportation at no cost to students was held at the University Center at 7:30 p.m. Friday. Students should sign up for the trip by noon Friday.

**4 Promising Freshman Gymnasts Brighten Outlook for Next Year**

By Joe Cook

Most students at SIU have heard of the Four Freshmen, a popular vocal recording group, but gymnastics Coach Bill Meade has four freshmen that are expected to become more famous than the singing group.

The four freshmen are Fred Denesi from Waukegan, Paul Mayer from El Cerrito, Calif., Ron Harstad from Arlington Hts., and Dale Hardt from Skokie.

Meade believes the boys will be instrumental in the success of his team next season.

Denesi in Meade's words is an outstanding young star and eligible now, could be fighting for top spot on the rings.

Denesi, who oddly enough did not start gymnastics until his sophomore year in high school, was state champion on the rings last year. In addition to the rings Dennis works the high bar.

Mayer's best events are free exercise and long horse although he can work all seven adequately and may become an all-around performer for the Salukis next season.

Meade is looking forward to the three way battle next season for the top spot in long horse among Mayer and his two top men this season, Frank Schmitz and Brent Williams.

Mayer is also expected to battle Schmitz for the top spot in free exercise.

Harstad is one of the best prospects on the parallel bars that Southern has had, according to Meade. If he shakes the injury bug that has hampered him much of this year he could be the top man for Southern next year on the parallel bars.

Meade is not sure yet whether Harstad will be a one event man or whether his abilities on the parallel bars will be carried over to the rings and high bar.

Hardt is the last of the four freshmen but his credentials are as impressive as the other three.

"Hardt has the greatest repertoire of routines of any trampolinist man that I have seen," said Meade. "He needs help to work on form and appearance to become one of the top trampolinists in the country," he concluded.

The four freshmen will have a chance this year to live up to the praises of their coach. They will be competing in the United States Gymnastics Federation Meet in Nashville, Tenn. April 16 and 17.

"Their performances at meet will give some idea of what to expect from us next year," said Meade.

**4 Saluki Track Club Men Win At Illinois Federation Meet**

While SIU's varsity trackmen qualified four individuals and its mile relay team for the NCAA indoor championships, the Saluki Track Club also was busy.

The team competed in the annual Illinois Federation indoor meet at Champaign Saturday and grabbed four first places, five seconds, three thirds and fourths.

SIU winners were George Woods in the shot-put, 57 feet 3 inches; John Trowbridge in the mile, 4:22.2; Tom Curry in the two miles, 9:32.2, and Mike Bull in the pole vault, 13 feet 6 inches.

Saluki freshmen Dean Brooks, the Illinois prep 220-yard dash champion a year ago, almost came up with a win as he nearly pulled the biggest upset of the meet. The 4-8 speader from Palestine was just edged by Olympic Treasurer Jackson as he was clocked in 6.2.

**Jordon Attends St. Louis Workshop**

Thomas E. Jordan, chairman of the Department of Guidance, recently attended a five-day workshop entitled "The Superintendent's Understanding of Today's Elementary School Child" at St. Louis University.

The workshop was cosponsored by St. Louis University and the National Catholic Educational Association.

**Maxwell to Give Talk**

Charles Maxwell, professor of mathematics, will be the speaker at Pi Mu Epsilon, national honor mathematics fraternity, at 8 p.m. today in Room 201 at the Wabash Building.

Maxwell's topic will be "The Index of a Mapping."
Southern, Evansville May Meet 3rd Time

A third meeting between Southern and Evansville could be in the offering following the release of the pairings for the first round of the four regional tournaments for the NASC national basketball tournament.

The pairings recently released place the owners of the two teams' respective records in different brackets for the finals to be held in Evansville March 10-12. The winner of the Southeast regional, in which Evansville plays, will be in the upper bracket for the finals, while the winner at the Great Lakes regional here will be in the lower bracket.

This means that if Southern and Evansville are successful along the way to the finals they could meet for decisive games in the national championship.

But neither team will have an easy task of clearing the way for the top spot in the Southeast region. Southern is coached by Bob Culp, former coach at Bethune - Cookman.

The region will be led by Dave Fuller, a 6-9 center, who scored 60 points and nabbed 24 rebounds in a game Saturday.

