Illinois Avenue bars may be asked to move

By Melody Cook
Staff Writer

Bars located along Illinois Avenue may be "encouraged," to move out as a result of downtown redevelopment plans discussed at an informal meeting of the Carbondale City Council Monday. A plan expanding the area to be included in the redevelopment project was considered by the council, but no formal action was taken. About 30 blocks in the center of the city would be included in the redevelopment district if the new boundaries are approved. The district boundaries will determine where new and remodeled buildings will be. However, bars located within the redevelopment area will be encouraged to relocate elsewhere in the city, according to Stan Copeland, a director in Personnel Services. The plan is designed to benefit Anderson forces gear up campaign on local level

By Karen Guille
Staff Writer

The campaign forces of independent presidential candidate John Anderson are gearing up at SIU to promote both student and community support for the Illinois congressman in Southern Illinois. Meanwhile, student support for President Jimmy Carter is still in the planning stages and a student campaign for Republican Ronald Reagan has yet to surface.

Proposed new downtown area is shown in white.

Gus says students were for McCarthy and McGovern, too, and look what it got 'em.

Paul Morrill, campaign manager for U.S. Rep. Paul Simon, D-Carbondale, said new state and local coordinators of Carter's campaign are being appointed by Carter strategists in Washington. He said student support for the president at SIU will probably begin with the College Democrats, a student political group.

Although a student campaign for Reagan hasn't been formed, Rose Vest, co-chairman of the Jackson County campaign for Reagan, said that Reagan campaign offices will locate in Marion and Carbondale, but exact locations are still unknown. She said that the College Republicans, another student political group, is traditionally involved with all Republican campaigns.

Students For Anderson, a recognized student organization on campus, is part of an area-wide effort to win student support for the "Anderson Difference," said Christ Cordogan, Carbondale campaign coordinator. "Right now we are concerned with community outreach in Southern Illinois," Cordogan, 21, said. "The base of our organization consists of about a dozen people, but eventually we hope to open an office serving the 24th Congressional district which would be staffed by students." Cordogan said his group, which was formed in March, will concentrate on promoting student interest and attracting volunteers to participate in fundraising activities.

Because Anderson is an independent candidate, he doesn't receive federal matching funds available to party candidates. Cordogan said both President Carter and Republican candidate Ronald Reagan will receive over $30,000 each in federal matching funds, he said.

Four states—Ohio, Maine, New Mexico and Kentucky—contested petition drives to get Anderson's name on general election ballots, resulting in costly court battles, Cordogan said. "Fundraising may not be easy within the student body," Cordogan said.

"Down here on the grassroots level, people who would like to contribute on a local campus, such as students, have already exhausted the funds they have," he said. Operating an office in the area may cost around $2,000.

Anderson's name on general election ballots, resulting in costly court battles, Cordogan said. Initially, the group will be contacting students by phone and through meetings which will be held every two to three days. Jack Norman, campaign coordinator for the 34th district, said Anderson received 22 percent of Ronald Reagan's total contribution. The from the redevelopment area, extending west and easton Main Street from Poplar to Wall Streets and north to Hickory and Mill Streets, was chosen because of a deterioration of property values, tax base and aesthetics, according to a Citizen's Downtown Redevelopment Committee member.

Some City Council members, however, expressed concern Monday that the area was too large for the city to effectively bring the planned "new vitality" to the downtown area. They said a smaller area would increase funding availability. But City Manager Carroll Fry said that by including the larger area in the improvement plans, the city would get "the edge" on future improvement plans.

Chairman says students were for McCarthy and McGovern, too, and look what it got 'em.

Gus says students were for McCarthy and McGovern, too, and look what it got 'em.

Don't forget: To help them, call your friends, tell them about the Anderson Difference campaign! If you can, volunteer your time and talent! The Anderson Difference is working to make a change. Temporary recyclables depot established while options eyed

By Tony Gordon
Staff Writer

A temporary depot will be set up in Carbondale for the collection of recyclable materials following the decision earlier this month of three firms operated by Resource Reclamation, Inc., a Murphysboro-based solid waste disposal organization. At an informal session Monday night, the Carbondale City Council agreed to place three recycling bins at the corner of Jackson and Main Streets until the city administration develops a permanent waste disposal system. The new system will be city-owned and operated. Resource Reclamation closed down operations in Carbondale, citing rising operating costs and the loss of its CETAC employees."The building planned for temporary drop point is presently used by the Public Works Department for storage. In the meantime, City Manager Carroll Fry is studying options for a permanent recycling program. Among these is an ordinance which would require residents to sort recyclable materials before garage collection and would limit garage collection to a single hauler.

Fry said under this plan the trash collection would be handled either by the city or by one private firm contracting with the city. There are presently 17 firms that collect refuse in Carbondale. Fry said a city-operated or single-private-hauler refuse collection system is advisable, because it would be possible to have wastes collected in garbage trucks while flat-bed trucks collected newspapers, cans and bottles. Turning that type of operation over to 17 different firms would result in "organized chaos, because private haulers would not deal with it," Fry said.

He speculated that without an ordinance to support the operation, the private firm would simply operate as the current operators do, collecting everything in garbage trucks and taking it all to the dump. Fry also said any long-term plan based on voluntary recycling would be non-productive.

Councilman Charles Watkins urged setting up the temporary collection point because "the council should endorse the voluntary recycling that has been going on in town while we look for a long-term solution to the problem," he said.

Resource Reclamation closed its collection points in Murphysboro on Aug. 16, and posted signs directing its customers to temporary drop points.

Turnout heavy for special election

CAIRO (AP) — Election officials in this Southern Illinois city reported heavy voter turnout as polls closed Tuesday in Ballots had not been counted by 9:30 p.m. CDT, said a spokesman in the Alexander County clerk's office. The spokesman said polls closed at 7 p.m. after an estimated 1,000 voters had cast ballots, but three hours later, the ballots had not been brought in to be counted. He said a "large number" of absentee ballots appeared to be the cause of the delay.

Voters elected four men from six candidates in two wards to serve as aldermen in a federal court-ordered restructuring of the governance of the city. The city has been under federal court-ordered supervision since 1983, when it was divided into five wards with one alderman and one mayor to be elected at large.

The settlement was aimed at putting an end to the at-large form of government which historically has been controlled by whites since 1913. Two black aldermen will be elected in November and the city has until 1985 to complete the switch to aldermanic rule.

Chancellor Kenneth Shaw in a hearing before the
legislature last spring that if the University didn't start moving soon on a step-pay plan, he'd propose his own.

Copeland said he opposes step-pay plans and agrees with Hester's assessment.

"They don't do a thing of the past," Copeland said. "The rigid pay scale built into step-

pay plans don't give us the flexibility to meet changing situations." Copeland presented the University's step-pay plan to civil service workers at a

Reagan's daughter to speak

Maureen Reagan, eldest daughter of Republican presidential candidate Ronald
Reagan, will be the guest speaker at the
Hambletonian Dinner Friday at the Student Center.

Reagan will address state and local Republican officials and student delegates from Illi-
go. James Thompson, U.S. Senator Charles Percy, R-Ill., and Lt. Gov. David Orr will attend the biennial dinner hosted by the Republican State Committee. A news conference will be held in the Student Center Lounge prior to the
dinner.

A former actress, singer, and host of her own television talk show, Reagan is now a director of sell Over America, a private company which promotes American exports abroad. An outspoken advocate of the Equal Rights Amend-
ment, Reagan supports her father greatly these days, according to published reports. Reagan will also attend the Hambletonian Saturday.

State and Nation

Carter favors two-man debate

WASHINGTON (AP) — President Carter has accepted an in-
vitation from the National Press Club for a head-to-head debate with Republican Ronald Reagan as soon as possible, the president's chief spokesman said Tuesday.

"By accepting this invitation and with the hope that Governor
Reagan will also accept it, we will then have that assurance of a
see-on-one debate," White House press secretary Jody Powell
said.

A spokesman for Reagan said the Republican candidate had received the press club's invitation also but would not commit until at least Wednesday.

If Reagan accepts the invitation, the White House hopes the
debate will occur in the first half of September, before the Sept. 18
debate the League of Women Voters has scheduled. Independent
presidential candidate John Anderson could be invited to that
along with Carter and Reagan.

Polish leaders ask church for help

GDANSK, Poland (AP) — In an unprecedented move, Poland's
communist leaders turned to the Polish Roman Catholic primate
for help in ending the nation's crippling labor problems
Tuesday as the strikes spread to the southern industrial cities of Lodz and Wroclaw.

The state-controlled media broadcast an appeal from Cardinal
Stefan Wyszyński for "prudence" and "responsibility" in the crisis.

Shooting prompts night of violence

PHILADELPHIA (AP) — Angry demonstrators, protesting the
killing of a black teenager by a white policeman, stormed a police
station and then looted several small stores during a night of
violence in a South Philadelphia neighborhood Monday night,
authorities said.

At least 10 people were arrested during the night, most of whom
were charged with riot and assault, said police, who planned in-
creased patrols in the area. No curfew has been ordered.

On Monday night, 12 officers, a firefighter, and a television news
crew were injured as a crowd hurled rocks, bricks and bottles at a police station six blocks from the boy's home.

