Director optimistic on campus housing

By Jan Tranchita
Daily Egyptian Staff Writer

The on-campus housing situation isn’t as bad as the housing director expected.

For a man who once expected 1,000 vacancies in campus dormitories, Samuel Rinella sounds optimistic when he talks in figures.

“We did a lot better than we anticipated, although not as good as last year,” Rinella said. Only 400 vacancies in student housing are left after a busy weekend of dorm check-ins for new residents.

Rinella said that students are not filling contracts by deciding to live at home and many came to school without housing, he said.

Bruce Towers is full, Rinella said. A few isolated vacancies exist in the Thompson Point and Mae Smith buildings.

“Looks like we might have five vacant rooms in Neely Hall,” Rinella guessed. This may change when visitation takes place later this week.

“Every student has the right to determine his own visitation hours,” Rinella said. If somebody doesn’t like the plan adopted by his floor, he can move to another that suits him, he explained.

Rinella has termed this venture in allowing unrestricted change a first for SIU—an “administrative nightmare.”

He expects to have things figured out in the next two or three weeks.

There are possibilities that require room changes may not be as easy as moving all the dwellers in, Rinella admitted.

“Changes will be handled with each floor’s individual policy, certain students who will be moved to different floors that offer their preference in visitation hours and students requesting single rooms. Visitation will be held Thursday and Friday. When the ‘visitation shuffle’ is finished, those non-empty floors in Neely Hall may not be so vacant. Rinella said women likely have greater choice in room switches due to the amount of space available in particular buildings. Men will have things a bit tougher, he admitted.

Rinella said vacancies in Small Group Housing are uncertain because many fraternity and sorority members move into houses later in the quarter. Two buildings, however, have been rented to the University for the use by the new law school.

Building 113 and 114, renamed Wakerland and Kaplan Hall, were turned over to the law school Sept. 1 for use as library and office space. The other 12 units will be occupied, one by the SIU track team. (Continued on page 2)

Leaders claim success

McGovern tour praised

By Randy Thomas
Daily Egyptian Staff Writer

Local Democratic officials and candidates agreed Tuesday that Sen. George McGovern’s campaign appearance at the Southern Illinois air port in Carbondale was an overwhelming success and that support for McGovern in Southern Illinois is swiftly gaining momentum.

Ray Cheney, Jackson County Democratic chairman, said he was extremely pleased with the turnout at the rally.

“McGovern is a fine individual,” he said.

The candidate spoke for about 30 minutes before a cheering crowd of supporters officially estimated at about 2,000 to 2,500 by Jackson County Sheriff’s office.

McGovern spoke privately with newsmen and attended a reception in his honor sponsored by local democrats before finally boarding his campaign jet and flying to Chicago.

In his speech, which was interrupted several times by the cheering crowd, McGovern attacked the Nixon administration for poor domestic economic policies, failure to check the rising rate of heroin addiction in the U.S. and for his failure to end the war in Vietnam.

When asked what kind of support McGovern is getting from local democratic officials, Cheney replied that as far as he knew, no one turned down an invitation to attend the rally. He said out of 24 counties in the 24 congressional district, 16 county chairmen attended.

“McGovern is doing real good in Jackson County and better every day in the surrounding counties,” commented Cheney.

Bruce Richmond, mayor of Murphysboro, was pleased with the turnout at the rally. He estimated the crowd to number about 3,000 and said many more would probably have attended had it not been for traffic jams. Traffic was reportedly backed up on Highway 13 all the way to Carbondale and halfway to Murphysboro.

Several intended speakers, including Carbon- dale Mayor Neal Eckert and SIU President David Dorge, arrived at the rally late due to the traffic.

Richmond said he was a Democrat, but he didn’t find anyone to support McGovern.

“When asked if he would support McGovern if he wasn’t a Democrat, the mayor replied, ‘I didn’t really think about that. I will say however, I am not voting for McGovern just because I’m a Democrat.’

As for McGovern support in Murph- sboro, Richmond replied that for a while he felt many local democrats weren’t particularly overly with their candidate. He did say however, that support for McGovern is now picking up.

Richmond said some local officials did not attend the rally which he attributed to traffic jams. When asked if there might have been some reason for their absence he replied, ‘I wouldn’t be a bit surprised.’

James Holloway, state representative from the 27 district and a resident of Sparta Illinois, termed response to the rally as being mighty fine.

“I am definitely and McGovern supporter all the way,” he said. “I went to the convention in Miami, and though other candidates were equally qualified to carry the party standard, from the moment he was selected, McGovern was my candidate.”

Holloway believes that initial response to McGovern has been ham- pered by a lot of bad luck.

“McGovern got every bad break possible, politically and otherwise,” he said.

“The campaign got off to as bad start as it possible could have.”

Bike registration program stalled

By Tom Finan
Daily Egyptian Staff Writer

Plans for the development of a mandatory bicycle registration program at SIU have reached a stalemate pending action by administration officials, Andrew Powell, chairman of the committee on bicycle traffic, regulations and parking, said Tuesday.

Final stages of the program being developed by Powell’s committee call for adding new parking space for bikes, creating new paths and new bike racks. Currently the problem is finding $1,500 to buy stickers for the registration project. Powell said.

Edward McCue, assistant security officer said the Security Office is interested in the registration project solely because it will make it easier to recover stolen bicycles. “We plan to force people to take care of their

property,” McCue said. “But don’t plan to hassle them,” he added.

McCue said that the rate of theft of bicycles at SIU is not any higher than that at other university from what he has heard from security officers at other campuses, but said that it was a serious problem.

Bicycle thefts from January through August 25 totaled 268. This represented an increase of 14 thefts over the same period last year.

Of the chances for the registration project to receive funding, Powell said, “It doesn’t look encouraging at all.”

Powell said that he met numerous times with administration officials trying to get someone to make a decision, “but we just kept going in circles.”

“We have done as much as we can. Now it’s up to someone in the admin- istration to make a decision,” Powell said.
**Senators investigate Viet bomb strikes**

DENVER (AP) — Three of four senators investigating unauthorized bombing strikes against North Vietnam said Tuesday that former 4th Air Force commander Gen. John D. Lavelle apparently was the highest officer involved in ordering the raids.

However, Armed Services Committee Chairman. D-Mass., said he did not know when his group would issue its final report to the Senate on the bombing. The nomination of Gen. Creighton W. Abrams as Army chief of staff.

The preliminary opinions that Lavelle was the apparent top source of orders is based on reports made following a two-hour, closed-door meeting with Maj. Gen. Alton Sloan, Lavelle's former deputy chief of staff for operations.

In a statement released Tuesday, the chairman of the Joint Chiefs of Staff, the Senate bomb affair has been overplayed, but has not hurt the military.

The first time Adm. Thomas Moorer, the nation's top military man, commented in public regarding the affair.

In Lavelle's appearance before the Armed Services Committee, the former Seventh Air Force commander seemed to think Moorer had implied approval. He said it does not operate on the basis of implied approval. He never authorized Gen. Lavelle or anyone else to operate contrary to instruction, Moorer said.

Minn. Sen. Freeman.—with Sens. Peter Dominick, R-Colo., Barry Goldwater, R-Ariz., and Howard Baker, R-Tenn., took Lavelle's wheelbarrow testimony at Fitzsimons General Hospital, where Lavelle, who now heads the special training command at Lowry Air Force Base here, was said to be recovering from a Sept. 11 hernia operation.

Stennis was only the one of the four senators who refused to comment directly on the ultimate responsibility for the raids.

Dominick said that, according to the testimony of Lavelle and others, he felt that higher authorities never were told of Lavelle's new rules for engaging the enemy. He said such orders were "only permitted to wing commanders and subordinate officers."

SIU-E asks court to halt paintings' strike

Edwardsville (AP)—Southern Illinois University Edwardsville petitioned Monday for a temporary injunction against a strike by union painters in its fourth day.

A school spokesman said the strike, which began last Friday over a job dispute and injury, disrupted lowered mechanical systems on the campus to 15 percent of the normal load and shut down air-conditioning units.

More drug agents at SIU if more money is granted

If additional money is granted, SIU will be one of the schools which will get more drug agents.

Illinois Sen. Peter Rinella of St. Louis, who is investigating Director Richard Gliebe said Tuesday the agency is asking for $407,000 in additional federal money to be used to place 30 more agents at SIU campuses in Illinois. The area, the University of Illinois at Urbana, and in the cities of Peoria, Rock Island and East St. Louis.

In filing its request for the money, the IB, is asking that NIB be limited to hard drugs because it could be more profitable.

Gliebe said there was a $3.2 percent increase in the number of persons arrested in Illinois for selling heroin or cocaine during the fiscal year that ended June 30. In addition, he said, the IB had confiscated $1.1 million worth of heroin, or 32 times the amount seized in the previous fiscal year.

**AP Roundup**

**Press conferences weekly if elected: McG**

NEW YORK (AP) — Democrat George McGovern said Tuesday that, if he were elected president, he would hold press conferences at least twice a month and forbid off-the-record background briefings.

In addition, McGovern said, Cabinet members would hold news conferences at least once a month, and Cabinet meetings would be open to the press. "Except in rare cases where the national security imposes a secrecy requirement."

McGovern's statement was in a letter to Hiller Kriegbaum, immediate past president of the Association for Education in Journalism.

Kriegbaum, professor emeritus of journalism at New York University, had written McGovern in August asking how he would deal with the press. He released McGovern's replying letter dated Sept. 11.

McGovern said none of his proposals is in effect now. He would institute them, he said, by executive order where possible and by legislation where necessary.

At presidential news conferences, he said, he would allow follow-up questions "to assure the answers are completed."

Background briefings, he said, would be for attribution to the official who conducts them.

**Irish guerrillas bomb store**

BELFAST — Guerrilla bombers struck Tuesday in Londonderry and Belfast after a night of sporadic shootings and bombings across Northern Ireland which claimed a man's life.

Three masked men, one with a revolver, placed a bomb in a supermarket in Londonderry. The building was cleared immediately. When the blast came an hour later, no one was injured, though the supermarket was wrecked.

In Belfast, a bomb placed in a factory did extensive damage to the boilerhouse.

The guerrillas gave 15 minutes' warning, and no one was injured, Army experts estimated the bomb contained about 50 pounds of explosives.

The explosions came after a night in which British troops claimed they captured a guerrilla sniper firing from near a Roman Catholic convent in Lurgan and shot another in the Catholic stronghold of Ardoyne in Belfast.

One soldier was wounded.

---

**Upholclassmen stay on-campus housing**

(Continued from page 1)

No figures are available on the percentage of freshmen and continuing students living in university housing. Last year's figures were 85 percent freshmen and 35 percent continuing students.

Rinella said more upper classmen have remained in campus facilities after the relaxation of visitation hours last year.

$12 million increase in state scholarships for students

CHICAGO (AP) — The Illinois State Scholarship Commission Tuesday it anticipates granting $81 million in scholarships to 72,000 students for the fall term.

The executive director of the commission, Dr. Joseph Boyd, said approximately 89,400 scholarship awards were made but he expects the 17,000 students to dissuade themselves for such reasons as moving out of state and studying only part time.

Another $3.5 million is to be awarded in tuition grants to some 30,000 veterans enrolling this fall in public junior colleges.

Last year about 56,700 students received $39.4 million in state scholarships.

**More drug agents at SIU if more money is granted**

If additional money is granted, SIU will be one of the schools which will get more drug agents.

Illinois Sen. Peter Rinella of St. Louis, who is investigating Director Richard Gliebe said Tuesday the agency is asking for $407,000 in additional federal money to be used to place 30 more agents at SIU campuses in Illinois. The area, the University of Illinois at Urbana, and in the cities of Peoria, Rock Island and East St. Louis.

In filing its request for the money, the IB, is asking that NIB be limited to hard drugs because it could be more profitable.

Gliebe said there was a $3.2 percent increase in the number of persons arrested in Illinois for selling heroin or cocaine during the fiscal year that ended June 30. In addition, he said, the IB had confiscated $1.1 million worth of heroin, or 32 times the amount seized in the previous fiscal year.
Campus lake remains open for only two more weeks

Swimming and boathouse facilities on the Campus Lake will be open from 1 p.m. to 6 p.m. daily (weather permitting) until Oct. 8 when the beach facilities will close for the winter, said C. W. Thomas, assistant coordinator of recreation and intramurals.

Beginning Oct. 10, the boathouse will be open on weekends only from 1 p.m. to 6 p.m. until Oct. 20 when the facilities will close for the winter. Picnic areas may still be reserved for use by scheduling through the Student Activities Office located in the Student Center.

The lighted tennis courts east of the Arena Building may be reserved on an hourly basis from 6 p.m. to midnight nightly until Nov. 5 when night use of the tennis courts will be closed for the winter.

Other tennis courts available for daytime use are located North of Small Group Housing and South of the University Trailer Courts on South Wall Street.

These students are soaking up the last bit of summer sun and relaxation before the school year moves into full swing. All too soon Campus beach will close, signaling the end of summer and the start of another year of books, books, and more books.

Bark...and bite

To the Daily Egyptian:

Your editorial about "Dog Days" is just what I wanted to hear today! As someone who has a stranger in the city, I realize the great number of dogs wandering everywhere. They bark on the streets, run about on the campus, beg for food in the parks and go swimming in fountains and lakes.

I, as President of the city, am glad that the dogs created any hazards or inconveniences to the residents or customers. Two days later I got my accident, I was hit by a bicycle. It was a nerve-racking thing. I had to find the owner to give him my health conditions, and report it to the police, and finally to see a doctor.

Although I was later relieved a little by the report that the dog has been cited in this area for many years, my mental health has suffered enough because of this incident.

Therefore I wonder why the city government doesn't take some justified measures to make the environment better and safer for the community.

Pet-eun Chun

Visiting Research Consultant

Of rats and men

To the Daily Egyptian:

For many new students at SIU the City of Carbondale, its government and programs seem alien, and they would like to breathe the air that should be of interest to students, especially those leaving home for the first time.

For the past two years Carbondale has had a workable Rat and Pest Control Department. The department, with three full-time people, is responsible for such restructuring might mean enhanced academic freedom. The changing role of the University is further evidenced by the recent establishment of a Division of General Studies. Dearge has designated this division as a senior public institution, meaning simply that this university's responsibilities will become more and more the training of graduate, professional and undergraduates. The IBHE has placed a 24-hour deadline on the university to have its new academic freedom program fully implemented.

The changing role of the University is further evidenced by the recent establishment of a Division of General Studies. Dearge has designated this division as a senior public institution, meaning simply that this university's responsibilities will become more and more the training of graduate, professional and undergraduates. The IBHE has placed a 24-hour deadline on the university to have its new academic freedom program fully implemented.

Another proposal calls for a possible three-year undergraduate degree program, which would be aided by an updated battery of proficiency exams. A student could proficiency a maximum of 45 hours. Again, the result would be a teaching emphasis in the major field of interest with declining emphasis on General Studies.

Academic excellence may be coming...

Last March President David R. Derge announced his goals for the university among the 13 distinguished universities in the nation in the area of educational excellence. It is doubtful he will ever reach these goals unless he runs in attitudes and policies are made.

In order to evaluate the educational level, Derge appointed a task force to study the university's management and governance system. He said its purpose would be "to help us do our job better, and for we're getting paid too much from every dollar spent."

He also launched a five-plan that would review the faculty resources in order to improve the teaching resources and public service functions for the University.

Derge also vowed that administrative regulations would be simplified without any increase in the administrative budget. But he reported the establishment of a $500,000 President's Academic Excellence Development Fund to help achieve the goal of educational excellence.

The fund was established with money from the sale of the University house to the SIU Foundation.

David R. Derge has stressed his "goals for academic excellence" since assuming the presidency of SIU. He has emphasized his hope that SIU will rise to the point of being among the top 10 or 15 universities in the nation academically. The University is presented as a model for restructuring in a changing role in structure and role. Several such changes will move SIU closer to its goal for academic excellence:

Under the Illinois Board of Higher Education's Master Plan Phase Three, SIU has been designated a senior public institution, meaning simply that this university's responsibilities will become more and more the training of graduate, professional and undergraduates. The IBHE has placed a 24-hour deadline on the university to have its new academic freedom program fully implemented.

The changing role of the University is further evidenced by the recent establishment of a Division of General Studies. Dearge has designated this division as a senior public institution, meaning simply that this university's responsibilities will become more and more the training of graduate, professional and undergraduates. The IBHE has placed a 24-hour deadline on the university to have its new academic freedom program fully implemented.

Another proposal calls for a possible three-year undergraduate degree program, which would be aided by an updated battery of proficiency exams. A student could proficiency a maximum of 45 hours. Again, the result would be a teaching emphasis in the major field of interest with declining emphasis on General Studies.

A program that will offer even more freedom for undergraduates is the president's degree program. The degree program will have no formal requirements for candidates for graduate degrees. Entrance will be on the basis of test scores and previous work, and therefore should attract top-notch students to SIU.

The administration has also proposed a restructuring of the Graduate School, placing each school in charge of its own graduate program. Current criticism is that such restructuring might enable requirements will vary between schools and graduate students may not be able to take courses in other departments. By the same token, however, each school would have a direct voice in establishing its graduate degree standards.

Another major change is the Graduate School has been met with approval by a majority of SIU students. Most SIU students had been barred from entering graduate degree programs in their own departments. The proposal is designed to eliminate conflict of interest, favoritism and lower standards since faculty member degree qualifications can be judged in their own departments. The plan would also offer protection for the student who might have an instructor more interested in studying than in teaching.

SIU has further exemplified its senior public institution status with the formation of the law and education boards. These two boards are responsible for graduate and undergraduate programs, and regulation as well. They are held to a higher level of academic integrity and quality.

Another academic excellence is possible at SIU. The problem is financial. With the state's reduced budget, charges that are needed, and the state's financial need, SIU can push its General Studies program into the background, attract its share of honor students with the president's degree program, and lower academic standards. By doing so, the University will become more of the needs of the students, and the state's financial need.

Academic excellence may be coming at SIU.

....but President Derge's goals doubted

On August 9, Derge removed any opportunity for students to have any effective say concerning the decisions of the University when he vetoed the University Senate of legislative and veto override powers.

Thus, Derge has effectively placed all power and authority in one person, the administrative clique. He has rejected the participation of the faculty and students in the governance process. Because of this attitude and policy direction, Derge has forgotten the basic goal he promised—that of academic excellence—for it is the faculty and students who give a University its purpose. And it is the faculty and students who will make it possible to attain greater educational excellence—not the administrators.

Unless Derge shifts some of the policy making responsibility back to the faculty and students, he can never see SIU as an educational excellence. He has lost the key to the administration's way of making things happen in the hands of the University president, they were correct.

Robert W. Smith

Student Writer
Conscience to absurdity

By Jenkins Lloyd Jones, LA Times Syndicate

A sensational article to the effect that the U.S. National Security Agency has cracked all the Russian codes and is immune from surprise has appeared in the left-wing magazine, Ramparts. It was anonymously written by a man who later identified himself as Percy Fellwock, 26, an anti-Vietnam war veteran and former NSA communications analyst.

Fellwock described the Soviet Union as an "inferior power" and said the U.S. military was "the most dangerous threat to world peace." If the article is true, many readers will conclude that we can rest assured of the Russians. Can we? It would be helpful, of course, to know a month in advance that Moscow is preparing a conventional armament blitz, but if we lack counterweapons, which require a lead time of years, we'd merely be in the position of the man falling out of an airplane who is alert to the danger but doesn't have a parachute.

In DAVID KAHN'S 1967 book, "The Code Breakers," which is probably the finest encyclopedia of cryptography ever written, the point is repeatedly made that code-breaking is essentially a business of exploring possibilities in an effort to catch a faint whiff of sense, and the most complicated the code, the larger the possibilities.

In the past, codes and ciphers were cracked by the sheer intellectual power of rare geniuses. But the computer has now arrived. The computer can immensely speed the survey of possibilities. So perhaps NSA has, indeed, cracked all the Russian codes, and perhaps Russian intelligence possesses all of ours.

America has come a long way from its age of innocence in 1929 when Secretary of State Henry L. Stimson withdrew his support from the Black Chamber on the grounds that "gentlemen do not read each other's mail."

We are up to our eyeballs in trying to read everyone's mail, friend or potential foe and for two very pragmatic reasons:

Every first-rate intelligence service in the world is trying to do the same, and the chances of making major strategic and diplomatic miscalculations are diminished in direct proportion to one's knowledge of what other governments are doing and thinking.

"People have a morbid fascination with spies, which the craft does not deserve. Clank-and-dagger stuff is of small importance compared to the wise analysis of overt information. The bug is less powerful than the clipping scissors. But spying can be more powerful than them all if spying is defined as the techniques of making it impossible for an opponent nation to defend itself. Spying includes psychological warfare, designed to mislead and confuse a potential enemy. It pumps up divisions within the victim country to produce irreconcilable splits and paralysis of will. The techniques may be used to scare people out of their wits, or, conversely, it may be used to assure them that the enemy is weak and unable and not to be feared.

Beyond this, there are the carefully nurtured cadres for subversion, usually planted in organizations that are "soft" but not subversive. These are designed to operate over a long term, with the purpose of turning these organizations into fronts. Beyond them are the saboteurs, usually called into action only when the crisis approaches. Most dangerous of all is the "man-in-place," one who has passed his survey and is ready to act if and when the crisis arises."

An issue you can step into

By Arthur Hoppe, Chronicle Features

The League for Planned Litters held an acute emergency session to discuss the Nation once again of the gravest threat it faces: The Dog Explosion.

The grim facts were laid on the line by Dr. Paul Horlick, author of "The Dog Bomb" and other frightening best-sellers.

In 1952, Dr. Horlick said, there were fewer than one million dogs in America. Today, there are close to fifty million. Thus, under the inexorable dictates of The Multinational Law of Population Growth, he said, the country will be forced to support the burden of 1.3 trillion dogs by the year 2000.

"The city of New York," he said, "already has 600,000 dogs who deposit an estimated 50,000 tons of dog plop annually. How long can the Island of Manhattan support this burden?"

By the year 2000, according to every reliable projection, we city dwellers will be up to our," the good doctor said delicately, "hips.

"In dogs?" inquired an elderly lady in the front row.

"Them, too," agreed Dr. Horlick.

+++++

As head of Zero Dog Population, an all-out dog-good group, Dr. Horlick advocates that city dwellers limit themselves to 0.6 dogs per family. He said most couples had dogs as the result of "yielding to a sudden urge without taking adequate precautions."

"Don't curb your dog," he said, "curb your desire for one."

Dr. Horlick cited three typical cases of why couples have unplanned dogs: (1) They pass a pet store window and are carried away by passion. (2) They feel a dog may save their marriage. (3) A dog follows their child home, usually at the end of a rope.

With modern advances in contraception, he said sternly, "there is absolutely no reason a couple should selfishly have an unplanned dog."

The safest and most reliable method of avoiding an unplanned dog, he said, was The Pill.

Dr. Horlick advocates The Rhythm Method. When an unplanned dog appears on the doorstep, he said, the Catholic couple should pick it up and "de-nude two"—beave it into the neighbor's bushes.

As for children too young for The Pill, Dr. Horlick feels strongly that every responsible parent should spray his youngster from head to toe with Dog-B-Gone before sending him out to play.

+++++

In summation, Dr. Horlick called on every American to sublimate his or her parental or natal feelings toward dogs and have a baby instead.

"If your glorious land is to keep its head above the mire," he said, "babies are the answer. Remember our motto: 'Keep Your Sidewalks Clean—Go Have A Baby.'"

The League—a coalition of postmen, joggers, cyclists and meter readers—gave Dr. Horlick a standing ovation before breaking into its theme song: "On the Sidewalks of Yechhi! New York."

In private, however, Dr. Horlick conceded that he saw little hope for the campaign. "Any reasonable man who has experienced the rewards of love, devotion and gratitude in raising children," he said glumly, "would rather have a cocker spaniel instead."
Auditions for ‘Fantasticks’ start Monday at Calipre

Auditions for the musical, ‘Fantasticks,’ will be at 7 p.m., Monday and Tuesday at the Calipre Stage, Communications Building.

‘Fantasticks,’ the longest running musical on an off-broadway stage, centers around the lives of two families who have built a wall between their houses. A daughter of one family and a son of the other fall in love and together learn to grow beyond the boundaries of any barrier.

There are eight rules to be cast:
one of two women and six or seven
men. A prepared audition for reading and singing is required and information on the audition can be obtained from the Theater, Speech or Music Departments.

‘Fantasticks’ will be directed by Leigh Steiner with choreography by Jo Mark. It will be performed on Nov. 10-12 and 17.

Silent film classics open on-campus movie season

By Glenn Amato
Daily Egyptian Staff Writer

Something—both good and bad, with the accent on the former—seems to be the rule for the fall program of films sponsored primarily by Student Government and the Southern Illinois Film Society.

Last year’s conception of the SIFS reduced the number of complaints concerning the lack of “quality” films shown on campus at reduced admission. Student Government, after all, was somewhat hamstrung by its need to appease the greatest number of people as efficiently as possible.

