Montgomery Ward Accepting Students for Local Training

Students interested in the cooperative work program this fall with Montgomery Ward & Company have until Aug. 13 to sign up at the Student Work Office.

Men who are in their sophomore year or above can qualify for the program.

Under the program the trainees will gain insight into the retail business through experiences at the Centralia and Murphysboro stores of the firm.

Participants will work approximately 40 hours a week and will be paid a salary while they are taking part in the retail management training program. They also will receive fringe benefits.

Interested students should contact Bruno W. Bierman or Leonard L. Lukasik at the Student Work Office.

MUSICAL ABCs - Learning their musical alphabet from William K. Taylor for "The Sound of Music." The children, who play members of the Von Trapp family. Flanking Taylor are his daughters Wendy, on his left, and Becky, on his right. Standing behind him, left to right, are Susan Ramp, David Ramp, Linda Sparks, a college freshman, Julie Layer and Alan Diedrich.

Little Dears to Sing 'Do, Re, Mi'

Six Children May Steal Some of Show
In SIU's Production of 'Sound of Music'

Six talented children are almost certain to steal part of the show in the Summer Music Theater production of "The Sound of Music."

The kids, who play the children of the widowed Capt. Von Trapp, will be singing some of the hit songs from the musical, including "Do, Re, Mi."

The children will be played by David and Susan Ramp, the children of Mr. and Mrs. Wayne E. Ramp, both of the SIU faculty; Becky and Wendy Taylor, daughters of William K. Taylor, summer music theater director; Julie Layer, daughter of Robert G. Layer, chairman of the Department of Journalism; and Alan Diedrich, son of Mr. and Mrs. Doug and Diane Diedrich of Carbondale.

The leading role of Maria, the convent girl who becomes governess of the Von Trapp children and falls in love with their father, will be played by Helen Hall. Miss Hall appeared earlier this summer in "Little Mary Sunshine."

Robert C. Guy will portray Capt. Von Trapp, who finds he must literally sing his way out of Austria when the German invaders.

Jeffery A. Gilliam will portray Max Detwiler, and Judith Sparks, a junior from Murphysboro.

The musical is the story of the Von Trapp family, who are the children who play members of the Von Trapp family. Flanking Taylor are his daughters Wendy, on his left, and Becky, on his right. Standing behind him, left to right, are Susan Ramp, David Ramp, Linda Sparks, a college freshman, Julie Layer and Alan Diedrich.

Paul Hibbs, newly appointed associate professor of speech, is the stage director for the production. Taylor is music director. Darwin Payne, scenic designer for the School of Fine Arts, has designed the sets.

Tickets are available for all three performances (Aug. 20, 21, 22) of the production, which will be given at 8 p.m. in Shryock Auditorium. The ticket office is located in Shryock Auditorium. It is open daily from 11 a.m. until 5 p.m.

Today's Weather

Showerers ending today, partly cloudy, continued hot and humid with a high of 85 to 94. According to the SIU Climatology Laboratory, the records for today are 108, set in 1918, and 47, set in 1912.

**Saluquarama Offers Fun in Sun Aug. 14**

Fun in the sun and hot dogs on buns will be the order of the day Aug. 14 for the "Saluquarama 1965," a picnic and The Student Activities Office in the University Center.

On this day, all the recreation classes of Lake-on-the-Campus will be at the disposal of students and faculty for an afternoon and evening of relaxation and enjoyment. The beach facilities will be open all day and will be free. This includes rental bicycles, canoes and similar equipment. In addition, various types of games, contests and entertainment will be provided.

The organized festivities will begin at 1 p.m. at the boat docks. The schedule is as follows: 1 p.m., fishing derby; 1:30 p.m., canoe races for men and coeds; 2 p.m., ping-pong tournament with men's and women's singles matches; 3 p.m., men's distance race from the beach house around the lake.