Add leadership to your college schedule.

College military science courses are courses in leadership development. They offer you manage-
ment experiences which will benefit you in any career, civilian or military.

You can take the first course, as a freshman or sophomore, without obligation. Advanced
courses, in your junior and senior years, lead you to a position of responsibility as an officer in the
career Army or Reserves.

As an Army ROTC student, you'll have the opportunity to apply for full tuition and select-
fees scholarships. And you'll earn nearly $2,000 during your last 2 years of college.

Don't wait until after college to get practical management experience. Add leadership to your class schedule now.

FDA tranquilizer warning useful

Colman McCarthy

If some professional support were present. But it isn’t. In medical school, physicians receive little education on how to recognize patients for whom tranquilizers might be dangerous.

Instead, what doctors learn about drugs often enough comes from the pharmaceutical industry. To look through the medical journals of the last decade and concentrate on just the ads for tranquilizers is to see bucksticker at its sleaziest. For every kind of patient—from the woman with housewife blues to the hard-driving executive—there is a mood drug to chase away or ease the stresses of life.

As bleak as the scene is within the medical profession, it has been worse on the outside. The line that for every ill there is a pill has been bought so totally in America that even for those who may not want to be souped up pharmacologically there is no choice. Before birth, according to one estimate, fetuses are carried by women who have had an average intake of 19 different drugs. At life’s end, nursing homes routinely put the elderly on tranquilizers even if no medical need exists. Staff convenience is the need.

To cure the national epidemic of sedativism will require a combination of forces. Some of the relevant observations. The first tranquilizers in a Schedule II classification, which would mean no refills without the patient going back to the doctor for re-examination. At that point, the FDA should require that the patient be given information about the dangers of the drug.

The power of patient awareness shouldn’t be dismissed. In the last four years, Valium prescriptions have decreased by 30 percent. Congressional hearings, books like “I’m Dancing As Fast As I Can,” newspaper series, the work of public-interest health groups and user experience have created an informal regulatory force of their own.

As tiresome as the pharmaceutical industry may be, and as hesitant as the medical profession and FDA are in challenging it, it appears that words is getting out. The suffering that can be created by calmer drugs is often worse than the knowledge they are meant to ease.

Letters

Christians need to be forgiven

Once upon a time, there was a religiously oppressed by its government. It was a secular monarchy and the religious group disliked it all together. Since they were very devout, they called on the secular nature of the government to try to change the way things were. However, they had no power taken away from the monarch and disseminated throughout the nation. Ultimately, the religious group found itself in the minority. It was a power that no one would admit when asked. It’s a power that they weren’t religious. They rose up and defeated the monarch and set up a religious network that ruled the country under a charismatic leader.

Does this sound like Iran? I’m not talking about fanatic Muslims. I’m talking about fanatic Christians. I’ve been described by the Puritans opening of the 17th century England under Oliver Cromwell, their overthrew and establishment of a Puritan dictatorship.

I bring up this historical precedent to remind those involved with the recent feast of Protestant fun-
Seller’s last film is poor

By Bill Crowe
Entertainment Editor

A pretty accurate means to evaluate the effectiveness of screen comedy is simple to perform: just ask yourself if the audience is laughing. Unfortunately, they weren’t laughing much during Peter Sellers’ last film “The Fiendish Plot of Dr. Fu Manchu.”

“Fu Manchu” is a 40-megaton bomb which serves as an awfully poor film harbinger to a comic genius of Sellers’ stature. It’s hard to believe that Sellers—a masterful performer in such films as “The Pink Panther” series, “Being There” and Stanley Kubrick’s “A Clockwork Orange”—would lend his name to such a poorly written, edited and acted disaster.

The plot of “Fu Manchu” has Sellers playing a 168-year-old Oriental arch-villain who badly needs a fix of the elixir of youth which has kept his body preserved. Fortunately, they weren’t bad enough for the audience to laugh. And this is where “Fu Manchu’s” main problem lies. Since Sellers plays both of the lead characters there is little or no chance for dramatic or comic conflict between the two. As a result, the two characters keep apart and any possible friction between the two is kept to a slow burn.

In fact, one climactic scene which the two characters share is the most shallow and unfunny of the film. The camera keeps switching between the two Sellers characters, running any pacing and timing the scene possibly could have created.

These problems may be easy to explain. Reportedly director Piers Haggard was fired in the middle of “Fu Manchu’s” production and replaced by Sellers himself. The change of directors is obvious in the final product. Scenes are left hanging in mid-air, the editing is choppy and the finale involving a revivified Manchu as a rock singer is an insult to Sellers’ name.

Sellers also seems to have problems with the Manchu character. His natural British accent seems to conflict with the Oriental dialect he’s trying to create. During much of the dialogue Sellers mumbles as Manchu is garbled and virtually unintelligible.

His Manchu’s last film is poor

Selfers’ last film is awful. Sellers also seems to have problems with the Manchu character. His natural British accent seems to conflict with the Oriental dialect he’s trying to create. During much of the dialogue Sellers mumbles as Manchu is garbled and virtually unintelligible.

Auditions for plays to be held

WASHINGTON (AP) — The Senate passed the largest military authorization bill in American history and sent it to President Carter Tuesday.

The vote was 78-2.

The measure authorizes $5.9 billion for military procurement, research and development, civil defense and educational benefits for military personnel.

This is $2.9 billion more than the Carter administration requested for these programs.

The bill also includes $72 million for civil defense and $75 million for a one-year test of educational incentives to assist the military in retaining recruits.
The world's largest broom to be made for cleanup day

By Carol Knowles
Staff Writer

If this world isn't big enough for the world's largest working broom, then it's too small for the world's largest frozen pineapple.

A 42-foot-long, 30-foot-wide broom is in the works for the USO, according to Peter Matalonis of the Student Union Organization's "Carbondale Cleanup Day '94." The prints are expected to be $10,000-12,000, with the broom adding about $250 to that total.

The rest of the money expected to come from campus organizations, private donations, and the offices of the National Liberal Arts and Student Affairs. Matalonis said 50 percent of the money has already been raised for the event.

"We want to make this project as diverse and community oriented as possible," Matalonis said. "The relationship between the townspeople and the students is improving and we hope that this project will help.

The cleanup day will feature a festival equipped with a parade, music, food and drinks, all provided by local organizations.

Well-known artist exhibiting work at University Museum in Faner

By Liz Griffin
Staff Writer

The world's largest pineapple will be made for a world record, according to John Anderson, the USO's director of University Relations and Council.

"If you want to make this world record, you must first have something to record," said Anderson. "That's where the pineapple comes in.

"In the process, we are also trying to improve the image of both Carbondale and SIU-C. The Carbondale City Council has approved the plan and Matalonis asked the council at its informal meeting Monday to help get the project off the ground. The council may provide $1,000 plus the broom adding about $250 to the $2,700 cost.

"We are trying to cement the relationship between the townspeople and the students is improving," said Anderson. "We hope that this project will help.

The project is to be held Sept. 28 at Attucks Park, as a means to keep his campaign cleanup effort going.

"We also have cinema photographic films, papers, chemicals and miscellaneous darkroom supplies. We also have cinema film and supplies.

Two bands set to perform for party benefiting Shawnee Solar Project

Two Carbondale-based bands, EKG and Vision, will be performing at Hangar 9 Sept. 7 in a benefit performance for the Shawnee Solar Project and the Makanda Community Development Council.

Michael Santos, manager of EKG, said the bands will each perform one "concert length" set of about an hour and a half. Admission will be $2 and all proceeds from the benefit will be given to the Shawnee and Makanda organizations. A special price for beer will be announced at a later date, Santos added.

The doors at Hangar 9 will open at 8 p.m. and the bands will begin performing at about 9:30 p.m.

Funds raised for the Shawnee Solar Project, a non-profit organization located at 211 W. Main, will be used to renew subscriptions to several publications which contain information on solar and renewable energy resources, said Hugh Muldoon, program coordinator.

"We need to get these subscriptions renewed and the only way we can get that is to run benefits and sell T-shirts," Muldoon explained.

The Makanda organization is dedicated to trying to improve living conditions for the poor and elderly within the community. Muldoon said.

A goal of about $1,000 has been set for the benefit. Santos said. Vision and EKG are receiving only gasoline money in return for their performances, he added.
Kremlin: Polish crisis ‘an internal affair’

MOSCOW (AP) - The Soviet Union, apparently trying to deflect speculation that it might intervene in Poland, said Tuesday that Polish political crisis is “purely an internal affair.”

A Foreign Ministry spokesman who made the statement also asserted that Soviet relations with Warsaw are based on “full mutual understanding and cooperation.”

The spokesman declined to elaborate on a statement, which came in response to questions by foreign correspondents.

The Kremlin has given no public sign of preparing to intervene in Poland. In fact, the Soviet media claim that it is the West that is interfering in Polish affairs with “slanderous propaganda.”

The situation in Poland, where tens of thousands of workers have gone on strike to press demands for more pay, independent trade unions and other economic and political reforms.