The winner of the Southeast regional will meet the champion of the East Regional, in the first round of the finals. Chawey (Pa.) State is the favorite in the East regional, but will face stiff competition from Philadelphia, Textile. Chawey is 21-2, but the Philadelphia team is small and talented, and boasts an average of 93 points a game.

The Salukis are picked to take the regional here, but could face they could meet a tough outfit in Jackson State. The Mississippi team is picked to do well in the East regional, but will face stiff competition from Philadelphia, Textile. Chawey is 21-2, but the Philadelphia team is small and talented, and boasts an average of 93 points a game.

The Salukis make it through the regionals they will face the winner of the Southwest regional in the finals. Washington University of St. Louis is the pick to take the Southwest, and Southern defeated the Bears 73-54 earlier this year.

In other regional action around the country, Dakota is picked to capture one of the remaining four spots. Playing in the West regional, with North Dakota and South Dakota included, Southern had no chance of a challenge from its three opponents.

In the Pacific Coast regional, Seattle Pacific gets the nod. Sporting a 23-3 record, the women are expected to face a difficult challenge in the Seattle regional. The only opposing school is Pacific, which has a chance to win the conference.

The Transfers, winners of the Off-Senior Cup, Face League, and the Badgers again face stiff competition for first place in the league this year.

The Transfers have been placed in scoring all season behind Dan Maga, who boasts a 25 point per game scoring average. Dan Holinek, high jumping forward, is second on the team with a 20 point per game scoring average. The Badgers are coming off a second place finish in the regional, behind the Salukis.

The Transfers have been placed in scoring all season, led by Dan Maga, who boasts a 25 point per game scoring average. Dan Holinek, high jumping forward, is second on the team with a 20 point per game scoring average. The Badgers are coming off a second place finish in the regional, behind the Salukis.

At Reading, the team has been named so far, only the remaining regional. The Salukis make it through the regionals they will face the winner of the Southwest regional in the finals. Washington University of St. Louis is the pick to take the Southwest, and Southern defeated the Bears 73-54 earlier this year.

The Salukis, with a 23-3 record, are expected to face a difficult challenge in the Seattle regional. The only opposing school is Pacific, which has a chance to win the conference.

Michigan Fends off UCLA Challenge for No. 1

By the Associated Press
The UCLA Bruins are continuing their spirited pursuit of the Michigan Wolverines in The Associated Press' collegiate basketball rankings. But time is running out for the West Coast team which is seeking to finish in the top five for the second straight year.

Michigan was the runner-up to the Bruins last season. In this week's poll, the next-to-last one of the year, the Wolverines collected 31 first-place votes and 399 points while UCLA had four votes for the top position and 362 points.

Michigan upped its record to 19-2 last week, just edging to sneak past Illinois 80-79 after defeating Minnesota 91-78. UCLA was handily over Stanford 83-67 and California 83-58 for a 2-2 mark. The Wolverines have three games remaining in regular season, against Wisconsin tonight, Minnesota Saturday and Ohio State next Monday.

The Top Ten are:
Michigan
UCLA
St. Joseph's, Pa.
Providence
Vanderbilt
Minnesota
Duke
Villanova
Brigham Young

11 Fraternity Men Attend Convention

Eleven members of the SIU chapter of Alpha Phi Omega, national service fraternity, recently attended the 40th anniversary convention of the organization in New York, Calif.

Among those attending the convention was Alpha Phi Omega's founder, Frank Reed Norton.

Attending from SIU were Jerry F. Pickar, Richard S. Congiario, Hugh E. Janssen, Norman O. Kirby, Jesse D. Thompson and William A. Kovalsky.

Also, Dennis R. Olson, Edward L. Gearhart, Martin J. Pflaum, Bernard D. Carter and Frank R. Chase, adviser.
It's that time of year again when a girl's fancy turns to "visions of a new wardrobe" for the change in seasons. Not all girls at SIU have dreams of wearing Paris fashions, it seems. In a recent poll, none of the girls interviewed reported having dreams of carrying the new fashion sticks or wearing the fashionable bootleggers. These fashion sticks, or swagger sticks, are made to give a jaunty new look to ensembles. They come in checks, polka dots, solid colors, oiled walnut, silver, brass, and for evening wear, they are covered with lace. The bootleggers are knee-high stockings cuffed and closed with a shoe lace, giving, from a distance, the appearance of a boot.