McGovern campaign week reported on WSIU tonight

Afternoon and evening programs on WSIU-TV, Channel 8, Sesame Street; 6—The Evening Report, 5:30—Mint-Rogers Neighborhood, 6—The Electric Company, 6:30—Outdoors with Art Reed, “Reservior Fishing at Elko County, Nevada.”

7—A Public Affair—Election ’72, “I Am the People.” WSIU-TV presents the “inside” opinion of a typical middle American’s view of the presidential campaigns. Richard Johnson spent a week on the campaign trail with Senator George McGovern in Texas, California and Wisconsin.

7:30—The Forsyte Saga, “The Silver Spoon.” In the continuing series, Marjorie’s libel suit against Fleur falls apart in court, but the victory fails to save Fleur from deepening depression.

8—30—The Session, “Calcutta.” This fantasy rock band from Carbondale combines talents from six men who play numerous instruments to present such selections as, “Music,” by Carole King; and “Nobody To Depend On,” by Santana.

9—The Movie Tonight, “Oil For The Lamps of China.” Pat O’Brien, Josephine Hutchinson, Lyle Talbot and Donald Crisp star in this story of a young oil company representative in China and his love for both the company and his wife.

This necessitated booking films like “Bullitt,” “Sweet November” and “The Madwoman of Chaillot,” all of which were intolerable, perhaps enjoyable, but impossible to discuss.

The SIFS took up this slack with screenings of “Citizen Kane” and “Wild Strawberries,” among others, which attracted more discerning and sophisticated audiences, but were still enjoyable to watch and conducive to retrospective conversation.

This season screenings begin at 6 p.m. Thursday in Shryock Auditorium with four successive evenings devoted to silent films.

The first is D.W. Griffith’s “Orphans of the Storm,” starring Lilian and Dorothy Gish. The slambang melodrama, which has a kind of cozy warmth, is set during the French Revolution.

“The Gold Rush,” directed by and starring Charles Chaplin, is Friday’s feature. Set in the Artic and concerned with the Little Tramp’s love for a dance-hall queen, it is, as the heralds justifiably trumpet, Chaplin’s greatest film.

Saturday’s film, “The General,” was screened last fall and richly deserves an encore. The comedy stars Buster Keaton and has a Civil War setting.

Lee Channer’s “The Hunchback of Notre Dame” rounds out the series Sunday. It is remembered chiefly as a horror film, but compassion and understanding for the world’s scarred and lonely people are equally in evidence.

One of the most dazzling, evocative and totally believable pictures ever made, Billy Pilgrim’s “Orphans of the Storm” is a time to time...
Dina Yellen touches up the 27-foot ceramic mural which won her an $8,000 prize in a campus-wide student art competition. She installed her mural in the Student Center this summer.

Student Center's new mural worth $8,000 to student

• The first floor Post Office in the Student Center has a new neighbor: an untitled 27-foot abstract relief mural.

The mural, a ceramic relief structure, was designed and constructed by Dina Yellen, who received an $8,000 commission and prize for winning a campus-wide student art competition.

• Ms. Yellen also completed a Master of Fine Arts degree. This summer she hopes to make her living as a full-time artist.

While at SIU she supported herself during the past six years by a variety of jobs-teaching one summer in a prison teaching knitting in an arts and crafts shop, selling notions in a store. During her studies at SUI she has worked part-time as a graduate assistant in the University Museum. But now she says, "I am totally committed to art, and I mean to live by it. I hope to be able to get commissions through architectural firms as well as private ones."

Before winning the SIU competition, her only monetary award was a $50 purchase prize at the Evansville (Ind.) Art Museum 1972 exhibition, but her work had been accepted previously at the 1971 Evansville show, the Illinois State Art Show in Springfield, and an exhibit at the Prairie House Gallery in Springfield. She also had appeared in several exhibitions on the SIU campus.

• The winner of the other phase of the Student Center competition, Guy B. Hughes of Okawville, Ill., a graduate student in sculpture, had to make some adjustments in the mechanism of his plexiglass and aluminum revolving work before completing installation.

Funds for the art competition were earmarked in the $5 million construction fund for enlargement and remodeling of the SIU Student Center, almost completed. The entire Student Center building program is financed by revenue bonds, with the revenue supplied primarily by student fees and income from operations. No tax funds are involved in the construction.

Guidelines for the art project called for one mural and freestanding sculpture.

SIU care explorers to meet tonight

Advisement and Registration: Program changes only. SIU Arena.

Proficiency and Placement Testing: 1 p.m.-5 p.m. Morris Library Recreation and Intramurals.

Registration goes on.

Prospects dim for printing 1973 Obelisk

The prospect of having a 1973 yearbook at SIU "doesn't look good at all," according to Jack Clark, prospective editor of the 1973 Obelisk.

The Obelisk currently owes its printing company $4,000 for the 1972 yearbook. Miss Clark said, "If we don't pay the debt, well, it is over."

Last spring, the Obelisk planned to receive $4,000 from the Student Senate to pay its printing debt, but the new fee allocation procedure stymied this summer's upperclassmen plans.

Miss Clark described the financial situation as "horrible." She said promises of $500 extra werestreamed from the fact that the 1972 yearbooks were not received until mid-July.

The Obelisk presently has $550 of 1972 yearbooks for sale at $3 each, about 500 of 1973 yearbooks at $4 each, about 1,000 1973 yearbooks for $1 each and about 250 1972 yearbooks at $2 each.

The yearbook can be purchased at the Obelisk barracks. Building 0609, starting Wednesday. The office will be open from 10 a.m. to 2 p.m.

Miss Clark said about 325 books are in the office which were paid but never picked up. Students who have paid for the yearbooks and did not receive them through the mail can pick them up at the office.

At the Arena, Don Wills of Housing Business Services advises Paul Kahil and Mary Muscat of Carbondale on housing regulations. At right, freshman Jim Hoffman ponders that confusing document, his schedule. Central registration activities will continue at the Arena through Friday, including late registration for new, re-enrollment and continuing students and program changes. (Photos by Dennis Makes)
CISCO sends an invitation: ‘Save Crab Orchard Lake’

By Bob Grupp
Daily Egyptian Staff Writer

Saturday is “Clean Up Crab Orchard Day.” Crab Orchard Lake, located six miles east of Crab Orchard, will be scene of massive cleanup effort by a Murphysboro group called the Committee Involved To Save Crab Orchard (CISCO).

The committee hopes to attract as many people as possible from the Southern Illinois area to help in the cleanup project, said Dr. Leon F. Striegel, a steering committee member from Carbondale. “We need a lot of workers out there Saturday to patrol the beaches, shorelines and roads for litter and debris,” Striegel said.

The project will begin at 7:30 a.m. and end by noon, Striegel said.

The objective of the cleanup project is to draw the attention of both the public and elected officials to the lake’s need for further work, Striegel said.

Illinois Senators Charles Percy and Adlai Stevenson III have been invited to attend the activities but Striegel said he was not sure if they could attend.

Striegel said over 15 organizations from the Southern Illinois area have offered their help Saturday. “The project has been very well supported from many organizations,” Striegel said.

A bass fishing demonstration, water ski show, archery demonstration and a Boy Scout troop performing their skills are also planned. Striegel said.

Nepalese university official completes SIU special course

By University News Service

Keshab Prasad Regmi, Nepalese educational administrator, has completed a six-month program of special studies at SIU emphasizing fiscal management in a multi-campus university.

Regmi, assistant registrar for business affairs at Tribhuvan University in Kathmandu, also held an internship in the office of SIU comptroller Donald R. Arnold during his training period.

He is the fifth administrator or faculty member from the Nepalese institution to complete an on-the-job training program at SIU under terms of a 1967 agreement of cooperation between the two universities.

His studies have included auditing courses on the history, philosophy, economics, staff management, and central administration of higher education.

Regmi also plans to visit a number of other multi-campus universities in the U.S. and the headquarters of the American Council on Education in Washington, D.C., before returning to his post in Nepal.

A Fulbright travel grant and a study grant from the Ford Foundation provided financial support for his studies at SIU and travel to other universities.

Other faculty or staff members from Tribhuvan University who have completed special training at SIU have included S. B. Shukla, acting rector; G. D. Shrestha, deputy registrar; K. P. Sharma, professor of economics; and B. C. Malla, professor of government.

Have we got a surprise for you!

Lake Michigan clean-up falls behind schedule

CHICAGO (AP)—A December deadline for controlling certain polluting discharges into Lake Michigan has not been met, a compliance section of the federal Environmental Protection Agency, spoke at the start of the fourth session of the LMEC, established in 1968 to help clean up Lake Michigan and its tributary basin in Michigan, Indiana and Illinois.

"The massive amount of schedule slippage highlights the fact that those areas of the lake most sensitive to pollution may suffer an enhanced water quality," Kees said. He cited a rather poor record of achievement.

"For only 1 of 14 waste sources subject to the phosphorus removal requirement are in final compliance or on schedule to meet the December deadline. Indiana, Kees said, has the fewest sources in the area with a lack of phosphorous control requirements affecting 80 per cent of the state's population.

37 industries identified by LMEC as waste dischargers into the lake. Three-fourths are in compliance or on schedule. But a private group, businessmen for the Public Interest, filed the complaint, said the convicted four industries in the four states which the group said were among major polluters.

"Three of 160 communities to date have submitted plans which have yet to fail do so although the deadline set by the conference was 1969. Another. Clintonville, Wis., was maintaining pollution facilities Sept. 8. "

"Under the pollution from sewers by 18 communities with a population of more than one million, awaits a 1977 deadline and. Kees said it was impossible to assess the presence of the complaints and details."

In a further breakthrough of compliance, Kees said Illinois was the only state on schedule with phosphorus removal requirements. In Indiana, 12, in Michigan, 32 of 43 sources are behind, affecting 25 per cent of the population. and in Wisconsin, 32 of 43 sources are behind, affecting 45 per cent of the population.

Three Illinois industries are behind schedule in waste control, including U.S. Steel Co. U.S. Steel in Gary, is one of two Indiana plants behind schedule. But a

American killed in Uganda

By The Associated Press

A former American Peace Corps volunteer who was killed and another U.S. citizens have been arrested in Uganda since last African nation began fighting off an invasion launched from Tanzania, the U.S. government said.

At the same time, the Ugandan government claimed its forces have "completely restored" the shape of the country. It said the enemy's weapons and vehicles had been captured and that the invading soldiers are stealing bicycles, disturbing their units for information about their retreat into Tanzania.

The two Americans identified as former Peace Corps volunteers were:

 dispatches received in London said more than 60 foreigners have

McGovern makes bid for labor, ethnic vote

CHICAGO (AP)—Sen. George S. McGovern campaigned in Illinois Tuesday, where he has been nominated and made another bid for the Democratic nomination.

McGovern met with more than 500 people at a fast meeting, then spoke at a Catholic church and announced his support of tax credits for parents of parochial school pupils.

McGovern's third trip to Illinois since the Democratic party presidential candidate will have the number of times Hubert H. Humphrey visited Illinois during his unsuccessful 1968 presidential race. And the 1970 campaign still has almost seven weeks left.

McGovern did not visit with Mayor Richard J. Daley or other ranking Democrats Tuesday. There were no meetings with the hands of people waiting for him to leave his State Street offices.

His reception at Gardner Technical High School in the Northeast Side was more enthusiastic. A student body of 2,900 boys plus a group of well-wishers from the area residents greeted McGovern with a rousing applause.

His wife, Eleanor, was presented with a bouquet of red carnations as he campaigned alone in Chicago later Wednesday.

The only planked on display at the high school entrance read, "McGovern is a Better Choice."

The names of Mayor Daley and Sen. Thomas A. Johnson No. 346, D-Mass., were written on the poster and crossed out.

The Northeast Side is one of the most heavily Irish sections of 180,000 people and McGovern is expected to win the majority of Chicago and heavily populated with Americans of Polish and Slavic descent.

This was one of the sections where political leaders were nine times since 1910 voting about the Democratic Nominees of the state and Daley and 58 other delegates.

McGovern promised Daley after the convention that he would camp among the Illinois community, a shortcoming for the mayor. Daley and the Illinois Democratic party. But unlike previous presidential candidates, there was no local or state candidates surrounding the presidential candidate.

New orchestra of young performers

NEW YORK (AP) — The Orchestra of the City of New York is a new organization whose members are recent graduates of music schools. It is launching a series of free concerts. They will be given at 4 p.m., hospital or church.

The orchestra hopefully will provide training opportunities for young players, assisting them to launch careers of their own.

Also, an aim is to attract young and new audiences by imaginative programs and presentation. Low price. Jak Zidian is music director of the orchestra.

Program for the free concerts will include Stravinsky and Bach as well as guest appearances by folk singers, Tom Paxton and Fat City. Jazzman Herb. Hancock and Metropolitan Opera mezzo-soprano Frederica von Stade.

In Wisconsin, plants behind scheduled compliance are:

Lances which have failed to meet the standards for discharges of waste are: Asheley, Soudan and South Bend, Ind.

Thomas F. Frampton, of the Wisconsin Department of Natural Resources, was optimistic despite the deficiencies. "It is important that the shortcomings be kept in perspective," Frampton said.

"Much has been accomplished and even more will be done in the future. We are in almost all instances, well beyond the critical stage of combating gross pollution from uncontrolled discharges of raw human or industrial waste."

"We specialize in student coverage"
UN head calls for war halt
UNITED NATIONS, N.Y. (AP)—The annual U.N. General Assembly opened Tuesday in a call from its new president for an end to the war in Vietnam and advice from a subordinate body to keep U.S. troops in Korea.

Deputy Foreign Minister Stanislaw Trepceynski of Poland, in a speech after his election as president, said the war in Indochina "cannot be justified any longer on logical grounds" and "violates every rule of ethics.

"We have a right to expect it to be stopped, once and for all," he added.

He remarked that there were "still no signs of a lasting peace" in the Middle East. Trepceynski got the presidency as the candidate of Eastern Europe, entitled to it this year by rotation.

He was elected by secret ballot after last year's president, Indonesian Foreign Minister Adam Malik, called the new three-month 27th session to order.

The U.N. Commission for the Unification and Rehabilitation of Korea recommended that the assembly leave U.S. troops in South Korea under the U.N. flag, as they are now.

The subordinate body also recommended that the assembly keep a U.N. political presence in Korea and skip debate on that country at this time.

The advice ran counter to pending proposals from China the Soviet Union and 36 other countries that the assembly debate the Korean question, suspend the commission's activities and declare that the U.S. troops should get out.

Ellsberg files suit
LOS ANGELES (AP) — Daniel Ellsberg and Anthony Russo filed a $11-million damage suit today, charging the government with illegal "spying" in the Pentagon papers case. They were joined by 17 of their attorneys and consultants.

The suit, considered a "test case," was filed in Washington by the National Emergency Civil Liberties Committee, but was announced in Los Angeles where Ellsberg and Russo face trial in the Pentagon papers case.

McGovern endorses tax break in Catholic, private schools

MILWAUKEE, Wis. (AP) — Democratic presidential candidate George McGovern moved Tuesday to preempt a Nixon administration campaign play by coming out for a tax credit for parents of pupils in Catholic and private schools.

"Parochial schools are cultural agencies as well as educational institutions" and are important in "keeping alive the diversity that has made our country great," McGovern said at Chicago's largest Catholic school.

McGovern's endorsement of a tax break to help alleviate the financial burden of families with children in nonpublic schools came more than a year after President Nixon first publicly called for some form of federal help to keep alive the parochial school systems. Although Nixon has made two major speeches on the subject and the White House has given testimony in support of pending tax-break legislation, Nixon has never personally spelled out his own formula. McGovern ran immediately into opposition from the National Education Association, which has traditionally fought aid for parochial schools.

MSG use may be harmful to infants

WASHINGTON (AP) - Babies may be exposed to the risk of brain damage if foods containing the flavor enhancer monosodium glutamate, a St. Louis researcher testified Tuesday.

Dr. John W. Olney of Washington University School of Medicine said "an industry-arranged whitewash affair" was responsible for allowing the additive to be used freely in any foods, in any amounts and for any age group.

Olney told the Senate Select Committee on Nutrition and Human Needs that his original 1960 findings, showing that monosodium glutamate (MSG) destroys brain cells in infant laboratory animals, has since been duplicated by researchers around the world. He said the danger to human infants was not negated when U.S. baby-food companies removed MSG from their formulas in 1970. He said infants also may be fed adult foods containing much higher amounts of MSG or they may receive doses before they are born or from their mothers' milk.

"The infant is primarily with the infant aspect," he said. "But we must recognize the open question of maternal transfer and lactating mothers," he said.

Labels on some adult foods, he suggested in an interview afterward, "should say this food is not suitable for babies." Olney said a National Academy of Sciences subcommittee gave MSG a clean bill of health in 1979, but its composition showed "a high degree of industry bias and poor qualifications.

"Loyalty to industry must have been foremost on the list, judging from the number of industry-employed or supported individuals who sat on the subcommittee," Olney said.

Citing what he called flawed research techniques and errors by three laboratories supporting the NAS subcommittee's conclusions, Olney said: 

"Those who were unable to confirm that my findings turned out to be almost exclusively from a certain element of the scientific community: a group of individuals who maintain close ties with the food and drug industries; individuals who are highly regarded by those industries as 'food protection authorities' and who function as a team prepared to swing into action whenever a food-safety issue arises.

Israel vows 'just desserts'

Booby-trap kills Israeli diplomat

By The Associated Press

An Israeli diplomat in London was killed Monday by a booby-trapped parcel delivered to his embassy. Shlomo Nativ, the Israeli ambassador in Paris received two similar explosive parcels but they were dismantled without going off.

The booby-trap mailings came on the heels of the Israeli raid into Lebanon which was aimed at destroying Palestinian guerrilla bases. The Israeli government vowed that those responsible for the death of the London diplomat "will meet their just desserts.

In another Middle East development, authorities in Syria arrested a U.S. military officer and possibly will seek to exchange him for Syrian soldiers captured by the Israelis.

Soon after the morning explosion in the Embassy, the Lebanese Embassy, said it received an anonymous call warning, "You will be next." The Lebanese government it has been trying to curb guerrilla activities inside Lebanon.

Foreign Munster Abba Eban of Israel said in Jerusalem that the slain diplomat, Dr. Ami Shachor, 44, an agricultural attaché, "has fallen at the hands of persons whose sole aim is to use destruction and to hoodwink the world into uttering culture." Shachor's replacement, Kaddar Theodor, was wounded in the blast.

Scotland Yard launched an international hunt for the assassins, and suspicion centered mainly on the Black September group of Palestinian guerrillas who murdered 11 members of the Israeli Olympic team in Munich.

Both the London and Paris bombs were postmarked in Holland, officials said. The bombs were mailed in similar large, bulky envelopes.

West German security officials were believed checking letters from the London bombing was connected to threats in Arabs in West Germany 17 days ago that death packages would be mailed to German Jews and Israeli diplomats.

Diplomatic sources in Beirut said Syria may be holding Maj. Richard Barrett, an assistant military attaché of the U.S. Embassy in Amman, in hopes of winning freedom for five Syrian officers captured by Israeli forces in Lebanon.

Barrett, 36, of Laramie, Wyo., was arrested Sept. 9 while on his way from Jordan through Syria to Beirut. Officials of the U.S. Embassy in Beirut reported his arrest Monday.

The officials said no reason was given for his arrest and that they were in the process of obtaining information on the arrest.

The United States has no diplomatic relations with Syria and the case is being handled by the Italian Embassy in Damascus which is in charge of U.S. affairs.

In Washington, the State Department said the Italian Embassy had protested against Barrett's detention and requested his release.

New BAS, language courses set for fall

Four new courses, including one which will feature a guest ambassador each week, will be offered fall quarter by Black American Studies and Foreign Languages.

BAS 419, a special studies seminar, will look into the problems of modernization in selected African countries from economic, political and social points of view. Milton Morris, professor in government, will be the course coordinator. C.K. Kamrannam is Morris assistant.

The course will feature an ambassador each week who will present a paper the class will discuss.

The class will be held from 7:30 to 9:30 p.m. starting Tuesday in Lawson 321. Four hours of credit are available. Class size will be limited to 30. Priority will go to seniors, graduate students and BAS majors and minors.

Class will be open to the public for discussion.

A second course, Black Studies Chair, BAS 300, with a hour credit will be offered. London Branch will be the instructor. Consent of the instructor is required.

For more information, contact Ms. Ruby L. Patterson at Black American Studies Room 219.

Intermediate Japanese, FL 4810, under the direction of Professor Ching Ho Chen, and Intermediate Arabic, FL 4810, with Zuhair Hamabi serving as instructor, are the two new courses being offered by the Uncommon Language Division of Foreign Languages.

Agnew says FBI probe set into U.S.-Russia wheat sale

MINNEAPOLIS, Minn. (AP)—Vice President Spiro T. Agnew said Tuesday that the Justice Department is preparing to investigate the $750-million sale of U.S. wheat to the Soviet Union.

Agnew accused Democrats of trying to use the wheat deal as "another Watergate," referring to the break-in at Democratic headquarters. He said President Nixon ordered the investigation to answer the questions being raised.

Disclosure of the FBI probe came in an Agnew news conference in former Ass't. Secretary of Agriculture John Block.

What next?

Andrew Green, a mechanical engineering student from Chicago, was a common denominator in the蛋白 diet of the Saigon combat zone.

The Navy also dispatched a destroyer of Quang Ngai to shell North Vietnamese and Viet Cong positions around Mo Duc.

Earlier, military spokesmen reported that the district town of Ha to near Mo Duc in southern Quang Ngai Province and three hamlets in Bien Ho district in the northern sector had been overrun. There was no firm count on casualties but scores of North Vietnamese were reported killed, wounded or missing.

The Saigon command claimed more than 150 enemy had been killed Sunday and Monday, many of them by air strikes.

Quang Nai City, the provincial capital, is 75 miles south of Da Nang.

Elsewhere in South Vietnam, fighting continued at scattered points but there were no major battles reported.

Thunderstorms reduced U.S. air strikes over South Vietnam Monday to 250 and confined the raids to secondary targets in the northern sector of the country.

Theaked, according to the U.S. Command reported.

The command announced in a delayed report that a Nasty M-113 armored personnel carrier was hit by enemy fire Wednesday.

According to command records, U.S. jets have struck in North Vietnam since the start of the enemy offensive last March 30 and the first raid on a full-scale bombing was less than a week later. A total of 106 crews were led by the command as missing in the North during the same period, and about a third of them are believed to have been captured.

North Vietnam claimed in a broadcast dispatch Tuesday that 1,000 enemy were killed in North Vietnam since the start of the enemy offensive last March 30 and that a total of 106 raids had been made over the country.

In a statement read at a public hearing on waste disposal the Washington Post, speaker Otis R. Bowen, a member of the Illinois House, said he was "totally opposed to the project."

Bowers said the plan would displace 75,000 to 100,000 people familiar with the Illinois environment.

A statement concluded with the audience of about 200 applauded enthusiastically.

Under the plan, called "C-SELG" for Chicago-Southern Eastern Illinois, the waste would be piped down to cities in Illinois and Grundy, where it would be stored in tanks.

Snake rattles

The officers managed to capture the creature, which they identified as a common water snake. They released it in Lake-on-The-Campus.

The FBI is investigating the $750-million sale of U.S. wheat to the Soviet Union.

Clarence D. Palmby, now an executive with Continental Grain Co., testified in Washington that his firm sold about 155 million bushels to the Soviets in early July before it was generally known that Moscow would buy such large quantities.

George McGovern, the Democratic presidential nominee, has accused the administration of feeding tips to big grain companies, allowing them to profiteer at farmers' expense.

"The Federal Bureau of Investigation has a business-fraud and business-practice unit that has been asked by the President to look thoroughly into this matter," Agnew said, "to investigate the profits of these big grain exporters that you refer to in seeing whether anyone has been making a profit, due to any misrepresentation or improperly revealed information on the part of the federal government."

Agnew said that "the investigation is now in progress." But a spokesman at FBI headquarters in Washington said no report for such a plea to go forward before the Justice Department.

The sales, for cash, were reported secured secretly between the Russians and Continental, Palmby said. The total represented nearly one half of the 400 million bushels of wheat eventually sold to the Soviets this summer.

But Palmby described it as "an outright lie" allegations that he took advance information on a grain credit arrangement with the Soviets to Continental when he joined the company on June 7. He denied also that his company reaped windfall profits from exports abroad.

Further, Palmby told a House Agriculture subcommittee, he took no part in the sale of grain to the Russians by the New York firm.

7th Fleet joins S. Viet push

By George Kasper

CHICAGO (AP) — The U.S. 7th Fleet joined in support of South Vietnamese troops Tuesday along the northern coast in a drive aimed at checking North Vietnamese assaults that have overrun a dozen towns and three hamlets in the last four days.

Hundreds of South Vietnamese replacements were reported to have embarked on a new sweep in Quang Nai Province to save Mo Duc, the largest of 19 districts with a population of more than 100,000. South Group. The government forces were reoccupying stiffly resisted.