Analysts noted that the Soviet military moves Czechoslovakia in 1968 and into Afghanistan last year were justified in part by claims of outside interference or plotting against those countries.

But the anti-Western charges in the Polish case spoke only of verbal “interference,” and did not claim that Western intelligence agencies or provocateurs were involved in the Polish unrest.

Soviet newspapers on Tuesday held rigidly to their policy of reporting only official statements and declarations.

A speech by Polish Communist Party leader Edward Gierek, published in major newspapers, was printed without a paragraph in which he promised “democratic and secret trade union elections.”

The Warsaw newspaper also deleted Gierek’s comment that the highest mission of trade unions was to serve workers’ interests.

Soviet trade unions, which have never authorized strikes, devote much of their public activity to urging the fulfillment of state economic plans, as well as to looking after workers’ interests.

To serve members of the University community who are concerned about their personal safety. A University transit car will be traveling a specific route around the outer fringes of campus (see map enclosed for route and stops). There is no charge for this service.

Ride-ships
Shall be limited to women associated with the University. They are: students, staff, faculty and spouses with spouse cards. Spouse cards may be obtained through the Dean for Student Services Office, phone 423-2378. PRIORITY SHALL BE GIVEN TO WOMEN TRAVELING ALONE WITH INFANT CHILDREN.

Geographical Limits:
Carbondale

Purpose
To serve individual University women who are traveling alone to and from educational activities at Southern Illinois University at Carbondale.

Operational Hours
Seven (7) nights a week commencing at dusk until 12:00 midnight. This service will not operate during scheduled breaks. Adjustments in the hours of operation shall be made when the day-lights hours are longer and at final exam time when the library's hours are extended.

There are many precautions that an individual can employ to prevent assault. The following are suggestions you may wish to initiate as a means to a safer personal environment.

In and About Your Home

1) When you move into a new place, change all outside door locks to prevent former tenants from entering with old keys. Dead bolt locks that cannot be forced should be installed.
2) Install a chain lock secured by long screws or a peephole to allow you to check identification before opening the door. People are not impenetrable, but breaking them takes time and makes them nervous. A noise is probably enough to discourage would-be intruders or at least to allow you to get to the phone.
3) If you have double doors, be sure to lock both of them. Otherwise, when you open the inside door in response to a caller, you have removed your only barrier.
4) Install a lock on any window that can be reached from the roof. There are also devices that turn latches into locks or make them extra strong. Place a specially made lock in the tracks of sliding doors so that they cannot be opened.
5) Have brightly lighted entrances and hallways, and beware of places where attackers might hide, such as between buildings or parked cars, and under stairways.
6) Do not list your full name on the door or mailbox. Use only your first initial and last name. If you live alone, you may want to list nonexistent housemates too.
7) Keep your front door locked at night as a potential assailant is more likely to enter when you seem to be alone.
8) Never leave a house, trunk, or other keys with keys when having your car serviced.
9) If your car does break down, open the hood and lock the car, and lock the doors. Do not get out or roll down windows if someone stops. Ask them to make a call for you and give them a slip of paper with your name and phone number.
10) If you are followed by a car, turn the wrong way on a one-way street (if possible) or just turn around in your tracks (a car can't go and help. Don't lead the follower to your own home.
11) If you are followed by someone on foot, try to head off an encounter before contact occurs. Either run (but only if you can make it to a lighted or busy place) or employ some other prevention measure before you are restricted by the follower.

In Your Car

1) Before you enter the car, always check to see that no one is inside.
2) Lock all car doors when you get out to in sure that it will remain empty. Do not keep spare keys hidden anywhere. Give them to a trusted friend. A car is safe only if it is locked.
3) Don't park your car in unlighted or deserted areas. Have your keys ready as you return.
4) Keep your car, house, trunk, or other keys with keys when having your car serviced.
5) If you pass a disabled car and wish to help, don't get out of your car. Drive to the nearest phone and call the police or sheriff's department. They can offer more assistance than you can, and without the risks.
6) Avoid deserted routes. Take a well-traveled route to your destination, which, hopefully, is well policed. Be aware of places to go if a problem arises and help is needed.
7) You have the right not to pick up hitchhikers.
8) If you are followed, note the car and driver descriptions and drive to a police station or a lighted area, bus stop, or other lighted, busy area. Do not lead the followers to your home, and don't speed up, that will only increase the dangers. Other possibilities include blasting your horn continually, using your gas pedal if you are going slow, or driving without lights at night in the area where the police will stop you.
9) If a car follows you into your driveway, stay in the car with the doors locked and the windows up Sound horn repeatedly and otherwise help.

When Hitchhiking

Hitchhiking should be considered the most dangerous situation in which a woman can place herself. When you get into a car of a stranger, you have removed all barriers between you and the driver. You cannot now avoid a confrontation if one is initiated and you cannot easily leave the vehicle. You have narrowed your methods of protecting yourself to direct encounter tactics (verbally or physically). Generally speaking, this is not good enough. Nonetheless, no one is naive enough to believe that knowing, the vulnerability of a hitchhiker will wipe out this mode of travel. For women who insist that they must or will hitch, the best they can do is a attempt to control the conditions of the ride they accept.

1) The first rule on hitchhiking is—it's just not safe! But if you do...
2) Whenever possible, avoid hitchhiking by yourself or at night.
3) Take well-traveled routes. If you accept a ride keep your window open so that in case of attack you can be heard if you yell.
4) Try to accept rides only with female drivers. However, on long distances that this is safer. If you must ride with a male, never accept a ride with more than one or with a driver who makes a big fuss about stopping (U-turn, slammed on brakes.)
5) Before you get into a car, check the back seat to see if anyone is there and look for any beer or liquor bottles in the car. Check the driver as well. Be sure he is fully dressed, and try to assess his intentions. Trust your intuition don't ride if you are suspicious.
6) Ask the driver where he is going before he asks you. Then ask him, and make your destination. He can say he is going where you are, even if he isn't. If you distrust the situation, you can always say that you aren't going that way—thanks anyway.
7) Be certain there is a working door handle on the inside of the door where you would be riding. Don't get into the back seat of a two-door car.
8) Don't take a ride that will drop you off in a deserted area. Turn it down and wait for one that goes to a more convenient area so you won't be stranded and forced to take the first ride that comes along.
9) If possible, know the route to your destination so that if the driver makes a wrong turn you will know it immediately.
10) If you ever get out of a car or a moving car, be sure that no other cars are coming that might run over you. Protect your head and keep your body, curved so that you will roll rather than scrape, over the ground. Keep your arms in close to your body to decrease the chances of injury.

Daily Egyptian, August 27, 1980, Page 9
The NIGHT SAFETY BUS operates hourly starting at the Student Center each hour, and finishing at the Recreation Center just before the next hour. It will end for the evening at the Student Center just before the next hour. It will end for the evening at the Student Center just before the next hour. It will end for the evening at the Student Center just before the next hour.

The NIGHT SAFETY BUS will start operations AUGUST 25TH at 8 PM, SEPTEMBER 22ND at 7 PM, and NOVEMBER 2ND at 6 PM, in order to increase service as daylight hours decrease.

WHEELCHAIR STUDENTS PLEASE NOTE: The Night Safety Bus has a lift so that it is accessible.

**Please keep in mind, these times can vary from 5-10 minutes depending on traffic, weather conditions, numbers of passengers loading and unloading. If you want to make comments or recommendations concerning the Night Safety Bus, please call 453-3655.**

**WHEELCHAIR STUDENTS PLEASE NOTE:** The Night Safety Bus has a lift so that it is accessible.
THE BRIGHTWAY PATH

Purpose:

1) To provide a lighted access route around campus to help ensure the safety of pedestrians. This is the most populated, well-traveled route. Through use of the Brightway Path, the Security Office can concentrate night patrols along the Brightway.

2) This route designates sidewalks which will be cleared of snow and ice so that individuals with disabilities will have access to campus buildings.

If you see a street light out, report it to the Physical Plant Department at 453-4371.

For Rides Call: 453-2212
Women's Safety Transit
**RAPE PREVENTION ADVISORY GROUP**

The Rape Prevention Advisory Group is composed of members from local medical facilities, supportive services, law enforcement agencies, and campus and community leaders, who are working together in a cooperative effort to provide a comprehensive campus and community program to deal with the problem of rape and sexual assault. The areas of concern that have been identified by the group are prevention, education, supportive services, and prosecution of offenders. For more information, contact Women's Services. 453-3655.

**CAMPUS SAFETY FEE BOARD**

The campus safety fee board is primarily responsible for advising the Vice President for Student Affairs on the expenditure of the campus safety fee. The board reviews and evaluates the goals, objectives, policies, and services provided through the use of this student fee. The board serves as a liaison between the Vice President for Student Affairs and members of the University community to represent and convey the interests of the various constituencies represented. Information concerning the campus safety fee board may be obtained by contacting the Office of the Vice President for Student Affairs, Anthony Hall, Room 214, or by calling 453-2461.

