The Carbondale City Council clarified the law allowing bar employees to be 19 by passing an ordinance.

By Angela Hyland, Politics Reporter

The House of Representatives met Tuesday to try to end a stalemate which has left Illinois without a budget for almost a week. Frustrated by disagreements between House Speaker Michael Madigan, D-Chicago, and Senate President John Cullerton, D-Chicago, majority and minority legislative leaders agreed to meet even to register as present.

Representative Robin Hageman, D-Troy, said although discussion about the budget occurred Tuesday, no real work was made than on Monday when Democrats  declared, "You're not here." Following the refusal of republicans to register.

Monday, Republicans refused to register as present. Democrats lated that employees in bars, not restaurants, must be 19 because that age was raised before bar establishments were created.

"We're ready to work, but in good conscience we could not get on that red call," Hageman said. Stephens said it is frustrating to agree on how to spend billions of dollars, only to have a stalemate occur involving issues which amount to only a fraction of the total bill. "It seems to me the difference in budgets is minimal compared to the political posturing that's going on," Stephens said.

Biloxi's fiscal year 1993 budget is $33 billion. The controversy centers on the amount representatives are willing to spend on education and delinquency and hills. Governor Jim Edgar is willing to spend $328 million on unpaid Medicaid bills. Biloxi Mayor Monty wants to pay $343 million, a compromise from an original proposal of $401 million.

State representatives have spent months negotiating on the budget and now that it is in the final stage, Stephens said leaders are refusing to compromise. "Most of the battle seems to be Madigan's ego versus the rest of us," Stephens said.

The outcome of the budget debate is difficult to forecast, he said. "I'm not a guru," Stephens said.

Zorger-Wejki said although she was not sure what the final outcome would be, she believed Madigan's proposal would harm taxpayers. "There's no way we can do what he wants except with a tax increase," she said.

Zorger-Wejki said although Edgar and Madigan cannot come to an agreement, legislators Tuesday wanted to do what they could to end the stalemate. "We have to get them to quit" Stephens said.

By Marc Chase, Administration Reporter

After only receiving his law degree a year ago, Edward Dorney, a graduate of the SIU School of Law and former acting dean of admissions for the school, was selected July 1 to be the permanent dean. He took the position of acting dean of admissions after the former dean, Scott Nichols, died last fall.

Dorney said Nichols had a reputation for helping students who were applying for admission into the law school, and he hopes he can show the same caring initiative that Nichols showed.

"Scott Nichols was well liked by the students of the law school," Dorney said. "He certainly has affected how I will carry out my position.

Dorney said his new position makes him responsible for reviewing applicants to the law school, selecting the best overall class possible based on the undergraduate grades and test scores of students and supporting students by answering questions when they have difficulties in the school.

"Law school is more than just academics," he said. "We (the school) are really a community.

Thomas C. Britton, associate dean of the law school, said Dorney was the best choice out of the 170 applicants for the dean of admissions position.

"He was an outstanding candidate," Britton said. "We did a national search. There were 170 applications for the job, and his name kept coming to the top." Dorney's appointment is still subject to official approval by the SIU Board of Trustees.

Dorney, 46, enrolled at SIU after a 20-year career in the U.S. Army where he served as a Green Beret. He received his bachelor's degree in business administration from the University of Illinois in Chicago.
BEEF INDUSTRY REGAINS POPULARITY, SALES — THE ALLENTOWN MORNING CALL — Steaks could be sizzling on more home grills than ever this summer, thanks to the perpetual popularity of this meat and a predicted drop in beef prices. The move to cook steak on home grills already has begun, thanks to a national advertising campaign conducted for the National Cattlemen and Meat Board just before Memorial Day. Steaks were served only to hamburgers when it came to the meat of choice for holiday cookouts. Perhaps some of the return to steak (if people ever really stopped eating it) can be attributed to massive advertising campaigns mounted by the meat industry in an effort to show the meat of choice for holiday cookouts. Perhaps some of the return to steak (if people ever really stopped eating it) can be attributed to massive advertising campaigns mounted by the meat industry.

