Detours on East Campus greet dorm-bound drivers

By Mary Ann McNulty
News Editor

Students driving around campus and Carbondale will run into a number of traffic changes this fall. Once change involves access, which has been altered by street construction, to Brush Towers and University Park.

Security police, volunteer student workers and hand-made signs directed traffic into the dorms Thursday through Sunday.

Traffic was backed up on Marion from Grand Avenue to College at 7 a.m. Thursday and Friday and also from Wall Street to College as the first big wave of students returned to campus.

Parked cars lined the no-parking areas on Grand Avenue in front of Woody Hall making two-way driving impossible.

Security police, however, said there were no problems because of the construction.

"We had no problems with traffic jams because we had a course all set up," said one officer.

Security police worked overtime directing traffic into the towers.

Grand Avenue, which has been closed for road repairs since last spring, will be closed beginning Monday at State Street, where it has been open, according to Robert Harris of University Police.

Students en route to the Towers from 938 Broadway St will have to take Grand Avenue to Washington Street (behind the Kesslers) to Park Avenue after Monday.

The only other route to University Park and Brush Towers is to take Lewis Lane to P. A. Avenue then Wall Street to Logan Drive, around Southern Hills and then to the towers.

Grand Avenue between U.S. Highway 61 and Marion Street will be closed at least until the end of the week, according to Ed Bresler, city engineer. Grand will also be closed between State and Washington.

Wall Street, which has also been under construction, is expected to be open between Grand and Park in two to three weeks. Another change in the traffic pattern on campus in the direction of traffic on Douglas Drive around Small (Continued on Page 2)

Southern welcome in three sections

The three special sections included in today's issue of the Daily Egyptian are intended to acquaint students, new and old, and people in general with the university and community. The sections were designed to highlight people, services, sports and entertainment, along with some SIU history and Southern Illinois folklore.

The sections were prepared by DE staff members and journalism students during the summer term. Among the classes contributing material was reporting, taught by Hugh Morgan, instructor. Overseeing publication of the sections was Alton Porter, graduate student in journalism, who was summer special editor.

Photographs were contributed by Staff Photographers Mike Gibbons, who also did the color cover photographs, and Brent Cramer.

2,000 crowd into Woody's sign-up lines

By Mark Peterson
Staff Writer

Waiting lines at first are an inconvenience. They soon become evaporating. And by the time you have stood in the unseemly one to register, pay fees, or find a place to live, you probably are frustrated, enraged or ready to forget school and go home.

Some students feel that the lines are a good thing.

"I'm just one of those people who wait till the last minute to do everything," said Marty Kasper, a junior in geology. "I just put up with this mess and then come out of the building happy."

Kasper admitted it's sometimes tough to work out a schedule when about three-fourths of the general studies classes are closed, but he smiled and said it's just part of the game.

Jane Riley, a freshman who was registering Friday for her first time, "never there had a chance here but she has already scored something from the University."

"I'll never register this late again," the weary newcomer said. "It hasn't been unpleasant, but it wasn't really fun either."

While Riley was completing the registration process, several hundred others still had their minds on course schedules, program change forms and closed class cards. A spokesman in addition and records said that nearly 2,000 people passed through the registration terminals of Woody Hall Thursday and Friday.

But for many, registration was only part of the story.

Pat McNiel, supervisor of off-campus housing, said more than 1,000 students came to her office Thursday and Friday searching for places to live. McNiel said most of the people she talked to said the housing market is a nightmare.

"I wouldn't go there is a good goal," she said. "But the cream of the crop is gone."

McNiel said all she can tell people is to check the bulletin board that lists rooms needed or to go through the files at her office keeps on available apartments, says landlords call in. She said there still are some
Closed streets, detours greet students returning to campus

(Continued from Page 1)

Group Housing. The traffic flow is now concentrated on the south side of the campus with parking on both sides of the north access road. The change was made to facor increasing parking and traffic for the law school when it is completed. The change also provides better access for the law students.

One construction project that has been completed is Tower Road. The road, which had been the closest for road repairs since last year, is now open between Calhoun Street and Old House I.

Some other traffic changes on campus involve parking.

Beginning Sept. 1, cars parked in the low zone area in front of the Student Center will be towed. Although the low zone parking sign has been up since last semester, University Police only issued tickets previously.

A special parking situation will exist for the first week of school, said Michael Neal, assistant in University Police. "Cars can park in lot 56, north of the arena, lot 63, at the corner of Chatauqua and Oak. and lot 106, north of the arena, without a parking decal."

Nearington said all other parking regulations are in effect. All cars must park legally and must have a parking sticker to park in other lots.

Legislators study Home Ec move plan

By Mark Peterson

Staff Writer

There would be no legal barriers to prevent the moving of the Home Economics Department from Quigley Hall, according to the general secretary of the SIC Home Economics Department.

James M. Brown said that based on research done by C. Richard Grury, assistant professor, the SIU-Billikin Hall funds used to build Quigley Hall were originally intended to be used by the Home Economics Department and not from the Agricultural Premium Funds.

Opponents of the proposal to move HEED to Pulliam Hall have pointed out that at least some of the money to build Quigley did, in fact, come from the Agricultural Premium Funds. The funds were specifically earmarked by the Illinois legislature to be used to build SIC's home economics departments.

Brown did say, however, that more than $2 million from the Agricultural Premium Funds may have been put in the General Revenue Fund in 1967 so it is possible that $2 million might have been a remote source of funds, but added that he could not see this as being a Serious point of reason for the board's decision.

Brown made the comments following a three-hour public hearings on the proposed relocation of the Home Economics Department to house SIU's Home Economics Department.

The hearing was organized by state Rep. Bruce Richardson, D-South District, who was emphasizing the need that the meeting was not a "witch hunt" and that the issues were ones of the duties of the administration and the board.

Rammond told the crowd of about 100 that he was only interested in gathering data and giving all interested parties the opportunity to express their opinions on the matter.

Also attending the meeting were state Sen. Robert Sherwood, P-Dearborn, Ken Busbee, D-Carbontale, as well as several representatives of SIC, including Birchler from Chester and Bill Harris of Marion, both Democrats. Representing the Republicans was Richard Whiteville, a Republican vice-president and academic dean of the College of Education.

During testimony, Anna Carol Fulls, a professor who heads the home economics department, said that society needs home economists now more than ever, because the family unit is in serious trouble. She said the move would have an adverse effect on the department's ability to compete with other home economics teachers.

The department is involved in the home economics program for more than 20 years, says Brown, in which the department is a leader in the College of Education, which is based in Pulliam Hall.

Selection of successor to Eckert slated tonight

By Pam Bailey

Staff Writer

A successor to Neil Eckert, who unexpectedly resigned early this month after serving for more than seven years as Carbondale president, will be named today by the city council Monday night.

The next day after the 86-year-old Eckert announced he was leaving Carbondale to become sales director for a small computer company, the city's four council members choose someone to occupy the remainder of his four-year term. His successor will serve until the election in November of the next regular election cycle.

Although state statute allows the council to appoint a mayor from outside city government, most of the council members agree that Eckert's successor will probably be chosen from within the ranks.

"I think the person should be knowledgeable of what's going on," Carbondale Mayor James Jones said Monday. "Somebody from the outside would have to learn all about the town."

A council member Helen Westberg said she has not heard of anyone from outside the city who is being considered for the post. However, she did not comment on who among the council members are likely candidates for the position.

It has been more than 30 years since a mayor has resigned mid-term, according to Leon Venues, city secretary. Eckert said his sudden resignation was not necessitated by the termination of his employment with Eckert Orchards, a family farm. He declined to say why he had left the business, saying only that it was for personal reasons.

Eckert left for Houston last week to become an executive with Expee, a nationally-known cosmetics firm. "I have to admit that the cosmetics industry is a long ways from the farm," he said in his resignation speech. "But I am running out of terms of entering a dynamic industry in the fastest growing state in the world promised my acceptance."

Eckert holds a degree in agricultural economics from the University of Illinois and has been in the family fruit-growing business for more than 30 years. He was chairman of the council.

But fruit has not been Eckert's sole interest. He has also devoted a large portion of his career to politics. He became a city councilman in 1969 and was elected mayor in 1971. This year he became president of the Southern Illinois University Board of Trustees.

However, he was defeated in his attempt to win state-wide office. In 1972, Eckert challenged Neil Harman for the Democratic nomination for lieutenant governor. Although he lost his running mate, won, Eckert lost by a large margin.

Issues to be acted on by the city council include the selection of a site for the Municipal Court building, the approval of boundaries between Murphysboro and Carbontale, the appointment of a parking and traffic consultant, and the sale of bonds in the city council chambers, 607 E. College.

Daily Egyptian

Published daily in the Journalism and Egyptian Laboratory except Saturday and Sunday. University Communications, Building Carbontale Illinois.

Second-class post paid at Carbondale, Illinois.

Policies of the Daily Egyptian are the responsibility of the Daily Egyptian. Opinions expressed do not reflect opinions of the administration or any agent of the University.

Editorial and business office located in Communications Building, North Wing phone 518-2139. Vernon A. Stone, faculty advisor.
places available in Carterville and Mount Vernon that sure is the way to drive everyday.

The large number of people seeking off-campus housing is mostly due to the fact that all 4,700 spaces in single-student-campos rental halls were filled by July 1.

Joseph Klassen, assistant director of university housing, said there still are on-campus cancellations and those rooms can be sold to the next person who walks in the door, but for all practical purposes it's full.

He also said that Southern Hills and Evergreen Terrace, the university's family housing areas, are fully rented and the waiting lists are long.

Most university officials say however, that the crowds are not much larger than those at home.

Jerri Pfaff, director of admissions, said total enrollment for the fall semester will probably be very close to last year's. Enrollment for fall last year was 22,350. But Pfaff added that it might be down slightly, but said it hard to predict right now.

CIPS trying no-deposit plan for jobholders
By Mary Ann McNulty
News Editor

The Central Illinois Public Service Co. is testing a project this fall which will allow students with a steady income to get electric and natural gas service without paying a deposit.

"When students apply for service, we ask if they have a steady income," said Willis Hartline, division auditor for CIPS. "After checking to make sure the payment record is as it is, we can start the meter and we don't require a deposit.

The income itself may or may not be adequate to pay the bills, but CIPS is trying to be more lenient. Hartline said. Under the new policy, which applies to any person, it may include student work or Social Security checks.

"If a bad payment record develops, or if one is found, a deposit may be asked for," Hartline said.

It costs quite a bit to process deposit applications. We have to hire additional help to handle the deposits. So we are trying to see if we can save some money by cutting down on administration costs.

The company also pays a seven percent annual interest on the deposit.

If we see an increase in the write-offs, from people not paying their bills, over administrative costs, we will have to develop a stricter system on deposits.

For customers who do not have a credit rating or a steady income, CIPS charges a deposit 2.5 times more than the average monthly bill of the previous owner or renter.

The deposit is the same kind of insurance policy against the non-paying customer and . . . against loss on the final bill," said David Edgeworth of the Carbondale office of CIPS.

The deposit amount is $78 to $72, Davis said. All deposits are returned unless the customer does not pay the bills, and after 12 months of service, the customer is charged only three payments.

Electric or gas service connects can be made to people who tend to cut customers in the Carbondale District by dialing a special telephone number, 528-2201, or applying in person at the Carbondale CIPS office, 224 N. Illinois Ave. The Carbondale office is located in the same building as the Carbondale, DeSoto, Elkville and Maywood offices.

All other inquiries and requests can be made in person or by calling the office's regularly listed number, 447-4156. After Aug. 31, the regular number will be for service requests.

Target date: December, 1980

Law school funded; plans under way
By Ed Lempienski
Staff Writer

Gov. James Thompson has signed a bill appropriating $7.6 million for construction of a building to house the SIU law school and planning for the building is underway, according to David Johnson, associate dean of the School of Law.

If the capital development funds are released soon, the building may be completed as early as December 1981. Johnson said. However, Johnson said that date was the "most optimistic projection."

"Personally, I would be satisfied if it were completed by the fall of 1981," Johnson said. "That would allow us to move during the summer," he added.

The school has been quartered in two remodeled dormitories on the west side of the campus since it opened in August 1972.

School of Law Dean Hiram Levar said early in July that the school is in danger of losing its provisional accreditation unless a new building is constructed.

The American Bar Association (ABA) granted the school five-year provisional accreditation in February 1974. But an ABA investigative team inspected the school in April and found that the school did not meet standards necessary for full accreditation. The ABA officials ruled that there was a shortage of classroom, library, and faculty office space.

In addition, the ABA requires all schools to have a courtroom in which to conduct simulated trials. The SIU school does not have a courtroom.

Johnson said, "The lack of a building is the only thing holding up full accreditation."

Levar said, "Once that's completed, we'll get it. Under current plans, the new building would be built north of its present location, on a site now vacant south for tennis courts. Johnson said. According to the preliminary plans, the building would have three stories, with about 100,000 square feet of usable space.

Johnson said the first floor would be used for administrative offices, the school's legal clinic, a student lounge, classrooms, and an auditorium and the courtroom.

Plans call for faculty offices and classrooms on the second floor, with the third floor used primarily for faculty offices, Johnson said.

The library, though, will span the three floors and will require nearly 80 percent of the building's total space, he said. The plans call for the school to move completely out of its present location. Johnson said.

"The whole program will be housed in the new building." Johnson said. He said he didn't know what would happen to the buildings now used by the school.

Johnson said an effort to obtain the funds from the state for construction of the building began three years ago. At that time, he said, a rough architectural design was completed before Gov. Dan Walker vetoed further appropriations for the planning and construction of the building.

"Architects got back to work about a year ago," Johnson said. when another $250,000 was released for the planning of the building.

He said he requested a detailed blueprint of the building to be completed in January of next year. Bids for construction could then be taken in February, he said.

Johnson said the $7.6 million provided for in the bill may not be enough to complete the building.

"We may be talking about more money down the road," he said. Johnson estimated that a total of $10 million may be needed to finish the building and to equip it with furniture, computers, and other items.

According to Johnson, the school is presently turning down a number of qualified students due to a lack of space. Daily Egyptian, August 21, 1978, Page 3
Commentary

Well, how was your summer?

By Nick Sartal

With the start of a new school year, many students will renew their old acquaintances. In order to help these students with their first conversation, returning friends, some alternative answers to certain "stock" questions have been provided. These conversational aids may be used either in male-female, male-all female or female-conversation, or any other possible combination of participants.

It is suggested that these replies be used sparingly-especially in talking with people you hope to have as your friend. Prima donnas: clip this column and save for future reference.

First stock question: How was your break (also phrased, "Did you have a good summer?") or, "What did you do this summer?" or a combination of the three? "A Terrible! All the fish in the lake where we swam died of mercury poisoning. Big Great! I collected unemployment since they don't need people to fix heaters in the summer. C'Fine (used by most every-gone conformists)."

I see you're pretty dark. Where did you get your tan? "A t Woolworth's. Big's not tan. It rained for a month at home and I rusted. C'worked as a lifeguard at the Lee Center."

Have you found a place to live yet? A No, just Wilson Hall. B No. I'm going to commute from Chicago except I'll skip Tuesdays because I have only one class. C'Live? What's that? I see you're lost (or gained) some weight. Did you go on a diet? A Actually I was pregnant last time you saw me. B No, I took drugs. C None of your business. Have you had a face-lift? A Are you going to get a job while school? B No, just student work. B Teen no. I'm going to school so I won't have to work. C It depends on how effective the police force is around here. You told me before, but when did you say you're graduating? A As soon as my dad can bribe the dean. B Sometimes before the turn of the century. D This B. and C. E I told you before, but that was prior to the change of the WP policy."

I'm still trying to find a career. Have you decided what you wanted to do yet? A I was going to be a doctor, but I didn't have the patience (or I was going to be a teacher, but I didn't have the class; or I was going to be a gynecologist, but everyone took me for granite; or I wanted to be a tree surgeon, but I didn't want to go out on a limb, or any other "career" joke that succeeds in making your listener slightly ill). B I can't decide on a career because I have two majors that are direct opposites—Government Projects and Social Welfare. Hopefully, these alternative answers will provide some variety until the middle of the semester when questions such as "Are you going home for winter break?" and "How the semester going?" become the new ice-breakers.

Letters

CSBO members should use voices

Recently, the necessary majority of approximately 846 civil service employees at SIU-C voted to be represented by CSBI-EA. This being my first union experience, it has startled me to note the lack of interest or curiosity on the part of folks been represented. Only about 6 employees attended the first membership meeting.

In preliminary voting on the contract draft, the turn-out was so small that, in my opinion, it could not possibly have been a true reflection of the total membership. The last step of negotiations will be to send the contract out to all voting, dues-paying members for a final vote. This letter is not an attempt to influence votes in either direction, but merely to urge dues-paying members to vote when they are offered that opportunity. Read your contract carefully, decide in your own mind "Yes" or "No" and go out and vote (or, if it is not possible, mail your vote in). Remember, your vote at all is an effective endorsement or "Yes" vote.

Furthermore, when it comes time to call a membership meeting for the purpose of officially electing officers for our union—attend that meeting and vote.

Many people have worked hard to give us this voice. LET'S USE THAT VOICE!

Anna K. Lawrence
Secretary, Library of Living Philosophers

The Jiver is too much, literally

In response to Ms. Rocken's letter in the Aug. 1 D.E. I can only say, "HEAR, HEAR!" Not do the "Jiver" irritating and an insult to my intelligence, I also find him on too much. He has forced me into playing albums in the morning when I get up to avoid his obsteic behavior, and now he has even been given the pleasure of annoying me in the evening. I believe the "Jiver" was literally, to come to Southern Illinois, he moved himself too far down the radio dial, he should have stopped at 101.5, where he belongs. Lyn Kline

Civilization found in deepest Africa

By Arthur Hoppe

The noted Hollywood director Burton Feck is just back from Africa after he bought a new movie entitled "Tarrant's Last Flight."

A donation for authenticity, Feck had hired a number of African experts to help him, as he put it, "capture the spirit of that dark and mysterious continent." As a result, the script was rewritten memorable times. The final version began in the traditional fashion with white hunters. Jack (the good guy) and Don (the bad guy), plunging deep into the jungles of M.bonga in search of the fabled Elephants' Graveyard.

Once by one, their native porters desert them in a cunning display of over swampy river benefits and union jurisdiction. They are also hesitant to venture further as they are members of a secret tribe who are dedicated right-wing Modern Socialists, while up ahead dwell their archenemies, the Jewish Wambutsu, who are not only bloodthirsty Masts but born-again Baptists to boot.

Jack and Randy are now alone except for their loyal tracker, Doctor Jay, who has a Ph.D. in tracking from Yale. In a dramatic scene, Doctor Jay kneels on the floor of a plush lodge at the shrine of 4,000 tigers and swears: "If you found a spoor, Doctor!" demands Basil. Doctor Jay nods. "Real Havana," he says. Sure enough, in the next cleaning a band of ferocious warriors wearing shark's and bears are doing a savage dance called the Cha-Cha-Cha, tied to a stake in their midst is Jane, who is wearing an off-the-shoulder Halston bathing suit.

Jack, posing as a Soviet KGB agent, swags the Cubans an unscat print of Deep Throat for Jane. Jane refuses to lead Jack and Basil to the Elephants' Graveyard. At this moment, M'bonga government has declared it a National Bone Preserve.

Basil thugs Jack and carries Jane off to tortured her into revealing the secret. Fortunately, Tarrant hears her screams for help. Beating his chest, he gives forth the line of cry 'Beware of the snake!" He rushes to the bushes, gulps a vine and is about to haul himself through the treetops when he hears a shout from below.

"Hold it right there, you running dog of capitalist imperialism!" is the dazed native chieftain, Chief Cubano (budd. chieftain of the M'bonga liberation front). "Me, Tarrant," says Tarrant. "You, Marxist-Leninist tools of Soviet Exploitation!"

With that, he courageously flings himself at Chief Gwara's little band of natives.

Needless to say, he is promptly blown out of the sky by one of the tribe's nuclear-rated M-820s laser-guided, tank-mounted, multiple rocket launchers which have a 98.6 percent accuracy mark against all low-flying objects.

In the end, Basil is eaten by a crocodile believed in the pay of the Red Shells. Jack and Randy ends up in a harem in Libya where is shot for trying to organize a Young Republicans Club.

As for Director Feck, he says he will never make a movie in Africa again. "That is for my own amusement," he says, "has gotten too damned civilized."

WIDB: The album station by and for the students

By JoAnn Thompson

Students at SIU have their own thing when it comes to radio—WIDB. It's a commercial, student-owned and operated station.

Located in the basement of Wright Hall in the campus' southeast area off Logan Drive, WIDB can be heard in most SIU dorms, across campus buildings and the bars on "the strip." At the AM campus building, the station has a satellite studio.

WIDB recently became a member of the Illinois Broadcasters Association, a new role, by which the station to join the group.

WIDB, without a donation from student activity fees and revenue from clients, WIDB is working to serve a bigger and better operation for the fall, says John Martin, general manager.

Its most recent plans call for moving the station to the Student Center, where it will be more accessible to students.

"We are students for the students, and we want them to become involved with us," Martin said.

WIDB concentrates on album-oriented rock. 24 hours a day during the fall, spring and summer semesters. According to Mark Siege, programming director, the station's main goal is to provide the students with the best music possible. Ken Lench, the station music director, said "We are constantly updating our record library in order we can play what everyone wants to hear. Half the time we play new releases before the other local radio stations.

In addition to news, weather, and sports each hour, WIDB offers a variety of special programs. "A Jazz Message" is broadcast from 6 p.m. to 7 a.m. each Sunday night. "The King Biscuit Flower Hour" at 8 p.m. features live performances by top artists.

"The Soul Entertainment" is featured Saturday nights starting at 9 p.m. and carries over until 4 a.m. Sunday. Twice a week new releases are featured on "Fresh Tracks," at 8 p.m. on Tuesdays and Thursdays.

"Earth News", a nationally syndicated program can be heard daily at 11 a.m. and 4:30 p.m.

WIDB also runs live one-hour concerts every Friday night.

On Friday nights, students can check out a four-hour broadcast live from a local bar. Prizes are given away to lucky fans.

Since WIDB is totally student run, there are frequent changes in the staff. This keeps the station fresh and hopping with new ideas. Siegel noted, "It's amazing to see how well the station stays together."

And Martin said, "We encourage new students to audition. In fact, auditions will be held the third day of school at the Student Center in Ballroom B."

Any interested in auditioning will be required to reread news copy on tape for some of the staff workers but the talent search doesn't stop there. Because WIDB needs students in an array of different fields.

Special programs set

WSIU celebrates 20th year

By Ned Williams

(Editor's note: The Septemer 25th edition of the University Newsprint will feature a special section containing an article about the Student Center."

The September 25th edition of WSIU FM will mark the 20th anniversary of WSIU FM. The campus radio station has a monthly celebration on the agenda.

Helping to celebrate the station's anniversary will be former and current employees, including 1976 "WSIU Radio" graduate, Walter Crane. WIDE's team of special programs will be featured starting on Saturday, September 9.

WSIU FM, a 39-station network, will have its celebration in the 91.9 on the FM dial. Also, a new live-reader program of music will feature music from artists in specific communities in Southern Illinois and surrounding states, which will be broadcast from the Disouit campus. Music compositions will be made with the assistance of local musicians. The program is supported by the Illinois Department of Children and Youth Services.

The first executive of the station to be formally declared as "WSIU Radio" is Richard S. Wiese, the station's current managing editor.

"Basically, we're airing historic events that take place during the 20 years WSIU has been on air, or that will be happening in the near future," Sibley said.

The station will feature programs such as the "History of American Theater," "Great Women in History" and "The History of Illinois," followed by a presentation on the events held on the campus of the University of Illinois.

MEDICARE ANNIVERSARY

WASHINGTON, D.C. — Medicare—the health insurance program for the elderly and disabled—observed its 20th anniversary in 1978.

The program was started in July 1968.
Continuing Education zeroes in on large groups, new programs

By Alton Porter
Number Special Editor

The Division of Continuing Education will branch off into a "new and exciting" program this fall in an effort to develop a "continued education center" in Rockford.

"It's a new direction to generate and hold interest in a wide variety of classes," said Robert R. Ratcliffe, division director.

The test of the big meeting in the Rockford area was the three-day conference of 3,000 American Business Executives on May 27, in June 1979. Persons from all parts of the country came to Rockford to take part in the group's biennial conference.

"That's a good thing for the University and the Rockford community," the dean said. "The meeting will make maximum use of University housing, conference rooms and transportation facilities and recreation facilities at the time when they would otherwise be closed out for the group's biennial conference.

"We division personnel view ourselves as a bridge between the traditional university and the people of the community," Ratcliffe said. "We want to reach both for the benefit of all.

In other areas, the division is beginning to develop new programs to provide courses to off-campus people. Those who do not live near a university have full-time jobs, a family to support or other obligations that prevent them from attending school.

"To take more courses on the campus or in the community," Ratcliffe said. "We want to create more off-campus degree programs to expand the number of people who can fit into the program in a small amount of time.

The division presently offers degree programs to persons at six different locations in all parts of the United States and plans to offer more programs to people at more locations, according to Ratcliffe. He said the program "will continue to grow dramatically. It was up 60 percent in 1977 over the previous year.

Some 15,128 persons earned a total of 32,036 credit hours through the program last year. They took courses in agriculture, business and administration, education, fine arts, humanities, social sciences and other fields.

The off-campus credit activities include three separate locations at 38 bases in 18 states, programs for prison students offered at Illinois State and science program at Graylake, agriculture programs at Southern Illinois University and programs offered at sites in Springfield and at various other locations as well.

"At the present time, we offer more of off-campus credit courses than any other university in the state of Illinois," Ratcliffe said. "We've already reached our goal in that sense.

"Our off-campus credit program presently consists of faculty-taught courses," Ratcliffe said. "These are not correspondence courses. They are courses taught by SIU faculty who travel to the off-campus locations to deliver instruction and services.

Plans for the upcoming year are to look into the possibility of offering some correspondence courses and to expand the offerings to other locations.

Several other new programs are under consideration as well. These include the Airplane Propulsion program, the Pre-Med program and the Pre-Nursing program.

Robert R. Ratcliffe
Division Director

One-time vaudeville house a cultural, civic center

By Nadia Bethem

While SIU wants multiple cultural performances, especially in a civic center, there are various building plans in place. One idea is to renovate the Masonic Temple into a theater. But instead of being a theater, it could potentially be a cultural space for events and performances. The building could host lectures, concerts, and other cultural events. It could also be used as a community center for workshops and gatherings. The proposal includes a renovation plan that would transform the current structure into a multifunctional space, creating a hub for the community. The design concept aims to restore the historic charm of the building while integrating modern amenities. The goal is to create a welcoming environment where people can come together for various cultural and social activities. The project is expected to enhance the cultural fabric of the community and provide a new venue for artistic expression.
Campus head count unlikely to change

By Nancya Dramg
and Dave Kemp
Staff Writers

Weekend crowds on the strip, long lines at Wool Hall, busy courts at the Recreation Building and lots of Friday traffic all seem to say the same thing. S.U.'s student body is as strong as ever, if not stronger, as it can comfortably handle.

Although official figures for fall 1972 enrollment are not available, University officials expect the enrollment of fall 1972 to equal that of fall 1971, with only a slight decrease if any.

The fall 1973 enrollment outlook doesn't indicate a heavier influx of students than fall, according to Jerry Pfaff, associate director of admissions.

Last fall's enrollment of 22,587 was the highest in seven years and the second highest in the history of the Carbondale campus.

Enrollment at S.U. peaked in fall 1970 with 23,940 students.

From 1970 to 1973, enrollment dipped slightly before climbing again for three years.

A comparison of current enrollment figures and those of the early 1960s indicates that S.U. has experienced a fairly rapid growth in enrollments.

In the fall of 1960, the University had only 7,262 students.

That trend of increasing enrollment has made it necessary for the University to limit new-freshman enrollment for the third year in a row. Last fall, the cutoff date was Aug. 1; this fall, enrollment was curtailed on July 17.

Pfaff cites small classes as the reason for the enrollment limitations.

"We just don't have enough space, resources and facilities to accommodate more students," Pfaff said.

Last fall's on-campus enrollment was 21,114, compared to a total of 1,293 students at off-campus locations like military bases. In-state students totaled 21,728 and out-of-state students totaled 2,382.

A steady enrollment trend is expected this fall, according to Pfaff.

Pfaff said that fall's enrollment is expected to be approximately 21,600, but Kerby Browning, director of admissions and records, has predicted a slight decrease in enrollment.

"New transfer students enrollment is expected to be down approximately by 100,? Browning said in mid-July, "although we have received 1,600 applications thus far and at this time last year, we had only 1,547 applications.

Admission of transfer students decreased this year because of a larger than-average number of in-academic applications from students who applied but were not accepted.

Browning explained.

The fall 1973 cutoff date, for new freshman enrollment, is expected to be from 1 to 20 in-state students and from 51 to 52 out-of-state students.

Pfaff said that first-year students are accepted through the University's Direct Admissions Program, which admits undecided students, received the largest number of students. By the end of the summer semester, admissions had increased by about 1,500 students.

University unit last fall, has never experienced a trend of steady growth that will likely continue this fall, Pfaff said.