Evidently, most students tend to go for the basic even when they are pretending that they have all the money they need to buy clothes. Marcia Johnson, Olney, listed as her dream wardrobe "loads of suits with basic cuts, matching heels and gloves, pastel coats and very feminine pastel colored lingerie."

Several girls at Wilson Manor agreed that they would like to have some neat outfits with matching heels and gloves, hats, and all types of swim suits. Mainly, the girls dream of having all their clothes in a feminine style. Diane Keller, Carbondale, envisions her wardrobe stocked with suits, shoes to match all her outfits, a handbag to match every pair of shoes, all kinds of coats, kid gloves, and simple cocktail dresses. Mrs. Keller prefers the casual look and tailored clothes. For the summer, she would like to have all village outfits.

Bea Allen, Farina, thought she would probably go on a "coat kick" if she had all the money she needed. She said her wardrobe would consist of three or four regular coats, three or four coats for dress, and the same number of spring coats. Some of her coats might have a fur collar but she really didn't care enough for mink to want a mink coat. Also included in Miss Allen's wardrobe would be all kinds of slacks, shoes, and purses of various colors. "I wouldn't want any of the fashions from Paris. I'd rather stay with New York styles."

She indicated that she would rather buy clothes for work instead of school, including sweaters, shorts outfits, windbreaker jackets, beach clothes, ski jackets, boots, and skirts. For formal wear she would prefer cocktail dresses with full and feminine lines, preferably in chiffon and satins. All the girls seem to be interested in frilly, feminine wear so perhaps their fancy doesn't turn completely to "visions of a dream wardrobe," just visions of a dream.
In All Shapes

Pants Featured This Spring;
Stretch, Bell-Bottom, Culottes

It's pants, pants, pants everywhere this spring, and pants in all shapes. Smooth-fitting, slim stretch pants still lead the way, but joining the pants parade are bell-bottoms, full-skirted culottes, shirt-cuffed bottoms, stovepipe shapes that are hip-slung and dead-eye straight from the knee down and stiletto-skinny styles that fan out into accordion pleats at the bottom.

And some pants even cease to be pants at all—they're cropped off just at or above the knee and turn into components of pant suits and pant dresses. Jumpsuits "play a big role for action or leisure."

The long "poor boy" sweater gives impetus to the styling of many of spring's most important tops. Ribbed and body-clinging sweaters have much shape, and new lengths extend to the knuckle or the knee. Dressmaker details enhance the feminine beauty of still other sweaters.

Then there are easy, colorful little toppers to wear for more casual moments, with skirts or carefully co-ordinated to pants—themselves a big factor in sports-wear news.

Soft, womanly appeal is high in skirts that are gently shirred and rounded over the hips, and skirts with pleats, some boxy in style, some multiplying in narrow widths. Casual dresses from sportswear departments take to shift and skimmer lines. The shift moves closer to the body, giving a subtle shaping. Disarming details include the ever-present ruffles and flounces. Fabric interest is dominant in the basically-simple styling, with representation for everything from delicate sheers to mad madras to new crochet-type knits.

Soft, ladylike appeal is high in skirts that are gently shirred and rounded over the hipline, and skirts with pleats, some boxy in style, some multiplying in narrow widths. Casual dresses from sportswear departments take to shift and skimmer lines. The shift moves closer to the body, giving a subtle shaping. Forecast

Soft Look For Spring

Starting with the theory that individuality is the essence of good taste and good fashion, new spring styles develop the soft, feminine, ladylike look in a diversity of pretty ways.

Silhouette centers around slim, gentle shaping that follows and glorifies the feminine form without tightly "fitting" it. The line is slender, supple, subtly mobile. Color and fabric contribute to the gentle loveliness.

All in all, the fashions of this new season represent a gathering together of recent fashion trends. The skinny shape, the now-classic A-line, the lively skirt, the feminine touch of ruffles and bows—they've all been seen before, and they're seen again for spring '65.