RUSSIA MAKES EIGHTH IN GROUP OF SEVEN — WASHINGTON-Russian will be linked formally to the Group of Seven at its summit in Naples. Speaking of what really caused the sinking of the Lusitania remains. What probably happened is explored on a recently released National Geographic home video, "Last Voyage of the Lusitania." Some say it was just a luxury liner in the wrong place at the wrong time when it was torpedoed by a German submarine on May 7, 1915. The loss of the Lusitania and 1,195 of its 1,959 passengers and crew drew the United States into World War I. The documentary preserves the home-recorded testimony of those who lived to tell their story. Some gave their interviews to a National Geographic film crew, recalling the grandeur of the floating palace moments before the explosion. Martin Sheen narrates the video, which weaves shocking footage of the sinking and the searing memories of the passengers and crew.

TRUCKERS SEEN AS ENDANGERED SPECIES — LOS ANGELES TIMES — Norman Thomas, owner-operator of the 1984 Peterbilt rig he calls "Pisces," he said it was just a luxury liner in the wrong place at the wrong time when it was torpedoed by a German submarine on May 7, 1915. DAILY EGYPTIAN TIMES — Norman Thomas, owner-operator of the 1984 Peterbilt rig he calls "The Pisces," is a long-distance businessman on the road year-round. His office is a 55-foot-long, 33,500-pound beast of a truck that hauls everything from coffee to cosmetics coast to coast. In 14 years as a trucker, Thomas has logged enough miles to drive to the moon and back five times. He has crossed this vast continent more than 16 times. Since the Great Depression, long-distance truckers have been considered "part" of the country's heroic folklore — the road's version of the American cowboy. Once a staple of this country's freight-hauling industry, long-distance truckers have been an endangered species. Fewer than 70,000 strong, they represent a fraction of the more than 2.5 million professional truck drivers operating today.
Recycling records: Used music for sale

By Aleksandra Macys
Campus Life Reporter

Jimi Hendrix, Jim Morrison and Stevie Ray Vaughan may all be dead, but their music lives on in albums, tapes and now on compact discs. While tribute albums to these and other artists are springing up constantly, their costs may be prohibitive. Frugal students can still find the used original through some local merchants.

Second Chance, 214 West Freeman, formerly The Record Exchange, offers a wide variety of used albums, compact discs and cassettes.

Paul Frederick, a store employee, said they buy, sell and trade used music, but will only sell local bands' tapes on consignment.

"We sell a variety of everything," he said. "You can't pin it down to a certain type of music."

Frederick said one advantage of buying used music is the price. "Compact discs usually cost $15 or more in a retail store. Here they usually run around $7 or $8," he said.

Tapes, he said, are similar. At Second Chance they are usually half the price of what they would cost in a retail store. The average price of tapes is usually $3 to $4, where albums cost between $3 and $50 for classics such as Frank Zappa and Pink Floyd.

Frederick said the store sells all types of music from jazz to country to rock and roll. "We don't sell easy listening music," he said. "People don't really buy it."

Frederick said those interested in selling or trading music can stop by the store with what they have, but those who want to sell a lot of albums at once should call first. Albums and compact discs

New store imports global goods; international students help out

By Diane Dove
Special Assignment Reporter

With the help of international students, three Southern Illinois residents began a home-run business last week that sells handmade imports from all over the world.

Nancy Stetler said she and friends Sherry Miller and Wilma Reese began Lunar Imports, 102 N. Oakland, so they could bring handmade imports from all over the world.

'Wild' program educates adults

By Sam House
Environmental Reporter

Project WILD, a supplementary educational workshop hosted by the U.S. Army Corps of Engineers, will familiarize parents and teachers with different environmental subjects so they can pass the knowledge onto children.

The workshop, at Rend Lake Visitors Center, is taught from a workshop containing numerous outdoor activities that are designed to teach children about the environment, according to Jerry Sauerwein, Rend Lake park ranger.