Spring enrollment is usually less than fall, and the decrease is generally evenly distributed among all academic areas, he added.

Enrollment for spring 1973 showed a slight increase of 27 students compared to last year, whereas enrollment for this summer showed a drop of 122 students, marking the third consecutive summer that enrollment has declined.

Browning said that national data indicate an anticipated gradual decline in college enrollment in the near future. Some schools in the state have already begun to experience decreases in enrollment. However, at S.U., no serious symptoms of downward enrollment have been detected.

"Nationally, data show that the number of students eligible to enter college is going to decrease, but enrollment at S.U. has increased instead," Browning noted.

'Real' dishes up unique music

By Nick Sartell
Staff Writer

The band Real to Real offers an alternative to the steady diet of hard rock found at most of the frequent Carbondale music establishments.

The type of music the four-member group plays can best be termed as "folk-rock, blues, and rock and roll," according to Darryl Phinnesssee, one of three vocalists in the group.

"Many of the songs we play fall into between those categories, many others certainly can be placed into one particular style. Either way, we try to play music that both our audience and ourselves enjoy," Phinnessse said. Songs made popular by Average White Band, Steely Dan, and Earth, Wind and Fire are some of the more recognizable numbers in the group's repertoire.

Hearing nine people in a band could lead to problems due to conflicting creative ideas the musicians might have, but in this case a larger group is more than a handicap, Phinnessse said.

"With that many people in a group, we get a greater number of ideas on how we want to arrange a song. But believe it or not, most of the time we all have the same musical ideas. That's one reason for our success," Phinnessse said.

The group's size also enhances its performance because of the variety aspect. Phinnessse said. "With nine people in the band, we can put out more of a studio sound, catering to everyone who has ever wanted to play in recorded versions of songs. Phinnessse said "The way things are done in on record today, a three-to-five group can have trouble reproducing the sounds made popular by a group of the same size."

The band has had anywhere from nine to 11 members since it was formed in August of 1976. Phinnessse, Donald Gamer (vocals), Keith Huffman (trumpet), and Ivan "Lump" Shurett (electric bass) have been in Real to Real since it was first formed.

Becky Gehr (vocals and keyboards), Eire Jensen (drums), Mike Ridgeway (trumpet), Rob Stover (guitar) and John Walfarth (guitar) also are in Real to Real.

The blend of vocalists, trumpeters and rhythm players at one of Real to Real's biggest assets. It is hard to single out any individual musician as being outstanding because even though all the musicians are talented, they depend on each other in order to perform some of the complex rhythms and harmonies.

Geologists track down poisons from spoilbanks

By University News Service

Real to stream beds near coal mine spoilbanks in a six-county belt across Southern Illinois contain above-normal amounts of potentially poisonous minerals such as cadmium and cobalt, according to preliminary results of a survey conducted by SIU geologists.

However, geologists William Hood and Paul Robinson emphasize that although they found more of the heavy metals in their stream bed sediments than expected, the level of all the metals found are well below toxic levels.

"With that many people in a group, we we get a greater number of ideas on how we want to arrange a song. But believe it or not, most of the time we all have the same musical ideas. That's one reason for our success," Phinnessse said.

Business of music gives students new alternative

By Nick Natali

Staff photographer

Students interested in music as a career have always had definite choices—either perform or teach. But now there’s another alternative. SIU offers a bachelor of music degree with emphasis in music business, says Nick Keogradus, assistant professor of music and head of the program. "By the time we have something ready to complete the curriculum, we hope to have arranged internships similar to those in other parts of the country. All of the people we’ve talked to seem very interested in Keogradus as an identification for the curriculum can contact Keogradus at the above.

About 40 students are enrolled in the program, since the degree was first offered in the fall of 1977, most of the people in the program are music performance or music education majors.

"Music Merchandising," a two-course sequence, was created especially for the program. The purpose of the courses is to coordinate instruction in the School of Music and the School of Business. Each course is worth three semester hours.

"Although it was created for them, students in music merchandising aren’t the only ones taking the classes," said Keogradus. "Since the courses cover copyright laws and the publishing side, we have had people ranging from pre-law to radio-television majors."

Recup Center and library resume regular hours

Morris Library and the Student Recreation Center will be resuming their regular operating hours for fall semester.

Morris Library will be open from 7:45 a.m. until midnight on Monday through Thursday. The library will be open on Fridays from 7:45 a.m. until 10 p.m. Saturday hours will be 8 a.m. to 6 p.m. and Sunday hours will be 2 p.m. to midnight.

The general building hours for the Recreation Center will be 7:30 a.m. to 11 p.m. Monday through Friday, and 8:30 a.m. to 11 p.m. on Saturdays and Sundays.

The gymnasium, martial arts center and swimming pool will open Monday through Friday from 2 p.m. to 7:30 p.m. The pool will close at 9:30 p.m. nightly.

Continuing ed sets sights on new programs

(Continued from Page 6)

The Normal students and faculty who make up the faculty and administration at the University of Illinois at Normal, Ill., want to serve more people. They are offering a variety of programs that are designed to meet the needs of the community.

"We have a wide range of credit programs available in the college," said Jeanne Burt, coordinator of the continuing education programs. "The credit-free courses are designed to help adults who are looking for a change in their lives or who want to learn new skills. We offer classes in a variety of subjects, including art, music, and business.

"We also have non-credit programs that are open to anyone who wants to learn something new. These programs include classes in horticulture, cooking, and computer skills.

"The goal of our programs is to make learning accessible and enjoyable for everyone. We are committed to providing high-quality education to the people of our community, and we are excited about the opportunities we have to serve more people."

SGAC committees have positions open

By Bill Thrash Press W1rter

The Student Government Activities Council (SGAC) is on the lookout for students who have ideas and would like to show them. SGAC Chairmen Tom Cress and anyone interested in working with SGAC should see him in his office on the second floor of the Student Center.

The SGAC consists of 10 committees which plan up to 5,000 programs a year. The programs are funded by the student activities fees. Cress said all committees need new members.

"We are looking for people who are dependable, who like responsibility and who can carry a job out from start to finish," he said.

The Film Committee schedules top-rate features which are shown "Thursday through Sundays." Chairman Alan Thacker said the film committee will also show student films, classic-drama films and foreign films.

The Cultural Affairs Committee is involved with everything from photography to dance and drama. Established in 1971, the group is responsible for all SGAC displays. Cultural Affairs, sometimes known as the Performing Arts Committee, will sponsor arts and crafts sales that year and arrange an art gallery in the Student Center. Cultural Affairs is also planning a "big-time" art auction. According to Cress, this will be for serious buyers and by invitation only.

Students who want to get involved with Cultural Affairs can contact Chairman Marc Parker.

The Free School Committee is in charge of providing special interest programs ranging from bowling to karate. The Free School is open to all students and Chairman Mike Leifer advises students to watch the calendar for programs to be offered. According to Cress, the Video Center is one of the best in the country. Video shows a variety of films in the Video Lounge on the fourth floor of the Student Center. Students may request special lectures and performances by theater groups for free showings. The chairman of the Video Committee is Guy Leblanc.

Student Center Programming is responsible for scheduling all student-oriented events to come into the Student Center during the week that will take place during the up-to-date student week. The chairman of Student Center Programming is Greg Johnson.

The Travel Committee, chaired by Nta Reid, provides recreational activities for students on and off campus. The committee plans a European ski trip this year with three other universities. It also plans to hold the annual overseas tour in January and a trip to the Padre Islands in Texas. The Travel Committee will also organize career trips and trips to St Louis for baseball and hockey games.

Course offered in Vietnamese

"Elementary Vietnamese," Linguistics 210, is being offered as a five-credit course that will be taught during fall and spring semesters, the Language Department has announced.

No language background is required for this exotic language which comprises four contact hours and work in the language lab daily. Vietnamese has been taught at SIUC since the fall of 1969, both during the academic year and in summer sessions, together with Lao and Cambodian, for four consecutive years.

"We are led after Lao or Khmer (Cambodian) because of lack of funding," Dr. Ha Nguyen, director of the Center for Vietnamese Studies, explained.

The Department of Linguistics administers the Vietnamese courses as part of its program in non-European languages.

Students who wish to take the beginning course can call Professor Nguyen, 535-2385, for details about the schedule and the teaching material.

Con and students should "save their books and get away from their books for some traveling this year." The Performing Arts Committee works at bringing a variety of current artists to SIU. Last year they brought Chicago folk singer Bonnie Raitt and the Mississippi awareness, the unique mime theater group. Chairman Pete Reindeer said they have already scheduled a concert featuring jazz-rock drummer Billy Cobham for Oct. 23.

The Lecture Committee is in charge of bringing educational speakers to SIU. Chairman Tom Trelledge said last year they arranged the speaking engagements of Dr. Jean-Michael Coureau, internationally renowned psychic David Hoy.

The Orientation Committee is designed to inform, educate and provide programs for new students. According to Cress, the committee helps new students make the transition from outside the University to inside. Last semester the Orientation Committee's special program called "Summer Preview" helped about 1,500 new students become familiar with SIU. They are also planning Parents' Day on Oct. 14.

The Cinema Committee is in charge of communication and all campus organizations that want to screen films and hold "Homecoming" activities. This year's "Homecoming" is "The Road" by John Ford. The day will be the football game between the Sabanas and Northern Illinois University.

Math professor named Brandt’s full-time intern

By University News Service
Richard S. Millman, 37-year-old associate professor of mathematics, has been appointed by President Warren B. Brandt to be his assistant for the next year as a full-time intern.

He replaces Junote L. Thorpe, professor of physical education, who has served in the capacity for the past year on a half-time basis.

"I feel Dr. Millman can bring an important faculty presence to our staff discussions and can benefit from the experience," Brandt said of the appointment.

Millman, born in Boston and raised in White Plains, N.Y., was graduated from the Massachusetts Institute of Technology in 1966 and earned his master’s and Ph.D. degrees from Cornell University. He joined the GTE team in 1971 after teaching a year at Eastern N.Y. College.

Millman and department colleague George F. Parker are the authors of two mathematics texts, "Elements of Differential Geometry" and "Calculus: A Practical Introduction." He also has written some 20 articles.

Millman was a visiting scholar at MIT in 1976-77 and a member of MIT’s Educational Council.

He recently was married to Ann K. Miller, a visiting assistant professor of mathematics at SIU-C.

Calling home?

The telephone has become a social weapon these days — a life-line with the rest of the world outside the dormitories. Whether you call long distance to place a personal support or call across campus to make an appointment, it makes it all a bit easier.

GTE Telephone has served the Carbondale area since 1926. In its effort to serve the community, it has recently increased the number of students playing in Carbondale by offering them a discount on their dormitories. Gene Tel offers a

'Nothing' still has a cost as utilities post charges

What’s the cost of nothing? Public utilities post charges, too.

In Carbondale, as in almost every city in the state, there is a standard monthly charge for utilities even if nothing is consumed. Danon Austin, secretary at the Carbondale Water and Sewage Department, explained that custo-

meters are charged for a minimum of 100 gallons of water a day whether they use it or not.

The monthly billing would show a charge of $3.13 for the consumption of water, or $3.13. Also included in the monthly water bill is a standard charge of $1.50 for sewage service and $3.50 for curb-side trash service.

Austin said every residence is required to be served for sewage and garbage disposal by the City's sanitation ordinance.

Fred Davis, a representative from the Carbondale Central Illinois Public Service (CIPS) office, said electric utility patrons receive a minimum monthly charge of $13 if no electricity is used.

"If the residents are gone for a long period of time, some type of electricity is normally left on, either a light for safety or some amount of heat for preservation of the residence," Davis said.

General Telephone charges $8 to $10 for a phone that is not payed for each month. This charge allows the resident an unlimited number of

Harry D. Wirth, former bureau administrator in the Illinois Department of Conservation, is the new director of that state's conservation department. He was named acting executive director of the department's bureau of planning and development in November.

Wirth was manager of the SIUC campus mail service from 1979 to 1977 and in successive years was manager of the travel service and supervisor of auxiliary and service enterprises. He headed service operations of the unit after it was renamed in 1977, then served four months as assistant to the director of service enterprises before he joined Kenney's staff in Springfield.

Wirth was graduated from the University of Illinois in 1968 with a bachelor's degree in political science. He was an assistant principal at St. Patrick's School in Danville before being called to active duty at the U.S. Air Force in 1968.

Role of internships topic of Yugoslavia-SIU talks

By University News Service

Faculty members from SIUC and the University of Ljubljana in Yugoslavia will meet together during the upcoming academic year to discuss the role of internships in higher education, business and industry.

Two seminars involving teachers as well as selected American and Yugoslav business executives have been scheduled, according to Theodore Bilas, associate professor of vocational education studies.

The first seminar is planned for late October or November at Lake Bled in Slovenia, Yugoslavia. The second will be held at SIUC next spring, Bilas said.

The Yugoslav-American Fulbright Commission will sponsor the sessions, according to Bilas.

"The role of internships and other forms of work practice in a topic which has generated considerable interest and heated debate both in the United States and Yugoslavia," he said.

"The seminar at Lake Bled will involve about five or six SIUC faculty members from various disciplines, as well as one or two American industrial and governmental representatives. A like number of Yugoslav participants will come to SIUC for the second seminar," he said.

"The site of the first seminar, Slovenia, is, in many respects, the most technologically advanced of the six Yugoslav republics," Bilas said.

Bilas has been doing rural development research in Yugoslavia for more than two years. He has also studied and lectured there under grants from the Fulbright Commission.

Map, compass, forests, fields—
that's the stuff of orienteering

By Kevin Straub
Student Writer

A map, a compass and an unmarked course are the
ingredients for the sport of orienteering which is growing
in appeal in Southern Illinois. Participants equipped only
with a map and compass must hike through forests and fields
to find a series of check points. The person who
completes a course in the least time can find these points and come to the end of
the course. "Orienteering blends both
physical capabilities and strategy at an
almost 50-50 level and that is what makes it so interesting," said Kenneth
Ackerman, assistant professor in physical education.

SIU offers a 10-week course in orienteering. Credit
is awarded as a liberal arts elective.

The club elects a president,
governs and operates itself. We act
only as advisors," Ackerman

However, in competition, the SIU
orientering club has three
members, Pat Dunlake, Susan
Ackerman and James Hetta,

"The club usually has at least
one intramural meet during the
year, usually in November. "We
usually mark off areas, and
there's more standard fare
for credit, is a course in orienteering." Ackerman
said. "We welcome anybody and
they do not necessarily have to be
competitive.

The death of man. But God
... explained that many people
involved in orienteering are not
necessarily in it to compete. There
are even non-competitive meets
where the competitors are simply
there to enjoy the outdoors and
there are usually two or three
points as they

EVENING ADULT CLASSES

by: Saturday Night Fever

By University News Service
They just posted the fall semester
schedule of evening adult classes
and it looks like a severe case of
Saturday Night Fever. With over
30 classes on the fall, 10 are
classes in disco dancing.
Dance classes are offered, disco
dancing for teenagers and disco
dancing for seniors.

One of the classes meet on
Saturdays, however. Also listed are
classes in tap dancing, guitar-
playing, modern dance, square
dancing and piano. There's even a
class in weight loss—
to rhythm.

For those who don't care to go out,
there's is also a standard fare
for credit, is a course in orienteering. Ackerman
said. "We welcome anybody and
they do not necessarily have to be
competitive.

The club elects a president,
governs and operates itself. We act
only as advisors," Ackerman

Giles quits Saluki basketball team

By Gary Crisler
Sports Writer

Chris Giles will not return to play for the Saluki basketball team this year.

Giles, who was an integral part of the Saluki team as a freshman last year, plans to return this fall and hopes to play this year.

The native of Akron, Ohio, attended Florida State High School where he received his bachelor's degree in 1978. His basketball career was ended after suffering a knee injury in his senior year.

Giles also completed 50 semesters and maintained a 3.0 grade point average. He averaged 7.1 points a game. His high game was the first game of the Missouri Valley Conference tournament against Drake when he scored 18 points.

Saluki basketball Coach Joe Gottfried completed his coaching staff recently with Chris Giles. He was named part-time assistant coach.

Gottfried also announced that he would put together a junior varsity team this season.

Ruggers gear for 'fun-loving,' season

By Lee Ann Market
Sports Writer

Members of the SIU Rugby Club intend on living up to their reputation as hard players and hard partiers during the 1978-79 seasons.

The Rugby Club will be just as rowdy and fun-loving as it has been in past years, according to coach Sid Johnson, a former assistant police officer and part-time janitor. "We play because we want to play. We like meeting the opposing team and partying after the games," Johnson said.

He expects a successful season as well.

"We have a good chance of winning the intercollegiate tour-

ament. The team is a talent in every distributed and we have many strong players," Johnson said.

There will be a couple of star returners from last year, veterans of SIU rugby. Dan Conway, several years ago, is one of those. "His playing position is strong and he has done a good job of finding the game," said Conway.

The rugby season, according to Conway, will be John Kuma. "John is an excellent back-up player and we plan on putting his skills to the best of our ability," Conway said.

Johnson and Conlan are the stars on the rugby schedule are Eastern Illinois, University of Illinois, Illinois State, Fort Campbell, Western Illinois, St. Louis University, and the Evansville All-Americans.

The rugby win-loss record for last year was 7-4 in the fall and 5-1 in the spring. The team played September and October during the fall and March and April during the spring.

SIU has a good reputation among the opposing teams, according to Conway. "We are known for being a strong team," he said.

"The team has been a game of winning, kicking and running at a fast pace. The halftime is 15 minutes and each half consists of 40 minutes.

Rugby can be hard work, but a strong and good friends are the benefits that make it worth it, according to Johnson.

The team tends to be real close because we play and travel together, sometimes right on straight weekends during the season, he said.

Boxers eye coming year

by Nick Beralt
Staff Writer

The SIU Boxing Club will try to continue last year's successes, according to Jimmy Clark, co-captain of the 40-member club.

The club has quadrupled its membership since it was formed last fall. Lynn said he expects to see more members join in when school starts.

"We hope to continue to increase our membership, and especially hope to get more people who just want to know how to box," said Lynn, a senior-year student.

"We had hoped to get the ball rolling earlier with a few matches at Murray's; we ran into some trouble with licensing," said Lynn. "So we are just getting started," he said.

"Good boxing," said Lynn.

"Skill and fitness" are something that is learned, not God-given, he continued. "You have to put in the work and have the determination to become a good boxer."

"We usually pay for much of our expenses ourselves or through club dues," Lynn said. "Since we are just a club and not a University-sponsored team, we get little money except our own." SIU reimburses club money for travel, hotel, and meal expenses.

Miller and Clark could have a shot at taking the spring tournament. "Mike Clark was named most improved boxer at the Missouri Valley Conference," Miller said. "We are excited to see what we can do this year." Clark said.

"We are looking forward to the upcoming season," said Clark. "We are just having fun and enjoying the game, and we plan on winning." Clark said.

As a group, the club warms up by paging more than two miles. After their routines, the boxers do stretches before putting on their gloves and leaving the gym.

"We try to help each other out as much as we can," said Jeff Roundhill, a senior in pre-med. "It helps having a partner and will build confidence in our members."

"I think our club gives us a chance to compete," said Clark. "I think our club gives us a chance to compete in more tournaments, but didn't because of money problems.

""We usually pay for much of our expenses ourselves or through club dues," Lynn said. "Since we are just a club and not a University-sponsored team, we get little money except our own." SIU reimburses club money for travel, hotel, and meal expenses.

SIU women look for top gym finish

By Bill Threlfall

The SIU women's gymnastics team could finish on top this year after two disappointing finishes.

Over the last two seasons, the gymnastics team has never finished below fourth place in the Association of Intercollegiate Athletes. The team won in 1981 by 4.58 points. In 1980, the team finished third, but this year, the team has yet to finish in the top three.

The team members and coaches are looking to get back to where they were in recent competitions this year, according to coach Herb Vogel, women's sports information director.

Coach and gymnastics coach Herb Vogel is "nationally renowned, a leader in collegiate athletics."

Coach Vogel has an overall record of 26-26 at SIU. This year he will have three returning All-Americans on the squad: Linda Nettson, senior from Louisville; Cindy Moran, junior; and Doris Jones, senior from Louisville.

Coach Vogel has an overall record of 50-15 at SIU. This year he will have three returning All-Americans on the squad: Linda Nettson, senior from Louisville, Cindy Moran, junior; and Doris Jones, senior from Louisville.

Carroll, team captain, achieved All-American status at the All-American Championships in Seattle last spring when she successfully completed two high-risk double somersaults to earn a score of 9.2 on a scale of 10. All-American status is achieved by earning a score of 9.0 or better.

Even with all that talent, a resurgence of the women's gymnastics team will be an easy task because, according to coach Vogel, "SIU has the best schedule in the league, year in and year out."

The 78-79 schedule puts the gymnastics team against defending champions Penn State and the University of Illinois at the Chicago Circle Campus. Of the 10, SIU barely edged in last year's Midwest regionals.

Soccer club spurs student interest

By George Hunt

Student Writer

American students are beginning to show interest and are participating with the international students at the SIU Soccer Club. Last year, over half of the team's first starters, and one percent of the club's 120 members were Americans.

Jane Torn, secretary for the club, said that when the club was started in 1979, 98 percent of the members were international students. Now, 12 percent of the members are Americans, and 88 percent are international students.

The club currently has 12 members and one president. The club meets weekly and is run by the president and president-elect.

The soccer club began in 1985 when a group of students who were then international students advised friends to join the club as a way to make friends and learn the language.

The constitution states that the soccer club's three main objectives are to stimulate campus interest in the internationally popular sport of soccer, to promote the positive image of being a soccer student, and to encourage and promote exchange of ideas among students.

The game that gave rise to club members as soccer team was in 1980 against St. Louis U., the NCAA conference champs. The game against St. Louis U. took place in Carbondale.

Today's soccer world has changed, and soccer has become a more popular sport.

The club plans to continue growing and is looking for more members to join."
Rent a mini kool

549-0234

One Semester - $25.00  
Two Semesters - $38.00
A $10.00 Refundable Deposit is also required.

A SERVICE OF: MI-KO / P.O. Box 2221 / Carbondale, Illinois 62901

You can keep a complete supply of snacks and refreshments - including milk, fresh fruits and other perishables - right in your dormitory room with a Mini-Kool refrigerator. And the convenience of a Mini-Kool can be yours for just pennies a day.

- Compact - dimensions are only 20 x 17 x 18
- Spacious - Two cubic-feet capacity, holds up to 36 cans of cold drinks.
- Handsome - Walnut trim styling.
- Versatile - Makes ice cubes, doubles as an end table.

Ex-Saluki Herrera feels he's finally getting his shot

By George Cotsak
Sports Editor

It almost seemed ironic. There had been no real change in the building pressure on the artificial turf football field of the St. Louis Cardinals training camp at Lindenwood College in St. Charles to a familiar No. 28.

Familiar in the sense of the tail, running back, once dashed back and forth for the St. Louis Cardinals and dazzled the fans with his quick moves and elusive dancing for the Saluki football and coach Ray Dempsey.

And he wore No. 28.

Andre Herrera was getting another shot at the big time. It was his fourth professional team in a year. And he was still waiting for his fair chance. His big moment.

And it looks as though the native of Bronx, N.Y., just might get it.

A few days before the Kansas City Chiefs, who drafted Herrera in the sixth round in 1977, the Toronto Argonauts of the Canadian Football League (CFL) and the awesome Oakland Raiders, Herrera was raising the eyebrows of Cardinal coaches and administrators.

The Big Red plucked Herrera after the Raiders had released him following a few weeks of training and preparation for the exhibition season. But he wasn't released because John Madden and Al Davis weren't impressed with the flashy running back's performance.

They just informed him that he wasn't needed.

"John Madden told me that I wasn't going to compete for a job," Herrera said following a morning workout last week. "So I went out and waited for a phone call.

"I ran some running back, but they refused to let me play on the team," Herrera said as he took off his jersey and sat on the steps of the locker room. "The people there kept telling me that I was doing so well and that I looked good, but they kept telling me that I didn't fit in.

"When I asked Madden why, he didn't give me an answer. So I asked them to release me and they did.

That was my first love. That was my first love. I was out in the cold again and he was very depressed.

"So when I was on the waiver lists, the Cardinals wasted no time in grabbing him. And the Big Red are obviously impressed with his many talents.

"I feel impressed, in fact, that they had him running back kicks on special teams and playing in the tailback spot in the Cards' 36-4 victory over the Chicago Bears two weeks ago. He almost broke a 70-yard return for a touchdown and also pounced out four and five yards a carry to remind the Cardinal brass of the explosive offensive weapon whom they let get away, Terry Meisel.

"The Cards have seven running backs in camp and they plan to keep six. And it's not just a matter of the former Saluki, but another free agent, Greg Woods of Kentucky will battle for the remaining spot.

Despite all of the disappointments Herrera has encountered in his brief professional career, he is optimistic about his chances of sticking with the team.

"I feel I have a real good shot," the 6-2, 200-pounder said. Then he looked up at Larry Wilson, director of player personnel, walked up the steps.

"Hello Mr. Wilson," he said. Wilson looked at him, smiled and stopped.

"You're a lot of fun," Wilson asked. Andre smiled and said he was doing all right and the former Cardinal safety and running back kicked on special teams.

"You're a lot of fun," Wilson said. "I'm just really grateful that the Cardinals are giving me a fair shot. I know I can play in this league."

There was a touch of desperation in his voice. Herrera said that he had been learning plays every day and is "trying to fit in" wherever he can. And he has been pleasing Big Red Coach Bud Wilkinson and his staff.

He has been through various plays with the seasoned veterans in the probe degree and humid conditions, he was constantly being encouraged by the assistant coaches.

Herrera looked like he felt right in. And he seemed to give that extra little bit on every play despite the hot, humid conditions. Two-day practices combined with the intense heat on the artificial surface would make any man miserable, but Herrera didn't even seem annoyed.

"Sure it's hot out there and I'm glad that the two days are almost over," he said, "but I look forward to practice. Man, when I get out there, that means they can get another look at me."

His spirit had changed dramatically from the time the former Saluki let him go. Yes, as if he had been given a new lease on life, Herrera said he talked to Demsey about his situation after being released and the Saluki mentor reassured him that he should not give up.

"I wonder if I still wanted to play," Herrera said as he took off his helmet. "I think I was still felt like I could play, but I just didn't know. Coach Dempsey helped me out a lot. He talked to me and helped me get my mind back.

"During his days in the light. As a Saluki, Herrera rewrote most of the SIN rushing records. Not bad for a guy who was cut off high school ball. His best year was in 1978, when, as a senior, Herrera romped for an SEC-record 1,318 yards—second in the nation only to a fellow by the name of Tony Dorsett, new star with the Dallas Cowboys.

Herrera ran behind the savage blocking of fullback Lawrence Boyd and piled up yards on the Bears' lines in Homecoming of that year to lead his team and Dempsey to a 1-4 season. He scored six touchdowns that day and set an NCAA record of 274 yards rushing in the most ballgame.

But the pros are a whole different ballgame, he explained.

"You can't compare it with college ball," he said. "You don't do as much hitting in the pros during workouts as you do in college. My game is a lot better on the field. And you're getting paid to play football.

Herrera said that he still thinks a lot about the possibility of getting cut again, but that is out of his control. He just has to take it as it comes.

"It makes him work harder each day," Herrera said. And the Cardinals continue to see their heads in respect for the hard work he is putting out. But in football, it is a game of numbers—roster cuts. A major cut in the Big Red camp will trim the roster down to 30 players Monday. That means 10 players will have to be cut.

But in watching the workouts and the many practice situations, he proved to be invaluable to the team. Visions of a more professional Herrera running toward the stars are not hard to tell, but Herrera certainly has the potential and confidence, he feels.

Cards cut Dan Brown

Trying to make the grade in professional football, Dan Brown is the free agent. Just ask former Saluki linebacker and captain Dan Brown.

The four-year starter from Webber College last week was cut by the St. Louis Cardinals last week after the team had signed him to a contract.

Brown had competition from a number of other players, who figure prominently in Big Red Coach Bud Wilkinson's 9-4 defense this season.

Saluki gridders sweat it out

By George Cotsak
Sports Editor

The Saluki football team began practicing Aug. 11 with 106 prospects from training camp and preparations for an upcoming season.

The first three days consisted of physical examinations, equipment checkouts and "eating in the weight room. Practices started on an early Monday at 5 p.m. and Friday, the boy and the girl, athletes and computer, drills with full gear started Thursday.

Saluki Head Coach Ray Dempsey, entering his third season at StU since coming from the Detroit Lions staff, cut the squad through two two-and-a-half hour practices daily at 5 a.m. and 5 p.m.

The two boys will end Monday StU opens the season Sept. 9 at Drake.

Dempsey said that he worked the players hard on conditioning, agility drills and worked in "scrimmage."

"We were out in the rain and the players were fit in with the returning players," the coach also looked at prospects for the Saluki kicking game and passing game. StU lost Steve McK, the regular punter last year, Reggie Evans, who was StU's No. 1 quarterback in the spring, quit the team two weeks ago leaving seniors John Cernak and Gerald Carr and freshmen Ken Brown and Art Williams in the fold.

Dempsey, who had a fine recruiting year, considers the "new kids" to be the group of fellows he recruited into the program.

