Casting the vote

Erin McElhaney, junior in radio-television, casts her ballot in the USO election as Robin Roy, junior in marketing and advertising, keeps tabs on which students have voted. Election officials estimate that about 1,800 ballots were cast.

Lyons wins USO election

By Brett Yates Staff Writer

Phoenix Party candidate Phil Lyons defeated Trojan Party candidate Dan DeFoose in the Undergraduate Student Organization presidential election, 881-706.

At press time, results of the referendum and senatorial votes from all districts had not been tabulated.

John Grigas, USO election commissioner, said he believed this year's elections were a success. He said 1,491 students voted in last year's election and that he believed 1,800 to 2,000 students turned out to vote this year.

"This election was very well received both by the voting student body and by the candidates," Grigas said. "I have received no complaints by people voting as far as lines or method of voting. In fact, I received nothing but compliments." Grigas said he believes more students were lured to vote this year because of the referendum, the candidates' campaign efforts and the publicity the single polling place received.

"We slapped student apathy in the face today," said Dan Sheridan, a member of the election committee.

The polls were staffed by four Registered Student Organizations, the Public Relations Society of America, the American Marketing Association, Sigma Tau Gamma and the Student Athletics Advisory Board.

Grigas said he was impressed with the way the organizations worked the polling place. "The people working the polls were stupendous," Grigas said. "I have nothing but praise for them."

Liquor Board delays Strip can-ban decision

By Tricia Yocom Staff Writer

The Liquor Advisory Board delayed action on a proposed ban on the Strip during Halloween Tuesday night after two liquor store owners told the board the action would cause more problems than it would solve.

Doug Diggle, owner of Old Town Liquors, 514 S. Illinois Ave., and Steve Hoffman, of ABC Liquor Mart, 109 N. Washington, suggested that enforcement of existing laws, not more regulations, is the key to preventing injuries during the weekend.

Although board chairman John Mills said that no one is "entirely happy" about the proposed ban, he said the board's main concern is preventing soft objects coming into contact with soft heads.

If banning cans is the only foreseeable alternative to injuries, then the board must recommend the ban, he said.

Diggle was one of the authors of the ordinance which prohibits the sale of alcohol in bottles the week before the Halloween celebration.

If the ban is implemented, Diggle's business would be hurt, because his store's South Illinois location is in the nucleus of the annual celebration. In effect, customers would be in violation of the law as soon as they leave the store with cans.

Diggle said that a can ban would be quite different from the bottle ban, which has been very successful.

First, no ban on the sale of cans is planned, so revelers would be able to obtain cans and take them to the Strip, making enforcement nearly impossible, Diggle said. He also said that there are too many entrances to the area to prevent people from bringing in cans.

However, Diggle said the board now police can be expected to control the thousands of people who bring cans to the Strip when they can't control the people who throw things during the annual celebration.

Terrorists take blame for TWA jet bombing

ATHENS, Greece (UPI) — A bomb tore through the passenger cabin of a TWA jetliner 15,000 feet over Greece Wednesday, killing four people who were sucked through a gaping hole before the pilot made an emergency landing.

A pro-Libyan terrorist organization claimed responsibility for the attack.

A TWA spokesman in New York said most of the 114 passengers and seven crew aboard the plane were unharmed when the bomb, which police said may have been hidden in a passenger's carry-on luggage, exploded inside the Boeing 727 while the craft was flying at 15,000 feet over the Peloponnesus, the peninsula that forms the southern part of mainland Greece.

"The bottom of the seat was blown up, but the back was still there," said Janet Chaffee, 36, of Salem, Ore., who was sitting two rows in front of seat 10F, where the explosion occurred. Chaffee told her brother-in-law Mike Severn of Salem, Ore., by telephone that she did not see what happened to the people who went out the hole because the seats were sucked from the depressurizing cabin faster than they could.

"They were just gone," Severn quoted Chaffee. In Washington, the State Department said it had no confirmed evidence the explosion was caused by a

gorbachev says U.S. trip
'in sight,' still calls for ban

MOSCOW (UPI) — Soviet leader Mikhail Gorbachev said his proposed trip to the United States "remains in sight," but offered a dim view of other superpower relations during a wide-ranging interview released Wednesday. Gorbachev, who has been struggling for the last year to consolidate his power and assemble a viable economic plan, discussed the economics of moving "forward faster" and called again for a nuclear-test ban to "obstruct" the development of new types of weapons.

U.S. Trade Office limits European imports

WASHINGTON (UPI) — The administration, moving a step closer to a trade war with Europe, announced Wednesday it will retaliate against recent trade restrictions unless the European Community agrees to negotiate. Making good on President Reagan's threats earlier this week, the Office of the U.S. Trade Representative said it would restrict imports of U.S. farm products.

Koch quotes King as gay rights bill signed

NEW YORK (UPI) — Mayor Edward Koch Wednesday ended a 15-year legislative battle over a gay rights bill and signed the anti-discrimination measure into law, but his signature did not end the debate over the issue. Koch quoted the Rev. Martin Luther King Jr. before signing the bill. "He (King) said, 'You don't have to love me.' That's what he said. 'You have to respect my rights.' This legislation simply says these people have rights," Koch said.

Peruvian police destroy 28 tons of cocaine

LIMA, Peru (UPI) — U.S.-financed raids on Peru's "coca valley" — the world's chief source of cocaine — captured more than three times as much of the illegal drug last week as authorities confiscated in all of 1984, officials said Wednesday. Police destroyed about 28 tons of coca paste, a soupy mixture of coca leaves and chemicals used in making cocaine, said Juan Zarate, head of Peru's drug police.

Bush's tour comments send U.S. oil prices up

By United Press International

Oil prices bounced back above the critical $10-a-barrel mark Wednesday as the White House said the Reagan administration still believes price stability can be achieved by free market forces. Vice President George Bush's comments on plans for his Mid- East tour later this week sent crude prices higher in U.S. markets late Tuesday in a rally that spilled over into Wednesday's trading. But prices pulled back somewhat after a White House statement clarifying the remarks.

2 killed, 2 injured in battery plant explosions

LEBANON, Tenn. (UPI) — A series of fiery explosions ripped through a battery plant near the town square Wednesday, killing at least two people and injuring two others and reducing the building to a pile of smoldering rubble. The bodies of two unidentified workers were removed from the charred remains of the one-story building about 2:43 p.m. after firefighters doused the blaze.

