Two Students Operate Service Station While Attending Southern

Two Southern students, Louis Franzo and Henry Barnard, not satisfied with just attending University classes and working part time, recently started their own business—in the form of a filling station.

They first looked around in a restaurant, but decided against it in favor of the filling station which they financed partly with a veterinarian's bonus and partly with a loan. Their filling station, a Dixie, is located at 411 E. Main and specializes in everything from filling a gas tank to lubrication and wash jobs. They also carry a complete line of auto accessories.

Barnard, a junior from Chester, is in the College of Education and is carrying 17 hours. Franzo, a sophomore from West Frankfort, is a pre-medical student and is carrying 14 hours. Both are veterans. Barnard has classes until noon, then goes on duty and leaves the boys who work at the station in the mornings. Franzo comes down at three in the afternoon and works the night shift.

Neither of the owners had much previous filling station experience. Franzo had none at all while Barnard admitted having worked at a filling station for about three months.

Barnard admitted that at first running a filling station was difficult going, but that now he has things lined up, business is pretty good. They have operated the station for over a year and plan to keep it until one of them leaves school.

Besides working at the filling station and attending classes, Barnard intends to play intramural football this term for the Menor.

High School Science Students Will Meet Here For Conference

High School science students of Southern Illinois will meet on the campus of Southern for the annual conference of the Junior Division of the Illinois State Academy of Science on April 22. The academy is made up of all high school and junior high school science clubs and students interested in science, according to Dr. Walter Welch, professor of biology and chairman of the department at Southern.

Fuller Will Lecture

During the meeting, Dr. Harry J. Fuller, professor of botany at the University of Illinois, will present a lecture on "Life in the Age of Ice and Chic." The lecture will be illustrated by 100 feet of colored movies. Also on the program will be a tour of Southern's campus in which the high school students will visit the University science laboratories.

Exhibits prepared by the high school students will be set up in the Old Science building gymnasium. These exhibits will be on display for the public from 8 a.m. to 4 p. m. Awards will be presented at 4 p. m. to the exhibitors whose work is considered most outstanding.

The Junior Division of the Academy is held here on three years when the Senior Academy of Science does not meet in this area.

Shady Practices In College Athletics Viewed By Educators

"There has been and is now unjustifiable financing, subsidizing, and recruiting of college athletes, and control of great control has resulted in malpractices and poor sportsmanship," said Dr. S. E. Crowe, Dean at Michigan State College, before a study group at the National Education Association's annual convention in Chicago last week.

The section on higher education participated in a four day meet held at the Congress hotel. Over 700 members of college faculty and administrators met and divided into 37 study groups, one of which discussed methods and policies concerning intercollegiate athletic programs.

Members of the group pointed out that alumni financing covertly was one of the unjustifiable methods in the college athletic program. In addition, one member of the group pointed out that a high school senior who was an outstanding athlete. Taking advantage of the usual dickered among colleges for the best men, this student sent intercollegiate sheets and press clippings listing his achievements and awaited the best bid.

In regard to questions of what are defensible policies with respect to granting financial aid to athletes and recruitment of athletes, the study group endorsed the rules set forth by the NCAA "Ethical Code." According to Dr. Crowe, the NCAA code has not been enforced to a great extent in the past because the commission has had trouble getting at facts. "However, within the next year I feel that steps will be taken to make it work" definitely. Possibly one of the best ways of handling unauthorized subsidization would be to have each athlete sign a statement as to his source of income," Dr. Crowe explained.

A committee from the group was appointed to see that the basic purposes and functions of the athletic program, they arrived at four major areas of responsibility. The areas are: (1) to the student who participates in the program; (2) to the academic program of the college or university; (3) to the college community of students and faculty; (4) to the community and public at large.

Some members of the group contend that one of the intercollegiate athletics was that they met the needs of only a small per cent of the student body. "Yet," Dr. Crowe emphasized, "despite the evils of objection, intercollegiate athletics serve a real purpose on the American college campus. It is a vitalizing influence and brings a spirit of loyalty and unity to the student body, faculty, and alumni."