A Decatur native of more than 30 years of coaching at the high school, college and professional levels, goes out a limp when he says that more than 35 recruits who will be immediate help. While rating untested talent, as is any college mathematics can shed light on the reasons for Dempsey's keen interest.

For example, three of the freshman twelve running backs (John, 6-3, 215 pounds, James Cooper, 6-0, 210 and Glenn Marvin, 6-3, 220), are big as or we all know we can be much better than those backs at the close of spring drills.

They will face the offensive line an area that is Dempsey's main source of worry for the second straight year. Averaging 6-4, 250 pounds, two inches taller and six pounds heavier than their SEC counterparts, however, the freshmen aren't the only ones excited about the coming campaign. They also expect to greet 36 of 42 returning players for an 11-1 season's team.

The team held its first scrimmage Saturday and Dempsey said that it should take only a few days for the first string to "get back in tune. The experience is a big plus for us because we will be able to have a good look at the younger players. We know what the veterans can do, so as soon as they're not on the field, we can put some of the younger there. We want to be safe—we want to be sure of the starting lineup ready to go against Drake.

"We didn't like what happened to us last year," says the coach, who won a 1977 season that saw StU fall to 3-4 and tie Drake for last place in the Valley Conference football season. "It was all of our minds in the wrong place. We are a team. We are going to surprise some people."
Southern Life and Times

Students, and even the faculty, may not be aware of them and the vital work they do—but there are about 1,500 of them working, behind the scenes mostly—al keeping the University functioning. They're the civil service employees, who man about 30 different jobs on the campus. Felicia Dolez (above) has been serving the University for 35 years. A story about her and her work, and about another long-time member of the civil service corps, Lowell Cudiff, is on Page 2.
Civil servants have helped SIU grow

By Mark Peterson
Staff Writer

The perspective that Fidelia Doolin and Lenvell Cundiff have of life in this university community is one that only years of working and living in it can provide.

Combined they have served Southern Illinois University for 60 years.

Doolin began her career in General Accounting when she was a freshman here in October of 1943. Since that time, she has progressed from clerk-custodian to adjutant of the systems services. She also witnessed the changes SIU has undergone since the days when it was a small, teachers college.

Fidelia misses the one-to-one relationships she had with everyone when she was a student here, but says it's possible to get to know a lot of people at a big school—"it's just in a more defined area."

"You know its funny," she says, "but at university gatherings you'll meet someone you've done business with on the phone for ages but have never seen, and you'll say, Oh...so you're who I've been talking to all these years."

Cundiff, who has worked for grounds maintenance service for 31 years, doesn't have the opportunity to make many friendships over the phone. His job does, however, take him all over campus and he knows—at least by sight—just about anybody who has been around for a while.

Lenvell, whose friends call him "Gravel Throat," usually can be found mowing lawns or picking up litter. He recalls, however, that during the student unrest here in the late 60's, he learned quickly how to board up windows and remove graffiti from walls.

"I had an awful lot of plywood for broken windows," he said in a disgruntled voice. "I know some guys were even getting overtime for driving the trucks being used to haul people off to jail."

Cundiff, who is from Cambria, half jokingly said, "We from Southern Illinois try to attribute those disturbances to a small core of troublemakers from Chicago...but you can't really do that."

Doolin believes certain people were trying to promote their own interests. "After all, don't we all want freedom or the best in life for everyone," she says. "But some of those protestors didn't have my interests, private interests."

Fidelia is also ambivalent towards the news media for the way it covered "those unsettled times."

"There were many good things going on at the same time but were overshadowed," she said. "There were many good students here who opposed the war but who didn't approve of the means that some people used to protest, but yet you never heard about them."

But overall, Fidelia doesn't think students are too much different from when she was one herself.

"Even when I was in college the casual, back-to-nature type image was in," she said. "We wore jeans but instead of cutting them off, we rolled them up calf length and wore bobby socks. We'd dress about as sloppy as we could get away with."

She says that working at the university has taught her to appreciate people for themselves instead of categorizing them by what they do.

Fidelia is sincere when she says she wants the best in life for "everyone," male or female.

"I'm a feminist," she said. "Not a crazy radical, but a feminist."

"My mother was a widow in an era when male chauvinists really did exist and it was hard for women to find work. Women in the ERA was a big help."

"My mother was a widow in an era when male chauvinists really did exist and it was hard for women to find work. She worked for the General Accounting Office in an era when many women were prevented from working."

Still, Doolin agrees. "I've found this university community very good to work in." She said, "I'm loyal and devoted to the people I work with. They're nice people that you like to serve."

Any thoughts about retirement?
Fidelia laughed and said, "Maybe if I was old enough or could afford it, but I still have 14 years to go before I'm eligible for social security."

Lenvell Cundiff brushes up the appearance of campus grounds.
Institute founder to retire, will continue to help clients

By Brad Beeker
Student Writer

SIU’s Rehabilitation Institute will lose its founder and director at the end of August when Guy Renzaglia will retire after 23 years of counseling service to University students and the Carbondale community.

But Renzaglia, who prefers to be called by his first name, said he plans to continue doing what he has devoted his life to—talking with people and helping them deal with their problems, whether they be physical, emotional or social.

To help and communicate with troubled people, two of Renzaglia’s main goals, are the basic principles upon which the Institute was founded. The program was started more than two decades ago when, he said, “it was unheard of to have rehabilitation anchored in the university system.”

Because SIU at that time had the foresight and courage to disdain the shackles of tradition, Renzaglia said, the Institute was among the first to offer graduate degrees in rehabilitation counseling, and it was the first to offer master’s degrees in behavior modification and rehabilitation administration. The Institute now is considering adding a doctoral program in rehabilitation which would also be the first of its kind, he said.

Renzaglia has built the Institute into a program that last year received more than $1.3 million in external money.

The Women’s Center, 508 W. Freeman, is also doing well thanks to Renzaglia’s generosity according to Women’s Center Treasurer Lillian Adams.

“First of all, we are very happy to have a good deal that enabled us to buy it,” she said.

Adams added that the Women’s Center, which has a good relationship with Renzaglia and that she considers him to be “a very friendly and helpful man.”

And now Renzaglia will retire August 31. A gold watch, a banquet and then relax, Guy

Probably not. At age 60, Renzaglia looks considerably younger due in part, he said, to the same beautiful attitudes that characterized his football playing days at George Washington University where he did his undergraduate work.

He earned his doctorate in educational and counseling psychology from the University of Minnesota.

To use up some of his retirement time, Renzaglia plans to help develop a rehabilitation center in Brazil.

Renzaglia said he is not used to taking it easy. He grew up in a poor mining community in Minnesota where, being of Italian descent, he was in the minority.

“I remember being worried about the clothes that my mom and dad wore and about how ‘they acted,’ ” Renzaglia recalled. “If one point I completely rejected my own group and class, but now I take extreme delight in every facet of my Italian heritage, although,” he added, “I don’t flaunt it.”

Renzaglia compared his overcoming the inevitable difficulties his minority status brought him to the life the physically or emotionally disabled person must cope with.

By overcoming any handicap, he said, a person learns a resourcefulness that he would not have learned had he not been handicapped.

“I’ve learned never to minimize how strong and capable people are,” Renzaglia said. “I’m constantly amazed with the strength and resourcefulness of humans.”

When asked what he has learned from his experiences in life, Renzaglia was happy to offer some advice: “I’ve learned to appreciate my own life. I’ve learned not to lament the past, it was important that I’ve done what I have, good or bad, because it has led me to where I am now.”

Faculty’s senior member says today’s students are more challenging

By Bill Threshold
Student Writer

Few people at SIU today were around when smoking on this college campus was grounds for dismissal and Coke added life for only a nickel. Not many active faculty members and administrative staffers were around back then, and the students here today were not yet in primary school.

But William H. Freeberg was here. He’s been teaching at SIU since 1942, longer than any other active faculty member.

Freeberg, an SIU alum and Professor of health, came here in a teaching capacity when Ronse Pulliam, SIU’s sixth president, was in his seventh year. The university has had six presidents since then.

SIU then was a small teacher-training, college, called Southern Illinois Normal University. The name was changed to Southern Illinois University in 1947 when SIU was given full university status.

Freeberg was hired for a triple purpose: Managing the Athletics Department, business and the administration of the football coach Abe Martin, and teaching physical education.

But he started his career as a professional educator teaching middle school students in Bloomington.

“Till that age group,” he said reflecting back.

Then why did he leave the junior high school teaching environment he liked so much for the stepped-up pace of higher education? They made me an offer I couldn’t refuse, he conceded. “Abe Martin was my head coach when I played football as an undergraduate and he wanted me to come back to teach. I’ve been here ever since.”

Freeberg played in the backfield for his first three years and was co-captain during his junior year. He was captain of the team and played end position during his senior year.

“We had to play both ways back then, so I also played linebacker,” he added.

Freeberg was graduated from SIU with a bachelor’s degree in physical education in the winter of 1942. He earned a master’s degree in physical education and health education from the University of Illinois in 1946 and a Ph.D. in the field from Indiana University in February 1950.

Freeberg said the students were “scared to death” when he started in the office. “As if I had done anything wrong they were dismissed from school.

“The university had a very narrow concept of teacher education and strict rules on discipline when I started,” he said.

“But today students have an open-minded, liberal viewpoint. They think for themselves. They have a mature concept of class. They are a lot more of a challenge to teach. And they’re a lot more fun to work with,” he said.

Like the students, the administration has also changed from a one-man rule to a sharing of the university’s chores.

“I remember when Chester F. Lay (SIU’s seventh president) supervised painters and carpenters along with everyone else. But then Dr. Morris (Deyte W. Morris, SIU’s eighth president) brought Bumcher Fuller and other highly qualified deans to SIU— he said.

In 1950 Freeberg got involved with the development of an outdoor recreational-educational lab on Little Grassy Lake. Now called the Touch of Nature Environmental Center. The lab is one of Freeberg’s main contributions to SIU.

With financial assistance from the Department of Interior, SIU leased 150 acres on Little Grassy to establish a youth camp. But it took some doing.

“When I first saw Little Grassy, it was nothing but plowed fields,” Freeberg said.

SIU no operates 6,500 acres of land in the Little Grassy area, some of it leased from the federal government.

Freeberg established the first recreational curriculum in 1952. Today there are about 15 University departments teaching 33 courses at Little Grassy.

Aside from his recreation projects, Freeberg was a consultant for the Joseph P. Kennedy Foundation for ten years while he trained directors to work with the mentally retarded. He spent six months working for the foundation in Washington, D.C., where he helped develop the Special Olympics program for the handicapped.

But Freeberg is not the kind of man who spends a lot of time looking back. He is more inclined to look to the future. When he does, he sees some changes at SIU.

“I think there will be a decline in student enrollment and a reduction in faculty. This will probably be accompanied by a shift away from teacher education and towards graduate studies and research,” he said.

Freeberg, 58, plans to retire in two years. “I’ve had two heart attacks so I have to take it easy from now on,” he said.

After he retires, he plans to do some traveling, writing and visiting other universities.

Commenting on his 36 years of teaching, Freeberg said “I wouldn’t change my experiences for anything.”

Top teacher says empathy is important

By Mike Field
Staff Writer

Donald M. Elkins, professor of plant and soil sciences at SIU, had recently received a $1,800 Amoco Foundation Outstanding Teaching Award.

As he sat amid a clutter of papers and reference books in his office, he spoke with characteristic humility of his accomplishment.

"I take a lot of pride in doing a good job at teaching," he said. "It is important to me to know that I've done the best I can with my students. But, at the same time, I know that for every person like me who is recognized for an award like this, there are scores of good teachers who go unnoticed because their colleagues don't take the time to nominate them."

"I'm just fortunate to have people around me who take the time and make the effort."

Elkins came to SIU in 1967 after receiving a master's degree (1956) and Ph.D. degree in agronomy from Auburn University. He earned a baccalaureate degree in the field from Tennessee Technological University in 1962.

It was at Auburn that he said he began to formulate his feelings about the teaching profession. "I always thought I wanted to teach, but I didn't know exactly why. I guess I saw something in a few men who inspired me. They seemed to get self-satisfaction from their work.

When he first came here, Elkins had never taught before, but he was interested in students. "Taking interest," he said, became an important part of his teaching philosophy.

"There are some things that you can put your finger on when talking about good teaching," he said. "And there are some things you can't."

"There is a good tradition and good organization first of all. I do volumes of reading to prepare myself and I try to have everything spelled out at the beginning of the course in terms of specific objectives."

"But there are things other than organization and preparation that are important to what I feel is good teaching," he added. "The intangibles that you really can't measure, such as how a professor comes across to his students or how he interacts with them."

"Projecting yourself as a warm human being, who has experienced some of the same problems they have is important," he said. "I just try to let them know that I empathize with them and that they are more than mere numbers or faces in the crowd."

Elkins' Alabama roots have given him an accent that people take notice of as soon as he opens his mouth, so he uses this as a focal point to break the tension that is often present during the first few classes of a semester.

"I don't think students want to come into a class and have the teacher start out like a cold fish, without so much as a hello," he said. "So I'll tell a joke or tell them I'm from southern New York or something like that. Unusually about half of them will smile. But others come in with chips on their shoulders and boy they're just not gonna smile at you for any reason. You really have to work on those people. Some of them never come around, but many do, and it is nice to see those chips come falling off."

While he was an undergraduate student, Elkins said he had his share of teachers who didn't generate interest from students and they firmly established his determination to reach out to students.

"Some teachers are purely research oriented," he said. "They have their grant money and they would rather be in their labs or out in the field doing research. They actually resent being in the classroom, and their students suffer because of it. Some of the best qualified men have often been the worst teachers because they did not want to be in the classroom."

Avid golfer, Elkins describes himself as a competitor. "I wouldn't settle for less than my best."

"I'm just used to giving it all I have, whether it's on the golf course or in the classroom. That's just the way I am."

Ego not important to top-notch teacher

By Liz Griffin
Student Writer

The highest judges of a teacher’s ability and talents are his pupils, it has been said. The students who’ve studied literature under the energetic guidance of Richard Peterson have passed judgement on him. The results: He’s one of three SIU professors to receive a $1,000 Amore Outstanding Teaching Award this year.

The award is based on student evaluations and the teachers' philosophy of his craft. Winners are selected by a committee under the direction of Frank Horton, vice president for academic affairs.

“I like for students to see in modern literature what I find so exciting, based upon my experiences, background, and training,” he said.

Peterson, an associate professor of English, has a Ph.D. degree in the field from Kent State University.

He said while he was in college he picked up two important maxims about teaching: that he has tried to adhere to in his years at SIU.

“Look for the tin God,” a teacher at Bucknell University, where he received a master’s degree, told him. Peterson said this means that a teacher should not go into a classroom in search of ego gratification.

“A teacher should not take himself or her ego too seriously. He must maintain a proper focus. The focus is not on me but the material I teach. I am not there to make the students like me, but to instill in them literature,” he said.

Peterson’s second maxim is to know the material so well that he doesn’t need notes or an outline. He said this makes class sessions more of a conversation than a lecture.

“I should know the material so well that it becomes a part of me. Then I can talk about it rather than lecture from notes. This allows a conversation to take place between me and my students,” he said.

Outlining his method of teaching, Peterson said: “First, the students and teacher’s mutual appreciation of a poem of literature must be established. What enhances that appreciation, and makes it more complex, is when the literary work is related to other pieces in history.”

Jim Grove, one of Peterson’s former students, explained the second step: “Arise from being the most exciting teacher I’ve ever had, and being able to interest his students in literature. I think he strived toward is his ability to organize material and make it stick.”

He said: “He knows how to explain the progression of literary movements. How it developed, how certain writers got involved in it and why they did, did, how other writers broke away from the trend, why, and how they did it.”

“He organizes material so well that even though we may have covered in 20 years of literary history in class, I still remember everything he taught me.”

Peterson’s expertise in his field is a result of his love for literature:

“Literature allows the reader to see how imagination works with words to create a heightened form of reality,” Peterson said. “He loves for his work was sparked, in part, by James Joyce, the Irish author of ‘Portrait of the Artist as Young Man.’”

Peterson considers Joyce “the most important writer of the century.”

Peterson recently completed a book about another Irish author, Mary Lavin. While attending a James Joyce symposium in Dublin, Ireland, in June, 1977, Peterson contacted Lavin and later spent an afternoon with her at her farm in Ireland.
Carp-on-dayl
When in Southern Illinois, speak as the natives speak

By Jan Grupp
Graduate Student in Journalism

As Southern Illinois was settled during the last 200 years, a conglomeration of nationalities and backgrounds combined to produce the unusual flavor of life found 300-odd miles south of Chicago. French, English, Irish, German, Italian miners and others moved into the area between the Ohio and Mississippi Rivers.

As time passed, settlers from Kentucky, Tennessee and the like—moved here too.

It's no real wonder to me, as a transplanted northern Illinoisan, about the variety of foreign influence found in the names of the small communities that make up this part of Illinois. What is a wonder, though, is where on earth the pronunciations came from. Transplanted or not, a pronunciation primer on names and places in Southern Illinois could prove helpful to anyone who does not want to sound like a "foreigner" (pronounce it fur-uh-nur) in Southern Illinois.

A few examples will serve to illustrate.

Take Beaucoup Creek and DuBois for example. A nice French sounding stream that flows through part of Franklin and Williamson Counties and a tiny town off U.S. 51 north of here. The spellings might be French, but the sounds are definitely Southern Illinois: pronounce them back-up creek and doo-boos.

Or how about Vienna? The name sounds like the thoughts of a place the other side of the globe—Vienna, Austria. But people in Vienna, Illinois, might laugh you off the street if you pronounced their home city like that. Austrian capital. It's vi (as in eyebrow), not vee-anna down here, no matter where you come from.

How about Tamara? If you took phonics in grade school, the rules say pronounce all the syllables. But most people know that tiny mining town as tam-uhr.

Then of course, there's Coelio and Buncombe. I can't explain the pronunciation of the first one: pronounce it ewel-Jub. And the latter, well naturally that little pocket of civilization is simply known as bunk-um.

A little closer to Carbondale, is Makanda. I don't know how many times in the last eight years I've heard people (fur-uh-nur) try to soften the harshness of the word by pronouncing it mah-kon-dub, as in Makanda Java, a coffee and herbs shop that began in a storefront in that town. But it's not correct. Makanda is mah-kah-dub and that's all there is to it.

Last but not least, is Carbondale. Now I've heard various pronunciations of our town's handle, but the one that perhaps best describes the Southern Illinois accent is carp-on-dayl. I can't explain that one either.

But this is a list of only a few places. Sprinkle these towns in along everyday speech and you'll still have to remember two more basics when authenticating your Southern Illinois accent: Add a few "Ah, jus done know" and when people talk about the town, remember you're going "up air" not just "up there" and you'll be off to a good start.

Kleinau teaches outside class, too

By Deb Browne
Staff Writer

"After the hour we'd follow him to a
restaurant for coffee, and then we'd
follow him home. He was able to get us
to do things, to engage in a lot of self
instruction. He was very available," one
was welcome. The teaching process did
not end in the classroom.

This is how Marvin Kleinau, assistant
professor of speech communications,
described the ideal teacher-to-student
relationship his favorite undergraduate
instructor shared with him and his
fellow classmates at Illinois State
University back in the late 40s and early
50s.

Incorporating Ralph Micken's
teaching philosophy into his own
practise, Kleinau now is a favorite teacher in SIU. He is one of the
three SIU professors chosen for the
Amoco Foundation Outstanding
Teaching Award this year.

In 1963, Micken, then at SIU,
recommended Kleinau to head up the
forensics branch of the Speech
Department. Kleinau was appointed,
and for the last 15 years he's been on
board at SIU coaching the debate team
and researching and writing articles,

among his many other activities. In
addition to performing his duties here,
Kleinau has worked his way through the
Illinois Speech and Theater Association,
serving in every office.

He has served as president of the SIU
American Association of University
Professors chapter for two years,
chairman of the Judicial Review Board
for one semester and has conducted high
school summer workshops in speech.
Last spring he was elected president of
the Faculty Senate.

Last spring he was
discussed the philosophy of
Kleinau's teaching, his
relationship with students
and his teaching philosophy
of students today.

"Good teaching," Kleinau said,
"starts with a lot of individual exchange
between teacher and student, takes a lot
of time and personal involvement and
should continue into a conversation that
never ends."

Learning is initiated by teacher
motivating student, he said. Then,
the student gets excited; goes out and
acquires knowledge as a result," Kleinau
said.

"Better teaching can happen if
students have the opportunity for active
participation, and suitable facilities for
students who want to be there," according
to Kleinau.

Active participation in his classes
means debating current issues as a
team, finding expert opinion to write a
persuasive speech or evaluating other
students. For some, this participation
goes beyond the classroom.

Nine students from his basic speaking
class won monetary awards out of 100
in the Flora Breniman speaking contest at
SIU for their original persuasive
speeches. Two students from his argumentation and debate class
competed in national intercollegiate
debate finals in 1972.

Kleinau's contributions to the
Fairview have included scoring
the winning touchdowns in a
two-year liberal education.

"I prefer a class where kids have a
desire to be there," Kleinau said.
"Learning is a two-way proposition.
I try to get them (students) to want to be
there. I think the classroom should be
enjoyable, not laborious, if at all
possible. If there is some interest, the
student will do more than just store
facts."

Students today are less inclined
to learn and less inclined to work together
than they were when Kleinau began
teaching 24 years ago, he said.

"I don't think they are as excited or as
deeply motivated. The students I
encountered in the early 60s were more
interested in what they were doing, more
eager to do it."

"Over the years I've seen less interest
in hard reading. Something as taking the
place of reading—I don't know what
maybe television."

He said the biggest single problem
students have now is a lack of
backgrounds in the field of the library
"When I came here students really
wanted to do well, but they have lost a
kind of 'esprit de corps'... since the
early seventies they throw a bucket of water
on everything," he said.

He added that he thought students
may have lost confidence in themselves
because of the massive numbers getting
four-year degrees. "Not everyone
should go to school," he said. He said he
believes a two-year liberal education
would be better for some.

Kleinau began teaching in 1954 at the
junior-high school level in Saybrook,
where he taught five subjects, coached
all sports, directed seven plays a year
and sponsored the yearbook.

How did Egypt get its name?
Take your choice of stories

By Nick Bertal
Staff Writer

No one knows exactly how Southern Illinois became known as Little Egypt, but there are at least two widely known tales.

Some people say an unseasonably cold winter in the early 1800s led to the rather unusual naming of the area. Others claim the Rev. David Badgely found a striking similarity between this area and biblical Egypt when he and his church members camped near Edwardsville in 1799.

The winter blizzard story gives the traditional account. Heavy snowfall came early in the Midwest in 1836 and remained deep even in late spring 1831. The legend goes:

Then, a killing frost came in May that year, delaying the planting in northern and central Illinois. Another killing frost came in September, cutting the growing season short.

Farmers in the upper half of the state were forced to look elsewhere for corn to feed their livestock and to make cornmeal, then the staple breadstuff. When they found out that Southern Illinois wasn't hurt by the snow, the farmers "went to Egypt for corn," like the sons of Jacob did in the biblical times. After that the nickname stuck.

The other biblical story involving the Rev. Badgely, a Connecticut pastor who was sent on a mission for his church group in 1801, is perhaps the most genuine. The clergyman was looking for fertile land where his congregation could make a mass migration.

He stopped at a place which he called the Land of Goshen, meaning the "land fertile and free from plague." The Israelites in biblical history had dwelt in Goshen, Egypt, during their period of captivity there.

Shawneetown is the first place on record in Southern Illinois to have a name from ancient Egypt. Short sections of a roadway leading from the settlement to Shawneetown are still traceable.

Another less romantic tale of the origin of Southern Illinois' nickname gives a St. Louis businessman credit for the naming of the area. The businessman's records do not indicate what his name was—came to Southern Illinois and set up a town near the point where the Mississippi and the Ohio rivers meet. Because the rivers reminded him of the Nile in Egypt, he called his town Cairo.

Some people claimed Little Egypt evolved after Cairo, Karnak and Thebes, all area towns, had been named. However, Cairo is shown on maps of Southern Illinois before 1800.

People don't agree on how big the Egypt area is either. The southernmost 14 to 16 counties are cited by some, others include as many as 34 counties, stretching up to U.S. Highway 40.

No matter which story is true, Southern Illinois is immersed in its Egyptian heritage. The SIU mascot, the Saluki, is the world's oldest pure breed line of hunting dog, originating in Egypt. The University newspaper, the Daily Egyptian, and the yearbook, the Obelisk (an Egyptian support column), are other reminders of the heritage.

President’s aim: a progressive campus government

By Alton Porter
Summer Special Editor

"If you first go in, win, then run again. It might sound a bit trite to you, but Garrick Clinton Matthews' general attitude toward competition paid off in big dividends for him.

Matthews made an unsuccessful bid for student president when he was a freshman last year. Frustrated by the loss, he ran again for the Student Government post this year, and this time, he won. He'll serve in the office during the 1978-79 school year. The office carries a salary of $3,000 a year.

"I'm one who finishes what he starts," the new student president said recently. "And last year's election was the first school contest I ever lost. It was frustrating."

However, Matthews said the loss might have had some redeeming value. "I guess I was ridding a little high and needed it," he said. "I really worked hard for the office this year. I really wanted it."

Matthews, sophomore business major and political science minor, ran on an "increase communication between students, student government and University administration" ticket along with his running mate, Janet Stoneburner. Both were elected, but Stoneburner, a freshman, resigned from the vice presidency this summer.

Matthews and Stoneburner, members of the Student Political Action Coalition that helped to organize slipped by a crowded field of six other pairs in the election. beat out their closest opponents by a 32-vote margin.

The Matthews-Stoneburner team chalked up 505 votes in the election and Pete Alexander and Kathy Mac Cunneen, their nearest opponents, collected 360.

Matthews served for 11 months as a student senator last year before he resigned because "the senate was not moving fast enough for me," he said. "It was very conservative."

Dennis Adamczyk, last year's student president, had a "dominant influence" on the Student Senate at that time, Matthews said. "If you weren't part of his movement you found yourself frustrated. But by that time, I'd made up my mind to run for president again.

Matthews resigned from the Student Senate in November. "But it was a pretty productive year for me," he said. He lists the creation of an additional student seat to represent the combined University Park and Brush Towers on-campus housing areas among his accomplishments. "There were 20 senatorial positions when I came," he said. "Now there are 30."

The only black student senator then, Matthews sponsored a resolution attacking the apartheid system of South Africa. "I had trouble, but I got it through," he said.

Also among his accomplishments is a food drive he helped to organize for mentally handicapped persons in Carbondale last year.

Under his leadership, Matthews said he feels Student Government will be more productive this year. "Since I'm progressive, Student Government is going to have to be progressive," he said. "I was pretty well respected by everybody when I was a senator and I think I'm pretty well respected now."

"I'm inherently a very private person," Matthews conceded. "If people don't get inside of me I think there's a private life and a professional one; they should not be mixed."

During the next year, Matthews said he wants to "strengthen the student structure of Student Government and to find better ways for the group to represent student opinions and concerns."

In the past, Student Government has often been criticized for its failure to be effective in representing student concerns. Matthews said he was a Senator president here is to look for our weekly specials in the D.E.

"The changes that will be made this coming year shall reflect the commitments and desires of the student body Communications, coordination and government shall be the banner for our allegiance and the herald of our actions."

A student organizational forum, student Government newsletter, student voter registration drive and scholarship fund to be named in the honor of Paul Lambert, former Saluki basketball coach, are among the things Matthews is planning for the upcoming year.

Other special projects that rank high on his list of priorities are a shuttle bus service for returning students at the start of each semester, an improved system for reviewing requests from student organizations for funding from Student Government and a program to increase student involvement in community activities.

The organizational forum will be designed to give Student Government representatives a chance to communicate with constituency groups on a "grass-roots" level, according to Matthews.

The presentation will be an up-to-date assessment of 5G activities, and it will forecast future programming activities. The voter registration drive will be aimed at boosting student turnout in University, local and state elections in November.

The Lambert scholarship fund will recognize superior undergraduate and graduate academic achievement. Also on Matthews must draft a new agenda for the "reformation of an executive committee to insure collaboration between our campus and our communities in Edwardsville," he said.

Matthews said he does not favor fee increases. He said he feels the development of a workable relationship with the University administration is needed and he thinks he's covered most of the ground in this area.

"Student Government depends on the administration for information and the allocation of money," Matthews said. "I hope to have a relationship with them administrators and, hopefully, it will be a good one."

Before he got involved in his Student Senate work last year, Matthews tried to out unsuccessfully for a seat on the College Board. Board members are appointed, not elected.

After that, he said he met Sam Dunning, last year's student vice president, who then worked in a mail room on campus and the following year "we had a lot in common, so we got in the senate together," he said.

Being student president here is not the first time Matthews has served in a student-related role. He served as student council president at Carbondale High School on Chicago's north side.
Kevin Wright in the office where he plans to be regularly available

Student trustee pledges openness, accountability

By Mary Feld
Staff Writer

"I'm Kevin Wright. How can I help you?" is destined to become a familiar expression this year if the new student trustee representing the Carbondale campus has his way.

Wright was elected student trustee in an election held last April. He won the election by a landslide, margin, defeating 10 opponents: Mary Haynes and Gary Figgiani.

