Cops squeal on themselves

Lost license plate found on police car

Peggy Mace, former wife of George Mace, vice president of University relations, is not a Carbondale police officer. But an auto license plate issued to her was used on a car driven by members of the police tactical squad for several months.

Ms. Mace said she lost the plate from her car sometime in April.

Police said they aren't quite sure how it turned up on their car.

Police Chief George Kennedy offered this explanation in disclosing the incident Wednesday:

When a detective from the tactical squad needed an unofficial-looking license plate for a car used in surveillance work, he took one from a supply he thought belonged to the city. But it was one of the plates that had been turned in as lost and stored in a desk drawer.

Kennedy said police had routinely inquired about the ownership of the lost plate but because it apparently had been bought over-the-counter at a bank, the Secretary of State's office at that time of year did not yet have a record of it.

What happened next is unclear, Kennedy said. Since the plate was on the surveillance car and not with other lost plates held by police, no further checks were made to determine ownership.

Kennedy said that since the vehicle was a police car, he saw few problems in having just one license plate on it instead of the two required by Illinois law.

The plate was returned to George Mace Wednesday, who said he will return it to Ms. Mace.

Kennedy said the police did not know

about the mix-up until someone in the Secretary of State's office called, saying a police officer's private car had the University president's license plates on it.

"We never should have put that plate on one of our cars," Kennedy said. "We think it's a goof but don't think it's a terribly bad thing. We don't think it hurt anybody."

Ms. Mace said, "It must have been an accident. I can't think of one intelligent reason for them to use a citizen's plate."

Student cyclist injured in campus cycle crash

An injured SIU student, Steven W. Judy, was semi-conscious when emergency medical personnel lifted him onto a stretcher following a motorcycle wipeout at 6:20 p.m. Wednesday on Lincoln Drive.

Judy, a sophomore in electronics technology from Princeton, Ill., was taken to Memorial Hospital of Carbondale where he was treated for cuts and scratches and held for observation because of dizziness.

SIU journalism senior Scott Caldwell, one of several eyewitnesses to the accident, said Judy appeared to be

driving too fast when his bike jumped a curb on the sweeping curve near the Agriculture Building.

SIU Security Officer Mike Thomas and Sgt. Jerry Brown said there was found no evidence the rider was wearing a helmet when the mishap occurred.

It was the second motorcycle crash of the school year; two students were killed Aug. 21 when their cycle, traveling in the wrong lane, hit a car head-on on East Park Street near Lewis Lane. Killed were Daniel J. Wamsott and John R. Bruce, both of Paris, Ill.

Hester claims Brandt broke verbal pact

By Joan Pearlman
Daily Egyptian Staff Writer

Lee Hester, Civil Service Employees Council chairman, withdrew his support Wednesday of council-approved salary adjustment guidelines, charging that University officials violated a verbal agreement with him and used "hanky panky" in administering salary adjustment.

In a meeting of the Civil Service Employees Council, Hester said a "gentleman's agreement" had been reached Aug. 7 between President Warren Brandt and other University administrators to use Plan I as a guideline in determining civil service employees' range adjustment.

Plan I called for an increase of range adjustments not to exceed \$50, Hester said. The council was in favor of the plan because they wanted as many employees as possible to receive range adjustments.

Hester said he has received reports that civil service employees at the SIU School of Medicine in Springfield received range adjustments above the \$50 limit. In some cases, employees received as much as \$90, he said.

"No stipulation was made at the meeting that the School of Medicine would be considered on a different scale," Hester said. "The council should have been notified of what was happening. Hanky panky was used by the administration to ease up tensions with departments that had complained about salaries."

There are 1,200 range employees working on campus. Their salaries are neither negotiated nor determined by a prevailing rate. Merit raises for range employees are based on recommendations by their department heads and supervisors.

Hester said the council should also check into how much money was used for civil service salary adjustments.

According to a report by the Illinois Board of Higher Education, \$213,400 had been allotted to SIU for range adjustments, Hester said. The figures he has so far indicate that \$170,033 had been used. He urged the council to find out what happened to the rest of the money.

In answer to Hester's charges, Donald Ward, manager of Personnel Services, said the School of Medicine in

Emergency medical aides reached the scene of a campus traffic accident within minutes Wednesday night. SIU Security Sgt. Jerry Brown, who investigated, acknowledged that about 400 motorcyclists, thousands of bicyclists and

pedestrians who compete for right-of-way with automobiles cause the campus traffic dangers. There are about 100 traffic accidents a month in Carbondale (see story, page 14). (Staff photo by Carl Wagner)

Springfield was not aware of the salary guidelines when they awarded their range adjustments.

"It was a lack of communication and not deliberate," Ward said Friday. "The School of Medicine did not participate in the meeting and the subject never came to the floor."

Ward said the administration wanted to get the salary program functioning as soon as possible so all civil service employees could receive their salary adjustments on their Sept. 1 check.

The checks issued to civil service employees Sept. 1 included their salary adjustments for July and August.

The range adjustments in Springfield involve nine civil service workers, Ward said. The people have been notified of their salary increase and the amount will not be changed.

Ward said the School of Medicine is a separate hiring unit whose funds are allocated separately. The civil service employees in Springfield compete in a different labor market and their salary

adjustments are not based on the same ranges as Carbondale range employees, Ward said. However, Ward said he is sure the School of Medicine would have followed the guidelines if they had been made aware of them.

Civil service range adjustments were part of a four and one half per cent salary increase range employees received July 1.

According to a letter written by Brandt on July 22, two per cent of the increase was administered on a weighted basis, with the greatest percentage going to the lower-paid personnel.

The average yearly civil service range salary was computed at \$8,000. Range employees earning more than the average received less than the two per cent allotted. Employees earning more than \$8,000 received more than the two per cent allotted.

One per cent of the four and one half per cent package was used for merit raises and was to be administered at

the discretion of various department heads and supervisors.

Ward said he knows many of the civil service employees will not be satisfied with the salary increases. He said he realizes the cost on the outside is going up and their salary is not.

"The problem is, the University didn't get enough money to appropriate to them," Ward said.

Gus says if you see cars with only one license plate, the cops probably know about them already.

News Roundup

Economy first issue of Ford-Carter debates

WASHINGTON (AP) — Jimmy Carter and President Ford will argue domestic and economic issues before a national television audience Sept. 23, in the first face-to-face presidential campaign debate in 16 years. The League of Women Voters and aides to the two major contenders also announced late Wednesday that a second debate would be held on foreign policy and defense matters with a third and final session open to any issues. Dates for the last two debates were not set immediately.

It was also agreed that Democrat Carter's running mate, Sen. Walter F. Mondale, and Ford's vice presidential choice, Sen. Bob Dole, would meet in a single debate. Again, the date was not announced.

New airport may cause business boom

SPRINGFIELD (AP) — A state business leader said Wednesday the decision to build a new metropolitan St. Louis airport in Illinois could mean new highways and the construction of manufacturing plants in the area, similar to what has occurred near O'Hare Airport in Chicago. "This may get the state moving on some badly needed highways in that area" to provide access from downtown St. Louis to the site of the new airport, said Lester Brann, president of the Illinois State Chamber of Commerce.

He said that in addition to the jobs resulting from construction and operation of the proposed large airport, he expects business and industry to be attracted. "Businesses and manufacturing plants have sprung up around O'Hare," he noted.

Pentagon announces \$5.9 billion arms sales

WASHINGTON (AP) — The Pentagon notified Congress late Wednesday that it plans to sell \$5.9 billion in arms to 10 countries, including about 2,500 missiles to Saudi Arabia and 160 advanced F16 jet fighters to Iran. Reportedly on State Department orders, the Pentagon announcement made no specific mention of some of the key weapons, including controversial Sidewinder air combat missiles for Saudi Arabia and the F16s for Iran.

Administration sources indicated the totals of Sidewinder missiles and Maverick television-guided air-to-ground missiles for Saudi Arabia were trimmed in late-hour, behind-the-scenes State Department negotiations with pro-Israel senators. The arms sales package, biggest in memory, went to Congress on the last day possible, if the Senate and House are to have the required 30 days to consider the deals before adjourning Oct. 2. The sales will go into effect unless Congress rejects them.

Mondale wants Libya charged for terrorism

LAS VEGAS, Nev. (AP) — Sen. Walter F. Mondale said Wednesday that Libya should face charges in the United Nations Security Council of supporting international terrorism, rather than being allowed to assume the council's presidency on Friday. Citing allegations of Libyan involvement in an attack at the Istanbul airport last month in which four persons were killed, and a more recent incident in which an airliner was taken over in Egypt, the Democratic vice presidential candidate told a Los Angeles audience: "It's a travesty that Libya, two days from now, will be president of the U.N. Security Council."

Ghandi's constitution plans denounced

NEW DELHI (AP) — Prime Minister Indira Gandhi's political opponents of both left and right stalked out of Parliament on Wednesday and vowed to boycott debate on sweeping legislation that they said would turn India into a constitutional dictatorship. In a rare display of unity, the Marxist Communists joined four major non-Communist parties in denouncing a proposed constitutional amendment enhancing executive powers. They also protested the detention of some 30 opposition lawmakers since the start of a national emergency 14 months ago and continued press censorship.

House kills cost-of-living pay raise

WASHINGTON (AP) — The House voted Wednesday to deny a cost-of-living pay raise this year to its own members and also to senators, federal judges, Cabinet members and other top executive officials. It adopted, 325 to 75, an amendment to the legislative branch appropriation bill barring funds for the pay raise, then went on to pass the appropriation bill by voice vote.

The issue now goes to the Senate, which is expected to act on the appropriation after the Labor Day congressional recess. If the Senate disagrees with the House action, a conference will be needed to settle the disputed provision. The pay raise, the exact amount of which is still to be determined, would be automatic Oct. 1 in the absence of congressional action.

Daily Egyptian

Published in the Journalism and Egyptian Laboratory Tuesday through Saturday during University semesters, Wednesday during University vacation periods, with the exception of a two-week break toward the end of the calendar year and legal holidays, by Southern Illinois University, Communications Building, Carbondale, Illinois 62901. Official gives nod to Illinois airport site; Missouri may contest

By Paul Stevens
Associated Press Writer

ST. LOUIS (AP) — Secretary of Transportation William T. Coleman Jr. approved Wednesday construction of a new St. Louis metropolitan airport in Illinois, but Missouri officials said they may go to court to keep the facility on their side of the Mississippi River.

Coleman recommended a federal grant to the state of Illinois for the purchase of 18,650 acres of farm land near Columbia-Waterloo and urged that the new airport be put into operation no later than Jan. 1, 1992.

Coleman said the new airport could be ready for air carrier operations before then, possibly five years earlier, if a joint authority representing Missouri and Illinois is developed.

The air needs of the metropolitan area of 2.5 million persons are currently handled by Lambert St. Louis International Airport, located in north St. Louis County. After the change over, Lambert would become a general aviation facility.

Those who support retention and expansion of Lambert, including Missouri Gov. Christopher S. Bond and virtually every other state public official, had indicated they will go to court if Coleman decided in favor of the Illinois site.

Sen. Thomas F. Eagleton, D-Mo., said his first reaction was "that the decision stands on shaky legal grounds." St. Louis County Supervisor Gene McMary said he was confident a lawsuit would be filed.

Coleman acknowledged to newsmen and area leaders Wednesday that he expects appeals. "I would say there have been some good lawyers writing

me letters that under the statutes I did not have the authority" to approve a move, he said.

Illinois Gov. Daniel Walker, Lt. Gov. Neil Hartigan and other state officials hailed the decision.

Walker called the decision "thoughtful," one that will "protect the interests of the people of both Missouri and Illinois."

The decision involved two states, both of which are strongly interested in gaining the federal funds and tax revenue from an airport facility and the related businesses that spring up around it.

Economics have played a major role in the controversy since it was suggested by some officials in 1967 that Lambert could not accommodate the area's growing air needs.

The closing of Lambert Field would have detrimental effect in the form of job losses, movement of airport-related businesses and loss of tax revenue to the state and area, supporters of Lambert contend.

Further, they argue, 80 percent of the metropolitan population lives in Missouri and would have to travel excessive distances to reach the new airport.

Those favoring construction of the Columbia-Waterloo facility argue that the area has less population and thus fewer persons would be affected by noise and air pollution; that the construction process would create thousands of jobs and inject life into the area's sagging business industry, and that the modernized airport would result in fewer flight delays.

Indictment names four in '73 killing, robbery

The 1973 murder of a Carbondale woman and the armed robbery of the Elkville State Bank are two of the charges included in a three-count federal indictment naming four Southern Illinois men.

The indictment does not give details of the killing of Colleen Battaglia, a 22-year-old SIU student. Battaglia's nude body was found in the trunk of her green Chevrolet at the old Carbondale City Dump at the end of North Marion Street. She had been shot four times.

James Earl Fleming, Jr., 29, formerly of Centerville, his brother, Henry Lee Fleming, 28 and Tommie Millender, 29, both formerly of East St. Louis, are named in the federal grand jury indictment released Tuesday in Danville. Robert Fisher, the fourth charged was found dead Oct. 22, 1973 in Pinckneyville.