As jet fighter-bombers from a 7th Fleet carrier joined the battle, and
Grad student Bill Dickerson is all smiles as he watches the birdie for an ID badge photograph. ID photos are part of the picture at the Arena as central registration for fall quarter continues.

Guidelines for applications for the first grants. From the quarter million dollar fund were announced recently by Willis E. Malone, executive vice president and provost.

Malone said anyone at SIU, individuals or groups, can now put in project proposals to be financed by the fund which will award nearly $175,500 in grants early winter quarter.

Requests for funding will be called twice a year. First, Nov. 1 and April 1. Malone said. No more than $175,500 will be awarded for grants at one time. Malone said this will fuel the grant program for years, but that additional support will be sought from SIU alumni, faculty, staff members and outside sources.

An eight-man committee to be selected by Malone will screen grant proposals. Malone said the committee will include two members each from the school's Council of Deans, Faculty Council and Graduate Council and one student representative from both the Graduate Student Council and the Student Senate.

In announcing guidelines, Malone said potential value to the total Univer­ sity rather than promoting special interests of academic units provided the "President's Academic Excellence Fund," which will be used to "improve the quality of SIU's own educational efforts," was set up when the University sold its invest­ ment in the University House now occupied by President David R. Derge.

Derge announced in mid-spring that the proceeds from land and capital investment, which totalled $60,000, would be used "to improve the academic product" at SIU.

Derge used the examples of research in ways to improve teaching, special tutoring programs, teaching evaluation, honor and independent study programs for top students and even equipment purchases as indications of how the fund might best be used.

Malone said about a dozen projects already have been sent in for consideration and added that no personnel hired through the fund will be given continuing appoint­ ments, only term contracts.

Counseling available on GI bill benefits

Special counseling on G.I. Bill benefits will be available this school year to veterans enrolled at SIU.

John M. Adamson of Marion, a counselor attached to the Chicago regional office of the Veterans Administration, will be on campus every second Friday to assist veterans with problems they may encounter in the collection of benefits of any kind. Veterans may contact him at the SIU Student Work and Financial Assistance Office located at Washington Square. His next regular visit to campus will be Friday, Sept. 28.

Adamson said one of the big problems veterans face is the amount of time required to get their first benefits check of the school year. In the past it has usually taken eight weeks, he said, but this year every effort is being made to deliver the checks within six weeks.

Lists of newly-registered veterans at SIU have been compiled and sent to the Chicago Office for early screening. Adamson said, in order to cut down on the delays in issuing checks.

Adamson said he is anxious to inform veterans of the rights to which they are entitled under the G.I. Bill, since many of them are not aware of all the benefits available. He said many veterans, for example, do not know they may obtain free treatment, within one year of discharge, to correct any dental problem which exists.

He said also that all veterans, whether they are claiming disability or not, should file information immediately on service-connected injuries or illnesses in order to establish eligibility for benefits if the condition should require treatment in the future.

Veterans may make an appoint­ ment to talk with Adamson by calling 453-4334.

Dorm rooms burglarized, purses and wallets stolen

Six purses were reported stolen Tuesday evening from rooms in the Thompson Point and Small Group Housing areas.

Three purses were taken from rooms 122, 109 and 127 by Beaver Hall, Thompson Point. Contents of the purses included billfolds, I.D.'s, $71.65 in cash, a credit card and one check.

Dormitory police said they were searching for a red, four-door Station Wagon car.

Two purses containing I.D.'s, a total of $81 in cash, a checkbook and a wallet were stolen from rooms 111, and 118, Kellogg Hall, Thompson Point.

A savings book, 15 checks, I.D.'s and $7.35 in cash were among the contents of a purse taken from room 110, 104 Small Group Housing.

All the thefts took place after 9 p.m.
Free School offerings range afar

By Bob Grupp
Daily Egyptian Staff Writer

Courses ranging from "Inter-vie..." to "Completed Free School at SIU this fall".

Sheldon Rosenzweig, Free School chairman, says 19 courses will be taught beginning Oct. 2. The courses deal with such topics as Hebrew, Yiddish, Arabic and Russian languages, Jewish philosophy, poetry, social movements and literature. Classes in international cooking and movie filming will also be taught.

The courses are being taught by people with a special interest or skill in a certain field, Rosenzweig said. This includes students, faculty members, and people from this community, Rosenzweig added.

Rosenzweig sees Free School as a supplement to a university education. Students whose interests cannot be met by the University curriculum are encouraged to attend Free School, according to Rosenzweig. Here, they can develop their skills in a certain area through involvement and experience, Rosenzweig said.

Classrooms for Free School are located in the Student Center, Student Christian Foundation, and in private rooms off campus.

Rosenzweig is operating Free School on a $500 budget provided by the Student Government Activities Committee (SGAC), he said. Rosenzweig added that all the teachers are volunteers and that the money pays for films, advertising and teaching materials.

Rosenzweig said he expects more money to be allocated to Free School from SGAC in the future.

"I want to get the community involved in Free School," Rosenzweig said. One way of doing this, he said, is to present programs at the Student Christian Foundation on Sunday nights. The first program, "Godspell," is scheduled for Oct. 1 with seven more to follow through November.

Asked about the response he expects, Rosenzweig said, "We're putting in energy at this end and that should draw energy at the other end." Rosenzweig said he invites people to contact him concerning teaching courses in the future or attending Free School.

Rosenzweig, a native of New York state, came to SIU in 1968 and attended until September, 1969, when he flunked out. Since then he has been in Chicago, Denver, New York and back to Southern Illinois where he attended John A. Logan College.

"I'm now a legal resident of Carbondale," Rosenzweig said. This is his first attempt at running the Free School. Rosenzweig said. He became its chairman this summer.

Marion book author to be honored here

Two receptions for Robert J. Hastings, author of "A Nickel's Worth of Skim Milk: A Boy's View of the Great Depression," will be held in the Carbondale area Saturday and Sunday.

From 2 to 5 p.m. Saturday, Hastings will attend a tea given by the National League of American Penwomen, Egypt Branch, at the home of Mrs. Bethal Crenshaw, one and a half miles south of Carbondale off Pleasant Hill Road on Route 1.

On Sunday from 2-5 p.m. Hastings will attend an open house autograph party and reception at the home of Mrs. Grace B. Lough, Route 3 about two miles south of Carbondale.

Hastings will speak about his recent book and will autograph personal copies of it. He has written 10 books.

"A Nickel's Worth of Skim Milk," portrays life in a small Southern Illinois town in the 1930's. It was written from Hastings' memories of what it was like when he was a boy growing up in Marion during the depression.

Hastings is presently editor of the Illinois Baptist, a daily publication of the Illinois Baptist State Association, Springfield.
U.N. commission recommends U.S. troops remain in Korea

By Shirley Christian
Associated Press Writer

UNITED NATIONS, N.Y. (AP)—The 21st General Assembly opened Tuesday with a plea from its Polish president for peace in Vietnam and a U.N. commission's recommendation that American troops remain in South Korea under U.N. auspices.

Stanislaw Trepoczynski, deputy foreign minister of Poland, said in his inaugural address that he is pleased with détente in Europe but disturbed at continued war and tension in Vietnam and the Middle East.

Secretary-General Kurt Waldheim has tried to bring the Vietnam war in—into the United Nations in search of a solution. But China, the Soviet Union and other Communist nations have blocked his efforts.

The assembly's opening session, which adjourned after 74 minutes, was interrupted briefly by a young man in the gallery who threw down anti-Soviet leaflets and shouted:

"Let my people go. Where is your humanity?"

The five-nation U.N. Commission for the Unification and Rehabilitation of Korea issued its report advising continued U.N. military presence in Korea as essays from 132 nations gathered for the annual 12-week U.N. Assembly.

The Korean issue will pit China, the Soviet Union and 26 other Communist and nonaligned nations which are seeking the ouster of the troops, against the United States and its former Korean War allies. Though troops from 16 countries fought as a U.N. Command alongside South Korea in the 1950-53 war, virtually all remaining forces are American.

Besides Korea, the big issues before this assembly will include the Middle East, terrorism, U.S. attempts to have its share of the budget reduced and environmental matters such as sea rights and pollution.

Memories of terrorism and its threat hang over the assembly, which opened under unusually tight security. Threats to various delegations resulted in strengthened security forces. There were careful checks of everyone entering the U.N. buildings and even of movements within the buildings.

Privately, delegates are comparing the Korean question to last year's China debate—in which the United States predicted for weeks that it would succeed with its two-China approach, but lost.

Time out

U.S. route Oked

WASHINGTON (AP)—President Nixon has approved a Civil Aeronautics Board order giving Compania Mexicana de Aviacion CMA a new route to Kansas City and authorizing the Mexican airline also to serve St. Louis as a coterminous with Chicago.

In addition to its current route to Chicago, CMA serves Dallas, Ft. Worth, San Antonio, Laredo and Corpus Christi, Tex., Los Angeles, Miami, Denver, and San Juan, P.R.

The new route to Kansas City extends the coterminals of Acapulco, Mexico City and Monterrey.

Designation of cities as coterminals gives the airlines the authority to operate flights to either of the cities without serving the others, when it so chooses.

Registration isn't all hurrying and scurrying. In fact, some sitting down and collecting of wits is necessary and inevitable. At left, Sharon Cornelius studies the situation at the Arena, while Margaret Grusz (center) dispatches the tall class schedule once again. And Kim Urban, senior in English who has been through it all before, gathers his strength before toting all those books home from Textbook Service. (Photos by Pam Smith)
**Federal panel to hear Kerner track case plea**

CHICAGO (AP) — A panel of three federal judges will hear arguments Wednesday on former Gov. Otto Kerner's request for a hearing to determine if the government prosecutor made a deal with a key witness in the case against Kerner connected with racetrack stock deals.

The three judges, J. Edward Lambard of New York City, Joan S. Brestleinstein of Denver and Harley M. Johnson of Omaha, Neb., were appointed to hear the appeal filing Aug. 4 by Kerner's lawyers.

Judge Robert L. Taylor of Nashville, appointed to preside at the trial, previously rejected the request.

Kerner's lawyers contend that James R. Thompson, the U.S. district attorney for northern Illinois, asked Mrs. Marjorie L. Everett in obtaining a California racing license and a position on the board of Hollywood Park race track.

Mrs. Everett is expected to be a government witness. She owned the controlling interests in Chicago Thoroughbred Enterprises, operators of Washington and Arlington Park racetracks, at the time that Kerner and others allegedly obtained racetrack stock at bargain prices.

Kerner, governor of Illinois from 1969 to 1966, was indicted in December on charges of bribe, fraud, perjury and income tax evasion.

He immediately requested a leave of absence from his seat on the 7th U.S. Circuit Court of Appeals. He was appointed to the federal bench by President Johnson in 1968.

**Rehab Institute receives grants for symposium, trainees, day care**

Three federal grants and a state grant worth over $200,000 have been received by the Rehabilitation Institute, Guy A. Renzullia, director.

The federal monies come from the Social and Rehabilitation Services of the U.S. Department of Health, Education and Welfare and the state grant is from the Illinois Department of Mental Health.

The $70,381 grant, for $70,381, will be used to conduct a National Symposium on Corrective Rehabilitation Counseling in Chicago, Oct. 21-23. It is the first such meeting ever held and will draw together more than 100 authorities in the field, including directors and top assistants from all 50 state departments on rehabilitation and vocational rehabilitation. Renzullia said.

The SIU Rehabilitation Institute was chosen to conduct the symposium by the Federal Office of Vocational Rehabilitation, headquarters of SRC upon the unanimous recommendation of the Chicago Regional office.

"Because of our pioneering programs in rehabilitation counseling and our efforts in both vocational counseling and corrections, we are the nationally known unit in this field," Renzullia said.

Purpose of the symposium will be to attempt to combine the resources and talents of separate state department of rehabilitation and correctional roles by pointing up the strengthening social need of rehabilitating the offender, he said.

Renzullia said the symposium to be sponsored by the Rehabilitation Institute will be attended by 130 counselor-educators and John E. Grenfell.

The largest of the federal grants for $201,228, will support 16 traineeships in the Rehabilitation Institute's counselor training program, headed by Schumacher. It is the 18th year the program has received federal money for this purpose.

For the fourteenth year, the placement counselor training program for job counselors for the blind, under Louis Vecellio, has received federal support. This year's grant of $50,281 will pay for 35 placements in the program.

The $65,000 grant from the Illinois Department of Mental Health, a fifth year award, will provide support for the mentally retarded day care program conducted at the Rehabilitation Institute's Employment Training Center near Or- dill. The ETC is under the direction of Frank A. Coyne.
Students receiving Vet Administration benefits must verify fall attendance

Students receiving educational benefits from the Veterans Administration must present verification of attendance at SIU to the VA office during fall quarter, veterans coordinator Myra J. Lopez said.

Those students receiving benefits under Public Laws 634 (War Orphans), 358 (G.I. Bill) and 815 (Vocational Rehabilitation) should bring their official class schedule or paid fee statement to the VA Office in the Student Work and Financial Assistance Annex, 611 S. Washington St.

All educational benefits from the VA will stop unless students comply with the above procedure, Mrs. Lopez said.

Office hours are 8-12 and 1-5. For additional information call 543-4343.

Schedule of job interviews listed for October period

Here are on-campus job interviews scheduled by University Placement Services for the first two weeks of October. Lists of interviews scheduled may be obtained and appointments may be made at the Placement Service office, Woody Hall, Section A, North Wing, Third Floor. It is advisable to make appointments for interviews as early as possible.

Thursday, October 5

LAVENTHOL KREISSTEIN HORNIGHT & HORNIGHT, Chicago. Accountants for CPA firm.

Friday, October 6

J. C. PENNEY COMPANY, INC., Rawlins Meadows, Retail merchandising management trainees (central region—midwest) Will interview December graduates, Degree (Bus., Mktg., Home Ec.—Textiles)

Monday, October 9

Tuesday, October 10

INDIANA FARM BUREAU, Indianapolis. Agriculture sales, management trainee, elevator manager trainee, PBA trainee, lumber manager trainee. Degree: Agriculture.

Wednesday, October 11

MEAD JOHNSON & COMPANY, Evansville, Ind. (+) ASSOCIATE SCIENTIST, Pharmaceutical Analysis. Principal function is the chemical analysis of raw materials, in process terms, and finished dosage forms: including solid and liquid dosage form, tablets, injectables, syrups, among others. Requirements: BS-MS in Microbiology or in Pharmaceutical Sciences. (+) ASSOCIATE SCIENTIST, Chemical Research Department. To devise chemical processes for the production of drugs, etc. Requirements: BS degree, strong background in organic chemistry with a keen interest in laboratory work. BS degree in math and physics also desirable. Degree: BS or MS Microbiology. BS Chemistry.

GLIDDEN-BURKE, Division of SCM Corp., Cleveland. Accountants, business administration graduates with accounting minor who eventually want to go into accounting. Marketing (for sales chemists, chemical engineers, etc.). Degree Accounting, Business Admin. Century II, 650 (414) 781-8844.

Thursday, October 12

F. S. SERVICES, INC., Bloomington. Primarily seeking B.S. degree candidates in any field of agriculture to fill a variety of positions leading to management responsibilities in the farm supply business. Also interested in students with a rural background who are in the School of Business.

Friday, October 13

NEW SOUTH WALES DEPARTMENT OF EDUCATION, New South Wales, Australia. Vacancies exist for secondary teachers (grades 7-12) in the following subject areas: the minimum requirements in the subject area are being indicated in brackets. Art (42 sem. hrs.), English (28 sem. hrs.), History (28 sem. hrs.), Mathematics (42 sem. hrs.), Science (42 sem. hrs., including some physical sciences). Physical Education (42 sem. hrs.), Counselling. Minimum Requirements: Bachelor's degree with at least 10 sem. hrs. of education and 6 sem. hrs. of student teaching. State teaching credential.

Primary fights run rough, rugged in East and West

By The Associated Press

Rooney is sought to bolster a challenge from Long Island Rep. Henry L. Reams, D-N.Y., who won a second shot at the powerful lawmaker when state county councils last June swept the Democratic primary party by irregularities.

Overseeing the election were assistant state attorneys general assigned to each of the district’s 40 polling places. Rooney won the June primary by 2,060 votes as the courts found 1,932 irregular ballots.

State and city pool funds for Marion Street paving

Marion Street in Carbondale will be resurfaced and widened from Champaign to Athens under an agreement with Governor Richard B. Ogilvie’s 1972 Road Program.

William Schwegman, director of public works, said Carbondale will have to pay $73,754.50 to resurface and widen the street. He said actual construction won’t begin until spring.

A construction grant of $147,500 has been awarded to the Southern Illinois University Board of Trustees by the Illinois Central Board of Trustees by the Illinois Central Board of Trustees.

Schwegman said the grant was awarded under the federal government’s Traffic Operations Program to increase Capacity and Safety of the Illinois-Indiana border towns. The grant stipulates that the federal government must pay 50 percent of the cost, the city must pay the other half.

In Madison County, interest centered on a challenge to Democratic Rep. Louise Day Hawk in its re-apportioned 9th District, a House seat bid by annual Vietnam veteran John Kerry in the 5th District and a three-way race for the Democratic Senate nomination.

Mrs. Hawks who was defeated twice in attempts to be mayor of Boston, ran a bitterly fought campaign against state Sen. Robert L. Cawley as she sought another term in Congress.

Kerry, 27, an attorney, was背着 one-time supporter for Vietnam Veterans Against the War, waged a strenuous battle against 10 opponents including state Rep. Anthony R. DiFruscias, whose campaign offices allegedly were broken into by two young Kerry workers including Kerry’s brother.

Kerry, DiFruscia and the others sought the Democratic nomination for the House seat vacated by W. Bradford Morse, named to a U.N. post. Both Republicans sought the GOP nomination.

Kerry is favored to win a second six-year term.

In the State of Washington, Gov. Dan Evans, seeking an unprecedented third consecutive term, was opposed in a primary election.

Professor's inventions profitable

By University News Service

More than $100,000 in royalties has been received by the SIU Foundation from the first faculty invention to be sold to a commercial company. The invention is a new plastic laboratory mouse cage, first patented in the United States in 1966.

The small animal cage, invented by microbiology professor Isaac L. Schwab, was designed by Dr. Robert Hunter, then members of the design department, is still the Foundation’s most profitable invention, although 21 other faculty inventions or publications are producing income, according to Kenneth R. Miller, Foundation executive director.

Since 1969, when the Foundation first began its service of patenting and marketing inventions and projects assigned to it, 219 projects have been submitted for consideration and 86 accepted as potential money-makers. Eight of these are publishing enterprises, three are musical recording projects, one is a series of films, and the remainder are scientific inventions and processes.

Of 219 revenue-producing projects, two are from the faculty of the S.U. at Edwardsville. The largest was done by Mr. Carbondale.

judges rule on Illinois voter residency laws

CHICAGO (AP) — A panel of three state Supreme Court judges ruled Tuesday that Illinois may not require more than 24 months of residence in determining eligibility to vote.

The ruling gives a class action suit filed against the Chicago Board of Election Commissioners in 1970. The suit, filed by American Civil Liberties Union attorney Dennis Black, challenged the constitutionality of a provision in Illinois’ voting law requiring a year’s residency.

"The volume of projects coming to us has tripled in the last three years," Miller said. "As a result, we have had to establish a screening committee to make a preliminary filtering of projects. We then begin preliminary agreement with the contractor and "wish" that they requested that they submit a progress schedule form and contact us about a preconstruction conference.

Newton said the preconstruction conference will be held within the next 10 days at which time the contractor will tell him of his plans for the project.

The construction work should begin next year, he said.

George Shuppe, publicity director for the Illinois Department of Transportation, said that under governor Ogilvie’s 1972 road construction program some $150 million worth of road work has been contracted out.

The contracts involve both inter-state and intrastate road projects in all sections of the state.

Although most of the projects come from the faculty, a number of area citizens also have submitted inventions, Miller said, and these are still welcome.

Title and Shuppe believe that the Foundation accepts an invention or project, it assumes the responsibility of obtaining a patent or copyright and of contracting for commercial manufacture or publication and distribution.

Revenues from royalties are shared 50-50 between the Foundation and the author of the project. The Foundation’s share is then placed back into University research projects.

Thorpge is an honor graduate of Florida State University, Tallahassee, where she taught the master's degree in education at the University of North Carolina, Greensboro, and earned the Ph.D. degree in physical education at Texas Women's University at Denton.

As might be expected, Miss Thorpe seeks an athletic activity as her No. 1 diversion—golf, every weekend. But she's a first-rate cook, likes to garden, even can peaches. She enjoys travel, and has been to Denmark, England, France, Germany, Italy, Portugal, Spain, and Switzerland. As a high school student, she was more interested in music than in athletics, and sang in the chorus. Even since coming to SU she sang in her church choir until her heavy schedule caused her to become a "dropout."

By Ed Schuyler Jr., Associated Press Sports Writer

NEW YORK - Floyd Patterson faces what could be his last Hurrah at big-time boxing when he fights Muhammad Ali Wednesday night at Madison Square Garden.

And the 37-year-old former two-time heavyweight champion maintains he is ready both mentally and physically for the fight he needs to win or at least look very good in to remain a major influence in the heavyweight division.

But boxing insiders give him little chance and odds-makers consider Ali such an overwhelming favorite that no betting line has been established for the scheduled 12-rounder.

"There is no way that this won't be a good fight," said Patterson. "Mentally I am better prepared for this fight than any of the fights I have ever had. Couple that with the excellent physical condition I'm in and you make your own decision."

The fight, the second between the two men, and a preceding 10-rounder between ex-lightweight champions Ken Buchanan of Scotland and Carlos Ortiz of New York will be shown on closed-circuit television and will be seen live or on tape in 30 other countries.

The closed-circuit program will start at 9:30 p.m. EDT, and the Ali-Patterson fight will go on about 10:30 p.m.

Ali is guaranteed $250,000 against 25 cents of all revenues while Patterson is guaranteed $100,000 against 20 cents per.

In their first fight, Ali then champion, stopped Patterson in 12 rounds Nov. 22, 1965, at Las Vegas, Nev. Ali, now 30, weighed 256 pounds for the first Patterson fight and is expected to weigh 217 this time.
Cubs lose, 7-2
Jenkins bombs

CHICAGO (AP)—Bob Bailey tripled home a run and Tim Foli hit a two-run homer as the Montreal Expos beat the Chicago Cubs and 20-game winner Ferguson Jenkins, 7-2, Tuesday before 3,162 the smallest baseball crowd at Wrigley Field since April 25, 1967.

Bailey tripled in a run and then scored on Ron Hunt's sac fly. In the second, the Expos scored another run in the third and then Foli homered off Jenkins, 20-12, in the fifth. Jenkins, who has given up 32 homers in 36 games this year, left for a pinch hitter in the bottom of the fifth.

Bailey also singled home a run in the ninth.

The Cubs scored in the fourth on Rick Monday's triple and a groundout and again in the eighth on Billy Williams' 32nd homer off Bill Stoneman, 11-2, who snapped a personal four-game losing streak and a five-game losing streak for the Expos.

Hours set for IM activities

The Office of Recreation and Intramurals has released hours for the following activities:

- Pullman Field and Pullman Gym will open Wednesday. Pool hours are from 9-11 p.m. daily. Pullman Gym hours are from 3-11 p.m. daily.
- Pullman Weight Room will open Monday. The room hours are from 3-11 p.m. daily.

Four years and countless hours of training had passed since George Woods lugged his 14-pound shotput and childhood dreams south of the border to the 1968 Olympic Games in Mexico City.

Woods, a 1967 graduate from Southern Illinois, was sure that Munich, and not Texas, would be his Olympic destination. He had been told then that the Saluki quartet—the U.S. pounder—would earn him a spot on the U.S. Olympic track and field team at SIU, "has lots of stories to tell of Woods."

I remember George coming to Southern Illinois in 1966," said. "He was six-feet-one and weighed only 209 pounds. But I've never seen a more dedicated athlete than George. He never missed a day of weightlifting practice and that means Christmas Day and Easter, too."

Mistfortune befell the Wooden, Ill., resident right at the beginning. During the fall of his freshman year in 1966, an accidental shotgun discharge tore into his right hip joint while on a routine hunting jaunt in Crab Orchard.

"Even with his build," Hartog continued, "he threw better than the others. He's got an extremely quick arm and good strength.

The former high school competitor in six other events besides his broad-and-butter shotput throw won't yet make a decision of attempting another try for the top prize when the Olympics reconvene in Munich, Canada, in 1976. "That's really hard to answer," Woods said. I guess that I'll take it year by year and see if I still have a real desire to keep practicing.

No other SIU representative earned medals at the Games. However, according to men's physical education instructor James Wilkinson, Burge was so successful in his wrestling outings that "he went back to Guatemala as a celebrity." Burge was undefeated through six rounds before losing in the seventh match to the bronze-medalist Bulgarian. The present SIU sophomore grappled in the 136-pound weight category. Burge placed the highest (seventh) of any Guatemalan in the 1972 Games.