Grain managers charged in embezzlement inquiry

PINCKEVILLE (UPI) — More arrests are expected in an ongoing investigation of the alleged embezzlement of funds totaling more than $20,000 from Merchant's Grain Inc., of Pinckeville, say Perry County authorities. Authorities Monday announced the arrest of manager Kenneth Lavin Baldwin, 46, and assistant manager Robert L. Holloway, 55, both of Pinckeville.

Lockdown imposed after luncheon fight

VIENNA (UPI) — Inmates at the Shawnee Correctional Center were on lockdown Wednesday following a food-throwing, tray-hurling brawl between about 30 inmates during lunchtime a day earlier. The altercation apparently began in the cafeteria when one inmate bumped into another inmate and did not apologize, according to Lt. Herb Sullins, Corrections Department spokesman.

Bargaining union gets faculty ‘no’; ‘yes’ to merit pay

By Paula Buckner
Staff Writer

Results of a faculty survey on contract bargaining show that if an election were held tomorrow, faculty would vote to be represented by neither a union nor a system-wide bargaining unit.

Other results show that one-third of the faculty sample feel that they need more information on bargaining to make an informed decision; that most don’t understand the voting results needed to unionize and that merit pay should be retained if bargaining was established.

The questionaire was developed by Larry Busch, School of Art, and Gay Wakefield, Department of Speech Communication. It was sent in December 1985 to 1,625 faculty members, all of whom returned blank because the addressee was on administrative and 441 were returned completed. The final printouts, Wakefield said, were not available until mid-March.

THE SAMPLE was taken from a faculty-staff data list. Proposals excluded from the sample were those not classified as regular faculty: adjuncts; visiting faculty; non-paid staff; graduate assistants; and the Board of Trustees.

Busch and Wakefield said at a press conference Wednesday that the survey was developed because responses to previous surveys had been returned blank because the addressee was on administrative and 441 were returned completed. The final printouts, Wakefield said, were not available until mid-March.

"Last year, we kept hearing our colleagues discuss the pros and cons of collective bargaining," Wakefield said. "This time, they talked, the more inconsistencies and questions seemed to arise." Busch and Wakefield and Busch were Bill Crimmão, Barbara Aplin, Jack Kelly, educational psychology, who read drafts of the survey; and Roy Miller, political science, who helped analyze the data. Miller teaches two courses in survey analysis research.

THE SURVEY, Busch said, is meant to enlighten the student to merit pay if returned blank because the addressee was on administrative and 441 were returned completed. The final printouts, Wakefield said, were not available until mid-March.

"If the study continues to generate healthy discussion and debate on the important issues surrounding collective bargaining, then we have achieved our goal," he said. Of the sample, 55.5 percent said if an election were held tomorrow, they would vote to not be represented by a union; 40.2 percent said they did not understand the voting results needed to unionize; and 30.5 percent said they needed more information to make an informed decision.

If collective bargaining was instituted at SIU, 68.4 percent said SIU-C and SIU-E should be represented by a system-wide unit and 77.1 percent said merit pay should be retained in a bargaining contract.

TO ENSURE the questionaire was as thorough and as objective as possible, 33 percent of respondents included 312 tenure faculty (72.1 percent),

Apathy Party is founded, but does anybody care?

By Patricks Edwards
Staff Writer

You may have encountered last minute campaigners for the Apathy Party vyng for your vote in the Undergraduate Student Organization elections Wednesday, that is, if they happened to be campaigning when you were going into the Student Center.

Party officials said they didn’t begin campaigning earlier than election day because they just didn’t care. In fact, the party was founded only eight hours before the polls opened.

Jim Benbow, a junior in liberal arts, campaigned for president. His friend Kurt Martin campaigned for the vice presidency. Benbow said he thinks that Martin is a junior in pre-med. The Apathy Party platform featured a question for freedom on campus, a one-way ticket to heaven and the introduction of “idolocy” into the USO. Benbow said it even had a write-in campaign pledge: “We’ll ‘blank’ for you,” in its party literature.

Joe Hall, public relations coordinator for the Apathy Party, leaked to the press that the group’s effort was really “a sarcastic campaign.”

“We’re setting an example of how students shouldn’t act,” Hall said.

Their real object was to let people know that there was an election and to get them to vote in it, Hall said.

Cuts costly, student-parent says

By Jim McBride
Staff Writer

Proposed budget cuts in the city’s child care program will greatly affect SIU students with children enrolled in the program, says SIU student and single mother Janet Sellsar. Sellsar, who has two children enrolled in the program, said SIU faculty and staff will have to pay more to afford the program. Most other child care facilities within the city have enrollment waiting lists, do not have transportation for children and are too expensive for most student parents to afford, said Sellsar, who added that one alternative for her family may be public aid.

"It’s going to cost the government more to support me on public aid, besides reducing the quality of life for me and my children. than it is to temporarily fund the day care center and let my children go to kindergarten for three years until I can support myself," she said.

Proposed ban unfair, unfeasible

A HALLMARK BAN on can gambling has generated no fans. At least not in the retail world. The Council's idea to ban a group of businesseers — those selling alcohol in the "city fair" area — while allowing others to reap the financial rewards of Carlisle's semi-barbaric Halloween festival. The City Council has already banned the sale of bottled beer during the Halloween weekend, and now some council members want to keep beer cans off the streets during the festival as a safety measure. It is a fact that every year several injuries result from people throwing full beer cans at other people, all in the name of "fun" and anonymous violence. But a ban on cans isn't going to solve the problem, and may even complicate matters.

LOCAL LIQUOR RETAILERS Doone Sugar and Steve Hoffman say the move can only create more problems if police try to enforce the ban on cans in the crowded festival streets. Most people probably would object to being arrested for having a beer can in their hand.

The council ban the sale of canned alcohol in the city during the Halloween weekend. That would discourage people from taking beer bottles in to the festival. Of course, some people might stock up on beer before the festival and it would inconvenience a lot of people who have more to go near the Halloween fairgrounds.

SO HOW ABOUT A new approach? Why not bring in beer trucks and sell draft beer in plastic cups only? Sounds pretty safe. No one, not even anyone knows, has ever died getting from getting drunk in a plastic beer cup.

It is hard to come up with alternative solutions to a problem when someone seems minded to make one had never existed. The can is a had idea that will cause more problems than it is worth.

Letters

Pro-life not a financial stance

How insensitive it is of Mr. Dykstra and his cohorts to dismiss the moral pleas against school-funded abortions as a t-tied defense for his stance. Only pro-abortionists argue in financial terms. Pro-life students were reported at the thought of involuntarily supporting the notion of an innocent human life by paying school fees. Mr. Dykstra tells students who disagree with school-funded abortions to attend school elsewhere. However, this is not an option for students who have progressed too far to transfer, cannot find unique areas of study elsewhere, or cannot qualify academically if they could.