James Fleming is currently serving 8 to 24 years at the Menard Correctional Center in Chester for a 1973 bank robbery in East St. Louis.

Henry Lee Fleming is serving a 40-year sentence for a holdup at the federal penitentiary at Leavenworth, Kan.

Millender is serving time for armed robbery at the Eddyville State Penitentiary at Eddyville, Ky.

The second count charges the use of a dangerous weapon and a slaying during the commission of the bank robbery in Elkville, 20 miles north of Carbondale.

The indictment charges that the four men conspired in June 1973 to rob the Elkville State Bank. Fleming and Millender were also indicted for conspiring to kill Fisher.

The indictment contains this account of the robbery: July 7, Millender commandeered the green Chevrolet driven by Colleen Battaglia near her home at Brookside Manor Apartments. On July 9, the four men drove the car to the Elkville State Bank and took \$11,355 at gunpoint.

Last minute withdrawal throws board race open

John Arnold, Republican candidate for the Jackson County Board, has withdrawn from the race for the 7th District seat, which encompasses Southeast Carbondale.

Arnold's withdrawal, via a letter to Jackson County Clerk Robert Harrell, came just one day before the deadline for filing for the County Board election Nov. 2.

Harrell said it is "unlikely but possible" that a replacement can be found to run against incumbent Democrat William "Bill" Kelley.

Harrell said a quorum of Republican precinct committeemen in the 7th District would have to meet and select a candidate who would have to file for the position with the county clerk before 4 p.m. Thursday.

Arnold, 29, sales manager for Vic Koenig Chevrolet in Carbondale, said he "would really like to run but circumstances do not permit me to."

Arnold said he recently moved into his new home south of Giant City School which is "about a quarter mile" out of the District 7 boundary.

Poison ivy rampant

Thompson Woods has special treat

By Ann Schottman
Daily Egyptian Staff Writer

Waist-high poison ivy has been widespread in Thompson Woods for over fifteen years, according to Clark Ashby, professor in SIU's Botany Department. "I have been here at SIU fifteen years and the poison ivy has been bad all that time. It may be a little worse now," Ashby said.

Poison ivy can grow in bush form up to ten feet high and can climb up trees and rocks in vine form. Some of the poison ivy bushes in Thompson Woods are head high, Ashby said.

Disturbed wooded areas, which many persons walk through, foster abundant growth of poison ivy, although all oak woods have some poison ivy, Ashby said.

The SIU Forestry Department, which is charged with direct management of Thompson Woods, has no plans to eradicate the poison ivy, said Paul Roth, associate professor of forestry.

"The poison ivy is part of the natural setting. Students have no business walking off the paths except for some legitimate reason — for a class or research or bird-watching. The people who walk off the paths are the ones who cause the problems by disturbing the area," Roth said.

The poison ivy is "fairly well wide spread," Roth said, "but there are places where it is not so thick. People who go out there for classes — botany

and forestry people — know what poison ivy looks like and how to avoid it."

Ashby said that the asphalt paths which run through Thompson Woods may be one reason for the wide growth of poison ivy. Some trees died because their roots were injured when paths were laid. The fewer trees there are, the more light gets to the ground and poison ivy thrives on light, Ashby said.

Roth said, "The woods are opening up and more light does cause more poison ivy."

"Some of the trees had to be taken down because they were decaying and about to fall down," Roth said. "They were a safety hazard. Some trees are lost to natural causes — for example, lightning struck a tree last winter."

When the paths were laid, some grading needed to be done. This also might have disturbed the area, Ashby said.

Most of the asphalt paths were laid on the ground without much grading, Roth said. "The asphalt paths don't do nearly as much damage as people who take short cuts and make their own paths. If people want to show how environmentally concerned they are they will stay on the asphalt paths."

Roth said that he thinks there are too many asphalt paths, "but they do channel traffic and minimize disturbances, just like the roads to Chicago

channel traffic so people don't drive through cornfields."

There are more persons taking short cuts through the woods and wearing new paths now than there were five years ago, Roth claimed. "Very few of the footpaths that are there today were there five years ago."

One way to eradicate the poison ivy would be to lower the disturbance of the woods, Ashby said. This would allow other plants to grow and choke out the poison ivy. To do this, however, it would be necessary to put a fence around the woods, which would be impractical, Ashby said.

"The poisonous sprays that kill poison ivy kill just about everything else," Ashby said. "You're going to have to pay a price."

To get rid of poison ivy in his yard, Ashby donned a pair of gloves and pulls the ivy out, making sure to wash up carefully afterwards. He suggested this method for Thompson Woods.

Pulling the poison ivy out by hand might slow it down, but it would not solve the problem, Roth said. He added, "I would hate to see how many people would be over at the Health Service with poison ivy blisters."

"Juice from a broken stem could splatter up in someone's face or on their arms," he said. "Some people who are allergic can get it by just brushing up against it and getting it on their clothes."

If Thompson Woods were in an isolated area, the poison ivy could be controlled through "a prescribed burn," Roth said.

A prescribed burn is a carefully controlled, slow fire that burns out all undesirable vegetation, he explained. It does not reach high enough to harm trees.

A prescribed burn usually benefits wild flowering shrubs and ferns because it destroys the weeds that are choking them out, Roth added.

Ashby worked on a research project on poison ivy from 1962 to 1966. Although most of Ashby's work concentrated on the Pine Hills area, one of his graduate students did his thesis on the poison ivy in Thompson Woods.

The purpose of the student's thesis was not to find out how to eradicate the poison ivy, Ashby said, but "to find out how it is getting along in the world" from a botanical point of view. The student studied how poison ivy was interacting with its environment and other plants. The poison ivy was "doing just fine," Ashby said.

A weed in Thompson Woods that is more immediately dangerous than poison ivy, from a forestry and botanical point of view, is Japanese honeysuckle.

Japanese honeysuckle is dangerous because it smothers and kills out other plants, Ashby explained. Poison ivy does not.

Japanese honeysuckle can even kill young trees by growing up around them and bending them over, Ashby said.

Roth said the forestry department had the honeysuckle destroyed around the few young trees that were in danger of being totally smothered. The Physical Plant does the actual maintenance, he said.

Walking to class Wednesday, little did this unsuspecting student know that he was approaching a patch of poison ivy that grows along paths in Thompson Woods. (Staff photo by Peter Zimmerman)

Ivy leaf professor

Clark Ashby, professor of botany, pointed out some large poison ivy plants growing in Thompson Woods Wednesday. He said the plants often grow to over five feet in height. (Staff photo by Peter Zimmerman)

Rep. Hays quits House; sex inquiry halted

By Jim Adams
Associated Press Writer

WASHINGTON (AP)—Rep. Wayne L. Hays, the once powerful House chairman who was toppled by a Capitol Hill sex scandal, resigned from Congress Wednesday, effective immediately.

The House Ethics Committee quickly terminated the payroll-sex investigation involving the Ohio Democrat by a vote of 12-0 on grounds that Hays was no longer a congressman.

Chairman John J. Flynt, D-Ga., denied in response to a question that any deal had been made for the committee to drop its investigation in return for Hays' resignation.

Hays' resignation was read by a House clerk to members. There was no

visible reaction.

"I think he did it to save his family," House Speaker Carl Albert said.

The inquiry was on the charge by Elizabeth Ray that Hays kept her on his House Administration Committee payroll only to be his mistress.

The charges forced Hays to resign as head of the Democratic Campaign Committee, quit as committee chairman and then to announce he would not seek re-election to Congress.

Hays himself asked for the Ethics Committee inquiry saying it would exonerate him by establishing that Miss Ray did committee work for her \$14,000-a-year pay.

But Hays said when he dropped his re-election campaign three weeks ago that one reason was "I don't want to give that woman a chance to make

another appearance."

There was some confusion about when Hays actually leaves office.

Hays told Ohio Gov. James A. Rhodes on Wednesday that he would resign Sept. 8.

But in a letter distributed by his staff, Hays said, "I hereby resign my office as a representative in the Congress of the United States from the 18th District of Ohio, effective immediately."

Members of the Ethics Committee, meeting after Hays' announcement, said they were not sure which would be the resignation date.

Before Hays would resign, his aides pressed for an assurance first that the resignation would halt the Ethics Committee's payroll-sex probe against him, sources said.

They said Hays' aides were ready to

submit the resignation letter to Speaker Albert Wednesday morning but did not when they learned they had no promise the committee would vote to halt its investigation.

The Ethics Committee had voted Monday to begin hearings for its probe Sept. 16 despite a plea that Hays was too mentally depressed to defend himself.

Albert disclosed at his regular noon briefing that Hays had asked the committee then if dropping his re-election bid would halt the Ethics Committee probe and was told it would not.

But Albert said the Ethics Committee told Hays that the probe would automatically be dropped if Hays resigned from Congress because he would no longer be a congressman.

Opinion & Commentary

EDITORIAL POLICY—The general policy of the Daily Egyptian is to provide an open forum for discussion of issues and ideas. Opinions expressed on the editorial pages do not necessarily reflect those of the administration or any department of the University. Signed editorials represent the opinions of the authors only. Unsigned editorials represent a consensus of the Daily Egyptian Editorial Committee, which is composed of the student editor-in-chief, the editorial page editor, a member elected by the student news staff, the managing editor and an editorial writing instructor.

LETTERS POLICY—Letters to the editor are invited and writers may submit them by mail or in person to Editorial Page Editor, Daily Egyptian, Room 1247 Communications Building. Letters should be typewritten and should not exceed 250 words. Letters which the editors consider libelous or in poor taste will not be published. All letters must be signed by the authors. Students must identify themselves by classification and major; faculty members by department and rank; non-academic staff members by department and position. Writers submitting letters by mail should include addresses and telephone numbers for verification of authorship. Letters for which verification cannot be made will not be published.

Gender change relative to tennis

By Arthur Hoppe
of Chronicle Features Syndicate

The talk in tennis circles is all about Dr. Renee Richards, a six-foot-two, 41-year-old player who is sweeping women's tournaments thanks to a powerful overhead, an adequate backhand and a sex-change operation.

Dr. Richards used to be Dr. Richard Raskind, a perennial runner-up in the men's over-35 division. Now, what with one thing and another, she's a winner.

No one at The Tiddling Tennis Club would question for a moment Dr. Richards' motives in having such an operation. But were not at all sure about Fred Frisbee.

Frisbee returned from his annual vacation and showed up for our regular Saturday morning men's doubles game wearing a blushing pink see-through chiffon tennis dress with matching lace panties. As Fred is six-foot-three, weighs 240 pounds and is 48 if a day, this understandably caused some comment.

"Where did you spend your vacation, Fred?" inquired crusty old Doc Pritchgart, "in a closet?"

"Denmark," Frisbee replied with dignity. "And henceforth kindly address me as Hermione. Beneath my formerly-hairy chest has always been the heart of a woman. At last I have revealed the true me."

"A real winner," said Doc Pritchgart, nodding suspiciously.

Doc was right. Frisbee, who had never won a trophy before, captured the Club's women's singles title in straight sets.

Frisbee's former wife, Felician, bravely offered her "total support." This helped them win the women's doubles championship. And even Frisbee's strapping son, Fred Junior, admitted, after their victory in the Mother-Son Tournament, "You're a real mother, Dad."

You'd think Frisbee would've been happy. But at the office, where Frisbee had always been termed "aggressive, perceptive and a fine figure of a man," fellow workers now whispered that Frisbee was "pushy, nagging and flat-chested."

"And that's odd," Frisbee said, "because I haven't changed a bit."

Worse yet, at the Club we had to cancel our regular Saturday morning game on the grounds our wives would inevitably say, "If you can play with a woman, why can't you play with me?"

So Frisbee was reduced to women's doubles where one's concentration is constantly challenged by diaper changing, toddler chasing and intense discussions of who is having an affair with whom.

No member of the Tiddling Tennis Club was a bit surprised when Frisbee took two weeks off to grow a beard.

"As a woman, I didn't mind not being able to use the sauna, the card room or the courts during prime time," he explained. "I didn't mind the household drudgery. I didn't even mind getting fired from my job."

"What I couldn't stand," he said (and every true tennis player immediately recognized the ring of truth at last), "was that my game was going downhill."

Short shots

India's prime minister, Indira Gandhi, has requested a new constitution to further limit civil liberties and opposition parties, thereby leaving the world to look on in fascist-nation.

H.B. Koplowitz

President Ford's media experts are now coaching him on how to debate and chew peanuts at the same time.

Handling the drinking driver

Chris Moenich
Daily Egyptian Staff Writer

Drinking drivers are responsible for more than 10,000 auto fatalities annually. Estimates indicate 40 per cent of pedestrian deaths are traffic-alcohol related.

Six ounces of 90 proof whiskey produces incoordination of movement in a majority of persons. It also creates a six-fold increase in driving fatalities and accidents.

Viewpoint

Despite the statistics, alcohol content detectors are inadequate. Breath analyzers measure the amount of vapor in the breath and not alcohol content in the bloodstream. Blood level tests cannot be administered without the person's consent.

The American society, though, tolerates the high level of alcoholic consumption. Using alcohol is not a problem but abuse which leads to traffic fatalities obviously is.