"Personally I feel that the student trustee is the most important person on campus and the most influential because he deals with the Board of Trustees," Wright said.

"The students should know there is a student trustee on campus and what the trustee can do for them." Wright stated.

A winning platform was one of increased accessibility and accountability. He pledged to maintain regular office hours, and to report to the Student Senate and other student groups on a regular basis.

"I receive the items on the agenda for the Board of Trustees meeting 10 days in advance. Any matter which is due for discussion which would be of concern to the student body will be made known to the students," he said. "I will seek out students and ask them how they feel about certain issues in order to be informed.

"I plan to hold an open forum once a month to allow students to say what they feel about issues to me."

Wright said that student views have a profound effect on the way he moves on issues. He also plans to thoroughly research each issue to be more informed of the total situation.

"I may not always follow the way students would like to see a matter voted on, but you can't take a hard line and always vote no. Take a fee increase proposal, for example. In some way the proposal must be found, but I think it is important to look into all the possibilities," he said.

In April, a vote was held to get student opinions on a proposed increase of $1.85 in the student activity fee. The Student Senate had approved the hike but the student voters turned it down, two to one.

"I feel that the students made it very clear that they do not want a fee increase and if the referendum came up again, I would vote against it," Wright said.

As student trustee, Wright can introduce and second motions but his vote is advisory only. A student from SIU-Edwardsville also sits on the board.

One of Wright's major priorities this year will be to inform the public of the board's activities. He promised to disclose activities by the board conducted during open sessions. The board spent 31 hours in open session and 27 hours in closed sessions in 1977.

Wright's experience in student government includes a term as president pro tempore of the Student Senate, chairman of student government's Fee Allocation Board, and chairman of Inter-Greek Council.

Wright, a senior majoring in political science and agricultural economics, said he plans to devote at least 10 hours a week to office hours. Although he has not set a definite schedule yet, his office is located in Barrick T-40 (behind Fauer Hall) Room 119.

Rip's sharp eye has seen it all

As University photographer for 27 years, Robert "Rip" Stokes has snapped the shutter on most of the triumphs and tragedies, the good times and bad times, in SIU's modern history. The pictures on this page and on Page 16 are a few of the memorable scenes that he's recorded in the life of the University.

"Boston Bull in the Brass," (upper left) as it was titled, was published in Life magazine in 1966. The terrified howl of the Marching Salukis rendition of "Ach du Lieber Augustin" - or at least trumpeter Russ Mitchell's portion of it - during an SIU-Eastern Michigan football game.

Stokes took his camera into the air to catch the destruction of Old Main by fire in June of 1969 (upper right), and another, happier, aerial shot caught SIU student Mike Murphy put-putting above the Arenas in his marvelous flying machine in 1975. Murphy's cruises around campus always caused a lot of craning of necks - and some chucks when migrating geese overtook him.

A presence and a legend were captured on film in Stokes' portrait of former University professor R. Buckminster Fuller, the internationally-known creator of the geodesic dome, Spaceship Earth savant, and - at the time his photo was made, in 1969 - director of an SIU-based World Resource Center.

Page 14 Daily Egyptian, August 21, 1978, Section A
Rip has pictures, stories to match

By Mark Peterson
Staff Writer

In a tiny Southern drawl he quietly tells how he sent a letter to a friend and trouble-shooter for Kodak asking why his Brownie camera was black.

He lights a cigarette and begins to chuckle.

"I didn't sign my real name to the letter but did give him my phone number," he says with a touch of mischief in his voice.

He laughs, draws on his cigarette, leans back in his chair and begins to tell another story. Rip Stokes has a lot of stories.

But the levity, for the moment, begins to fade. Rip is now discussing his career. During his 27 years as University photographer and coordinator of Photographic Services, he has travelled the world. Pictures he has taken have appeared in Time and Life magazines, and have been published in nearly every major newspaper in the country.

"The most rewarding aspect of this job, however, is satisfying the needs of all those people who come to me with special problems," he says. "I guess I've just always been more of a people person than most." A case in point is the public relations mission that, in 1967, he and Assistant Athletics Director Fred Huff, then sports information director, took up for the basketball Salukis at the National Invitational Tournament (NIT) in New York City.

"The recognition that they generated in the media prior to the Salukis opening until he realized that St. Peter's coach," prompted that school's coach to predict "his team would blow SIU off the map," Stokes said.

(Continued on next page)
Rip’s stories match photos

(Continued from Page 15)

Rip did say he had "doodled his last rock and bottle," implying that he is more than happy the student unrest of the late 60’s and early 70’s is now in the past.

"Besides, I’m too old for that stuff. I’m just glad it’s over," he says. "We've got to change the topic."

The irascible nature of students 10 years ago is not, however, what Rip considers to be the most disappointing thing that has happened on campus since he has been here.

He has the most trouble reconciling what he termed the "unjustified flack" the university took over the construction of the University House, where President Warren B. Stokes now lives.

The "flack" that Stokes referred to certainly led to the resignation of his good friend, Delyte Morris, in 1970, after 23 years as president of SIU.

Morris was criticized for approving the use of University funds to construct the house before gaining approval from the Illinois Board of Higher Education.

Stokes believes many people were in arms because the cost of the house exceeded the original estimate. He said that if it would have been called a conference or residence center, it would have been OK—but you just don’t spend one million dollars on a house.

"This period was also when we were having the student riots and his resignation was probably one of the results of all these things," Stokes said. "It's taken a lot of people a lot of time to heal the wounds that occurred ten years ago."

Prior to the time that Delyte Morris came to Southern Illinois the only thing that affected the campus was poverty," he said. "We had worn out mines and people on relief. This place was comparable to Appalachia."

Stokes said that because Morris was able to see that the war had been causing a boom in the University, he went after the money, built the dormitories and other buildings. "We were ready when the explosion hit."

"Anyone knowledgeable of this area will admit that almost every piece of community development in the last three decades has been a direct result of Delyte Morris," Stokes said. "Morris was the catalyst for it all."

Rip also has little regard for the party school reputation that SIU has acquired.

"Southern isn't any more of a party school than others," he said. "It just got that name from the 60’s, and the people who grew here in the late sixties looking for adrenaline shots.

"When that many people got together a lot of partying did occur," Stokes said, and the image sort of stuck ever since."

Stokes feels that most of the "kids" around today are the same as they were 25 or 30 years ago—just superior.

"One friend, Delyte W. Morris, telling with college kids is that before you pass any judgment you've got to find out how they live," he said. "Once you get passed the exterior they're all pretty much the same."

President Delyte W. Morris (seated left) signed an Agency for International Development contract that launched the Vietnamese Studies Center in 1969. Among witnesses were the late Sea. Parkes (middle), Sen. Charles Percy (right), Sen. Charles Percy club. Rip said. "If the university would permit me to go across tax-free for the next 40 years, I believe I could build a golf course."

Rip added that Rip is a man and perhaps devote more time to the golf game or to getting his fishing fixed.

"I could build a golf course."

"He'll go fishing."

"I don't even want to talk about retirement," he said. "I enjoy my work. Why should I quit? Besides, I still have a youngster who is in high school."

Altogether, Stokes has five children—three sons and two daughters. He and his wife, Gloria, have been married for 31 years.

The University's decision not to build the course really didn't affect me in any way because I belong to a country club."

"For the time out to have impact to Dillons, and former Congressman Kenney Gray (standing third from right), the kids she has worked for the university the entire time we have been here."

Currently she is a secretary to Clarence "Doc" Doughty, vice president for campus services.

Stokes said that he has had other job offers from newspapers who would, no doubt, like to tap his talents, but he says, in the first place, this job pays better than most newspapers and besides, "I don't enjoy chasing ambulances or fire trucks."

"But I'll tell you this, the day I leave here is the day I start somewhere else because I don't intend to quit."

The year was 1970, when the basketball Salukis were 13-10 and needed all the help they could get.
Old Main's site was twice cursed

Scott Ellis
Editor-in-chief

The strawberry patch must have been cursed. And on Nov. 28, 1983 and June 1, 1989, the curse must have been working.

On these dates, the University’s oldest and most revered building, Old Main, burned to the ground.

Old Main used to stand in the center of the University’s "Old Campus"; an area now occupied by a grassy mall intersected by sidewalks. Before SIU was founded in 1869, a strawberry patch owned by the widow of Henry Sanders occupied the same area.

When the Board of Trustees bought a 30-acre tract of farm land from Mrs. Sandels to be the site of Southern Illinois Normal University—the word "Normal" was not dropped from the University’s name until 1907. Old Main was built in the same place where the old strawberry patch used to be.

And cursed or not, Old Main twice burned to the ground.

Old Main was SIU's first building. A drawing of Old Main is still used in the University and Board of Trustees’ official seals. It’s cornerstone was laid in 1870 and it was rebuilt in 1886 after the first fire which ravaged it in 1883. But it has not been rebuilt since it was demolished in 1970, after the fire which University police say arsonists started in 1989.

For eight years, traces and memories of the University's first building are still with SIU and the University's past and present employees.

Old Main, which originally cost $22,000 to build, had several outstanding features, Charles Pulley, former University architect, said. Pulley, an architect at SIU for 27 years until he retired in March, said Old Main "represented a Victorian approach in construction. There was sandstone used in its arched, base, and foundation. I think that some of this same kind of sandstone was used in buildings on the Gold Coast of Chicago before 1900."

Old Main was also made of red brick, huge attic wood beams and had copper cornices Pulley said Old Main’s numerous sandstone arches and lintels were another distinctive feature.

The gray sandstone came from Makanda, and Pulley said Old Main was one of the tallest buildings in Carbondale because of its tower. Including the attic, it had four floors.

"The tower was the most outstanding feature," Pulley said. "The cast iron ornamental columns were also distinctive."

The iron columns Pulley spoke of were in Old Main’s main hall. They were nearly 30 feet tall.

In 1960, 70 percent of SIU’s classes were still taught in Old Main. When it burned in 1969, the history and English departments were hard hit. A major part of the history department's books and more of their instructors' offices were destroyed in the blaze. University Museum escaped heavy losses only because its rooms in Old Main were being remodeled at the time of the fire and most of its exhibits were in other campus buildings.

At the time of the fire, Old Main occupied about one-tenth of the Old Campus mall and housed the University Museum, offices for teaching assistants in English, a foreign languages teaching laboratory, the history department's offices as well as the ROTC rifle range and 14 classrooms. The rifle range was in Old Main's attic—the "Mansard" floor. Before the rifle range was...
Fire twice destroyed building that was Southern's landmark

(Continued from Page 17)

installed, the attic was a notorious bat roost.

Throughout the University's history, Old Main's rooms were used in various ways. A women's gym was once on the third floor. The dean, registrar, and president once shared the same office in Old Main.

The Socratic and Zetetic Literary Societies—formed in the mid-1870's by students who wanted a chance to show off their oratorical and literary abilities—had their headquarters on the fourth floor of Old Main before the first fire, and on the third floor after Old Main was rebuilt in 1887. The library once desdanded during World War II, and at the time of the 1969 fire, the English department's graduate students' office was housed in the same room where the Socratic society once was.

Old Main was about 180 feet long from north to south, and 100 feet wide from east to west. It was about 135 feet high, from its base to the top of its tower. The cannon and flagpole at the entrance to Old Campus near Grand Avenue used to be located at Old Main's north entrance. The fountain, of two children holding an umbrella, built in the 1880's, is in the same place it was when Old Main was standing.

The 1969 fire was discovered in Old Main's attic by on-duty custodian, Robert Breener, at about 7:45 a.m. on June 11, 1969. By 9 a.m., smoke was spreading throughout the upstairs area. Carbondale Fire Department Captain Charles McGovern arrived then. The fire in the attic was the main blaze, but there were three other minor blazes on the third floor.

At about 9:30 a.m., the lower and east walls of Old Main were on fire. At about noon, the University announced Old Main a "catastrophic ruin". Fire trucks battled the blaze from Carbondale, Mt. Vernon, Herrin, Marion, DuQuoin, Christopher and Carterville battled the fire, but the only snorkel unit fighting the blaze was from Mt. Vernon. Carbondale had no snorkel unit then (and still doesn't). Robert MacVicar, then University Chancellor, said then that none of Old Main could have been saved if the city had a snorkel unit available. A snorkel unit is a large firefighting truck which is able to spray large amounts of water on a fire.

The 1883 fire was also started in the attic, but its cause was never determined. Students massed bucket brigades in efforts to save Old Main. In 1969, students again helped to salvage as much from Old Main as possible, removing office files, equipment, and books.

The day after the fire, University police, Carbondale fire and police departments and state fire marshals began searching for the cause of the blaze. Firemen reported finding an obscene message on a third floor blackboard which ended with the words, "Old Main is burning."

On June 11, at commencement exercises, then President Delaney Morris announced that the Old Main fire was definitely a case of arson. Morris also announced that a reward of $10,000 was being offered for information leading to the arrest and conviction of the person or persons who set the fire.

Donations from local residents made up the reward, which was then being administered by the Carbondale Chamber of Commerce and SIU Alumni Service. Jay King, associate director of the Alumni Service, said that he didn't know whether the reward was still offered or not.

"But I've heard nothing to the contrary," King said.

Morris firmly believed that it wasn't students who set the fire. "There are those, particularly some in upset who think it was done by a student," Morris said. Firemen reported finding an obscene message on a third floor blackboard which ended with the words, "Old Main is burning."

First Baptist Church

There is an alternate style of religious life available in Carbondale's Baptist community. If you are tired of old cliches, legalisms and rigidities and if you have rejected the church because of its judgmental view of life then First Baptist Church may be for you. The First Baptist Church is located at Main and University and welcomes any who are eager to follow Jesus Christ in freedom and openness. We do not require you to buy our rituals in order to walk with us. All we require is an honest desire to share community under the lordship of Jesus Christ. Students, faculty and staff of Southern Illinois University are invited to share in the Church School at 9:30 and worship at 10:45.

Page 10 DailyEgyptian, August 21, 1970 Section A
Old Main still exists as SIU symbol

(Continued from Page 18)

Identify the person and make clear that this is not the case.

University police said that they knew who set the 1986 fire. University police Capt. Carl Kirk, who was acting chief in 1989 and who headed the University's investigation, said that he thought he knew who did it, but didn't have enough evidence to prove it in court.

"The evidence that helped us determine who we thought he was is circumstantial," Kirk said. "We didn't have enough solid evidence to press charges."

Kirk, a University policeman for 20 years, said investigators from the state university and City University had determined within two weeks who they thought had set the fires. Kirk declined to say who set the fire or whether it was a student, a faculty or a visitor.

"I just can't reveal who we think set the fires because the case is not officially closed and I want to be ready if any new evidence comes out," Kirk said.

"I haven't given up." But Art Susman, University legal counsel, said the statute of limitations for most felonies under most circumstances in Illinois is three years.

Arson is a felony.

Plans to rebuild Old Main, as it was refused out the case. The case was quashed by Morris at the June, 1989 graduation exercises. He said that the suspect's alibi was a "safety deposit box," which is not considered a crime.

"I don't believe this is a case of rebuilding Old Main," Kirk said.

When the University demolished Old Main in 1970, it saved parts of the building with historic, architectural or sentimental value. Parts like the case were iron columns, sandstone blocks and arches, iron grilles, brick, terra cotta (baked clay) panels, and copper cornices were all marked, photographed, and coded by the now deceased Old Main Architect's Office to show where they fit in the original structure. This was done to make them available for possible reuse in case a memorial for Old Main was built.

Parts from Old Main are stored in a warehouse rented by the University in the Urbana area. The second floor of Shryock Auditorium on campus, and in a nearby garage at the Saluki Knob off McLaugherty Road. The cornices are housed in the SIC-Physics Plant. Several ideas and plans for erecting a memorial or rebuilding Old Main were considered by the University. But nothing has ever been built.

One of the ideas included building an exhibition of parts from Old Main. The obelisk would have represented Old Main's original tower. Another proposal, which came from Pulley, was to make a statue garden in and around the ruins of Old Main. Yet another plan discussed was to build a gardenhouse, using Old Main parts. Willard Harr, former campus architect, said:

"The walkways and mall now in the center of Old Campus were planned by John Lowenberg, who was an associate University architect when Old Main burned. But his original plan called for an Old Main seal to be inset in the center of the mall, where a square patch of land was designated for that purpose."

"The seal was to be 10 feet in diameter and made of bronze," said Lowenberg, who is now retired. "We were going to put it in when the money was provided. But it was never put up."

Lowenberg said such a seal would cost $25,000.

Harr, campus architect at the time of the Old Main fire, said he thinks the most frequent of the 1960s and early 1970s were the main reason an Old Main memorial wasn't built.

"The state wouldn't put out the money for it and the alumni were mad at the old building," said Harr. "We had hoped that the Alumni Service would raise the money for a rebuilding project, but they never did."

"And the state thought the University was going to hell in a handbasket and it wouldn't put up the money."

Pulley said the Board of Trustees decided that it would be too expensive to rebuild Old Main. But he also said that he couldn't understand why no money was appropriated to build a memorial either.

The Board decided that rebuilding Old Main would exceed the funds available. But the idea was never put to an Old Main fundraising drive.

"Such a plaque could tell students the story of the building," Pulley said.

Gail Hart, whose firm, Fischer-Stein Associates in Carbondale, plans to remodel the Old Main dining room on the second floor of the Student Center, said it was "too costly" to rebuild Old Main.

"There is a lack of craftsmen who are able to do such work and a lack of funds needed to rebuild Old Main as it once was," Hart said. He said structures like Old Main can't be built today.

Hart said some unique features of Old Main were its terra cotta panels, columns and doors with ornamentation, copper cornices, stone lintels and arches.

Old Main's craftsmanship and architecture were characteristic of the Victorian period in which it was built, Hart said, but not of architecture after 1900.

"It would be a physical impossibility to rebuild it," Bryant said. "The paint color codes put on the stones and other stuff are all washed off now. The iron columns are rusting and the other parts are deteriorating. And, like anything else at this University, there doesn't seem to be enough money around to rebuild it."
Meet campus, city brass

By Bruce Rodman
Fall Editor-in-chief

Whether or not the university runs Carbondale or Carbondale runs the university, has been the subject of debate for several years. While there is a definite interrelationship between the two bodies, the university and city each has its own set of administrators and officials.

Heading the university is President Warren W. Brandt, who is SIU’s 12th president. He succeeded Hiram Leman, now dean of the SIU law school, who served as acting president for nine months after the resignation of David Derge.

A native of Laning, Michigan, Brandt, 55, received a bachelor’s degree in chemistry from Michigan State University in 1964 and a doctorate from the University of Illinois in 1969.

As a George Alexander professor at Oxford University in England, he held teaching and administrative positions at Purdue University, Kansas State University and Virginia Polytechnic Institute and State University.

Brandt spent over four years as president of Virginia Commonwealth University immediately before coming to SIU.

Frank Horton, vice president for academic affairs, is SIU’s youngest vice president at 39. Horton headed academic affairs at SIU since September 1975.

He received a bachelor’s degree in business administration from Western Illinois University, and a master’s and a doctorate degree in geography from Northwestern University.

Horton taught at the University of Illinois, specializing in urban geography, and served as dean for advanced studies there for three years before coming to SIU.

Both Brandt and Horton have been criticized for their emphasis on research. Some faculty members have claimed that requirements to obtain tenure and promotion place an overemphasis on research.

Having served in a number of administrative positions at SIU, George Mace was named the university’s first vice president for university relations in 1975.

Among the positions Mace held before the university relations post were assistant to the president, dean of students, acting vice president for student affairs, acting vice president for administration, and campus treasurer.

Mace, 45, served on the SIU-Edwardsville government and public affairs faculty before coming to Carbondale and has taught on SIU-C’s political science faculty. Controversy seems to be attracted to Mace. While on the political science faculty, he headed a faculty search committee which was highly critical of the university’s firing of 104 teachers in 1974 for what was termed a “financial exigency.”

There was also a bit of controversy over the procedure used by Mace in hiring a director of external affairs to be the Carbondale campus’ chief lobbyist. Ultimately, Clyde Choate, a veteran of over 30 years in the Illinois General Assembly and a retired state trooper, was hired.

Replacing Mace in 1973 as dean of students was Bruce Swinburne. A short time later, in 1974, Swinburne became SIU’s first vice president for student affairs and a position he still holds.

Before becoming dean of students in 1973, Swinburne was named outstanding teacher in the SIU College of Education, where he was an associate professor in higher education.

Swinburne, 46, was academic dean in Glen Oaks Community College in Centreville Mich., and student personnel director at Iowa Lakes Community College in Estherville, Iowa. He received his doctorate in higher education at Indiana University in 1970.

The vice president for student affairs acts as a liaison between students and the administration. Swinburne often finds himself torn between the side of the students and that of administrators on issues such as fee increases.

Another successor to Mace is Robert Gentry, vice president for financial affairs. Gentry, 50, took over the position in April 1976 from Mace, who was acting vice president at the time.

Before accepting the SIU post, Gentry was associate vice president for business and finance at the University of Wisconsin system, which includes 14 campuses.

From 1965 to 1969, Gentry was assistant director for research and projects at Harvard University. He also worked for 16 years in various capacities in the University of Illinois business office.

Gentry received bachelor’s degrees in accounting and economics, and a master’s degree in accounting, from the University of Illinois.

SIU’s newest vice president is Clarence G. “Doc” Dougherty, who oversees campus services. Dougherty, who was promoted to vice president in June 1978, had been director of campus services since 1975. The promotion involved no change in duties for him, but only reflected his responsibilities, as he reported directly to the president.

Dougherty left SIU in May 1961, when he became director of the Student Center, a position he held until 1975. He came to SIU from Illinois State University, where he was assistant director of the student center.

Some of the areas Dougherty must oversee are operation of the Physical Plant, the Arena, and campus security.

The city of Carbondale doesn’t have as many administrators as SIU, but it does have a chief executive and a professional administrator.

Carbondale has a council-manager form of government. Under that type, a
Meet campus and city brass

(Continued from page 20)

A professional city manager is hired to administer the city’s different departments and programs. The city does have a mayor, with one of his main responsibilities to preside at city council meetings.

Carroll Fry has been Carbondale’s city manager since 1972. Fry, 63, has spent the last 21 years of his life managing cities, two of them in Oklahoma.

Originally from Missouri, he attended college in Kirksville, Mo., receiving a bachelor's degree in education. He taught elementary school for three years.

Neal Eckert, a Carbondale businessman, has been mayor since 1971. He won his first term with a 91-vote victory over Hans Fischer, who is currently a city councilman.

Eckert, who was re-elected mayor in 1975, was a candidate for lieutenant governor of Illinois in 1972. He was Dan Walker’s running mate, but the Democratic nomination went to Neil Hartigan in the primary election.

Eckert, 39, directs the financial end of his family’s apple orchards located in Carbondale, Cobden and Grafton. He has taught agricultural marketing and economics part-time at SIU.
He's been the campus scamp for 22 years

By Bruce Rodman
Fall Editor-in-chief
It's funny that SIU's senior student can't be found on any enrollment list at Woody Hall.

That same student, however, can easily be found on the front page of the campus newspaper, murmuring issues and attitudes as he has for the last 22 years.

Gus Bode first appeared in the Daily Egyptian on April 13, 1956. Since that time, in one form or another, he has been adding a different, and usually humorous, perspective to the news at the University.

Gus was recruited for the Daily Egyptian by Charles C. Clayton, who was adviser to the newspaper at the time.

Clayton said at the time, "He was looking for a good means of drawing readers to the editorial page. Clayton asked the staff, the Bode legend goes, if there was a local character similar to "Kilroy" of World War II fame.

So happened there was a Gus Bode whose name could be spotted on almost any scribbled wall at the time. Clayton decided to appropriate the character for use in the newspaper.

The comment that turned out to be a promising debut was "Gus Bode says...". We hear the recruiters had slim pickings this year. The grades must have been better than expected.

Gus underwent several transformations in the next few years. He started out on the front page as one paragraph. Soon after his debut he moved to the editorial page and expanded to several paragraphs.

But the year Gus finally came out of the closet, being illustrated for the first time, was a closely resembling the present-day Gus.

Shortly after becoming visible, Gus was revved to the front page and began appearing on a daily, rather than semi-weekly basis.

Gus has also undergone a change in the last eight years, according to Bill Harmon, faculty managing editor of the Daily Egyptian.

"I think the big change is in his comments," Harmon said. "The purpose now is to make what Gus says topical and timely each day, commenting on a subject he deals with in a news story or photo on the front page.

"He became more editorial in that respect around 1976. Prior to that, he would just make a quick shot about something on campus, or of interest to the audience of the paper, just to draw a chuckle."

Gus still tries to draw a chuckle, Harmon said, but it might hit a more ironic, wry, satirical kind of note.

And during his long experience of providing his own special brand of news commentary, Gus has been at the seat of controversy more than once.

In 1967, Gus remarked that he was having a hard time deciding where to go for a vacation. He said he was torn between "one year in Vietnam and 50 years in Canada."

An invasion of the Daily Egyptian newsroom followed a comment made by Gus in 1971. Gus referred to women as "chicks," and in a later remark said, "If God had made women to be equal, he'd have made 'em men."

This prompted some members of the Daily Egyptian Liberation movement to invade the newsroom. They released a live chicken in the newsroom to show Gus what a "chick" looked like. They also threw pieces of raw chicken about the room.

The women demanded that the word "chick" no longer be used in reference to women, that Ms. be used as the form of address for women in all articles and statements by Gus be retracted, among other things.

Harmon related another incident where some women were dissatisfied with remarks made by Gus about the feminist movement.

Harmon said about three women came into the newsroom dressed as Shakespearean witches and chanted something. He said they pulled out a portable fire extinguisher and sprayed foam throughout the newsroom.

The foam got into typewriters, doing a lot of damage, and forced the newsroom to "- - - - - - for several hours until a team from the Physical Plant could clean things up, Harmon said.

"Gus doesn't necessarily represent the editorial view of the newspaper, although I suppose he is in tune with the liberal point of view," Harmon said.

"He plays devil's advocate in a sense. He doesn't automatically side with students, administrators or faculty. He's his own man and independent, which is how he was meant to be. In that sense, he's the common man, or everyman."

Gus' favorite target is stuffed shorts, Harmon said, of whom there are a number around, he added. "Anyone who takes themselves too seriously, anyone who pops up in the news that exhibits that charachteristic, is fair game for Gus."

Harmon said Gus usually has a pro-student point of view, although students are no more exempt from his comments than anyone else.

Numerous drawings of Gus in different situations are kept in a drawer in the Daily Egyptian newsroom. That ensures Gus will stay just as stable graphically over the years.

Throughout the years, however, and past Gus Bode in the paper, no trace can be found of him. He couldn't be reached for an interview, Harmon said.

"He may not be flesh and blood, but Gus is real. He's one of a kind."

Gus Bode's comments lose some of their punch and meaning when quoted apart from the context of the news—but some still bear repeating as examples of the irreverent and incomparable spirit. And now and then, he utters

(Continued on next page)
something that has a timeless quality.
For instance, when streakers were grabbing national as well as local atten-
tion, Gus noted that “they used to call
it show and tell.”
And when the City Council was
grappling with problems posed by
passage parties, he reminded his
readers that “morality legislation
always hits below the belt.
When Professor Harri Rubin of the
Psychology Department and federally-

funded research into effects of
marijuana on male sexual responses
became targets of criticism by
lawmakers and others who thought a
sex-pot study,” as it was popularly
known, “but he’s immortal, Gus
observed that “people have been
studying pot and sex for years—they just
didn’t get government money for it.”
An “inside joke” in the Daily Egyptian
report is that the “perfect” Gus
Rode witicism will incorporate sex,
dope, politics, religion and money all to
see—and will, consequently, appeal to
almost everybody’s interests and make
the reader laugh.
But those aren’t the only subjects that
draw his attention, nor is it aims
simply to make people mad—although he
manages to do that not infrequently.
Anthony Hall and its inhabitants are
Gus targets when the seat of STEM-
administration is involved, and
sometimes when it isn’t. A visit to the campus by a circus clown,
enticing an upcomin g appearance in
the Arena by the Ringlelings, Brothers, was occasion
enough for Gus to remark that “the
difference between Anthony Hall and
Ringlelings Brothers is the grease paint.”
Gus apparently doesn’t hold the
faculty in any higher regard than he
does with the administration. When the
Faculty Senate debated without
resolution a proposal to divide the
athletics fee equally among men’s and
women’s programs, Gus chided that
the Faculty Senate “had a shot at the
athletics fee issue but it stumble dribbled
and fouled out.”
Student government, too, is fair game
for Gus. A story about the costs of
student government moved Gus to
declare that “when you divide what the
student government crowd is paid by
the number of students they serve, you
get twice what they’re worth.”
Parking on campus and the problems
generated by too many cars for too
few spaces frequently draw Gus’s attention,
as when he suggested that “a count of
empty spaces in the lots tells how
many faculty are sacked in for the
morning or playing golf in the
afternoon.” And when the parking garage
opened, after controversy over how
many spaces there would be for
students, Gus said “not every campus
has a monument to a big joke.”
Gus usually sides with students on
parking issues, and he sided with the
custodians when the campus broom
brigade struck over a wage dispute,
commenting that “the dirtiest part of a
janitor’s job is getting a decent con-
tract.”
So sympathetic, most of the time, to
students pinched by the rising costs of
everything and opposed, usually, to
increases in tuition, fees and book
prices. “The painful part of buying
books,” Gus said, was “the price of how
many pizzas, beers and movies they’re
worth.”
And on the recent $5 increase in the
Health Service fee, he said, “for $5 more
the student service we get you a smile
with the aspirin.”
Lawyers, politicians and government
in general can expect barbs from Gus
when they’re in the news.
When the presiden
tial campaign
brought Jimmy Carter to campus, Gus
remarked that “if Jimmy's peanuts are
like his speeches, they're not the kind
you can chew alone.”
And when Carbondale city officials
were facing with the Environmental
Protection Agency over the city’s land-
fill. Gus offered that “they could store
the garbage at City Hall—nobody would
know it's there.”
That’s Gus.