At 5 p.m., the scene shifts to the beach area with the following activities scheduled: 3:30 p.m., beach beauty contest for the feminine costume; 4 p.m., swimming races (tree axle for men and women in three categories: 14–17 years, 18–24 years, and faculty). Those interested in competing may enter as individuals or may form a team from their residence halls, fraternities, or the various activities on- or off-campus living area. There is no limit to the number of students, on a team, or the events the individual or his team enter.

In addition to the competitive events, there will be a dance at the beach from 8 until 11 p.m. with music provided by the Viscounts.

**Activities**

**Two Displays, Meetings, Set**

The Summer Institute in Geography will meet at 8:30 p.m. in the Library Lounge. Iota Lambda Sigma will hold a picnic at 5 p.m. at Lake-on-the-Campus.

Arabic lessons offered by the Organization of Arab Students will begin at 7 p.m. in Room 104 of the Eames Building.

The Southern Student Union will meet at 7 p.m. at the Baptist Foundation.

The Southern Players will present "John Brown's Body" at 8 p.m. in the Playhouse.

The Student for Democratic Society will have a display from 6 a.m. to 5 p.m. in Room H of the University Center.

The Southern Players will have a display from 8 a.m. until closing in Room H of the University Center.

**Set**

**11 p.m. Moonlight Serenade.**

**Midnight News Report.**

**Familiar Melodies to Be Sung On Early Evening WSIU Show**

Familiar melodies will be sung by the Adams Singers on "Sing Something Simple" at 7:30 p.m. today on WSIU Radio.

Other programs:

2 p.m. Page Two: Editorials from leading American newspapers.

3 p.m. Concert Hall: Concerto in G major, Piano and Orchesta by Ravel, Symphony No. 2 in D minor by Schumann and "The Lamentation of Faus" by Berlioz.

6 p.m. Music in the Air.

7 p.m. Storyland.

8:30 p.m. Choral Concert: "Don Quixote" by Telemann, Piano Quartet in E flat by Beethoven and String Quartet No. 2 in F major by Prokofiev.
**Penny for Your Thoughts**

Those who read the editorial page will be familiar with last Wednesday's editorial, written by J.ovich, who asked for "no riots, no mass protests, more law and order," a sort to indicate that life does go on at SIU." He also suggested that the "world's first" could do much to arouse a large audience. "We can still check from every poor etioeb who'd been making the same complaint, but had never imagined that City Hall could be so slow in responding."

In a similar vein, we bought a "Soy New in a little blue bottle" when it was delivered with "*The World's First*" stenciled in chrome on the trunk lid—they even drilled a hole so we could wash it. We were so mad to have the guy who just got $3,100 from his loan in urgent need to notify us that made him take the plaque off the trunk lid. "Read over the holes, repair the trunk lid and apologize. We haven't been aware of much that is little of the world."

But let's make it local. What's the big issue? We were on the phone to pass messages to students to get chopped hands, and that germs won't ever touch our suits. Students are trying to consider the aggregate lost man hours per annum of the student horde who daily stand there waving madly, as though there were some relative across the Berlin Wall, and wringing their hands as though in anti­
piration of some dreadful event. Also, any hypertensive coronary candidate will tell you that his blood pressure soars to 200-plus during that period of time. The dry one has no sense of "well done" when he can't arsh a damn towel gracefully into the face. And what about a parking ticket system that seems to draw its strength from the blood of the student who is "illegally," mind you—not necessarily in such a manner as to endanger or obstruct property, usurp somebody's assigned parking place, or crouch on private property, or divert pedestrians. Oh, no—illegally in the sense that there weren't any rectangular lines around the tires? We haven't even a summer-time edition of RAM: we don't know what time it is. We've clocked don't seem to agree. We haven't known what time it is. We've felt so well since! We don't ask for a summer version of the Berkeley incident. But it wouldn't hurt to hear a few letters to the editor, about something good, bad, or-- indifferent. Rather than say "Thank you, Mr.ovich, wherever you are...." We stand condemned.

Jules Sauvaget

**Earth Can Feed 30 Billion If Man Acts in Time to Develop Potential**

By Bryan Evans

Copley News Service

LA Jolla, Calif.—People are not going to starve because of running out of earth, according to a scientist at Scripps Institution of Oceanography.