WRA fall program has wide variety of sports

The Women's Recreation Association (WRA) has announced a list of activities for fall quarter. They begin next week.

Any female students interested in participating in water sports are encouraged to visit Pullum Pool. Women's varsity and intramural volleyball are also scheduled for the Women's Gym.

Field hockey for women is scheduled for 4 p.m. Wed., Sept. 27, at the Wall Street Field. Co-ed badminton for terly. Essick stated if Ferreira, also a senior, would have been seven seconds faster or close to the 51.1 time swam by Dickson.

Ferreira is the first athlete from Trinidad-Tobago to represent his country in swimming at the Olympic Games. He led all American times in the 100-yard butterfly while attending the Pasadena Junior College in 1979.

Late scores

American League
First Game
Detroit 000 000 110 -290
Cleveland 010 000 000 -380
Second Game
Detroit 000 000 031 470
Cleveland 200 000 000 750
New York 000 000 050 170
Milwaukee 202 012 00x -714

The heat didn't stop head football coach Dick Towser from putting his team through a rigorous workout Tuesday afternoon. The session took place on the practice field behind the SIU Arena. Spectators can come out to watch their team every afternoon.

The next game on the SIU football schedule is against Lamar University Saturday night.

Now what?

WRA officers for 1972-73 are Marie Ballard, president for a second year; Jeanne Clardy, vice president; Carol Coble, secretary; Nina Brown, treasurer; Cynthia Drenner and Janet Randel, co-chairmen of publicity; Judith Benedict, extramural chairman, and Launa Morrison, intramural chairmain.
Second time around for a colorful first

The Daily Egyptian chalked up a couple of firsts for itself during the summer.

The newspaper put its four-color process for reproduction of color photographs—like the one of Morris Library on the cover of this section and the sailboat on Crab Orchard Lake on the cover of Section B, both by staff photographer Jay Neddelman. The full color reproductions demonstrate the capabilities of the newspaper's five-unit (40-page) Cottrell press and other equipment in its new facilities in the north wing of the Communications Building.

This 72-page issue—which was first published July 28 and which has been made over with new covers and some new material on inside pages—is the largest ever published by the Daily Egyptian.

The 72 pages required four press runs because of the color work on the covers and in the advertisements. The 72 pages also required nine tons of newsprint for the first printing in July, which totaled 31,950 copies as compared with a normal press run of 13,000 during summer and 17,500 during the regular school year.

The added copies were mailed to the homes of all students who had registered for fall quarter. This second printing is being provided for faculty, students and staff who were away for the summer and for those new to the campus this fall. The stories and photos for the special sections were produced almost entirely by students in the School of Journalism.

It's a long birthday party

By Dave McGregor
Student Writer

Southern Illinois University was 100 years old in 1969 and will be again in 1974.

This discrepancy is the result of two different founding dates for the university.

Although SIU was chartered as a two-year teachers college in 1869, classes were not held until 1874 after the completion of the one building that housed the entire college.

SIU is solving the problem of two centennial dates by conducting a five-year Centennial Period from March 9, 1969, to July 2, 1974.

From its humble beginnings, SIU has grown into a sprawling complex of modern buildings and open areas—136 permanent buildings and 290 temporary on some 7,200 acres. All valued at $100 million.

The period of greatest expansion came during the years when Delby W. Morris was president of the University, said Carroll Riley, professor of anthropology and chairman of the Centennial Committee.

It was Morris's vitality and imagination that helped make SIU one of the 36 largest universities in the country, Riley said. Morris retired last year after 22 years as SIU's president.

As part of the celebration, the Centennial Committee is sponsoring the publication of several books.

"We chose to put a large part of our resources into publications since they will be a lasting contribution," said Roy. The books will be here after we are gone and when the next centennial comes around.

Riley said that although there are no events planned in the near future, the centennial office is serving as a clearinghouse of information about SIU's five-year 100th birthday party.

Placment takes five weeks

By Bill Webb

Student Writer

Students wanting university jobs for fall quarter should apply early to the Office of Student Work and Financial Assistance.

Raymond P. D'Arment, assistant director of the office, said in a recent interview that jobs are usually available for students who apply in advance.

As soon as a student has planned his schedule for fall, he should begin to look for a job that will match his schedule. It usually takes about five weeks to place a student.

Students who come to the work office at the beginning of the quarter should not expect to get jobs right away. D'Arment said, "When school opened last year, we had less than 50 jobs left. 1,000 to 1,500 students came in asking for jobs."

He added that students who could not be placed at the start of the term should go ahead and apply because the turnover in student workers averages 200 a month.

The total student work force is between 2,200 and 3,300.

When a student comes to the work office, he is given an ACT Family Financial Statement, a part of which is sent to the ACT offices for processing and determination of need. The part is returned to the SIU work office, D'Arment said.

After ACT processes the statement and sends the copy to the work office, the student is eligible to work, provided he is in need of funds to continue his education.

In order to work, an undergraduate must be a full-time student carrying 12 quarter hours. A summer student must have six hours to be eligible for work.

We have about 200 different kinds of jobs ranging from maintenance, food service, clerical, laboratory, surveying, greenhouse, feed production to student newspaper jobs," D'Arment said.

"In many cases we can relate a student's academic program to a job," he said. "For instance, any student with average or better clerical skills can find a job immediately. We have over a thousand such positions on campus."

Although most jobs involve daytime work, evening jobs are also available, he added.

The work program is set up in such a way that the average student worker will earn about $300 per quarter, D'Arment said. The minimum starting wage is $1.66 an hour and the average student works between 16 and 17 hours per week.

Ranks of 10 cents are given after the first 300 hours of work and 10 cents per hour extra. Unusually good workers can also get an additional five-cent raise as often as every six months, but this is to be determined by the individual employer.

The work office has no limitation on the maximum number of hours a student works. D'Arment said, but employers might establish such limitations.

"We have some students who can work 40 hours a week and still make good grades," he said, "but I'd say most students couldn't do that. We try to arrange it so that a student averages about three work hours a day."

SIC has a long tradition as far as the student work program is concerned. D'Arment recalls working 20 hours a week at SIU in 1933 for 25 cents an hour.

The National Youth Administration provided federal funds for students who came from needy families between 1936 and 1943. For the next 19 years, the work program was funded with limited state funds. The work office was set up as a department in 1953, with about 300 students on the payroll for the first year.

By 1960, that number had gone up to 1,300. It jumped to over 4,000 by 1966 before tapering off to the 1,300 total this year.

D'Arment said not all students at SIU work because they have to. "A large number of students work because they want to," he said. "Helping yourself is the style at SIU."
Broader education is goal

General Studies counters specialization

By Bill Barth
Student Writer

During the past year, SIU's General Studies curriculum requirements have undergone extensive study and revision to better meet the needs of students faced with closed job markets in their major fields.

John W. Voigt, dean of the General Studies Division, said in an interview that this action had been taken because "overspecialization had become increasingly apparent. Present conditions in employment are pushing for a broader education."

Voigt said that students seeking employment in today's job market would realize more benefits through broad exposure to several disciplines rather than by strictly adhering to a specialty.

To facilitate this approach, cutbacks in rigid General Studies requirements have occurred. In 1971, total hours requirements were reduced from 96 to 47. A student also may now formally enter his major field at 48 hours instead of the former 67-hour level.

Reductions have also taken place in the number of hours required to complete each General Studies area. In areas A, B, and C, requirements have dropped from 94 to 16 hours, for example, and in area D from 56 to 14 hours. Area E has remained at 5 hours.

Area A covers the physical sciences. Area B, the social sciences. Area C foreign languages and humanities. Area D English, speech and mathematics. Area E health and physical education.

Under the old rules, courses offered were for three hours credit and required that the student complete eight different courses in Areas A, B and C to satisfy General Studies requirements. With the reduction in these areas, and the inclusion of four-credit hour courses, a student can now complete his requirements in four courses per area. A reduction of 50 per cent, Voigt explained.

"These changes have resulted in a 30 per cent drop in courses offered by General Studies," said Voigt. However, he said this does not mean that students' choices are also reduced. Courses dropped from General Studies remain in the schedule of departments that have traditionally taught them and are still available, he said.

"Some are cross-listed, but the majority are not," Voigt said. The revisions were done to provide some additional flexibility for the student, he said.

According to the Report of the General Studies Joint Standing Committee for 1971-72, which was presented to a meeting of the Faculty Council July 18, more revisions of the curriculum requirements may be in order.

The report recommends that the math requirement in Area D be dropped and total hours in that area reduced to 12. It also recommends that Area E be increased by one hour due to the addition of more class offerings.

Another program under consideration is the introduction of a General Studies degree at SIU, said Voigt. "It's been in the works for a year, but no significant progress has been made." he said. "The idea of a major in General Studies is not new, he said, and is currently being discussed at 44 universities nationwide."

Voigt said the need for this program originated with the overburdened job market in many students' major concentrations. A student with a General Studies background could conceivably "prepare himself for several different employment opportunities," he said.

In support of the idea for a General Studies major, Voigt cited the Spring 1971 registrar's coding list which showed 31 per cent of all freshman and sophomores had not declared a major. These students could greatly benefit from a curriculum "stressing a broad overview of all subject matter," he said.

Voigt expressed support for "more interdisciplinary courses such as GSA 299." This course centers on the role of mankind in interaction with his environment and offers various instructions from humanities, arts and sciences.

Although minor changes have been undertaken twice in the past, once in 1966 and again in 1971, this is the first totally comprehensive curriculum review in 11 years, he said.

Interim Policy still applies

New campus conduct code under study

By Nancy Kay Peterson
Student Writer

Judicial and disciplinary policies of the University will be changed if and when a proposed Community Conduct Code is adopted.

The new code, however, has yet to receive approval of the University Senate and the University president. The new code, however, has yet to receive approval of the University Senate and the University president. It would, among other changes, apply to faculty as well as students. It would establish a system of hearings and appeals procedures and add to safeguards for rights of due process for persons charged with violations of University rules, which it also would spell out.

Writing and study of the code have been in process for more than a year, with representatives of all segments of the University community taking part.

Desirable changes that may be brought about by the code, recent court decisions may also lead to modifications of disciplinary policies, said Tom Busch, administrative assistant in the Office of Student Relations.

He said the Office of Student Relations has been reviewing the University’s disciplinary policies because of “the drastic changes that have taken place within the last four years.”

Until the Community Conduct Code is adopted, however, the University’s student disciplinary policies will remain as outlined in the Student Discipline Informational Guide for 1971 to 1972 and as set forth in the Interim Policy on Demonstrations.

Presently, eight basic actions may be taken against persons violating University codes.

For a minor offense such as violation of residence hall regulations or possession of alcoholic beverages in University facilities, a student may receive a disciplinary reprimand, a disciplinary warning or be put on disciplinary probation.

A disciplinary reprimand is an oral reprimand of the student’s conduct. This action, along with disciplinary warning, is one of the most used disciplinary actions, said Dick Higerson, coordinator of student discipline.

Disciplinary warning is a written warning addressed to the student cautioning him against repetition of the offense.

Disciplinary probation involves the removal of certain privileges, such as participation in intercollegiate athletics for a certain period of time.

If one of these three actions is taken against a student, the action does not appear on the student’s official transcript.

If a student commits a serious offense, such as vandalism, deliberate disobedience, theft or the manufacturing, selling, possession or use of a narcotic, the student may face disciplinary suspension, dismissal or withdrawal.

Higerson said this action is taken very rarely. There has been only one disciplinary dismissal taken in the last year and a half. It involved a student with a long series of serious violations on his record.

Higerson said the application of a temporary suspension or an involuntary withdrawal was also a rare occurrence.

A student may be temporarily suspended pending a hearing if he represents a “clear and present danger” to the University community. Higerson said this would involve a student who may engage in some form of violent action before his hearing.

Higerson said the application of a temporary suspension or an involuntary withdrawal was also a rare occurrence.

Involuntary withdrawal is applied to students who, for medical or psychological reasons, cannot be held responsible for their actions. Higerson said there have been no involuntary withdrawals for a year and a half.

A student accused of violating a University code may have a hearing with his area dean or with the student judicial board in his living area. The judicial board, composed of students from the student’s living area, will recommend to the area dean what type of action should be taken.

Under the Interim Policy on Demonstrations, the University can take disciplinary action against any student or group that disrupts University functions, interferes with the safety, welfare or rights of other members of the University community or is destructive of public or private property.

Busch said there are two cases pending against students charged with violating this policy. They are charged with violating the section of the policy which concerns obstruction of University activities and with violating that section which concerns physical abuse or intimidation of a member of the University community.

The cases stem from incidents which occurred during the antiwar disorders at SIU last May.

SIU’s ideals are carved in stone in the library.

Suspension and withdrawal are voluntary separations of the student from the University. Higerson said that the permanent separation from the University.

Student Center's expansion getting finishing touches

By Baha Finkelstein
Student Writer

The Student Center should be in every good shape when school starts this fall, Clarence G. Dougherty, Student Center director said.

"All areas of the building should be open and in good operating condition," he added.

Dougherty, who took the position in September, 1960, said that minor adjustments are still being made in the $3.5 million expansion project, begun Dec. 1, 1968, by the J.L. Simmons Co.

"Hopefully, the construction projects will be over with, and we can concentrate on refining services," Dougherty added.

The decision to expand the original center, completed in 1961, evolved from needs, Dougherty said.

From 1961-64, the center was used to house services including General Studies advisement and counseling, because of a pressure for space.

Dougherty said. He explained that in 1964-67, the building was overrun with people. The cafeteria and lounge did not provide adequate seating, he said.

If 250,000 square feet, only 101,000 were being used for student purposes, according to Dougherty. Plans were made to complete the remaining 149,000 square feet and to build a 50,000-square-foot addition, he said.

Dougherty said the Student Center now covers an area of 365,000 square feet, slightly less than eight acres. The 406-foot long building contains a variety of study, lounge and recreation areas.

"There is no doubt about it being a student center," he said.

"It is operated primarily for the benefit of the students, to take care of the services necessary for them," Dougherty explained.

In discussing these services, Dougherty explained some of the specific changes and additions regarding the center's facilities.

In the basement of the center, for example, a 325-seat facility, "The Big Buddy Room," has been built. Dougherty said this rustic, dimly-lit area has a snack bar and a centrally-located stage.

On the ground floor, a new bookcase has been opened, almost three times the size of the old one, according to Dougherty. A completely new cafeteria and serving area also has been opened, he said, which will provide faster service for more people.

A self-service postal station has been added on the ground floor. It will post any kind of mail that can be posted there," Dougherty said.

Two lounges have been added to the first floor of the Center, as well as a 150-seat dining room with table service, according to Dougherty. He also mentioned the new 300-seat auditorium, primarily used for movies.

Dougherty explained that the second floor is mainly being used for a complex of offices for student organizations and meeting rooms.

The third floor consists mainly of a large open space designed for flexible use by groups on a temporary basis, according to Dougherty.

VITI admissions up 26 per cent

New student admissions have jumped 26 per cent for the fall term at the SIU Vocational-Technical Institute.

The gain has been registered despite a phase-out of eight programs and options at VITI since fall, 1971.

The major increase is shown in the July pre-registration summary issued by SIU Admissions Director, Jerry Pfeil. New admissions to VITI total 467, up from 356 at this point last year.

Total enrollment at VITI for this fall is expected to be about 1,200.

In order to maintain these and numerous other facilities, a staff of 122 students, 32 Civil Service people, 20 food service employees is needed, Dougherty said. The payroll for the 1969-70 fiscal year totalled $777,833.69, he said.

With expenses running about $3 million a year, money is one of the center's major problems, Dougherty said.

"Lots of areas used by students, such as the lounges and restrooms, are not revenue-producing," Dougherty explained.

"We need to have more and more people eating in the various areas and people bowing all the time," he said.

Another problem Dougherty mentioned is one of communication.

"We're trying to have people informed about what we're trying to do. Often students do not have the opportunity to know what we're doing when we do it," he said.

More specific problems include "theft, shoplifting and 'rip-offs,'" Dougherty said. This has been going on for the past several years.

Dougherty said much of the stealing occurs in the bookstore. There has been some stealing of food from the cafeteria line and a number of thefts involving anhydrous and silverware, also.

Dougherty explained that in such cases, the stolen articles must be replaced.

"Therefore, when people steal these...other students have to pay," he said.

Dougherty said that plans for the coming year include an open house during New Student Week, in September. He added that the Student Center will be operating 16 hours a day, as usual.

Changes made in the University administration structure this summer may confuse some SIU students.

But President David R. Derge says these changes will make things easier for students, faculty and anyone who deals with the University and bring the University in goal of "academic excellence."

The major changes in administration eliminates the many assistants to the president, replacing them with line administrators working directly under four vice presidents who report directly to the president.

The changes in administrative structure followed recommendations of the President's Task Force, which was formed to study the University's administrative structure with a "view 'em in a changed world."

The four vice presidents are:

- Willis Malone, vice president for academic affairs and provost. Malone also is executive vice president to Derge. Malone came to SIU in 1979 as the first endowed teacher in rural education. He was assistant dean of SIU's College of Education from 1945 to 1948 and was chief academic advisor for the college before being named SIU director of admissions in 1953.

- William Reesman, former executive assistant to Derge and now vice president for administration and campus treasurer. Reesman served as assistant to Derge when Derge was at Indiana University, Bloomington. Derge named him as his executive assistant soon after coming to SIU as president in February.

- T. Richard Mager, vice president for development and services. Mager also serves as SIU's legal counsel but expects a replacement for his position to be named this year.

Mager came to SIU in 1975 as SIU's legal counsel. Previously, he had been a counsel to the curators of the University of Missouri and had a private law practice.

A permanent vice president for student affairs is to be named later this fall. Until then, George Mae, dean of students under the new organization plan, has authority in the area of student affairs.

Mae came to SIU in 1963 as an assistant professor of government. He was associated primarily with the Edwardsville campus before coming to the campus in 1978 to assume the position of assistant to the president for student affairs.

All of the vice presidents report directly to President Derge. He replaced the temporary chancellor and president of the University, Robert G. Lawyer.

Derge also is an executive vice president and dean for administration at III. Before assuming the faculty at IU in 1966, Derge taught at the University of Washington, Pullman; Northwestern University, Evanston, Ill.; and the University of Missouri, Columbia. While at Indiana, he also was associate dean of the graduate school, associate dean of faculties and professor of political science.

Although Derge announced that his ties with partisan politics were over once he became president of IU, he has been very involved with politics and the Republican party in the past.

His involvement at IU included a four-year term as a city councilman in Bloomington.

In 1968, because of some work he had done in polling research methods, Derge was asked to set up a national survey research center in Washington for the Nixon presidential campaign. After he returned to Indiana, but his affiliation with national government was not over for the four years that followed he was offered several national government positions, including assistant secretary of the state, director of the Bureau of Census, assistant secretary of interior and deputy commissioner for higher education. He says he declined all these offers because he preferred a position in an academic institution.

The naming of Derge as president was the culmination of a lengthy presidential search which involved expenditure of over $22,000 in consulting fees to Richard Quaintance Associates of Chicago.

Each of the four vice presidents under Derge have a number of assistant to them. But, with the exception of a few core assistants, the staffs of the four vice presidents and the titles of these staffs have not been determined. This is presently being worked out by each of the vice presidents in cooperation with the Management Task Force.

Two assistant provosts have been appointed to serve under Malone, vice president for academic affairs. They are John K. Luxury, former chairman of the Department of Plant Industries, and John H. Baker, former assistant to the president for planning, development and review. The duties of these staff have not been dilinated, but each is expected to have responsibility for units under academic affairs.

On the staff of Orescanin, vice president for administration and campus treasurer, are Gene Peenche, former assistant to the president of business affairs; Dan Arnold, comptroller, and Charles Bonsdorff, former assistant to the president for research and projects fiscal management.

Rino Bianchi, assistant to the president for space allocation, is now on the staff of Mager, vice president for development and services.

The staff for the vice president for student affairs perhaps is the most inconstant of all, as no permanent vice president has been named in that area. A vacancy still remains for the position of dean of student services. Emil Spees is assistant dean of student services.

Edward Hammond, assistant to the president for student relations under the old organization system, is expected to be included under the new student affairs reorganization. In an additional administrative appointment in July, Derge named Edgar Hall, assistant to IU as his assistant. Merritt assisted Derge when Derge was at IU and after Orescanin became the second of Derge's IU associates to be added to SIU's administrative staff.
Fountain of youth

Janice Pophin, a senior from Chicago majoring in Special Education, catches a few moments to study by the two children in the recently reinstalled fountain near the Women’s Gymnasium. The fountain display was dismantled after the Old Main building burned in June, 1969. It was restored by electrician Emerson Mings of West Frankfort and plumber Wayne Marten of Carbondale, both SIU employees. Information about the origin of the statue is vague. (Photo by John Burningham)
New jobs for old hands

Got a yen to sing?

There's music opportunity for everybody...

By Kathy Wilken

All students interested in singing or playing a musical instrument, whether or not they play an instrument well or are music majors, should have the opportunity to play or sing at SIU, Melvin Siever, assistant to the director of the SIU School of Music, believes. And there is plenty of opportunity provided by more than a dozen bands, orchestras, ensembles, choirs, choanettes and glee clubs in the music school.

The University Symphonic Band, which carries one academic credit, is open to all University students (men and women) in all colleges, schools and departments who wish to continue their wind or percussion activities at the University level.

The University Symphonic Band is designed to perform a large part of the literature written or transcribed for bands of moderately large to large proportions. The University Symphonic Band presents one concert per quarter (fall, winter, spring, summer).

The Southern Singers, for membership in the University Symphonic Band is that if the member wishes to have had previous experience in an instrumental organization. No audition is required.

The SIU marching band, the Marching Salukis, derives its distinction from band-mixed style jackets and dalmatians. The Salukis also feature an entire concert percussion section on wheels, a mobile baby grand piano, and specially prepared "Swinging Salukis" arrangements and instrumentation.

In addition to numerous appearances and off campus, one of the highlights of each season is the pre-Christmas concert held yearly one week prior to the beginning of fall quarter. During this period band members are provided with room and board for a full week of orientation, rehearsals and fellowship.

Membership in the Marching Salukis is open to all male students in all colleges and departments of the University. Each year 60 percent or more of the band is made up of non-music majors. The only prerequisite is the ability to play wind or percussion instrument, and no auditions are required.

The University Wind Ensemble, composed of approximately 50 select musicians, is an organization designed primarily for the performance of wind literature of all styles and from all periods in music.

Very active in workshops and band clinics, the University Wind Ensemble presents one formal concert each quarter and conducts and extensive recruitment tour each spring.

Membership in the University Wind Ensemble is by audition, or by faculty permission only.

All choral ensembles are open to both graduate and undergraduate students. No student is permitted to participate in more than one performing group during term. Most choral ensembles carry one academic credit.

The University Choir, composed of approximately 60 voices, performs mostly serious music, usually on campus. An audition, sight-reading ability, and membership for the entire year are required.

The University Singers perform extended choral-orchestral works written for a large, mixed ensemble (approximately 250 singers). Performances are in December and May. No audition is required, and it is not necessary to be a member of the choir for the entire year.

The Male Glee Club, composed of approximately 50 men, performs frequently on and off campus and often tours. An audition and membership for the entire year are required.

Musical groups usually perform one formal concert per quarter and are composed of approximately 30 voices. Hearing is required for voice color and range. Membership for the entire year is desired, but not required.

Membership in the SIU Chorale is by permission of the conductor. The SIU Chorale performs music from all periods with emphasis on the 20th century, manuscripts, and commissioned works. The group performs in a wide variety of contemporary choral-percussion performances on all campuses, and solo and small ensemble opportunities are offered for the exceptional vocalist.

The Theological Singers performs the most diversified literature of all the choral ensembles. Composed of approximately 30 voices, this group requires an audition, moderate sight-reading proficiency and membership for the entire year.

The Opera Chorus performs in a major opera production during winter quarter. Membership is by permission of the Opera Workshop director.

The Marching Salukis and the twirler corps do their thing in Busch Stadium.

The College Musicus is composed of advanced students and faculty and provides practical experience in performing vocal and instrumental music written before 1750. An audition is required and singers must be skilled at sight-singing, must maintain accurate pitch, and must possess a light, flexible tone quality appropriate to older styles.

Because of the large casts and crosses necessary for opera productions, students wishing to sing, act, dance or participate in any capacity in the production of opera at SIU may become members of the Opera Workshop and take part without credit.

The University Orchestra is a 75-piece orchestra which plays a variety of classical compositions, ranging from Baroque to contemporary compositions. The University Orchestra performs publicly once every quarter and plays one concert a year as an accompanist for student soloists from the School of Music.

The University Chamber Orchestra is made up of select members of the University Orchestra and members of the faculty of the School of Music. This orchestra, usually numbers 30 to 30 members and plays all sorts of compositions from baroque to contemporary.