Sylvia Chalem, 26, originally from Olney, who has a bachelor of science degree in nursing from SIU-Edwardsville (after two years at SIU-C), is one of 15 nurses on the Health Service staff. There are also seven physicians, a psychiatry, a voice-throat specialist, radiologist, three X-ray technicians, three lab technicians, two pharmacists and two pharmacy technicians and about 23 other support staff working to keep SIU students healthy.

The Health Service story is on Page 2.
Nine health care programs available

By Diane Chambers
Student Writer

Seeking help for ailments ranging from common colds to broken legs, students made more than $8,000 visits to the SIU Health Service in the past year to receive treatment provided for under a $5 a semester health plan.

Located at 115 Small Group Housing, the Health Service provides for the total health care of the student with programs ranging from illness, counseling, and self-styled therapy to hospitalization, according to service officials.

The health program has nine major areas of service for the students. They are: prevention programs, primary care, specialty care, specialty care, emergency hospital, ambulatory services, a dental program and out-of-area services.

Prevention programs provide students with skills which are necessary to help them take care of themselves.

There's no surer way to help one's health than by following healthy habits, according to administrative director. Services include programs in: health education, self-help, alcohol education and drug and self-help education and drug and alcohol education and drug and alcohol education and drug and other problem areas.

A person's surroundings and the way he lives his life is the focus of the specialty care. The program seeks to help students live healthier lives by taking an active role in helping them maintain their health.

Human Sexuality Services provide educational information and counseling pertaining to the subject in an effort to foster a positive concept of sexuality and relationships.

The self-help program helps students develop a responsibility for their own health, while Synergy is an alternative program which provides students with a drug crisis help, a referral service and peer counseling.

Health education is a new program beginning this fall. The program was established because alcohol abuse is a major drug problem among college students, Health Service officials say. Primary care is similar to what is offered by the student's family doctor.

Through this program, students can receive office care and diagnostic tests. A pharmacy service and pap tests are provided at cost along with a five dollar charge for X-rays. A walk-in clinic is open from 8 a.m. to 5 p.m. Monday through Friday.

Inpatient care is provided when the student is in need of medical and nursing care but does not require hospitalization. There is no charge for inpatient care, except for medication on a replacement cost basis.

Emergency services are provided at the Health Service during business hours. After the Health Service closes, emergencies are handled at Memorial Hospital, 404 W. Main St., Carbondale. This service is free except for a $10 user's fee at Memorial Hospital.

Students with medical emergencies may use the ambulance service to get to Health Service or Memorial Hospital free.

Specialty care is available to students by referral of a health service physician. Specialty services include: surgery, a dermatology program, and gynecology, pathology, radiology, orthopedics, and urology and other services.

Out-of-area benefits are provided to students who are not on the Carbondale campus, or require care not provided in Carbondale. After the student pays the first $25 of expenses, benefits are provided by an insurance company which pays up to $500 of a person's medical expenses and 75 percent thereafter up to $5,000.

The dental program provides dental cleaning and X-rays at no charge. The program provides care for emergency dental problems.

Students who have comparable medical coverage may apply for a refund of portions of the Medical Benefit Fee. Refunds are made on the basis of comparable coverage for each area. Students who qualify may apply no later than the end of the third week of the semester.

Muriel Narve, head of the diagnostic laboratory, directs a student technician operating a centrifuge.
Sexuality advice service answers student queries

By Jill Michielli
Staff Writer

Would you know where to go if you had a problem pregnancy, venereal disease or were dissatisfied with your sexual life? The answer to these questions can be answered simply: Human Sexuality Services.

Human Sexuality Services is a division of the Health Service and is a part of the prevention programs. Coordinator of the service, Sang, Landis, said the program has grown greatly since its beginning in 1972.

"In the beginning, many of the University students were going to the Jackson County Family Planning Service for sexual counseling," Landis said. "At that time it was hard for the doctors to treat the patient and also offer adequate counseling in the area.

"But programs began to appear. By now they're all over the place. The Health Service receives one problem pregnancy per day. The program is required by law to submit the report to the Public Health Department, where counselors there do the follow-up.

"Landis said that if students come to her for counseling, she helps them deal with guilt feelings, and also helps them to tell a partner that they have contacted the disease.

"Weekends for sexual awareness workshops are held at the Health Service, by the Department of Continuing Education. These workshops are held in conjunction with the Department of Continuing Education. The workshops are open to students, and people outside the University.

"The service tries to create a more effective way for people to deal with the feelings which go along with sex, such as love and women's friendship. Landis commented, "We deal with sexuality in a positive way."

How's your environment? University wants to know

Beginning this fall, SIU student affairs officers will ask 96 students each month how they feel about day-to-day life on campus. They hope the answers will help the University do a better job of meeting the wide-range needs of its 22,500 students.

Called the "Environmental Assessment Project," the monthly sampling of student opinion is a compilation of questionnaires filled out by the 96 student resident assistants who help St. Louis University's 17 off-campus residence halls.

The resident assistants will evaluate as many as 80 separate campus offices that serve students. Items to be graded will range from residence hall food service to the courtesy of University police officers.

They'll also answer questions designed to assess the overall emotional state of students.

"There's a lot we just don't know about our students," said Bruce Swinburne, SIU's vice-president for student affairs. "This is one way to find out something about how they view their campus environment." The project is the brainchild of SIU Counseling Center director Charles Landis. He thinks it's important that University administrators know how students feel about how they're treated by the University.

"We're becoming increasingly aware of the psychological importance of the various environments we live in," Landis said. "Swinburne says summaries of each month's questionnaire results will be prepared and circulated to campus administrators whose operations affect students regularly."

Problem solver

University ombudsperson is experienced ‘red tape’ cutter

by Randy Redfield
Student Writer

You have a grievance against the University, and your efforts to solve the problem have yielded less than satisfactory results. Where do you go? The University ombudsperson exists to "help all persons in the University with virtually any problem," said SIU ombudsperson Ingrid Gadway.

Since 1969, SIU has had an ombudsperson who has helped people solve problems--"rarely does a client leave the office unsatisfied," Gadway said. An ombudsperson is an independent public officer who deals with the complaints of people who feel they've been abused by the bureaucracy in which the ombudsperson serves.

The ombuds concept originated in Sweden's parliament 166 years ago and has since been adopted by bureaucracies throughout the world.

Gadway, whose office is located on the third floor of Wing C in Woody Hall, is assisted by Gary Duncan, associate ombudsperson and Lynn Conley, associate ombudsperson.

"The most prevalent problems the office deals with concern financial difficulties and grades," Gadway said. However, "many problems are due to plain ignorance about the University system," she added.

"In most situations we try to ask, 'What does the student want?' and 'What can the system give?'" Gadway said. "Sometimes a student will be stranded without money because he didn’t know what grants and scholarships were available."

Often the ombuds office can help students secure government funding, but "sometimes people are impossible," Gadway said. "We can't help the person who just bought a stereo then comes to us wanting money.

"Nearly all those who come to the ombuds office come in good faith," said Gadway, "though we get an occasional liar.

The person "who brings a complaint to the ombudsperson thinking that some magical or political string will be pulled is likely to be disappointed," Gadway said in a report recently.

"In most problems concerning grades," said she, "we ask, 'Where is the area of discontent?' Usually the teacher either singled this person out and treated him or her unusually or his or her low grade was due to some documented illness." she said. "We try to either change the grade, or have the teacher give a total explanation as to why he gave it. Sometimes the student has no alternative but to file a formal grievance against a faculty member."

"There seems to be a lot of trouble with graduate assistants and their grading ability, probably due to a lack of experience," she said.

"The office is a place to discuss problems in confidence," Gadway said. "Nothing leaves the office without the client’s permission. The only way this privacy could be invaded would be from a court subpoena of the ombuds' records," she said. However, this has only happened once in the United States, she added.

"If the confidence of the clients is not treated with discretion, they would reject assistance," she said.

Another aspect of the ombuds role is in the need for impartiality. The term 'ombudsperson' should not be confused with that of 'student's advocate," Gadway said. "We don't want to take on causes or take sides. If the administrators believe that the ombudsperson attempts to settle all questions in favor of the client, pleas for assistance will soon fall on deaf ears.

The SIU ombudsperson acts as a mediator between the grievant and the University in problem situations. Independence is essential for the ombudsperson. The office must be "as free as possible from the influence of administrators..." wrote Gadway. The office "must be assured that attempts to perform the ombuds function will not result in job termination."

Recognition of the ombudsman by administrators is generally good and getting better, Gadway said.

"In fact," she said, "they often refer people who have problems to us.

The office has never had a problem so difficult it had to be taken to the University president, she said, but a few problems, usually appeals of disciplinary actions, have gone as far as the vice-president.

"It's hard to think of the ombuds office in terms of power," said Duncan. The ombudsperson must rely on freedom and mobility to solve difficult problems.

The ombudsperson's weapons include criticism, persuasion and tact. "Administrators are sensitive to publicity," Gadway said. "They don't want to make bad decisions.

"We want to make sure everyone gets treated fairly," Gadway said. "We might not be able to help, but we'll try."

Streeter's on the case

By Dana DeJanerich
Student Writer

A student, with only three weeks left in the semester, is told by her landlord to move out of his apartment immediately. Another student is frustrated when she tries to clear a security deposit held by her landlord. And a third student wants a lawyer to appear in court when police seek to revoke his driver's license because of a third traffic violation.

All can get help at SIU from the student attorney, Elizabeth Streeter, whose office is supported by a $1-per-semester fee paid by students.

Streeter, who became the first SIU student attorney in April 1977, is the student's advocate in cases involving landlord-tenant disputes, traffic violations, where suspension of a driver's license is pending, uncontested divorces, consumer problems and small claims.

Criminal cases, real estate problems, contested divorces and cases between two students are not handled by Streeter. However, she will refer students to area attorneys who can give assistance.

"Any time you have a legal problem we encourage them to come into the office and talk to us. We can't help them, we will refer them to attorneys who can," Streeter said. The Student's Legal Assistance Office is located on the third floor of the Student Center.

"At first it was a little lonely. I didn't know how to start and I had the task of organizing this office," Streeter said. She came to rely on the attorneys in the area for assistance and consequently, has a good background for referring students. Streeter said these attorneys "never cheat the students; they're concerned with helping out students who are seeking legal counsel."

"Many times attorneys will tell the student if the cost involved to secure counsel is excessive and whether they can help the student at all," Streeter said.

The $1-per-semester fee pays for retaining the Student attorney's counsel but the student must pay for court expenses. These costs can range from $15.25 for a small claims case to $57 for a divorce.

"It's like having prepaid legal insurance. You really can't predict when you might need legal assistance," Streeter said, referring to the semester fee. A student may get a refund on this fee but then becomes ineligible for legal counsel from the student attorney.

Streeter, originally from Indianapolis, Ind., received a bachelor's degree in English from Vassar College in 1972 and a law degree from Chicago-Kent College of Law in 1975. She passed the bar examination in August 1975 and began practice in November that year. She practiced law in the Chicago area until April 1977 when she came to SIU.

Synergy lends a helping hand

By Jim McCarty
Summer Special Staff

It is hard to describe the job of a Synergy person. He or she is in the helping field. Synergy is a non-profit organization designed to help people.

Inside the geodesic dome at 9th S. Illinois Ave. sits a 24-hour day crisis intervention hotline. People can call in for help involving drugs and other problems.

Synergy staffers operate an emergency go-out service in conjunction with the SIU Counseling Center. For persons who are involved in crisis situations that demand immediate attention. Without Synergy, some of these cases might end up in suicide.

According to Paula Vollmer, Synergy counselor, drug crises are not as common as they were in the past. Today's problems, she said, are more likely to involve personal relationships and suicidal tendencies.

Synergy also sponsors training groups that teach crisis or communication skills, peer awareness, and group processing. People who complete the training often volunteer their services to the community.

Speakers from Synergy are available to give talks and workshops to community, school or church groups.

In emergency cases Synergy can provide temporary food and housing, but Vollmer said these are strictly temporary arrangements and are only made in cases of extreme emergency.

Synergy operates on a limited budget funded by the SIU Health Service, the Illinois Dangerous Drug Commission and the Carbondale Unified Fund. Services are free of charge.

The eight-year-old operation used to run a drug identification service but was forced to cancel it. In the past, Synergy confidentially delivered drugs and relayed them to a firm in Chicago that analyzed and identified them.

Although this service was helpful, particularly during the parquet scare last spring, Synergy had to discontinue the service because the firm in Chicago is having licensing problems.

Persons interested in knowing more about Synergy or need help, can call the crisis line, 549-3333.

Scholars learn at their own pace

By Randy Readfield
Student Writer

Independent studies. Proficiency credit. Special library privileges. Special majors. Honors sections, classes and seminars. These are a few of the privileges the President's Scholars Program offers the above-average student.

The purpose of the program is to provide opportunities for the above-average student to develop his or her potential," said John Belcher, program coordinator and researcher.

Students can earn up to 42 hours of credit in the program by taking either independent studies or honors and seminar classes. Each student in the program, however, is required to take at least one of these courses a year.

Students with grade-point averages of 3.25 (B) or better for 30 or more hours of credit and entering students with ACT scores of at least 28 who rank in the upper ten percent of their high school class are eligible to join. Entering students who have ACT scores of at least 26 and who rank in the upper five percent of their high school class are eligible.

"In independent studies, any topic is worthy of study," said Belcher, whose office is located on the first floor of Woody Hall, Wing C. Though it is "the product, not the topic" which is emphasized. "Research programs which result in publishable material are one of the best ways for a student to advance himself," he added.

Students in the program have the option of taking proficiency exams and College Level Examination Programs (known as CLEP tests). These enable the student to obtain credit based on knowledge or he or she may already possess.

They are also able to receive early registration appointments that allow for early registration.

Extended library privileges enable the student to borrow library books for four weeks instead of the usual three.

A special major called the President's Degree Program designs his or her own curriculum and goals. The student must select or be assigned to a faculty member who assists him or her.

Besides such things as obtaining credit for designing the curriculum itself, the President's Degree Program student can waive University general studies requirements. The Special Major Program and the President's Degree Programs, both offered by President's Scholars, are similar, but the President's Degree Program is the "more flexible and more prestigious" of the two, Belcher said.

Honors seminars may be taken as a substitute for general studies. These are usually specialized courses taught by a faculty member who has done extensive research on a subject. For example, this fall's seminar courses include such topics as: Drugs and Poisons from Nature, Biological Rhythms, Values in the Communications Age, Techniques of Information Retrieval and about nine other courses.

The Program, which was founded in 1957 by former University President Delyte Morris, is expected to undergo various changes in the coming years, said Belcher. However, he said he is not certain what changes will be made.

Tenant union treats student housing ills

By Mike Field
Staff Writer

It's a sweltering day in August, and your air conditioner has been broken down for several days. The sewer has been backed up in your bathtub for a week.

You've contacted your landlord, and he's repeatedly promised to see to those inconveniences right away. "He's made no efforts to correct the problems, so you decide to take action against him. Where do you go for help?"

One place to start is the Student Tenant Union (STU), located on the third floor of the Student Center. STU is an organization designed to help students with all types of landlord-tenant problems. It is composed of volunteers who try to answer questions ranging from interpretation of housing contracts to recommending legal assistance.

In addition to students' property by landlords for nonpayment of rent and getting deposits back after a student has moved out, have been some past problems encountered by STU.

In most instances, if STU cannot effectively deal with the situation, the students' attorney can be consulted and may represent a student in court, if necessary.

In all cases, though, the assistance will be provided to a student, whether from STU, the students' attorney or from other sources.

One possibility for the future is the merging of Student Government and STU, according to Garrick Clinton-Matthews, student president, the merging would provide volunteers at STU with salaries and could extend the amount of time that the organization can remain open. Currently, STU is not open during summer sessions.

I hope that by late allocations time in January we can make the Student Tenant Union a part of Student Government and make it even more effective in dealing with student housing problems," Matthews said.

"I would like to see it serve as a liaison between students and their representatives in Student Government, that way they could receive more funding and hire more people to help out in the process."

Tenant union representatives have warned students in the past to read contracts or leases carefully before signing them, and to make agreements with landlords in writing only. The best way to deal with some of these kinds of problems, they say, is to prevent them from happening.

Newman Center programs varied

The Newman Catholic Student Center, at the corner of Washington and Grand in Carbondale, is ready to greet new and returning students, faculty and townspeople this fall, according to Bill Atkinson, coordinator.

The center's "personal growth" programming includes human relations seminars, encounter weekends, retreat nights, pause encounters, human sexuality talks and counseling.

Volunteer programming includes big brother and sister tutoring, reading for the blind and visits to mentally retarded patients at an institute in Anna.

Religious education programming includes a scripture-reading class, lecture series, an adult convert program, update programs and others, Atkinson said.

Social programming includes volleyball games and the Royal Lachmanstein Quarter-Hour Circuit. All religious and non-religious programs are free and open to the public.

HAIR'S WHAT'S HAPPENING
FALL-WINTER 1978-79

Metro Hair - an exciting new hairfashion for fall and winter is a versatile style that enables the modern woman to change her hair for every role of her active life. It can be fashioned for a no-nonsense business look and then be easily reeyled for a completely different evening look and for more casual weekend moods.

Metro Hair is a precision cut that can be worn in different lengths ranging from just-below the shoulder to very short. It exposes the ears by careful trimming of the hair just above them and brings back short bangs which can be worn in curls, straight swept up to the side.

WHEREVER YOU LIVE...
Counseling Center helps students deal with stress

By Joe McCarthy
Staff Writer

Having problems with your grades and thinking about committing suicide? How about your sex life, job, marriage and other personal matters? Have they all been going down the drain lately?

The Counseling Center provides confidential psychological services free of charge to students, faculty and staff as well as their spouses or elderly dependents.

Many people in the academic environment encounter problems from the pressures of producing an educational system decried according to Charles Landis, director of the Counseling Center in room A-202, Woody Hall.

"Many of these problems are normal developmental kinds of issues but we also work with some people who are very seriously disturbed." Whatever the problem is, Landis said, "our job is to assist them in resolving these issues in a warm, accepting, non-judgemental atmosphere."

Individuals, couples, and groups can get counseling on a wide variety of psychological or emotional concerns, including situational and personal growth issues, depression, stress, marital or relationship problems and sexual concerns.

The Counseling Center also organizes personal development groups which involve people with common concerns. These groups receive training and support in the areas of assertiveness training, which Landis described as being able to get along in society without having to be either passive or aggressive. Stress reduction, social skills, weight control, sexual awareness and couple workshops are among the other services provided by the center.

Landis said these problems are usually dealt with most effectively on a group basis. "In this type of atmosphere people soon realize that their problems are not as bizarre or unique as they usually think they are," he said. However, he added that people often ask for one or two individual sessions before joining in group discussion.

Most of the counseling done at the center is short term, from four to six sessions, but long-term counseling is available.

Appointments for counseling can be made by calling the Counseling Center at 652-3871.

"Prior appointments are encouraged, but persons without an appointment may see a counselor on a walk-in basis Monday through Friday from 10 a.m. to 3:30 p.m."

Before the initial counseling session, people are asked to fill out a personal background form that asks for a brief description of the problem. Then the counselor, who is the intake counselor who discusses the problem with the client at length.

This procedure helps the counselor center the client up with the counselor who is best qualified to handle his or her specific need. Landis said. He added that if the center cannot meet the needs of a client, he or she will be referred to an agency that can deal with the particular problem more adequately.

The Center is staffed by ten experienced professionals, half of whom have doctorate degrees in clinical or counseling psychology. The staff also includes six graduate interns and a graduate student practicing work in psychology or rehabilitation counseling.

Landis said these students are given constant supervision and are assigned clients with problems appropriate to their levels of training and experience.

"Our training program is one of the five university counseling center programs in the United States that is approved by the American Psychological Association," he said. The students selected for the program are the most highly qualified of a large number of applicants.

Landis himself has a master's degree in counseling psychology from the University of Northern Iowa at Cedar Falls. Before coming to NIU in the fall of 1973, Landis was a Presbyterian minister at Northern Iowa.

Landis said his ministerial experience provided him with a background he couldn't have gotten any other way. "It involved me with people regularly in the crisis events in their lives."

Aside from counseling about 600 clients a year, the Counseling Center also provides assistance to campus agencies or organizations to help them in dealing with internal problems or exploring options for functions.

Consultation is also available to individual faculty or staff in resolving classroom problems, assisting students under emotional stress, making referrals for counseling and special classroom instruction.

A crisis intervention go-out service is provided by the Counseling Center in conjunction with the Psychology Department and Synergy. This service has trained teams on 24-hour call to respond to most crisis situations, whether they deal with suicidal tendencies, misuse of drugs, deviant behavior, or extreme depression.

The Center for Basic Skills, a part of the University's Special Admissions Program, is designed for students who do not meet regular University admission standards.

Under the program, a student must have an ACT score of 15, or be in the top half of his class and have an ACT score of 18 to be admitted. The center helps people with potential for academic success who do not meet the admission requirements.

When a prospective student doesn't meet admission requirements, his or her application is sent to a Special Admissions Committee. The committee then places the student in either the center or Special Supportive Services, a special admissions program for culturally disadvantaged students who meet federal guidelines.

A workshop is designed to teach students reading, writing and mathmatics, according to Lillie M. Lockhart, the center director. Through ten classes designed for students with problems in the three areas, the center helps them to improve their ability in these subjects.

Students enrolled in the center take placement tests during the summer to determine whether they may take regular classes or center-sponsored courses. Credit is given for the three classes offered through the center, which are taught by SIU faculty and graduate assistants.

In addition to the classes, the center has tutors, supplemental laboratories and special workshops to aid its students in the basic skills.

"The workshops are designed particularly for our students, but we also take other people if the clinic isn't filled," Lockhart said.

Students remain in the program only during their first year, long enough for improvement in the basic skills, Lockhart said.

Students about 250 students enrolled in the program last year.

Have you ever looked around this campus and wondered why there are almost two guys for every girl? No, it doesn’t just seem that way. SIU has 12,912 full-time male students and 7,066 full-time female students, according to the 1977-78 American College Testing program figures.

While this might please female students, it leaves men with something to be desired. But don’t lose hope gentlemen, the SIU administration is aware of the problem and is acting to remedy the situation.

The office of Admissions and Records is launching a drive to attract more females to campus by preparing special brochures aimed specifically at women. The brochures are being prepared by Catherine Walsh, Admissions and Records field representative. She said they will tell women about the educational opportunities for them.

Although the office of admissions and records does not have any specific goals in mind, like a perfect balance between the number of men and women, it is hoped that the drive will even out the ratio of men to women, which is less balanced at SIU than at other major colleges in the state.

SIU-Carbondale has 1,711 male students and 1,096 female students. The University of Illinois at Champaign-Urbana has 1,556 males per female .. U of Chicago has 1,174 males per female .. Western Illinois University, 1,210 males per female .. Northern Illinois University, 1,146 males per female .. SIU Edwardsville, 1,061 males per female .. Eastern, 954 males per female . Illinois State, 941 males per female.

These figures are based on the 1977-78 ACT report and represent full-time enrollment only.

The report showed that the percentage of women to men in colleges across the country rose from 46.4 in 1975-76 to 47.5 in 1977-78. It is expected that the percentage of women enrolled in college universl will soon reach 50.

The rise in female enrollment has been a boon to most universities. The ACT report stated, “Only the enrollment of women in increasing numbers prevented the collegiate grand total (nationwide) from declining in 1977-78.”

Many traditionally male fields have been opening to women with great success. This trend is most apparent in the School of Agriculture. In 1966 only two women were enrolled in the program, compared to 343 men. In 1977-78, 731 women were enrolled in agriculture, along with 851 men.

Gilbert Kroening, dean of the school, said he couldn’t be happier about the situation.

“We are holding their own in the classroom and the job market,” he said. “As long as this keeps up we are more than happy to welcome them here.”

Kroening said women have taken greater interest in agriculture only recently, but the women who have graduated in the past two years and landed jobs in their field of study have been making between $10,000 and $12,000 a year, the same as most men.

Kroening said women make up 27 per cent of the nation’s agriculture students and in some states, like Michigan, up to 40 per cent.

The change in women’s attitudes toward careers is partially responsible for this trend, Kroening said. “Since the early 1970’s, people have become more aware of things like world competition for a limited amount of food and protection of the environment. The field of agriculture has reached out to cover these areas and in doing so opened up job opportunities in areas like environmental protection, zoology and agriculture,” he said. “Women,” he added, “have wisely recognized these new opportunities.”

The School of Business and Administration also reports a substantial increase in the number of women enrolled. In 1974, 181 women were enrolled in the school along with 1,043 men. In 1978, 441 women were enrolled with 1,354 men.

The College of Human Resources, which offers majors in such fields as child and family, clothing and textiles and interior design, has had its male enrollment drop while the female enrollment increased. In 1974, the school had 796 women and 536 men. In 1978, the figures were 982 women and 452 men.

The College of Education reports a drop in both male and female enrollments due to a tight job market in the field. In 1974, the school had 1,360 female students enrolled with 1,141 men. In 1978, those figures decreased to 1,196 women and 977 men.

While its enrollment is a low way from equilibrium, the School of Engineering and Technology reports an increase in its female enrollment. In 1974, only 11 women were enrolled with 897 men. In 1978, both figures were up, 40 women and 1,174 men. Dean Thomas Jefferson, while happy with the increased number of women, conceded, “There ought to be a bunch more.”

The College of Communication and Fine Arts had 821 women and 1,404 men enrolled in 1974. Last spring there were 951 women and 1,472 men.

The General Studies program had 1,175 women and 1,550 men in 1974. But in 1978 the figures balanced out to 1,257 women and 1,362 men.

The College of Liberal Arts had 490 women and 1,288 men enrolled in 1974 and 508 women and 976 men in 1978.

The College of Science had 490 women and 1,288 men enrolled in 1974. While the male enrollment went up to 1,803 in 1978, the female enrollment increased to 507.

The School of Technical Careers had 859 females and 967 males enrolled in 1974. By 1978, it had 706 women and 1,064 men.

The School of Law had 38 women and 63 men in 1974. In 1978, the figures were 79 women and 229 men.
Handicapped integrated into campus activities

By Madeline Redford
Student Writer

There exists on this campus a unique minority group which comprises many races and religions, both sexes and all ages. The university administration is well aware of this group, the physically handicapped, and strives to integrate these students into regular student life. To assist these handicapped students, the Specialized Student Services program offers a wide range of services through the office and other campus departments.

In making these services and facilities available to disabled students, the main emphasis is placed on integration, not specialized segregation, according to Ron Blosser, coordinator. The Specialized Student Services Office is located in Woody Hall.

"Even though our office offers numerous services to the handicapped, we encourage them to be as independent as possible," said Blosser. Though many physical barriers such as curbsides or narrow doors are eliminated or modified and special services are available, Blosser believes that the student must supply the necessary initiative to make use of the available campus resources.

Blosser's office assists the student from the beginning of his or her college career through advisory services ranging from counseling to housing referrals. According to Blosser, about half of the students live on-campus housing.

The university operates two vans with hydraulic lifts for handicapped students. The van service is available, free-of-charge, to provide transportation to and from campus, to the train station and airports and for emergency services.

To those who indicate a need for a paid attendant to assist them in daily activities, the Illinois Division of Vocational Rehabilitation provides funds for attendants employed by clients.

“Our office is here to refer prospective attendants to the student, but it is his responsibility to contact and employ his own attendant," said Blosser. "The volunteer effort is good here, but experience shows that paid attendants are usually much more reliable."

The Specialized Student Services office recruits prospective readers, note-takers and interpreters and keeps a list of these persons. The office, in cooperation with Illinois Community Services for the Visually Handicapped, Ltd., provides orientation and mobility training to students requesting assistance. The office will also order textbooks on cassette or reel-to-reel tapes; tailgaters and related equipment are also available on a loan basis.

The University has developed many recreational programs for the handicapped, both competitive and non-competitive in nature. Most of the Recreation Building’s facilities are accessible to students with physical limitations. The student advisory board promotes such activities as softball, bowling and swimming for the blind and visually impaired. The University also sponsors a Wheelchair Athletic Club.

The majority of the services offered by the Specialized Student Services office are administered free to those who show need. For more information or assistance, handicapped students can contact Blosser’s office, which serves as a facilitating service for disabled students and for University personnel who work with them.

"The University’s commitment to our office and its programs is evidenced by the funding, both state and federal, for barrier modification and support services," said Blosser. "We utilize what we do get in the most appropriate manner." At the present, SIU has a three to four year plan for removal of physical barriers on campus, but the plan awaits funding approval by state officials, Blosser said.