He claims students can also drop student health insurance and any other student insurance. But the school's insurance policies require specific proof of coverage before total substitution of the health program can be realized. Many students, myself included, can do no better than achieve partial cessation from paying student health insurance. Meanwhile, they would be forced to fund the killing of the unborn.

Abortion is not the only way to deal with unwanted pregnancies. For me, economic comfort is not a consideration when taking into the life. I wonder: how t-tied students can be made to work. The required to show compassion for those in the form of child care rather than abortion in order to save the unborn's life? Would you put a financial value on human life by killing the unborn simply because abortion is cheaper than child-rearing?

Requiring pro-life students to fund abortion when there are other means of assistance is like requiring anti-apartheid students to mail personal checks to the South African military: their opposition would be based on principle, not finances.

A letter by Lynne Nolan, "Janitor clears up housing mystery" (April 1) has some false statements directed at the University and the Janitor union representative. I am the Service Employment and Local 316 Business Representative, and required to show compassion for those in the form of child care rather than abortion in order to save the unborn's life? Would you put a financial value on human life by killing the unborn simply because abortion is cheaper than child-rearing?

A letter by Lynne Nolan, "Janitor clears up housing mystery" (April 1) has some false statements directed at the University and the Janitor union representative. I am the Service Employment and Local 316 Business Representative, and required to show compassion for those in the form of child care rather than abortion in order to save the unborn's life? Would you put a financial value on human life by killing the unborn simply because abortion is cheaper than child-rearing?

Local and Personal Services Labor Relations acted in the best interest of all Building Services employees when they were moved from University Housing to the Physical Plant. Again, seniority rights prevailed, only this time you didn't agree with it.

It's ironic that you were concerned that University Housing would hire a Building Service Worker One for two weeks because of you being replaced. You serve us correctly, during your tenure at Physical Plant. You never discussed this concern during your absences. It is no more difficult for University Housing to hire or place a Building Service Worker One or a Carpenter than any other department that uses these classifications. However, if you are inferring preferential treatment for an individual then you are circumvent the Civil Service and Union rules and statutes, then it becomes my duty to prevent it, if known, from happening, which in my case I did.

I take exception to Ms. Nolan's statement "through a system of pro-housing, seniority and individual rulings of union officials". Union officers are elected by the members of that union. By oath of their office and the Integrity of a person representing a body of co-workers. See, for example, the letter of the law of the agreement between the University and the Union as the rules and statutes of the Civil Service System. Because this system protected and balanced equity is adusted, perhaps not to the full personal agreement of all involved, but to the satisfaction of those represented by the union.

It has been said that a happy employee is a good employee. I am happy for you, Ms. Nolan, that you are returning to Allen and wish you a long and successful tenure at that facility. I will continue to represent and to serve all the Building Services employees with the guidelines as established with fairness and equity as long as I serve in my present capacity. — Jerry D. Romay, business representative, SEL Local 316.

Editorial Policies

Signed articles, which appear as individual authors and other communications, reflect the opinions of their authors only. Unsigned editorials represent a consensus of the Daily Egyptian Editorial Board, whose members are the student editor-in-chief, the editorial page editor, members of the editorial staff, and a Journalism School faculty member.

Letters to the editor are submitted by mail or directly to the editorial page editor, Room 1247 Communications Building. Letters should be typewritten or clearly legible. They will be published in the order submitted, double spaced. All letters are subject to editing and will be limited to 200 words. Letters of less than 75 words will be given preference for publication. Students must identify themselves by class and major and must be members by rank and department, non-academic staff by position and department.

Letters submitted by mail should include the author's name and class affiliation, for which verification of authorship cannot be made will not be published.
terrorist bomb, but FBI agents and officials of the Federal Aviation Administration were sent to Athens to help Greek authorities determine the cause.

"It was definitely an explosive device," a Greek official said, calling it a "barbarous terrorist action."

Hours after the bombing, a caller claiming to speak for a pro-Libyan Palestinian group claimed responsibility for the attack on Trans World Airlines Flight 840, saying it was in revenge for "American imperialist aggression."

In telephone calls to two Western news agencies and a newspaper in Beirut, the caller said "the Arab Revolutionary Cells — Al-Kassam's Revolutionary Cells" was behind the attack, and warned of "revolutionary action to strike American imperialist interests everywhere."

In New York TWA President Richard Pearson said the pilot, Capt. Richard Petersen of Sarasota, Fla., made an emergency landing at Bellhinkon International Airport in Athens.

JET, from Page 1

The alternatives to trans- sporting alcohol in bottles and cans would cause problems themselves, the two said.

"People would buy alcohol once they got to the Strip, which would ultimately lead to fights and annoyed people. Because the bars are already crowded, people would flock to the beer booths on Grand Avenue, traditionally made of wood planks across both sides of the street and if people would be arrested for possession of a can o' beer as opposed to throwing cans or damaging property, "there would be a lot of trouble," one said.

"They'd better be made of steel," if the ban is attempted, Hoffman said.

He created a scenario of partiers waiting in long lines to purchase beer and becoming impatient and "fights on top of rights" breaking out because people would try to cut to the front of the line.

It would be a major problem just to keep people behind the stands before they were served, he added.

Because people would be arrested for possession of a can o' beer as opposed to throwing cans or damaging property, "there would be a lot of trouble," one said.

Diggie commented on a statement made by Police Chief Ed Hogan in a letter to something would happen to the Strip during the weekend is conducive to boredom and intoxication.

Diggie suggested that some alternative activity be provided on South Illinois Avenue, just as live bands are provided on Grand Avenue.

City Clerk Janet Vaught said "most of the problems on South Illinois Avenue stem from crowd control, not under drinking.

The city would like to draw people away from the Strip because there are buildings on both sides of the street and if something would happen people would be "caught in a trap," she said.

CUT MOHAWK. The brothers have raised $300 for the Ronald McDonald House by taking pledges to have their heads shaved.

U NNION, from Page 3

110 faculty from the education, human resources and libraries curricula (23.5 percent); 131 full professors (30.4 percent); and 139 associate professors (23.5 percent).

SIU-C's regular faculty, according to the survey results, includes 291 tenured professors; 254 faculty in education, human resources and libraries curricula; 359 full professors; and 357 associate professors.

THE SURVEY results, Miller said, show some under-representation among some faculty. The results show 73 of 285 regular faculty in medicine and science completed the survey, along with 113 of 270 regular faculty with rank of assistant professor, 89 of 286 regular faculty in liberal arts and 121 of 526 regular non-tenured faculty.