"Anyone who comes will get a workbook for free," he said. "The workshop will give parents and teachers the time to become familiar with the workbook."

The activities in the workbook are designed to make confusing environmental subjects clear to children by giving them hands-on training.

"They (the activities) take a difficult concept and break it down into an activity a child can understand," said Sauerwein.

Curt Carter, program coordinator for the Touch of Nature Environmental Workshop program, see WILD, page 6

New RSO proposal still needs polishing

A REPORT WRITTEN A YEAR AGO, WHICH proposes a new three-level system for SIUC registered student organizations, has been submitted to President Guyon. Guyon is expected to respond to the report when he returns to the University next month after recovering from surgery.

The 25-page report, written by the Committee to Study the Institutional Relationship with Student Organizations, offers several well-intended ideas. But will they work in the real world?

UNDER THE CURRENT RSO SYSTEM, GROUPS are divided into Priority One and Priority Two levels. Priority One, comprised only of mega-groups, last year received $219,000, 69 percent of the total student activity funding. The remaining groups, more than 400, received 31 percent, $132,000.

It would appear that some restructuring is in order. But the report does not specifically propose to redress this imbalance of funds. Instead, the report, which speaks often of organizations which “should be educationally purposeful” and “protecting freedom of expression,” overlooks practical aspects of the proposal it contains.

UNDER THE NEW SYSTEM, GROUPS WOULD be categorized into three levels: recognized, affiliated and registered. Recognized groups receive the most funding and registered groups receive the least.

A major question is how to categorize the groups? By size? By educational value? By popularity or politically correctness? And who will do the deciding? The report does not clearly address the decision process.

A MAJOR HITCH IN THE PROPOSAL IS THAT registered groups, lowest on the ladder, would be locked into that level and their growth discouraged. This strategy hinders freedom of expression.

Another major concern, especially for the smaller groups, is the access to facilities for meetings. According to the new plan, registered groups would compete for meeting places with recognized and affiliated groups. A new group would have no chance of resources, and recognition.

Small groups, already stretched to their limit for resources and staff, would be further stretched to fulfill the same requirements of their larger neighbors. With the new proposal, they have nothing to gain and everything to lose.

Student organizations are an important part of the University and the college experience. These groups, both large and small, sponsor many positive events on campus and in the community.

BUT GIVING PREFERENTIAL TREATMENT TO one group over another because of size and popularity could cut off the lifeblood of the smaller, less visible organizations. As it is, SIUC has a variety of student organizations to meet the needs of the diverse student population. Unless the committee can fine-tune its proposal and clearly address the issues, the big fish are going to take over the pond.

Editorial Policies

Signed articles, including letters, viewpoints and other commentaries, reflect the opinions of their authors only. Unsigned editorials represent consensus of Daily Egyptian Board.

Letters to the editor must be submitted in person to the editorial page editor. Room 124F, Communications Building. Letters should be typed and double spaced. All letters are subject to editing and will be limited to 300 words. Letters longer than 250 words will be given preference for publication. Students must identify themselves by class and major, faculty members by rank and department, non-academic staff by position and department.

Letters for which verification of authorship cannot be made will not be published.

How to submit a letter to the editor:

A: You
B: Letter
C: Editor

A maximum of 300 words may be submitted. The Daily Egyptian reserves the right to edit for the reliability of the report on the screen. (Signed need not be present to establish rape; in fact is not present in a majority of rape cases either because the rapist did not ejaculate or was otherwise dysfunctional. But when it is found, it is viewed as strong corroboratory.)

At one point, the police spokesman told me that what was found was a substance known as p30. He said this was “a fluid common to males and females but does not constitute semen.” (Similarly, McAlary, in his second column, said: “At best, the lab reported, the substance was saliva, male or female ... No semen found. Period.”)

No one else, however, describes p30 in this manner, especially not medical experts. For example, the New York State Health Department’s director for collecting rape evidence describes p30 as a “protein component of semen and says “its presence is regarded as a conclusive indication of semen.”