Seven groups are working for women

By Deb Browne
Staff Writer

Four women might be leisurely playing bridge while another anticipates a job interview she'll have with a man, and yet another sits in a dimly-lighted room, struggling to forget a brawl she's had with her husband.

The settings could be anyone of several meeting places for women's groups in Carbondale. Some are situated on the SIU campus.

There are at least seven active organizations in the area that promote a wide variety of women's interests ranging from classroom encounters to legal disputes.

Out of these organizations along with a brief description of each is as follows:

Women's Programs, Woody Hall B-34, was formed in 1973 to help women overcome barriers they face as students, according to Bunny Britton.

"Our goal," Britton describes the situation, "is not a lot of discouragement, but there's not much encouragement or stimulus, either," she explained.

The program helps women who have educational, vocational, and personal problems through seminars, workshops, support groups, and a reference library. Seminars, held weekly in the Family Living Lounge in the home economics building, have covered such topics as:

- "What Happened to the Recent National Women's Caucus"?
- "Women's health, self-maintenance and rape.
- "Women have covered such topics as:"

Women's Caucus is a group of women faculty, staff, for women today in academic and students, holds monthly luncheon programs relating to university issues at the Thebes room in the Student Center.

At a luncheon last day, D-semester President Brandt, vice presidents and academic deans spoke to the caucus.

Women's Caucus is trying to establish a sexist language from University documents and asking students to search committees urging them to hire women and has formed a telephone triage.

The Feminist Action Coalition last year won a $150 at the state level for a political education program. Involving Jane Napp and group Sweet Honey on the Rock, but was less active this year according to Sylvia Greenfield, 602-226.

Helping women "meet new people," is the main function of the Women's Club, according to President Jean Kroening.

The Women's Club is a social organization composed of over 300 faculty members, students, administrators, and wives of university employees. They hold monthly activities including a fashion show and tea, dessert bridge and shopping expeditions.

The club also has 26 interest groups including gourmet-cooking, wine-tasting, bridge, square dancing and foreign languages. Each is $1 a year.

Each year the group gives a $200-$500 scholarship to a junior coed at SIU.

The Women's Center, at 408 W. Freeman, offers shelter for women and their children for up to three days for a small fee. According to women's ad-vocate Kathy Statham, in one month the center housed 48 persons. Over half were escaping from "battering situations," she said.

The center also performs pregnancy testing for $2 by appointment.

A volunteer staff is always on hand at the center for information and referral.

The Rape Action Committee helps victims of sexual assault who need legal, medical or psychological assistance. For more information or help, call 539-2334.

As women's advocate, Statham, one of two full-time paid staff, is as women's advocate, Statham, one of two full-time paid staff, will accompany women through divorce or rape court proceedings, help them apply for public aid, register at a job service, or find housing.

The Women's Center also offers films and discussion groups in a variety of areas, including auto clinics, self-defense, parenting, training, legal information, peer support group for divorced women, assertiveness training, job interview skills and other topics.

The office acts as a go-between agency, referring students to other area help services.

Britton and three other staffers are currently writing the office's resource directory, to be available early fall, which will include a complete "coping in Carbondale."

They also publish a monthly newsletter, "Women's News", that lists their upcoming activities. It can be found in the back of the library at Woodhull and in some Daily Egyptian distribution points.

Women's Caucus is a group of women faculty, staff, for women today in academic and students, holds monthly luncheon programs relating to university issues at the Thebes room in the Student Center.

Register cars now, bikes in 2 weeks

By Mary Beth Stockey
Student Writer

Is it too early to be home for the first time? There’s a whole new town out there to be explored.

But if you ride a bicycle while exploring or try to get to class and back, be sure that the University and the city require registering them. If you do, you’ll be registering with one satisfied the requirements of the other. The fee is $2 since the University’s recent enactment of new bike rules including a $1 increase. Tags are attached while you wait. Registration on campus will begin about two weeks after the start of the fall term. Virgil Trummer, chief campus police, said. And police will announce when enforcement of the licensing requirement will begin.

Trummer said the grace period for bike riders ends Sept. 10. The Parking Divisions Office will be busy with auto registrations at start of the term. University regulations now require that a bicycle have a workable horn or bell. Reflectors are required on the front and rear of pedals and side reflectors on the front and rear. Bikes must have white front lamps and red rear lamps or reflectors for after-dark use.

Failing to comply can cause equipment regulations can result in a $2 fine. Fines for moving violations are a lot higher. A $100 fine or a moving violation can result from failure to obey the Illinois Rules of the Road.

If a fine is not paid within one week of the date it is registered, a penalty of $2 will be added. If an accumulation of tickets results, a licensing of $100 may be placed on transcript or registration.

SU allows bike riding on pedestrian walkways on campus, except those posted off-limits or on sidewalks next to roadways. The city of Carbondale follows the state law requiring bicycles to remain on the roadways. Bike riders in the streets, on campus or off, must not move in the same direction as motor vehicle traffic. Bike riders on campus paths or roadways must yield to pedestrians.

While a two-week grace period will be observed for bike registration, that isn’t the case for autos.

Trummer said a five-day grace period will be allowed on auto registration and that it will apply only to vehicles in Lot 56 at the Arena, Lot 63 at Oakwood and Chautauqua, and Lot 100, north of Washington Square. Unregistered vehicles elsewhere on campus will be subject to ticketing from the first day of classes.

Included in amendments to the bike and auto regulations adopted by the Board of Trustees recently are a $30 maximum charge for towing of autos from the campus and provisions for appeals of towing actions and refund of charges if an appeal is successful.

Trummer explained that the $30 maximum charge if special equipment has to be used for towing or if the towing occurs after midnight. The owner of a towed-away car also may be liable for a storage fee of $2 per day. If the vehicle’s owner removes it after a tow truck is called but before it arrives, the maximum charge is $12.50.

Under the amendments, effective Aug. 1, a vehicle with three outstanding tickets for parking violations is subject to towing.

Police provide anti-ripoff programs for students

By Pat Karkish
Student Writer

Carbondale’s two police forces enforce the laws, as most people expect police to do.

But what some newcomers to SU don’t realize is that the police, one of few 24-hour-a-day, seven-day-a-week businesses in town, also offer a range of services protects to the community against theft, especially when registering with one satisfies the requirements of the other. Campus police will add a bike license and begin this fall.

“Whenever we get students to register their bikes, it will help us recover them if they’re lost or stolen,” Kirk said.

“Two years ago, the force instituted for bike riders to a large number of bikes. They’re stored everywhere on campus, too, which makes it pretty difficult to patrol all areas at one time.”

Another crime prevention technique the police offer is operation identification, a registration program that allows students to inscribe their social security numbers on personal belongings—TVs, stereos, cameras, radios and other things that are attractive to those people with sticky fingers.

Kirk said campus police have about 300 electronic engraving tools available at no charge to those interested in using the service. The tools are available at the campus police headquarters. Carolina police have a few of the tools available for the same purpose. “It’s a very valuable program,” Kirk said. For example, if you have your bike registered and it is stolen, somebody can change the license plates around. Could you prove ownership in that case? If an identifying number is also on there, there would be no question.”

Students can take articles to the police station for inscribing, or can check out a tool and do it elsewhere, Kirk added.

A few years ago, the force instituted a community relations program, designed to answer questions students may have about police work.

“We do the semester goes on, we meet with students in the dorms and have open forum discussions on any topic they want to ask about,” Kirk said. We had some rape action sessions and some promotions on motorcycles.

“We feel that if the students get to know us, then we’re a step ahead in their educational process,” Kirk said. “We’re here to arrest them if they violate the law, but by the same token, if they have a problem we’re here to help them.”

University police, with a total work force of about 50, patrol the entire campus, 24 hours a day.

“Basically, we aim our patrols at the heavier use areas,” he said. “We also have two meter maids who work on motor scooters patrolling the parking lots. We feel patrol around the dorms and other living areas, too.”

Kirk said the two police departments, University and city, work closely with each other.

“The relationship is good, we can work on preventive measures,” Kirk said.

Last year, a house watch program was instituted by Carolina police for students not living in University housing who leave town over break periods.

“Those who’ll be gone will fill out a form and they’ll be put on as a check list,” Rykem said. “As soon as they get checked up to six or eight times a day. It’s not a perfect a home protection service, since we still have our share of them, but it is a deterrent.”

The Carolina police department recently started a traffic safety program, designed to find out what causes accidents and ways of preventing them.

Rykem said that an Illinois Department of Transportation grant provided for two cars, 12 patrolmen, some equipment and training at gathering better accident statistics.

“We’re hoping for at least a 15 percent reduction in accidents,” Rykem said. “We’re just now prepared our first quarterly report, so it’ll be a while before we can tell what’s happening.”

“The way this town is laid out, with all the one-way streets, accidents often occur because people don’t know where they’re going. You can get lost easily, especially if you’re traveling on foot,” Rykem said.

Air Force ROTC cadets plan for flight careers in service

By Joe Sobczyk
Staff Writer

"I want to be a pilot," Gary Richards, sophomore in physics, says.

Richards is one of the 120 cadets waiting to fulfill dreams of flight and research in the Air Force Reserve Officer Training Corps (ROTC) at SIU. He and his classmates are members of one of the fastest growing ROTC programs in the country.

The SIU ROTC detachment moved from 8th in the nation in 1976 to 17th between 1976 and 1977. The ratings are given by the Air Force Association and are based on the size and quality of the 145 programs in the United States and Puerto Rico.

With the air in ranking, has come a gain in national prominence. The SIU chapter of the Arnold Air Society (AAS)—a social organization of cadets—and Angel Flight (ANF)—a support organization for female students have been chosen from among 145 similar organizations to host the annual national convention of the AAS and ANF.

Kathleen Crow, SIU AAS and ANF chapter president, said the goal of the convention is to provide a productive experience of organizing and operating a worthwhile conference for 1,000 Air Force ROTC cadets.

SIU students Stephen Dickey and Rita Sue Crow will co-chair the convention.

Crow said the respective chapters of the organizations

Gary D. Kline, ROTC, assistant professor of aerospace studies and the recruiting officer for the SIU program, said a little more than a third of SIU's cadets belong to either the AAS or ANF.

"We have involved these kids are fired up," Crow said of the program's increasing prestige.

Crow said that SIU's gains come at a time when the Air Force is closing three programs in the country. He said three programs have been closed recently because the schools could not meet the minimum requirement of 17 juniors enrolled in ROTC. The future of SIU's ROTC detachment was in question in 1974. After the draft ended, enrollment quickly dropped 10 percent. The lack of financial aid put the Air Force to put the University on probation.

Crow said the recent comeback is a result of vigorous recruiting and the ability to make good on promises of scholarships and jobs. Almost 60 percent of the cadets in ROTC are on some type of scholarships. He said most of the financial aid is given to those in technical and scientific fields of study.

Job guarantees and security after graduation are two other reasons Crow cites for the enrollment upswing. Once a cadet contracts with the Air Force in the third year of the program, he or she is guaranteed a salary after graduation upwards of $11,000 per year, in addition to discounts on merchandise and food and free insurance.

Freshmen and sophomores take one hour per semester of aerospace studies in addition to the regular class work. If they decide to go on, juniors sign a contract with the Air Force committing them to four years of service after graduation. Pilots must take two more years for flight training and duty.

"The ROTC is open to both men and women but Crow said the detachment at SIU is lacking in female representation.

The Air Force and the ROTC actively pursue potential female interest. Crow said, but many women aren't interested in what the Air Force has to offer.

Carletta Asbury, student in history, agrees that women aren't properly represented in the ROTC, but she doesn't know why.

Asbury, the first woman in the 21-year history of SIU's ROTC program to hold the top command post for cadets. Crow said, "I think it was simply because of the reputation the military has had in the past," she said.

The FLY
University Mall — Carbondale
Revised grading system limits withdrawal option

Students who withdraw from classes during the first two weeks of the fall quarter will receive a "W" on their transcript. However, students who withdraw after the second week of classes will receive a "D" or "W" on their transcript, depending on the class. For classes that are part of a course sequence, a "W" will be recorded as the final grade for that course.

Under the new system, the deadline for withdrawing from classes is the end of the third week of classes. Students who withdraw after this deadline will not receive a "W" on their transcript and will receive a "D" or "W" as described above.

The new system is designed to support students who need to withdraw from classes due to personal or academic reasons. It also helps to prevent students from having their academic records negatively impacted by withdrawing after the third week of classes.

CPC helps students find job openings

By Nina Tanzer

Are you going to be graduating soon and want to confirm a job before you leave SIU? Or, do you just want to start looking at job prospects early in your college career? Well, there are four to five thousand students graduating from SIU alone each year, the job competition gets tough. A student needs to know every trick to the job he or she wants.

The Career Planning and Placement Center, located in Woody Hall, gives SIU students who want to find employment and alumni special assistance to help them find jobs.

Each center has something to offer everyone who is about to graduate and is planning a career, says Harvey Iden, center director.

The center is divided into four units: Career counseling, placement, testing and cooperative education. Altogether 23 programs are offered by the four units.

Career counseling, headed by Richard Johnson, counseling psychologist, helps the student decide what kind of career he really wants. It assists students by assessing their interests, attitudes, achievements and values related to academic, vocational and professional choices. It helps the student ask: "Who am I?" "Where am I going?" and "How am I going to get there?", Iden said.

During 1976-77 about 3,000 sessions were held and about 1,100 students had sessions last year. Each session lasts about 30 minutes.

The second unit, career placement, is headed by Iden. It is a mist-employment agency, but charges no fees. Iden said that he is in helping students find jobs. Any student who leaves SIU without a job has not learned to use the campus resources, Iden said. Included in the placement unit is placement services. This program provides a place for receiving, filing and mailing resumes and credentials to prospective employers.

Alumni can send placement papers, resumes and letters of reference to the placement center. The center seeks leads for employers.

Another service of the placement center provides students and alumni more than 100 weekly employment bulletins. The bulletin are published every Thursday and are available upon request to students and alumni. Persons interested in receiving the bulletins can send a stamped, self-addressed envelope to the Placement Center.

Residents say dorm life is fun

By Jim McCartney

Residents say dorm life is fun for the 4,691 persons in SIU housing. The residents of campus. But most of the units have been filled, according to housing officials.

However, those who made early reservations for a room are in for quite an experience. Dorm dwellers interviewed at random recently concerning their views on living in campus housing were all positive, with a few minor exceptions, about their experiences.

"Hell, it's great," said one resident of Neely Hall, one of three 17-story residence halls on east campus. "I'll never forget the feeling I had the first time I walked into my room," the student said. "I plugged my handbag down and said to myself, well, here I am. What'll I do next?" Since my roommate hadn't arrived, I started walking around the room,签署了 as they came in. We all parted together that night, and by the next day I felt right at home.

"Before I moved in, I was afraid of not being able to meet a lot of people because I'm usually pretty shy," another student said. But after a few days I realized how dumb that was because we know a year a dorm, you can help make friends. It's almost impossible not to.

"Aside from being "great" places to make friends and ease the transition of moving from family to college life dorms have proven to help students with their studies, according to University Housing officials. Sam Runia, director of housing, said the academic retention rate is higher among students who live on campus for their first two years of school than it is among those who don't.

"At least also said he encourages students who have problems with dorm life to seek help from a resident assistant on their floor. Resident assistants, known as RAs to most dorm dwellers, are junior and seniors who have maintained at least a 3.0 (B) grade point average in all work completed at SIU. One RA lives on each of the 99 floors of the campus residence halls.

"Aside from being responsible for the sr in the academic supportive services," said Runia. "They do other things as well, but that's their main job. I think they do a fantastic job. I've never heard anyone come back to say they had a bad RA. They're really great." These RAs will make sure students who have problems with dorm life are taken care of, Runia said.

"Only one or two SIU residents say they couldn't get along with their roommates, according to Amy Lentz, resident assistant in Brush Towers. "The biggest reason they couldn't get along was because of a roommate habit of sleeping late without waking the rest of the room. Other than that, I think we have a great place to live," Lentz said.

By Jill McCarty

For some SIU students, the struggle to make friends as a freshman is only the beginning of their problems. According to university statistics, 10 percent of the first year students enrolled last year have left the university. Many of these students said they left because they couldn't make friends.

"Dorm life is fun," said one resident of Neely Hall, one of three 17-story residence halls on east campus. "I'll never forget the feeling I had the first time I walked into my room," the student said. "I plugged my handbag down and said to myself, well, here I am. What'll I do next?"

By Nick Soreti

Staff Writer

The counseling services of Special Supportive Services gives "underprepared" students a chance to go to college by helping them toward graduation, according to Fred Hamilton, director.

"We try to help those students who want to be helped by giving them academic support," Hamilton said. "Adapting to college can be difficult for those with high school backgrounds, so you can imagine how much tougher those with even the smallest of deficiencies." To be admitted to the University under normal conditions, a student must have an ACT score of 19, or be in the top half of his class and have taken the ACT. The special support services program helps students who do not meet these requirements.

"If a student is rejected by the University because of academics, his or her application for admission is then sent to a special admissions committee. After checking all the criteria, the prospective student is then placed in either Special Supportive Services or the Center for Basic Skills. Students from low-income families usually are placed in Special Supportive Services. Federal guidelines require that a majority of the students meet certain income criteria.

The tutorial part of the three-year program helps the student who is weak in certain classes. The service is free and is given on a more personal level, Hamilton said.

"Since we especially try to help those students weak in the basic skills, it is very important to make sure we have enough tutors in English and math. Usually we employ tutors in other areas, but only after we have the basic ones," Hamilton said.

SIU students serve as tutors in the program. Tutors must have a B average, plus two letters of recommendation. While tutors help students in academics, the program's counselors aid in other areas. "Our counselors help students to make the non-academic adjustments too," Hamilton said.

"We also help students in career planning and "landing an academic second or third job," he said.

In order to provide a bridge between high school and college level work, the students take basic skills classes in reading, writing, and math. The classes are taught by the Center for Basic Skills. These courses are designed to strengthen diagnosed deficiencies such that our students can walk into an entry-level English and math course and have at least as good of a chance of success as someone else," Hamilton said.

Students from the Center for Basic Skills also take the classes.

"Preliminary results indicate the project is working to objectives about 80 percent of the students enrolled in last year's program are still in school one year later," he said.

Sara Runella, housing director, said because of its all-male status, Schneider Tower suffers from vandalism in dorm life on campus. He said rowdy behavior seems to be much more prevalent in any all-male area. Runella pointed out that vandalism benefits no one since dorm residents wind up paying for the damage one way or the other. "I wouldn't say that vandalism is a serious problem anywhere on campus," he said. "But it stands to reason that when you have 1,600 males living together, they will get a little rowdy from time to time."

The Small Group Housing area, will move units, is located on the Southwego edge of campus and provides housing to recognized sororities and fraternities. Each of these buildings houses 8 to 10 students and is equipped with a lounge, dining area, kitchen, and snack bar. Students can be assigned to this area only by invitation from a fraternity organization.

The scene makes Thompson Point dorms popular.

CPCP finds jobs

(Continued from Page 20b)

Center, Woody Hall, Southern Illinois University, Carbondale, Ill. The testing center, the third unit, headed by Harley Bradshaw, adjunct assistant professor in the Rehabilitation Institute. The center handles nation tests, such as the Graduate Records Examination. The unit also administers proficiency tests developed by academic counselors. The exam also assess students to "proficiency out of context in subject areas in which they have sufficient knowledge."
Three bounced checks, and you lose privileges

By Jim McCarty
Staff Writer

Like they say at the ball park, "Three strikes and you're out." This is the rule of thumb at the check-cashing service on the second floor of the Student Center.

For a 10 cents service charge, students can cash checks for up to $25.

But if a student owes the University money for a bad check or library or parking fines, his or her name is put on a list by the Bursar's Office and sent to the check-cashing service where it remains until the debt is taken care of.

Once the debt is paid off, the student will have his or her name taken off the list and be able to cash checks again.

If a student bounces a second check, the same procedure is followed, but a third bad check to the University will result in the loss of check-cashing privileges for a year.

Students must also take care not to write bad checks to any of the merchants in Carbondale, for they too have a system for dealing with such checks.

About 100 Carbondale merchants, including many grocers and department stores, subscribe to Checkmate.

The Checkmate service issues a weekly list with the names of persons who have written bad checks to subscribers. So if a student writes a bad check to a merchant who subscribes to Checkmate, that merchant and others will know about it and will probably refuse to accept checks from the student. Like the University system, Checkmate will take the student's name off the list as soon as the debt is paid.

Although Checkmate does not have a "three-strike rule" like the University, it does keep track of repeat offenders, so if a person has a history of bad checks on his or her record, merchants can find out about it.

Checkmate is owned and operated by Scott Johnson, a former student at SIU.

He said the purpose of the system is to make check-cashing easier for people who write good checks and harder for those who write bad ones.

Johnson said since he started the system three years ago, the number of bad checks written in Carbondale has gone down 52 percent.

One of Johnson's customers, Jerry Boren, manager of Boren's IGA in Carbondale, agrees with that estimate. "Since we started using check-mate the number of bad checks we've accepted has decreased by at least that much," Boren said.

Johnson said most checks that are bounced are not done intentionally, but as a result of carelessness. "I find that freshmen make this mistake more than anyone else and this is understandable since many of them are using a checking account for the first time," he said.

"But I think they will agree that in the long run this system helps them because it makes it easier to write checks at more places."

This fall, Check-mate will offer a service aimed at just that purpose. For 25 cents students may have a card that will enable them to write checks to any of the stores that subscribe to Checkmate.

Complaint information office assists frustrated newcomers

By Bill Throld
Student Writer

When you leave home you might encounter other problems as well. One thing you have to apply for utilities of water and sewer.

Long lines and big deposits are typical of companies who welcome new students into the area. But City of Carbondale officials say they are willing to help newcomers become familiar with the services the city has to offer.

A special Complaint Information office has been established to answer questions about city services. The office can be reached by calling 549-5502, ext. 211.

Applications for water and sewer should be made at the business office in the City Hall Annex, 407 E. College, from 8 a.m. to 4:30 p.m. on weekdays. A deposit for water, which varies according to the number of persons to use the service, is required.

Water service is also provided by some districts outside Carbondale. Persons living outside the city should contact the water district office nearest them for service.

In addition, new tenants in the area should be aware that city ordinances require landlords to equip housing units with adequate ventilation, at least one window for each room.

Likewise, landlords are responsible for keeping their buildings weatherproof. Yards must be clean and free of hazards.

A free inspection of buildings will be made by the Director of Code Enforcement, 549-5502, ext. 228, upon request.

Another ordinance prohibits landlords from discriminating against tenants in the sale or rental of housing because of race or other reasons. A person who feels he or she has been discriminated against can file a written complaint with the Carbondale Fair Housing Board and city clerk. The complaint must be filed within 30 days after the occurrence of an alleged discriminatory act.

Dog owners are required to have their pets registered with the city. There is an annual control warden on daily patrol to enforce the city's leash law.
Southern Sports...

Robin Dettering, junior from Granite City, is SIUC's "Woman Athlete of the Year." She earned that honor, along with the Virginia Gordon Award as the top scholar athlete, as captain of the volleyball team. No. 1 reserve on the basketball team and .325 hitting (.273 average, 29 hits, 2 homers, 17 RBIs) and leading fielder (no errors in 45 chances in left field) on the state champion softball team. Her favorite sport: volleyball.

....and Entertainment

With a few tufts of hair here, a bit of pancake rouge there, some artificially applied cream stick, and just the right wig to top it off, plus some foam latex, perhaps, as needed, Ivan Katrinas can create a villain to match any theater role. The graduate student in theater will be playing his art and craft in a number of productions this season, about which there's a story on Page 18. That's the real Katrinas in the left half of the photo, by the way.
Women athletes building championship programs

With the rise of women's athletics in colleges throughout the country, SIU is certainly ranked as one of the top overall programs. Under the guidance of Athletic Director Charlotte West, the women have built a quantity and a quality program which features outstanding athletes in 11 sports.

Many of the teams like softball are of state champion caliber. Others like the women's cross country team will definitely contend for the title in the upcoming season, according to Coach Claudia Blackman.

"Last year we went extremely well with the team finishing third in the state meet behind Illinois and the University of Illinois, and fifth in the regional meet," Blackman said.

"This year I believe we will finish in the top three at the state meet, and in the regional. I feel we will improve over last year and finish higher than fifth place," she added.

The cross country event offered to the women is the 5,000-meter run. The team consists of about 12-15 women of all classes— freshmen through senior.

They meet practice each weekday for two hours and they run on the weekends when there isn't a scheduled meet. "Some girls run about four to six miles in the morning and some prefer to run at night, to avoid the heat," Blackman said. "It is good conditioning to run in the heat, but some girls do it better if they can run at night."

The cross country team is not a member of any conference, but participates in the IAIW state tournament and the MAIWL regional tourney, both held at Western Illinois. The AIAW national championships are held in Denver, Colo.

One of the most important meets for the cross country team will be the Saluki Invitational Open in October. "Last year we finished seventh, which was very good in our field," Blackman said. Illinois and Western Illinois will be the teams to beat this year, according to Blackman.

Their four season Sept.5 against UIU of which will be a tough meet," she added.

Two of the outstanding players last year—Peggy Evans and Jull Conover—were lost to graduation. Evans was the all-time record holder in the 5,000-meter run. Both Jean Meehan, who finished second at state this year in most meets last year, and Cathy Chiarello, who had an outstanding season, will be returning this year.

The roster includes Chiarello, a junior from Youngstown, Ohio; Tressa Grandis, junior, Richmond, Va.; Anne Krumpelbaader, junior, Watka, Ill.; Meehan, sophomore, Huntington, New York; Patty Plymire, freshman, St. Joseph, Ill.; Cindy Ruester, junior, Illinolis; Ilinda Snovak, junior, Youngstown, Ohio; Patty Pinks, sophomore, Villa Park, Ill., Gayle Simpson, freshman, Hettick, Ill.; and Vicki Schaefer, freshman, Fox River, Ill.

VOLLEYBALL

The Saluki women's volleyball team, fresh off the heels of its best season ever and going to have to spark against some of the toughest competition in the nation if it expects to match or improve upon last season's record of 23-19-1.

Coach Debbie Hunter said the 1979 season will be the most challenging one ever for the team. "The Salukis will be read to take the challenge," she said. "We've had more prep training this year than ever before."

Players worked together throughout the summer conditioning and sharpening their skills.

The volleyballers went to the state championships last year only to lose to their bitter rivals, DePaul University, which went on to finish fourth in the Midwest regions. DePaul is expected to be strong again this year.

Other teams to look out for: the Illinois State Redbird volleyballers and Illinois-Chicago Circle.

The regional playoff will be held at the Arena this year, and the Saluki squad expects to be there when the action restarts.

Hunter, in her fourth year as coach, has many reasons to look forward to a good season this year, and one of them is the team's returning captain, Robin Deterding.

The junior from Granite City plays the setter hitter position, and is considered the team's best player. Last year she received the SIU women's athlete of the year award as well as the prestigious Virginia Gordon Award, presented to the Virginia scholar athlete.

Two other returning stars of last year's team are middle hitter blockers Mary Shirk, a senior from Marysville, Ohio, and Dinah Derva, a junior from Barrington.

Sophomores Debbie Stamm and Terry Stratta and juniors Mary Chiarello and Patty Pinks will also return. Newcomers Ann Cronin and Sharon Gerkens will also compete.

This year we're going to try to finish high in the state championship match, with hopes of qualifying for the regional tournament and maybe even make it to the AIAW tournament in December," Hunter said.

Aside from hosting the Midwest regional this season, SIU will also host an exhibition match that pits the U.S. national team, which won the Olympics, against the Japanese national volleyball team which took the gold at the 1976 Olympics at the Arena, on Oct. 15.

BASKETBALL

The second-year coach of the Saluki women's basketball team, Cindy Scott, says her team will be in first place in the coming season draws to a close and the state champion is crowned.

"We expect to be in first place," Scott predicted. "We didn't lose anyone this year and we will be as strong as ever."

(Continued on next page)
Women athletes contending with the best in 11 sports

(Continued from Page 2.)

The addition of Sandy Martin, a Lawrenceville native, at the guard position and 6-2 Vivian Brown of East St. Louis, will give the team added depth, according to Scott.

But Scott quickly added that Brown probably won’t see as much playing time as she would like to give her right away.

The SIU women’s basketball team placed second in the state in 1977-78 with a 14-10 record.

This year, the cagers will face their toughest opponents of the season at the beginning. They open the season with games against Cincinnati and Louisville.

In addition to Martin and Brown, the team has garnered Vicki Stafko, a 5-9 guard-forward from Royalton.

“Stafko will definitely see action, but we are skeptical about the playing time of Sue Schaeffer, who underwent her second knee operation over the summer,” Scott said.

The women players’ inside game will be their strongest asset, led by returning letterwomen Bonnie Foley, Sue Faber and Jen Hoffman.

SWIMMING

Second-year Coach Inge Renner led the Saluki swimmers to within a few seconds of the AIAW state championships last year and is determined to take the crown away from Illinois this season.

We now came to SIU last year, Renner promised to build the team into a national swim power and with all but one member of last year’s returning, plus two talented recruits joining the squad, this could be the year.