Several countries, such as the Scandinavian countries, have reduced drunken driving by imposing

severe penalties and close driver surveillance.

Since one-half of the American law enforcement time and budget is already occupied in attempts to cut-down alcohol-related crimes, a new system for informing the drinking driver must be implemented.

Since television ownership is widespread in America agencies such as National Highway Traffic Safety Administration and local law enforcers should continue to reduce the problem through educational TV programs.

Unfortunately, mass media campaigns in the past have channeled their efforts into installing fear and not creating responsible drinking habits.

The public must be informed on potential risks involved from different amounts of alcohol consumption. Televised accidents viewed by the public are ignored because imposed fear doesn't work. A person informed on the risk potential is capable of independent decision-making behind the wheel.

The agencies must present information in a factual and objective manner. Correct decisions for regulating driving and drinking habits must be based on rational and not sensationalized presentations.

Blood level tests should be mandatory. Those found to be in violation of the law for drunken driving must attend programs re-educating the drunken driver.

Covert actions not needed in CIA

By Edward P. Morgan
of In The Public Interest

A former government official with impeccable credentials has come up with a valuable critique on the Central Intelligence Agency and suggestions for its future operational behavior, without either scuttling it or allowing it to operate secretly as an autonomous strong-arm, so to speak, of government, beyond the law.

Writing in the April issue of the prestigious quarterly, Foreign Affairs, Herbert Scoville, Jr. asks the question Is Espionage Necessary for Our Security? His answer is, not in the way it's been run.

Scoville, now an official of the nonpartisan Arms Control Association, held high positions in the CIA for eight years and later became assistant director of the Arms Control and Disarmament Agency.

Commentary

Scoville starts right out by condemning the dirty tricks department, as covert actions have come to be called. "In the current climate," he writes, "it seems unlikely that they could be kept secret for any period of time."

"But even if they could... they are not the proper way for the United States to conduct its foreign policies. We must combat hostile influences by using the good qualities of our democratic society, not by copying the reprehensible tactics of those we are opposing."

In the long run, this will be far more beneficial to

our security than will any temporary local successes obtained through covert action. Therefore... I would propose that this country should henceforth cease all covert action operations," as opposed to gathering secret information.

Information, he reminds us, "is only a means to an end and not an end in itself." Given the remarkable perfection of satellite photography, improved communications intelligence and open sources, he believes that "human covert sources (now) rarely provide useful intelligence in the military area."

Scoville notes that Third World governments are increasing hostile to the West, erecting barriers to outside inquiry; thus intelligence operations are necessary here to sense political motivations and plans.

He concedes that counterintelligence may be a "vital tool for combating terrorism both at home and abroad." But the need is to develop new methods of guarding society "from violence or foreign subversion without trampling on individual liberties."

"... A whole new effort to establish standards and controls over such operations is plainly needed."

Although he denounces the CIA's dirty tricks, and thus by implication such wild plans as to assassinate foreign leaders, and is clearly outraged by its breaking the law in invading the privacy of American citizens, Herbert Scoville says it would be wrong to abolish clandestine operations for the collection of foreign intelligence.

He offers no specific plan for the restructuring of the CIA, concluding, however, that "We have no room for operations for operations' sake in our intelligence structure."

For a former high CIA official to say, critically, that much, is progress.

Medicaid program needs restructuring

By Robert Wren
Assistant Editorial Page Editor

Appearing before the Senate Special Committee on aging, two New York City chiropractors convicted of Medicaid fraud said there is little hope of reforming the scandal-ridden health care program, as "the system stinks."

Dr. Joseph Ingber, sentenced to five years in prison for his fraudulent Medicaid practices, claims that everyone in the medical profession cheats on Medicaid procedures, and pointed out some of the inequities of the system, such as billing procedures.

As a result of a Senate investigation conducted by Sen. Frank Moss, D-Utah, it is estimated that 25 to 50 per cent of the \$15 billion yearly federal expenditure for Medicaid is being wasted.

In the course of the investigation, the Senate team headed by Moss encountered some atrocious medical practices, such as turning in a soap mixture for a urine sample and having a doctor report the urine as normal.

Moss himself displayed discolored forearms at the hearings which he said was the result of improper blood drawing.

Naturally, M. Keith Weikel, head of the HEW Medicaid program said the estimates of a 25 to 50 per cent waste figure was too high, and lowered it to 5 to 10

per cent. So a figure between 5 and 50 per cent waste will eventually be arrived at.

But does everyone cheat, as Ingber suggests? His testimony can be tempered with the fact that he is admittedly dishonest.

How many cheats is a figure that hopefully will be arrived at in the course of the hearings. But it is

Editorial

evident from the personal testimony of the Moss investigative team that a number of fraudulent practices exist.

Ten years ago, Medicaid cost the government \$1.5 billion, so as the program grew, so grew the abuses.

It is evident that the Medicaid program needs overhaul from top to bottom. The question is, can it be overhauled, or should it be torn down completely and restructured?

If the financial abuses weren't enough to consider, what about the atrocious medical practices that poor people have been subjected to. Certainly Senator Moss, should he develop an infection in his forearms, can seek adequate medical care.

But the thousands of poor in this country dependent

on the Medicaid program have nowhere else to turn. They are dependent on whatever health care the government can provide.

Though the Department of Health, Education and Welfare, again in their own defense, said they were aware of some of the abuses cited this week before the Moss committee, it is becoming painfully evident that they are ill-equipped to deal with them.

So let's hope the publicity generated concerning Medicaid abuses doesn't die down, that the public isn't so immune to stories about government waste that the scandal becomes old news tomorrow. There's hope for that, inasmuch as the November elections are approaching, and the poor, if not too sick, can at least vote, to say nothing of the taxpayers financing Medicaid.

As it stands now, the government appears to be paying for health care that could be shortening human lives.

One of the major criticisms of President Ford is that he has vetoed 55 pieces of legislation in his short tenure as President: Most of the bills he vetoed involved federal spending. So maybe he should keep it up if Congress insists on appropriating money on health care that essentially doesn't exist.

And if the Medicaid program is as mismanaged as the Senate committee suggests, heaven help this country if a national health care bill is passed.

Exclusionary rule threatens individual liberties

By William C. Willard Jr.
Inmate, Menard Prison

As a relatively proficient jailhouse lawyer, I must take strong exception to a recent article in the Opinion & Commentary section of the D.E. regarding the Supreme Court's recent ruling on the right to review state decisions on the "exclusionary rule".

The student writer, Sue Green, who is apparently a law student as well as a proficient writer, fails to take into account the history, legal ramifications, and encroachment of basic individual rights that this ruling embodies.

Historically, each individual citizen has the constitutional protections of the right to privacy, as well

shelter for criminals does not stand when the constitutionally protected rights of the citizenry are at stake, or police will not, without regulation, guarantee the protections in the course of their duties.

If the Supreme Court now refuses to review previously decided state cases involving the "exclusionary rule", then in fact and effect the states and their subordinate agencies can again return to the

unfettered search and seizure practices, and the average John Doe Citizen loses out because his protections are seriously diminished.

I fail to see that the court's decision is a step in the restoration of justice. At best, with this decision, the Constitution has been severely diminished as to its literal meaning, and we step back into the scenario of lesser rather than more police protection.

Commentary

as to be free from unreasonable searches and seizures by the government, or their appointees, and-or public servants such as police. In the '50s and '60s, innumerable cases were brought to the court's attention (for review) showing blatant abridgements of these basic rights, particularly by overzealous police with virtually unfettered discretion.

Hence, the court set up basic guidelines for the states to follow in order to protect the rights of the citizens. Much like the Miranda decision, this puts a much more articulate burden on the police, FBI, et. al. Prosecutors and police argue that the burden of the protective procedures thwarted justice for simple mistakes made in the searches and seizures.

The fact of the matter, as the Supreme Court articulated, was that the injustices were not mere mistakes made by arresting officers, but rather, flagrant rip-offs. Some bordering on entrapment. Robert Morgenthau, Manhattan DA, substantiates that police are somewhat reckless when he states that his conviction rate dropped 25 per cent due to the "exclusionary rule", e.g. improper police procedure.

The argument that the exclusionary rule is a legal

'Concrete' solutions follow thoughtlessness

Although this isn't a gardening column, I'm going to talk about grass . . . keep off it. Not the pipe-loading kind, but the kind that separates sidewalks.

A phone call brought to my attention something I've often seen but never really noticed; people cutting corners in the walk, wearing a path in the grass. And wherever a path is formed, a sidewalk eventually appears in its place.

My caller, Dick Bortz, associate professor in occupational education, put it better when he said, "Pretty soon the grass is gone and the concrete grows."

Bortz cited the example of a tree which once grew along the path from the Student Center to the overpass. He said a path was formed across the grass exposing the tree's roots. Finally the tree had to be cut down and the area paved over.

When I worked for University Park maintenance, I was on East Campus every day. Again, I never really noticed how often new sidewalks appeared where there had been paths and how often new paths would appear despite the proliferation of sidewalks.

It may be that the sidewalks are not placed where they should be—that often they do not go where people ordinarily walk. But it seems people will walk where they want without considering the damage they cause.

to disappear before my eyes. It was one of the few patches of grass on campus which attracted everyone.

The problem is not hordes of people competing for a spot on which to sit or play. There is enough room for people to spread out. The problem lies with the people who will not take a little time to turn a corner on the walk.

This year, there are more students here than there have been for several years, and SIU's budget has not kept pace with the higher enrollment.

Any solution to the problem costs money. Resodding not only is expensive, but is a waste of time if people will not change their habits. Paving costs money, and grass is lost. The erection of fences and the stringing of chains cost money and restricts those who want to sit on the grass.

Larger enrollment is likely to add not only to the wearing away of grass but to more beer cans in Campus Lake and other abominations. This is a time for everyone to be more considerate of the people they share the campus with and of those who will be here in the future. The beginning of the school year is as good a time as any for reformation.

Viewpoint

Will anything other than making the campus a parking lot bring the process to an end?

SIU is not the forest primeval, but it is about the greenest campus I've seen. The University of Illinois at Champaign, for example, is pretty barren by SIU standards. The trees on the Quad were gone before I came, lost to Dutch Elm disease, but the grass seemed

Two SIU clubs plan fish fry, golf

The SIU Alumni of Jackson County and the Saluki Athletic Club will hold two of their annual events, a fish fry and a golf tournament, on Sept. 10.

The fish fry will be held at Evergreen Park and the golf tournament will be held at the Crab Orchard Golf Course.

Tee-off times for the golf tournament are scheduled from 8 a.m. to 1 p.m. Entry fee is \$6 for Crab Orchard Club non-members and \$3 for members. Reservations must be made before Sept. 3. Forms may be picked up at the Alumni Office, located in Fanner Hall.

The fish fry will begin at 6 p.m. Prizes for the golf tournament will be awarded at the fry. Admission is \$3 for adults and \$1.50 for children under 12.

Bake-off contest has bread winner

BOSTON (AP)—Lenora Smith of Harahan, La., cooked a "Whole Wheat Raisin Bread" and won the \$25,000 first prize in the Pillsbury 27th Bake-Off contest.

Smith said she dreamed up the recipe for the loaf, which costs about 65 cents to make, when she needed whole wheat bread for a party.

Lois Ann Groves of Tucson, Ariz., won a \$25,000 prize in the refrigerated foods category with her "Caramel Swirl Ring" with homemade caramel sauce.

Academy helps Jews realize Jewish identity

By George W. Cornell
AP Religion Writer

NEW YORK (AP)—They missed something along the way, something in awareness of who they are, why and for what reason, and they're trying to fill in the gaps.

That's the situation described by many Jews who are enrolled in an unusual Academy for Jewish Studies Without Walls, set up by the American Jewish Committee in cooperation with the University of Haifa.

In letters to academy offices at Manhattan's 165 East 56th St., the students taking various correspondence courses, ranging from biblical thought to the relation of Christianity and Judaism, tell what motivated them to do it.

Often, it was to gain a more solid religious footing, an understanding which they previously had lacked

and for which they'd come to feel a need.

They include technicians, secretaries, doctors, teachers, lawyers, accountants, housewives, military personnel and others, even some who are serving prison terms. Their ages are from the 20s into retired years.

"I always knew something was missing...my Jewish identity," writes Margaret Ellen Swartz, 28, of Rochester, N.Y., who says her wealthy parents abandoned their religious heritage. Now married, she says she feels "keenly the need for a Jewish education" so as to do "my part to make this world a better place."

Martin Boris, 44, a Woodmere, N.Y. pharmacist, says he had been one of those implicitly contradictory types, a "Jewish atheist."

Deadlocks can foil burglars

NEW YORK (AP)—Burglary doesn't always occur at the other person's home. Every 15 seconds a home is burglarized in this country and you could be next, warns the Insurance Information Institute.

Cylinder deadlocks on all entry doors can help deter potential burglars, says the institute.

Various types of deadlocks are available. For advice on the type that will do the best job for you, contact a qualified locksmith or the

police.

On doors with glass panels, such as sliding glass doors, install double-cylinder deadlocks that lock from either side with a key, the institute advises. Burglars are thus prevented from breaking the glass and reaching in to unlock the door.