A 1985 article in the New England Journal of Medicine said that “the finding of any p30 ... establishes that semen is present.”

The police lab report itself, as revealed by New York Post reporter Murray Weiss, described rape evidence as “all unidentified, without any qualification: ‘The substance found in the victim’s shorts and on the (vaginal) swab is semen.”

Still, Daily News editor Martin Dunn said: “Mike McAlary has written twice on the issue and we stand behind him.”

Shepard exonerated Mr. Dunn who has sued the News over this way: “I have had the misfortune of being raped twice and twice seen the park and again in the media.”

By Sydney H. Schuhsberg

Newsday

In the late afternoon of April 26, in Brooklyn’s Prospect Park, a 27-year-old woman ran up to a police car and, in tears, told the officer she had just been raped.

Two days later, a Daily News columnist wrote that the woman was a “hoosey” and her story a “lie.”

He repeated the accusations in a column in May, ignoring the corroborative evidence that had emerged in the meantime from the police lab.

Now the unnamed woman has filed a $12 million damage suit against the newspaper and the columnist, Mike McAlary, charging defamation.

These details are but the skeleton of a tangled story that involves the police department’s top officials, their close relationship with the columnist and the inability of both his newspaper and the police brass to see the dangers in this kind of personal connection.

McAlary is one of a handful of News staffers who occasionally share the sporting life with Police Commissioner William Branton and his sidekicks at the commissioner’s table at trendy wading spots.

When McAlary wrote his first “base” column, basing it on unnamed police sources, Branton was embarrassed, probably because he knew that insiders in the press would likely assume that someone at the top had fed it to McAlary. So Branton, fearing backfire from women over the touchy subject of how the police handle rape victims, issued an apology.

He said he regretted that police “ought” about the case had been “shelved” for the press, “particularly since one of the doubts have been refuted by the medical evidence that has now been surfaced.” The evidence he referred to was the laboratory finding of semen in the woman’s vagina and on her running shorts.

But the commissioner also apparently feared backlash from McAlary, because in his remarks he carefully never mentioned the columnist or the Daily News. Even when, Branton went further and said: “We have physical evidence that a rape did occur”—this was after McAlary’s second column—said that the police lab was wrong, the commissioner nonetheless still did not refer to the columnist.

Meanwhile, the Daily News editors, citing McAlary’s “long track record of solid authoritative reporting,” kept saying “we stand by” his columns.

In his first column, McAlary said, “The woman was kind of vocal about being a ‘bitch.’ Of her account, he wrote: ‘It is an outrageous story, really. The woman, who is black and 27 years old, describes herself as a social activist. All we really know about her is that she has an active imagination.’

His sources, McAlary said, told him she “invented the crime ... to promote ... a guy and lesbian rally this weekend.” And he suggested she should be arrested herself because “a false report of rape by a woman looking for publicity is a crime against all women.”

In my reporting on the case, I almost immediately found confusion at police headquarters and a sense that the brass was juggling several agendas, trying to do public-relations damage control in an effort to mollify all sides.

About the lab tests, a police spokesman waffled back and forth on the reliability of the reports on the screen. (Signed need not be present to establish rape; in fact is not present in a majority of rape cases either because the rapist did not ejaculate or was otherwise dysfunctional. But when it is found, it is viewed as strong corroboratory.)

At one point, the police spokesman told me that what was found was a substance known as p30. He said this was “a fluid common to males and females but does not constitute semen.” (Similarly, McAlary, in his second column, said: “At best, the lab reported, the substance was saliva, male or female ... No semen found. Period.”)

No one else, however, describes p30 in this manner, especially not medical experts. For example, the New York State Health Department’s director for collecting rape evidence describes p30 as a “protein component of semen and says “its presence is regarded as a conclusive indication of semen.”

A 1985 article in the New England Journal of Medicine said that “the finding of any p30 ... establishes that semen is present.”