Miller said the results were "probably to be expected, in view that they did. You look at who is more likely to respond, the people with the most at stake."

Respondents were asked to list the questions they most wanted answered; those mentioned five times or more were tabulated into 15 general sections. Among the top responses: why some people think a union is needed, whether the merit system would continue with bargaining, and how a bargaining agent can be chosen and disposed.

Faculty were also asked to list who they would like to receive answers to these questions from. In rank order, the respondents listed the Faculty Senate, University administration, AAUP, NEA, AFT and Graduate Council.

MILLER SAID the Faculty Senate has been "overly quiet" on the issue of bargaining. "They haven't been very vocal about it. They haven't been doing a good job of keeping faculty informed about the issue," he said.

AAUP filed a petition with the Illinois Education Labor Relations Board to represent SIU-C faculty but has no petition to represent SIU-C faculty. Miller said this could be the reason why the group ranked higher than NEA and AFT, which have filed petitions to represent faculty and staff of both campuses.

"Faculty might view AAUP as perhaps being not highly partisan and a little more impartial than NEA and AFT," Miller said. "Sometimes you like to hear from those people you don't hear from all the time."

Wakefield said a similar survey has been distributed to administrative-professionals, but no tabulations have been made.

Correction

A story in Wednesday's Daily Egyptian incorrectly stated the day and time of a baked goods and rummage sale to raise funds for hunger relief groups. The sale will be Saturday from 9 a.m. to 3 p.m. at St. Francis Xavier Church, 303 S. Poplar.
Today’s Puzzle

Puzzle answers are on Page 15

Exchange programs offered

Exchange programs to Thailand, France and Tunisia are available to qualified students for the summer semester through the Office of International Programs and Exchanges.

A program at Thammasat University in Bangkok, Thailand, is offered to students interested in art, history, sociology, anthropology, literature, political science and economics.

A language-study course at the Universite de Savoie in France is open to beginning, intermediate and advanced students. Students will live in a student dormitory at the base of the Alps.

Paine essay topic of free lecture

Fritz van Holthoorn, professor at the University of Groningen in the Netherlands, will present a lecture titled “Thomas Paine’s Common Sense: An Historical Appraisal” at 7:30 p.m. Thursday in the University Museum Auditorium.

The talk is sponsored by the Department of History, the University Honors Program, and the College of Liberal Arts.
The New Frontier" is breaking new ground in music video territory. The alternative music video program is aired three times a week on Carbondale Cablevision channel 7. It is shown Mondays and Thursdays from 3-5 p.m.

This week's program is aimed at students who are already familiar with Music Television (MTV). It is looking for an alternative to the heavy rotation of the MTV program that focuses on rock music. Says Paul Andersen, production coordinator of the program, "We're looking for a program that's not just rock 'n' roll." Instead the show provides an outlet for diverse types of music, such as soul, new wave and college bands.

WIDB has been programming new music and rock classics since 1979 and has kept a regular listening audience through various promotions with record companies. Two years ago, it joined with SPC Video to create a music video show titled "Video Attractions." The show premiered on Cablevision with a "Single MInds" video concert and record giveaway. Since then the show's title has been changed to "The New Frontier." The SPC studio is equipped with an editing system that allows the students to dub video tapes sent from record companies.

On Thursday, Friday and Monday and April 10 and 11, "The New Frontier" is on the road.

THE SPECIAL segments of the show, which is produced entirely by volunteers from WIDB radio station and SPC Video with faculty advisers were filmed in St. Louis. The crew visited the LaClede's Landing Wax Museum, the Arch and the Anheuser-Busch brewery for the intervals between selected videos. They are basically brief human interest segments. For example, Kevin Rust, senior in art, visited the Anheuser-Busch brewery for one segment. Jay Bellissimo, senior in radio and television, is the "New Frontier" co-host. Bellissimo, former pitcher for the St. Louis Cardinals, is shown during one of the show's advertising his sport's fantasy by pitching to a statue of Stan Musial, located in front of Bush stadium.

BELLISSIMO says "people get sick of watching the same old video programs" and "The New Frontier" makes an attempt to provide something a little out of the ordinary to appeal to students. He says he and the staff have been receiving positive feedback. "More and more people are recognizing me on campus," he said. "We have a 95-second commercial on MTV, which is helping a lot, and our staff tries to build on each show to make each more interesting." -Mary Ellen Storch, sophomore in radio and television and co-host of the show, asks people on the street a specific question for the "Woman on the Street" segment.

While in St. Louis, Stirchak approached people and asked, "What brings you to St. Louis?" which attracted some unusual expressions and responses. John Christopher, senior in art, serves as the program's graphic artist. George Dougherty, senior in cinema and photography, compiles student clips. Donald Cusihy, senior in radio and television, is executive producer. Shawn Slloki, sophomore in radio and television, is promotions coordinator.

The writing staff includes Hunt, Vince Camano, senior in radio and television, Sheri Preston, senior in radio and television, and Mike Bennett, senior in radio and television, radio and television.

This semester "The New Frontier" has the "Return of Photoshop," "Women in Art Rock" and "A Day With Jay." This WEEK'S videos include releases by Husker: Du, Tom Waits, Sly and Robbie, Del Fuego, Jimi Hendrix, The Golden Fafaloon, Erasure and the Church.

Also, a student film by Richard Zimmerman, junior in cinema and photography, titled "Gumby's Revenge," which shows the cartoon character escaping the Center for the Criminally Insane Cartoon Characters, Tom Borsellino, sophomore in radio and television, is hired to track Gumby down on campus.

Upcoming on "The New Frontier" agenda is a studio show, a parody of "Zoom" and a "Bomber's Show," which will be filmed in the underground campus tunnels. The crew will act out a nuclear fallout.

"Thomas Paine's Common Sense: an Historical Appraisal"
A Public Lecture by Professor Fritz van Holthoon
University of Groningen, The Netherlands

VETERANS ASSOCIATION will meet at noon in the Student Center Troy Room. All All American and reservists are welcome.

WGTV news director Paul Davis will be the Illinois News年报treaders’ Association’s guest speaker at 7 p.m. Thursday in Room 1046 of the Communications Building.

AFRICAN STUDENTS Association will conduct a discussion titled “Africans and Black American Relation” at 7 p.m. Thursday in Lawson 101. Carl Flowers, president of the local chapter of the NAACP, Richard Hayes and Abdul Haqvi will be guest speakers.

“CAREER OPPORTUNITIES and Job Search Techniques” will be presented by Career Planning and Placement at 7:15 p.m. Thursday in Lawson 201.