Another effective method of securing your sliding door is to place a metal or wooden rod, such as a broom handle, into the sliding jamb at the bottom of the door.

College breeds flies for studies in development

CHICAGO (AP)—There are two million flies at the University of Chicago and not a fly swatter in sight.

Technicians are breeding half-a million flies every 10 days in the university's fly laboratory. Two million live there in bottles.

They are used for experiments in genetics—how living things develop and the nature of the evolutionary process.

"Our flies are not ordinary flies," says Dr. Janice B. Spofford, associate professor of biology. "Their lineage dates back to 1910. They are smaller than houseflies and they have red eyes. Their technical name is *Drosophila melanogaster*."

The flies mate in incubators with constant temperatures between 75 and 80 degrees. If any get loose they are trapped. If any get loose they have to answer to a security guard.

"We have milk bottles with cornmeal mush or crushed banana in the bottom," said Leslie Jones, one of the technicians. "We fold file cards and stick them in the mouths of the milk bottles. The flies manage to get in and go after the food, but they can't find their way out. It's kind of like trapping lobsters."

"Before we work on them they are put in an etherizer and are knocked out," she said.

Dr. Spofford is very fond of the laboratory flies but she doesn't like flies buzzing around her house.

"I'll swat those without compunction," she said.

Housing shortage affects animals too

By Elizabeth Bosca
Daily Egyptian Staff Writer

Dogs and cats in Carbondale may have as much trouble finding housing as students do.

John McGary, manager of Lewis Park apartments, said the complex is one of the few in Carbondale which allows pets of any type.

Students who keep pets at Lewis Park are required to pay an extra \$50 damage deposit, refundable at the end of the year. Rent is increased \$10 per month for a dog and \$6 per month for a cat.

McGary feels abandonment is a big problem in Carbondale. He said that when he first came here last year, Lewis Park looked like a kennel.

"A kitten or puppy looks cute at the beginning of a semester," McGary said, "but few want to drag pets home come summertime."

Lewis Park has instituted its own identification system in which pets wear red tags with owners' names and apartment numbers on them. McGary said this protects both the pets and the owners.

Carbondale police and the city dog warden cooperate with Lewis Park by doing bi-monthly checks for lost and stray pets.

Carbondale Mobile Homes, a trailer park north of the Carbondale city limits, is another facility which allows cats and dogs for pets.

Don Beatrice, manager of Carbondale Mobile Homes, said pets at the park must be leashed at all times, or they are turned over to the Jackson County Humane Shelter.

Pet lovers on campus are not so lucky. Under a proclamation issued by former SIU President David Derge in Feb., 1973, no animals are allowed in University buildings with the exception of seeing-eye dogs and laboratory animals.

Sandra Welch, an SIU security

employee, said animal regulations are adhered to for the most part on campus. Seventy-seven stray animal incidents were reported in 1975.

"Most calls come from offices or passersby who see dogs chained or in buildings for long periods of time," said Welch.

Welch said 10 dog bites were reported in 1975. Eight of the animals involved were located. One arrest was made in a case that is still pending.

Suzanne Stevenson, manager of the Jackson County Humane Shelter said the animal population there rose to 750 pets in July, an increase of 150 over June.

Stevenson said many of these were pets left behind by students, and more were kittens and puppies that owners had let their pets breed.

Most of the animals at the shelter are turned in by people who find them running loose. Stevenson said the Carbondale animal warden refers between 45 and 50 pets per month to the shelter.

"Many animals that are turned in are sick from being abandoned, unfed and just uncared for," said Stevenson. "Half of these are reclaimed, while the others are put to sleep because of sickness."

Cats are available at the shelter for a \$10 adoption fee; dogs, for a \$15 fee. Stevenson said there is an Illinois law which requires all adopted female pets to be neutered, but these costs are included in the adoption fees.

A Carbondale ordinance stipulates that all dogs six months old or older must be licensed and registered, and that no dog should be permitted to run at large.

The ordinance also states that all owners must provide their animals with humane care and treatment, including sufficient food and water, proper shelter and veterinary care when needed.

Area school personnel train in placement pilot

By Mary Jo Hovell
Student Writer

Fifteen persons chosen from area schools will be taking part in a pilot program to train placement personnel beginning Sept. 11 at SIU, said Wayne Ramp, director of the program.

Ramp, a professor in occupational education, said the program has several objectives including the identification of specific skills needed by placement officers, the training of the participants in these skills and the development of placement centers at their home schools.

"Placement is a transitional activity that indicates someone is helping a student to make a move,"

said Richard Boss, the program's assistant director and professor of vocational education. "be it school to work, school to school, or school to the military."

According to Ramp, some states have passed laws making placement service mandatory in high school and post high school institutions.

Harvey Ideus, director of Career Planning and Placement, will also be working as principle investigator with the program, which is being jointly funded by the Illinois Department of Adult Vocational and Technical Education.

The program will consist of weekly seminars on campus each Saturday and a practicum at the participants' schools.

The Charlie Daniels Band

Daniels band gives boogie its head

By Michael P. Mullen
Entertainment Editor

The Charlie Daniels Band (CDB) suffers from an identity problem. CDB is usually classified as... just another Southern boogie band, and thrown in the same class as Lynyrd Skynyrd, Wet Willie, present day Allman Brothers and Marshall Tucker.

CDB's latest album, "Saddle Tramp," is unmistakably Southern-fried, but CDB has some elements that put them just a bit apart from the above mentioned bands.

Despite the fact that the band bears his name, it is more "Charlie Daniels' Band." Daniels' talent does color the band; he writes most of the songs; does most of the lead vocal work, and provides most of the instrumental solo work on guitar, fiddle and banjo.

But close listening reveals a taut under-current of rhythmic structure that is the reason Daniels sound so good.

First noticed is the fact that the band employs two drummers, Fred Edwards and Don Murray.

Secondly, Tom Crain, the band's other guitarist, is no slouch with a guitar.

A Review

Finally, keyboard player Joel DeGregorio works both ways; fitting in with bassist Charlie Hayward and drummers Edwards and Murray to form an abundantly vibrant rhythm section, or playing some lively solos of his own.

CDB can do a lot more than crank out Southern boogie, which they lean toward a bit, but they can combine some fine jazz inspired rhythmic structures with excellent solo performances to produce a sound that goes beyond geographic classification.

The best examples of this fusion are heard on the title tune and the bluesy "It's My Life."

"Saddle Tramp" begins as a guitar dominated ballad, then works its way through rhythmic changes into a full tilt jam. Both Crain and Daniels solo on guitar, beginning each with tight duets.

While Daniels and Crain get untracked, the rhythm section shows a brilliance all its own. Drummers Edwards and Murray, aided by the Allman Brothers' Jai Johanny Johanson on congas, bassist Hayward and DeGregorio on piano set down flowing rhythmic structure for the guitarists.

Piano and drums meander gently from the rhythmic mainstream, yet are held within the song's boundaries by the solid cooking of Hayward's bass. At the conclusion of the guitar solos, the band restates the melodic theme, then launches DeGregorio on a fine solo of his own.

None of the solos on "Saddle Tramp" are overdone or overblown; each is tight, succinct. It is an excellently played piece that captures all the elements that the Allman Brothers, in their heyday, had going for them.

While "Saddle Tramp's" tempo builds and grows faster in its course, "It's My Life" begins with a fast, compact jazz exercise that mellows into a classic blues number.

The rhythm section nearly steals the spotlight on "Saddle Tramp," but on "It's My Life," the searing solos executed by Crain and Daniels deservedly become the focus of attention. The song begins with a guitar-piano duet, slowly settles into a blues tempo, then explodes with Crain's excellently archetypal blues licks.

Daniels vocal section is followed by a piano solo, then Charlie's slide solo first drives the song to peak

intensity, then glides it to conclusion. Except for Daniels' distinctive vocals, the song might easily be mistaken for vintage Allman Brothers.

Though the rest of the album doesn't quite reach the peaks of these two songs, CDB does deliver a large dose of the music that's been known to drive "hey let's boogie" people to do just that. "Dixie on My Mind" and "Sweet Louisiana" are both boogie at its best; hard, driving rhythms with no-slack solos.

If CDB is as good in person as they are on record, there won't be any disappointed people in the Arena the night of Sept. 17.

FM rock fans have a choice

By Nancy Valentinas
Graduate Student Writer

SIU students can literally "rock around the clock" on or off campus. Providing the necessary music 24 hours each day, are five FM radio stations: WIDB (104 cable FM; simultaneously heard in campus and dorm buildings on 600 AM), WTAO (105 FM), WCIL (101.5 FM), WSIU (92 FM), and WEBQ (100 FM).

Located in University Park, off the SIU campus, WIDB cable FM is owned and voluntarily operated by the SIU students. The album-oriented rock station plays a "balance of new music mixed with older, more popular songs which are basically progressive," stated Tom Thaviv, WIDB chief engineer. Features of the station include a jazz show on Sunday, from 7 p.m. to 11 p.m. with live music from the Pinch Penny Pub in Carbondale, from 9 p.m. to 11 p.m. "The Soul Entertainer" provides 15 continuous hours of black music beginning at 4 p.m. on Saturday. WIDB remains the only station in Southern Illinois with a black program that is totally produced and operated by a black staff.

"We're a volunteer station—more oriented to what's popular and consistent with SIU students. This is evident in our staff's attitude. Most are volunteers without pay or class credit. The students run WIDB to learn, apply what they have learned, and perfect their technique. We're proud of WIDB," said Larry Davis, WIDB general manager and sales manager.

WIDB is heard in the Student Center and dormitories. WIDB cable FM may be acquired in Carbondale from the cable television service. News is broadcast hourly. Music requests are important to the station and may be phoned in anytime at 536-2363.

During an hour at WTAO-FM in Murphysboro, one might hear country-folk, disco, blues, jazz or old rock'n'roll music. "We don't pick our music off the charts. We aren't interested in what is selling. Our

purpose is stated by servicing the community, entertaining it, and turning it on to new music," revealed Kit Perry, WTAO Station Manager.

The station's format, which Kit refers to as "a tool, not a rigid structure," displays the radio personalities as being "real, honest and conversational." An open forum, "The Tea Show," has introduced guest speakers such as doctors, a marriage counselor, and food coop operators. The program is scheduled from 9 a.m. to 9:30 a.m., Monday through Friday.

"We avoid using superlatives such as 'great' or 'super.' We don't editorialize," Kit said. Commercials are similarly structured, as they emphasize information. Skits, funny characters, slogans and jingles are avoided.

"WTAO has an interesting news philosophy. We don't read rapes, murders, or traffic accidents." According to Kit, "The news that we pursue is what people can control. We don't want to repeat news. We can't report everything, so we choose to report news that people can do something about."

Music requests may be phoned in anytime at 687-2000. Questions directed to "The Tea Time" guest speaker are also phoned in at that number.

WCIL, located in downtown Carbondale, began broadcasts in 1946 as the first FM radio station in Southern Illinois. "We provide music that appeals strongly to an 18 to 34 age group. We don't want to be strictly top 40. We're geared to the preferences of our community. Our music appeals to their interests," stated Kevin J. Potts, WCIL-FM operations and program director.

"Direct involvement with the station is promoted through contests, our music request line, student and community commentary, and contacts with Carbondale record stores," remarked Dennis Lyle, WCIL sales manager. Music requests are received on the "always open" 457-3331 line.

Another feature of WCIL, unique to Southern Illinois, is the WCIL-FM

Survey, compiled by Music Director, Tony Waitkus. The survey is available at the WCIL office and the record departments of local stores. "We want our community to know that their ideas and preferences are considered. Our record survey is proof that we are working for and with the community," Potts said.

News is reported hourly. Featured newscasters include Howard Cosell, Keith Jackson and Frank Reynolds. "Feedback" runs from 1:00 p.m. to 1:50 p.m. The "Feedback" interview format allows call-in participation at the previously listed WCIL number. A variety of topics are covered.

Affiliated with the SIU Radio-Television Department, WSIU offices are stationed in the Communications Building.

"We provide the radio technology student with excellent facilities and the opportunities to turn learning into practical experience," stated Kenneth Garry, WSIU manager and SIU faculty member. "Our facilities and opportunities are not limited to Communications students," Garry interjected.

WSIU is easily identified by its block-variety format. Throughout the day, times are allotted during which a particular type of music is played. Classical music is extensively featured.

A rock format is broadcast Monday through Friday from 2 a.m. to 6 a.m. on "Nightwatch." Approximately 12 hours are devoted to fine arts and public service, while 12 hours is later devoted to contemporary music," Garry commented.

A booklet comprised of the WSIU program schedule and program descriptions is available at the WSIU offices.

WEBQ-FM, stationed in Harrisburg, provides "a contemporary rock format that is totally automated by TM Productions in Dallas, Texas," according to WEBQ Manager, Larry Walton. A music request line is continuously serviced at 252-6307.

Carter-Ford reps arguing on ground rules for debates

By Lee Byrd
Associated Press Writer

WASHINGTON (AP) — Jimmy Carter and President Ford neared agreement Wednesday on the ground rules for the first face-to-face presidential campaign debates in 16 years.