The police lab report itself, as revealed by New York Post reporter Murray Weiss, described rape evidence as “all unidentified, without any qualification: ‘The substance found in the victim’s shorts and on the (vaginal) swab is semen.”

Still, Daily News editor Martin Dunn said: “Mike McAlary has written twice on the issue and we stand behind him.”

Shepard exonerated Mr. Dunn who has sued the News over this way: “I have had the misfortune of being raped twice and twice seen the park and again in the media.”

Nancy Stetler, from Carbondale, and Pragyan Mohanty, from Orissa, India, show some of the goods sold by Stetler’s new business, Lunar Imports, 102 N. Oakland. They sell jewelry, silks and other goods from places like India.

“We didn’t know how this would go, but everyone is interested in seeing things from other countries,” she said. “We make a lot of friends.”

If the business expands, the next step will be to rent spaces in other locations, such as the Student Center or the Small Business Incubator, to sell the imports, she said.

Stetler moved to Carbondale last fall where she met Miller and Mohanty. Stetler said the idea for the business came when Miller, Reese, and many of the imported gifts in her home, which included jewelry, scarves, hats, and wooden items.

“People would come into my home and say, ‘You have such beautiful things, how do you get them?’” she said.

Eventually Stetler began to have students, whom she met at Penn State, who wanted to try the business. When they went home to visit their families, Stetler got money to purchase the goods and then went back to his community.

Even Stetler and Miller decided to start their own businesses that they, along with Reese, had help from a free course on business incubation at the Small Business Incubator at SIUC, she said.

The business incubator gave tips to the women on how to start the business, and told them what they legally could be allowed to have imported and sold, she said.

Stetler said her former students provided her with contacts in India, to show order items to those students.

However, because it is illegal for international students to sell goods in the United States, the students do not take part in the sale, she said.

Stetler said she pays retail price for the items, which are priced low because of the cheap cost of labor in India.

“I’ll never get any sort of a bargain per se, but it is a bargain,” she said. “It’s all hand made, and the makers will back it up.”

For more information about Lunar Imports, call 529-5667.

WILD, from page 3

will be the instructor for the Project WILD workshop.

Carter said though the books are designed for K-12 use, the workshop will be training mostly adults.

Although the workbook covers more than 320 pages of activities, only five or six will be addressed due to the time constraint, she said.

The students in the workshop will pick the activities.

A U.S. Army Corps of Engineers news release said Project WILD’s intention is to increase the awareness, knowledge

MUSIC, from page 3

cannot be scratched or mildewed and tapes must have the playing led by the cassette strip on them, he said.

Frederick said he sees a combination of people who are just browsing and those who know specifically what they want.

He said a lot of people come in to see which classics are in stock.

Although Discount Den, 611 South Illinois Ave., does not sell cassette or albums, they do buy, sell, or trade used compact discs.

Dennis Haworth, manager of the store, said he sells all varieties of used music.

“I sell whatever I buy,” he said. Haworth said sometimes people will bring in a compact disc and before he has a chance to put it on the shelf someone will come in and buy it.

Haworth said compact disc prices range from $1.49 to $7.89.

He said those interested in selling compact discs can come in the store, but they should first make sure the disc is not scratched.

Evolution Music, 607 South Illinois, could not be reached for comment.

UAW pickets Caterpillar again; new strike bill goes to Senate

Los Angeles Times

EAST PEORIA, Ill.—Caterpillar and its 14,000 United Auto Workers union members have been at a bitter impasse for nearly three years. And there is no end in sight.

The labor strife escalated last month when the UAW announced a nationwide strike affecting 12 plants in Illinois, Pennsylvania and Colorado.

In the past, the walkout appeared to focus attention on Caterpillar just as the U.S. Senate is considering legislation—already approved by the House—that would bar companies from hiring permanent replacements for striking workers. The UAW ended a 163-day strike in 1992, when Caterpillar threatened to do just that.