SOCIETY FOR Creative Communication will sponsor “An Evening With Sculptor Roger Columbus” at 7 p.m. Thursday in the Communications Building Room 1022. Columbus, an SIUC graduate, will give his philosophic view of creativity and art.

MASSAGE DAY will be provided by physical therapist assistants from 9 a.m. to 3 p.m. Friday in Wham 114. There will be a $1 charge for a 10-minute massage. The event is a fund raiser for the David Nitz Foundation.

Forum to focus on world health by year 2000

Western nations are only a part of the criteria necessary for judging the value of international health, says Robert D. Russell, professor of health education.

There are several ways of assessing health using a holistic perspective by which determining whether health for all by the year 2000 is possible, Russell says.

This topic and others will be presented at an international forum Thursday from noon to 1 p.m. in Quigley Hall Lounge.

Russell, along with the Health Education Department and the Office of International & Economic Development will be sponsoring the forum in preparation for World Health Day on April 7.

Students will have the opportunity to participate in group activities and to gather information relating to world health. refreshments will be provided.

CLOTHING AND Textile Organization will meet at 5 p.m. and a fashion show is set for 6 p.m. Thursday in Quigley Lounge.

FREE MOVIE presentation “Fury to Freedom” begins at 7 p.m. Thursday in the Morris Library Auditorium.

NATIONAL CLAY Cup exhibition will be on display Friday through May 2 in the Student Center Art Alley.

“FARMING SYSTEMS Research in the Eastern Province of Zambia,” an international agricultural seminar, will be presented by Godfrey Miti, a Zambian agronomist, at 2 p.m. Thursday in the School of Agriculture Room 209.

AMERICAN MARKETING Association will meet at 7 p.m. Thursday in the School of Business Administration room.

GOLDEN KEY National Honor Society will conduct a stress reduction clinic in cooperation with the Wellness Center at 7 p.m. Thursday in the Student Center Saline Room.

GRADUATES CALL 1-800-457-4065 FOR $400 AND PRE-APPROVED CREDIT ON A NEW FORD

It’s Easy To Qualify For $400 from Ford Motor Company

• You must receive at least a bachelor’s degree or a state RN license between October 1, 1985 and September 30, 1986.

For Pre-approved Credit from Ford Credit

• You must have verifiable employment that begins within 120 days of your qualifying vehicle purchase at a salary sufficient to cover ordinary living expenses and your vehicle payment.

• Your credit record, if you have one, must indicate payment made as agreed.

• And don’t forget…you must receive at least a bachelor’s degree or a state RN license between October 1, 1985 and September 30, 1986.

These Vehicles Are Included In The Plan

Ford: Escort, Escort EXP, Tempo, Mustang, Thunderbird Mercury: Lynx, Topaz, Capri, Cougar
Ford Truck: Aerostar, Bronco II, Ranger, F-150 & F-250

You are eligible for $400 even if you don’t finance your purchase. Use it toward your down payment or get a check from Ford after the purchase or lease.

Th: amount of your pre-approved credit is determined by the qualified vehicle you buy.

If a vehicle is not in dealer stock, it must be ordered by June 1, 1986. Delivery of all vehicles must be taken by August 31, 1986.

For complete details on how to get your $400 plus pre-approved credit, call the toll-free number today. 1-800-457-4065

AFRICAN WEEK CELEBRATION and the PAN-AFRICAN CONFERENCE April 1st - April 5th

Conferences: Opening Speech by the Honorable KALLUMINO MUNDIWA Ambassador of Zambia

Tuesday: Quigley Auditorium 8 p.m. - 10 p.m.

Wednesday: Presentation of Research Papers 1:30 p.m. - 2 p.m.

Conference Registration: $2 Students, $3 Others

Buffet: Quigley Lounge. 7:30 p.m. - 9:00 p.m. $5

Party: The Flight, $7 9:30 p.m. - 2:00 a.m.

Southern Illinois Airport Tickets available at International Student Services at 452-1197.

Do you feel like climbing a wall? Try this one

By Steven Gurada
Student Writer

If you're studying driving you up the wall, you might consider climbing one at the Recreation Center. Why would anyone want to conquer the 30-foot-high climbing wall? Because it's there.

The wall is designed to allow the movement needed to make outdoor climbs, such as climbing the bluffs at Giant City State Park. "It simulates cliffs," said Nancy Wills, director of the Recreation Center's Adventure Resources Center. "Climbing involves a series of problem-solving. As you go up you usually need to decide what your next two moves will be and the wall helps you decide this."

The wall consists of several dozen pieces of wood, about one-inch thick, that have been sanded and finished then bolted into the concrete so that it requires climbing techniques to scale the wall.

The IDEA of a climbing wall was conceived by a former product design student, Alan Carrier, as a senior project. Carrier's proposal was required to be within a $3,000 budget for materials and equipment. The wall was installed by maintenance workers in 1983. Needless to say, Carrier received an "A" on his project.

When climbing the wall, a two-person system is employed. A climber sits in a seat, attached to a rope that goes over a bar at the top of the wall, through a friction device and back down to the ground where a person called a belayer makes sure the rope is tight. The belayer also acts as a spotter for the climber, insuring the safety of the climber if he or she slips or starts to fall.

Safety is the key to the climbing wall, a system that has resulted in no serious injuries since it was installed. "I give a lot of credit to my four supervisors (belayers) for safety. They are all experienced climbers, are familiar with the systems and can see problems before they happen," Wills said.

ALL CLIMBERS must wear safety helmets. All the equipment, especially ropes and harnesses, are examined thoroughly in bi-weekly safety checks by the climbing wall's staff. Large foam mats also are placed at the base of the wall.

Almost every major climbing move can be done on some part of the wall. Traversing (moving from side to side) is a common move that climbers practice on the wall. A person can also climb on the lower half of the wall without a rope and harness using a technique called bouldering.

The wall is grouped into five zones of difficulty, arranged vertically, from very easy for beginners to difficult for experienced climbers. "There is always a challenge."

Try this one...
Ralliers to remember King

The 18th anniversary of Martin Luther King Jr.'s assassination will be remembered Friday at a rally organized by several campus groups.

People Living the Dream, a local civil rights group, will sponsor speakers in the Free Forum area at noon Friday. Speakers will include Maria Moore of the Southern Illinois Anti-Apartheid Alliance, Luke Tripp from the school of social work, and members of the Mid-America Peace Project.

Tripp said the rally will focus on the issues of racial and social justice in the United States and South Africa, the peace movement, U.S. intervention in Central America, the arms race and the worldwide struggle for human rights.