The University Opera Orchestra works in coordination with the Marjorie Lawrence Opera Workshop of the SIU School of Music to stage a major operatic work each year. Marjorie Lawrence, director of the opera, is a former star of the Metropolitan Opera in New York and the Paris Opera Company.

We Want You as a Goldsmith Customer

We are not a huge store or part of a chain. We are in fact a small privately owned specialty shop. We are proud to say that there are some fifty years of retail experience behind us. These many years of experience imply that we know something about both business and fashion. We know a part of our success has been in retaining or old customers and getting new ones. And this is where you come in. We want you as a Goldsmith customer. We have what we think will be the greatest collection of men's and women's fashions to be found anywhere. What we ask is give us a look. ask us a few questions; try us out. We could become good friends.
Fountain of youth
Janice Popkin, a senior from Chicago majoring in Special Education, catches a few moments to study by the two children in the recently re-installed fountain near the Women's Gymnasium. The fountain display was dismantled after the Old Main building burned in June, 1969. It was restored by electrician Emerson Mings of West Frankfort and plumber Wayne Martin of Carbondale, both SIU employees. Information about the origin of the statue is vague. (Photo by John Bunningham)
New jobs for old hands
Got a yen to sing?
There's music opportunity for everybody

By Kathy Wilken
Writor

All students interested in singing or playing a musical instrument, whether or not they play an instrument well or are music majors, should have the opportunity to play or sing at SIU, Melvin Sierer, assistant to the director of the SIU School of Music, believes.

And there is plenty of opportunity provided by more than a dozen bands, orchestras, ensembles, choirs and glee clubs in the music school.

The University Symphonic Band, which carries one academic credit, is open to all University students, men and women, in all colleges, schools and departments who wish to continue their wind or percussion activities at the University level.

The University Symphonic Band is designed to perform a large part of the literature written or transcribed for bands of moderately large to large proportions. The University Symphonic Band presents one concert per quarter (fall, winter, spring, summer).

The University marching band, the Marching Salukis, derives its distinction from plaid tweed-style jackets and derbies. The Salukis also feature an entire concert percussion section on wheels, a mobile baby grand piano and specially prepared "Swinging Salukis," arrangements and instrumentation.

In addition to numerous appearances on and off campus, one of the highlights of each season is the preschool band camp held yearly one week prior to the beginning of fall quarter. During this period band members are provided with room and board for a full week of orientation, rehearsals and fellowship.

Membership in the Marching Salukis is open to all male students in all colleges and departments of the University. Each year 90 percent or more of the band is made up of non-music majors. The only prerequisite is the ability to play a wind or percussion instrument, and no auditions are required.

The University Wind Ensemble, composed of approximately 50 select musicians, is an organization designed primarily for the performance of wind literature of all styles and from all periods in music.

Very active in workshops and band clinics, the University Wind Ensemble presents one formal concert each quarter and conducts and extensive recruitment tour each spring.

Membership in the University Wind Ensemble is by audition, or by faculty permission only.

All choral ensembles are open to both graduate and undergraduate students. No student is permitted to participate in more than two performing groups during one term.

Most choral ensembles carry one academic credit.

The University Choir, composed of approximately 40 singers, performs mostly serious music, usually on campus. An audition, sight-reading ability, and membership for the entire year are required.

The University Singers perform extended choral-orchestral works written for a large, mixed ensemble (approximately 250 singers). Performances are in December and May. No audition is required, and it is not necessary to join for the entire year.

The Male Glee Club, composed of approximately 50 men, performs frequently on and off campus and other tours. An audition and membership for the entire year are required.

The Women's Ensemble usually performs one formal concert per quarter and is composed of approximately 30 women. Hearing is required for voice color and range. Membership for the entire year is desired, but not required.

Membership in the SIU Chorale is by permission of the director. The SIU Chorale performs music from all periods, with emphasis on the 20th century, manuscripts, and commissions. The group participates in choral-orchestral performances on and off campus, and solo and small ensemble opportunities are offered for the exceptional vocalists.

The Southern Singers perform the most diversified literature of all the choral ensembles. Composed of approximately 30 voices, this group requires an audition, moderate sight-reading proficiency and membership for the entire year.

The Opera Chorus performs in a major opera production during winter quarter. Membership is by permission of the Opera Workshop director.

Pending the outcome of a controversy over who's to get how much from student activity fees and who's to decide it, this much, at least, can be said:

Student Government and the Student Government Activities Council aren't peanuts.

Student Government and SGAC will share in an estimated $675,000 in student fees this year, and Student Government has a voice—important though some may consider it—in how some $613,576 of that amount will be distributed to the myriad organizations that want it.

The Health Service is ticketed for $237,824—based on $4.35 per student from the $245.96 activity fee paid by those who enroll for 11 hours or more.

The controversy, which developed at mid-summer and seemed unlikely to be settled until fall, had to do with how the bulk of the fee money is to be allocated.

Dean of Students George Mayo presented a plan to survey all students on their preferences about which activities were to be funded and for how much. Student Government, which had held sometimes stormy hearings on fee allocations in the spring, objected that the dean's plan was an usurpation of Student Government's power.

If nothing else, the ruckus demonstrated again that Student Government, and its fee council, the SGAC, are alive and kicking at SIU.

The student's chief executive for 1972-73 is Jon Taylor, and his vice president is Sue Collett. Dotti Davis, as student activities chairman completes the SGAC triumvirate. And Taylor sees the work of committees having to do with cultural affairs, films, the Student Center, parent-alumni relations, the Free School and orientation.

The president and vice president are elected each April. The senate appoints its chairman and the student activities chairman is selected by an SGAC committee.

The student government executive officers and activities of fees are located on the second floor of the Student Center. This year's executives are president Jon Taylor, vice president Sue Collett and student activities chairman Dotti Davis.

Student Government is one of the seven constituency bodies comprising the University Senate. The other bodies are the faculty council, administrative and professional staff council, non-academic employees council, graduate student council and graduate faculty council. The student government's six U-Senate representatives are appointed by the student government vice president.

The legislative branch of student government consists of the Student Senate. There are 37 senators representing ten geographical and population districts. Foreign students have one representative.

The ten districts are: Thompson Point, Brush Towers, University Park, University City, Small Group Housing, Condomer, East Side Dorm, West Side Dorm, East Side Non-Dorm and West Side Non-Dorm.

Half of the senators are elected in the fall and half in spring quartar.

Although the student senate is basically an advisory body at SIU, it has representatives on most University committees. In the past, the student senate has been involved in student rights and welfare, has eliminated women's dorm hours, changed fee structure so more money was channeled into student government, eased student motor vehicle restrictions, helped establish ecology and Black studies courses, financed the campus radio station WIDB and literary magazine Graffiti and helped in the formation of the campus governance system's University Senate.

The SIU president and Board of Trustees deal with student government through the Student Relations Office.

Students may find access to student government by attending senate meetings, dealing with student senators, or working with the student finance committee.

The Senate has also found interest in aiding the Illinois Public Interest Research Group (IPIRG) and the Student Environment Center.

The judicial branch of student government is composed of the student conduct review board, campus judicial board and the superior and inferior judicial councils. The student judicial system enforces rules and rules in matters pertaining to student rights, student government operation and violation of University rules and regulations.

The Student Government constitution preamble stresses the role of student government in matters pertaining to student welfare, student activities, student participation in University planning and administration and student opinion.

The student government at SIU has mechanism and channels available to students for their governance, welfare, activities and rights. It is open to the participation of all SIU students.

---

**Eckert's COUNTIES STORES**

The only FOOD store in CARBONDALE OPEN 7 days A week till MIDNIGHT

Country style meats from our own federally inspected plant. For many years Eckert's have had their own packing house. Recently they spent over $150,000 to modernize and meet the requirements to become USDA approved.

All Eckert's pork comes from one of our neighbors who wins awards every year as one of America's top producers. This is how we maintain our "Quality Control"...it's the same every time. All Eckert's beef is hand picked and naturally aged. Something you just don't see now-a-days.

For those who don't like foods that are loaded with preservatives we have a full line of Natural & Organic foods.

Gruyere from Switzerland Emmentaler from Germany Smoked Sausage from Denmark Camembert from France Havarti from Denmark Many Others

Our fresh peaches and apples are picked from our own Carbondale orchards. Each one is picked by hand and handled with tender loving care.

Eckert's a store that still believes in old time customer service.
Salukis’ big question marks: quarterback, offensive line

By Elliot Tompkins
Daily Egyptian Sports Writer

At the start of spring drills, SIU football coach Dick Towers set three primary objectives for the Salukis: (1) Install a new monster type 5-3 defense; (2) Find depth and strength at the quarterback position; a key spot particularly since SIU attacks with an option offense, and (3) Add depth in the offensive line positions, the weakest area on SIU’s squad.

With the opening games soon approaching, the quarterback spot is still a big question mark. Junior Larry Perkins will be the starter, but he lacks any real experience.

Last year Perkins completed eight of 28 pass attempts for 130 yards and one touchdown. He had two passes intercepted. The loss of Brad Pancoast, last year’s quarterback, is certain to hurt the Salukis. Pancoast completed 49 percent of his passes for almost 1,300 yards and eight touchdowns.

Another familiar figure will be missing from the McAndrew Stadium action. Big "Number 40," Lionel Antoine is now a pro football player. He was a first round draft choice of the Chicago Bears.

Offensive starters last were tackle guard Dick Smith, split end David Red, center Craig Rowells, all on offense. Tackle Charles Camali and linebacker Terry Anderson will be missing from the defense.

But on the bright side—the Saluki roster boasts 35 seniors, which generally means a good season.

Offensively, seven starters return: tight end Jerry Hardaway, tackle Mark Oils, guards Bill Story and Paul Dumas, running backs George Lukas and Thomas Thompson and flanker Phil Jet.

Defensively, nine are back: ends Gordon Richey and Mike O’Boyle, tackle Butch Chambers, linebacker Norris Nails and Bob Thomsa, secondary men Russ Hailey, Dennis O’Boyle, Emmitt Birt and Jim Powell.

Towers is enthusiastic about the upcoming season.

"On the basis of ability and speed, we have more quality ball players than we’ve ever had," he said.

"It is essential for us to develop some leadership among our seniors and other older players," he added.

The offensive backfield appears to be set with the return of Lukas and Thompson. Lukas was the Salukis leading rusher last year gaining 1,052 yards in 290 attempts for a 4.3 yard-per-carry average.

Thompson legged out 441 yards in 129 carries for a 3.4 yards-per-carry average.

The 1972 schedule follows:

Nov. 4, Drake at Des Moines, Iowa, Nov. 11, Louisville at Carbondale, Nov. 18, Indiana State at Car bondale.

The Salukis will be playing their home games on Astroturf this year. The Astroturf installation is part of a $15 million renovation of McAn drew Stadium. Seating capacity of the stadium is now 14,000 including standing room. After the renovation is completed seating is expected to total approximately 21,000.

The turf installation is expected to be completed before the Oct. 2 home opener against Dayton. The rest of the renovation is scheduled for a later date.
Southern hills boast state's best orchards

By Lisa Beck
Editor, Writer

The mud-splattered boots dash on the ribbon of concrete which winds through the countryside from Carbondale to Caledon. The road cuts through the small hills and groveviers which mark the outskirts of the Shawnee National Forest.

On all sides of the highway there are trees and seemingly endless stretches of fruit trees. These are the orchards which yearly yield the bounty which has made Jackson and Union counties the leaders in Illinois fruit production.

The acres of orchards are punctuated by an occasional house or packing barn. Here and there are the names of the growers who own the orchards.

The names of the handful of barons of the Jackson-Union fruit empires are familiar to most residents of the two county area. Indeed, if the grower’s name is not familiar, the name of his orchard most likely will be. Names such as Echo Valley, Springfield and Blueberry Hill are attached to identify the orchard and its owner.

But the names are not as important as the men behind these names who have built up Southern Illinois’ fruit producing industry. These men include the two dozen or so growers who belong to the fruit exchange, and the few who are so big they do not need it. These include the growers who just recently saw new migrant housing built, and those who have their own. These are the men behind the scenes in Southern Illinois’ orchards.

Midway between Carbondale and Caledon on old U.S. 51 lies the orchards of Dan McGuire. The first clue to the ownership of the orchard by the road is in the progression of signs. Heading like the old Burma Shave signs, they advertise the apples offered at the upcoming roadside stand.

The outdoor market bears the name McGuire’s in large bold letters. It is surrounded by a gravel parking lot. The inside of the market displays such fruits as watermelon, straw berries and other seasonal fruits. It is still far too early for the apple or peach crops but the berries have been ripe for almost a week.

Except for one or two customers the market is relatively deserted. Behind the counter stand a square looking man and a dark woman.

The man, dressed in jeans, T-shirt and the grime of labor, says he is Dan McGuire. One hardly expects the owner of a major orchard and an officer in many of the grower’s associations to be so young. He is probably approaching early middle age.

Walking back to his office in the back of the building, it is evident he is more than an orchard. He runs it. His office is located in the middle of a packing barn. Deserted now, except for an older woman sorting strawberries.

The barn is dark and almost cool with a damp humidity. There are empty boxes everywhere stacks of crates waiting to be filled with fruit from the adjacent orchards.

It is not hard to imagine the barn bustling with activity at the peak of the peach and apple season. But now it is quiet, a respite from the usual silence of a deserted church.

The tiny office located in the midst of the barn is absent of any luxury. The only comfort in it is the air conditioner which keeps the office almost chilly. This is undoubtedly a necessity for the grower operating the fruit business of the season.

Leaning his hands behind his head and leaning back in the swivel type office chair, says. "These 15 hour days are killing me. Then he smiles. He begins to tell of the growers in the area and how their products affect the two counties.

"Fruit is one of the oldest in-

The news is good and bad for motorists on campus

By Cary Metzelf
Student Writer

There's good news and there's bad news in the campus parking picture for fall.

First the bad news. There are still more cars on the campus than space for them, although there are plans for a new 100-car lot in the Brush Towers area.

But that addition to parking won't make much of a dent in the difference between more than 14,000 registered vehicles on campus and 7,500 spaces.

And most of the registered cars still belong to students. The past year, according to the Parking Division of the Security Office, more than 9,300 students registered cars—some 67 percent of the total.

The good news?

The price of a blue parking decal will drop $5—from $45 to $40. That may be a limited blessing to students, however, for most students who buy parking permits get the less expensive red or silver decals. The blues are usually reserved for faculty and staff.

"Any junior or senior may own and register a car at the University, and some exceptions are granted so that freshmen and sophomores may have cars," Cliffon Anderson, chairman of the campus traffic and parking committee, explains.

The exceptions are students 21 years or older, veterans, married students and students living with their parents. Students who have a certified letter from the SIU Health Service stating that a car is necessary for health reasons and students who have a certified letter writing from the SIU Office of Student Work and Financial Assistance stating that a car is necessary for employment may also qualify for exceptions to the regulations.

Four types of parking decals may be obtained from the Parking Division of the Security Office in Washington Square. They are the blue decals, red decals, which cost $290, silver decals, which cost $390, and yellow decals, which are free. Temporary permits are also issued.

"The red, silver, and the yellow parking decals may be obtained by students," Anderson explained.

Anderson said that students who show an unusual need may be allowed to purchase a blue parking decal.

"Any private vehicle found parked on university property without the proper parking decal will be given a ticket," Virgil Trummer, assistant security officer of the SIU Security Office, points out.

Trummer said the fine for parking an unregistered vehicle on university property is $5. Improper display of a parking decal or parking in the inappropriate lot are punishable by a fine of $3 if paid in five days and $5 if paid afterwards.

Overtime parking in any university meter space is punishable by a fine of $1 if paid within five days and $3 if paid afterwards.

Any students who receives a fine has the right of appeal within 14 days. The appeal must be filed at the Parking Division of the Security Office. The student will be granted a hearing before the Traffic Appeals Board.

"New students may elect to appeal their fines, which may be withheld," Trummer said.

There's more bad news coming for parking and traffic rules violators. Trummer indicated.

"Enforcement of the campus traffic rules begins in late September and early October," Trummer said.

Trummer said a new towing policy will be effective fall quarter.

The university will tow away all vehicles that impair traffic, and also areas where vehicles record indicate there are more than three parking violations on file and have not been taken care of," he said.

"Prior to towing, we will place a warning decal in the window," Trummer said. "However, we will tow the car immediately if it is blocking traffic.

One of the most important things an incoming student with a car should do, Trummer said, is "get it registered as soon as possible."
Police say nobody knows for sure how many bicycles there are on the campus because only a fraction of the number are registered. Police do say, however, that ride-hitching is illegal and bike riders will be ticketed for traffic violations.

**Bike riders cautioned about traffic, thefts**

A growing bicycle population has become a matter of increasing concern for Carbondale Police and the SIU Security Office because of traffic hazards to the cyclist, pedestrian and motorist.

The increasing use of bikes on campus has also brought an increasing crime problem. Almost every day police receive one or two or more reports of stolen bicycles or bike parts. Both city and campus police advise bike owners to register their vehicles and to obtain a stout lock and chain as standard equipment.

Approximately 800 bicycles are registered with the SIU Security Office. Police estimate, however, that there are between 1,500 and 2,000 bicycles on campus.

Cpl. Larry McKimmy of the Carbondale Police Department said cyclists commit the same kind of offenses as motorists, such as improper lane usage, going the wrong way on a one-way street, running stop signs.

He said a bicycle must adhere to the same rules of the road as an auto, with the exception of equipment. He said that violations of the rule of the road are the cause of many accidents. He pointed out that a cyclist making an abrupt stop or move could startle a motorist and possibly cause an accident.

McKimmy said police will issue tickets to cyclists if a traffic situation caused by the cyclist is hazardous. He said discretion is used when tickets are issued, but mostly in cases where equipment is missing from a bicycle.

McKimmy said free copies of the Rules of the Road for Bicycles are available at the Carbondale police station or the drivers examination station.

Black American Studies welcomes every student

By Monae Walker
Daily Egyptian Staff Writer

Although courses in Black American Studies (BAS) teach black concepts from a black frame of reference for the learning experiences of black students, Black Studies is open to any and all students. Walt Robinson, director of BAS, said recently in an interview, "We have continuously had white students enrolled in black courses," he said, "just as white professors address themselves to teaching white concepts from a white perspective, so must Black Studies teach from a black perspective.

He said all students are welcome at Black Studies and that BAS is not designed to espouse or support any one ideology or group.

"We make learning materials available concerning any and everybody's ideology such as the Black Muslims, Black Muslims, Black Muslims, Civil Rights moderates, Garveyism, and Afrocentrism or what have you. We make it available and we explore it, but it's up to the individual to do what he wants concerning a particular ideology."

He said that basically three kinds of students are served by the BAS program.

"The program was designed to meet the needs of students who want to major and specialize in Black Studies, students who want to minor in Black Studies and students who want neither to major nor minor but who want to have access to certain kinds of information, to acquire certain kinds of knowledge about his own experiences..."

The courses listed for secondary concentration in Black American Studies are GSB 109, 225; GSC 370b, 385; Anthropology 225, 285; Educational Administration and Foundations 300; Government 223; History 401, 405; 444a, b; Music 402; Sociology 335, 296.

Robotson said students take BAS courses because they think that because "they are black they will get good grades without any effort, but they find out it is not so and they begin to withdraw.

Black Studies is serious business," he said, "and in order to make it through you have to work and study because there is no time for folly."

Black American Studies was initiated at SIU in 1968 to "enhance with Afro-American heritage the total curriculum, thinking and activities of the University and its environs," Robinson said.

The present program is comprised of three components. The administrative component headed by Robinson handles the paperwork and "keeps things ticking." The academic component is directly responsible for providing credit earning courses to students and is academic coordinator.

The community involvement component is coordinated by Milton Hill and covers the activities outside of the administrative and academic area which take place in the northeast section and surrounding community of Carbondale.

"We also have programs in various prisons," Robinson added. He says frankly that BAS has some weaknesses.

"We don't have the necessary teaching muscles within the program," he said, "and we don't have any real faculty that is a part of BAS itself. There are only two people in the program that hold academic rank. That's myself and Milton Hill."

He explained that this does not mean that the program does not provide qualified teachers.

"It means that we don't have credentialed people who are a part of the program."

He said additional teaching muscle was gained by the use of instructors who are outside of the BAS program in relevant courses in Liberal Arts and Sciences and the history department.

"Hopefully," he said, "we can develop a BAS program that leads to a master's degree."

This is home base for Black American Studies.
Cable TV planning expansion in city

By Chuck Nystrom Student Writer

Carbondale's cablevision system is presently providing service to about 2,500 households within the city limits.

Dick Bomar, manager of Carbondale Cablevision, said that cable has been installed which gives service to 90 per cent of the city and 390 plans are in progress to complete the system.

Bomar said that the cablevision office is undertaking a 41 mile extension of the system of Lewis Lane which will carry the signal to residents of Lewis Park Apartments, Brookman Manor, and Georgetown.

"We have just completed a three-mile extension of the system of Lewis Lane which will carry the signal to residents of Lewis Park Apartments, Brookman Manor, and Georgetown," he said.

Another extension, which will be building now, will carry the signal south on Wall Street from Grand Avenue to past the Wall Street Quadrangles, servicing the complex and possibly Southern Hills," Bomar said.

Bomar said the company has plans for eight to 10 other lines through construction has not yet begun.

"We have got six technical people and have constructed a construction crew for the erection of these lines," Bomar said.

"It takes time and manpower to complete the servicing of an area like this," Bomar said.

The amenation of such areas as Lakewood Park has also had an effect on the service, he pointed out.

Bomar said that the 20-year franchise agreement that Carbondale Cablevision signed with the City of Carbondale requires the company to service these areas.

He described cablevision's relations with the city since the agreement as "outstanding."

Cablevision has also been a great success in Carbondale, he said. The Carbondale system is owned and operated by Cable Information Systems, which provides 1,700 such systems in the United States and has cost the firm approximately $5,000,000 to install.

A nice place to visit but a whale of a mess to sweep out—that's the Arena. The Technology Building is at left, Neckers Physical Science Building upper right.

Arena's four-acre dome covers lot of activity

By Debbie Rateverman Student Writer

How would you like to scrub 10,014 seats several nights a week? Or sweep up the paper cups and spilled popcorn left by 10,014 people?

That's what 40 student workers, helped by five full-time custodians, do seven nights a week after SIU's Arena goes home after a concert of sports events.

Their job is to keep the Arena in tip-top shape by 8 a.m. the next morning when students stream into early P.E. and health classes.

A typical week at the Arena includes 112 hours of scheduled activities—everything from classes to basketball practice in a concert by the Fifth Dimension or Blood, Sweat and Tears.

Central Registration, convocations, commemorative exercises, conferences, ice shows, dog shows, gymnastic meets, and other events are also held in the Arena.

The Arena's huge dome, which is 60 feet in diameter and encloses an area of four acres, houses lockerrooms, classrooms and the offices of Arena manager Dean Justice, the Department of Men's Physical Education, the Department of Health Education, the Athletic Ticket Office, the Office of Intercollegiate Athletics, and the Recreation and Intramurals Office.

Construction of the $4.5 million Arena began in 1962 and was completed in September 1964. The funds were paid out of SIU's $53 million share of a 1961 bond issue which provided money for university buildings throughout the state.

Arena entertainment events are self-supporting.

"We get no state or federal funds for these programs," said Bill Searcy, director of advertising and promotion for the Arena. "We try to budget our shows so we do a little better than break even. Last year was one of our most successful.

Searcy recalls that before the Arena was finished in 1964, basketball games were played in what is now the Women's Gym—or for really big games, in the Carbondale Community High School gym.

Today Searcy directs an usher corps of 65 at basketball games in the Arena.

Ushers are members of Arnold Air Society of Alpha Phi Omega fraternity. Both organizations receive money for the service.

Searcy said of the Arena staff, "We are trying to provide a service. Any money we make is poured back into new equipment or promotion of shows."

The first big show this fall will feature the rock group Chicago, scheduled for Sept. 28. They were here in 1979 and proved extremely successful. Searcy said.
It seemed to the folks at the Office of Off-Campus Housing that they'd heard that song before—those questions, that is, that students have about their rights and their obligations and the problems involved in renting a place to live.

So they set the refrain to paper, tuned in the answers they'd distilled from their collective knowledge and experience and came up with an open-ended "The Most Common Questions and Answers on Renting Off-Campus Housing.

While it may not make the Top 40, it probably will save off-campus renters a lot of headaches. Here it is, chorus and verse.

1. Who can live off campus?

All Southern Illinois University students may live off campus under the present University housing regulations. However, freshmen under the age of 20 not living with their parent or guardian are required to live in a University approved residence hall. All students under the age of 21 not living with their parent or guardian are required to live in University approved housing. University approved housing for sophomores includes caring houses, homes, dormitories, apartment units and mobile homes. Sophomore facilities must meet Carbondale City Code. Have a University approved Resident Manager who is 25 or older or a graduate student and use an approved University Standard Housing Contract.

2. What questions should be answered before becoming committed to a particular facility?

This question is particularly important since your answers can be used to avoid conflicts by obtaining as much information about a facility before any commitments are made. The best way to do this is to use a check list system. Following is a list of questions that you may need answered before signing a contract.