Representatives for both sides appeared optimistic that the subject matter, number and timetable for the proposed confrontations on national television would be set by evening.

Bargaining teams for the two major candidates met with officials of the League of Women Voters throughout the day in what was unofficially billed as the final round of talks to iron out the format of the debates, which Ford and Carter endorsed in principle last month.

William Ruckelshaus, a chief negotiator for Ford, replied "We hope so," when asked during a lunch break if a settlement were near. Jody Powell, press secretary for Democrat Carter, nodded and said "Could be."

Not since 1960, when John F. Kennedy met Richard M. Nixon in a

series of four broadcast debates, have the Democratic and Republican nominees argued directly with one another.

Carter already had disclosed, following the first meeting between the two camps last Thursday, that tentative plans called for a series of three debates, each 75 minutes long, beginning the third week of the month.

But the topics, apparently, still were open to considerable wrangling in the session Wednesday. Ford wanted to open the debates on the subject of defense, an area where he feels he can score in light of Democratic attempts to cut the Pentagon budget. Carter, on the other hand, wanted to open up over the issue of presidential leadership.

The importance that both sides attached to the opening debate doubtlessly reflected the lesson of the Kennedy-Nixon meetings. Then, according to most analysts, Kennedy came off best in the opening session and Nixon never quite recovered despite doing well in the subsequent programs.

The League of Women Voters got clearance Monday from the Federal

Election Commission to sponsor and finance the debates, which could cost \$130,000.

While his representatives were at the bargaining table, Carter, at his home in Plains, Ga., acted to remove a potential obstacle by asking the Democratic National Committee to withdraw its legal challenge to a related Federal Communications Commission ruling.

The FCC held last year that debates and presidential news conferences were exempted from the equal time standard that requires broadcasters to treat separate candidates with virtually the same coverage.

The Democratic committee had petitioned the Supreme Court to disallow the exemption on ground that it would give the President free time during a campaign. But while Carter said he agreed that the decision on news conferences is "inherently unfair," he asked that the complaint be withdrawn because that issue and the proposed debates "are so intertwined that it is impossible at this time to distinguish between them."

Carter's plan criticized

Ford: troops should stay in Korea

By Howard Benedict
Associated Press Writer

WASHINGTON (AP) — President Ford on Wednesday sharply criticized Jimmy Carter's proposal to gradually withdraw some American troops from Korea, saying, "We cannot lay down our arms in the simple hope that others will follow our lead."

The President also said in effect that Carter was wrong when he questioned the combat readiness of the National Guard and criticized proponents of reduced defense spending.

Ford's verbal salvos drew strong applause from the audience of 3,000 persons attending the National Guard Association annual conference. His six-minute speech was interrupted with applause 12 times, and he received a standing ovation at the end.

Ford did not mention his Democratic presidential opponent by name, but said: "There are those in this political year who want to withdraw our troops from their positions overseas."

"The voices of retreat talk about a phased withdrawal. They talk as if our defenses won't be weakened if we only dismantle them one brick at a time. They are wrong."

"The world is still a dangerous place. . . we cannot retreat from the front lines of freedom if we are to preserve our freedom here at home," Ford said.

Beg your pardon

A story about SIU's informational exhibit at the Du Quoin State Fair on Page 7 of the Daily Egyptian Tuesday was incorrect on several points.

Area Services, the office under whose auspices the exhibit is being shown, is not a new program but has been in existence for some time and—contrary to the story—was not "created" by University Exhibits. University Exhibits created the multi-screen slide and sound show which has been a feature at the fair for a decade and is not, as the story said, in its second year there.

The dome-type building housing the show is not mobile and there are no "mobile domes" from SIU-C touring northern and central Illinois. The presentation lasts 20 minutes, not 15, according to Chuck Daugherty of University Exhibits.

South Pass Products
Cobden, Ill.
is now taking applications for the coming Apple processing season.

Apples will start at end of August. Day and night shifts available.

White House officials said Ford was referring specifically to Carter's proposal last month that most U.S. troops in South Korea be withdrawn completely over a four or five year period. Ford, in his speech, opposed "unilateral phased withdrawal."

As for defense spending, Ford said, "Cutting the muscle out of America's defenses is not the best way to insure peace. It is the best way to destroy it."

Carter has said "improved management techniques" could cut \$5 billion to \$8 billion from Ford's

record defense budget of over \$100 billion.

Carter, after a meeting last month with defense policy advisers, questioned the National Guard's readiness and the quality of their weapons. He said National Guard units in some states are "shot through with politics."

Ford was applauded Wednesday when he said the National Guard "has never been stronger or better prepared to meet any challenge to this nation's safety and freedom. I intend to keep it that way."

"Cooking Plain" contains 19th century recipes

By R. Scott Voigt
Student Writer

Pure food cookery of 19th century Southern Illinois is the subject of "Cooking Plain", a new cookbook by Helen Walker Linsenmeyer to be released by SIU Press in late September.

Nearly 300 recipes employing all natural ingredients (no synthetics of any kind) are included in the book, which also offers cultural and historical insights into the lifestyle of early Southern Illinois residents.

Linsenmeyer a resident of Grand Tower and a native of Southern Illinois, said she has always been interested in pure food cookery and collected most of the recipes in the book from family and friends.

"Many of the recipes are from family collections and many are from my own memory as taught to me by my mother," she said.

Cooking influences from many cultures, among them New England and European, may be found throughout "Cooking Plain". However, the most prominent influences are German and English-Irish-Scotch from which Mrs. Linsenmeyer is descended.

Linsenmeyer said that foods of 19th century Southern Illinois had to be preventative and healthful since life for the settlers was rigorous.

"Housewives had to work with whatever they had on hand," said Linsenmeyer. "This meant cooking with animal fats rather than the vegetable oils available today and using nuts, fruits and herbs indigenous to the area," she said.

"Cooking Plain" includes sections on beverages, soups, meats, main dishes, wild game and fish, vegetables, desserts, pies, side dishes, dumplings, noodles, stuffing, bread, cookies and cakes.

Linsenmeyer has also included sections on drying, butchering, and curing meats; drying fruits and vegetables; cooking with herbs, spices, roots and weeds; and a special list of helpful household hints.

Female Air Force jet pilots could be off and winging fall

By Diane Rowland
Associated Press Writer
WILLIAMS AIR FORCE BASE, Ariz. (AP)—Women have been training in their aprons for attaché cases and hard hats for some years, but this fall will be the first time they may don that prestigious green jump suit—the U.S. Air Force-issue flight suit.

With it they'll get extra flight pay and the chance to be the first female Air Force jet pilot to soar into the wild blue yonder.

But it won't be any powder puff derby, say officials at Williams Air Force Base, the site selected by the Air Force to train the nation's first women jet pilots.

They'll be treated exactly like the guys, will have to meet the same standards and do the same work, said Capt. Royetta Marconi, an officer in the base mental health center who has her private pilot's license and has been assigned as liaison officer for the first 10 female pilot trainees.

That liaison post is one of the few

special preparations being made at Williams for the female officers. Others, Capt. Marconi said, are cutting flight suits, gloves and helmets down to size, but that's about it.

The first 11-month course will be limited to 10 officers already on active duty, but that restriction will probably be removed later, said Maj. Robert Lake, Williams public information officer.

Another 10 women will begin pilot training Feb. 14, 1977, and six will be accepted for navigator classes in March 1977.

Some of the 30-40 men entering basic flight training currently are active duty officers, Lake said, but many come straight to pilot school from college.

The Air Force move toward full integration of women in the picture began in 1972, when the draft ended and the need for volunteers increased, Lake said. Since then, there have been female airplane mechanics and fuel chiefs, as well as military policewomen, nurses and

secretaries.

But never pilots, except during World War II, when the Women's Auxiliary Pilots flew noncombat missions.

"The Navy has been training women pilots for about one year, but only in propeller aircraft," said Capt. Marconi.

"And the Navy women pilots I've talked to all say the same thing: they need to be treated exactly like the guys."

There will be one distinction. The women will not be qualified to fly combat aircraft, since women are still prohibited by law from combat missions, according to Col. Carl G. Bailey, deputy commander for operations at Williams.

To get in the program, the women will have to meet the men's minimum physical requirements' including not being more than 27½ years old or less than 5-feet-4-inches tall.

Trouble spots in Carbondale traffic to be pinpointed by state's computer

A computer in Springfield may make Carbondale streets a little safer.

Records of traffic accidents and their locations will soon be fed into the Illinois Department of Transportation memory banks in Springfield, allowing a cross tabulation of the data to determine when, where and why accidents happen.

Carbondale has an accident problem out of proportion to the city's size and population, Police Chief George Kennedy said.

From August, 1975 through June of this year, Carbondale streets have been the scene of more than 1,000 accidents, police announced in July, an average of 100 a month.

The computer system, which city officials say will be in operation by the end of September, is aimed at helping the police and the Public

Works Department to find and eliminate high accident locations.

"It's not going to give us anything we can't already get, but it's a time saver," Sgt. William Rypkema said. Rypkema recently attended a special traffic management institute at Northwestern University. His 9-month schooling cost city taxpayers \$20,000.

Rypkema said the city would not be able to benefit from the program for three to six months.

Before this recent action, Carbondale filed accident reports with the state, but did not label or code city streets in a way to make a cross-tabulation possible.

Earlier this year, police said 17 intersections account for 34 per cent of the accidents in the city. University Mall and Main Street,

Oakland Avenue and Main Street and South Illinois Avenue and Mill Street are the intersections where the highest number of accidents occur.

Police said the main causes of traffic accidents in Carbondale are following too closely, driving too fast for conditions and failing to yield the right of way.

House panel postpones parimutual betting bill

By Tom Seppy
AP Sports Writer
WASHINGTON (AP)—The House Rules Committee has postponed and virtually killed legislation to outlaw interstate parimutuel wagering on horse races.

The panel, the so-called traffic cop which controls the flow of bills between committees and the House floor, voted by voice vote to postpone consideration of the measure until Oct. 15, almost a week after Congress is expected to adjourn for the election campaign.

Rep. Joe Moakley, D-Mass., a rules committee member, recommended delaying a vote on the legislation until the committee

received the report of the National Gambling Commission.

The House Commerce Committee, by a vote of 18-7, approved the legislation June 25 to ban interstate off-track wagering. The measure would exempt the current agreement between New York and Connecticut for the length of the contract between the two states, April 30, 1982.

Rep. Fred B. Rooney, D-Pa., chief sponsor of the measure, urged the Rules Committee to send the bill to the floor in order to protect what he called an important industry which has a \$6-billion capital investment and pays \$600 million in taxes.

Some specialists blind to new sight straightening technique

By Roger Gillott
Associated Press Writer

LOS ANGELES (AP)—Specialists are straightening patients' eyes the way orthodontists brace teeth, but not all doctors see eye to eye on the controversial new procedure.

The technique, called orthokoratology, involves treatment with a series of special pressure-inducing contact lenses designed to gradually reshape the eye. Some doctors are calling it preventive medicine. Others are worried the treatment could be permanently harmful and only temporarily helpful.

"Historically, we've always had to wait for a problem to develop and then do what we could to alleviate it," said Dr. Stuart A. Grant, the Los Angeles optometrist who helped develop the special lens. "But now

we have an actual preventative. If we can stop problems before they develop, people won't have either the expense or the trouble later."

Orthokoratology is designed to help persons with refractive problems—near-sightedness, far-sightedness or stigmatism. Grant estimated that most of the 100 million persons in the United States who wear glasses fall into these categories.

In orthokoratology, a person wears a succession of graduated contact lenses, each eye pressing the cornea a bit more toward its proper curvature. The eyes are reshocked every six weeks and new lenses are prescribed as the curve improves.

The treatment normally lasts two years and costs about \$1,200, he said.

Grant said the technique can benefit nearly everyone with a

refractive problem. "The only question," he said, "is to what degree we can help. That depends on how bad a person's eyes are when he comes in for treatment."

Delores Walsh, administrative director of professional services for the Jules Stein Eye Institute at UCLA, said orthokoratology is not recommended "because it may prove harmful and is not permanent."

Dr. Jerome Pearlman, an associate professor of ophthalmology at the center, added, "The physiology is unsound because once you remove the lens, the cornea will revert to the same shape it was before. Optometrists think it is perfectly safe but when people run into trouble they come to us ophthalmologists."

Orthokoratology is discredited, citing several successful cases.

Exams causing ulcers

Competition fierce in Japan's schools

TOKYO (AP)—About half of Japan's junior high school pupils spend their after-school hours going to another school, to learn to pass the tests to advance to the "right" higher schools and eventually the "right" job.

Education ministry officials say they don't know how many after-hour schools, called "juku," there are in Japan because they are "not legally recognized institutions."

But a recent poll in a city near Tokyo showed 52 per cent of sixth graders, 61 per cent of seventh graders, 53 per cent of eighth graders and 57 per cent of ninth graders attend such schools. Two out of 10 junior high school pupils take additional lessons at home from private teachers hired by their parents, they survey showed.

Those who rise to the highest positions in Japan's government and business generally come from a small group of elite universities, and entering those universities is considered easier for students from prestigious high schools. This makes the "shiken jigoku"—examination hell—a way of life in this nation of 110 million people.