Hispanic council offers support, cultural base for ethnic students

By Tre' Roberts
Memories Writer

The Hispanic Student Council is an important forum for providing SIUC's Hispanic and Latino students with a sense of community, said the council's faculty advisor.

"One of the functions of the Hispanic Student Council is to give SIUC's Hispanic and Latino students a sense of support," said Jesus Baena, advisor of the council and assistant professor in educational psychology and special education.

"Generally those students come from very tight-knit families and it is tough for them to leave their homes, to come here with little support culturally, socially or financially knowing many people." Baena said Hispanic and Latino students are a largely ignored segment of SIUC's population.

The council gives students a forum in which they can communicate in a relaxed atmosphere and share experiences of being away from home. The council also gets students involved in activities such as dances, picnics and other social events such as sports events, he said.

Ilea Dominguez, assistant professor in the SIUC School of Law who acts as an assistant advisor to the Hispanic Student Council, said the council provides an important service to Hispanic and Latino students.

"The council has done a lot to create a community for the students, to provide them with cultural support," said Dominguez.

Baena said although there are about 450 Hispanic and Latino students on campus, only 30 to 40 per cent are fairly active.

"Hispanic and Latino students often take very heavy class loads," Baena said, "getting involved in the council takes away from the time which they have to study, so many are not able to get involved very often." Baena said in the past the council had trouble with organization due to the difficulty getting students to meetings.

Monica Rogers, president of the Hispanic Student Council, said although there has been some trouble in the past with participation, she hopes the number of students active in the council will increase in the fall.

"Many students don't even know we are here," Rogers said. "During orientation week we will go in the dorms to greet incoming students, particularly those of Hispanic and Latino heritage.

Rogers said many of the students do not know what is available to them, from financial aid to social events. The council's activities alternate between social and business, said Rogers.

"One week the focus is on council business, the following meeting is mainly for socialization," she said.

Baena said the council is not just for Hispanic and Latino students.

"All races are welcome to the council," Baena said. "One of the council's goals is to promote inter-cultural understanding between people."

Their in-depth look found that:

-Caffeine often has been indicated but never convicted: "Even after years of speculation and research, scientists have not been able to show that coffee drinking contributes to heart disease or cancer."

Overall, the medical literature is inconclusive on coffee’s risk during pregnancy, and, despite suspicions, scientists have not been able to link coffee with osteoporosis.

-Coffee with cream, especially the chic ones with whipped cream or whole milk, may have as many calories and fat as some extra-rich ice creams. Shots of hazelnut or vanilla syrups can escalate the calories.

-A Starbucks’ Cafe Mocha for example—a shot, that is—may have nearly 200 calories. Even with skim milk, it will have 156 calories and, according to whether it has skin, 2 percent or whole milk, it will have 11, 13 or 15 grams of fat.

Experimental spray may be solution to migraines

The Washington Post

An experimental nasal spray is getting high marks for controlling migraine headache pain.

University of Kansas researchers report that a nasal spray containing the long-used migraine headache drug DHE-45 (dihydroergocryptine mesylate) is safe and effective in offering rapid relief of the severe pain of migraine headaches and controlling the nausea often accompanies them.

Migraines affect an estimated 25 million Americans annually. They account for 80 million annual visits to doctor’s offices and cost $50 billion yearly in lost wages and medical expenses.

Various medicines, including DHE, are used to treat migraine headaches. But in pill form, the drugs often are hard for migraine sufferers to keep down because of the nausea and vomiting that often occur in many migraines.

For this reason, doctors in recent years have experimented with alternative ways to administer medications, including injections and nasal sprays.

The recent study of 112 people who suffer from migraine headaches found that administering DHE as a nasal spray was more effective than controlling migraine pain and other symptoms, said Dewey K. Ziegler, director of the headache clinic at the University of Kansas Medical Center and lead author of the multi-center study.

Half the participants in the study received a nasal spray containing DHE. The other half used a nasal spray with inactive ingredients. Seventy-one percent of patients who took DHE reported at least fair to very good relief, compared with only 38 percent of those who took the placebo spray, Ziegler and his colleagues reported in the journal Neurology.