**RAPE ACTION GO-OUT**

Call Rape Action if you have been raped or sexually assaulted. Rape Action Crisis Go-Out Team will provide free 24 hour confidential assistance. They report to you a company a victim throughout medical, police and legal procedures as requested. Information about temporary housing, and university and community resources is also available. Phone 529-2224

**WOMEN'S SERVICES**

Women's Services provides information, support and programs for women students who are facing educational and personal decisions. In response to the problem of rape and sexual assault, Women's Services monitors the Women's Safety Transit System, Night Safety Bus, and Brightways Path. and we are working towards providing a safer campus.

Women's Services, in cooperation with the Rape Action and Education Committees of the Carbondale Women's Center, and SIU Security Police, offer educational programs through group discussions and workshops on many aspects of rape. Programs may include rape prevention, developing a defense consciousness, myths and fallacies about rape, rape culture, treatment of a victim, etc. These programs are available to classes, dorms, and other on- and off-campus groups. For more information about these and other programs, contact the office at Woody Hall, Wing B, Room 244 or call 453-3655.

**SIU SECURITY POLICE**

The SIU C Police department offers programs in sexual assault prevention. These programs are designed to educate the public in actions individuals may take to protect themselves from assault. The sessions also include information on what the victims of sexual assault may expect as a result of reporting the incident to the police. Films are also available for these presentations. For information or assistance call 453-2381.

**RAPE EDUCATION COMMITTEE**

The Rape Education Committee is comprised of concerned students and community people whose goal is to increase the awareness of the SIU community regarding the problem of rape and sexual assault. In cooperation with SIU Women's Services the Rape Education Committee provides a speakers bureau to address the wide variety of concerns about rape, i.e., rape culture, prevention tactics, psychological, legal and medical aspects. Persons interested in joining the Rape Education Committee please contact the Women's Center, 529-2224.

**HUMAN SEXUALITY SERVICES**

112 Small Group Housing 453-5101

Human Sexuality Services, located at 112 Small Group Housing, provides information, education and personal counseling in the areas of sexuality to all university students and their partners. Human Sexuality is a program within the Student Wellness Resource Center of the Student Health program. The service is open Monday through Friday from 8:00 AM to 5:00 PM. Call 453-5101 for an appointment.

Making office clearing house of ideas GSC president's goal

By Carol Konner Staff Writer

"Making the Graduate Student Council office a clearing house of information is a top priority for the fall term," says GSC President Debby Brown.

"We needed a central location where graduate students could come for information on job opportunities," Brown said. "We decided to use the GSC office as that location. All the job opportunities in the area are listed and kept up to date."

Brown said it was especially important for the GSC office to be of service to new graduate students because they were not familiar with the school.

"We have developed a graduate student handbook which is at the printers and should be ready for distribution by the end of this week or the beginning of next week," she said.

Brown said the handbook has practical information for graduate students such as entertainment spots in Carbondale, as well as information on GSC and the graduate programs at SIU-C.

Mother of SIU student killed in auto accident

Erick Williams, 34, of Hickman, Kentucky, the driver of one of the other cars, was also killed. Stanley Wasilewski, 29, a SIU-C student, was admitted and is still in satisfactory condition at Good Samaritan Hospital in Mount Vernon.

Both Laura and the driver of the third car were treated at the hospital and released.

Williams was driving north in the southbound lanes on I-57, according to police, when the accident occurred.

To inform graduate students about the GSC, Brown said she plans to set up a table in the Student Center Thursday and Friday. She said she would like to get as many graduate students involved in activities as possible.

"I would like to see a revival of the social club for graduate students, but that will depend on how much interest is shown," the 26-year-old graduate student in English said.

"Once a grad student starts in his field, it becomes a closed circle. The social club would give students an opportunity to meet and talk to people in different fields."

Brown added that because many graduate students lead a dual role of student and teacher they often don’t have time for as many social functions as they’d like.

"In the past, GSC has sponsored events along with other student groups such as the Undergraduate Student Organization. Brown said that she would like to see GSC be the initiator of some of the programming that takes places. She said she is presently planning a University-wide event for October, possibly a bluegrass hand."

One of the co-sponsored events that Brown referred to is the informal reception for SIU-C President Albert Somit which will be held Sept. 7 at the Student Center.

Win a taste of the good times.

Register to win a new Kawasaki KE 100!

The KE 100 is a lightweight, easy-handling, street-legal dirt bike. Perfect for everything from riding errands on campus to cruising around the campus.

Don’t let this chance to win a new KE 100 pass you by. Just register at Wendy’s between August 24, 1980 and September 20, 1980. Enter as often as you like, but only once per visit. No age limit, no purchase necessary.

Congress overrides salary hike veto

WASHINGTON (AP) — Congress crushed President Carter's veto of a salary increase for doctors and dentists at veterans hospitals Tuesday, overriding the president by a unanimous vote in the Senate and a lopsided margin in the House.

The Senate forced the Veterans Administration pay raise bill over Carter's veto by a 5-0 vote. It came after the House voted 60-0 to strike down the veto.

It was the second Carter veto overridden in the past three months. Legislation repealing his dime-a-gallon gasoline "conservation" fee was enacted in June over his veto.

Before then, no Democrat—president had been overridden by a Democratic-controlled Congress in nearly 30 years — although Republican Presidents Richard Nixon and Gerald Ford had a number of their vetoes overturned.

In a written statement, President Carter said he was disappointed by the override. "I continue to believe (it) is an unsound piece of legislation."

Congressional leaders called the VA veto, Carter's 24th, bad election-year politics. "The president received singularly bad advice and took inappropriate action," said Assistant Senate Majority Leader Alan Cranston, D-Calif., a sponsor of the bill.

The president vetoed the bill last Friday as too costly, saying it would allow VA doctors, who now earn an average of $80,000 a year, to increase their annual pay up to $130,000.

Shortly before the vote, Speaker Thomas P. O'Neill told reporters there was no way the House would sustain a veto of a bill designed to help veterans in an election year.

It was incorrectly reported in Monday's Daily Egyptian that admission to SIU Day at the DuQuoin State Fair is free. Admission is 50 cents with an SIU-C student ID card.

Also, the supervisor of SIU-C Travel Service was incorrectly identified in an article about the Women's Safety Transit and the Night Safety Bus. He is Letty Metcalf.

In the Back-to-School edition, it was incorrectly reported that the Dental Clinic, located in the School of Technical Careers Building, provides free teeth-cleaning and checkups. There is a basic fee of $4.

NOW COMES MILLER TIME
Hunting licenses available

About 16,000 deer hunting permits have been on sale on a first-come-first-served basis since Aug. 11.

Lee Trenkle, supervisor of the permit office for the Department of Conservation, said the permits are available in 58 counties, including Marion, Saline and Franklin counties, for the firearm hunt which will be held Nov. 21, 22 and 23.

WSIU to air grid preview

WSIU-TV, Channel 9 will present a look at the upcoming football season on Saluki Football Preview at 9 p.m. Hosted by WSIU Sports Director Bill Biddle and Student Sports Director Greg Springer, the show will feature comments from all.

Polo team plans meeting

A meeting for all men interested in trying out for the water polo team will be held today at 3 p.m. in Room 119 of the SIU Arena.

Water polo Coach Bob Dempsey to speak at Mall

The Saluki Athletic Club will hold its first luncheon of the school year at noon Thursday at Morrison's Cafeteria in the University Mall.

The guest speaker will be SIU football Coach Rey Dempsey. The public is invited to attend.

Cards lose end to injury

Problems at tight end continue for the Salukis. Junior Cardinals in advance of Tuesday's cutoff to 50 players, the National Football League limit.

Eight-season performer Gary Parris, the team's regular at the position since the 1978 season, will be placed on the injured reserve list with a knee injury, Coach Jim Strader said.

Trenkle warned that applications received after Oct. 31 might not be processed in time for the November hunt.

All processed permits will be mailed directly to the applicants home, Trenkle said.

Trenkle said an individual check or money order for $15 must accompany each application, whether group or individual.

Sports publicist wins award

An all-sports brochure prepared for women's athletics at SIU has been judged tops in its field nationwide for the 1979-80 season.

The 28-page book was put together by SIU Women's Sports Information Director Mitch Parkinson. The blue-ribbon award from COSIDA, the College of Sports Information Directors of America, covers all-sports brochures in both women's and men's sports.

Illini gridridders return to team

CHAMPAIGN (AP)—Illinois football Coach Mike White says two veterans UI players have returned to the team.

Former quarterback Rich Weiss and fullback Will Strader, both seniors, left practice last week. Weiss was wanted time to consider a decision to move from quarter- back to the defense. Strader was concerned about a sprained thumb.

Both players were recruited by former coach Gary Moeller, who was fired at the end of last season.

"It's real nice to see this resolved and have them back with the club," said White, preparing for a scrimmage Tuesday night.

He said a medical evaluation revealed that Strader's thumb was not fractured, and that he would be cleared Tuesday night after the opening game against Northwestern on Sept. 6.

"I thank God that Coach White has the patience and the attitude to work with this," said Strader. "I'm excited about my future."

Weiss said he needed time to discuss his position change and build up some confidence.

"All this stage, I just want to play some football and see what happens," said Weiss.