Yet, spring fashion sums up tried and true ideas so deftly and delightfully that the total result is very fresh, very new—looking indeed—a new in sophisticated simplicity, new in youthful service, new in excellence of fabric and tailoring, in every price range.
Perfumed Nail Polish

Latest in Sly Feminine Lures May Turn Males Continental

Perfume may do for hand-kissing in America what it has done for that All-American pastime known as ear-nibbling. Girls who once relied on a dab of perfume behind the ear to draw their beaus a bit closer can now switch to perfumed nail-polish to lure a kiss on the hand—if she goes for that peculiar continental touch.

The polish is offered in a choice of eight shades, each with a different perfume fragrance ranging from heady to sweet.

A dab of perfume behind the ear with choice can now switch to perfumed nail polish ranging from heady to sweet.

Men who like plaids, checks and iridescent caftans—those who choose from, too, trench coats—continue to find approval with fashion-minded men who like the smart military lines of those belted double-breasted models. These, too, are available in a wide range of fabrics and colors.

All in all this season's top-coats will give a man room to move in, while he still carries that slim look.

Dresses go out on their own this spring, and they're getting along great. The dress-jacket or dress-coat costume, in recent seasons almost the only news in the "flouncy dress" picture, is getting strong competition now from the "separate" dress, styled to wear under a "separate" coat or coatless, in warmer weather.

The two-piece dress is an important factor in this spring success story. It can look like a one-piece dress or exactly what it is—two parts, often with an elongated top and a skirt that slumps above a simple dress.

The dress costume continues strong, as a companion with the individual dresses. Coat and dress duo looks especially important; dress and jacket are very much a part of spring.

In separate dresses or costumes, pleated skirts, blousons and soft shaping compose the silhouette news. Waistlines slide from the high empire line to the low hipline, with many resting in between.

But that's only the beginning. The biggest excitement of the season is in skirts, They're alive, they're fun and they fit into the modern woman's active life. Ranging from the now-classic A-line to the flared plaid or tucked-in fashions, the feminine look rules supreme.

Bodices take to soft blousing, or follow the slim long lines of the "set-away," high-cowled Chelsea points, or absent altogether. Scarves, bows and ruffles lend the feminine touch to many of the silhouettes.

Among the important styles are the double-breasted coat-dress and the tunic dress. Shift and skimmer dresses abound and apparently have entered the realm of the classics, along with the shirtwaist and the princess dress.

Soft, pretty detailing, such as shirring, pleats and ruffles dress up the shirtwaist, for a beautiful spring.

Textured stockings

Add New Patterns

Textured stockings, possibly the biggest news in wearing apparel since the fig leaf, are stepping out for spring with even more importance—and more fashion excitement.

In keeping with the mood of the season, new textures are sheerer than ever, lacy and more delicately patterned.

Diamonds, a favorite pattern during the fall and winter season, appear in this season's textured tights, but the designs are fresh, new and dainty. One stocking design is a tweedy texture, and displays a random stripe with a lacy diamond pattern.

Mesh and diamond design is still another approach to the textured look in hosiery. Other spring-fresh designs feature leafy fern, pin dots or soft patterns reminiscent of sea shells. Honeycomb pattern for still another textured stocking design has the added touch of gentle glitter for a sunny spring.

Herringbone patterns, miniature floral designs, checks, even dominoes beleck stockings with new textures.
It's 'Mod' in England

'Ye-Ye' Style Here For Spring Coats

Coats on the skinny side, but superbly soft and supple, provide ladylike coverage for spring's "gentlewoman" fashions.

On the narrow line to '65 there are nearly tailored coats with high shaping, and sometimes a flare at the hemline. In soft focus are coats with deep dolman sleeves or bell sleeves, and a general feeling of easy blousening above the waist, paring down to the slender look at the hemline. Single-breasted styles take the lead, but there are plenty of double-breasted coats about for those who prefer them. A refreshing new look evolves from fly front closings for both coats and suits. Newest of all looks stems from the return of an old favorite, the wrap coat—prophetic, some experts believe, of a whole new approach to fashion. Some wrap coats are slim, designed to be held close to body; some swing out at the hemline; some are cut on the bias. All agree on an ease of movement, an air of grace. Other influences on spring coats are expressed in such words as "mod," "ye-ye," "Chelsea." In France it's "ye-ye," in England it's "mod," and in coat fashions for an Americans spring, the look shows up refined and feminized, with high, set-in sleeves; high, softly shaped bodices; skinny lines with a touch of ease. It's a young look, and so, too, is the Chelsea influence, a less recent arrival from England. This spring's Chelsea look is stamped by long pointed collars for coats. Equally youthful are coats that take their inspiration from the Norfolk jacket—long-waisted, often with slip-through fronts.