The rally will conclude with a march around the University's administration offices in Anthony Hall. Tripp said the rally will last about an hour.

Gary Calhoun, freshman in forestry, scales the climbing wall at the Recreation Center.

WALL, from Page 10

for everybody because it's only as hard as you want to make it," said Brian Vana, a climbing wall supervisor. "If you have mastered the most difficult zone you can then eliminate using some of the blocks to make the climb even more challenging," he added.

ONCE PEOPLE learn how to climb, the wall's staff encourages them to learn how to belay their friends to get them interested in climbing.

"We encourage people to learn to belay because it teaches people the idea of trusting one another and climbing does require two people to do it safely," Wills explained. "The person climbing and the person belaying work together. The rope is like a lifeline because if the climber falls, the belayer can help them.

Some people who contemplate climbing the wall are convinced they don't have the strength or physical capacities to succeed, according to Vana.

"Mental aspects weigh as much, if not more, than physical aspects," he said.

"The whole key is on standing on your feet and pushing with your legs instead of pulling with your arms. Your legs are three to five times stronger than your arms, so it makes sense to use your legs." Vana added that mental aspects are important because climbers have to convince themselves they can do it. If climbers say, "I can do it," then they usually can.

"People's biggest problem is they say to themselves 'I can't do it.'" Vana said. "All it takes is a little confidence. I've seen handicapped people, blind people, mentally retarded people and people as old as in their 60s or as young as 10 climb that wall."

The wall can be used by anyone with a Rec Center pass, not just SIU-C students, and is a popular activity, due partly to its location. The climbing wall's hours are from 6 to 9 p.m. Monday through Thursday. No appointment is required but waiting for a turn may be necessary.

LeCary, from Page 4

Monica MacDonald, a graduate student in the School of Music, will give a vocal recital at 8 p.m. Thursday in the Old Baptist Foundation Recital Hall.

MacDonald, joined by pianist Mark Hall, will perform works by Henry Purcell, Robert Schumann, Mozart, Samuel Barber and Leonard Bernstein.

The recital is free and open to the public. It is sponsored by the School of Music.

The Old Baptist Foundation is located between Woody and Faerhalls.

Cure for Spring Fever at Rec Center

By Nola Cowser
Staff Writer

Springtime and the great outdoor activities that go with it draw many students and visitors to the east lawn of the Recreation Center for the hours before opening. Plenty. Just ask Michael Dunn, director of the Rec Center.

Dunn said the Rec Center offers a variety of outdoor activities during the spring, divided into three categories. First, the center offers a base camp, complete with canoes, paddles, jackets, backpacks, sleeping bags, tents and camping gear. This equipment can be rented for 5 cents to $2 per night. The equipment must be reserved in advance, and Dunn said it is often reserved a month in advance. Reservations must be made in person and rent must be paid when reservations are made.

Second is the base camp, located on the first floor of the Rec Center off the service drive near the Newman Center, open at various hours during the day. Dunn recommends that interested students call the Rec Center for the hours before going to the base camp.

CAMPUS LAKE is another great opportunity for springtime activity. Dunn said the boat docks, which opened Monday, provide canoes, paddle boats, sailboats and sail riders. The boats can be rented from noon to 4 p.m. Monday through Friday and noon to 3 p.m. on the weekend. Rent is 50 cents an hour for students. Wednesday is "free day" and no fee is charged.

Dunn said the beach will not open until at least April 13 and then it will be for sunbathing only. "The water’s not warm enough for anyone to even want to swim," he added.

Two events take place at Campus Lake during springtime. The "Doc" Spackman Memorial Triathlon begins at 8 a.m. April 26 at the boat docks with a quarter-mile swim to the beach. The next leg of the race is a six-mile bike ride that goes through the country and ends back at the beach house, where a two-mile run around the lake ends the triathlon.

DUNN SAID about 150 people, including himself, participated in the triathlon last year. Dunn said the water was cold, but added, "If I can do it, anyone can do it."

The 13th annual Cardboard Boat Regatta, conducted by Richard Archer of the Design Department, will be held at the lake later that day. The regatta provides a nice day for spectators, but it is great to be a participant in the regatta. "That’s what Campus Lake is all about to me," Dunn said.

Another activity provided by the Rec Center is its nine-hole frisbee golf course, located on the east lawn of the Rec Center. Frisbees can be checked out at the Rec Center for no charge. Score sheets are provided. "The course is challenging," Dunn said, "but anyone can do it."

ANOTHER SERVICE offered at the Rec Center is the Adventure Resource Center, which is coordinated through Touch of Nature. Previously known as the Leisure Exploration Services, ARC moved to a new location in the Rec Center in August. The Leisure Exploration Services had resided in the Rec Center for three and a half years prior to its move.

ARC can provide the nature lover with information on practically any outdoor recreation spot in the United States, according to Mike Harrison, senior in Outdoor Recreation. Files with information about state and national parks are located at ARC. These files also contain information on historical sites and other outdoor sporting activities such as hunting, fishing and camping and activities for special populations.

HARRISON SAID if someone came in and said, "I’m going to Wyoming over break. What can I do there?" a file could be pulled that would provide the student with all kinds of outdoor recreational activities. "If we don’t have it, we can call out and get it," he said.

Student worker Julie Monken said the files have been rearranged and the ARC has written for more information.

Harrison said the ARC has information on activities offered in the Suwanee National Forest, maps for directions to a specified area and information on what is provided in that area.

Weekend outings can easily be planned at the ARC, said Monken. She said she often checks the files before the weekend and says, "Hmmm, what should I do this weekend?"

HARRISON ADDED that the ARC is a real help for people coming down here who have just been here for a year or two.

Students can register at the ARC for the Southern Outdoor Adventure Recreation programs, also sponsored through Touch of Nature. SOAR offers outdoor recreation activities over breaks and weekends. Programs have included trips to the Grand Canyon, canoe trips and rappelling at Giant City.

the rain.

Driscoll believes the connection lies in some toxic forms of aluminum, which may be activated from surrounding rock when contacted by acid water.

Driscoll has served as an environmental issues advisor for the U.S. Forest Service, the Environmental Protection Agency and various state agencies.

Driscoll will speak at 3:30 p.m. His discussion is part of a series of acid rain seminars sponsored by the Coal Research Center and the Department of Chemistry and Biochemistry.
Lady Braves picked to win 1986 Gateway softball title

By Steve Merritt
Sports Editor

The Lady Braves of Bradley University have been picked in a recent coaches poll to win the 1986 Gateway Conference softball title.