Dempsey in good condition

CHICAGO (AP)—Chicago White Sox President Bill Veeck remained hospitalized in fair to good condition Tuesday, two days after he was admitted to Illinois Masonic Medical Center with respiratory problems.

Veeck, 66, was taken to the hospital Sunday night and received oxygen in the hospital's intensive-care unit, a spokesman said.

He currently is receiving inhalation therapy at the medical center, the spokesman added.

Veeck's hospitalization came only days after the White Sox board of directors approved the sale of the American League baseball club to Edward J. Dolchak of Youngstown, Ohio, for an estimated $20 million.

By late 1979, Veeck put together a group which purchased the ball club five years ago for about $11 million. The agreement last Friday to sell the club must be approved by the White Sox stockholders and the American League, but Veeck said Friday he felt that was "merely a formality."

"Once it happens, I'll be unemployed," Veeck said last week.

IM policy gives entrants a choice

By Rick Platt
Staff Writer

Under a new policy adopted this summer by the Intramural-Recreational Advisory Board, SIU faculty and staff, and faculty, staff and student spouses of faculty, the option of paying an entry fee for each intramural event entered or purchasing a Use Pass applicable for all events throughout a semester or year is extended.

The new policy also expands intramural eligibility to include faculty, staff, student alumni, and student and alumni spouses.

Any individual to which the policy applies may purchase the Use Pass at the Student Recreation Center information office for $20 per semester or $60 annually. Alumni can purchase the card for $24 per semester.

To be eligible for a Use Pass, a faculty or staff member will be required to present an SIU ID and current certification of appointment. A faculty or staff spouse will be required to show an SIU spouse card.

If the individual decides not to purchase the Use Pass, entrance fees of $10 for each team sport and $5 for each individual or dual event will be assessed. A $1 forfeit fee is required also when entering an individual or dual event but it is refunded if the individual does not forfeit his or her first match.

Faculty and staff members or spouses that elect to pay the individual event fee will be required to pay the daily guest fee when participation in the intramural event requires the use of the Rec Center.

"The plan offers the individual an option," Jean Paratore, coordinator of intramural athletics, said.

"Many faculty and staff want only to participate in the golf or tennis tournament, making it unwise to purchase a Use Pass when it wouldn't be used efficiently," Paratore added.

Paratore said that any money brought in under the new policy will be deposited into the Rec Center's student affairs account to gain interest and will be used in the following year's budget.

Paid entry fees for individual and dual events will be refunded only if the participant informs the intramural office prior to the event and if they have not already participated in one or more matches.

Former Cub pitcher arrested for possession of narcotics

By The Associated Press

Fernando Jenkins, one of the Texas Rangers will appear Wednesday in provincial court in Toronto on charges of two counts of possession under the Narcotics Control Act.

A native of Chatham, Ontario, Jenkins was arrested Monday at Exhibition Stadium as the Rangers prepared for their game with the Toronto Blue Jays.

A police spokesman said it is possible the Rangers' luggage was searched at the Toronto International Airport.

It was also reported that a bag containing four grams of cocaine, two ounces of marijuana and two grams of hashish was found in the dugout.

Jenkins arrived in Toronto Sunday morning for the Rangers' three-game series with the Blue Jays and was scheduled to pitch Tuesday. However, a team spokesman refused to comment on the charges or whether he would play.

American League President Lee McPhail was unavailable for comment, but Bob Flaherty, assistant to the president, said the league had received no official notification of Jenkins' arrest.

The 36-year-old righthander, in his 10th major league season, had compiled a 103-132 won-lost record and, in 1971, won the Cy Young Award as the National League's top pitcher, posting a 1.97 earned run average with the Chicago Cubs. He was named Canada's top male athlete that same year, as well as in 1967, 1968 and 1974.

He broke into the major leagues with Philadelphia in 1966 but appeared in only seven games that year with the Phillies and early the next season was dealt to the Cubs where he enjoyed much of his success.

Lady climbers boast improved depth

By Scott Stuckner
Associate Sports Editor

"Unusual" is the word for the women's cross country team this year, according to Saluki Coach Claudia Blackman. SIU finished fourth in last year's Illinois D-I team state meet, but Blackman believes the Salukis are deep enough to improve on that performance.

"I'm very optimistic about what our chances of making it back to state are," she said. "It allows some runners to have an off day and still have the team perform well. Last year, we had injuries right at the beginning of the season and injuries at the beginning that didn't allow us to have depth."

In Western, SIU won its third consecutive state championship and Illinois State also finished ahead of SIU.

"Hopefully, this is the year someone will knock Western off," Blackman said. "I hope that someone will be us." Blackman is pinning her hopes for improvement on some new faces and a few returners. Senior Lindy Nelson, junior Patty Pfymer and sophomore Olivia Donley are considered the top returning runners, while contributions also are expected from newcomers Cindy Clausen, Nola Pursley and Cindy Bukauskas.

Nelson could be the team's featured performer. She has won awards in both the cross country and track and field events for the local cross country nationals in 1978 and track nationals in 1980. The Freshmen won the state meet for the cross country finals last year as a team.

"I think Lindy should qualify for the cross country nationals this fall, which means she'll have to have done well in the regionals," Blackman said. "If she does, we're looking forward to that."

Blackman expects improvement from Pfymer, adding that the St. Joseph native returned to school in superb condition, as well as from Donley.

"She really seemed to find herself last year," Blackman said of Pfymer. "She really has come back in much better shape than any of the others. Rupert and Donley seem to be running with more determination and confidence and that was really all she lacked."

Among the new runners, freshman Vivian Young is a track team member who played field hockey last year, junior Mike Bukauskas and transfer from Western Illinois who ran track last spring, and Bukauskas is a senior javelin thrower who decided to go out for cross country.

"Clausen did well in track and I think she's going to help us in the future," Blackman said, adding that the junior is recovering from stress fractures and has to slowly get back into shape.

"In Putnam's last two years at Western, she ran just behind the Saluki's top man," the coach added. "Bukauskas is giving cross country a try mainly to get in condition for track, but at the same time, she's looking awfully good." Freshmen Cindy Mueller of Freeburg, Kathy Blasingame of Harvey and Deborah Davis of Thornton also have been added to the team, but Blackman said they probably won't figure in the scoring right away.

"I think this year we'll have a good chance to be competitive against Illinois and Illinois State," Blackman said. "It's kind of cool in the sense that both teams compete against us later on," she said. "It gives us a good opportunity to see how we are doing. It is certainly good news for us." Blackman said.

Coaches hope to put stickhandlers on the offensive

By Dave Kane
Staff Writer

SIU women's field hockey Coaches have a full schedule this summer camp last week. Illini, also in the camp, played host to plenty of stickhandlers who were preparing for the season.

According to the two coaches, the camp went well. Illini are off a limited amount of work and Illini mentor Linda Brown, one of the best in the country, did a fantastic job at the camp.

"We still have a lot of work to do on defense," Illini conceded.

"Offensively? Yes, we'll be OK. But on defense we're not sure where we're supposed to be," Illini said.

"One of our weaknesses is covering the circle," Illini said. "It's like playing a man-to-man in basketball. In camp, some of our people who were covering the ball instead of the player, they were supposed to cover it.

But the problem is not one of panic-button caliber. It's like the line of three defensive fullbacks and the "sweper" player, that located in front of the goalie. Illini said that improved communication will bring a one-day defensive team work and that an adjustment made during the camp may stabilize the sweeper position.

"Mary Gilbert (senior and team captain), did a good job at sweeper for us last year," Illini said. "But I need her at midfield. She'll be a bigger asset for us there."

"But Tracy Miller (a junior who played sweeper during the camp) and a super job. She played forward on the field, and it looks like she'll be a bigger asset for us there."

"Blackman said, adding that the junior is recovering from stress fractures and has to slowly get back into shape."

The goalie spot is sound as senior Kenda Cunningham will be returning to the net. Cunningham averaged less than one goal allowed per game last season.

Another question concerns incoming freshmen. Illini said Dave Wel and Linda Brown were the only two newcomers that the team was able to attend the camp. Wel, the highly-touted recruit, was all over in her hometown of Elmhurst, Ill., but Illini still isn't sure as to her or the other incoming players. Certainly, there were many players walked into her office Tuesday and informed the 12-year coach of potential freshman goalkeeper that lived in the player's dormitory.

"Grab her and have her come over here," Illini insisted.

"There's a lot of depth from other colleges who are interested in her," Illini said.

Spend a fall afternoon 'on the rocks'

By Glen Dworski
Siesta editor

Dworski is the coordinator of the SOAR, St. Edward's Outdoor Recreation Center. He is also a member of the Illinois Nature Environmental Center.

There are many misconceptions associated with the sport of rock climbing. Rock climbers do not need brute strength and bulging biceps. The sport requires balance and technique. A little balance and coordination are helpful, but most important is the desire to climb and to climb a lot of routes.

Some trampers train for months and men. Women make excellent climbers, but they must learn to overcome fear. Handholds are strong, and climbers can stretch 60 percent of her length and absorb the shock of a fall. Rappelling is a means of descending by sliding down a rope using a friction device to slow the descent. In French, rappelling is to retrieve or recall. The rappel rope can be returned from below when it is set up properly. Rappelling is done only when there is no other way up or in an emergency. Rock climbing is a safe sport, however without proper skills and knowledge, it can be potentially dangerous. Beginners should not climb without the aid of an experienced rock climber.