The whole problem of the future of man and the possible growth of the population and the availability of water and water is treated in a monograph by Walter R. Schmitt, a newly appointed member of the New York Academy of Sciences.

Schmitt expects the world's population to reach a peak at about 7 billion sometime in the middle of the 22nd Century. He cites studies in population dynamics that believe the present peak will be reached at this point which he says, with further knowledge before man runs out of food "if..."

The "if" concerns whether time, the whole of the world. It is in time to use earth's abundant potential before the population results in starvation, Schmitt writes.

"If we have a better knowledge of the earth's for the productivity of the earth, then are found to be many times greater than we have ever suspected by man, as far ahead as we can see." "Little grace seems to be granted for the immediate appli­cation of this knowledge. It is not possible to increase food productivity, however, unless one of the many great new discoveries is made."

Schmitt points out that people are driving themselves so fast that they are doing so because of lack of natural resources, but because of political and personal reasons.

Schmitt finds that the 7 per cent of the earth's surface now under cultivation could not grow as much, as good, as it does if, given sufficient fertilizer and water. The oceans could produce 100 times as much food, not necessarily in the form of plankton, as they do now.

Moreover, land which now devoted to food crops could be increased four-fold. As populations grow, the question of irrigation becomes one of the greatest problems now under this tide. Beyond these measures are being grown some of the most rapidly growing algae and the use of seaweed or "green meats", as they are called, for food production.

In concrete terms, Schmitt of the irrigation-water needs. He that irrigation of silt will only at a weight of a fourth as productive as irrigation of land, Desert reclama­tion, he believes, is too often economically successful only because it is subsidised. Schmitt believes that both the water and nutrients of the ocean can be reclaimed. The two limiting factors of increasing land productivity are phosphorus and nitrogen. He that this will be brought about by the introduction of some new plants that form salt-tolerant crops which could be grown in the ocean. But Leon Bernstein, J. and L. Dienstag, heads of the Laboratory of Agriculture's Salinity Laboratorat Riverdale, Calif., have been specifically on plant survival under salty soil. "Irrigation does not indi­cate a yield of salt crops," he states. "Publicity for salt-water irrigation suggests that sea water can supply much of the water and nutrients required for crops."

**Blitzkrieg 'em, Sir? No, Use the Kaffeelatsch**

By Arthur Hoppe

San Francisco Chronicle

The news from Vietnam is ominous. The Viet Cong have begun fighting alongside their Viet Cong husbands, beaving grenades and things at us. Naturally, we've had to pot a few in self defense. And that's terrible because, say what you will, shooting ladies is bad for your image.

There would seem no way out, but a lady is about to have a gre­nade at you, an unreason­ing urge rises in you. Think down forth­with, "I'm not a lawyer, true inven the most gentle reading of such a step, logical, and legal though it may be, defi­nitely tarnishes your reputation as a gentleman."

Fortunately, we once faced an even graver problem along these lines. It was the case of one Mrs. West Virginia. It was solved in a flash of genius by the noted public relations man, the late Frank Affaires Advisor, Don Brennan.

It was in the 27th year of our lightning campaign to wipe out the dread Viets Niar. The Viet Niar ladies, who had gotten pretty sick and tired of sitting around the house, had begun appearing on the battle­ments, heaving rocks, bricks and dynamite sticks at us boys. The effect on morale was disastrous, particularly among the older married men. I signed up to get away from all this, they'd say, chucking.

But as long as the Viet Niar ladies appeared in their traditional black peasant trousores, we managed to hold our own. After all, there was a lady in trousores was not really a lady in the true sense of the word. But as the Viets Niar, led by a young gentleman, unleashed a diabolical escalation. In an historic charge on our troops at Sam Hill, a mill of the ladies appeared in new combat garb—black bombazine dresses and gray wig caps, exactly like Whistler's "Nocturnes."