Bradley took seven of the 10 first-place votes, as well as two second-place votes and a third-place vote to tally 66 points, enough to oust defending champ No. 3 Southern Illinois (three first-place votes, 59 total points). Illinois State is pegged for third, followed by SIUC and Western Illinois. The bottom five of the Gateway pack consists of Southwest Missouri, Eastern Illinois, Northern Iowa, Drake and Wisconsin State.

THE LADY BRAVES, nationally ranked in the first preseason poll, have eight starters from last year's 11-6-1, 14-13-1 squad that finished third in the GCAC. Included in that list is last year's Gateway Player of the Year, junior pitcher Beth Hawkins.

Hawkins has already tossed two no-hitters this season and has compiled a 3.3-3 ERA, allowing just six earned runs and fanning an incredible 100 batters in 73.1 innings. Last year, Hawkins tossed four no-hitters while stacking up a record of 21-7.

The Braves are off to 13-5 start this season, pending results from a Wednesday doubleheader with Indiana State.

LAST YEAR'S Gateway changes, the Redbirds of Illinois State, are picked for second in the conference. A strength of the Birds, like Bradley, is in the return of the success of last year's 12-4, 31-18 squad.

The Redbirds are off to 3-1, 18-7 pending results from a Wednesday twinbill with Northern Illinois this week, a senior hurler Maxine McLaughlin already ranking as the conference's most winning pitcher (9-1 record, 4.36 ERA in 74 innings).

THREE TOP recruits added to a returning cast of seven starters make things look good for third-place pick Indiana State, which finished last season with a dismal 6-10, 17-33 record.

Jaco All-American outfielder Renee Sraisher may turn out to be a leader for the Lady Sycamores, using her .415 batting to fire up 1985 All-Conference selections Gwen Lewis (second base) and Wilda Jones (catcher).

The Lady Sycamores are off to a perfect 2-0 Gateway start and a 6-5 overall start.

PICKED FOR fourth, the Salukis are another team that returns a host of starters from last year's team -- seven of Coach Kay Brechtlebauer's 8-9, 24-19 team will return to vie for the conference title this season.

In the addition of freshman Lori Day to the mound corps, Saluki pitching seems to be a strong point. Day, who has 15 career no-hitters, a .329 record and 56 strikeouts, as a high school hurler, will compete with Lisa Peterson, SIU-C's season strikeout record holder, to form a solid starting rotation.

Offensively, the Salukis will be led by shortstop Jenny Shupry, the GCAC's No. 3 hitter last season with a .341 average and centerfielder Rhonda Snow, a two-time jUC All-American. Catcher Kelly Fox, a transfer from Wabash Community College, is a power hitter with a rifle arm and the ability to play some infield.

THE SALUKIS are 8-2 thus far in the season, pending results from a Wednesday doubleheader with non-conference foe Evansville.

Western Illinois, 11-7, 21-19 last season, bends a group of talented under- and upperclassmen, led by All-Conference catcher Cathy Sidman. WIU is off to a 7-9 start this season and will kick off their GCAC schedule this weekend against SIUC and Eastern Illinois.

THE SURPRISE of the 1986 GCAC title chase could very well be No. 6 pick Southwest Missouri, off to a 13-6 non-conference start. The Golden Bears finished 8-7, 26-24 last season. Returning the GCAC's leading hitter of 1985 (Marcia Biagio, 460) and Paula Burcher (.336 in '84), the Bears will look to pitcher Terri Whitmarsh (22-16 in '85) to solidify the pitching staff.

SMU starts the conference schedule on Thursday.

EASTERN Illinois, 6-11-1, 25-25 in 1985 and off to a 7-4 non-conference start this year, features Zam Mogili, a sophomore who went 14-10 last season with a 0.57 ERA in her first year of collegiate competition. To be a contender for the conference title though, Mogili and sophomore pitchers Kara Sarcher and Stelf Sponier will be expected to pick up the slack caused by a depleted defense.

NORTHERN IOWA returns its five top hitters from last year's 8-10, 24-30 squad. Last depth on the mound could end up hurting the Panthers. Sensors Terri Benson (1.4-1.27 ERA) and Linda Whannel (12-13, 1.26 ERA) will have to throw better than last season to help the Panthers get a realistic shot at the title.

UNI is off to a 1-2, 4-11 start this spring.

IN WHAT WAS the second year of Division I competition for Drake University, the Bulldogs surprised some people by finishing 9-4, 19-23 in 1985. With the league's leading hitter, All-Conference shortstop Karlin Hayes (.348), returning and another All-Conference selection, third baseman Amy Eversman, the Bulldogs could be a surprise team.

Even though the potential is there, Drake is off to a 0-4, 2-11 start this spring.

CLOSING OUT the pack in the preseason poll, Wichita State finished 6-13, 11-31 last season and is off to a 0-4 non-conference start.
DALLAS (UPI) — The NCAA Wednesday announced the adoption of a three-point field goal from a distance of 19 feet 9 inches for the 1986-87 men's basketball season.

"The rules committee believed that adoption of the three-point field goal will do much to open up the game," said Edward Stetz, secretary-editor of the rules committee. "It will force teams to play defense away from the basket and assist in the problem of area of rough, low post play."

The committee decided on a shorter 19-foot 9-inch key distance for its three-point shot. The National Basketball Association ballplayers don't have points for a shot made from beyond that distance.

Stetz said the new rule will bring the short player back into college basketball.

The committee also approved new rules designed to prevent timing controversies such as the one that followed the March 21 NCAA Midwest Regional semifinal game at Kansas City, Mo., in which Kansas beat Michigan State 96-86 in overtime.

The outcome of the game was determined by an 11-second clock malfunction in its closing minutes. Arche Marshall of Kansas saw the clock stop midway through the overtime by scoring on an offensive rebound with the ball at his feet, but the computer scoring system used by the statistician cross-confirmed that Marshall's basket would have scored after the buzzer and Michigan State should have claimed an 80-78 victory.

With 2:21 remaining in regulation, Vernon Carr of Michigan State sank a free throw to tie the game 76-72, but the game clock did not resume when the ball returned to play. Approximately 12 seconds later, a Kansas player scored, but the overead game clock showed only one-second elapsed from Carr's free throw. The official scorers did not notice the stopped clock and the game progressed despite the error.

Under the new rule, NCAA officials will be allowed to use television replays to correct malfunction in the clock or mistakes made by timers and scorers.

"Under the new rules, Michigan State coach Jud Heathcote could have gone to the timers' table without being charged with a technical if they are trying to correct a timing, scoring or possession error," the report said. "They also will be allowed to leave the coaching box without being charged with a technical if they are trying to correct a timing, scoring or possession error."