Before the climber starts, he makes verbal contact with the belayer. The climber yells "on belay!" and the person on the ground responds. The climber then asked if it is safe to climb and waits for a response. These verbal signals assure good communication and the belayer know he is responsible for the climber's safety. This is known as a "shout down contract ends when the climber reaches the top of the rock and drops down the cliff to the belayer. It is the belayer's duty to keep the slack out of the rope and to stop a fall if one should happen.

915 W. Main
Carbondale
MIAMI (AP) — More than three months after President Carter ordered an end to the "Freedom Flotilla," daring boat captains continue to slip nearly 100 Cuban refugees a day through the Florida Straits stretching from the Dry Tortugas in the west to the Florida Bank and the Bahamas in the east.

The original blockade, put in place May 13 after Carter ordered an end to ferrying of Cubans from the harbor of Mariel, averaged an area half that size, said Guard spokesman Mike Kelley.

"We have two or three vessels getting through every day," he said. "The ones that are going through are taking a round-about way to Cubas. We've had to expand our area of surveillance and coverage.

"Some go through the Carriican and then directly into Cuban waters," he explained. "They're not going along the Cuban coast to Mariel, instead of going due south to Mariel."

"Instead of the extra manpower and ships have risen from $600,000 a day two months ago. Federal officials use June 19 as the day when all boats in the U.S. The 6,000-plus refugees who arrived in 55 boats since then aren't eligible for food stamps and medical benefits allowed other refugees.

The Immigration and Naturalization Service says 120,000 Cubans have entered this country since the boatlift exodus began April 21. "We've had two to three boats coming back every day, with the exception of the week when Hurricane Allen was apparently a factor in no boats coming back," Kelley said.

Although a few boats, usually through odd routes or under the cover of darkness, slip through the blockade each day, the Guard is also stopping several boats a day. The Coast Guard is "trying to be kind of gentle about" all its methods, but Kelley said "intelligence gathering" in Miami, where ships enable the Guard to stop some boats before they get far from home.

Kelley said 22 boats headed for Cuba were intercepted last week alone. Customs spokesman Jim Englander said boat captains are prosecuted on "a case-by-case" basis, depending on their evidence.

Associate dean sees her job as chance to improve services

By Scott Canon
Staff Writer

Mary Lou McCauliff sees her new job as the Associate Dean of the College of Communications and Fine Arts as a chance to improve services provided to students in the college.

McCauliff, an assistant professor in speech communication, said one of her top goals is to perform useful research for the College of Communications and Fine Arts.

"I think my main objective is to collect the kind of data and records that can be used to improve curriculum offerings and student services in general," McCauliff said.

McCauliff succeeds William Felts, who also coordinated conferences staff assistant at the Student Center. Felts was assistant dean and the position title was changed to associate dean when McCauliff took over.

McCauliff has been with the University for seven years, said she will be researching faculty recruitment and student retention in order to improve the quality of the College of Communications and Fine Arts.

McCauliff, who holds a Ph D in organizational communication, said she received national attention for a study she did on faculty recruitment earlier this year.

"The purpose of the study was to provide a tool for college and university administrators in communications and fine arts who are implementing affirmative action policy," McCauliff said.

She said she plans on having more research finished in that area by the middle of the fall semester. McCauliff added that she thinks her research will help the college in building a better faculty in order to provide better education to students.

Student retention is the other area McCauliff said she is researching.

"I think the overall objective is to improve what students get," McCauliff said. "My research will examine what can be done to improve student retention."

McCauliff said she is also coordinating academic advisement for the eight departments in communication and fine arts.

She said she will work with academic advisors trying to improve the college's advisement system, supervise special majors and provide data needed in advisement and curriculum development.

McCauliff will also deal with the fiscal affairs of the college by receiving budgets request and making recommendations to C. B. Hunt, dean of the college.

Along with her research and other duties, McCauliff will also teach a class in organizational communication.

Lack of a 'real candidate' prompts
Christopher man to form third party

By Mike Anton
Staff Writer

Earlier this year when James Barrett looked at the race for the U.S. Representative in the 28th Congressional District, he found only choices to be "not a real candidate" on one side and a "ultra-conservative" on the other.

So Barrett did the only thing he thought he could do: confront a choice in a third party vote for a Democrat incumbent Paul Sime.

He started his own one-man political party.

The third party's one and only candidate. Barrett, a 35-year-old newsman and Xenia native from Christopher, has some harsh words for his own political party. With his campaign theme of "get government out of business," he says Simon, who he calls a "carpetbagger from wherever he came out here from the Daley machine," is leading America down the road to socialism.

"Taxpaying Americans I think are beginning to wake up," he said. "You can only put so much straw on the camel's back. You just can't put that last bit on."

To unload the American camel, Barrett believes Americans need a renewed sense of patriotism and maybe even a little more religion.

Barrett, he adds, will come only after what he describes as the traditional "Eastern establishment" thinking of most Democrats and Republicans is defeated.

"Sure it's wrong to have children go to school and pray in the classroom," he said. "But it's not bad for a group of people to go out, take the flag, and burn it. I don't feel Christianity and patriotism is wrong. It's time for the American people to wake up.

With ideas like increased military spending and less regulation on industry and small businessmen, Barrett admits his independent feelings tend to be more Republican than Democratic. He once was a "ultra-conservative," however, adding that if Republican Anderson wasn't such a longshot to win, there would be no need for his own third party.

"It's not been easy being the only guy in the party," he said.
EPA clears city as possible cause of lake pollution

INDIANAPOLIS (AP) - State Board of Health officials say they can find no evidence that the city of Hammond was responsible for dumping raw sewage into Lake Michigan.

The raw sewage last week caused a bacteria count seven times higher than the permissible limit and resulted in the closing of beaches at Chicago.

"We don't know what caused Chicago to point the finger at Hammond when Gar and others have similar problems," said J.C. Stalling, chief of the Enforcement and Ope ations Branch of the Indiana State Board of Health.

The Environmental Protection Agency is investigating the situation, but spokesperson Bernard M. Colleran said the agency "certainly can't say at this point" who is responsible.

The Chicago Metropolitan Sanitary District has said the sewage came from Hammond, but the EPA is investigating the possibility the pollution may have come from Gary or other Indiana lakefront communities as far east as Michigan City.

Chester psychologist claims abuse to mental patients goes ‘unabated’

SPRINGFIELD, Ill. — There is rampant patient abuse at the Southern Illinois University’s Student Health Center and others there have done nothing to stop it, a Chester psychologist has charged.

The center’s superintendent denied the allegations.

The abuse has always been a rampant at Chester hospitals, but Chester continues unabated,” said Jubea O’Gis, a clinical psychologist at the center for five years.

I have complained frequently about patient abuse. And I have given the administration every opportunity to correct the abusive situation there, but it has not been corrected anything,” he said.

O’Gis testified that Chester Superintendant Dr. Terry Brejde and other officials continued covering up abuses at the Southern Illinois facility for alleged criminals found mentally incompetent for treatment.

Brejde denied the allegations.

“Not accurate. That is not true,” he said.

In an affidavit, O’Gis said he saw an incident May 6 in which a patient was verbally abused, slapped and kicked and suffered a jaw injury.

Michael Bang, executive director of the Citizens Commission on Human Rights, told a news conference that the center’s administration had covered up abuse from numerous former patients and staff.

Bang said the commission first aired its allegations at Chester that included inappropriate treatment, overmedication, seclusion of patients as punishment and suspected abuse.

I would suspect it exists to new degree or another across the state,” said Bang.

Bang denounced official reports on the allegations as “verily inadequate” and “a whitewash.”

We are changing that the administration is covering up to protect its own,” he said.

The allegations were turned over to the Illinois Department of Law Enforcement, and Bang accused the department of dragging its feet and never addressing the matter.

Ed Greener, a D.E. deputy director, said all of the allegations were thoroughly investigated.

D.E. spokesman Les Pouley said at least four or five cases were turned over to the Randolph County’s attorney.

O’Gis said his job has been threatened because of his public criticism Brejde also denied the allegation.

Welcome fete features ‘people hunt’

Re. Karen Clare Staff Writer

Everything from films and concerts to meetings and ‘people hunt’ are scheduled to help new students get to know each other.

A speech by new SIUC President Albert Sommers opens the agenda for new student orientation. Sommers will speak at 7 p.m. Thursday in the Student Center Ballroom. His talk is sponsored by the Center and Basic Skills and Special Services.

Tom Allen, assistant director of the Office of Student Development, will also speak along with the Student President. The meeting will continue featuring films, a concert, a ‘people hunt’ and bus rides to SIU Day at the Du Quoin State Fair.

In the Student Center Video Lounge, located on the third floor of the Student Center, at 7 and 9 p.m. Wednesday and Thursday, the SPC Video Committee will show the ‘Graffiti Tube’. Admission is 25 cents.