SANDRA ARCHER (LEFT) MODELS A WHITE SPRING COAT. MARGE CARTON WEARS A BLACK AND WHITE MODEL FROM KAY'S.

Style Conscious Chicks

Spring, Summer Or Fall
SIU Coeds Dress Best of All

"Oh, yes—yes, in springtime, summer, winter, and fall, SIU coeds are the best dressed of all."

Just how fashion conscious are SIU coeds? Reaction from Carbondale merchants dealing in women's apparel indicates that, on the whole, they are "extremely fashion conscious."

For instance, Mrs. Bette Miller, owner of B. Miller's, thinks that "in comparing our girls with University of Illinois and Murray girls, SIU girls are much more style conscious."

"This applies mainly to upper classmen," she noted. "Freshman girls usually look around for a couple of terms to find out what they should be wearing," and soon they become as style conscious as their upper-classmen rivals.

Mr. Julius Kay, owner of Kay's, indicated that he thought SIU coeds were "very definitely" fashion conscious. "If it's new, they'll buy it, in my opinion," he said.

"We buy style. If it's new, I'm going to show it," he continued.

Mr. Geer, owner of the House of Millhunt, had this observation: "SIU girls are fashion conscious, but not as much as in the big cities like Chicago or New York. It takes time for them to become aware."

Also, climate and the area have a good deal to do with fashion here, she noted. In Carbondale there is not as much need for wools because of the early spring and late summer—and girls here go in to different fabrics at different times of the year.

"The colors are more basic," she said, with many girls rejecting some of the high fashion shades. Shocking green, for example, does not sell well here, she noted.

Mrs. Church, owner of the Ruth Church Shop, said, "They go for new things that are not too far out."

SIU coeds are much more for shocking colors in sports clothes, but not so much in dresses, she said.

"Girls here compare very, very favorably with girls in other areas like Chicago," she continued.

"I couldn't commend them enough."

Mrs. Tucker, a clothing buyer at Bleyer's also feels that SIU coeds are extremely fashion conscious. They buy a lot of bleeding madras, plain patterns and patch work, she said.

"Americana" look-red, white and blue—is quite popular.

Testimonial seems to indicate that at least some SIU coeds are fashion conscious. They may ridicule the trend, for example, but they do not really care.

Flowers, Helmets Are Headliners

Coverage for teen heads highlights the helmet by day, flower adornments by night. Refinement in the headpiece is evident in new straws, and in fabrics woven to look like straw—airy and open or with texture in miniature. Realistic flowers and petals blossom softly, completely covering many hats, or adorning others. Fabrics sheer and silky shape turbans and other head-hugging hats, veiling wraps many Spanish look styles.

Furs Flatter Fem Fashions

Little furs with flattering feminine details highlight spring's gentle look in fashion. For colors look bland with and accent the soft, pale shades forecast for this season. The styles take many shapes, from small capes and stoles to boleros, jackets and wraps.

A significant influence for spring is the short, shaped jacket which levels off at the hipline or above. Shoulders are narrow and small; sleeves just hip length above the waistline. Fur jackets feature a belted effect.

Little boleros appear in a variety of distinctive and intricate designs. One such jacket, in mink, is bloused in tricote designs from any angle. This is achieved with everything from bows to soft shaping.

Another news note is the little brims tilt gently out and around the head, preening sweep back to show a pretty face, little hats tilt forward and then turn up their little brims, again to reveal spring beauty, some brims slant toward the side; some ripple from front to back; still others stand out jauntily and smartly.

Provocative idea appearing in many styles of spring hats is back interest, for femininity from any angle. This is achieved with everything from bows to soft shaping.

Another news note is the hat with snood, as interpreted by several designers. Under, usually, a brimmled hat is a color-matched snood. For more back interest and swiftness, Hat and snood can be worn together, or either can be worn alone.

Not for Guys

Girls Dress For Whom?

This may come as a jolt to some male egos, but girls— as a general rule — just don’t dress to flatter men.