David S. McIntosh, associate professor of music, attended a meeting of the Eldorado Rotary club Tuesday.

Maybe these laws are the reason for the congregation of dozens on Southern's campus, and particularly on the warm south steps.

SOUTH STEPS OF MAIN PROVIDE CANINE SPOT

All of Old Main is within the Carbondale city limits, with the exception of the south steps. The line extends down the middle of Chautauqua st., across the campus, and on down Park ave., according to Edward V. Miles, Jr., business manager.

The city dogcatcher has no jurisdiction outside the city limits, and very little if any on the campus, according to John G. Turner, Jackson county state's attorney.

The spiral red stripe on a barber's pole is said to symbolize the winding of a handker around the finger of a patient upon whom the doctor has operated in the operating room. In former times, when the operation of bleeding was extensively practiced, blood-letting formed a part of the duties of a barber.

Lentz Calls For Photograph Of Main Building Before Fire

Wanted: a photograph of the temporary building which served as the main building at Southern Illinois University from 1884 to 1887.

This call went out last week from Prof. E. G. Lentz, chairman of the University's "Diamond Jubilee" Committee, which is seeking old photographs and other relics of former days for a giant 75th anniversary exhibit.

The '75th anniversary celebration will take place in two units, the first a re-enactment of the "First Day of School," coupled with the coronation of the new training school, on July 2, the second the Diamond Jubilee Homecoming Oct. 20-22.

Was Frame Structure

The temporary building, a photograph of which Prof. Lentz is wanting, was a frame structure, erected in the form of a Greek cross, located about where the present Old Science Building is situated according to the University historian.

Southern's first Main Building, completed in 1874, burned Nov. 26, 1883. Classes were immediately resumed in storehouses of business houses, in churches and in other community buildings. The City of Carbondale raised \$5,000 and the temporary frame building was hurriedly put up, being ready for occupancy about the middle of January, 1887.

Old Foundation

The General Assembly acted with extraordinary promptness to appropriate \$150,000 for the reconstruction of the Main Building. The new structure, erected on the site of the old building and using the old foundation, was completed and dedicated in February, 1887.

Prof. Lentz, as University historian, has been collecting historical data, photographs and documents of early days at Southern since 1945, in preparation for publication of a 75th anniversary historical volume.

He has been unable to locate a photograph of the temporary Main Building, however, but hopes that some alumnus or other friend of the University might have such a picture among his souvenirs.

Other pictures, commencement programs, diplomas or other documents of the early periods in the University's history are also desired by the Diamond Jubilee Committee, either as gifts or as loans for the 75th anniversary exhibit.

PHOTO DISPLAY IN OLD MAIN GALLERY

A display of miscellaneous photos has been placed in the Graphic Arts gallery on the first floor of Old Main by members of the University's photographic service.

Action shots, campus buildings, and other scenes, are represented. Photographers contributing to the display include Allen Richards, James Tucker, and R. A. Steffen.

How much FUN can you cram into a record?

Hear Ray McKinley's musical kidding in "SUNFLOWER" (an RCA Victor Release) and you'll know!

You'll have a lot of fun with Ray McKinley, his band and his vocalist serving up a platterful of "corn" for your listening and dancing pleasure. Yes! Ray knows about musical pleasure—and smoking pleasure, too! As Ray beats it out on his drums—"Camels are a great cigarette—they're mild and full-flavored!"

How MILD can a cigarette be?

Smoke Camels for 30 days—and you'll know!

In a recent coast-to-coast test of hundreds of men and women who smoked only Camels for 30 days—average of one to two packs a day—noted throat specialists, after making weekly examinations, reported

NOT ONE SINGLE CASE OF THROAT IRRITATION DUE TO SMOKING

Camels

Money-Back Guarantee! Test Camels milder for yourself in your own time. You are not convinced that Camels are the mildest cigarette you've ever smoked, return the unsmoked balance and you will receive its full purchase price, plus postage. (25¢ per pack.) J. Reynolds Tobacco Company, Winston-Salem, North Carolina

Council Corner

This will be the last Council Corner column to appear in the Egyptian since a regular staff member has been appointed to cover the activities of the Student Council.