Students won’t have any problem finding things to do Friday and Saturday nights on campus. Registrations will begin at 9 p.m. Friday, students can participate in a ‘people hunt’ which will be organized in the Free Forum area, across from the Parking lot.

Allen said students should register for the ‘people hunt’ in teams of two to four people. The hunt will result in free tickets to screening films in the Student Center. ‘It’s a good way to meet new friends,’ Allen said.

After the hunt, students can view the science fiction thriller ‘Alien’ at 7 and 9 p.m. in the Video Lounge for $1 or walk over to Anthony Hall for a free concert between 8 and 10 p.m. ‘Alien’ will also be shown this Saturday at the Student Center.

Friday and Saturday night, two films, ‘Gimme Shelter’ and ‘Omega’ will be presented in the Student Center Auditorium. Admission is 25 cents.

Sunday is SIU Day at the Du Quoin State Fair and buses will be running from the Student Center to the fairgrounds all day long. And at night, in the Student Center Auditorium, ‘Luna’ will be shown at 7 and 9 p.m.

Dorothy Smith, coordinator of the Office of Student Development, said the Black Affairs Council will be holding a meeting at 5 p.m. Friday. The Student Center to welcome new students to the campus. On Sept 5, BAC will sponsor a social party, to begin at 6 p.m. at Pavilion Hall.

The formal BAC orientation program will begin at 4 p.m. Sept 6, in the basement of Grinnell Hall on East Campus. Smith said key SIUC administrators will be the featured speakers at the orientation, which will be followed by a welcome dance.

The big focal point of the program will be survival strategies for black students in Carbondale and SIUC. Smith said in a telephone interview Monday.

Barbara New, a new counselor for minority students at the Counseling Center on campus, will speak at the presentation.

Smith said a picnic at Campus Lake, also sponsored by BAC, is planned for 2 p.m. Sept 7. The Student Alumni Board will hold an orientation meeting at 2 p.m. Thursday in the Student Center Saloon Room. The Student Alumni Board promotes the relationship between current and former students.

Contributors to the new Student Record and sponsors of the Welcome Dance, the Undergraduate Student Organization will have an information booth set up Wednesday, Thursday and Fridays on the first floor of the Student Center to recruit new members.

The Procedures that are members of the Inter Fraternity Council and sororities belonging to the Pan Heliconian Council are throwing fall rush parties and mixers beginning Wednesday and continuing for the rest of the first week of school.
Doctors baffled by medical 'whodunit'

BOSTON (AP) — With a freezer full of clues, doctors are on the trail of a medical 'whodunit.'

They are looking for the cause of Kawasaki syndrome, a mysterious disease that strikes an unrecognised old one that strikes babies without apparent logic or pattern.

The sickness has baffled Japanese physicians for 30 years, but in the past two, it has broken out four times in the United States and Asia, baffling doctors who vow to find the cause.

There have been reports of a stack of cardboard boxes filled with tiny vials of samples from nine children that have not been identified. Stored at 120 degrees below zero in a freezer, the samples have now made a trip from the state lab in Boston — where they were collected — to a federal lab in Atlanta for analysis.

Kawasaki syndrome is still so rare that most doctors have never seen it. But since the mid-1960s, about 600 babies in New York City, Rochester, N.Y., and Carbondale, Ill., have been affected with some of the symptoms of the disease.

By late June, the disease seemed to have run its course. In all, 57 children — with an average age of 3 — got sick. Four suffered aneurysms, dangerous weak spots on the arteries feeding the heart, and one had a heart attack. But none died.

It was the biggest outbreak in American history.

Symptoms included high fever, swollen lymph glands, a body rash, and a bright redness on the tongue. Lips, eyes, and feet swelled. Dr. Tamisaku Kawasaki of Tokyo's Japan Red Cross Medical Center saw the first signs of an unusual disease in 1961 and 1962. In 1967, he published a report on the new illness and called it mucocutaneous lymph node syndrome. There have now been about 20,600 cases of the disease in Japan, 2 percent of them fatal.

Over the years, the Japanese worked without success on the cause.

Only Boston, federal, and state scientists contacted parents of victims, and questioned them about their children's medical histories, playmates, day care centers, toys, food, and other facets of their lives that might be remotely connected with the disease.

At the same time, they asked similar questions of another group of healthy children, called controls. Each was identically matched to one of the victims in age, sex and race. This way, if a pattern emerged among the Kawasaki children, doctors will be able to compare it to the experience of those who escaped the disease.

So far, the survey has shown no link between the disease and the victims' food or water. None of the victims' siblings got sick. No more than two or three even came from the same town. And none of the victims or their parents had ever had any contact with each other.

Now, the fomous specimens of throat saliva, blood, skin, stool, urine and spinal fluid are at a CDC lab being analyzed under the direction of Dr. David Bell, the center's Kawasaki syndrome expert.

Bell hopes that some of the blood samples taken from the holos two after they got sick contain traces of a microbe. So these samples will be injected into mice, monkeys and other lab animals.

"We're hoping that the precious little bit of blood that we got from a baby may have one or two germs in it," Bell said. "We inoculate that into a mouse. The mouse will die and then we will be left with lots of germs. And we can finally get to the point where we can look at them under the microscope and do tests on them."

Another approach will be a search for antibodies. These chemicals are the body produces to fight infection.

"Not this method has turned up nothing."

Bell hopes this round of tests will find the cause of the disease, but he fears there will be another outbreak somewhere before they track it down.

"To me the fact there's a cluster of cases means that there is something these kids have in common," he said. "And I just hope we are smart enough to figure out what it is.

Illinois may be allowed to use Lake Michigan for drinking water

CHICAGO (AP) — A bill that would authorize using Lake Michigan drinking water available to an additional 1.5 million people passed the state Senate Tuesday, Gov. James R. Thompson said.

The bill, which the Republican governor said at a news conference was a "strong statement of our most precious natural resource," Passes Michigan's enthusiasm, will be more careful about the state's approval when it comes to when it can be used.

An amendment to the bill will in the General Assembly allow the Illinois Water for the Michigan lake to be used for public construction of a marina adjacent to Chicago's Navy Pier. The marina would be operated by a private developer for 10 years, then become public.

The controversy over use of Lake Michigan water dates back to the 1870s when the city completed reversing the flow of the Chicago River and ended the loss of that. Illinois became the only state using lake water for commerce and other purposes that did not return water to the lake.

Other Great Lakes states filed suit, and since 1922 the court has ruled the Great Lakes states can take water from Illinois can come from the lake.

In 1967, the court set the limit at 1,000 million gallons a day.

The state Transportation Department has set, however, officials are trying to measure the amount of water taken from the lake that can be made available without harming all uses.

Officials said a settlement with the states—which include all the Great Lakes states except Indiana—was reached in February. It was an agreement on the Illinois General Assembly approving the agreement.

Fred Kudrna, director of the Illinois Division of Water Resources, said the agency has received applications for water allocations from 195 communities and 136 industries. The 131 currently receiving lake water.

He said he hopes the division can complete hearings on the applications within a month.

Public affairs program OK'd by national group after study

By Ann Becker

Staff Writer

SIU-C's master of public affairs program has been approved by the National Association of Schools of Public Affairs and Administration following more than a year long self-study. The program was reviewed by NASPAA representatives.

The master's degree is becoming more important to have, especially at the state or federal level. The program is seven years old and has had 27 graduates. Annual enrollment is about 23 students who come from a broad range of backgrounds, including political science, history, economics, business and education. Foster said.

Legal disputes involving integration force new programs in some cities

By The Associated Press

Legal wrangling over integration programs in some scattered cities across the country, as well as in a few large ones, have kept the opening of school systems in the Detroit area on hold. As of today, the court arguments involving suits filed years ago by Detroit, Toledo, Columbus, and Dallas, for example, integration cases that started in 1970 are still unresolved.

An Associated Press spot check of large and medium-sized cities indicates that many cities are implementing new programs in an effort to carry out court orders to integrate classrooms. In the Kansas City, Kan., school district is expanding a busing program that began three years ago. The district's board of education has asked the state Supreme Court to overturn a lower court order involving widespread busing.

Almost all of the 221,000 students in the Detroit school system already are bused to class, and an appeals court has ruled the program should be expanded. Complicating the Detroit case is the issue of whether Hispanic students should be included in the busing program. A minority group under the integration plan, it has been said that the school board of education has asked the state Supreme Court to overturn a lower court order involving widespread busing.

Editors' Note: To Your Health appears twice monthly in the Daily Egyptian. If you have questions you'd like to see answered here, write To Your Health, Student Wellness Resource Center, Kennar Hall. Questions will be printed anonymously. QUESTION—What is the difference between a "complex carbohydrate" and a simple sugar? Could you give me some specific examples of each?

ANSWER—Complex carbohydrates are present in foods such as whole grains, fresh fruits and vegetables. The simple sugar, sucrose, is found in foods such as cakes, pastries, candy, ice cream, sugar, jellies, fruit juices with added sugar, and soft drinks.

The advantage of complex carbohydrates is that they contain more nutrients than refined sugars. These include vitamins, minerals, and fiber. Refined carbohydrates provide only "empty calories"—foods that are high in calories but contain little or no nutritional value. A person who has a diet high in refined carbohydrates is at risk for obesity.