Four returning swimmers will play important roles in the teams’ quest for the crown this year.

Heidi Einbrod, a sophomore from Wilmington, Del., is the only female SIU swimmer to qualify for four AIAW events (50, 100, 200-meter breaststroke and the 400-meter medley relay).

Anne Gutseck, a senior from Shilltown, N.J., was the anchor on that 400 medley relay team as well as the 800 medley relay team that qualified for AIAW competition.

Mary Jane Sheets, a junior from St. Louis, is a backstroke specialist who won first place in three different events at the state meet last year. She also won an AIAW berth last year in the 100 backstroke and will swim the 200 backstroke and 200 butterfly this year.

Tenn Winking, a transfer student from Florida, is considered to be one of the top Salukis on the squad. She is the defending state champ in the 50 backstroke event.

In diving, first year diving Coach John Anguillard is a sure bet to qualify for the 1979 nationals.

Julie Warner, a sophomore from Louisville, is back to defend her accomplishments of the highest finish ever by an SIU woman—12th on the 1-meter board.

Warner is also defending AIAW champ on the 3-meter board.

GOLF

The women golf team should be on the upswing this season, according to Coach Sandy Blaha.

Last year the team finished second in the state behind Illinois.

Sandy Lemon, Lori Sackman, Penny Porter and Sue Fazio are expected to lend depth to the golfing team and should be outstanding future players for the Salukis, Blaha said.

Lemon was last year’s team leader and was the only golfer from Illinois to qualify for AIAW national competition.

FIELD HOCKEY

The field hockey team ended its season 12th in the nation and state.

Heidi Einbrod, a sophomore from Wilmington, Del., is the only female SIU player to qualify for the 1979 nationals.

The team featured Emme Kousher and Sandy Blaha.

This year the Salukis are expected to perform much better again,

Football fortunes are looking brighter

By George Cusick
Sports Editor and
Hall Threshold

Picture Kevin House streaking down the sidelines at McAndrew Stadium. A defender tries desperately to stay with him, but cannot.

The Saluki quarterback flings a pass and then runs by a long, spiraling line that flies some 50 yards downfield. The football arrives and lands into the waiting arms of House at the 20-yard line and he sprints the rest of the way across the goal line of the green carpet of Astroturf.

That picture must be on Saluki football coach Roy Dempsey’s mind as he talks about how the team will pass more this season. And how the team will have depth at every position. And how the defensive and offensive lines will be well-stocked with a mixture of seasoned upperclassmen and huge freshmen.

The 1978 football season should be a drastic contrast to last season, when the team went 3-8 and suffered through a season which featured anemic offense and an injury list with more names than Carter has pills.

This, Dempsey’s third season as Saluki grid head coach, promises to be better. After his 7-4 baptism into Saluki football two seasons ago, things haven’t been too pleasant for the gridiron.

The team had a super recruiting year, concentrating on big, quick linemen on both sides of the ball—a definite weakness, especially on defense.

Dempsey has had good teams the past two years and also good speciality players, but there is a lack of passers that has hurt the overall offensive picture, and for the first time, Dempsey has a real go-to guy on his hands.

Junior Reggie Evans was the top quarterback candidate until he was announced late in the summer that he planned to transfer to Tennessee State. And for the first time, John Cernak and Gerald Honore, fullbacks, are listed as first-string.

Dempsey predicted, “There will be an exciting team,” and there are numerous other freshmen and walk-ons who could challenge also.

The tight end position is held by Hugh Fletch.ber and Darryl Kavanagh. There is a line behind them, too, fighting for the top spot.

Quinn and Henry are the top running backs on the depth chart, but nothing by them are behind them. Like Michael Osborne, Jimmy Croft and Clarence Robinson and Vic Harrison. All are top-flight backs who could start at any time.

There are walk-ons and freshmen waiting in the wings.

“We’ll have an exciting team,” Dempsey predicted. “And there’s no doubt that we will be able to run, too. We have skilled backs with leading rushers.

Football outlook brightened by depth, height, experience

(Continued from Page 4)

people at all positions. I feel that we'll move the football and put some points on the board.

In order to move the ball, he stressed, the line has to be "more physical." Dempsey said that Coleman, a junior transfer, and Harrison and Henry can catch the ball well also.

Dempsey indicated that there will be no more third down audibles fourth and 10 situations. "We had a couple of games last year where the quarterback took an eight or 10-yard loss. This is where the line has to be physical."

Defensively, the line is solid with Jack Niedbalski and Mark Michna manning the ends and James Phillips and Dave Callahan at the tackles. Phillips and Callahan will be challenged by Mark Melbourne and Art Johnson and other freshmen and walk-ons. Tom Piha and Percy Gibson return to the noseguard position. Both can play tackle also. Piha started most of the season at noseguard last year.

There may be a problem at linebacker with the loss of captain Don Brown and Billy Haffield. Transfer Luther Foster, Joe Barwinski and Rob Robinson are experienced and Rick Bielecki is right up there with them. After that, however, there are four or five inexperienced players. Bielecki, so the experienced here is shallow.

The defensive secondary is excellent to say the least. It has to rank as the best in the Missouri Valley Conference with Gene Craddock and Ron Greer at the safety positions and Kevin Woods and Tim Cruz at the corners. The backs are deep and experienced with John Falzone and Alvin Reed as backups, but Dempsey noted that Neal Furlong, a sophomore from Leduc, Mo., has really come on and will challenge for a starting spot.

"Neal has made the biggest improvement overall," Dempsey said. "He has taken a giant step, and by the beginning of the season, we won't be afraid to play him in the defensive backfield." 

Les Petroff will handle the extra points and field goals and Paul Molla will handle kickoffs. The punting job is still up for grabs, but Harkins did a lot of work in the off season. 

What this year's team shows more than anything else is depth. Last year, the depth chart had only one or two men backing up a starter.

"Now we have at least one sub with experience at every position," he said. Dempsey is optimistic about the overall Saluki team this year.

"We're going to be in all of the games this year," Dempsey said. "The guys are going to play with enthusiasm."

That enthusiasm has become the trademark of the team's attitude. Dempsey said that when the team started losing last year, "some kids got down on themselves and had that 'guys we've no good attitude.' It this year will be different. We're going to go out and play the best we can—and we're going to have fun doing it."

There have been some changes in Dempsey's staff since last season. Jim Vechiarella, defensive coordinator for the past two years, took the job at Tulane and Jay Cunningham, who coached the defensive backs last season was hired as offensive coordinator at Louisville, Kentucky. Defensive back and receiver coach Tom Piha has become the new running back coach. Dan Brooks, a junior at Illinois, a graduate assistant for the past two years, was hired as defensive line coach and Jim Caldwell joined the staff to work with Cunningham as defensive back coach. Dan Brooks, a 10th-year former St. Louis Cardinal, Coach Don Coryell, is the new running back and receiver coach.

New coach, ‘we’ spirit, ample talent make Saluki cagers Valley favorite

By George Cash
Sports Editor

I: year, tie Saluki basketball team

The team had lost superstar guard Mike Glenn and his sidekick, Cory Abrams to graduation. Standout rebounder and all-around player Richard Ford was academically ineligible.

Many prognosticators said the Salukis would be lucky to finish at 500. But they went 17-10 and challenged for the Missouri Valley Conference (MVC) title all the way until the end. Crockett won the MVC championship and went on to the NCAA tournament just as the Salukis did the year before.

Lambert had turned what was supposed to be a mediocre entry into a contender. After he had accomplished his job, the moved up a step in his coaching career by taking the top job at Auburn University in April.

Saluki Athletics Director Gale Sayers spent a long time selecting a capable replacement for the eight-year veteran Lambert. After weeks of taking applications and giving interviews, Sayers, the Intercollegiate Athletics Committee and administrators had found their man.

Joe Gottfried, the head basketball coach at Ashland, Ohio College, was named to succeed Lambert as the new head coach. Ashland is in the 16-year history of Saluki basketball.

The new Saluki mentor wasted little time getting to know the Southern Illinois area, alumni and University officials and faculty.

He hired two assistants in Rob Swanson and Tom Grady. Swanson was Gottfried’s assistant at Ashland, and Elyria, Ohio high school coach, Ken Riley. They replaced George Cash and Bob Wold. Gottfried had been coaching for 19 years, and popular Herman Williams, a fine recruiter and the coach who went with Lambert to Auburn as an assistant.

Just weeks after Lambert took the top job, tragedy struck. While staying at a Holiday Inn at Columbus, Ga., Lambert died in a fire which swept the motel early June 6. The former Saluki coach was in Columbus for a coaching clinic with Williams and his other assistant, Herbert Green.

SMU held a special memorial funeral service for Lambert in the Arena. It was attended by faculty, friends and colleagues of the man who brought consistent winning basketball to SIU.

Gottfried and his staff were busy preparing the Saluki cagers for a new look. The new coach said he planned to do a lot of running this season, if the players can adapt to it, and established the “we” concept with his coaches and the players.

This means that Gottfried will be trying to establish real team unity and cooperation—a total team effort.

And with the players Gottfried has to work with, the sky’s the limit as to how far the team can go. The potential is unlimited.

Already the Salukis are being talked as favorites to take the MVC crown.

All with little wonder.

The team has Mr. Everytime, Gary Wilson, returning. And “Rubber Band Man” Wayne Abrams, whose ball-handling alone is worth the price of admission. Milt Huggins will be back, too. Last season, he was SIU’s most consistent scorer and has outside shot. The answer to that is departed Glenn. Big Al Grant will be back at center and Barry Smith, Chris Gales, Mike McRae, Mike Scott and Dan Kienkolowski will give Gottfried plenty of depth.

Don’t be surprised if Ford comes back, either. He enrolled in summer school last season. Gottfried and his his former mentor working at the Recreation Building with Glenn and Huggins. And according to Glenn, Ford is looking better than he did in 1976-77 when his quickness and rebounds and overall aggressiveness were the catalyst of the march to the Valley title and the NCAA tournament.

Gottfried’s plan for a running offense will add spark to the Saluki offense and open up the game a bit. There are three other new coaches in the MVC this season, and they all have indicated that their teams will also scrap the old offenses and go with the running game.

And Gottfried’s past record as a college basketball coach is quite good. The 36-year-old native of Crescenta, Ohio, compiled an 83-64 record in his tenure at Ashland, his alma mater.

Under his guidance, the independent Eagles won their way to the NCAA Division III regional finals each of the last three years.

Roggy spearheaded world acclaim

By George Cudahy
Sports Editor

The javelin thrower brought national and world fame to Saluki track and SIU last season. But it was the man behind the spear—Bob Roggy—who earned the recognition and did the throwing.

And oh, how he did it.

Three times during the 1978 outdoor season, the 6-2, 235-pound native of Holmdel, N.J., had the world’s top throw, his best at the NCAA meet at Eugene, Ore., June 2. It was on that day that Roggy threw 293 feet in the qualifying round.

He threw 269 the next day to capture the championship and he began to press to satisfy the cheering crowd of 15,000. The crowd, who had never heard of SIU let alone Roggy, began to shout his name and scream and stomp their feet in hopes of witnessing a record-shattering performance.

Roggy was just seven feet from the American record of 290-7 set by Mark Murro of Arizona State in 1978. And he had just 174 from the world record of 310-4 set by Hungarian Miklos Nemeth in 1976.

But Roggy began to hear the crowd and to press. As a result, he strained his back and could not do any better than his winning toss.

Still, he was the champion and he was a consistent champion all season long. Roggy threw 272-3 and 272-1 at the Drake Relays early in the season, which was the world’s best going into the time. Then he came back at the Kansas Relays, which were held at Oklahoma, and heaved the fiberglass spear 290-7 to take first place and set a meet record. Roggy also set a meet record at the meet he had participated in last season at Oklahoma.

(Roggy also set a meet record at the meet he had participated in last season at Oklahoma.

Roggy is the best. The Saluki is the best. The Saluki association I’ve ever seen.

And not only the best shot putter that SIU’s ever had, but the best hurdlers too.

His record, 15,000 fans who eagerly watched. Roggy wasn’t the only hero. Sprinter Mike *Pee and hurler Andy Roberts captured fourth and fifth respectively, in the 100-meter dash and the 110-meter hurdles.

Roberts’ placing was incredible as he had suffered from arthritis in his legs and had to miss the Drake Relays just a month before. The senior wasn’t even ranked by Track and Field News magazine going into the NCAA meet, as Hartzing noted.

“Andy made one of the greatest representations at the NCAA’s for us,” Hartzing said. He was not even mentioned in Track and Field News and he went out and placed fifth. That backs up what most people say that desire is of the most importance.

“Andy established himself as the greatest hurdlers we’ve ever had,” the coach complimented.

But there were more heroes. Long jumper Rick Rock, triple jumper Ken Lorraway and pole vaulter Tim Johnson took seventh in each of their respective events and shot putte John Marks took ninth. Stan Podolski also competed well in his events but fell short of the top five.

Four SIU’s top 10 finishers in the field events was a credit to Hartzing’s team.

Next door to Vis Koonig}
Roggy drew world acclaim

(Continued from Page Bc)

year before.
The 25-year-old Roggy had injured the arm at the Arkansas Relays and, after winning the javelin and setting a meet record at the 1977 Drake Relays, he began to go downhill. He finished out the season, but he threw with intense pain.

After the season, Roggy had an operation to re-route a nerve in the arm. He came on strong this past season after cautious throws early.

The rest is history. After his showing at the NCAA meet, many track experts said that Roggy had the best technique of any javelin thrower they had ever seen. He joined the Pacific Coast Track Club after the season and began to train for the 1980 Olympic games in Moscow. Roggy took first in every meet throughout the season. After the season, he competed in the National AAU Track and Field meet in Berkeley, Calif., and took second to Bill Schmitt of the

University of Tennessee, Track Club. He was still hurting from the back injury he suffered at the NCAA meet.

Roggy was picked with Schmidt to the U.S. National team in go against the Russians in July. He took second with a throw of 272-10, but his back had not healed completely. This was even more evident the next weekend when Roggy went to Edmonton, Alberta to compete in the Pre-Commonwealth Games.

The big guy threw only three times because his back was still very sore. Roggy decided to take it easy for the remainder of the summer and let his back mend. He has enrolled at SIU for his final semester and he hopes to get his degree in physical education in December.

But there will be no more javelin throws for the multi-talented track star in a Saluki uniform. Roggy is SIU's best high jumper with a leap of 6-8 and he is a good all-around performer, who can compete with the best.

Trackmen posted outstanding mark

(Continued from Page Bc)

assistant coach, Bill Webb.
The NCAA was the capstone to a season which saw the team win both the indoor and outdoor Missouri Valley Conference championships, win three individual championships in the prestigious Drake Relays (Roggy, Roberts and Lorraway), and give Hart Hog the same distinction by beating rival Illinois three times during the season.

The team took both the indoor and outdoor Illinois Intercollegiates and demolished the Fighting Illini at Champaign by scoring more than 100 points.

Art when the season was over, Hart Hog had a little time to save his team's fine showing. But then he thought about who he would lose to graduation and the recruiting job ahead of him.

For Roggy, Roberts, Lorraway, middle distance man Scott Dorsey, distance man Jerry George, pole vaulter larry DeMatter will be gone. Hart Hog signed five top high school prospects to help fill the void left by these athletes.

But even if he didn't have a good recruiting year, Hart Hog said he would have a good track team for the 1979 season. He said, "I feel very good about the past season. It was really a junior track team," he explained. "Obviously replacing a Roggy, Roberts or Lorraway is impossible. And the loss of Robinson, George and DeMatter, who are big contributing members, they are a loss."

Hart Hog is counting on the return of pole vaulter Gary Hunter and transfer weight man Kirk Burton, who the coach says will "shine in three events." And the return of potential superstars like intermediate hurdlers Doug Schacht, who Hart Hog plans to use as a jumper also, and the other solid athletes like Rock, Johnson and Tom and Co. form the nucleus of another tough track team.
Veteran swimming crew returns after best year

By George Costak
Sports Editor

Bob Steele must have felt like he was given an ice cube to carry in his coach's life. For the Saluki swimming coach had moved from the shadow of Jim Hull to the lavish, clear waters of the new Recreation Building pool. And it was there that Bob Steele exhibited his Saluki swim team in many dual meets and tournaments to show the students at SIU just what his men could do in a fine facility.

In came the No. 2 ranked Alabama Crimson Tide and the No. 4 ranked Indiana Hoosiers to test the new facility and take on the new and improved Saluki tankers.

The team was made up of sophomores and freshmen and a few juniors. They swam with reckless abandon despite lapsed dual meet losses to Alabama and Indiana. The times improved and the divers scored piled points of Steele and his squad continued to dominate teams like Cincinnati, Northwestern and Missouri throughout the snow-packed winter.

And when the season moved to the NCAA championship meet at Long Beach, Calif., the Salukis' 13-established 12 varsity records and scored 18 individual events for the NCAA final.

The team had peaked toward the end of the season and dominated the NCAA Invitational and the National Independent Championshigs (NIC) meets, which were held at SIU.

The team also scored 908 points at the Illinois State Championships and had 908 points at Champaign in January. The swimmers and divers were able to carry their team over by 100 points to peak just before the national finale.

The Salukis rested too much after their fine NCAA swimming and finished 17th at Long Beach, despite the excellent performance by captain Greg Porter in the 158-pound division. Porter was incredible as he had been for all season long, in the 100 and 200-meter butterfly races. The Hinsdale native took 15th in the 100 and seventh in the 200 fly and accounted for 13 points. His 200 fly time was a school record of 1:45.8.

But Porter couldn't carry the Salukis and the team finished 17th.

We were suffering from the effects of winning the National Independents.

Despite the low finish, Steele was proud of his team.

The team was the best in the history of SIU swimming. "Steele said of his fifth season as Saluki coach, "because we finally fit together as a team. And that's a big factor - the ability to get last year's sophomores to be able to swim their freshman times all season and drop them at the end."

And for the most part, they did it," he said. "In the 158-pound division, they'll be able to swim last year's championship times all season and drop them at the end."

The coach said the prestigious NCAA championship was a most satisfying victory of the season.

"It really put it together - it was our goal to win it," Steele said. "South Carolina and Miami were there. We came on and took it. We have to be ranked among the favorites to take it this year."

All this year. It brings a smile to the face of the Saluki mentor. For all his fine sophomores will be juniors and Porter will be a senior. And David Parker, last year's freshman sensation returns to swim long distances. And Bob Samples and Pat Loyko return to excite everyone in the sprinkles.

Not only does Steele have a solid lineup coming back in the fall, he has a lot of high-class swimmers to shore up what weaknesses the team has.

Like the breaststroke. Steele Andre's Norling, ranked in the top 10 in the world's best breaststrokers, will compete for the Salukis this year. And Conrado Porta of Argentina, the No. 1 backstroker in the world, Roger Von Joanne of Reno, Wash., will add punch to the individual medley and the backstroke and diver George Greenfield from McLean, Ill., will help make an already outstanding diving team, coached by Julian Krug, even better.

Rebuilding wrestlers facing tougher schedule this year

By Doug Wilson
Staff Writer

Youth enthusiasm and great motivation will dominate the 1980-81 wrestling season at the University of Missouri.

Linn Long says he plans to rely on to carry his squad through a successful season.

After a 5-5 record last year, Long says the team will be more demanding than last year's, so the grapplers have their work cut out for them. Going into the season, Coach Long said he wasn't certain of the stability of the squad. Coach Long said he wasn't certain of the stability of the squad. The question of the registered athletic status of some of the members of the team still needs to be answered. The introduction of some promising freshmen, probably accounts for the coach saying his team is "completely rebuilding." If the returnees this year include NCAA Midwest Regional champion Paul Hibbs and regional runnerup, John Gross. Hibbs recorded a 23-11 mark last season while wrestling 1/2-pound weight. Another wrestler is the 113-pound division, Gross compiled a

21-2 season record.

His return is 190-pound Tom Vizi. Last season Vizi wrestled to a 17-1-1 mark at 158 pounds. Joe Joe, who was 9-19-1 at 134 pounds, Joe Jones, who posted a 5-16 mark in the 177-pound division. Mark Mitchell, who was 4-20 in the 167-pound class, and Mike Delgatt, who wrestled to a 3-3-2 record in the 113-pound division.

Long said he expects to rely on some freshman prospects heavily through the year. One of those is Bill Ameen from Midway City, Okla. He had a 30-30 record in his senior weight class high school and won the 178-pound weight-class state championship. Another recruit from Long hopes will help the team is Scott Lamperee, from Midland, Mich. In his junior year Lamperee was the state champ.

Savanna, a senior from Louisville, Ky., for example, an all-area and All-America honours, for his 7th place finish at the 1978 NCAA championships. His personal season high all-round score of 54.7 reflects the consistency with which he performed throughout the year. A 9th place finish at the United States Gymnastics Festival where he won 2 non-qualifying events, the right to work out in France in preparation for the 1980 Olympics.

Another returning All-America is crossing horseman David Scheible. His 4th place finish on the horse at the NCAA meet earned him All-America honors for the second year in a row. He also finished 3rd on the horse at the Amateur Athletic Union Junior Olympic meet last year.

"We have a lot of talent, we could score 80 points at the NCAA meet," he said optimistically. "We are capable of it."

"If we can get good swims out of everybody we've really got some good swimmers back-guys that are solid like Porter and Parker and Loyko and the others. I'm really looking forward to the coming season."
Baseball prospects full of questions

By Doug Wilson
Staff Writer

Although they didn’t make it to the College World Series at the end of the 1983 season, the Saluki baseball team once again compiled a fine season under the leadership of head coach Itchy Jones and his assistant, Mark Newman.

SIU posted a 37-14 won-lost record en route to a first-place finish in the Midwest regional tournament, losing to Oral Roberts in the final game. In the strength of good pitching and defense the Salukis roamed to their third straight Illinois Valley Conference title by winning all of their Valley games.

At the end of last season, the outlook for the 1984 campaign looked great. All American outfielder Dave Stieb would back along with pitchers Rick Keeton and Jon Simon who had a combined 1-8 record. However, things have changed. Stieb, Keeton and Simon have all forgone their last year of eligibility and

Itchy selected ‘Coach of the Year’

Along with gaining its third straight Valley conference, the SIU baseball team received another honor when coach Itchy Jones was named college baseball coach of the year for the year by the Sporting News magazine.

As he approaches his 14th year as Saluki head coach, Jones can look back on 1983 as a well-won record with a great deal of satisfaction. The Herrin, III., native is the winningest baseball coach in SIU history and has led his teams to the College World Series in 1971, 1974 and 1977.

Jones graciously acknowledges the award bestowed upon him by major league general managers and scouts saying, “It feels good to realize major league baseball recognizes our school, program and coach.”

Jones has led the Salukis into NCAA tournament play seven times in the past nine years, including 1978 when SIU lost to Oral Roberts in the regional final.

Committee Descriptions

CHAIRPERSON
This person acts as coordinator over all of SGAC’s Committees and events and is the top administrator of the SGAC Office. He sees that programs are being run that are in the best interest of the student body.

C ONSORTS
The Consorts Committee deals with presenting a well-balanced educational, cultural, and entertaining musical and performing arts program for SIU featuring national, regional and local artists.

FILMS
The Films Committee is responsible for establishing a film program that covers the interests of the SIU student body. Films are presented ranging from the oldest to the most up-to-date.

FINE ARTS
This committee is responsible for enlightening and educating the SIU community with respect to the fine arts. One of its annual activities is the paint sale held at the beginning of the fall semester.

FREE SCHOOL
Free School is responsible for developing a program of courses, workshops, and experiences to cover the wide range of student and community interests.

HOMECOMING/STUDENT LIFE
This committee is in charge of scheduling special programs for Homecoming during the fall semester and for Springfest during the spring semester. These programs should cover the interests of the SIU student body.

LECTURES
The Lectures Committee is in charge of scheduling educational, cultural, and entertaining lectures programs covering political, literary, comedic and societal topics.

ORIENTATION/PARENT’S DAY
The Orientation/Parent’s Day committee is responsible for handling both programs of the beginning of each semester for new and transfer students and programs for Parent’s Day.

STUDENT CENTER PROGRAMMING COMMITTEE
This committee develops programs of an ongoing nature in the Student Center. It also works with the Student Center Director’s Assistant for Programming everywhere except at pitching. “Outside

TRAVEL
The Travel Committee is responsible for coordinating a well-balanced tourist/recreation program for the student SIU. These programs range from one-day to weekend events, trips during breaks.

This committee is in charge of scheduling and showing video programs in the Video Lounge, 4th Floor, Student Center. They also are available to video tape meetings and activities.

New Rec Building, intramurals, clubs provide programs for action-minded

By Jay Beth Starkey
Student Writer

Looking for some real physical activity, a chance to get away from that elbow bending routine you do leaning on bars on the strip?

You might find the kind of recreational program and equipment to suit your needs over at the year-old Recreation Building on the west side of campus.

According to Bill Riefer, director of intramural-recreational sports, "students can participate in sports programs with very little out-of-pocket cost."

There is a variety of sports activities offered to both men and women, like 18-hole golf, swimming, and relay competition.

Team posted strong finish

By Doug Wilson
Staff Writer

Coming off what coach Dick LeFevre terms "a down year," the SIU men's tennis team is looking forward to bigger and better things this coming season.

The team had a slow start early in the year but came on strong toward the end to finish with a final record of 11-7, one of only five losing seasons LeFevre has encountered in his years as Saluki tennis coach.

But things are looking up as the No. 1 singles player, Jeff Lober, a senior from South Africa, returns after posting a 16-12 won-lost record last season. Also coming back is the No. 2 player, Neville Kenneway, a senior from Hamilton, New Zealand. During his junior year, Kenneway posted a 14-14 mark and teamed with Lober on the No. 1 doubles team to record an 18-10 ledger.

LeFevre said the No. 3 singles player, Boaz Nikrinit, will not be returning to school in the fall. Neither will Sam Dean, the No. 4 singles player. However LeFevre says Dean will return to school to try to play in the spring. Dean had the best record on the team last year with 30 wins against eight losses. As a doubles team, Nikrinit and Dean combined for a 10-17 record.

The No. 5 singles player, Mark High, may return for his sophomore year after posting a 9-16 record last season. The No. 6 singles player, Jose Lizardo, a sophomore from Manila, Philippines, will be trying to improve on his 3-21 record in his first season. The High-Lizardo doubles team posted a dismal 2-21 record, on which they surely hope to improve.

LeFevre says he hopes to get some help from Paul Herkis, a walk-on from Bayside, Long Island, N.Y. He also said that a couple of brothers from Greece may be on the team in the spring as well as a junior college transfer from Mexico. The brother of former SIU tennis players Hel and Felix Amon is also expected to come to SIU this season.

Unlike some tennis coaches at Stanford and UCLA and other schools with warm weather and strong tennis traditions, LeFevre says he has to look hard for the good players whereas the previously mentioned teams have good players for them. Identifying where the good players are is a problem with recruiting, LeFevre says.

The team will basically play any practice match through the fall with tournaments at Illinois State and SIU-Edwardsville. The spring schedule includes tough Valley competition from West Texas and Virginia as well as matches against Michigan, Indiana, Wisconsin, Illinois, Iowa, Notre Dame, Oklahoma, Oklahoma State, Mississippi, Georgia, LSU, Florida, Kentucky and Vanderbilt.

Women contend in 11 sports

(Continued from Page 3)

The replacement of two key players, according to Coach Julie Illner.

The two are Pat Malecki and Kathy Vazquez, who graduated and retired. "Our strength is that most of the team is back and have played together before," Illner said. "Our weakness is speed—we are not used to playing good, fast teams for a whole game."

(Other players who will return from last year's championship team are Denise Gelinas, who missed the spring.

Illner has a 94-35-24 record at SIU. The coach said the team is preparing for the coming season by working on ball control, stickwork and conditioning.

The only women's team with a junior varsity will open its season at St. Louis University.

TENNIS

With the loss of the No. 1 and No. 2 players, Sue Briggs and Marsha Bladel, the women's tennis team is expecting an uphill battle this year, according to Coach Judy Arvid.

Briggs graduated and Bladel has transferred to Arizona because her family is moving there. Briggs was a two-time All-American and Bladel won the state collegiate doubles title last fall and was a member of the state record of 26-1.

The Salukis lost first out of 19 teams in the Missouri Valley Women's Collegiate tournament. Briggs took second in singles and she and Bladel took the doubles event.

Briggs took her second state singles title at Western Illinois. The team faced 13 other teams last year and ended the season with an 8-5 record.

Auld said that she will be trying to put together a winning combination to replace the duo. Maurice Kohler and Francesca Watson could be the ones.

Auld said.

611 SOUTH ILLINOIS AVENUE
CARBONDALE, ILLINOIS 62901
Student Center has expanded since $5-per-semester days

By Jim McCarty
Summer Special Staff

There was a time when the Student Center was called University Center and students had to pay only $5 a semester for its operation. That was before the center had a Big Muddy Room or a carpeted bookstore. At that time the food service took up about half the space it does today and the Old Main Room, the restaurant on the second floor, didn't exist. Nor did the electronic postal service.

There were only 10,000 students to accommodate, many of whom complained when the price of hamburgers was raised from 25 to 30 cents.