The ordeal is primarily for boys since Japanese business and government are still mainly a man's world.

Harue Yajima, 35, mother of a fifth grade boy who attends a juku, said, "Though I oppose the competitive examination system, it is how the social framework is set up and I feel pity for my child if he lags behind on the social ladder of success."

"Even if I am criticized as a shallow-minded parent, I can do nothing about it," she added.

Her son, Goro, who has a home tutor besides attending the juku, said, "Since I started going to the juku, my grades improved quite a bit." But, he added, "I just don't have time to play."

Juku sessions are usually a two hours, twice a week, with tuition averaging 5,000 yen (\$17.50) a month.

"I think the recent prosperity of juku is an inevitable consequence of the Japanese educational system," said Shin Iriye, 53-year-old headmaster of Shingakusha, a well-known juku in Osaka, in central Japan.

Requirements for entering Iriye's juku include close-cropped hair, a pledge, "I want to enter (X) high school," an initiation fee of 30,000 yen (\$100) and 10,000 yen (\$33) monthly tuition.

Its program is spartan and thorough. Just before entrance exams, the students are housed in a hotel for last-minute cramming. Iriye takes personal responsibility for training them day and night. Then he charts a plane to take them to the high school they seek to enter.

As they march in to take the

exams, Iriye shouts to his students, "Everyone will pass. Never forget to fight to the end. Fight, fight."

So far this year, 30 per cent of his students have gained entrance to high schools famous for their high rate of admissions to prestigious universities.

Meanwhile, a medical research group in Asahikawa, Hokkaido, Japan's northernmost main island, said it found that of 25 children who suffered stomach ulcers over the last two years from heavy mental stress in cramming, most go to a juku.

Three young boys stir a sandy brew in the play area outside the Home Economics Building.

Children work at play in campus preschool

By Chris Moenich
Daily Egyptian Staff Writer

How long has it been since your only educational goals were to fingerpaint, to learn to jump higher and to color within the lines? When was the last time you wanted to learn because it was fun?

On Monday mornings, 20 wide-eyed boys and girls invade the Child Development Laboratory in the Home Economics Building. After investigating piles of puzzles, wooden trucks, and paint easels, the morning session of 3-year-olds settles down to meet their teacher, Linda Buffington.

Their day, which begins at 9 a. m., opens with free play. Since the Laboratory incorporates the use of

both indoor and outdoor interest centers for the children, several children swing on swings outside as others dress in play costumes inside.

Buffington, who is a Child and Family graduate student, says, "Play is a child's work. In the preschool they learn socialization, sharing with their classmates, music, art, colors, and shapes."

Their school, which ends at noon, includes singing in large groups and playing in smaller groups. Before leaving they eat a lunch supplied by the preschool. After more free play, they go home.

At precisely 1 p. m. sounds created by 20 pairs of the little feet again fills the preschool. The afternoon session, taught by Child and Family

graduate Janice Nakashima, is for 4-year-olds from Carbondale and surrounding areas.

Becky Baril, dressed in a blue and yellow ballerina tutu she found on the costume rack, says she is in her second "semester" of school. Last year she attended the morning session.

Sitting cross-legged on a white carpet in the back of the classroom, 4-year-old Rachel Meddin tries to cut heart-shapes from a piece of blue construction paper with round tipped scissors.

When asked what she hopes to learn at school this year, Becky says, "I want to learn to jump real high because I like to jump". Indicating a two-foot-goal with her

hand, she adds that last year she learned how to somersault.

The afternoon session is similar to the morning schedule, the only difference is the exclusion of lunch. Both groups of children receive snacks of fruit and other nutritional treats.

Buffington says neither schedule is highly structured, through each instructor arranges a program approved by the Child Development Laboratory director, Jennie Jones.

"Everyday we build on what has been taught previously" Buffington said. "Each week we develop a theme like animals or people and places. We then try to incorporate

the subject theme into the activities of the week"

The children go on field trips outside of the SIU grounds. They listen to filmstrips, hear stories, and tell stories.

"Children are very honest," Nakashima says. "They'll tell you how they feel about whatever they are doing. As teachers we have to be consistent in what we say because the children look up to us."

Buffington, who has been teaching at the preschool for two years, says "I learn from the children as they learn from me. As human beings we all need the same kind of things, reassurance, guidance, and love."

A child delights in dressing up and playing with the dolls in the preschool laboratory.

Reaching new heights on a set of monkey bars is only one of the ways to pass the day at the preschool laboratory in the Home Economics Building.

Mexico's iguana, grub worm give people culinary delight

By William Nicholson

MEXICO CITY (AP)—Mexico's pre-Columbian art treasures are well known, but a local restaurant owner has now resurrected that era's cuisine, complete with snakes, grub worms, lizards, salamanders and frogs.

Company gets bending buses contract ok'd

SACRAMENTO (AP)—Buses that bend in the middle, making it easier to turn corners, are going to be developed and built under a \$42-million contract, state officials say.

The contract calling for 234 "articulated" buses was awarded to the AM General Corp. of Wayne, Mich., Adriana Gianturco, state transportation director, announced.

The contract signed by California officials serves 10 major transit operators in the nation, including four in California that will get a total of 115 of the buses for \$180,000 each.

The State of California negotiated the master contract on behalf of agencies in other states because of California's research in the field, Gianturco said.

She said the flexible buses not only will be able to turn easier, but will maneuver better in traffic, even though they are 50 per cent longer than conventional models.

They also carry 67 passengers, 18 more than regular buses, and will be quieter, she said.

Federal funds will pay 80 per cent of the contract, with local agencies picking up the rest.

Conventional buses cost about \$75,000 each, Gianturco said, but the more expensive buses will pay for themselves "in a few years" because districts would need fewer drivers.

San Diego Transit will get 45 buses, Southern California Rapid Transit District, 30, Alameda-Contra Costa Transit District, 30, and Golden Gate Transit, 10.

Elsewhere, the contract provides 14 buses for Chicago Transit Authority, 10 for the Metropolitan Atlanta Transit Authority, 20 for the Port Authority of Allegheny County in Pittsburgh, 20 buses for Twin Cities Area Metropolitan Transit Commission, St. Paul, Minn., 35 for the Washington, D.C., Metropolitan Area Transit Authority, and 20 for the Phoenix, Ariz., Transit System.

NO MORE PLOWBOYS?

LINCOLN, Neb. (AP)—Is it possible to farm without turning over the soil?

Some soil experts feel plowing is unnecessary and wasteful and expect to prove it. In one test, researchers at the University of Nebraska School of Agriculture, with a grant from Philips Petroleum Co., start work this fall on an experimental system in which everything from planting to harvesting will be done without tilling the soil.

"Mexican cooking can easily compete with that of China," claims Jorge Alberto O'Farrill, scion of an old Mexican family, "but the food that people associate with this country is the product of the post-Spanish conquest."

So, in order to present what he calls the real cuisine of Mexico as eaten by the Aztecs and other Indian cultures more than a thousand years ago, he has opened a tiny restaurant with authentic pre-Hispanic dishes. Although known records of the Aztecs go back to 1111 A.D., other cultures such as the Toltecs preceding them are known to have been in the area back to 200 and 300 A.D., according to archeologists. The adventurous diner will not find tacos or chile con carne in the restaurant—"Chile con carne isn't Mexican, you Americans are responsible"—but food that the Emperor Montezuma himself was served at royal banquets.

Montezuma's table on any given day would have literally hundreds of different dishes with all kinds of sauces," says O'Farrill, who formerly managed restaurants in France and Mexico before opening his own Plaza Tepito recently.

O'Farrill says he has spent years researching ancient recipes from historical documents concerning that era and from visiting parts of Mexico where pre-Columbian cooking traditions are still observed. He is currently writing a book on the

subject. The clientele is mostly Mexican but he reports some tourists have begun visiting his establishment, located in the heart of the capital's tourist district.

"Some Mexicans are even frightened to try the food I serve here," he says. "It will take some time to get them accustomed to the authentic Mexican cooking."

The menu provides some old standards for the timid—steaks and chicken—but the house specialties are far more exotic.

There are white grub worms from the maguey plant, a form of cactus. They are fried in oil and eaten like potato chips. Iguana, a land lizard found all over Mexico, is cooked in a variety of spicy sauces, including one using ground peanuts. The iguana tastes somewhat like chicken.

Aquatic salamanders nearly half a foot long are served up, as are concoctions made from the eggs of water bugs. Snake meat and wild pig are also on the menu.

The Aztecs and other cultures living in Mexico before the arrival of the Spaniards used to eat dog as a delicacy and bred a hairless type for the table.

"But we don't serve that here," says O'Farrill, who raises the nearly extinct species as a hobby. "There are too few and they are too expensive."

Young Nile villagers dig TV, elders see a tool of the devil

By Ahmed Lutfy
Associated Press Writer
SEHAFA, Egypt (AP)—It's only a television set, but it has changed the pattern of life in this Nile delta village in the past few months more than anything else since Pharaonic times.

The elders call it "instrument of the devil" but the young in Sehafa call it "our wonderful ticket to freedom." Whatever it is, the village hasn't been the same since the government brought the set last summer.

Cairo wanted the peasants to have a chance to watch the celebrations commemorating the July 1952 overthrow of the monarchy.

The government step came after electricity was introduced in Sehafa and 300 other villages.

Up to now seven affluent peasants have purchased their own private sets out of a population of 3,000 persons. But Mahmoud Hussein, 58, has resisted all his sons' pleas to buy a set and said if he had the money he would buy a water buffalo.

Despite opposition from the elders who are conservative by nature, television quickly left its mark on the people of Sehafa, about 35 miles northeast of Cairo. Even the old wife of Mahmoud Hussein is now acquainted with such celebrities as Kizinger (U.S. Secretary of State Henry A. Kissinger), the Shah of Iran and President Ford.

But she disapproves of many programs. "It is shameful that they show girls wearing two inches dress who go shaking all around like mad," she says in reaction to modern dancing. She believes it is spoiling the village girls "who return home and try to imitate

everything they watch on TV." The set was installed in the market place of the village. The first rows of hard wooden benches are usually occupied by men, while women dressed in ankle-length black robes sit in the back.

The village mayor Mohammed Sobehi says the midwives in the village have complained to him that there are fewer pregnant women to care for now that everyone watches TV.

He contends that television is more effective than programs for birth control, which are opposed by the village's religious leaders, who claim it is against Islam. He explains why.

Most of the peasants have no transistor radios, no movies and newspapers don't arrive in the village. So after returning from the fields they used to go to bed at dusk and add to Egypt's acute population problem, he said.

It is all changed now. Everyone in the village deserts his home to remain glued before the tube until the last program at midnight, complains Mahmoud Hussein.

"I go to the field as usual at dawn but now no one shows up until very late and I know that this instrument of the devil will keep us from our work."

His son, Azzal, 21, on the other hand, is happy with the change.

"My wife has learned a lot of nice words and ways of cooking she picked up from the TV. She has also made a nice colored dress instead of the usual gloomy black dresses of the women in the village."

What worries the elders in Sehafa is that the more the boys and girls watch films featuring life in Cairo, the more the young villagers feel

discontent about everything—poverty, dusty roads, the mudbrick houses—and they yearn to flee to the capital.

"After watching life in Cairo on the TV all I dream of now is to drive a car," Azzal says. Donkeys are still the only mode of transportation in the village.

After a period of observation the elders admit that their young boys' and girls' discontent has encouraged them to study harder so they can go to a high school and leave the village.

CAPITAL GAINS

MIAMI BEACH, Fla. (AP)—Fight trainer Moe Fleisher, who is associated with Muhammad Ali's trainer, Angelo Dundee, says he's thinking about future income for his boxers. Fleisher wants them to invest in stocks and bonds.

Fleisher is getting his Wall Street training from Myrna Liebowitz, president of the Women Stockbrokers Association. She is associated with Herzfeld and Stern.

Campus Briefs

The registration deadline is Friday for the Medical College Admission Test (Med-CAT) scheduled for Oct. 2. Registration is in the testing division, Wing B, Woody Hall.

A picnic for physically impaired students and their guests will be held from 12 to 5 p.m. on Saturday at picnic area 5 of Lake-on-the-Campus. Lunch and informal recreation activities are included. Transportation can be arranged by calling 453-2004 not later than Friday. For more information, call 536-2338 or 453-5738.

The New Life Center, 913 S. Illinois Ave., will hold an open house from 10 a.m. to 6 p.m. on Thursday. The public is invited and refreshments will be served.

The SIU Bowling Club will hold an organizational meeting at 6:30 p.m. Thursday in the Roman Room, Student Center.

The semester's first meeting of the Saluki Saddle Club will be at 8 p.m. Thursday in Activities Room A of the Student Center. Beginners are welcome.

THE OTHER FRANCISCO produced by Sergio Giral and the Cuban Film Institute

Plus! A Tribute to
CHE GUEVARA
(1967 Cuban Film)

"... A dramatically powerful and insightful account of Black slavery in 19th Century Cuba. Based on a famous Cuban anti-slavery novel (the Latin American equivalent of Uncle Tom's cabin), THE OTHER FRANCISCO tells the story of the impossible love affair between two slaves who are persecuted and mistreated by their masters... which the film then sets within a broader historical framework in order to reveal the actual social and political forces responsible for slavery as well as the anti-slavery movement..."