The NCAA also announced a proposed rule change that would allow athletes to file a complaint against a coach who makes personal comments during a game that are considered racially or sexually offensive.

"I think it's a good change," Herrin said. "I will make the more "game more exciting, especially in the last minute or so".

Herrin said the three-point shot would allow a team to get back into a game quickly.

"It'll put shooting back into the game and make a place for the really great shooters," Herrin said.

Herrin added that the distance of the shot — 19 feet, 9 inches — is a "realistic shot that would be a good gamble if you're down late in the game."

Guards Steve Midleton, a junior next season, and Doug Novek, who will be a senior, should be able to take advantage of the three-point shot next season in certain situations, Herrin said.

GREEN likes idea of 3-point shot

By Steve Mirrett

Saluki basketball coach Rich Herrin said Wednesday afternoon he thinks the new three-point shot adopted by the NCAA will put shooting back into college basketball and add another dimension to the game.

"I think it's a good change," Herrin said. "I will make the more "game more exciting, especially in the last minute or so"

Herrin said the three-point shot would allow a team to get back into a game quickly.

"It'll put shooting back into the game and make a place for the really great shooters," Herrin said.

Herrin added that the distance of the shot — 19 feet, 9 inches — is a "realistic shot that would be a good gamble if you're down late in the game."

Guards Steve Midleton, a junior next season, and Doug Novek, who will be a senior, should be able to take advantage of the three-point shot next season in certain situations, Herrin said.
Saluki pitching coach uses SIU-C background as asset

By Ron Warnick

It is Kirk Champion’s first season as a pitching coach for the Salukis, but he is certainly not unfamiliar with the SIU-C baseball program.

Champion began his college pitching career on Richard “Itchy” Jones’ 1976 squad. So when he received an offer last summer from his old mentor for the pitching coach position at SIU-C, he didn’t hesitate taking it.

“I played here and knew what the situation was like,” Champion said. “It was a Division I program, and I felt it was the best situation for me.”

Not having to adjust to an unfamiliar atmosphere, Champion concentrates more on the Salukis’ pitching.

“Our pitching staff is not going to be the kind to strike out eight to 10 guys in a ball game,” Champion said. “They’re going to have to put the ball in play, and we’ll have to play defense to keep the games close.”

When Champion visits the mound after a pitcher gets rocked by opposing batters, he usually explains to him that the problem is not what pitch he threw, but how he threw it.

“There is a tendency that a pitcher’s mechanics have changed,” Champion said. “You try to get him to zero back on what he’s trying to do and not be taken in by other elements. Attitude-wise, we have to make adjustments.”

Champion knows about trying to zero back. His coaching career was born after a few years of unspectacular pitching for the Salukis.

“One day you have to realize you can’t keep playing baseball and have to concentrate on other careers,” he said.

His first assignment was as pitching coach for Southwest Missouri State, where the Bears twice reached the NCAA Division II regionals. In 1982, he was named head coach for Rend Lake Junior College. Champion soon turned it into a sub-500 baseball program into a conference champion two years later.

But Champion gave much of the credit for the program’s turnaround to Rend Lake’s athletics director, Mitch Haskins.

“He was big on basketball, but he also showed a lot of support for baseball,” Champion said. “He had a good program. We just turned it up a notch.”

It must have been a pretty big notch, because Rend Lake averaged 41 wins a year and 23 players advanced to four-year universities during Champion’s tenure. Four have signed professional contracts.

In the summers of 1984 and ’85, Champion coached the Peninsula Oilers in the highly talented collegiate Alaskan Baseball League. Dave Kingman, Chris Chambliss, Tom Seaver and other professional players have played there.

“It’s very competitive, like minor-league baseball,” Champion explained. “You travel by plane and play almost every night, like the pros.”

Between games, Champion enjoyed the mountaintop scenery and rooted his muscle with Alaska’s famous ocean fishing. Once, he caught an 80-pound “monster.”

“It felt like reeling in a television set,” Champion recalled.

It was during his second season in Alaska last year that Champion was named head coach at Missouri-St. Louis. However, upon returning to Rend Lake to pack, Jerry Green resigned his assistant coaching spot at SIU-C and Champion was offered the vacancy.

Champion accepted, but lost the Missouri-St. Louis head coaching job “he’d” for two weeks, though he had not yet done any coaching there.

“I talked to a few people up there, and they and I felt it was in my best interests to move here,” Champion said.

Champion says it feels nice to be back at his alma mater, where he learned to coach.

“Pitch” and the other coaches taught me good fundamentals,” he said.

The Salukis’ new pitching coach, Kirk Champion, is no stranger to the SIU-C baseball program, as he pitched for Richard “Itchy” Jones’ 1976 squad.

SWIMMERS, from Page 20

16 Salukis are qualified.

In an opening-day action on Thursday, Gary Brinkman, a senior from Durbin, South Africa, is qualified for the 500 free.

Brinkman was the Salukis’ top performer at the 1985 NCAAs, taking fourth in both the 500 and 1600 free, and has taken either first or second place, with one exception, in every dual event this season.

Tom Hakanson, a junior from Stockholm, Sweden, will swim the 50 free Thursday. He has retained the top Saluki-sprinter position all season and Ingram said that Hakanson will be the team faves as he not only is in two individual events, but possibly all three relays.

Also slated for Thursday is the 400-medley relay.

At last year’s nationals, the Salukis finished 16th with 40 points.
Football union warns of strike over Rozelle’s drug plan

WASHINGTON (UPI) — The head of the NFL Players Association warned the union would consider striking if NFL Commissioner Pete Rozelle unilaterally imposes a drug program including random testing of all players, a published report said Wednesday.

Gene Upshaw, executive director of the players’ union, told the Washington Post that “Rozelle seems to be saying, ‘my way or no way,’ Soviet-style. I’m saying that if he does that, we’re on a collision course.”

“I’m not suggesting (a strike), but what I’m saying is that if Rozelle tries to implement his own program without negotiating with us, we’ll take all the necessary steps to stop him, including withholding our services,” Upshaw was quoted as saying in the Post’s Wednesday editions.

Rozelle said during league meetings March 11 in Rancho Mirage, Calif., that if the union did not approve his plan for random testing of all players, he would impose it anyway.

The commissioner said drugs had become a significant threat to the financial stability of the NFL. But the union responded with its own proposal the following week, which would allow random testing only of players arriving to a facility for drugs in a urinalysis given during preseason physicals or during the season when the team doctor ruled there was an unreasonable cause to suspect drug use.