Questions that you may ask of your landlord include: "What is the rent? Does the rent include utilities? Am I responsible for the rent individually or must I share the responsibility legally? How much is the maximum amount for the total amount? What deposits are required and how much are they allowed to be? How is deposit refunded? Are pets allowed? Are there any violation damages assessed to all students? Is parking space available? Are there place of refuge? Are laundry facilities available? What are the house rules for extermination and garbage collection? Who is responsible for upkeep such as shampooing rugs, cleaning draperies, etc? Who is responsible for maintenance? What are the house rules for the running the tenant's contract?" Questions that probably would be best answered by the present tenants: Are repairs made promptly by the management? How does the management respond to criticisms? Is the rent easy? Does the landlord keep his promises? Other important questions may be best answered in Carbondale by consulting with the Central Illinois Public Service Company. CIPS has cost records available upon request for every facility in Carbondale. Although a trip to CIPS may be inconvenient, it could save you a considerable amount of money in heating or air-conditioning costs.

3. What should a student do before signing a contract?

It is important that the contract be read and understood before it is signed. The extra time involved is well worth the effort when you consider the possible consequences. The conditions under which the contract can be terminated and the payment plan are other items of concern that should be fully understood. Make certain that you have not agreed to assume responsibility for maintenance of the facility. A landlord will usually guarantee maintenance of such items as the furnace, wiring, plumbing and major appliances. Make certain that the contract is filled out completely, that all copies are signed. The well worth the effort that when you consider the possible consequences. The conditions under which the contract can be terminated and the payment plan are other items of concern that should be fully understood. Make certain that you have not agreed to assume responsibility for maintenance of the facility. A landlord will usually guarantee maintenance of such items as the furnace, wiring, plumbing and major appliances. Make certain that the contract is filled out completely, that all copies are signed.

4. Can a person under 21 years of age sign a legal contract?

Yes. Illinois state law provides that a tenant can be held responsible for contracts involving the necessities of life such as food and shelter.

5. Are verbal agreements binding?

Verbal agreements are binding but difficult if not impossible to enforce. A verbal agreement is only as good as the words of the contracting parties. To be safe all verbal agreements of any consequence should be in writing and signed. Never permit a verbal agreement to conflict with any written signed statements and make sure that any promises of repair or maintenance are stated on the contract with a completion date and statement of consequences added should the repairs not be made.

6. What is a joint and several contract?

A joint and several contract binds all the tenants of a facility to the total rent and damages in that facility. This means that should one roommate leave, breaking his contract legally or illegally, the rest of the roommates will have to assume the responsibility for paying his rent.

7. What is an eviction?

Usually, evictions are costly in time and money. The landlord is required to send a written statement indicating that you will be evicted because of a violation of your contract or house rules. An appropriate amount of time, depending on the reason, may be the time period prior to when you are required to vacate the facility. If you are being evicted, the time period for non-payment of rent is 5 days, 30 days for contract violation and 30 days for any other reason. If you are evicted and vacate, you will be held responsible for the full amount of rent due for the term of the contract.

8. What are the legal ways to terminate a contract?

Several procedures may be followed for legally terminating a contract. The most generally accepted way is to find a replacement. This usually involves advertising for a replacement, bringing him to the landlord for his acceptance, which should not be unnecessarily withheld and having the replacement sign a new contract.

The SIU Model Contract has two circumstances under which it may be terminated without penalty. The first is forced withdrawal from the University because of physical or mental incapacity (such incapacity verified by a physician) or secondly, a serious financial hardship.

Several other clauses in the contract make provisions which eliminates some liability for breaking the contract. For example, a contract can be terminated with a liability of half the total charges due if 14 days notice is given prior to the end of the quarter.

9. What can be done to insure the return of deposit or security deposits?

Check with former tenants to establish what type of reputation the landlord has for returning deposits. A student, upon moving in, can use an inventory Check-In and Check-Out List. This list provides you with a means for showing what damages existed at the start of your occupancy. When you leave the facility, this could save problems because it offers some evidence that various damages were not caused by you. Inventory Check Lists are available at the Office of Off-Campus Students upon request.

10. What is the Model Contract?

The Model Contract is a lease contract constructed through the efforts of many people in the community. It has been endorsed by the Greater Carbondale Area Chamber of Commerce and Student Government. The Office of Off-Campus Housing believes that it is the most easily understood, thorough and fairest of all contracts for student tenants. It (Continued on page 23A)
11. What is the Arbitration Board?  
The Arbitration Board is composed of five students selected by the student body president and five businessmen selected by the President of the Carbondale Chamber of Commerce. This board operates under Illinois state statutes and its decisions are final. Any dispute arising out of the Standard or Model Housing Contracts may be brought before the Arbitration Board on request of either party involved in the complaint for any amount under $1,000. Any disputes arising from private contracts may be brought before the Board only by both parties request arbitration in writing and agree to abide by the board's decision.

12. Does a landlord have free access rights to his rented facility?  
Absolute free access rights are not permitted by Illinois state law. Any contract stating that a landlord has free access rights is not enforceable. The rationale behind this law is that to rent a facility automatically restricts the access rights of the landlord. If the landlord retains all access rights, he is in fact, renting nothing. Therefore, before a landlord is permitted to enter your facility, a prior agreement should exist indicating the conditions upon which entrance will be permitted. Emergency repairs are the exception to this rule.

13. What should one consider when renting a mobile home?  
The most important thing to consider when renting a mobile home is to check its utility consumption during the peak hot and cold months. Mobile homes are not properly insulated and the utility bill could be unusually high. Here again, CIPS could provide information on past utility usage for a particular facility. One thing to remember when renting a mobile home is that constant heat must be maintained during the winter months so pipes and plumbing will not freeze and break. Ordinarily, any broken pipes on the inside of the trailer are charged to the tenant, those freezing on the outside are usually the responsibility of the landlord.

14. Where can a student go concerning a housing problem?  
There are several agencies in the Carbondale area that can help students with housing problems. One agency is the Office of Off-Campus Students. Counselors are available to students and households with problems concerning housing matters. Another important agency in Carbondale is the Student Tenant Union. It has volunteer counselors available to help students.

15. Are there legal services available to students?  
This must be answered with a qualitative “yes.” The Legal Aid Assistance Program in Carbondale is available to some students. However, the large case load it handles precludes its ability to handle every student-landlord dispute. Therefore, it is recommended that a student begin by going either to the Office of Off-Campus Students or to the Student Tenant Union for legal information or help in resolving a student-landlord dispute.

16. Where can a student go to have an outstanding lease renewed?  
The Office of Off-Campus Students or the Student Tenant Union. Any problems involving a lease should be resolved through these agencies.

17. Can Carbondale City Codes protect student interests?  
The Carbondale-City-Codes Enforcement Department has a staff available to inspect and help enforce Carbondale City Codes. A student should bear in mind that Carbondale City Codes are minimal standards for safety and health and these minimal standards will not provide him with luxury items.

Typical City Codes include having: At least one workable window, secured screens for each room of the facility, proper ventilation (a vent fan or workable window with a screen) and two means of egress to and from the facility with workable locks.

The facility must be structurally sound with no leaks, holes in the walls or rotten sills, the electrical wiring and utility lines must be up to standards and proper garbage disposal units with lids.

Any questions about codes should be directed to the Carbondale City Code Department, 548-1282.

18. Where is the best place to find housing?  
There are many places to look in finding vacancies. Of course, the area newspapers publish daily vacancy listings. The Office of Off-Campus Students also publishes a thorough vacancy listing. Included in the list are the type of facilities available, information concerning utilities, furnishings, types of contracts and other pertinent facts. Does an academic suspension, marriage, student teaching or graduation release one from his contract without liability?

These actions ordinarily do not release one from his contract. However, the Standard Housing Contract for Accepted Living Centers provides for release if a student is academically suspended. These actions are treated as special termination preferences for which special consideration may be agreed to by the contracting parties, but it does not automatically create sufficient cause for release.
Howdy! I've been running around Southern Illinois for about 8½ years now, looking for some good music to play while I'm prospecting. I've finally found a store that has EVERYTHING I want. They've got the best selection of CLASSICAL, JAZZ, POP, FOLK, COUNTRY WESTERN, SOUND EFFECTS, and COMEDY albums I've ever seen. Why, they even have little 45 rpm records, and those tape cartridge things for your car. They call their place Discount Records.

Even if you don't want to buy anything you should mosey into their store and look around. They have some of the strangest looking varmints working there, and they're mighty friendly, too.
Controversy no stranger at SIU

By John Davis
Student Writer

Controversy is not alien to SIU. Incoming freshman and new students may find themselves taking sides on such issues as:

Who is the student body president—Jim Taylor or Jim Peters? Is a proposed new health care plan for students worth $3 a year? Should there be more black representation on the University Senate? Should the textbook rental service be discontinued?

Jim Taylor, a black from the Chicago suburb, junior in design, was elected student body president for the coming academic year in an election last May. However, George Camille, the outgoing president, disqualified Taylor on grounds that Taylor was academically ineligible during the election.

Camille then appointed Jim Peters, the place finisher in the election, as president. Peters, senior from Quincy, served the past year as vice president.

Mary Walker, project coordinator for the advisory board, said, "Only primary health care has been provided in the past. This means that if a student breaks his arm, it costs him extra for treatment."

Many students feel that the cost of the improved plan will far exceed costs of the medical care that most students need.

The University Senate has one black member among its 48 members. The lone black spokesman, Jerry Lahey, director of the Affirmative Action Programs, who is a representative of the Faculty Council on the U-Senate, proposed that black representation on the Senate be set at a minimum of two. Under the proposal, a second representative could be chosen by the Black Faculty and Staff Council.

A health care advisory board has proposed a new health plan to improve the service on campus. However, the new plan if implemented, will cost each student $5 a year or $25 a quarter. It would be mandatory for students but optional for family members.

Taylor asked the Student Conduct Review Board to arbitrate the case, and the board, by a unanimous decision, upheld Taylor's qualifications and his presidency.

The controversy seems likely to carry over into Student Government affairs this fall.

The proposal failed by three votes to get the required majority for passing in the U-Senate. An objection to the proposal was that it would provide double representation for blacks, as they would be represented both by the existing constituencies and by the Black Faculty and Staff council.

Opposition has been voiced to the textbook rental service at SIU. One is that the present system hampers academic progress because it slows down adoption of new texts, and provides books which are either poor in quality or obsolete.

However, some feel it would be a financial burden on students to discontinue the service and require them to buy books. Students enrolled for 11 credit hours or more pay $8 per quarter for book rental.

Students, faculty and staff have been debating, arguing and writing letters to the editor, about other issues—Women's Lab Gay Lab, the size of pay raises for administrators vs. those for teachers, and, of course, the Vietnam War, high prices and pollution.

The issues may change, but controversy is once measure of the vitality of a campus, some say; can be expected to continue. In fact, the University provides a Free Forum area where anybody who wishes may take to the soapbox.

Black pipe organ donated to Humanities Museum

A pipe organ built about the turn of the century—the first one made by the Wick Organ Company of Highland—has been donated to the University at Carbondale by Mr. and Mrs. Martin Wick. It will be housed in the Museum wing of the new Humanities Building now under construction.

C.F. MARTIN & CO
The President's Scholar Program at SIU is a University-wide program aimed at helping bright students make the most of their potentials and opportunities for academic achievement, says Director Allan L. Lange.

But that doesn't mean they're encouraged just to be bookworms, he adds.

The University-funded program, initiated in 1967, lists approximately 400 SIU students as President's Scholars.

It has three main objectives—to identify outstanding academic potential, to provide opportunities for developing that potential and to encourage interaction among scholars and faculty. Lange said.

A sliding scale is used to determine eligibility for membership in the program Denise Rabe, scholar program staff member, said.

Incoming students with an ACT composite score of 38 who also rank in the top 25 percent of their high school class are eligible. Students with a composite of 27 who rank in the top 15 percent are invited to join the program as incoming students.

Students who were not invited to participate in the program as incoming freshmen may also be eligible under certain conditions. Ms. Rabe said.

Students are required to participate in one of four types of honors work each year. These sections have limited enrollment.

In addition, General Studies offers honors sections and laboratories for which students are not restricted to President's Scholars.

Therefore, participation criteria for students are 4.0 on a 5.0 scale. Rabe said. If a student falls below this mark he may be temporarily dropped.

The President's Scholar is required to participate in one of four types of honors work each year. Honors work includes enrollment in General Studies courses that are restricted to President's Scholars.

The program also has a student council organization recognized by student activities.

Overall, the program requires that work less than "A" quality not be accepted by the sponsor.

The fourth option to a scholar is the program's quarterly seminars.

These seminars are offered by students, the program's staff and interested faculty members.

Seminars for the 1972-1973 President's Scholar Program include "Politics and the Media," "Sociological and Psychological Aspects of American Women" and "Drugs and Pharmaceuticals."

President's Scholars are encouraged to participate in a primary learning experience-type course. Lange said. Independent study and seminars employ a primary learning experience.

The President's Scholar Program attempts to expand academic freedom of motivated students beyond the scope of independent study and seminars.

Lange and Fran Manea, a President's Scholar staff member, proposed the faculty council create a President's Degree Program, to provide a distinctive set of educational experiences for those students of exceptional academic potential who can best profit from them," Lange said.

Under this program, no formal degree requirements other than 122 credit hours for graduation are made. A faculty member would work with the student redesigning his curriculum.

President's Scholar Dick Puskas studies near the journalism wing of the Communications Building.
A solemn figure bent over a large control panel. The numerous dials, meters and controls stared blankly. His brow was wrinkled in thought as he looked over the panel. A few sheets of paper lay in front of him. Above was a large clock. He looked up—it was one o’clock, it was time to retire. His hands moved quickly, adjusting a few switches. He took a deep breath. “Hello, everyone, this is the Kvin J. Potts Show.”

Relief crept across his face. From deep within the electronic machinery came a song by Carol King. Across campus, the same song was being heard by hundreds of listeners. Thus began another day for a WIDB disk jockey.

The two-year-old radio station is located in the basement of Wright Hall Residence Hall in University Park. This is where I saw Potts, a freshman from Chicago. He was seated behind the main control panel which contained tape recorders, turntables and other electronic sundry. The studio, enclosed on two sides by glass walls, looked like an electronic fish tank. In the tank was a solitary “fish.”

The record ended, and Potts started talking into the microphone. “Here’s one out to Debbie at Max Smith. How about a little Jungle Fever, baby,” suggested Potts.

This was followed by a ban melody that was mingled with the grumblings of some female. Unfortunately, all this sound was only from a popular record.

Playing with his board, Potts nodded his head. He had three minutes of semi-relaxation.

“Vinyl is really an art form,” said Potts, fondling a few controls. “You are communicating to people. To do this, you have to know about music and trends in music. You have to be able to perform, and you also have to know the technical end.”

This was indeed evident. As he talked, he was busy turning the next record, adjusting controls and preparing to speak again to his audience.

Potts was on comb. This is how he was functioning as disc jockey and as station engineer. This is standard procedure for most of the disc jockeys. He looked hard pressed for time.

With his hands still busy at the panel, Potts said: “Most people think that all a disc jockey does is play records. This isn’t true. We have to cue up records, adjust the equipment and write in our FCC (Federal Communications Commission) log. The log must contain everything that goes on the air.”

A phone call interrupted as Potts answered it. Talked a few moments. Then spoke into the microphone: “Hey, people. Jack, ever at Schneider wants to hear Led Zeppelin and he’s all that.”

The heavy rock beat of the song accompanied Potts’ continuing monologue. My foot kept time to the beat. The main basis of creativity in broadcasting is to know your audience. Things are changing, you have to always adapt and create to meet the change and variety is the main appeal of the top 40 radio stations,” said Potts, who could not be seen because he had crowded under a table in search for something.

When he reappeared, he smiled and said: “You know, I like to play the jester—to make people feel better if they happen to be down. This is my main thought in radio as an art.”

Part of making people happy is talking to them on the phone. The phone rings many times during the course of a show. Most people call to request certain records. But Potts also receives some unusual phone calls.

“One day I got a call that really shook me up,” reminisced Potts. “I had just seen a movie called Play Misty for Me—you know, the one where this DJ gets these calls from a psycho girl who keeps requesting that same song.”

“Well, that same day,” he continued, “I kept getting a call from a sexy-sounding girl who would say nothing except play Misty for me. That shook me up quite awhile.”

But not all of Potts’ phone calls have been unpleasant.

While cueing up another record, Potts said: “I also get calls from some real nice girls. You might say they’re tame. It’s great to be able to mix business with pleasure.”

There are sometimes problems associated with being a disc jockey. Sometimes one discovers that you have been talking into a microphone that hasn’t been plugged in. At other times you run out of things and then panic sets in.

“The hardest part of the job is that you have to be on your toes constantly,” said Potts. “I still have to write in his log book. It’s hard to relax here, and when I get done, I’m really tired.”
Sports, beach are popular

• SIU recreation is a year-round thing

By Phil Spring
Student Writer

Recreation, like beauty, may be in the eye of the beholder. What turns one person on may leave another cold. A student who enjoys window shopping, browsing in museums, or engaging in city nightlife, for instance, would probably find the happiest school near a large city.

On the other hand, a student who likes tennis, swimming, sailing, hiking, fishing, hunting, horseback riding, sky diving, golf, flag football, basketball, handball, softball, baseball or billiards, would likely find SIU an exciting place.

A popular recreational sport on campus is tennis. SIU has 12 excellent, lighted tennis courts, located west of the SIU Arena, which are available to the students from 7 a.m. to midnight daily.

C.W. Thomas, director of campus lake and recreation, said about 14,000 people used the courts last year—an estimate that includes only people who used the courts under the lights.

Aside from the tennis courts near the Arena, SIU has four others near Small Group Housing and two south of University Trailer Courts on Wall Street.

Adjacent to the Arena tennis courts is a large grassy area which includes enclosed handball courts and softball and soccer fields.

Basketball is another popular campus sport. The SIU facilities available to students for recreational basketball one is located at Pulliam Hall, the other at the Women's Gymnasium in the east section of the Old Campus.

Thomas said that, unofficially, the Pulliam gym is the favorite from 3 p.m. to 11 p.m. Monday through Friday and from 1 p.m. to 11 p.m. Saturday and Sunday during the regular school year. The Women's Gym, which has a larger playing area but fewer hours scheduled for recreational basketball, is tentatively scheduled to be open from 7 to 10 p.m. FRiday and Saturday, and from 2 to 5 p.m. on Sunday, said Ms. Charlotte West, director of the Women's Recreational Association.

Downstairs from Pulliam gym, swimmers can frolic in the University Pool, which has the same hours as the gym.

Three students who enjoy team-work and the thrill of competition can take advantage of a well-organized intramural athletic program. Thomas said intramural sports to be offered this year are flag football, tennis (singles and doubles), turkey trot (cross country), basketball, free throw shooting, swimming, floor hockey, volleyball, wrestling, weight lifting, frisbee throwing, track and field, two-man canoe race, softball (12-inch and 16-inch), handball (singles and doubles) and racquetball (singles and doubles).

Women's Recreational Association (WRA) also offers a complete intramural athletic program which includes activities such as swimming, bowling and fencing. A complete schedule of women's intramural and varsity recreational activities can be obtained at Women's Gym, Room 206.

Adjacent to Pulliam gym, Campus lake, just south of the main part of campus, offers a wide range of activities, such as swimming, picnicking, fishing or just plain suntanning and people watching. It has a 60-foot beach and a steady parade of bikinis, when bikinis are in season.

Thomas, who is in charge of the lake area, said the beach, which is closed until June, will open on Friday and then, it is open from 1 to 6 p.m. daily, weather permitting. The beach has sectioned swimming areas, a beachhouse and eight lifeguards.

Boats and canoes, which dot the lake during the warmer months, can be rented out for 50 cents an hour from the boating facility located at the east end of the lake. Besides boating and canoes, bicycles, tandems and other recreational equipment can be obtained from the facility for a small, specific fee.

Not satisfied with a boat ride across the campus lake? For a little cash and lots of nerve, the SIU Sport Parachute Club will be happy to take new members skydiving.

Mrs. Emily Vaughn, club member, said that for $55 the club will give official instruction and loan adequate equipment, a safety helmet and, of course, a chute—for a new member to make his first jump.

Mrs. Vaughn said anyone interested in joining the club or who simply want to observe the jump should contact Bill Wenger, president of the club.

Horseback riding? The Saluki Stables, located about 11 miles west of the campus, offers riding the year around (weather permitting) from 8 to 3 p.m. Student fees are $1.65 an hour Monday through Friday and $2.15 on weekends.

Hiking, camping, fishing or hunting? Carbondale is surrounded by the Shawnee National Forest which includes such points of interest as Lake of Egypt, Tower Rock, and Garden of the Gods.

Within bicycling distance of the campus are the Crab Orchard (part of the Illinois-Wisconsin-Indiana Wildlife Refuge), Little Grassy and Devil's Kitchen lakes, all of which provide bass fishing and camping ground.

Sailing? The SIU Sailing Club offers the novice a chance to learn to sail and be off campus, under the expertise of sailing master and sailing instructor, faculty advisor for the club, said a student can be taught to sail within a ten-week quarter. Students interested in joining the club must contact Jay Cop, president of the club, Hen neberger said.

A local banking CONNECTION is GOOD BUSINESS!

A local bank account can help you in several ways. It saves you time, money and numerous problems. You won't have to wait for your deposits to clear your home town bank by mail. Save postage too. We are conveniently located in town with two drive-up facilities.

You'll also save time shopping. Merchants in town appreciate checks from customers with local chequing accounts. Now is the time to get started. Stop in and open an account this week. We are open during our special banking hours. Make your local banking connection with us!

Special Hours
We letter will be open for new accounts only!
Sept. 20, 21, 22 Until 6 p.m.

Regular hours
Daily 9:00 a.m.-9:00 p.m.
Friday 9:00 a.m.-3:00 p.m.
4:00-6:00 p.m.
Drive-in 3:00 p.m.
Windows 8:30 a.m.-3:30 p.m.
All America prize more than paper

By Monroe Walker
Daily Egyptian Staff Writer

Carbondale’s All America City Award is just an 11 by 14 inch piece of paper hanging on the city’s courthouse wall but it represents a chance for citizens to define their own government, says Stan Bond, assistant director of industrial development.

“The award itself has nothing to do with the physical beauty of the city,” he said, “the real beauty of Carbondale is the desire of citizens to get the job done that needs to be done for the community.”

He explained that the award represents not good government, but “democratic government.”

“Government must be at the local level,” he said. “It must present the kind of things that allow citizens to do things for themselves.”

He said local government tends to lose some of the real needs of the community and that is why it is important to have a responsive government.

“The significance of the award is the way citizens react to it,” he said. “If the award encourages citizen action and participation in city affairs then it is representative of a great deal.”

He explained that the award was a step in the right direction and that more and more direct benefits were obtained in receiving the award.

“It may attract some industry and encourage commercial growth but that’s not the real intent,” he said. “The real intent is more concern and involvement by the community and less reliance upon government to meet the city’s needs.”

The award was presented when Carbondale was designated an All America city in a competition sponsored jointly by the National Municipal League and the Saturday Evening Post magazine.

Mayor Noah Eckert designated 1972 as “All America City Year” in Carbondale, calling the winning of the award “just the beginning” in the city’s self-improvement efforts.

In addition to Carbondale, eight other cities were awarded All America designation. Below, Wisconsin.

Historic woods make campus beauty spot

By Carmen Nappi
Student Writer

Thompson Woods has been an area of natural beauty for the people of Carbondale and SIU for nearly 150 years.

The woods were a popular relaxing spot for Carbondale's first settlers and even a meeting place for the newly formed Grand Army of the Republic in the mid-1800's. When the cornerstone for Old Main was laid in 1928, the woods were already 20 to 30 years old.

Thompson Woods wasn’t owned by the University, however, until 1929. Mrs. Lovina R. Thompson sold the then 10 acre tract to the University for $6.250—with the understanding that it was to remain in a natural state.

Through the years since that purchase, it has been a longstanding policy of SIU to keep Thompson Woods in its natural state. The University has added paths and lights, but this was done so that more could enjoy the beauty of the grove.

In 1960, SIU planted about 400 beechn and maple saplings in and around the perimeter of the woods which are made up mainly of maturing black and red oak. They only maintenance done to the woods is slight pruning every five years, but the dead limbs that are pruned are left on the ground to provide homes for insects and small animals.

There are about 50 types of birds and small animals living in the grove. There are squirrels, rabbits, moles, cardinals, woodpeckers, and three varieties of non-poisonous snakes.

Bersheba Cairo can outrun any creature on two legs

By Debby Rainerman
Student Writer

Who's the fastest Saluki? Ivory Cricket! Dave Hall!
The answer probably is Bersheba Cairo, better known as Cricket, one of the 12 Saluki mascots living in the Cooperative Wildlife Service's kennels on Route 4.