Walker asks investors to finance older towns

CHICAGO (AP)—States must use all the regulatory leverage they have to influence private financial institutions to invest in older neighborhoods, Gov. Daniel Walker said Wednesday.

Walker, speaking at the opening session of a conference on redlining and urban disinvestment sponsored by his office, said state governments have passively allowed older neighborhoods to deteriorate while "paying the high price of creating new communities out of cornfields."

He said that while states cannot afford direct investment in deteriorating neighborhoods, "the states have the regulatory leverage to stimulate private money toward community reinvestment. We must use that leverage."

Walker recommended state laws requiring financial institutions to disclose the amount of their loans in

various neighborhoods as a way to prevent redlining.

Redlining is the practice by which financial institutions refuse to grant loans for the purchase of property in areas they have determined are likely to deteriorate.

The Illinois governor also suggested new lending incentive programs for financial institutions to encourage them to invest in older neighborhoods.

"Let's also take a hard look at other sources of capital the pension funds and the insurance companies," Walker said. He did not elaborate on how he thought either could be encouraged to invest in deteriorating areas.

The two-day conference will feature as speakers representatives of banks and savings and loan institutions, insurance companies, national foundations and state and federal officials.

It's never too late to play the piano

CHICAGO (AP) —Across America, adults by the thousands are taking piano lessons they missed out on as kids —and loving it, no matter what their age, according to the National Piano Manufacturers Association.

A good example is the 91-year-old student whom veteran Buffalo, N.Y., piano teacher Irving Shire has recently taught to improvise on the instrument.

"He was my student when he was 88," says Shire. "I told him he was just the right age to study piano." He is just one of thousands of adults across the country who are discovering that their age is the "right" age.

The piano has long enjoyed the honor of being the most popular instrument in the United States. More than 200,000 new pianos are sold every year, according to the association, and of the nearly 38 million amateur musicians in this country, 47 per cent are pianists.

It is not surprising, then, that adults who turn to music in their leisure time often turn to the piano. When they do, they're in for a very pleasant surprise. Gone are the endless scales and exercises one thought to be the only starting point for beginning piano students.

"I start right in teaching little pieces to my adult students," says Eva Rautenberg of Buffalo. "There are special books for adults who have never had lessons, with adaptations of familiar compositions."

To their delight, many adults who have studied a fairly short time find themselves in demand at parties. "People are really anxious to find someone who can play in social situations," says teacher Carol Murray of Minneapolis. "They like to stand around and sing. The way piano is taught today, students can play at parties, even transpire from one key to another, in a short time — if they've been taught properly."

Beeping ball for blind batters

By Tonda Rusb
Lawrence Journal-World

LAWRENCE, Kan. (AP) —On a Sunday school picnic sort of afternoon, in a park, a group of dignified-looking adults were sweating at a sound.

Some hit it, some didn't. It flew by at moderate speeds in an oversized softball that emitted a little beep like one might expect from a flying saucer, or a telephone left too long off the hook.

Abner Doubleday would have barely recognized his game. The players were blind—some permanently and some because they were wearing blindfolds.

They were playing beep softball, a variation that allows the visually handicapped to compete with skill and safety.

The Lawrence team included five men and women with little or no sight and five sighted friends who blindfolded themselves at the beginning of the game and remained blind to the end.

The organizer and spokesman, a Korean War veteran named Charlie Vassallo, plays with a patch over the one eye in which he has light perception. With the help of several coaches who can see, Vassallo prides his teammates into proficiency at hitting and fielding, purely on the basis of sound.

He explains the game on a round dart board with pushpin players that facilitates a mental image of the playing field. There are seven fielders and a batter, all blind. A sighted pitcher and catcher play impartially for both squads.

The batter stands in a circle with a radius of 36 feet. The bases are 18-inch rubber pylons with beepers attached and the ball has a circumference of 14 or 16 inches. It weighs about a pound and beeps continuously.

The pitcher throws, the batter swings. If he hits the ball an "umpire" activates a beep in one of the pylons that has a different tone than the one in the ball. The batter starts running for the pylon, while a fielder goes after the beeping ball with the guidance of two assistants.

If the batter reaches the pylon before the fielder reaches the ball, it's a run, if not, he's out.

Group piano is another fairly recent innovation in adult piano teaching methodology. It originated with great success in the elementary schools, and has been steadily growing in popularity as an ideal way to teach students of all ages.

Fred Colby, 64, of Crystal Lake, Ill., began playing because an old grand piano came with a house he bought. "Then, about three years ago," he recalls, "I was walking past a music store and saw a sign, 'Piano Lessons Given.' I didn't stop to think I just went in and signed up."

Colby has long since traded in his old piano for a brand new one. He takes lessons every week and says he loves to play semi-classics and old favorites. "I try to practice an hour a day. I get entranced with my own music, and suddenly the hour is gone."

Piano teachers who work with them realize that adults' practice time is limited. "If an adult is going to pay out his own money for lessons, he's going to put all the time he can into practicing," says Chicago teacher Muriel Bufton, whose pupils include housewives, doctors, cab drivers, carpenters and secretaries.

"Self-discipline isn't a problem with adult students. If one of my adult students hasn't practiced, I know that something pressing probably came up during the week."

Teachers and students agree that one of the most exciting things about studying piano as an adult is the feeling of achieving the unexpected.

"I don't know why I started taking lessons," says 29-year-old Chicago loan officer Terry Woolums. "I just felt compelled to do it. But it's not a whim. I expect to be playing 50 years from now."

Psychiatrist Dr. Karl Willrich, president of the medical staff at Forest Hospital near Chicago, says that piano playing is especially rewarding because "we live in a mechanistic, materialistic age."

Each side gets five outs per inning, but if a fielder should perform the rare feat of catching the beeping ball in mid-air the inning ends.

"You hear about eye-hand coordination," said Gary Marshall, who played on a Houston Astros farm team before he was blinded in 1964. "This is sort of ear-hand coordination. One of the rules of baseball is to keep your eye on the ball. Obviously, you've got to forget that and concentrate on listening."

Slapshot

Senior Kathy Kincaid tests her skill at the push drill during field hockey practice on the field across from the recreation building. The field hockey team plays their first home game Sept. 11 against Southeast Missouri State. (Staff photo by Linda Henson)

Trades don't bother former Saluki

With his degree in accounting, it was easy for former Saluki baseball player Jim Dwyer to compute his Montreal Expo batting average—a paltry .185.

The SIU graduate of 1973 also figured this poor performance with the bat prompted his recent trade from Montreal to the New York Mets.

"You could say I was a victim of circumstances because I'm 26-years-old and that made me an old man on the Expos. The guys they were playing definitely had talent. And when I did get in, I didn't do very well," said Dwyer in a statement to the press.

Yet, only two days before the deal, Dwyer told the Daily Egyptian he always expects trades. The trades do not bother him because his degree from SIU guarantees him a future, once his baseball career ends.

"Unlike some players, I will not have to start from scratch when my playing days are over. With a college education, there are many fields I can go into," said the left-handed hitting outfielder.

"It is something that eases my mind. I realize now that I won't have such a difficult search when looking for a job afterwards," Dwyer added.

Since Dwyer signed with the St. Louis Cardinals in his junior year at

Jim Dwyer

SIU, he had to earn the additional credits to graduate during the spring training season.

However, he said, all players should so as "a security blanket for what lies ahead."

"Some players just don't have the desire to continue. To them, baseball is everything. But I'm glad I did it. In fact, if I had to do it all over, I would do it the same way. It was worth every penny."

Olympiad members hope to improve Squids

Three SIU wheelchair students who participated in the 1976 Olympiad for the Physically Disabled at Toronto, Canada will bring their talents to the local hardcourt in hopes of improving the 3-7 record of last year's SIU wheelchair basketball team, the Squids.

Eilyn Boyd, a junior, won gold medals in the 200 and 400-meter events and the women's relay, and won a silver in the 60-meter dash. She was also a member of the defeated U.S. women's basketball team. Ray Clark, a senior, won a gold medal in the Pentathlon and Noreen Vollbach, a freshman, won a bronze in novice archery. These

three, along with nine other members of the team, believe they will become strong contenders for the Midwest conference title of the National Wheelchair Basketball Association this year.

Richard DeAngelis, assistant coordinator of Recreation for Special Population at SIU, is the program director of the team and believes that with the help of Coach Don Campbell, and a good team effort the team can "hopefully win at least second, if not first place."

The Squids begin their season at home Nov. 13 at 8 p.m. against Springfield, last year's conference winners.

THEY WORK!

New Assistant AD takes over

By Rick Korch
Daily Egyptian Sports Editor

"The responsibilities are the same, it's just the names and faces that are different," new Assistant Athletic Director John Novotny said Wednesday, as he began his first day on the job without the assistance of Bill Brown, who retired Tuesday. Novotny, 37, started at SIU on Aug. 23.

"The greatest thing that could've happened to Gale Sayers and myself is that Bill Brown was here to give us an indoctrination to SIU," Novotny said.

"That allowed us to evaluate the program so that we could become acquainted with everyone and establish an internal organization within the operation."

Internal organization was the first goal of Novotny and Sayers, whereby they established how authority is delegated in the athletic department.

"You have to do that with new people coming in," he said. "And the next step will be to get acquainted with University personnel, alumni and students to establish a relationship."

"The students, faculty and community all identify with SIU and develop loyalty because athletics is a very visible thing," Novotny continued. "Everybody should be pulling together as a team, and we, as the administration, have to establish goals to bring these things about."

Novotny spent the last nine years at the University of Kansas, where he worked with, and became familiar with Sayers.

"I've known him a number of

John Novotny

years and I believe in Gale Sayers. Gale is unselfish and dedicated, and he will do his best for SIU," Novotny said.

Sayers contacted Novotny about becoming his assistant at SIU.

"Gale works in mysterious ways," he said. "He doesn't come right out and ask you. He just keeps talking and your adrenalin builds, and you almost ask him for the job."

"We both have a total honest open relationship with each other."

Novotny served Kansas "in almost every phase of its athletic administration (football recruiter,

administrative assistant, assistant athletic director, business manager and director of the Williams Fund)."

There were two reasons for Novotny's move.

"The No. 1 reason is because Gale asked me to be part of his team, and the second was that I wanted to move back into the mainstream of athletic administration," he said.

Novotny then added a third reason: "SIU had been at every Kansas Relay, and I had some contact with some of the coaches and have a high regard for the University itself."

"I measure a school two ways," he said. "First is the number of books in the library. And second, I knew that SIU had been going through a period of extremely rapid development in the last ten years, which tells you that the quality of education has to be good for a student to want to attend here." "The nucleus is here for talent," Novotny said. "What we have to do is give the coaches everything they need (money) to have the best program here."

Before coming to SIU, Novotny "knew that SIU had a very strong all-around program."

"I'm very impressed with Rey Dempsey, and I think that he is one of the top young coaches in the country," he said. "I'll be very surprised if in the next couple of years we're not fighting to keep him."

"As for the rest of the coaches, their records have established them as great coaches."

"I can't say enough for the work of Bill Brown," he said. "But now it's time to get our feet wet."

SIU top priority for women's AD

By Pat Matrecci
Student Writer

For Charlotte West, director of women's intercollegiate athletics at SIU, there will be one less job to perform now.

West, professor of physical education for women, recently completed a term as Commissioner of National Championships for the Association of Intercollegiate Athletics for Women (AIAW) in addition to her work at Southern.

Elected to a two-year term in 1974, West coordinated and oversaw sports committees that decided how tournaments, which determined 15 national champions, were to be conducted and sites for each selected. She also had to see that the tournaments were conducted according to the regulations determined by the AIAW.

Because she had to divide time between work for AIAW and SIU, West said that she lacked the time to do the work of commissioner as well as she really would want to have done it.

"AIAW needs a person who is

employed full-time so she can attend to the thousand and one details that are involved in the conduct of a national championship," West said.

Some of those details included detecting any problems with facilities, publicizing the event and getting officials for games.

West said that a dedicated force of coaches and athletic directors in AIAW who were willing to give service made her job much easier.

Increased attendance and high caliber of play in the championships made West's work very rewarding. She noted that at the 1975 Basketball Championships there was standing room only and people had to be turned away.

"To be in attendance and see the thing that you had planned for a whole year really come off was personally satisfying to me," West said.

West was asked to be a candidate for the office of President-Elect of AIAW, but said no because she wanted to devote more time to the athletic program at SIU. West added, however, that if she were

able to "get on top" of her work she would gladly run if asked again to do so.

But for the moment, West considers Southern as her first priority.