At Tuesday's meeting of the council, Madolyn Fisher, council secretary, reported that the Student Council treasury contained \$768. Of this amount, \$200 has been promised to the Scarab, and about \$250 will be needed for Honor's Day expenses.

In addition, the council voted to pay out \$31.66 to the International Relations Club to help pay the expenses of sending three members of the Southern chapter and the chapter's sponsor, Dr. Frank Klingberg, to the North American conference of the I.R.C. at Denver. The council also voted \$30 for fees for four Southern government students and Dr. Willis G. Swartz, head of the government department who will attend a conference on Communism, at Principia, Illinois.

It was decided to hold a special assembly later in the term for the purpose of giving recognition to the yearbook staff, the Southern students selected to "Who's Who on American Campuses," and new members of the Sphinx Club. Bill Green and Charles Dickerman

Teachers' Opinions, Student Activities, Scholarships, and Course Changes Discussed At Education Conference

The current question concerning the extent to which a teacher can in expressing his political beliefs in the classrooms was a major discussion point at a meeting of the Department of Higher Education in Chicago last week.

The group stated that members of college faculties have a responsibility, both to their students and to the society of which they are a part, to encourage open and searching analysis of all significant human institutions and systems of thought. They agreed that the abridgment of freedom to carry on its work impedes the competency of teachers, and that insuring the teacher's loyalty to truth is a responsibility of the teaching profession.

During the meeting a resolution was drawn up reaffirming the teaching profession's obligation to insure responsible professional conduct in teaching and to sustain the traditional loyalty and intellectual integrity of teachers by the self-examination of faculties.

The resolution stated that, "the profession can and will prevent the use of academic freedom as a cloak for activities which are not consistent with public trust inherent in higher education."

All Forms Should Be Chancelled
Dr. J. D. Williams, Chancellor of the University of Mississippi, and conference chairman said, "It is my opinion, as well as that of most of my colleagues, that all forms of thinking and expression should be taught in the classroom. By a thorough and comparative study of all political beliefs it will be only natural that the democratic way of government be accepted above all others. Democracy is something that operates on the campus and teachers have faith in democracy will win out."

Admission policies and procedures were studied by group members of the conference. About half the members of the group thought that the practices for admission of their own colleges were satisfactory as far as "means" are now known, but all agreed that

search for better "means." Special problems of admission such as testing, counseling, and special "days" and parents, were discussed. It was believed that a basic philosophy of admission was necessary before these practices could assume their proper position in the work of an admission officer.

As was expressed by one member, "If the United States is to meet the challenge of leadership in world affairs, the potential talents of all its people must be discovered and developed. It is, therefore, necessary that educational opportunities be open to every individual. Education beyond the secondary school should not be limited to those individuals for whom the typical existing educational institution now provides either general or specialized education. The great variety of potential talents calls for a greater variety of educational provision."

Appeals To Truman
In connection with the opinion that education should be made available to everyone, the leaders appealed to President Truman in a 440 word telegram to push for early action on legislation to provide federal aid to public elementary and secondary schools. Dr. Williams said, "The GI Bill has opened our eyes to the fact that a great many people can benefit from higher education. The group felt that federal aid should begin early in education, thus removing 'economic barriers' out of the way of a student having a great amount of potential ability, but inadequate financial resources to continue his education."

Mr. Reilly, Dr. Kenneth Little, University of Wisconsin, Springfield, "Federal educational aid would not cost society anything if the cycle was completed. The country would have a greater number of workers, and with greater earning capacities thus resulting in a reimbursement to the government in the form of income taxes."

Student Activities
In group study, concerned with student activities, they determined that all institutions should encourage development of a sense of student responsibility and provide wide opportunity for practice. "Effective communication with students, wise counseling, and the ability of the college to absorb new ideas and to be implicit in good practice," they stated. They also found that a greater genuine interest and participation of the faculty in student affairs can be a potent teaching factor.