Another good reason for eating complex carbohydrates is that they are digested more slowly than refined carbohydrates, leading to a slower rise in blood sugar. The insulin response is therefore reduced. Hypoglycemia is avoided.

QUESTION—I'm a new diaphragm user and would like to know what I should use my diaphragm during my period and if it is really necessary to insert more jelly if I have sex twice in one night?

ANSWER—It is more likely for ovulation to occur midway between your period and it is really necessary to insert more jelly if I have sex twice in one night?...
Mary Lou dishes up favorites: lots of food 'n friendly chatter

By Liz Griffin
Staff Writer

LOOK, I'M FAMOUS—Mary Lou Trammel shows Martin Barrett (left) and Mike McClusky the record album that contains the song written about her establishment—Mary Lou's.

Mary Lou Trammel may be known for the many students who keep coming back to visit after they graduate. “First time they come back, they say, ‘I missed your food, Mary Lou,’ I will say. ‘Not me,’ Mary Lou laughed, adding that the students then say they missed her, too.

Some send flowers and others call, according to Mary Lou. “Just call me ‘Mama’ to the students.” For Mary Lou, life has always revolved around working with young people and preparing food. A resident of Murrie Taylor for two and a half years, she began working in restaurants at the age of 18. She married and reared six children.

“I guess you could just say that I got tired of being at home, so I talked to my husband and he bought me that restaurant,” she said, referring to the original Mary Lou’s Grill, a 14-stool diner at the corner of Walnut Street and Illinois Avenue they purchased 13 years ago.

The business was moved to its present, more spacious, location about three years ago, she said.

“It’s all I want. You aren’t going to get me out of here till I’m so old that I can’t work.”

Mother files suit in dispute over son’s fatal shooting

URBANA (AP) — A $2 million damage suit has been filed by the mother of a construction worker who was shot to death at the University of Illinois last year.

Marrie Taylor charged that her son, Mathis Taylor, died as a result of “willful and wanton misconduct” by Victor Letter of Tuscola, who admitted shooting him fatally in self-defense.

The other defendants are the university and Letter’s employer, Western Waterproofing Co.

Authorities said Letter told them he had fired Taylor from his job and three days later, on Aug. 27, shot and killed him in self-defense as Taylor came at him with a pipe.

A grand jury investigated and returned no indictment against Letter. That brought protests from some leaders of the black community in Champaign, who said no charge was filed because Letter was white and Taylor was black.

You have just arrived at the restaurant that many other students frequent.

Mary Lou’s Grill, which is open from 7 a.m. to 3 p.m., offers a menu that is basically limited to eggs, omelettes, sandwiches, and special plate lunches of the day. But Mary Lou Trammel, manager of the grill, who laughs when she says she is 29 years old, said Monday if the food is in the kitchen and she knows how to prepare it, she will make your favorite recipe for you.

If it is not the food or the reasonable prices that draw people to the grill, it may be the atmosphere.

Mary Lou Trammel may be “Mary Lou’s Grill.” “I wasn’t here last week and the customers all complained that it was too quiet,” she smiled.

Mary Lou’s jobs include cooking, cashing, washing dishes, ordering the food, and managing the workers. Not included in that job description, but happily performed, are trading jokes and “shooting the bull” with the customers.

“I like being around college kids, nice young men and sweet young college girls,” she drawled. Among her regulars are students who keep coming back to visit after they graduate. “First time they come back, they say, ‘I missed your food, Mary Lou,’ I will say. ‘Not me,’ Mary Lou laughed, adding that the students then say they missed her, too.

Some send flowers and others call, according to Mary Lou. “Just call me ‘Mama’ to the students.” For Mary Lou, life has always revolved around working with young people and preparing food. A resident of Murrie Taylor for two and a half years, she began working in restaurants at the age of 18. She married and reared six children.

Storm cleanup leaves paths blocked

By Alan Scarbey
Staff Writer

Cleanup crews have removed most debris from Thompson Woods left by heavy storms in June and July, but some paths still blocked by fallen trees and limbs will not be cleared, Duane Schroeder, Physical Plant site planner, said.

Two "minor" paths, not as heavily traveled as main arteries through the woods, will remain blocked by fallen trees and limbs, Schroeder said. The debris blocking the paths located in the northeast sector of the woods will be left to decay, he said. The paths run between Norris Library, the Agriculture Building and Fanner Hall.

Paths were reopened last week, after hanging limbs and small branches, determined to be hazardous to pedestrians, were cleared away, Anthony Blass, Physical Plant director, said.

Clarence Dougherty, vice president for campus services, said he will meet with members of the Forestry, Botany, Plant and Soil Science Departments and Physical Plant officials in the next two weeks to decide what methods of reforestation will be used in the woods.

Uprooted trees will be replanted when the methods have been decided, Schroeder said. About 40 lights in Thompson Woods were also damaged by the storm. All lights along open paths will be back in service this week, Harrel Lcher, superintendent of building maintenance, said.

Schroeder said major paths will be resurfaced in order to ensure safe use of these paths instead of minor paths, which will be abandoned and allowed to be covered by ground cover and trees.

The five Cessna 172 planes destroyed at the Southern Illinois Airport during the storms will be replaced with comparable planes this year, he said, at a cost of about $95,000.

Dougherty said the planes will be purchased as funds are made available throughout the year.

Terrorist group sentenced to eight-years hard luck

CHICAGO (AP) -- Eight members of the Puerto Rican terrorist group FALN were each sentenced Tuesday to eight-year prison terms for possession of a sawed-off shotgun and conspiracy to commit armed robbery.

The eight, including Carlos Alberto Torres, were convicted in June. They were among 11 FALN members arrested April 1 in north-suburban Evanston by staff of the Forest Preserve District.

Cook County Circuit Judge Francis J. Mahon sentenced each defendant to the maximum of five years in prison for possession of a sawed-off shotgun and three years for the conspiracy conviction, ordering them served consecutively.

However, Mahon said he wished he could have issued longer sentences.

Torres, 27, was ranked No. 3 on the FBI's list of most-wanted criminals when he was captured near the home of Rep. John Porter, R-Ill., when neighbors reported suspicious activity near a parked van on a residential street. He was considered a top leader of the FALN.

Two other members, Luis Rosa and Alegria Rodriguez, were sentenced Aug. 1 to 10-year prison terms after being convicted of armed robbery and conspiracy.

An 11th member, Marie Haines Torres, was extradited to New York, where she was convicted in connection with a bombing at the Mohawk Corp. headquarters that resulted in one death. She was sentenced to life in prison.

Deputy State's Attorney Michael Pecaro said Tuesday the 11 were "the heart of the organization" and presented "the most clear and present danger to the people of this country, this state and this nation." Mahon also said U.S. law enforcement officials in Chicago intend to seek federal grand jury indictments against the eight reputed FALN members.

The FALN-Fuerzas Armadas de Liberacion Nacional or Armed Forces of National Liberation--has claimed responsibility for a number of bombings in Chicago, New York and other major U.S. cities. It demands independence for Puerto Rico.

The others sentenced Tuesday were Alfredo Serrano, Elizabet Ezechoh, Ricardo Jimenez, Adolfo Matos, Ida Luz Rodriguez, Darcy Pagan and Carmen Valentin.

Each of the defendants hoped to participate in his or her trial, claiming the court was illegal and the prosecution violated international law. The eight persons sentenced Tuesday refused to enter the courtroom.

Mahon, meanwhile, said he was delighted with the statute pertaining to sentencing for terrorism.

"I'm not sure how successful conspiracy to commit armed robbery..." he said. "By oversight or ignorance the state Legislature has relegated this crime to the level of a class-four felony..." with a maximum three-year sentence. Mahon said.

The judge also sentenced each defendant to a concurrent one-year term in the Cook County Jail for possession of a loaded gun in the city of Evanston.

Thompson: Reagan is no warmonger

CHICAGO (AP) -- Gov. James R. Thompson predicts he will be "the GOP's governor," but the Democrat's apparent strategy to convince voters that Reagan would "have a nervous finger on the button."
# Here's the Most Music a Little Money Can Buy!

**Dick Clark**

## 13 for 1 Cent

If you join now and agree to buy 9 more selections (at regular Club prices) in the coming 3 years.

You'll agree with Dick Clark when you get your 13 albums at half price if you decide to continue for the next 3 years, plus $8 for shipping and handling. In exchange, you agree to buy 9 more albums at regular Club prices in the next 3 years. How the Club works every four weeks: if you receive the Club's Music Magazine, which describes the Selection of the Month or the Special Selections you can select, you'll pay $8 for shipping and handling. If you don't receive the Magazine, you won't be charged. You'll still have 10 buying opportunities in a year. If you wish to receive the Selection of the Month or the Special Selections, you need to make your selection by November 1. If you don't make a selection, the Club selects your albums. If you cancel your membership at any time, you can return your albums for a full refund. If you decide to continue, you'll be charged for your generous money-saving bonus plan. If you are not satisfied for any reason, return your membership agreement within 10 days of receipt, and your membership will be canceled and you will owe nothing. Do you like nothing by being new?