Charlotte West

SR-51A. That's right. It's the new, improved version of the SR-51, and the price is the same! Sturdier, more attractive, with a better display. Provides instant science, engineering and statistical solutions. Three addressable memories. Natural and common logarithms. Trigonometric and hyperbolic functions including deg/rad switch. Calculates a least-squares linear regression on two-dimensional random variables. Displays slope, intercept... and more. Statistically, computes factorials and permutations. Random number generator. Finds mean, variance and standard deviation. Not shown on the keyboard is the ability to perform 20 automatic conversions plus their inverses. Basics include mils/microns, feet/meters, fluid ounces/liters, degrees/grads, degrees/radians... and others. Of interest to many will be degrees-minutes-seconds/decimal degrees conversions, polar/rectangular conversions and voltage ratio/decibel. 13-decimal place accuracy internally. Modified algebraic logic. ~~\$119.00~~

First SIU golf coach ends 30-year reign

By Dave Heun
Daily Egyptian Sports Writer

When retired golf Coach Lynn Holder walked out of his office Tuesday, his 30-year reign as one of SIU's finest coaches came to an end.

Holder, who coached basketball (1946-1958) and started the golf program (1947-1976) for the Salukis, had nothing but fond memories and praise for the University, its faculty, and especially the students and athletes he encountered over the years.

"I came to Southern on June 1, 1946, and it seems like I just got here," Holder recalled. "I've enjoyed all of my activities here, and feel that Southern has a great faculty and the greatest core of coaches in the country."

To appreciate Holder's contributions and achievements at SIU, one must trace his history back to his playing days, early coaching career and his service in the Navy. Holder was an All-State basketball and football star at Carbondale High School in 1929 and 1930. He later earned varsity letters in football, basketball and track at SIU.

Upon graduating from SIU in 1935, Holder took a head coaching job at Lawrenceville High and held that position until the outbreak of World War II. He then served four years in the Navy as lieutenant. After the war he served as the Assistant Inspector General of the State of Illinois from 1949 to 1951. Holder was already coaching basketball at SIU in 1946, and started the golf program in 1947. He is the only golf coach SIU has ever had.

"I coached around 300 basketball games and had a 188-123 record," Holder said. "SIU awarded no NCAA scholarships then. We did it

without them."

The mid-60's marked the plateau of Holder's golf coaching career. In 1964 the Saluki golf team won the NCAA championship, and Holder was awarded the NCAA Golf Coach of the Year award. In 1965, the team finished second in the NCAA.

"You can't deny the capabilities of that (1964) championship squad," Holder said, when asked what team he thought was the best he ever had. "But my 1961 team that won the IAC, took 47 straight matches from 1958-1961.

"That 1961 team (SIU did not play NCAA then) was one of the greatest in the United States," he added. "We played in the best tournaments all over the country. I would have put them up against anybody."

Holder remembered the early years when the golf program was being born. "We had a small budget to work with and only four players," he said. "I can remember that Evansville was a big rival. They had four championship courses within their city limits. They were tough."

A championship caliber golf course is one thing that the SIU golf program needs very badly, according to Holder.

Holder sent a message to Athletic Director Gale Sayers evaluating the program and pointing out the need for such a facility. Holder said the entire Southern Illinois area is in dire need of better golf facilities.

"My kids have done fantastic over the years with the facilities we have," he said. "The main thing, however, was the student himself. All my players had very high academic marks. That's a recruiting prerequisite for any successful team."

"I've had wonderful boys in both basketball and golf," he said. "We

played the top notch teams all over. The Big Ten, the Big Eight and many others."

Holder said the main factor he thought about while scheduling was how much school time his boys would miss.

While his age is not a top secret, Holder laughed and said he was "around 62 or 63."

Holder has high hopes for the Saluki golf program and said "I've laid the track down, Barnett (new

coach Jim) will just move it forward."

The future is uncertain for Holder at this time, although he did say that he will not leave the Southern Illinois area. "I grew up here, my kids have gone to school here. I am an ardent backer of Southern Illinois," he said. "There is no nation where the people are more congenial or more hospitable than

in this area of this country."

There is not enough room to tell the whole story of Holder's career and record, but he did sum up his life at SIU with this statement. "There was nothing, at any time, with which I was confronted with, that deviated from my goal and objective, which was in helping the student. My dedication was to the student."

Money woes aside, CCHS ready to run

By Dave Heun
Daily Egyptian Sports Writer

A fund-raising program over the summer saved the Carbondale Community High School cross country team, and the team is preparing to improve on last season's 7-1-1 finish.

"We needed to raise funds to cover traveling costs," said Coach Gary Holda, who is entering his third season at the helm. "I won't be purchasing any new equipment, so the money raised this summer should cover it. If not, I'll have to throw in some bucks myself."

The money problems will make it tough for the team to travel the same schedule they did last year, but Holda still hopes for a good season.

"We just won't meet any quality runners until the end of the season," Holda said. "I told other coaches (in the conference) that we would have a team no matter what. Now we are just getting the schedule straightened out."

The scheduling and money matters aside, Holda talked about the squad that finished second in the South Seven Conference last season.

"We are expecting a good season from senior Dave Schreimann. He's our No. 1 returnee and did an excellent job of staying in shape this summer," Holda said.

Juniors Bill Laser and Robert Hesketh will be counted on for good showings, too. Holda said both runners stayed busy during the summer and ran in SIU's road runners mini-meets.

"A cross country runner is a distance runner who must stay in shape year round," Holda explained. "He can't take time off — he must be dedicated. During the summer the runner will work on the distance, then during the season, he will work on the speed and endurance part of cross country competition."

When the squad is in training, Holda has his men running nine miles a day to prepare for the three miles they will have to run in a meet.

All cross country coaches dream about having all five runners in a meet finishing within one minute of each other, and right at the top, of course.

Holda said he has four runners in that zone right now, and the rest of the squad is coming on. "We should be very tough," he said. "I'm just hoping we can avoid injuries. That really hurt us last season."

The Terriers home course is at Evergreen Terrace, a three-mile, slightly rolling course.

The Benton runners, the preseason favorites, figure to give the Terriers plenty of trouble this season.

Starting quarterback still question mark

This is the last part of a six-part series on SIU football.

By Rick Korch
Daily Egyptian Sports Editor

With nine days to go before the football season starts, Coach Roy Dempsey and his staff know who will be catching the football, but still don't know who will be doing the throwing.

Bob Collins, 5-10, 180 lbs., is now the starting quarterback after taking over the No. 1 spot from Tim Cruz, who won it during spring training.

"Collins is doing everything

mechanical right," said offensive coordinator Joel Spiker. "But he still needs game experience. He's a little older than the rest and has a level head."

Behind Collins is junior college transfer Jim Kelly from Northeast Oklahoma A&M. Kelly, 6-3, 190 lbs., dislocated his hip during spring practice and just started playing recently without getting hit.

"But Cruz could still beat both of them out," Spiker said. Cruz is a 6-0, 168 lb. junior.

After the top three quarterbacks,

there's another group of three quarterbacks—one junior, and two freshmen.

The junior, Bob Dickson, is having a hard time making the transition from last year's wishbone offense to this year's Pro-I offense, Spiker said. Dickson is 6-0, 182 lbs.

Both freshmen, Ramon Carson, 6-3, 190 lbs. from Sharon, Pa., and Reggie Evans, 6-0, 170 lbs. from Chicago, are still learning the SIU system.

"With the proper time and coaching, it could be a real battle between them," Spiker said. "Both Carson and Evans

have great arms."

Although freshmen take longer to get accustomed to the new offense, Dempsey said, "It wouldn't bother us to start a freshman."

The Salukis split end, senior Lawrence Love, is a deep threat, both Dempsey and Spiker said.

"He has the speed to burn you on the bomb," Spiker said. "We're high on him, and think that he could beat almost anyone. Spiker added "We won't be afraid to throw the bomb this year."

Love, 6-0, 180 lbs., was tied for second on the Salukis in pass receiving last year, although he caught only five passes. Under the Salukis offense this year, they will be throwing more than last year's wishbone offense, and Love will catch more passes. Love runs the 40-yard dash in 4.6.

Behind Love is Jim Zumbahlen, a 6-2, 180 lb. junior, and Myron Turner, a 6-0, 171 lb. sophomore. Both players are spring walk-ons to the team.

"We're counting on Zumbahlen playing a lot," Spiker said. "He doesn't have blinding speed like Love, but he has good hands."

"Turner caught 80-90 passes a night during the summer and has worked himself to be a good receiver," he said. "He has good hands."

A big battle is brewing at tight end between transfer Greg Warren and former-fulback Hugh Fletcher.

"Right now they're both equal and pretty soon one of them is going to have to take the bull by the horns and take the job over," Spiker said.

"Warren has the size (6-5, 235 lbs.) and speed to be an outstanding tight end, and he catches well."

"But Fletcher is the better blocker, and he wasn't switched to tight end until there were only eight days remaining in spring practice," Spiker commented. Fletcher is 6-2, 220 lbs.

Saluki quarterback Jim Kelly hands off to an unidentified Saluki during practice Wednesday. Kelly, who dislocated his hip during spring practice in May, is slowing recovering, but has yet to be tackled in practice. During Wednesday's practice,

Dempsey sent the defense after Kelly to see how he would hold up, but the offensive line kept them away, and he escaped without a scratch. (Staff photo by Carl Wagner)

World's No. 1 trotting race coming soon

Lloyd Arnold farms 12,000 acres between Geneseo, Ill. and Charles City, Iowa, and runs a race track in Sacramento, Calif. Arnold owns 20 racing horses 2-4 years old. Stable hands call Arnold a "multi-millionaire," and Arnold calls harness racing a "hobby, not my source of income."

Richard Farrington is a trainer and driver of harness racing horses. He has 25 years of experience and works for Lloyd Arnold.

They are both in Du Quoin for the harness racing at the Du Quoin State Fair. They sit in the shade and sip tea and talk of harness racing in general and the Hambletonian in particular.

The Hambletonian is the Kentucky Derby of the trotting races. Trotting horses must maintain a specific gait during the entire race, they are not allowed to break stride into a full gallop, and they must pull behind them a sulky in which the driver sits. The "Hambo" will be run in Du Quoin Saturday starting at 12:20 p.m., and will be nationally televised on CBS.

Both Arnold and Farrington agree the Hambletonian truly is the most prestigious race in trotting, that the label is not just media hype. And Arnold would be "very disappointed to see the race moved anywhere else other than Du Quoin."

The 1976 Hambletonian has the richest harness racing purse in the world, \$263,299.

The Hambletonian has spent 20 years of its 51-year history in Du Quoin, a town of less than 7,000. The Hambo was bred from Goshen, N.Y. to Du Quoin in 1956. "Now," says Arnold, "Du Quoin is part of the history of harness racing. It's a place horsemen point to go."

Illinois legalized pari-mutuel betting on the Hambletonian last year and as a result, says Arnold, "assured its stay in Illinois, and assured it will get bigger every year." Crowds last year wagered over \$225,000 on Hambletonian Day.

The Dougout

By Doug Dorris
Assistant Sports Editor

Both horsemen agreed the 18-house field of 3-year-olds is the most evenly matched in their memory. In the build-up to the Hambo, seven different horses have won the last seven stake races.

Still I asked both to pick a favorite, as sort of public service for SIU students who venture to Du Quoin and want to bet on the race, despite not knowing a horse from a cow.

Their personal favorite was Lola's Express, a trotter from Holland just coming off a win at the Illinois State Fair in Springfield. Trainer Farrington feels Lola's Express is a horse hitting its peak at the right time.

As a second choice, they go with Swedish-owned Tropical Storm, who has the fastest mile clocking of the season, 1:57.3. By comparison the record for the one-mile Hambletonian oval is 1:56.2 set by Super Bowl in 1972. As a dark horse choice Arnold likes Pershing.

Neither likes Nevele Thunder, last year the top 2-year-old in the country. Nevele Thunder was syndicated for \$1.5 million at the beginning of this season. He is owned by Stanley Dancer, who has trained or driven four previous Hambo winners.

According to Farrington, "There is something about Nevele Thunder, he's not getting his air. He's definitely not the favorite."

Arnold advises students to, "Bet to win, not to place or show. It's the only way to make money."

Farrington and Arnold emphasize that starting position is very important to the outcome of the race.

"The rail is the most advantageous position on any track," says Arnold. This year the pole sitter is Zoot Suit, owned by Stanley Dancer, and the winner of an earlier stake race of the season.

Lola's Express is buried in the center of the field, in the 11th position, Pershing is near the rail in the 4th position, while Tropical Storm and Nevele Thunder hold the outside two positions, respectively.

The Hambo is staged in heats until one horse has won two heats. If the first three heats are won by three different horses, a run-off involving only these three horses determines the Hambo winner.

Arnold's interest in the Hambletonian will only be as a spectator, as he owns none of the horses entered this year. He does however own a pacing horse, Warm Breeze, that tied the world's record for a one mile track (1:54.4) in Springfield recently. Warm Breeze will run Saturday in Du Quoin in one of the pacing races, though the starting time has not yet been determined.

The oval at Du Quoin is considered a very fast track, and if the weather is good Saturday it is a very real possibility Warm Breeze could set a new world's record.

Harness racing will be held at the Du Quoin State Fair every day starting at 1 p.m. from Wednesday through Monday Sept. 6.

The world's No. 1 trotting race and a chance to see a world's pacing record certainly to me seems reason enough to blow off any studies this Saturday and drift on up to Du Quoin.