Grenades or no grenades, there doesn't breach a occent American lad who could resist a woman for himself to put Whistler's Mother. And we were forced into retreat on all fronts. It was then that Mr. Brennan had his flash of genius. He must have said grimmly, "booby trap them," the first booby trap, a pilot model. The first booby trap in the process. The Viet Niar ladies, shouting, "Yankees, you die!" came streaming out of the jungle. And there in front of them was on patrol, said a cap­tain exactly like Whistler's "Nocturnes."

In no time, they were all sitting around the table, serving correspond­ ing secretaries and exchanging recipes for lobster cocktails.

Mr. Brennan followed up this triumph by establishing a chain of beauty parlors, "Blondes have more fun!" and a large Mao a-Go Go, where the Viet Niar ladies spent their evenings learning this drag, effectively appraising their will to fight.

The business of shooting up each other was left to the gentlemen, which is as it should be. True, the war dragged on, but our troops were no longer burdened with guilt feelings. Of course, the Viet Niar soldiers were far happier, too. "You can't imagine how it is when these "beauties" come visiting," reported a Viet Niar with a shudder. "The night, the nag, the nag." For as everyone knows, one of the basic reasons men periodically marched off to war is to get out of the house.
Fuel Supply Tanks at Da Nang Partly Destroyed by Viet Cong

SAIGON, Viet Nam (AP)—Hitting at a basic source of American air strikes against North Viet Nam, guerrillas Thursday attacked and at least partially destroyed the storage complex supplying fuel to jets based at Da Nang Air Base.

Just Wednesday four Air Force Thunderchiefs sped unchallenged over North Viet Nam to execute a bombing mission only 30 miles from Red China. The storage tanks, operated by the Essex company, are located on Da Nang Bay, where fuel is transferred from oceangoing tankers. They were outside the U.S. Marines perimeter and, sources said, guarded by Vietnamese troops.

A string of boxcars near the town of Bao Ha, itself 125 miles northwest of the capital of Hanoi, was the target of nine tons of bombs and 4,000 cannon shells loosed by the jet fighterbombers. The pilots said they damaged 11 cars. The spokesman said the Thunderchiefs sighted no enemy aircraft, encountered no ground fire and all returned safely.

Within South Viet Nam, B-52 jet bombers of the Strategic Air Command staged their second raid in three days on a suspected Viet Cong base in the mountainous Do Xa area 350 miles northeast of Saigon.

Among a series of harassing operations, Viet Cong guerrillas fired for the first time on troops of the 1st Brigade of the U.S. 101st Airborne Division, who landed last week at Cam Ranh Bay 180 miles northeast of Saigon. They struck before dawn.

With 90,000 American servicemen now in Viet Nam, military authorities announced 15 were killed and four were missing or captured in the week of July 25-31.

The American combat Zeitgeist in the war now stands at about 550.

Of Vietnamese government forces, 235 were killed and 100 missing or captured during the week, against an announced toll of 760 Viet Cong killed and 97 captured.

Voting Rights Bill Ready for Signature

WASHINGTON (AP)—The Senate sent to President Johnson Wednesday night the bill he had urged to strike down barriers to Negro voting in the South.

The measure would suspend the use of literacy and similar voter qualification tests in much of the South and permit the federal government to take over the registration of voters. A compromise between bills previously passed by the Senate and the House, the legislation was approved by the House Tuesday by a 328-74 vote.

The Senate completed congressional action after a brief explanation of the measure by Sen. Philip A. Hart, D-Mich., who served as floor manager.

Hart called it a strong, effective bill in answer to a problem that he said could result in disaster.

Dirksen's Reapportionment Fight Fails by 7 Votes in Senate

WASHINGTON (AP)—The Senate refused Wednesday night to tamper with the Supreme Court's decision that state legislatures must have a tate to vote on reapportioning state districts as well as population in a referendum.

The Dirksen plan got a majority vote, 57 to 59, which was short of the two-thirds majority required because the Senate failed to muster a quorum.

The Illinois Republican promised to keep fighting.