In another problem they said that the removal of discrimination in student organizations, especially fraternities, is not effectively accomplished by institutional fiat or legislative action. "The problem is one of moral rightness in which students working among students in their own organizations should understand and acceptance to eliminate discrimination. Institutional responsibilities lie in encouraging that. Free discussion should alter undesirable practice."

Social Science Studied
The group studying social science in general education started its discussion by creating with the problem of objectives. They found that many objectives as now stated are meaningless, and that a discipline is done to general education by setting forth objectives which are often impossible of attainment. Many felt that the development of adequate textual materials was of fundamental importance to the improvement of

Copyright 1949 by Kaplan, Inc. "Okay, Cut 'er hard!"

general courses in the social sciences. They found that two avenues of approach were open for the establishment of criteria for general education courses: (1) the authoritative approach in which the experts select the subject matter they consider of greatest importance; (2) the democratic and practical approach which would be adopted by those who would select areas of study in cooperation with their students. The group considered the latter approach preferable in relieving the confusion in which youth finds itself and in determining the areas in which youth derives real satisfaction and value from learning.

It was felt that in too many instances the natural science teacher has functioned unwisely in feeding his students facts instead of arousing mental appetite and provocative discussion. It was the opinion of the group that science and mathematics teachers should find their objectives in the problems which are continually arising in a democratic society, and help the students to use the content and method of science in solving these problems.

The group was in general agreement that the traditional laboratory course with its manual containing specific instructions of procedures contributes little to the objectives of general education. It was suggested that lecture demonstration take over some of the functions of the traditional laboratory and that the laboratory be used as a sort of workshop for students and teacher in experimentation appropriate to their problems.

As a whole, the conference was unique in that the educators gave special attention and consideration to the student viewpoint in every event. They agreed, in almost case, that programs were more acceptable and more readily adopted when plans were worked out through close cooperation between students and faculty. There was agreement also that the war-service experience, motivation, and maturity of the veterans have contributed a great deal to the intellectual and general campus life of the college.

Chandler Becomes Secretary of New Student Office

Charles "Chuck" Chandler, a Southern graduate student, was recently named secretary of the new Southern student office. The office is located on the second floor of the building on Harwood avenue housing the temporary offices of the dean of men, dean of women, and the housing director. This year, it has been used as the meeting place of the Student Council and the Student Legislative committee.

"We hope that the office will become the hub of student activities," Chandler stated in explaining the aims and purposes of the new office. Since its establishment recently, it has served as a center for work done by the Student Legislative committee, for Spring Carnival planning, and been active in the work done for the Hospitality Week-end and the Open House, which were held last week end. The office will keep records of students serving on various com-

Positions For Graduates Offered At Placement Service

Representatives of business companies and a number of high school superintendents have been in the office of Raymond H. Dey, director of the Placement Service, calling for graduates for positions in the business companies and in the high schools.

The companies who have been in to interview graduates of the school of business for accounting and salesmanship positions are Standard Oil, Burrough's Adding Machine company, National Cash Register company, Aetna Fire and Casualty Insurance company, American Life insurance company, Equitable Life Insurance company, and the Kroger company which has vacancies in twenty-six states.

A survey of the banks of Southern Illinois has been made and some openings have been located. Also the chambers of commerce and similar organizations in each of the Illinois towns have been contacted to determine the industries in that town and possible openings that may be present.

Among the school men who have been in the years Payne, supervising principal at Lawrenceville; Dr. Melvin Davis, Peoria superintendent of schools; N. A. Roan, Carbondale high school superintendent; B. W. Hunsaker, Vienna high school principal; and C. F. Reed, Elkhart high school superintendent.

Repairs and Additions Are Made-On Campus

Repairs are being made in all parts of the campus. According to Dr. William Neal Phelps, remodeling work has begun on houses located at 507 and 503 S. Illinois. Foreign languages will be taught in the house at 503 and 507 will be devoted to music.

Three rooms in Parkinson laboratory, one of which is on the first floor and two of which are on the second floor are being remodelled for use by the chemistry department.