"Oh! They may if they are after a particular one," an ISU coed said. "But as a general rule men — and other girls — are the last people in the world a girl thinks of when she dresses."

Who then? you may ask.

"They dress to flatter their own self image, what they would like to look like or think they should look like," the coed said.

But she and a number of other residents of Woody Hall admitted that coeds do influence each others’ manner of dress — particularly where what others are concerned.

For example, it might be easier to get into Woody after 11 p.m., without a late pass than it is to move in without a pair of white sneakers, particularly after you’ve been on campus one term.

The same goes for those patterned hose that caught the fancy of so many coeds, much to the disappointment of young men who admire a well-turne ankle unencumbered by the faddishness of fashion.

"College girls wear what other college girls are wearing," one coed explained.

"While at home during the summer, they sew and gather ideas. Such important decisions as necklines and hemlines, and fads such as bulky sweaters, usually wait until they return to campus to see what the others are doing."

Fashion magazines, surprisingly, do not dictate what girls will wear.

"We look at them, to be sure," a coed said. "But not to decide what to wear, rather to express our opinion of what we like what the models are wearing."

"As a general rule," she continued, "girls look to no one in particular to gauge their dress."

"We may run with the pack on certain items like the new patterned hose or the bulky sweaters, but most of us won’t go in for a new style just because it’s new. We have to feel that it’s for us before we really buy it.

VARIOUS FASHIONS

To you, spring is a state of mind. To us, it’s fashion. We’d love to show you our dresses, suits and sportswear, cocktail and evening clothes.

SPECIAL FASHIONS

Fur colors both blend with spring’s pastel glow. One seal, black-dyed Alaska fur jackets and wraps. Little furs are narrow and small; sleeves just hip length above the waistline. Another Lakoda suit has variety of distinctive and intricate designs. Fur jackets feature a belted effect.

Jewelry Covers Beauty Faults

Choose fashion jewelry to help correct beauty "faults," as well as complement costumes, recommends the Jewelry Industry Council.

Round faces, for example, will seem more oval if earrings are slender instead of square or round. Fingers will look longer and more tapered if the fashion ring selection has an oval or diamond-shaped stone. Wide bracelets are flattering to thin arms; a full neck appears more slender if the necklace is a long single strand with pendant.

Whatever the choice, there's an exciting array available at jewelry or department stores this season.

Swimsuits by Bradley

Just one from our new collection of Bradley swimsuits in many exciting new fashions for all ages, sizes, and color groups. This particular style has a cotton print bandana, ruffle top and stringless bottoms. Red or blue in sizes 10 to 20.

Leslie's Shoes, Inc.

210 S. Illinois
Carbondale
Shoe store windows resemble Easter egg baskets with their arrays of pastel colors as the spring shoe fashions make their appearance.

There are dozens of different tones in pink, blue, green, yellow and lavender, with a sprinkling of delicate apricot to bright orange.

Suede is the big fashion leather for spring, and takes pastel tones beautifully. Sometimes it is combined with polished calf for contrast, more often stands alone.

A variety in suede finish is a slightly pebbled look called corkette, which has a depth of texture. There are a few deeply napped suedes, used mostly for sports shoes. Richest colors are seen in the standard brush finish.

Other leathers that are big on the fashion picture are patent, both smooth and grained calf, Calcutta Hazard, ostrich and reptile. Fabric shoes include linen, bar tuck trimmed in calf, nylon mesh, straw, embroidered or printed silk, and heavy lace.

Many shoe designers have combined two or more colors in freestform lines.

**Fashion Gets Kick**

Out of New Stick

NEW YORK (AP) — They're absurd, expensive and unless you're trying to maul a mugger—useless.

Even the man who dreamed them up breaks out in helpless laughter when he talks about them.

Naturally, then, the inexplicable world of fashion has taken them to its capacious bosom. Fashion sticks are well on their way to being the most chic accessories to make the summer scene.

"They'll be the Hula hoop of fashion," a Fifth Avenue store buyer says enthusiastically, as show windows up and down the avenue sputter with new zest with color and motion in skirts.

Important entrant is the leather belted suit. Silhouette here focuses on a hipline jacket, softly belted below the natural waistline.