Sen. Paul Douglas, Dirksens Democratic colleague from Illinois, led opposition efforts to block the move to invalidate the court decision.

"The real issue at stake here," Douglas said, "is whether the seeds of the people are to be met by their state governments or whether the special interests are to control."

Those who hailed the decision claimed at long last it was an end to rural-dominated legislatures, whose members from sparsely populated sections could control state policies.

Opponents argued that how the states elect their legislatures is their own constitutional business, not the federal government's.
Wall, 2 Towers Mark Historic Irish Site

Invincible Castle at Carlow Withstood Attacks for Centuries

By Frank Messersmith
Special to the Daily Egyptian

CARLOW, Ireland—English bowmen stood along the top of the 30-foot-high walls and watched the lines of Irish peasants and English soldiers cross the ford on the River Barrow.

They were a part of the contingents of soldiers placed in Ireland to protect the properties of King John of England in the early years of the 12th century.

The soldiers were stationed in Carlow Castle, originally under the auspices of William le Marsheall, Earl of Pembroke and the lord of the castle and manor.

Carlow Castle towered defiantly at the ford of the River Barrow and the River Burrin, a lifeline of the southern part of Ireland, as it was the closest and most direct route to Dublin.

In this strategic position, the castle could protect most of Carlow County from invasion or attack by the "Irish Barbarians." Carlow County, as designated in a charter granted by the King of England in 1209, included what is now Counties Kildare, Leix, Westford and Carlow.

Realizing the importance of its position, the Anglo-Normans constructed the castle to withstand everything from an attack to an earthquake.

Built in rectangular form, the castle had walls 8-feet thick, which were strengthened at each corner by circular towers about 25 feet in diameter. The length of the walls from tower-to-tower measured 80 feet.

The upper floor and roof of the castle were constructed of wood and covered on the outside by stone. The upper floors and roof and also the basement were reached by stone stairways which were cut into the thickness of the castle walls.

The entrance to the castle was spanned by a pointed arch that reached the height of the first floor of the three-story structure. It was located in the northern wall, close to the northwest tower.

The castle had a prison, or dungeon as it was called then, but it was not in the dark for bidding corridors of the basement as one would suspect. Instead, the prisoners were kept in a separate wooden building inside the castle grounds.

The lord of the castle and his family and guests ate their meals on a raised dais at the head of a great hall on the first floor of the castle. Leased officials and servants sat at lower tables.

Living quarters in the castle varied from private rooms and dormitories for men and women to outbuilding shelters for soldiers and servants. The shelters were often primitive, with straw littered floors to sleep on.

The astounding size and invincibility of the castle reduced the peasants and would-be invaders to awe and fear, and for many years, kept the Irish countryside in peace.

Years later the castle became the object of many attacks when the Irish began revolting against the foreign rulers. Ownership of the castle changed hands several times during the years of fighting. The walls of the castle, which were scarred by arrows, spears, battering rams, rifle bullets and finally dynamite, began to crumble.

Today, the magnificence of the huge fortress has been reduced to one beaten, but obstinate wall supported by towers on each end, much like giant bookends.

It still stands defiantly near the ford of the River Barrow, and no one but the tourists ever notice the huge stone skeleton.

Adjoining the fenced-in grounds where the castle stands, there is a bottling plant that operates busily every day, and attracts visitors from many countries.

But in the shadow of the great wall where once peasants, soldiers and noblemen lived, only snails now make their way along the crumbling gray stone, and memories are left to be told by the wind as it moans through the ancient towers.
PLZ MEETS ST. LOUIS
IN WEEKEND SERIES
With full knowledge of Sun-

day's disappointing 8-4 loss to St. Louis University and its

Big Eight prognosis, St. Salukis will travel to St. Louis this weekend for a four-game series with the Billikens.

Southern took three of four games from the Billikens last week and could have taken the final game in a well, except for a seventh-inning run on a fly-in the last inning by the Billikens.