Billard Klimstra, who is in charge of caring for the dogs, said that Salukis are a breed of ancient Egyptian hunting dogs, "very fleet and supposedly the first hunting dogs used by man. They were chosen as team mascots because the Southern Illinois area is called 'Little Egypt'."

Klimstra said that adult male Salukis are from 23 to 28 inches high, long-haired and that Salukis range in color from black to white with many shades in between.

Klimstra recalls that when he came to SIU about 23 years ago, there were no Saluki mascots, although the athletic teams were called the Salukis.

"I guess it was about 20 years ago when they got the first one," he said. "It was as red as fire."

Klimstra said he "vaguely remembers that the first Saluki was buried somewhere on campus," but he isn't sure of the spot.

Besides Cricket, who gave birth to eight puppies in May, 1971, SIU has a male Saluki, Billa, and two older females.

Cricket's eight puppies include six females and two males. A spokesman for Alpha Phi Omega service fraternity, which shows the Salukis at sports events and parades, said the eight puppies have not definitely been named yet.

Klimstra feels that the eight puppies have placed an unbearable burden on the University. "We're in no position to maintain 12 dogs," he said.

"To make matters worse, Student Government refused to allocate the $3,000 we requested this year," Klimstra said. "We got absolutely nothing.

"I have a feeling there will be an appeal to students and alumni for money," he predicted. "Or we may try to sell several of the dogs.

Klimstra feels SIU should keep at least four of the dogs, including the male Billa. He foresees difficulty in selling some of them, however, because "their blood lines aren't that good. These aren't show dogs.

"But we have some very fine pups," Klimstra said.

He explained that expenses involved in caring for the dogs include "student workers, who live out at the kennels and feed and exercise the dogs, food and veterinarian bills. Something has to be done soon."
Chicago signed for Arena; Warwick, Cosby tentative

By Pat Naeeman
Daily Egyptian Staff Writer

Although dates for a series of rock-oriented concerts have been mapped out for fall quarter by Arena management, the only group currently signed is Chicago. Leroy Fehrenkamp, assistant manager, reported.

Concert series programmer Paul Hibbs, however, has not been able to come up with even tentative plans, since it has not been decided how long Convocation will be retained.

Sept. 28 is set for the Chicago concert date in the Arena, but the other concert dates set by Arena management—Oct. 28, Nov. 9 and Dec. 8 or 9—were still without any definite commitments from artists in mid-July, Fehrenkamp said.

A tentative commitment has been received from Diane Warwick and Bill Cosby for the Oct. 28 Homecoming date, but no contract has been signed. Fehrenkamp said the Warwick-Cosby show would be the only non-rock concert of the series.

The Arena management also has been negotiating with the James Gang, Elton John, Yes and the Jefferson Airplane. Fehrenkamp said, but no definite decision on these has yet been reached.

Three surveys have been taken of students to determine what type of performer they prefer. Fehrenkamp said, and the Arena staff has been attempting to use these as a guide in booking shows.

He noted that there is considerable difference in the type of performers preferred by black and white students.

Arena management has found, he said, that the groups involved on the surveys are performers which the Arena has been attempting to get for some time but has been unable to book because of money or scheduling difficulties.

Programming the Convocation Series, said Willis Malone, executive vice-president, is not so much a question of whether the course will be granted as much credit as when the course will be cancelled.

As of July 18, this was still to be decided, but both Malone and Hibbs said that they expected a decision before end of summer quarter.

Malone explained that some students already have registered to take the one-hour course for fall quarter. The course may be con-
tinued for the benefit of those students, he said.

The Faculty Council had recommended that Convocation no longer be offered for course credit because of controversy over the behavior of students attending the series.

The once-weekly series of lectures and performances—a Thursday afternoon fixture at the Arena—was frequently disrupted during the 1971-72 season by members of the audience talking and heckling during presentations.

**Little yellow card informs new students where it's at at SIU**

By Dave Butler

If you've ever wondered "where's it at," then a tiny yellow card that SIU's Orientation Committee hands out may be your ace in the hole. The little yellow card is passed out during Orientation Week to acquaint new students with the campus. But the cards still are being used for, according to Jenny Lucas, Orientation Committee chairman. Almost every imaginable type of question is asked and answered on this "magic card," appropriately entitled "Where's it at?"

Old students want the card, too. Ms. Lucas said that many students request the cards because of the itemized list of help. "I feel physically ill," she said.

That's only one of the two half of statements on the card. Others include "I need legal assistance," "I think I am overused," "I need draft information" and even "I have a question not listed here." Along with which department to contact for specific help, the card lists telephone numbers. Alternate agencies and numbers are given. "I'm surprised we never had it before," Ms. Lucas said.

Students have appreciated the card, and the idea has received a great response so far, she said. The Information Committee got the idea from Temple University.

---

**Self-service is the key**

By Doris Bennett

Student Writer

The undergraduate library in Morris Library is one of several changes the library has undergone. Not only is the undergraduate library new, it is the pride of P.S. Randall, director of Morris Library.

The undergraduate library, which is located on the first floor, opened fall quarter, 1971. Randall said the library has its own staff and its own collection of books.

"We've created an undergraduate library for years," Randall said. "It has become a nationwide trend to have an undergraduate library."

Randall said the University of Illinois, for example, has an undergraduate library, built underground and connected to a main library by a tunnel. "We felt that it was better to keep our undergraduate library in the building, in case an undergraduate could not find what he needs," Randall said. "That way he can go upstairs to a particular subject division and go into that collection."

Randall said every book in the undergraduate library is duplicated in one of the subject libraries.

"The books in the undergraduate library are based on a published list of what a good college library should have," Randall said. "The books were specially bought to duplicate what is in the rest of the collection."

"The undergraduate library contains 50,000 volumes," Randall said. "Morris Library has a total of more than 1.5 million books."

Randall pointed out the loan period for books is only three weeks. Therefore, graduate students and faculty should borrow books from the subject libraries, he said. Family members are normally loaned books for six-week periods.

"The only problem," Randall said, "is that our new facility does not have enough seats."

Randall said other changes in Morris Library include moving the reserve room to the southwest corner of the first floor from the library basement. It is now the administration of the undergraduate librarian and is a self-service collection, Randall explained.

Randall said one of the major problems confronting Morris Library is a cutback in state funds for ordering books and a cutback in staff.

Another problem is the stealing and mutilation of books.

"We have been trying for years to get turnstiles installed at exits to assist checkers," he said. "For a while we thought everything was going, but a state fire marshall objected because turnstiles would be a fire hazard, and we would have to build an emergency exit to comply with the fire code."

Randall said that an emergency exit is proposed for the card catalog room.

"The only problem is that the door will cost almost twice as much as the turnstiles," he said. "He said the turnstiles would cost $5,000 and the total cost including the emergency door would total approximately $17,000."

Randall said Morris Library employs two full-time book checkers. There used to be student checkers who changed every hour.

"Now we are putting graduate students at the exits so that they will spend a whole evening there instead of rotating," he explained.

Randall said that companies which make electronic detection systems have estimated the loss from stolen or mutilated books at 3 percent of $1 million at Morris Library. "They want to make the loss soundbig so that we will buy their installations," Randall said. "So we just cut the figure in half and estimate the loss at approximately $25,000 per year."

Randall said that with an electronic system a piece of specially treated paper is placed inside each book and there is a detection screen at each exit.

"Whenever someone passes the screen with a book from the library," Randall said, "a light comes on and the turnstiles lock."

Randall said that twice an item is a very costly. He said that each piece of the specially treated paper costs 11 cents.

"We have over a million books, plus the monthly rent for the detection screens. That is about a $10,000 thousand operation."

"We would rather have turnstiles because they are less expensive," he said, "but anyone can beat a system so no matter how expensive it is. Nothing is foolproof. We are just trying to do the best we can."

When asked how he personally felt about mutilated or stolen books, Randall said, "Mutilation is worse than stealing, it makes the book useless."

Randall said the open-shelf concept is directly related to the mutilation and theft of books. Randall said future plans include introducing some self-instruction equipment in the undergraduate library to help students learn how to use the library, especially freshmen.

"Another possible innovation," Randall said, "is a circulation records system that would be directed by cable to the computer center to help locate lost or stolen IDs. We could put a students social security number into the computer across campus and if anyone tried to use it, the computer would detect it immediately."

Randall said the innovation could also help locate books in circulation. He said the computer, for example, would signal that a requested book because they are less expensive. For a while it could then be sent a notice in the book became available.

"Actually we could not go back to closed stacks because of the way the library is designed," Randall said. "It is just like modern supermarkets and old fashioned grocery stores. How could you squeeze the Champagne?"
Students at end of their rope find help at end of this line

On 750 occasions last year someone dialed the telephone number 637-3366 in Carbondale to utter a "cry for help." Twenty-five times the cry came through as a right announcement: "I'm going to kill myself." Far more often, though, the caller needed to be helped through an interlude of depression, loneliness, anxiety and confusion. The caller, it seems, is a member of an unpaid volunteer who has been trained in the fast-growing service called Crisis Intervention.

Nowadays hardly any call themselves suicide lines, because the work itself tends to discourage callers who may not exactly want to do themselves in, but who may nevertheless require some quick counseling assistance.

The Crisis Intervention Center on the campus of SIU was set up last year by faculty psychologist Thomas Schill. Schill figures the stuttering operation (two phones, an electronic answering service for after-hours, and some advertising change) has cost about $3.13 per cry for help. He figures it's worth every cent and plenty more.

I like the time the girl had the gas turned on, or the other time the girl slashed her wrists. CIC alerted ambulance service, and later the girls were talked into therapy. They're okay.

Or the woman who called, ostensibly to seek fast in placing her baby out for adoption. The CIC volunteer was able to discover after some minutes that the caller was actually threatening suicide. She refused to say where she was, and at one point her only response to questions was heavy breathing. While one CIC worker kept her on the phone, another one contacted city police, who effected a rescue. "She's still among the living," says Schill.

The system works with approximately 90 trained, available volunteers, mostly of their SU grad students in psychology. They work two at a time in two three-hour shifts between 8 p.m. and 2 a.m. That's when people need the most help, especially since other counseling agencies are usually shut down.

Buy-girl breakups account for the largest number of calls, next to general depression.

Somewhere between the extreme of suicidal intentions and the heavy kilos are serious emotional problems that CIC people deem demanding of speedy therapy. There were 42 of these last year.

In many cases, Crisis Intervention teams will go to the person and stay with him through the night, if necessary, and then get him into psychological counseling the next day.

The week before final examinations— that seems to be the heaviest crisis period. Schill says that by the time tests actually begin, many uptight students seem to resolve their problems— "they make up their minds to do one thing or another"— and the anxiety index subsides.

Bad trips from drugs triggered only 18 crisis calls last year, but another campus-related service, Synergy, deals exclusively with that problem.

Callers have been equally divided between men and women contrary to the experience of outside clinical agencies, where two thirds of the clients are female. Schill believes the anonymity afforded by the hotline system encourages men to shed their tough-guy roles, and to bare their tortured souls.

More women than men will call with suicide on their minds, but men tend to be more serious about their intentions, according to Schill. So far, no one CIC at SIU has talked to has ever carried out the threat.

A problem for the service, and a source of understandable despair for the volunteers, are crank calls. But, as Schill says, they're trained to handle every caller's problem as if it were real and immediate.

In fact, the very first call CIC ever got was an obscene one. "It's glad it came to us," says Schill. "At least he wasn't bothering someone else."

Supplication isn't required, but maybe it helps.

Straight-A student questionnaire turns up grade-A kooky answers

Filling out forms is a basic condition of college life these days and most students suffer it about like GI's suffer standing in lines.

But there's one questionnaire that the recipients seem to suffer gladly, a form from the News Service of Southern Illinois University at Carbondale that goes to students who make "straight A's."

Each year's sampling turns up some affect responses and some quirky reflections of what it's like to be a student and what's going on in the contemporary college head.

For instance:

Activities— "Filling out irrelevant forms... Latis of bike riding with my dog, Annabelle... "Study! Study!... Study...." Deta.selling corn (this from a coed who says she's done this for seven years)." "Hobbies— "Raising Peko-a-poo puppies..." "Men..." "Fixing broken appliances..." (two people claimed this). "Pop culture..." "Trivia, mostly films..." "Enjoying the beauty of the world..." "Losing..." "Pollution..." "Taking walks with my husband, Dan..." "Wine..." and written quite badly "New baby born Dec. 16, 1971, Doctor's Memorial Hospital, Carbondale. Brian Christopher, 7 lbs. 2 oz..."

Special Interests— "Development of alternate power source for the internal combustion engine..." "The future of mankind..."

Must have their photographs taken for home town newspapers, some prefer not to. One's explanation: "My hometown paper doesn't print anything but pictures of duller's children."

In past years, the blank marked "Plans on grad..." "don't have been filled in with a certain explicitness. Nowadays, it is apparent that a good number of students—and there are many of the very best ones—are not at all sure what they'll be doing. "Don't know..." "Loose..." "Until..." and "Get a job, if possible..." these are showing up more and more. The old search for permanence goes on, however. Like "Be the world's greatest French teacher..." "Be an educated bum..." "Acquiring some land and building and furnishing my own house from scratch..." "A girl student..." "I did..." "Six months..." and "had finished her graduation requirements..." "to be a farm wife and a mother..." (this from one who is getting a degree in social welfare)."

Then there is the undergrad who ran up all those "A's" while working a full-time job. What are his plans on graduation? "To raise, breed and sell parrots."
Legal Assistance is the name
Helping the poor is their game

By Jim Polka
Student Writer

The Legal Assistance Foundation of Southern Illinois provides knights in shining armor for people who are financially unable to hire a lawyer.

Anyone making less than $2,000 a year is eligible to receive service from the foundation. John O’Neal, administrative assistant, said in a recent interview.

O’Neal’s office is a cramped, little room in the foundation’s headquarters at 127 N. Washington. Papers covered his desk. It looked like a place where a lot of work gets done and a lot of paper is placed.

He explained that the program is funded by the Office of Economic Opportunity and is part of a nationwide system of free legal service. The foundation handles a wide variety of civil matters including divorce, social security problems, adoption, guardianships and landlord-tenant problems.

O’Neal is a slender, energetic individual. The first thing you notice about him is his voice. It’s harsh, direct and uncompromising. You get the impression that this might be a man who enjoys fighting the legal battles of the poor.

“We don’t hesitate to wade into any area where an injustice might exist,” O’Neal said. “Food stamps, the Veterans Administration— we’ll get into anything.”

“As a rule, people come down here too late. We tell them that it is too late for them to help themselves with their problem, and they wind up getting nothing. People think their problems are going to fly away,” he said.

The Southern Illinois group recently merged with the recently organized Illinois Legal Assistance Foundation, based in East St. Louis, and now do not maintain its offices in Carbondale and Marion.

O’Neal added that the foundation’s staff consists of three attorneys and one para-legal assistant (himself), who is an investigator, researcher and all-around handyman for the attorneys.

“The attorneys are not paid what they’re worth. They could be making between $20,000 and $30,000 on their own. Instead, they work for a $1,000 to $12,000 salary. They’re dedicated. They want to help people,” he said. He was disappointed because the attorneys are underpaid. And he believes that the foundation is underfunded. Also, it is having to work with smaller and smaller budgets.

He said that the foundation’s activities could be expanded at an estimated average cost of $15,000 for each additional county. Jackson and Williamson counties currently are served with a budget of $26,000 per year.

If given a blank check, O’Neal said the foundation would need “a million dollars a year. We’d need money for the 14 southernmost Illinois counties and 10 to 12 additional attorneys.”

Time consumed in traveling over Southern Illinois creates the need for branch offices, O’Neal said. Lack of funds forced the closing of such an office in Murphysboro. Offices remain in Marion and in Carbondale.

“If we get, for example, a class action in federal court, we could

Help with medical problems also is available to the poor of the Carbondale area at the Free Clinic, located at 434 E. Jackson Street. It is turn it over to a branch office in East St. Louis. Traveling time could be cut down.”

“We used to have a man spend a day in different Southern Illinois towns. What we need is a task force to hunt out people with problems, especially the elderly.”

“They (the elderly) can be cheated for years on their little pensions. They might be entitled to a lot more, but they are afraid of losing what they have. It’s their security. People should do more work with senior citizen groups. If they could discover these problems and send these people to us, we’d be glad to help them,” he said. There was a note of sincerity in his voice. He believes in his job.

“The elderly have trouble with social security and black lung disease, among other things. We haven’t had much luck in black lung cases. These people are in their seventies, and in many instances their doctors have been dead for years. The records are gone,” he said.

O’Neal estimated that over 30 per cent of the people in Southern Illinois, outside of Carbondale, are classified as senior citizens by the government, because they are over 60 years of age.

The foundation is prohibited by law from involving itself in criminal cases of any type, O’Neal said. But he emphasized that “nobody gets turned away from this office without a sense of direction. They do get advice. If we can’t handle the case for one reason or another, we’ll refer the person to a private attorney who can.”

O’Neal estimated that the foundation handles close to 3,000 persons with problems each year, although not every one results in a court

A summer season hit was "How to Succeed in Business Without Really Trying."

Five campus stage groups add up to a lot of theater

By Bev Moore
Student Writer

Five separate organizations work within the SIU Department of Theater to present a variety of productions throughout the year.

During the summer, Summer theater presents three plays, three musicals and one children's play. This group has two companies, one for musicals and one for plays. A technical staff serves both.

Summer theater which attracts many students from other colleges and universities because of similarity to professional summer stock, produces a different play or musical every week. Rehearsal schedule is very tight.

The children's play, "Land of the Dragon," will be shown in August as the end of the tour in the Lab Theater at SIU.

The Lab and Experimental Theater present four or more shows during the school year.

Southern Players repertoire group present around five main-stage productions during the regular school year. One show goes on tour for fall quarter, with SIU showing at the end of the tour.

In addition to the repertoire group, three children's plays and original productions written by students are presented throughout the year.

Two quarter nights consist of three one-act plays each. These plays, written and directed by students, are primarily educational in purpose. Success or failure of the productions is difficult to determine.

However, reviews, experience gained by actors and staff and total audience attendance are some judging criteria.

Southern has sent two plays to the national showcase in Washington, D.C. SIU won the midwestern regional play contest twice. "Caretaker" and last year's production "Home" were winners.

Intramural program offers sports lovers a smorgasbord

By Marguerite Van Ness
Student Writer

You don't have to be a Lionel Ar-"mee or Greg Starzink to get the thrill of catching a long pass or making a free throw. SIU offers a wide variety of intramural activities for both men and women to show off their athletic talents.

Larry Schaake is responsible for the men's intramural program and other recreational activities, including the campus beach and boat dock facilities.

Activities are offered on the individual or team basis. "Our setup gives the student a chance to participate in the athletic activity of his choice. Officially, equipment and supervision are all provided within the structure of the program," Schaake said.

Activities available for men include flag football, singles and doubles tennis, turkey trot, cross country, basketball, swimming, floor hockey, volleyball, wrestling, weight lifting, frisbee throwing, track and field, canoeing, softball, handball and raquetball.

"If a student is interested in starting a new activity we encourage him to call or come in to the intramural and recreation office," the women's program said that many of the women's activities are covered.

Women's activities for the fall quarter include recreational gymnastics, bowling, basketball, water sports, conditioning, badminton, fencing, folk dancing, cross country, and varsity competition in swimming, field hockey and basketball.

Ms. West has had more success running the women's program on a club basis. "We haven't found success with the same structures as the men," she said. "Women need more flexibility to come out for athletic activity."

Each activity has a sports leader who acts as club president. The intramural program is run by an elected student board. Ms. West said, "The men's program should include more coed activities." Ms. West said while the American Medical Association is not in favor of women playing football, Ms. West is in favor of women taking part in a modified version of the game.

The purpose of the intramural program is recreation. Anyone can participate, and they are encouraged to do so. "Getting out and talking to others enables the participants to get to know each other, or kicking a football is good therapy for those study blues."

When you want the best for your imported sports car, you want the Michelin XAS. The Asymmetric Steel Belted Radial.

footprints of safety

- sure braking
- driving stability
- fast steering response

Tougher schedule, rough time face Saluki cagers

By Elliot Tempi
daily Egyptian Sports Writer

Saluki basketball fans, who complained about last year’s mediocre basketball schedule, should be silenced this year.

Saluki boss Paul Lambert has beefed up the 1972-73 schedule with Florida State, runner-up to NCAA champion UCLA, and with Detroit, Creighton, Weber State and Long Beach.

The obvious question arises: how are the Salukis, who finished last season with a dismal 10-14 won-loss record, going to win any games against tougher competition?

It’s going to be rough. And Lambert knows it.

‘Part of the Salukis’ problem is inexperience. ‘We found it necessary to start junior college players this year, because we lost so many seniors (seven) from last year’s varsity team,’ Lambert said.

Major losses include guards Greg Starrick and Alvin Garrett. Starrick averaged 22.8 points a game and led the nation in successful free-throw attempts with a 92.3 percent. Garrett hit for an average of 16.9 points a game and was considered to top playmaker on the team.

Other losses include 6-11 center Bill Perkins and 6-5 forward Marvin Parks.

Lambert has five returning letter- men all seniors and who all are going to have to fight for starting jobs. Returning at the forward spot are 6-4 senior Nate Hawthorne, 6-4 senior Dan Portugal and 6-4 senior Mike Nelson.

John Marker, a 6-1 senior, returns to the guard spot, and 6-3 junior Eddie Jampolsky can play either forward or guard.

Hawthorne was the third leading scorer with an average of 11.9 points a game last season and the top rebounder with a 7.7 average. Portugal was a starter and averaged 8.5 points and seven rebounds a game. Marker was a key defensive player while spelling starters Starrick and Garrett.

Joining the returnees are five junior college transfers and four players up from last year’s freshman team.

Guard Dennis Shiner and James ‘Shag’ Nixon both are from the junior college ranks. Shiner was the playermaker on the Vinedome (Ind.) national junior college championship team. Nixon averaged 29 points a game at Illinois (DeKalb) Junior College. Lambert considers Nixon to be one of the top guards in the nation.

Forwards George Thompson and Alvin Hendrix combine excellent rebounding, scoring and defensive abilities. Thompson averaged 27 points and 22 rebounds at Leeser (Mass.) Junior College. Hendrix was a defensive standout for Paducah (Ky.) Junior College. Hendrix team finished with a 26-4 won-loss record and placed sixth in the national junior college tournament.

Handling the center position for the Salukis will be 6-11 Joe C. Meriweather. Meriweather is expected to fill the void caused by the loss of Perkins.

Joe C., as his teammates call the big guy, is an excellent rebounder and smooth shooter. He led last year’s freshmen in scoring, 21.3 points a game, and in rebounding, 12.3. He also hit an 80 percent of his shots from the field. Lambert says of Meriweather, “Joe is deadly from close-in. He’s extremely quick for a big man. He’s particularly strong in going to the offensive boards. And he’s got to be an intimidating factor on defense."

“We’re going to be a young team,” Lambert said. “I expect we’ll have some early season adjustment problems. As most of the players will be playing together for the first time.

“But we’ll be a much quicker team than a year ago. And I anticipate improved scoring from our front line. That was one of our problems a year ago.

Right now I plan on using a full-court pressure defense. And we’ll go with a running brand of game. I think I have the horses to do it.”

1972-73 Basketball Schedule

Nov. 30, McKendree (H); Dec. 2, University of California (Davis) (H); Dec. 5, Creighton (A); Dec. 6-9, Stowl Bowl (Duquesne, U. of Pittsburgh, Jacksonville, SIU); Dec. 11, Weber State (H); Dec. 20, Tennessee Tech (H); Dec. 22, Road Runner Classic (SIU, NMS, VMI, Xavier of Ohio); Dec. 29-30, Roseback Classic (SIU, Ark. Corinth, Ohio U.);

Jan. 2, Evansville (A); Jan. 6, Indiana State (A); Jan. 10, Mercer University (H); Jan. 13, Illinois State (A); Jan. 20, Detroit (H); Jan. 22, St. Louis (H); Jan. 27, Florida State (A);

Feb. 2, Creighton (H); Feb. 5, Northern Illinois (H); Feb. 10, Indiana State (H); Feb. 14, Samford University (H); Feb. 19, Illinois State (H); Feb. 24, Detroit (A); Feb. 26, Evansville (H); March 3, Northern Illinois (A).

Big things are expected of big Joe Meriweather.

Collective farming's the thing
Communes aim for return to nature.

By Ed Donnelly
Daily Egyptian Staff Writer

Communal, or collective living, by many students—including SIU students—is a reality in the southern Illinois area. It’s also a reality that these communal residents are striving for permanence in their area, but revived, effort to return to nature, a survey has shown.

The survey of seven of the "nest­ together" collectives, or communiques, indicates that there are approx­ imately 75 persons involved in this form of living in the Carbondale area.

Seven sets of people live together as a family and work towards a common goal: making a living from the land.

The survey indicated success of the subculture and showed that it prospers in the Southern Illinois area.