The cannery will be remodeled for the carpenter's shop and the entrance to Old Science will receive much needed repairs. "The buildings of the floor have been cleaned away by termites during the past few years."

Seven hundred pieces of shrubbery have been received and planted on the campus recently.

Improvements in Old Main
The windows and doors on the second floor Old Main are scheduled to be replaced with new ones like the ones of the third floor. The floors and stairs will also receive renovation in the form of repainting the floor.

A new asphalt tile floor will also be laid in the business office and the offices of Dean Lawson and Dr. Swartz will receive new linoleum floors.

Air conditioning units will soon be installed in the offices in the auditorium and in the academic department office building.

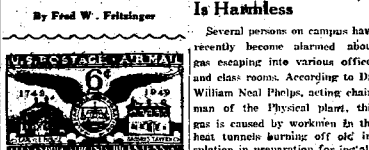

The book load of the library is to be lightened soon. This has been recommended by the State Department of Architects and Engineers. Shelves have been built for books in the basement of the house located at 506 S. Illinois.

Southern's ball diamond has just been put in stage and the backstop is being painted. A new cipher printer has been ordered to be used particularly for the track and field team delivery and is expected in a month or six weeks.

A fence is being built at the west end of the training school playground. The nearness of the highway to Route 51 proved a hazard to the safety of students at the training school. This fence will be approximately five feet high and made of small, heavy woven wire.

Admitted, and student leaders so that they could be reached easily. In addition, it will serve as a clearing house for student requests for facilities and equipment. Its use is available to student organizations in addition to the Student Council.

THE PHILATELIST

Description of the 6c Alexandria Bicentennial air mail commemorative to be placed on sale May 11 at Alexandria, Va., has been announced by Jesse M. Donaldson, Postmaster General.

The stamp will picture a reproduction of the Alexandria seal, a pair of outstretched wings, the Carlyle House, and Gadsby's Tavern. The Carlyle House, the home of John Carlyle, one of the founders of Alexandria, Gadsby's Tavern was frequently used as a meeting place of such people as George Washington and John Paul Jones.

Arranged horizontally with a single line frame, the stamp is of special delivery size. It is printed by the rotary process, electrically perforated, and issued in sheets of 50 stamps. The total authorized of 70,000,000 has been authorized.

A trio of native orchids adorns three Philippine postage stamps. The two centavo will picture the Mariposa orchid, and the five centavo will depict the Waling-Waling orchid.

HAMSTERS TO MOVE INTO NEW HOME SOON

The little house in back of the Old Science building will soon be put to a new use. Water pipes and a sewer are being installed in the building so that the zoology department may move their hamsters in to their new home.

In the near future a fire-proof room will be built in the basement of Old Science. Dr. Lindgren will store various yeasts representing approximately 10 years of work in this room.

The seven great wonders of the world are the Pyramids, the Lighthouse of Rhodes, the Temple at Ephesus, the Pharos of Alexandria, the Hanging Gardens at Babylon, the Statue of the Olympian Zeus, and the Mausoleum at Halicarnassus.

board. They must be in excellent physical condition. Complete information and applications for the next scheduled Women's Army Corps officer candidate school class may be obtained at the USAF recruiting station, Masonic Building, West Frankfort, Illinois.

Must Be Citizens

To qualify for enlistment for officer candidate school, applicants must be citizens of the United States, have two years' accredited college education, and be between the ages of 19 and 28 at the time of reporting to officer candidate school. They must be single and able to pass rigid screening tests before an officer candidate school

Gas Escaping Into Classrooms Is Hazardous

Several persons on campus have recently become alarmed about gas escaping into various offices and class rooms. According to Dr. William Neal Phelps, acting chairman of the Physical plant, this gas is caused by workmen in the heat tunnels burning off old insulation in preparation for installing new insulation and is nothing to be worried about. It cannot be held.

GRADUATING SENIORS MUST BE MEASURED FOR CAPS AND GOWNS

All students who plan to graduate in June may have measurements taken at the book store for their caps and gowns. Carl T. W. Stauf, manager of the book store, stated that measurements must be taken by April 25.