Consume suits are given new zest with color and fabric. There is hardly a suit that puts it right.

Suit Looks Shape

Sportswear Picture

Shaping up in the sportswear picture are suit looks — jackets, skirts and tops to put together with ease. Jackets are longer, in take-your-pick designs, including belted and skinny, open and blazer, or precisely tailed and tailored. Some jackets show up sleeveless, the better to show off blouses with important, fuller sleeves to prettify the neckline interest.

Spring's gentle, graceful motion is marvelously built into the coordinated suits, which take their ease with gathers, low-placed flounces and pleats galore.

Flatteringly Skimming

Short, Full Skirts Are Hip for Spring

Floating into spring, gentle young suits are all-girl with their pretty pastels, refined fabrics and moving skirts. Following the lines of the figures, they are neither indented sharply at the waist nor too boxy. They are just flat-teringly skimming.

The official edit is "longer jackets"—out the day of the uniform is past. There are hip-level jackets for those who look best in them, and top of the hip jackets that go well with the shorter, fuller skirts.

And skirts are shorter and fuller! High-fashion length shows the knee, more conservative skirts end just at the knee.

Suit skirts are full of charm as well as full. They are gathered or pinched-pleated from waist or hip. They can have inturned or unpursed pleats, but the big commotion is about motion in skirts.

The various types of pleats continue, with a fresh move toward the dirndl or gathered skirt.

Jacket shaping moves to the front, with easy back, shoulders rounded and tailored. Some jackets show up with important, fuller sleeves to prettify the neckline interest.

Important entrant is the leather belted suit. Silhouette here focuses on a hipline jacket, softly belted below the natural waistline.

Consume suits are given new zest with color and fabric. There is hardly a suit that puts it right.

Students Look Alike

Their Rage for Individualism Often Succumbs to Conformity

By Stan Nicpon

College students pride themselves on being individualists. But, are they really? The first noticeable characteristic is their dress. It would seem lately that one SIU student looks the same as the other.

First, notice the coat...a rubberized hooded garment that looks like a World War II Army issue. Paint a little camouflage on them and one might swear we are living in Saigon.

Next, take the madras shirts. If one ever gets caught in the rain, he could enter the Spring Festival as the tattooed-man.

Finally, add a wrap-around skirt for coeds, chino pants with no socks, and the picture is complete. The individualist has become a conformist.

In regard to this subject, several faculty members had some comments. One said, "I don't care how the students dress, just so long as they try to conform by taking a bath and combing their hair."

Another replied, "These students are old enough to know what they like and dislike. Why don't we just leave them alone."

CARBONDALE
Trousers Technology Offers

Wrinkle, Rain Resistance

In the world of sports the terms "press and stretch" are generally associated with weightlifters.

However, in the field of men's wear they refer to the newest advancements in the construction of clothing, furnishings and sportswear. Permanent press applied to suit trousers, slacks and rainwear needs little, if any, explanation of its advantages. The latest of the permanent press processes is baked into the garment after it has been tailored. It is said to be impervious to washing and dry cleaning and will even defeat the heaviest summer deluge.

No need for unkempt, wrinkled pants or raincoats from this time on. Stretch, introduced a year ago, has made rapid strides both in usage and acceptance. Its most recent use has been in dress shirts where the expandable yokes give for extra collar comfort and also provide an expansion to the popular tapered shirt bodies.

Stretch also scores strongly in summer slacks. Here it offers the wearer the trim look with added freedom of action. Stretch raincoats have a double value. First is the no-bind elasticity of the coat, second is the fabric itself. The fabrics are woven at their greatest expanse, then allowed to contract to their normal width. This gives them a dense, highly compacted construction that, aided by water repellant treatments, helps in shedding the heaviest rains.

So, stretch seems to have brought the answer to comfort with the pressed look.

Plain Sportcoats Gain Popularity

Unpatterned spring and summer sport coats have taken a definite upswing this year.

Patternless wools, silks, cottons, linen blends, denims, and man-made fibers are among the season's new fashion leaders.

The plain shades, frequently with textured surface weaves, are made in both traditional and contemporary models and the colors range from deep navy blues and blacks to pale pastels and off-whites.