The findings demonstrate that patients can achieve a rapid and acceptably high degree of relief with the nasal spray, Ziegler said. The nasal spray version of DHE "could particularly benefit patients who are experiencing nausea, vomiting or both" with migraine, he said.

DHE nasal spray approved for use by the Food and Drug Administration as a migraine medication nearly 50 years ago. DHE in nasal-spray form is still undergoing testing for final FDA approval.

In addition to its easier administration, the nasal spray also is preferable for those who can't take pills or tolerate injections and would result in "possibly fewer visits to health care providers and hospitals for acute treatment," Ziegler said.

Study shows exotic coffee blends have least caffeine

The Washington Post

When they set out to get the lowdown on coffee highs, the editors of the Tufts University Diet and Nutrition Letter expected to find lots of caffeine in the mushrooming varieties of chic continental expressos, lattes and espressos.

But in pill form, the drugs are not able to get involved very often.

"What they found, to their surprise, said Larry Lindner, executive editor of the 3-year-old newsletter, was that these chic blends actually were lower in caffeine than an ordinary cup of brewed coffee.

In the July issue of the newsletter, Lindner noted that the arabica beans used in expressos, cappuccino and late (caffeolus and late are milky variations of expresso) impart a stronger taste but contain less caffeine than the robusta beans used in regular coffee.

Lindner and his team, in response to questions from their readers about coffee, sent samples to a laboratory for analysis of caffeine, fat and calorie contents.

If you’re in the market for a little extra cash, come to Magna Bank. Or call 1-800-84MAGNA. You’ll find money really does talk, if you ask the right questions.
SOCCER, from page 12

football combined, as regular club matches draw well over 100,000 fans.

The tournament brings people from countries together, who normally have nothing in common, but who all end up watching the games together.

One of the most intriguing sights of the World Cup so far came after Brazil beat the United States when American along with Brazilian team members held up an American flag at the 18,400 plus fans cheered the efforts of both teams.

This World Cup is not without controversy as one of soccer's most famous stars Diego Maradona was banned because of alleged use of illegal performance enhancers.

Even with these incidents the World Cup, especially the United States run, has boosted soccer popularity in this country, the game's star power continues to grow in this country after the World Cup is over.

NBA, from page 12

grown a young nucleus. The Mavericks still need big men, so Kelly, who was expected to start, was suddenly pushed to the bench after the second round was a surprise, the Illinois center measured only 6-7.

DETOIT PISTONS—This team is important it is to bring energy and talent at the right time. Their No. 3 pick looks like a player who can contribute immediately. There are other oddments, such as a 6-7, 205-pound center from Creighton who was taken in the second round. The Pistons are trying to improve their defensive play on the wing.

MILWAUKEE BUCKS—A 6-7, 220-pound center from Ohio State who could offer help on the defensive end. His name is Elmore Jones.

TENNESSEE VOLS—They are in need of talent at the small forward position, and they have the picks to go with it. They are expected to use their picks wisely.

SIUC football to punch in for overtime

By Bill Kugelberg
Sports Reporter

Betting purhers around the nation can breathe a sigh of relief now that the Gateway Conference, home of the SIUC football team, has implemented an overtime system, ridding its teams of dreaded tie battles.

The new system, the first in league history, will utilize the NCAA I-AA schematic format to decide the outcome of conference games that end in a tie after regulation.

Saluki head coach Shawn Watson said the new format will make games more interesting. "We are going to have to have a real plan as to what we will do in overtime situations," he said. "All kinds of variables will come into play. Depending on the strengths of the team, we will have to decide whether to let the offense or defense take the ball first. This is going to make league play very exciting."

The new format replaces a system which awarded a tie if either of the teams matched at the end of regulation play.