The Student Center was expanded in 1970-71 when Clarence "Doc" Dougherty was director. Under his guidance all the services mentioned above were added along with others like a floor video lounge on the fourth floor, which shows many feature films throughout each semester.

The same of the building was officially changed to Student Center in 1971. It had been informally titled University Center until George Camille, student president at the time, said at a student senate meeting that a University Center fee should be paid for by all members of the university.

The senate was discussing a raise in the fee from $5 to $15 per semester. Since students were paying for its operation, and the building was created primarily for students, they officially named it Student Center.

Students help pay for its operation with a $20 per-semester fee and have a voice in how it operates. In 1971 the Student Center Board of Trustees set up the Student Center Board which consists of seven students and five faculty administrators.

The board, which is advisory in nature, meets once a month to discuss regulations, policies, procedures and programs necessary for the Student Center to fulfill its role. Persons interested in the Student Center Board can contact the Student President in his office on the third floor of the Student Center.

The semi-annual student fee is not the only way students pay for the Student Center's operations. The largest source of income for the building comes from the sale of school supplies in the bookstore, food in the three restaurants or vending machines, newspapers and magazines in the newsstand, and games like bowling, bumper pool, billiards and pinball machines in the games room.

Another source of income for the building comes from retained tuition which is money from the state.

The money from these three categories—retained tuition, sales and student fees—is used to pay for the loan on the building utilities and operating expenses.

These expenses amount to about $650,000 a year plus about $4,000 for a repair and replacement fund for major repairs.

Arena near half-million mark

The SIU Arena, opened 14 years ago, is approaching a career attendance figure of half a million for entertainment events.

Arena manager Gary Drake said the 1977-78 season drew 62,800 people for eight different events, including four professional shows of the Ringling Brothers and Barnum & Bailey Circus, that boosted total attendance during Arena

The figure does not include attendance at University athletic events.

Drake said the 77-78 season was marked by three consecutive sellouts—a record. Sellout attractions were Emerson, Lake and Palmer (Feb. 15), the Harlem Globetrotters (March 1) and Utah's Mountain Dance and Song Society (April 6).

"A credit union... a pure cooperative. The organization is within the membership of a specific group wherein the "one-vote rule prevails; the money is accumulated exclusively from the members and is used for loans made exclusively to members. The management is elected by and from the membership, and all profits are divided among the members in interest and dividends."

Roy F. Bergengren
The Bridge, Vol. 1, No. 1
June, 1924

"A credit union... operates under state, provincial, or federal supervision and supplies its members with three primary services: 1) an easy and convenient system for accumulating savings; 2) a source of credit at normal interest rates; and 3) (most important) a school wherein the members are educated in the management and control of their own money."

Variety is the keynote in theater groups' bill

By Lee Ann Market
Student Writer

Comedy, modern drama, Greek drama, a concert and a civil rights drama will be the major productions in the University Theater during the 1978-79 season.

"We try to present plays of a more serious nature during the winter season because we want to appeal to the student body and to the faculty," said Darwin Red Payne, acting chairman of the theater.

The season begins Sept. 21-23 with "Can't Take It With You," a comedy set in the 1930s depression era.

"You Can't Take It With Yo'Neal," the story of a family, the Vanderhoffs, who seem to have no apparent source of income but are very happy. Each member of VTHE Vanderhoffs has his own interest and pursues it. The family still lives in harmony despite the lack of money and the varied interests.

A humorous, but telling, contrast occurs when another family, the Kirbyys, drops by unexpectedly. The Kirbyys are a wealthy family but do not possess the love and affection that the Vanderhoffs have.

The theme of the play is in its title, which expresses the relative unimportance of money as compared to other things in life.

The play was written by George S. Kaufman and Moss Hart. It will be directed by Joseph Talarowski, professor of theater. The set design will be by Tom Tebbehoff, graduate student in technical theater.

"Vichy," written by Arthur Miller and directed by Payne, will be presented Oct. 20-22. This World War II-era story centers around the interactions of nine men and a boy who are accused of being Jews and have been picked up at random from the streets for purposes unknown to them. They are held in an official detention room in Vichy, France. The characters experience a growing sense of doom as they slowly realize why they are being held.

John Cannon, assistant professor of theater, will direct the third play "Antione," the Greek drama written by Sophocles in 460 B.C. This play tells of Antiochus' struggle to obey funeral rites from his uncle, King of Thebes, for his brother who was killed at war. The king had refused funeral rites because he had witnessed against Thebes. "Antiones" will be presented Feb. 13-17.

"Dance Concert" will be presented Nov. 9-11, with the emphasis on modern dance directed by faculty members. Selected student-directed dances will be included on the program.

James Baldoni's "Blues for Mr. Charlie," a musical by John O'Neal, founder of the Free Southern Theater, will be directed by Payne. "Blues for Mr. Charlie" is a civil rights play about a casual black, who had been a janitor in the North but who tucked the habit and returned to his prsitional Southern town. He infuriates one person too many. An illiterate, crackertain poor white kills him."Blues for Mr. Charlie" will be presented April 20-22.

"The Birthday Party" by Harold Pinter begins the schedule for the Laboratory Theater, Oct. 5-7.

Dean Kartalas will direct this play for his MFA thesis. The play is a dark comedy staged in an old boarding house in England. The story centers around a boy who has deserted an organization and lives in constant fear that the organization will catch up with him. "Quarter Nights." No. 2-4, will be the second production of the Lab Theater.

The winner of the play competition sponsored by the Theater Department and The Forest Fund is "Dynamic" by Richard Menges of Oak Park. This play will be presented by the Lab Theater on April 12-14. Menges' drama examines events surrounding the 1918 trial of two labor agitators accused of bombing the Los Angeles Times printing plant and killing several persons.

The children's Christmas play will be "The Great Cross-Country Race" written by Allen Brodhurst and directed by Joe Proctor, assistant professor of theater. The play is the traditional tortoise and hare story and will be fun for children because of the costumes and make-up.

The Christmas play will be Dec. 6-9.

Season coupon cards will be on sale Aug. 21 through Sept. 21. Individual tickets will go on sale on Sept. 5. Use of the coupon card will be more flexible this year enabling holders to exchange their cards for five reserved seat tickets for any of the University Theater productions.

Pat Doman, theater business manager, said coupon card holders should exchange their cards for tickets as the performances of their choice as early as possible to avoid last-minute disappointment due to a sold-out performance.

Coupons may be exchanged at any time but Aug. 21 to Sept. 5 will be reserved for exchanges to give patrons the best possible choice of seats. All tickets are sold at the theater box office in the Communications Building.

The coupon card is $7 for students, $11 for the public. Individual tickets are $2 for students, $3 for the public. Lab Theater productions have a general admission of $2. Children's Christmas play tickets are $1.
WELCOME BACK SALUKIS

Carbondale Cablevision celebrates the new fall semester and TV season by offering a "$5.90 Installation Special" to all new subscribers who sign up by September 8, 1978. You save $10.00.

Cablevision offers 12 channels and exclusively, St. Louis channels, 5, 11, 30, Cardinal baseball, movies and much, much more.

Starting in October, via satellite from New York's famed arena, Madison Square Garden, more than 115 live sporting events and 24 hour religious programming on the Christian Broadcasting Network.

All this expanded new service for only $7.95 plus tax a month.

Also starting in October, Home Box Office, featuring premium movies, night club shows, and specials, all unedited and commercial free, at an additional monthly charge for those desiring the service.

Get ready for the Entertainment Explosion and save $10.00 by signing up today at the Carbondale Cablevision office, Murdale Shopping Center.

For more information call 457-3361, 9 am to 5 pm Mon. thru Fri.

*New subscribers without prior credit experience may be required to pay a refundable deposit of $15.90 plus tax.
Marching Salukis practice hard at being different

By Nick Sortal
Staff Writer

A couple of SIU Marching Salukis appeared heavily laden as they walked through the heat the other day for a band rehearsal at the Arena parking lot.

"This is almost more work than I’m willing to put out," one of the band members said to the other.

"Yeah, but just think about all the fun we’ll have putting on the half-time show at the St. Louis Cardinals-Washington Redskins game on Sept. 17," a third band member said, as he hurriedly walked past the two.

"And we’re also going to play at the St. Louis Chase-Park Plaza Hotel later this fall at a banquet honoring the football Cardinals and their new head coach, Bud Wilkinson," another member said as she ran to get in line.

"I guess those events will make this heavy drillin' in the heat worth the while," the -- finally conceded.

"Wonder how many new students will join the band this year?"

Membership on the SIU Marching Salukis band is now open, without audition, to all students who play band instruments, whether you’re a music major or not. As a matter of fact, the band is usually composed of 60 to 70 percent non-music majors, according to Mike Hanes, band director.

Marching band members receive two hours of academic credit for their work. The band rehearses outside on Tuesdays, Thursdays and Fridays from 3:15 p.m. to 4:45 p.m. and holds inside music rehearsal from 7 to 9 Monday nights.

"Since so many of our members are non-music majors, we do not call rehearsals outside the above-mentioned schedule," Hanes said. "We almost always get our work done through our regular practices.

"One thing that makes our band unique is the Saluki way of doing things," Hanes said. "An example of that is the way we enter a stadium. Most bands march in straight-faced and businesslike. But when we enter, we like to scoot it as we enjoy ourselves. This band is designed to be a ‘fun’ organization, unlike many other top-notch college bands. Here at SIU, our musicians pride themselves on their showmanship as much as their playing ability. I think anyone who has watched us will agree with that."

The Marching Saluki uniform makes the performers look like they are going to a formal dinner instead of a football game. Hanes said. Instead of typical bell and plume band leader, Marching Salukis wear homburgs (hats similar to derbies). Tuxedo-like outfits, complete with cummerbunds, ruffles and bow ties replace the typical military uniform.

Red and black plaid coats are worn by various members of the band. "The red coats are worn by trumpet, flutetupes and other high-pitched instrument players," Hanes said. "Trombonist, baritone, tuba players and other low-pitched instrumentalists wear black coats. Since the pitches of percussion instruments range from very high to very low, the percussionists wear plaid coats," said Hanes, who has been the band’s director for 11 years.

A non-military sound accompanies the band’s non-military appearance. Hanes said. "We try to make most of our songs have a swing to them, give them a little life."

One factor contributing to the band’s unique sound is its “Rhythm on Wheels,” or percussion section. Most marching percussion sections have each person mounting a drum over his or her shoulder, while completely ignoring maracas, bongos, other Latin instruments and mounted cymbals. But, by fastening sets of drums to a cart, and placing a box of ‘toms’ on a cart, the Marching Saluki percussion section is prepared for almost anything.

SIU was the first band to try using carts, Hanes said. The system was first used in 1961 when Don Candy was director.

"The drum carts give our band an added dimension," Hanes said. "And we’ve only scratched the surface with their possibilities. Last year, for example, we needed to use some gongs for a show. If it weren’t for mounting them on our carts, the gongs could have been quite a hassle," he said.

A Marching Saluki “band camp” started earlier this month. The camp helped past members review and aids the new members in getting started right, Hanes said.

Students who want to join the band should register for Music 101. Students who have already registered for fall should show up for rehearsals at the Arena and said the course during the first week of school, Hanes said.

In addition to the two St. Louis appearances, the band will play at five SIU home football games and the SIU homecoming parade.

‘Give ’em Hell, Harry’ launches Celebrity Series

By David J. Erickson
Monday Edition

The Chicago Philharmonic Orchestra will open the 1978-79 Celebrity Series at SIU Dec. 13 with performance of "I Love a Parade." The new group of musicians, under the direction of Fred Lewin, will pay off a bill of nine performances by Broadway touring companies, major ballet companies, symphonies, and ethnic groups and "name" entertainers in the series’ 13th season.

The new group of musicians, under the direction of Fred Lewin, will pay off a bill of nine performances by Broadway touring companies, major ballet companies, symphonies, and ethnic groups and "name" entertainers in the series’ 13th season.

The Chicago Circuit, Feb. 3, 1979: A display of tumbling, juggling, balancing, and oriental dancing by a Taiwanese touring company.

"Chicago," Feb. 20, 1979: A vaudeville musical about the life and loves of a chorus girl named Rosie Hart during Chicago’s prostitution era. The cast includes the musical's principal, both dancing and singing. The show is set in a wrestling ring.

This Circuit, Mar. 27, 1979: A performance by a professional ballet company first seen at SIU’s Shryock Auditorium during the 1973-74 season, "Onegin," April 12, 1979: An updated version of a ballet-based contemporary musical (two performances).

WSIU provides on-the-air laboratory

By Martin Fabey
Editor, WSIU News

WSIU-TV and WSIU radio (91.9 on the FM dial) are SiU’s electronic media. They operate within the confines of the Radio and Television Department on campus. The broadcasting units are not entirely unique, but Dave Rochelle, director of the SIU Broadcasting Services, says, “we are one of the few places that has a complete in-house between the broadcasting facilities and the academic area.”

WSIU-TV and WSIU-FM, as they are commonly called, offer students a laboratory where they can get the experience they will need later to land first jobs. Rochelle said:

“Students want to do the jobs that professionals are doing in other stations. Involvement is of major importance in the department, Lynch said. As he puts it, "our particular set-up offers students an opportunity to work in an on-air situation."

TelPro is the student television production company. It offers students the opportunity to learn many forms of production, they gain invaluable experience for themselves. Beginning students can join the organization, but many hesitate until late in their college careers, according to Lynch. He explained, "they’re scared to death of the thought of getting involved in a new experience, and they think they’re too busy to do it, hope also don’t know it’s available to them." The SIU Department of Radio and Television offers a much greater opportunity for any other university radio station. Lynch said, "I don’t know any other university in which the opportunity for students to operate, to perform and to write is anywhere near as great."

WSIU-FM is a fairly new stereo operation with a new control board. Lynch said:

A survey Lynch conducted a couple of years ago showed that of those who had been graduated from the SIU department since 1961, 90 percent were still working in broadcasting. He said, "our placement effort is better, by far, than most other places." His survey also showed placement is better than 50 percent within a year after graduation.

The history of WSIU-TV dates back to November 1961, when the station began its operations. Several significant changes have taken place since then including a change in the programming description. The Public Broadcasting Act of 1967, originally known as the Carnegie Commission Report, changed the description from educational broadcasting to public broadcasting. Rochelle said, "The quality and diversity of our programming are two of the biggest changes since public broadcasting first started here. We still have programming for the cultural society but now we also have programming with diversity, for everyone."

WSIU-TV and WSIU-TV also operated by SIU, are on the air approximately 85 hours a week. Programming from the Public Broadcasting Service (PBS) network accounts for about half of their television content. The rest of the stations' daily schedule is divided between local programming and other educational programs. Local programming includes about 12 hours a week. WSIU-TV offers viewers a daily half-hour evening newscast which is presented at 5 p.m. each Monday through Friday. During the regular school year, an additional hour of news is added to the schedule, one at 8:30 a.m. and one at 12:30 in the afternoon.

Other programming offered to the viewers includes "Good Company II," "Outdoor with Art Reid," "Sports Tonight" and various public affairs programs.

Programming from the network and other sources includes a wide variety of music ranging from heavy rock to classical music, classics, opera, PBS "Masters of the Air," "The Glass Menagerie," "Going Plaid," "Concerts from the Library of Congress," among others. The network, which WSIU-TV has been a part of since 1962, provides four channels by which WSIU-TV can receive material. "It has proven very useful and allows us internal flexibility and helps economically," Rochelle said.

As far as the future of the stations and the department is concerned, Lynch said, "our state has a lot of money now, I would like to be able to see some kind of support for oroen materials. We have too many students at the moment to serve them all as we should. We serve them well, but we could do better with fewer."
SGAC plans a week of fun for new, returning students

By Nick Sartel
Staff Writer

A watermelon fest, movies, live music and other entertainment have been scheduled by the Student Government Activities Council (SGAC) as part of new student week, starting Aug. 25.

The activities, to be held at the Student Center, are part of SGAC's orientation program. Other projects for this fall include an open house at the Student Center, an activities fair and Parents' Day.

These activities will help acquaint both new and returning students with "fun things" to do at SIU, according to Dave Adams, SGAC orientation chairman.

Student Life Advisers help new students become familiar with the University during new student week.

The advisers are volunteers who have been at SIU for at least one semester.

"Although advisers aren't paid, that doesn't mean the job is not rewarding," Adams said.

"In addition to making new friends, the advisers get a lot of enjoyment out of helping the students. They remember what it was like when they were freshmen."

Also, a term as an adviser can be listed on a job resume, he said. Students who come to new student week will receive a booklet containing discount coupons from Carbondale businesses, Adams said. The booklets are being assembled by the SGAC orientation committee.

In addition to the beginning-of-semester activities, SGAC will host a Student Center open house on Aug. 25. Bingo, trivia contests, movies and bowling and billiards will be offered as activities.

"The purpose of the open house is to acquaint all students, but mostly new ones, with the Student Center itself," Adams said.

"By the time students finish going to some of the activities they will know where to look for facilities."

"Carbondale Squares," which is similar to television's "Hollywood Squares," is another activity to be held in the Student Center during the open house. The "squares" will be filled by celebrities from the Carbondale area.

Students can learn about all the SIU-sponsored clubs and organizations during the activities fair, Sept. 15. All the clubs, fraternities and sororities are invited by SGAC to set up booths to talk about their organizations. Adams said students can get acquainted with and involved in the activities they like through this fair.

Parents of SIU students can learn more about the University during Parents Day, Oct. 14. Activities include a dinner at SIU President Warren Brandt's house, a special program at the SIU-Arkansas State football game and mini-classes.

Thompson vs. Bakalis on WSIU-TV

Gov. James Thompson and his Democratic gubernatorial challenger competed in a debate at Bakalis on WSIU-TV, Monday, Sept. 8. The debate will be held in the WSIU-TV studio, according to Dave Thompson, director of the University Broadcasting Service.

The debate is one of a series of four debates between the two aired on the state's four public television stations this summer and fall. The first debate, originating in Chicago, was aired June 8. The second debate will be held in the WSUI-TV studio, according to Dave Thompson, director of the University Broadcasting Service.

Other debates will be held in public broadcasting studios in Peoria (Sept. 19) and Chicago (Oct. 12); but they'll all be carried live on WSIU-TV, Rochelle said.

Local bands play to a variety of tastes on 'The Strip'

By Alvin White
Student Writer

Rhythm and blues. Hard rock. Soft jazz. Soul Country. When it comes to live music entertainment, Carbondale has something for everyone. It's a musical haven for the most lovers. Students usually enjoy an evening out on Illinois Avenue, commonly known as 'The Strip.'

Some of the bands that play on the strip, such as Coal Kitchen, and Bug Twist and the Mellow Fellows, are relatively well known, while others are not so well known. Vision, featuring Robbie Stokes on the lead guitar, is another well-known local band. Stokes, who gained most of his experience playing for the rock-oriented Grateful Dead band and for Queen silver Messenger Service said he "recently established contacts with Grateful Dead drummer Mickey Hart in a visit to Chicago. He played lead in the hit single recording of 'Spirit In The Sky,'" by Norman Greenbaum.

We turn to appeal to the more cerebrally-oriented college students," said Stokes, a 28-year-old punk rocker. Although the group keeps up with the top 40's charts, they are currently stressing original material, adding a light show in the near future, and looking forward to becoming nationally know recording artists.

Michael Ebersohl, 25, is a Morlphynhino native who founded the group and believes that in order for a band to be successful in Carbondale "innovation and professionalism should be its primary objectives." Ebersohl is an 11-year veteran of Southern Illinois area. Other members of the band include Howard Williams, a thirty-year-old guitarist who has played on Chicago's Rush street area, and Steve Ball guitar and harmonica, also from Chicago.

Students seeking country western swing, bluegrass and honky-tonk music can satisfy their desires by listening to any of Carbondale's many country bands—the versatile Cadillac Cowboys, one of the most popular among them. The Cowboys are off shoot of a teenage group from Petos that has played back up for Freddie Fender, Mel Tillis, Lynn Anderson, Kenny Rogers and other well-known country music artists.

Members of this lively group include Kenn Carlisle, banjo, electric guitar and fiddle; Norman Fuschman electric bass and acoustic guitar; and Roger Ward (fiddle and electric guitar). Carlisle said that the group was founded by Jerry Brightman, a former band from the popular Buck Owens band. This four-member group appeals "to everyone from six to sixty," stated Carlisle.

CARBONDALE'S answer to The Sex Pistols, The Ramones, Jaggy Pop and the New York Dolls, all punk rock bands, is The Bears, this city's first punk rock music band. The Bears combine features with a great deal, and according to guitarist Joe Henderson, "we aren't interested in achieving wide success, we just wish to reach people who will understand us and strike terror and disgust in the hearts of the rest."

Progressive jazz seekers can usually find music similar to the style of Chick Corea, Sonny Clark, and Keith Jarrett, being played by the group. Ferry is a familiar name to jazz connoisseurs. Ferry is currently playing every Sunday evening at Pitch Penny Pub, located in the Lewis Park Mall.

Music School to sponsor free musicals

Plenty of live musical entertainment is available to students and the community this fall in the School of Music. "The School of Music schedule begins with Sydney Smith, a visiting artist, organ, Sept. 5 in Shryock Auditorium. "

Marilyn Weir, harp, faculty recital, organ, Sept. 22, Shryock. "

Katherine Wilhelm, graduate recital, organ, Sept. 27, Old Baptist Foundation Chapel (OBF).

In October, there is a faculty piano trio, Oct. 2, in Shryock; Jazz Band Concert, Oct. 4, Shryock; Joy Lingerfelt, graduate recital, piano, Oct. 6, Shryock.

Janet Dollins, graduate recital, organ, Oct. 13, Shryock, the fall opera production, directed by Ralph R. Wallace, Oct. 19, Shryock, the Blair Woodwind quintet, a visiting group, Oct. 19, OBF; "A Breton Folk Song," conducted, Oct. 25, Shryock, and Shlof, graduate recital, voice (soprano), Oct. 26, OBF.

November features Charles Fligel, "Starry Night," conducted, Nov. 2, OBF; Organ Festival, Nov. 3, Shryock; Symphonic Band Concert, Nov. 10, Shryock; Steven Barwick, faculty recital, piano, Nov. 9, Shryock; Jazz Band, Alexis Valk, conductor, Nov. 10, Shryock; Deborah Se невa, graduate recital, voice (soprano), Nov. 11, OBF;"}

Choral Concert, David Williams, director, Nov. 14, Shryock; Ensemble Concert, Mel Siener, conductor, Nov. 15, Shryock; Matthew Whiley, piano recital, piano, Nov. 16, Shryock, and Mary Jane Grullin, faculty recital, piano, Nov. 20, Shryock.

Scheduled in December are Norma Sitton, graduate recital, voice (soprano), Dec. 1, OBF; Glee Club, Southern Singers-University Choir concert, Dec. 3, Shryock, and Handel's "Messiah," Dec. 6 and 7 in Shryock.

Student recitals will also be given throughout the semester and will be announced.

"Come in and Bring a friend or make a new one."
Movie series scheduled to save students money

By Deb Browne
Staff Writer

"Thieves Like Us," a Robert Altman film starring Keith Carradine and Shelly Duvall, is one of SGAC Films' Thursday night fall bookings in its new Thursday-through-Sunday format. For 75 cents, Thursday showings are a real steal.

From recent popular films like "The Fly Over the Cuckoo's Nest," to heavy documentaries like "Hearts and Minds," a film exposing the injustice of the war in Vietnam, the Student Government Activities Council (SGAC) film committee has scheduled a good selection of films offering something desirable to almost any cellular appetite.

They are normally shown at 7 and 9 p.m. in the 300-seat Student Center Auditorium, second floor, south end, unless otherwise advertised.

SGAC Films has lined up movies four nights a week instead of six this year so that "we could have a more solid program and charge a little less admission," said chairperson Alan Thatcher.

Friday through Sunday showings will cost $1.

SGAC Films gets funding for film rental from ticket sales and student activity funds which come in part from student fees.

The committee's "potpourri" of Thursday showings include the original "King Kong," "The Thin Man," "Christopher Strong," starring Katharine Hepburn, "It Happened One Night," with Clark Gable, Robert Young's "Rebecca," "Ride the Whirlwind," with Jack Nicholson both wrote and starred in, and "Pay Day," an independently produced film by Rip Torn.

"Cuckoo's Nest" opens SGAC Films' Friday-Saturday schedule. "Outrageous," a film about a female impersonator "on its way to becoming a cult classic," according to Thatcher, will run Sept. 8 and 9. Frank Zappa's story of the Mothers of Invention, "200 Motels," is scheduled for Sept. 22 and 23. "Hearts and Minds," will be shown on Oct. 13 and 14. "Oh, God!" the most expensive film contracted by the committee, will be shown on Nov. 3 and 4.

"Badlands," Susie Speer's first film, will be shown Labor Day weekend. Thatcher said other films contracted for Friday-Saturday showing are "Julia," "The Turning Point," "Kiss, Kiss, Bang Bang," with Sally Field and Jeff Bridges and "Hearts of the Hills," by Woody Allen, creator of "Fritz the Cat."

So far most of the Sunday foreign film bookings are tentative, Thatcher said, with the exception of "Murmur of the Heart," by French director Louis Malle who recently released "Pretty Baby."

Thatcher said he hopes to get at least one Woody Allen movie, and has set up horror movies, admission free, for the first four nights of finals week.

SGAC Films, formerly called Cinematheque, is in effect filling the gap left by the disintegration of the Southern Illinois Film Society. Cinematheque was known for scheduling big-name films while SI Film Society last year scheduled two documentary films and six foreign films, said Thatcher, former president of the film society.

The name Cinematheque, a French word, has been dropped for the sake of accuracy, according to Thatcher. "The name 'Cinematheque' was a little pretentious because that actually means 'film library,' which it's not," Thatcher said.

The new program consists of a schedule similar to that of a 1960s, B-rated and lesser-known films on Thursday and foreign on Sunday, with two nights of "popular to very popular" recent films on Friday and Saturday, according to Thatcher, a senior in cinema and photography.

For some men, life is too full to waste even a minute of it. So, for these men, we have created a very special men's store: It's THE MINUTEMAN in Southgate Shopping Center in Carbondale.

We're not just another jeans store. Instead, we're THE clothing store for the man who wants a little more—more quality, more service, and more style—without having to pay a lot more for it.

So, take a minute and check us out. At THE MINUTEMAN, it'll be time well spent.
Dylan, Holiday on Ice on tap at Arena

By David J. Erickson

Monday, Dec. 2

He had Bob Dylan tentatively booked for this fall's October 29th Homecoming concert late last spring, but keeping mum and waiting to see how things pan out is only good business sense for acting Arena manager Gary Drake.

Twenty-nine-year-old Drake has been in charge of the four-acre multi-purpose facility since previous acting manager Jim Abel left late last fall.

After a highly successful, though slightly sparse season last year, which was highlighted by sellout shows starring Emerson, Lake and Palmer and the Skark Mountain Daredevils, Drake appears to be out to top himself this season.

After all, in booking Dylan, he has already what could safely be called the greatest Homecoming attraction this school has ever had.

"As long as it's economically feasible, we plan to do at least one rock show a month, maybe two," Drake said. "Considering the diversity Focus 4 gives us, maybe even three," he added.

Drake admits that the 4,000-seat Focus 4 arrangement makes his life more complicated. It costs more to set up than the 8,000 seat format and poses added security problems. But he says it's worth the bonus because Focus 4 provides "an opportunity to get groups here you'd never get to see in Carbondale, otherwise."

For the family-minded, the Arena has scheduled Holiday on Ice for the last week in September. Last year's family events, the Ringling Brothers and Barnum & Bailey Circus and the Harlem Globetrotters, were highlights.

If things go as Drake anticipates, there will be a rock show before this, hopefully during the week of September 11th. He plans to book a second show in early October. In an effort to provide a balanced schedule, Drake said he's looking for a band that plays a harder and rockier line than Dylan for this concert.

Reflecting on the interests of the students and community of the Southern Illinois area, he explained that he sees the show market as being loosely divided into three groups: rock, family and country.

"I wouldn't mind having a country show this year," Drake said. "There's a definite hard-country market in this area. The problem is, we've already had most of the big names."

In recent years, the Arena has produced hard-country shows starring Charlie Pride, Loretta Lynn, Merle Haggard and Dolly Parton as well as country acts like Waylon Jennings, Johnny Cash, Charlie Daniels, the Outlaws and Rusty Warren.

One possibility is a multi-media presentation based on Ray Bradbury's science-fiction book, "The Martian Chronicles." A show of this type would be a first for the Arena.

Although his title might lead one to think that Drake deals with the "fronts," he actually doesn't get first pick of the dates available at the saucer-shaped facility. That's left fixed for the men's and women's intercollegiate athletic events which are another important part of Arena activity. Drake schedules his events around the sports calendar, of course, and then cancel their practice the day of the show. Cancellation classes scheduled for the Arena can be a little more touchy, but he said the instructors have been very nice. Since relocating the class the day a concert is scheduled.

While discussing the possibility of having been working on for this year, Drake pointed out one of the ironies of his job. Because of the nature of the unpredictable world of entertainment, he often spends as much time preplanning for concerts that never materialize as he does on one that does. "It's a lot easier relocating the class the day a concert is scheduled."

Big Bird and friend, Leslie Crowe, "will be here with Holiday on Ice."