Men who favor the bright bold plaids, checks and stripes in their casual coats will find no lack of those, either. Brighter madras on lighter nailing tracks of seersucker weaves incorporating altered traditional clothes. There's even room for double values. First is a pinch of the old pin-tab collar comfort and also provides an expansion to the popular tapered shirt bodies.

Traditionalists will like the newly developed combination weaves incorporating alternating tracks of seersucker and denim. Regular seersuckers will score again in their casual coats will find no lack of those, either. Brighter madras on lighter nailing tracks of seersucker weaves incorporating altered traditional clothes. There's even room for double values. New Collar Styles Make Their Debut

While the button-down collar is still king, it is getting a lot of competition from some of its would-be usurpers this spring.

There are, for instance, the "pin-on" collars. These, varying in length and spread, can be worn as-is, or secured with a Clip and look great either way. Among the pin-ons are the "buttonless" button-downs, actually buttondowns without the buttons—a growing favorite with college men and old grads, too.

Casual shirts are offered in the sprad collars of varying heights and lengths and by snap tabs. A good revival is the round pin-tab style that goes so well with French seams, oxfords, broadcloths and end-on-end madras and are all very "in".

Stripes are even more popular this spring than they have been in the past. Simple stripes of varying widths are now supplemented by double and triple colors on both white and colored grounds. There are also striped versions and combinations of narrow and wide stripes.

Among the new "performing fabrics" are polyester tricots stripped with nylon, and several new blends of polyesters with cottons in both oxford weaves and broadcloth.

Men's Fashions Will Be As Bright As Peacocks This Spring, Summer

By HUGH THOMPSON
Copley News Service

CHICAGO—Color is the key to men's spring and summer 1965 fashions as never before. Fashion writers here for the annual clinics of the American Institute of Men's and Boy's Wear found as they toured manufacturers' exhibits set up for the annual convention of the Men's Wear Retailers of America that spring and summer lines in every category sparkle with lighter, brighter tones.

Color, which has been the most talked about and least sold facet of menswear for a number of seasons, seems to be coming out of the wings onto center-stage at long last. Texture also is playing a leading role in menswear fabrics for the coming seasons. Silk and linen effects, slub weaves, crisp cords,섯숙서 and coarse homespuns are being used.

Many of these are appearing in blends of man-made and natural fibers, such as combinations of the polyesters with wool, cotton, silk and linen. The trend to lighter shades is continued in suits for the warmer months, and even dark suitings are brightened with undertones of lively color. Iridescent and multicolor effects lead in fashion suitings, many with the lustre of mo-hair or the look of silk.

In cut, body-tracing lines are noted in all established models. In slacks and walking shorts the slim, tapered look prevails. Stripes, checks and plaids crowd the solid colors in shorts, with madras and seersucker continuing high in popularity. White is appearing in both slacks and shorts, and gaining new popularity because of its ability to team with blazers, jackets and shirts of every other color.

Sport coats are in three varieties. Blazers are continuing strong in an ever-increasing color range. There are patterned jackets for resort and country wear and many quieter styles for town wear. Light-ground plaidings and checks seem the most popular. In all but the most traditional models, subtle shading—as in suit coats—appears.

Functional is the word for the new casual wear, Golf jackets, beach pullovers and sailing parkas (with hoods) have the attractive dimension of color as well as the practical details demanded by sportsmen.

In the sport shirt picture, the shirt-jac has the commanding place. Stripes spark the dress shirt offerings, with the short-sleeved model apparently well entrenched. Buttons down collars appear in a wide variety of adaptations in both dresses and sport shirts. Stretch materials, which made their bow in a big way about a year ago, are appearing in every category from suits to slacks to shirts and raincoats.

Room at the Top

Designers found that there was room at the top when they styled the new slacks for spring and summer 1965. A great deal of attention has been paid to waistband and pocket details. Some slacks come with their own belts—some matching, others in smartly contrasting solids and stripes. Others mail the wanted golf slack details—big pockets, big comfort, big style!

Give Yourself that Distinctive Look --

Your personal appearance has a great deal to do with the impression that you make.

A well-groomed look can be doubly impressive when you have the proper hair style that accents your personality and features.

Through modern technology your hair can be conditioned and straightened, and shaped into the particular style that you desire. Henry Benton, men's hair stylist, can accent your personal appearance to give you that well-groomed look.