If a typecasting can be attached to these new pioneers, it would go like this: they are a closely-knit group of former Chicago residents who now band together to rent some land and grow and make organic food for sale and personal consumption. They all generally agreed that their collective "trip" had been successful in living harmon­ iously with nature, because they, as a group, have attained a spiritual or religious basis as their goal.

We trade and barter with friends on the other communites. We usually trade for tools. Barb says we trade with a friend's roommates, and it helps to do things together, said Mike Oder, formerly a student who is now a member of the Tony Pony family, one of the communiques surveyed.

The Gold Farm is hand-till the 20­ acre Tony Pony Farm, which also includes horses, goats and chickens. While I drink some fresh goats milk offered by Oder, I listened as he explained this last year's collection of the collective that has grown and lived in the community for more than a year and a half.

A similarly-arranged collective is the Gold Farm in Carbondale, where six persons, former SIU students who "grew up" in Glen Ellyn, raise beef cattle, grow vegetables, and work toward a complete reliance on water. In fact, this collective relies on water well.

"When you live collectively you are closer to the universe, you get things done and you feel like a human being playing your natural role in a family," Noella Piaoenti, who has lived collectively for a year, said.

Upon learning that several initial attempts at collectives in the city limits of Carbondale failed, I asked Ms. Piaoenti why they have broken up.

"For a successful collective there must be a religious or spiritual, basis among the members," she said.

We collectively work at Mr. Natural's as well as farm, bath and reach each other collectively. "It is not the ideal but it is a logical alternative to Chicago," she said.

When Gary Orlindini, also a Har­ vey's Farm member, was asked why he prefers communal life he replied, "It's better for your health, but that really depends on the mood you're in when you wake up in the morning."

There appears to be three highly­ respected individuals amongst all area collective members who were constantly being glorified in conver­ sation. They are Tim Comiskey and Toni Roan, former SIU students now collective farmers, and Ray Lens, who heads the environmental center of the SIU Student Government.

I discovered the nature of the Tim and Toni farm in Murphysboro to be the reason for their popularity. Here on a 40-acre rented farm, four persons supply an entire bakery with bread and organic foods. These people seem to be proud of their garden and look forward to the day when they might own the land.

"We have lived in the country for about three years, but the true commune is probably more work than we can imagine," Comiskey said.

"The communites that have failed may have been drug cults which tend to be unnatural. You need a religious basis," Ms. Roan said.

The Bran New Day Organic Farm appears to have great potential with one year of collective farming complete. Andy Robinson said, "In a couple of years we will be able to live completely year round off our recently purchased land."

Nine former SIU students who "grew up together" in Chicago suburbs own the 20-acre Bran New Day collective in Cobden and live in tents, tepees and a farmhouse.

"We find our land more conducive for peace and harmony than Chicago."

"The organic market is not big enough in southern Illinois. It's a very good thing to farm and live in peace. We realized, this is our own energy output, and the desire to help we have received from the neighbors has strengthened our commitment to the land," Robinson said.

But he warned that the "selfish drug trip won't last, or if it is in the community, even has to be selective in choosing your family."

Jim Altre, Bran New Day mem­ ber, stated that the organic produce market is low because "people don't care what they eat, so we are forced to sell our vegetables as commer­ cially grown in many areas."

The Bran New Day farm operates a vegetable market in the Murphysboro Shopping Center in Carbondale.

There was one collective of an established nature found within the Carbondale city limits.

In general, I noticed that collectives who leave the Carbondale vicinity were more fre­ quently more spiritual and spiritually focused. There is a theological dimension which they interviewed. They did not feel enough like the Illinois dishes, rather, they believed themselves to be more in tune with the world by being close to the land. Home from the field, where seven acres of tomatoes make a lot of work.

New campus dorm wrinkle: single-room special deal

By Larry Glonadih
Daily Egyptian Staff Writer

Beginning fall quarter 1972, new and incoming students who plan to live in on-campus housing will be offered the opportunity to live in single occupants rooms.

These single rooms are available at Brush Towers, University Park and Thompson Point residence halls.

Sam Rinella, housing director, said an additional charge of $50 per term for a single room will be added to the normal rate of $330 per term for a double room.

A single room occupant would then pay slightly more than $1,300 for three quarters. This includes utilities, linen and meal service.

Rinella cited the current drop in enrollment as one of the reasons for offering single rooms. The University has about 5,000 spaces available for single undergraduate students in on-campus housing.

Last fall, there were 300 vacancies in on-campus housing. This necessitated the closing the top two floors of Neely Hall, the women's dorm at University Park.

Rinella estimated 1,100 vacancies this fall. He also said that, if the situation warrants, the University will close one of the dormitories.

The dorm to be closed, if a closing is necessary, has not yet been determined, he added.

University on-campus housing for the single undergraduate student includes Thompson Point residence halls, located near Lake-on-the-Campus; University Park residence halls, situated just east of campus; Brush Towers, the high-rise dorms adjacent to U-Park; Southern Acres Residence Hall, southeast of campus and VTI Dorm, at the VTI campus.

Thompson Point features coed dorms. Steagall Hall, the first coed dorm at SIU, was opened last fall. Two additional coed dorms, Warren and Smith halls, will be opened this fall.

There is a possibility, Rinella said, that one of the dorms at Thompson Point will be opened to house single graduate students.

If it could not be filled, the grad students would occupy the upper floors and freshmen the lower, Rinella said. Pierce Hall was named as a possible location for the first on-campus graduate student housing.

The proposed quarterly rates for the 1972-73 school year are--after a 2.6 per cent increase over 1971-72--$35 for Neely Hall in University Park. $375 for VTI Dorm. $390 for the Triads men's dorms in University Park and $345 for Southern Acres Residence Hall.

This proposed rate increase averages about $10 more per quarter than last year.

Students who plan to live at Brush Towers, Thompson Point or Neely Hall will pay $1,125 for three quarters of room and board. Those living in VTI Dorm will pay $1,125 at Triads $1,080 and at Southern Acres $1,035.

Rinella regards dorm life as a worthy experience for the new student.

"I think all freshmen should live in accepted living centers," he said. "I think it is needed until the transition is made to adjustment to college life."

He defines an accepted living center as "a dorm or residence hall-type structure with supervision on the floors and building, which has a food service and conforms to the qualifications of the University."

James Osberg, coordinator of Housing Information Center, suggests on-campus housing for the freshman.

In comparing on-campus to off-campus residence halls he said, "In terms of a residence hall, I would say it would make no difference. But, if I were a freshman making living arrangements without ever seeing the place, I would go to the University."

Queuing up

Moving-in time can mean waiting-time for Southern's off-campus residents who find that a lot of people have the same idea at the same time—applying for water, fuel or telephone service and making the necessary deposits. Utility officials advise that time trouble and tempests can be saved by advance applications by service and providing the utilities company with full information about where the service is to be required

Utilities deposits add up, too

Housing cost includes more than rent payments

By Robert W. Smith
Daily Egyptian Staff Writer

Establishing residency or moving into the Carbondale area can throw a budget into disarray. From costs are unknown or misjudged. The following information may help compose that budget for costs of electricity, natural gas, water, sewage and telephone costs.

Fred Davis, office manager for Central Illinois Public Service in Carbondale, said required deposits for electrical and natural gas hook-ups vary from as low as $15.00 to $150.00, depending on where the service is established.

"Deposits are based on the average of the previous tenant's bills for a two and one-half month period," he said.

This means that a person occupying a residence that has a higher electrical or natural gas usage will be paying a higher deposit than a person who might occupy a residence where smaller quantities of electrical or natural gas are used, he said.

In a previous article, all apartments and dormitories have a fixed deposit rate that must be paid within a week after the person moves in.

"Anyone moving into apartments or dormitories should check with the landlord or CPS about the required amount," he said.

Where more than two students share an apartment or dormitory room, only one person can sign up for the service, he said.

This person is then responsible for the service, thus eliminating confusing billing situations, he explained.

EOG gets fund increase

A substantial increase in federal funds for low-income families will be available at SIU or Carbondale during the 1972-73 school year beginning in September.

Funds for the Educational Opportunity Grant program (EOG) will total $594,000, compared to less than half that amount, $10,600, in 1971-72, according to Raymond P. Doodnett, assistant director of SIU Student Work and Financial Assistance.

"It's better to have bought and lost, than never to have bought at all," said the manager.

The Student Tenant Union is compiling data from a survey of students off-campus living conditions— including such things as muddy, unsightly grounds.

The survey will give students written estimates of what they are paying for housing, according to plumbing, heating, lighting, security, noise levels, food service, maintenance and other physical aspects of the facility.

The survey results will be distributed to the students by the end of this quarter and again in the next quarter. The survey results will be distributed to the students by the end of this quarter and again in the next quarter. The survey results are intended to give students as much information as possible before they sign contracts.

Despite these efforts, the Student Tenant Union is still relying on the University Office of the Ombudsman, Diggle said. Despite this, Diggle said, the Student Tenant Union is still relying on the University Office of the Ombudsman, Diggle said.

The Ombudsman, Diggle said, is an organization that provides volunteers for the counseling division. Diggle said.

Budgets helped by mobile homes

By Robert W. Smith
Daily Egyptian Staff Writer

More than 5,000 mobile homes are located in over 260 mobile home parks in and around the Carbondale area. John Ham, president of the Greater Egyptian Mobile Home Association, says:

And about 90 per cent of the mobile home occupants are SIU students, according to an unofficial survey of mobile home park landlords.

Ham said the primary reason a person owns or rents a mobile home is the economical advantage, "which is important for those who have little income."

Ham said a person buying a mobile home can shop with several area mobile home dealers.

Then, with the many different types of mobile home parks in the area, the mobile home can be placed on a lot suitable to the individual needs, he said.

The survey of landlords indicated that most mobile home parks are located outside the city limits, although within two miles of SIU.

The University operates a mobile home park on campus—but its days may be numbered because University officials say, of a need for the space for other uses.

Monthly lot rents are higher at some of the mobile home parks near or adjacent to the campus. But the monthly lot rental rates for the area range from $30 to $50.

Although some lots are cheaper than others, a water charge may not be included in some of the lot rentals.

"This could result in an increase of $5 to $9 per month," one landlord pointed out.

Most mobile home park landlords have rental units available on either a monthly or quarterly basis. The rates vary according to the number of occupants in the unit.

For two occupants, the rents range from $30 to $50 per quarter per person. Three occupants are charged rents ranging from $75 to $125. These rates are for two and three bedroom mobile homes. Some smaller mobile homes rent at slightly lower rates.

During summer quarter, when SIU enrollment is down, the rental ranges are $30 to $50 lower.

One landlord warned that a person interested in renting a mobile home at lot should be cautious.

There are many advantages at some mobile home parks that are not at others. Although the prices may be the same.

The following advice was offered by several mobile home park landlords:

-Determine what the major heat supply is. Some mobile homes operate with natural gas, propane, oil or electricity. Monthly heating bills can vary markedly between these fuel sources.

-Determine whether insulation is adequate. Poor insulation may mean greater heating or air conditioning bills.

-Determine whether air conditioning is available.

-Don't overlook mobile homes with unsatisfied water pipes areas to freeze-up during winter months.

-Check whether roads in the campus are paved. Ungated roads usually mean excess dust inside the mobile home.

-Select the mobile home park with pet, grass and shade trees.

-Students should determine the accessibility of the mobile home park to the University campus.

-Select the quiet mobile home park.

-Select the mobile home park that allows adequate space between mobile homes.

-Determine whether pets are allowed in the mobile home park.

All the comforts

Jack Magnusen's home-away-from-home is not only mobile but self-propelled. The SIU marketing student turned a 1953 Dodge school bus into a comfortable abode, which he parked at a Carbondale mobile home park. It's paneled, carpeted and equipped with sink, toilet, stove, hot water heater, refrigerator and even a stereo center—and, of course, TV which Magnusen and girlfriend Debbie Polston are watching.
By Larry Glawacki
Daily Egyptian Staff Writer

There'll be no problem finding the kind of off-campus housing the student is looking for, the Housing Information Center reports.

"I would say that there will be spaces of every kind," James Osberg, coordinator of Housing Information Center, said. The center is in Building C, Washington Square.

"The kind of place that will be pretty tight is the most inexpensive kind of housing," he said. "Those boarding houses approved for sophomore men and women. It's the kind of place where you can have a room and kitchen privileges for $80 a quarter."

Osberg said the large amount of new apartment complexes that have been built in Carbondale will have a definite effect on both the number of spaces available and the kind of places available.

"It's possible a student could find just the place he's looking for," he said.

Five off-campus residence halls have applied to be University-approved for freshmen. The Student Baptist Center, Wilson Hall and the Stevenson Arms residence halls have been approved for freshmen for the coming year. Applications from University City and the Pyramids residence halls are currently under consideration.

Freshman approved residence halls will continue to rent to sophomores, juniors and seniors, Osberg said.

In order to be University-approved for freshmen, the off-campus residence halls must have a resident counselor, resident fellows and a food service.

"They would have to provide all the vital services provided on campus," Osberg said. "There will be a sufficient number of spaces available in off-campus housing for the freshman this year."

In commenting on off-campus housing, Osberg described the general pattern of housing rental:

"The first kind of housing that goes," Osberg said, "are the houses in the country. Then the houses in town. Next, the apartments in the country and afterwards the apartments in town. Finally, the trailers in the country, then the trailers in town."

Osberg explained some of the advantages that students see in living off-campus.

"There's more of a variety of type of housing off campus," he said. "You can go from something that has its own house rules, like the Baptist Center, to something very loose, like the Wall Street Squads." Osberg cited the student's budget as another major reason for living off campus.

"Some of the sophomore approved places, though they're not beautiful, can go for as little as $60 a quarter," Osberg said. "A student who has the money can live in a place for $500 a quarter, or more. On-campus housing is regimental. They can offer no more than they have."

Osberg said that some of the off-campus places—all privately-owned—offer extras, like swimming pools. That also attracts students, he said.

"Off-campus residence halls have tended to be a little more flexible in payment schedules and meal arrangements," he continued. "But that can be a disadvantage too."

Osberg said, "When students have problems it might be easier to deal with the University. Like in the spring of 1970, University residence halls gave refunds when the students left early. Some off-campus residence halls did not."

One of the major reasons that students desire off-campus housing, Osberg admits, is that it is away from the University.

Osberg cited the new Brookside Manor apartment complex as the kind of place students might like to live, if they qualify.

"Rents at Brookside Manor are government subsidized," Osberg said. "They operate under FHA guidelines."

"The tenant's rent there is based on his income and it's conceivable that a student could live in an apartment for $114 a month, utilities included. This has been unheard of in the Carbondale area."

William Burns, manager of Brookside, said the apartment development is privately owned and was privately built. It is government insured but neither government housing nor student housing, though some married students do live there, Burns stressed.

Burns said most of the renters receive government subsidies under a Federal Housing Administration program. The maximum government subsidy available is one-third the rent.

A one-bedroom apartment, for example, can be rented for $114 a month. The maximum subsidy, Burns said. On the market, such an apartment would normally go for $180 a month, he estimated.

Burns also explained that Brookside apartments are rented only to married couples. There are no singles apartments available.

The Housing Information Center is operated to assist students in finding off-campus housing, whether it be a private home, an apartment or in a residence hall.

Lists of the available housing in Carbondale and its vicinity are maintained and kept up-to-date by Osberg's office. Landlords are encouraged to write on their wishes to call a tenant, and then the center's services are compiled, Osberg said.

The center has brochures, advertise in local newspapers, and compile many of the off-campus residence halls. The center also maintains a policy which allows the student one free phone call from the office, in the event that he wishes to call a landlord.

A tenant-landlord arbitration board also works through this office. The board is made up of three members and helps settle tenant-landlord disputes. Members of the board are appointed by the student body president.

Anticipating a budget cut, Osberg said some of the center's services may no longer be available in the future. But the services are here now, he said, and the center staff will do its best to help students meet their housing needs in the coming year.

University controls have relaxed

Housing rules changes reflect the times

By Larry Giwacki
Daily Egyptian Staff Writer

University regulations have undergone many changes during the past three years. That long ago, SIU maintained total control over housing situations for all single undergraduate students. The only exceptions were students 25 years of age or older and those having completed two years of active military service.

According to a Board of Trustees resolution stated in the University Housing Regulations for 1972-73, "single undergraduate students not residing with their parents or guardians will be permitted to reside only in those accommodations which have been and which continue to be classified by the Administration as Accepted Living Centers. Any single undergraduate student who resides in accommodations not designated as 'Accepted Living Centers' shall be subject to disciplinary action."

"Accepted living centers were defined as those that 'provided facilities, food service and supervision comparable to off-campus residence halls.'"

So back in 1969, when this fall's seniors were incoming freshmen, the University realized not only an authority but also a serious in loco parents responsibility over its students.

In the years between 1969 and 1972, the University and the students have experienced controversy, protest, student movements, administrative shuffles and considerable growth.

And as the face of the University continues to etch itself into the consciousness of the student. Today's housing regulations reflect this changing attitude.

The new housing policy and regulations for 1973-74 also reflect for 1972-73, state that, "All single freshmen under the age of 20, not living with parents or guardians, are required to live in residence halls, either University-owned or similar privately-owned facilities." Single freshman under 20 are therefore not allowed to live in homes, apartment type homes or dormitories specifically approved for freshmen.

The regulations go on to say that "Sophomores under the age of 21 not living with parents or guardians, are required to live in University owned or approved housing."

There are no University housing regulations for junior, senior, graduate, married students or any student over 21 years of age.

The penalty of violating the housing regulations is a denial of future registration until the violation is corrected.

Students in violation of the regulations experienced a crackdown this last spring when notices were sent to those violators traced by the University. The number of students affected was not available.

Sam Rinella, housing director, considers SIU having a more unrestricted atmosphere than most universities regarding housing.

"Southern has some of the most lenient housing regulations in the state of Illinois," he said in a recent interview. "Most universities require all undergraduate students to live on campus unless given an exception."

Rinella also said it is possible that the housing restrictions on sophomores would soon be lifted, but added that restrictions on freshmen are likely to remain.

"I don't think we will ever say that freshmen don't have to live on campus," he said, "because of the debt incurred by the University and the educational philosophy on the incoming student."

One concern of incoming students is whether or not they will be allowed to have automobiles while residing in the dorms.

Rinella considers the auto regulations important in relation to on-campus housing. He feels some changes in the regulations are necessary to attract new students to the dorms.

"My opinion is," he said, "that everyone should be allowed to have automobiles. In order to merchandise on-campus housing, I would recommend that everyone, including freshman, be allowed autos."

According to the security office, the motor vehicle regulations state that all students can have cars.

Freshmen and sophomores can register them with the University, but cannot park in lots which require a parking permit. They can, however, park in the metered lots on campus.

Rinella added, however, that he thinks the present restrictions on freshmen parking cars on campus should remain.

Students who have cars and live in the dorms are provided with parking lots near their residence halls.

Early birds avoid a rush

By University News Service

Note to prospective college students: Entering Southern Illinois University at Carbondale for the first time fall quarter?

Don't wait until fall quarter to be advised and registered for classes. If you do, you will have only 30 minutes to see your adviser and may risk closed classes holding you up in registration. That's the word from Carol Comvorty, graduate assistant in charge of pre-registration orientation. She says:

"Come down this summer before the fall quarter rush and see your adviser for a 45-minute appointment. Then you go through sectioning and the classes you want before they are closed.

In addition you will have the chance to go through pre-registration orientation with your parents and have any questions answered by Mrs. Coventry."

After the 9-30 a.m. orientation program, you and your parents can board a tour train for a look at the campus and living areas.

Mrs. Coventry has one word of advice for the student pre-registering: Read all material you receive from the university, and bring something to write with.

Students who are unable to make the summer appointment they get when accepted to the university are encouraged to contact the admission office for a new appointment.

Samuel Rinella, housing director, says SIU is less restrictive than most schools.

Rinella believes all students should be allowed to have cars at SIU, but not necessarily to drive on campus.
People's Mart lowering food prices by numbers

By David Ambruce
Student Writer

Carbondale residents now have a method of combating high food costs if they are willing to work and understand the nature of a co-op, according to members of the People's Mart food co-op at 214 N. Washington St.

Al Ross, member of the co-op's board, said the co-op was created to try to do something about the outrageous food prices in Carbondale.

The idea is to get some people together, "buy bulk food and distribute it among the members for prices lower than they can find elsewhere," Ross said.

According to Dorothy Luczycki, member of the co-op, the People's Mart was organized by about 10 people at the beginning of winter quarter.

"We were having meetings about every week to get things organized," she said.

Membership is critical to success of the co-op. July 29 was the fifth order week with about 30 families involved. With increased membership, co-op members hope to reduce the cost of food, especially meats, by as much as 25 per cent, Ross said.

"Anyone who wants to join, may," Ross said.

He said those who wish to join may come to the co-op meeting at 7:30 Monday nights at the co-op, or to the distribution day from 2 to 6 p.m. Fridays at the same location.

The initial fee to new members is $5. Persons who belonged to a previous co-op in the Northwest Carbondale area may join People's Mart for $2. Ross explained.

I would like to encourage people to join," Ross said, "because the more people we have the greater savings we can offer by buying greater volumes.

Essentially, the co-op works in this way:
On Monday nights members come to the co-op and place orders for what they plan to buy. They pay for half the amount.

On Friday the food is delivered to the co-op to be picked up by the members, and they pay the balance.

Ross explained this system allows the co-op to get nourishing food to those who need it at a lower cost and allows them a period of time to pay for it.

If potential members come to the Monday night meetings, said Miss Luczycki, "they should come early so they can get to meet us and get into what's happening."

She explained that it can be confusing when all the members get together to place orders.

Doug Ingle, of Legal Aid, takes care of legal aspects of the co-op. Ingle was at least partially responsible for getting necessary authorization for the co-op to accept food stamps.

"Doug knows what to do," Miss Luczycki said. "And it just happened that we had everything right to get food stamps."

According to Ross the co-op's procedures allow the membership to make all of the decisions involved in its operation.

"The board is just for the functioning job of keeping the books and records," he said.

The present board, one-half black and one-half non-black, is temporary, Ross said. The Mart's annual meeting in October will elect a new board, which also will have balanced racial representation.

Meanwhile, the co-op continues as a collection of people working together, "to answer the need of getting nourishing food to people at a reasonable cost— in this case the lowest cost."

Becky Kerr, food co-op member, checks an order list against boxed items. About 20 families were in the co-op this summer.

Sue Goodrich, food co-op member, weighs an order of bananas. The co-op's formula for savings is bulk buying.
Suitable housing scarce for ‘wheelies’ off-campus

Every few years, there is a certain housing shortage plaguing the SIU community. This year is no exception, as the number of SIU students seeking off-campus housing continues to grow. The housing shortage has made it difficult for many students, especially those with physical handicaps, to find suitable accommodations.

The number of SIU students with physical handicaps ranges from about 600 to 800 during a given year, according to Richard DeAngelis, assistant director of special services at SIU. These students require modifications to their living spaces to accommodate their needs.

They face serious problems every time they search for a place to live,” said one wheelchair student, who preferred to remain anonymous, and it was extremely difficult to find off-campus housing.

“First, we had to go through lots of housing lists and make several phone calls. We got poor results, especially after we said we were wheelchair students,” she said.

“Some were willing to rent but the prices they wanted were outrageously high. We finally got a place by driving around and stopping in. It makes it harder, I think, for the landlord to say no,” she said.

“Some landlords flatly refuse to rent to wheelchair students,” she said.

“But our present landlord has been extremely nice and has made several major modifications on the property for us,” she added.

She said some facility modifications needed by the handicapped include construction of ramps for accessibility, installation of rails on walls and removal of doors and other obstructing items for easier mobility, and renovation of bathroom and shower structures. Kitchen appliances of a height convenient for the handicapped are another need.

“Landlords are sometimes reluctant to rent to the physically handicapped student because they’re worried that the impaired ability to get around could result in a serious accident on their property,” DeAngelis said.

He added that there are probably several landlords who have been reluctant to make modifications on their property to accommodate any handicapped student.

DeAngelis said that SIU provides facilities for physically handicapped students, but pointed out that all students cannot or do not want to live in campus facilities.

Major on-campus dwellings units with facilities for the handicapped are Thompson Point and the Baptist Student Center. Other facilities include Evergreen Terrace and Southern Hills.

“Sometimes it is important for some handicapped persons to live off-campus for an educational purpose—to have a feeling of independence,” he said.

DeAngelis said there are married handicapped students who prefer off-campus housing. The kinds of housing problems the handicapped student must solve depend on the nature of the handicap, he said.

Several off-campus dormitories and apartments have some rooms and facilities modified to aid handicapped students, but too few are available and too many are not entirely adequate, he said.

DeAngelis said the handicapped person does not pose any difficult problem for a landlord.

Many people have a basic fear because of a lack of knowledge about the capabilities of a handicapped person to maintain a residence,” he said.

DeAngelis said he was optimistic, however, that the housing situation for handicapped students will improve and that more landlords eventually will provide facilities meeting their needs.