This series has ago eight games between them this year and the weekend series is the most critical of the year for both clubs. Southern is still in last place but only two games behind second-place St. Louis. With third-place Illinois playing league-leading Parson College again this weekend, Southern has a chance to take over second place in the standings.

The task won't be easy for the Salukis, who must take all four games in an undisputed possession of second place.

On the other hand, St. Louis has a chance to pad its second-place lead over Illinois and can improve its Southern Division lead.

He is back Richard (Reddy) Jones is expected to go with the same quartet of pitchers who limited their

opponent to five, their third-place second-place games between them this year.

The Salukis have been shooting for another four-game winning streak today and will go in full

knowledge of St. Louis' power at bat. The infield will have Jack Brown at third, Rich Hackett at short, Tony Pappone at second and Frank Lumbsch at first. The outfield will have Roger Schneider in left, Nicky Soila in center and Mike Stafn in right. Bill Hanke will do most of the catching.

This lineup exploded for 32 hits and 26 runs in last week's series, both season highs for the Salukis, limited to 20 fielding mistakes to five, their low for four-game series.

Aubuchon, who won the opening game of the series last Friday, but lost Sunday's game in relief, will start the series for the Salukis.

Ron Gunman, also a winner last week, and George Poe will start Saturday's games and Mike Lytle will start today's single game.

St. Louis is expected to use the same quartet of pitchers who threw here with the ace of the Billikens staff, John Marcum, slated to start the series.

3 Athletes May Shorten Tour
To Testify in AAA-NCAA Feud

WARSAW (AP)—Three league-

heads of the United States

touring track and field

team may cut short their

European tour to testify

before a U.S. senatorial

committee in Washington on

the AAA-NCAA feud.

They are shot putter Randy

Matson, half-miler Tom Far-

rell and distance runner Gerry

Lindgren, who are collection

members of the Amateur Athle-

tic Union squad who are

central figures in America's

track and field power struggle.

Clifford E. Buck of Denver,

president of the AAA, said he

has exchanged cables with Sen.

Warren G. Magnuson, D-Wash.,

chairman of the Com-

merce Committee, who is in-

terset in clearing up the

controversy.

The Athletics, Buck said, are

willing to appear. The hear-

ings probably will be held

Aug. 17-19, he added.

Matson, Farrell and Lindgren

Twenty-seven teachers have been involved in an educational experiment to develop new ideas for improving student teacher training.

This program included nearly 300 grade school children in Murphysboro. The pupils were from the first six grades of the Murphysboro public school system.

This pilot program, sponsored jointly by the SIU Department of Student Teaching and the Murphysboro Community Unit Schools, ended last Friday. It is being followed by a week of evaluation.

The teachers, whose ages ranged from 21 to 58, and whose teaching experience ran up to 21 years, needed student teaching for a degree in education. This group had experience that ranged from kindergarten to supervising adult education classes. Some have been high school principles.

SIU's aim was to find a better method to educate student teachers. Under this trial program, there was no homework for the pupils and textbooks were practically eliminated.

Charles D. Neal, professor of Student Teaching, and father of the new program, said he knows of no other program set up exactly like this one. Neal was assisted by Leonard E. Kraft, assistant professor of student teaching, who served as assistant director, and Robert G. Richardson, instructor of student teaching, who supervised the program for the university.

"It seems to reflect on the reversal of room responsibility," Neal said. "Under the traditional program, student teachers are directly responsible to a supervising classroom teacher, leaving the student teacher without real responsibility. Under the program just ended, direct responsibility of each classroom was given to the student teachers."

The Murphysboro school district supplied three supervisors for each of the two elementary school buildings put into use but the teachers were on their own. The Murphysboro Community Unit Schools are headed by James Blackwood.

"The program was based primarily on no textbooks," said Kraft, the assistant director. "The student teachers created their own curricula. They drew from their regular teaching jobs, from their course work at Southern, and from their supervisors for materials."

The program, open to all Murphysboro children on a two-week basis, offered language arts, science, social studies, and mathematics.

No Homework, Textbooks