The tie-breaker works as follows:

- In an overtime, one end of the field is used and each team gets an offensive series beginning at the 25-yard line.
- Each team retains the ball during a series until it scores or fails to make a first down. A possession ends on an interception, fumble or unsuccessful field goal try.
- Teams are awarded one overtime period per extra point, with not used during regulation may not be carried over into the overtime.
- Unusual extra-period timeouts may not be carried over to other extra periods.
- The team scoring the greater number of points after completion of both possessions is the winner. A team may score on defense.
- If, after both possessions, there is no score of the score is tied, there will be alternating overtime periods until a winner is declared.
- The final score will be the total of all points scored by each team in regulation and overtime periods.

Watson said the conference's coaches decided to implement the new system for two reasons.

"The coaches felt it was the only thing to do since the Gateway Conference is the only NCAA I-AA league that didn't use an overtime system," he said. "And we felt it was a good plan because it gives everyone a fair opportunity to score. Unlike the NFL, its sudden death which doesn't give everyone an opportunity to score. The way it was set up, this was the best, fairest way to go about it."

Hart to name new coach for Saluki baseball today

A press conference is scheduled for today at 1 p.m. to announce the new Saluki interim head coach.

SIUC Athletics Director Jim Han said the new format will make games more interesting.

I love this game (anyway): We can breathe a sigh of relief now that the Players Association is showing its support. A few weeks ago, if you had asked how the league was doing, the answer would have been: "Never been better."

This spring it would be: "It's been better."

Labor relations—never been worse.

The collective bargaining agreement that expired and the Players Association is showing its teeth at every turn. However, the owners might be so upset, they might refuse to open next season without a contract and lock the players out.

State of the National Basketball Association: Despite the mud-wrestling finals, TV ratings falling to an all-time low, Jordan's lows and the threat of a strike, the fundamentals remain.

Attendance is near 90 percent of capacity.

Franchise prices are skyrocketing. Toronto and Vancouver are coming in at $125 million.

U.S. soccer fever may end with Cup

It almost seemed like it was a given that the United States taking on mighty Brazil on the Fourth of July with over 8,000 screaming fans watching possible history unfold in Stanford, Calif.

For 73 minutes the impossible seemed possible as the game remained scoreless and the United States had an extra man, because of a Brazilian player, Leonardo, who elbowed American Todd Ramos in the face late in the first half. However, when Brazil's Bebeto shot slid past U.S. goal tender Tony Meola in the 74th minute, American hope of an unprecedented upset evaporated with the heat.

The upset would have even been sweeter if the "Miracle on Ice" when the U.S. Olympic hockey team beat then thought unbeatable Soviet Union in the 1980 Olympics in Lake Placid, NY.

The United States team was completely outplayed especially in the second half as Brazil controlled possession and had several scoring opportunities, while the United States had only a couple scoring chances even with a man advantage.

Still the U.S. team held the Brazilians, which have been compared to the U.S. Dream Team in basketball, to one goal and advanced to the second round as well as beating Columbia one of the pre-tournament favorites.

The Americans were only in its second World Cup since 1930 and in 1998 they lost all three games by a combined margin of 8-2.

The World Cup has been embraced by Americans as stadiums are filled to near capacity and television ratings are doing well.

Fans, who did not understand the game before the World Cup was played in the United States, came to the stadium in droves in red, white and blue and would stand in lines for hours to get their hands on tickets to these games.

This event is more than a soccer tournament it is a time when fans from 24 countries come to paint their bodies, wave their flags and go into a hysterical frenzy. Soccer, known as football to everyone outside the United States, is the world's most popular sport and for several countries is a way of life. For many nations take soccer more seriously than Americans take football, basketball and

The City's financial commitment for CBDC provided the foundation for the successful $3.000,000.00 developer fund for expansion of the City's industrial land.

The University Mall has strengthened its ties to the downtown area since it opened in July 1994 and quickly established itself as another reason for shoppers to come to Carbondale. Other projects completed in FY 94 or are currently being developed illustrate how this area continues to grow.

The redevelopment of Downtown Carbondale continues to be a success story as public and private investments create a different atmosphere in the area. During FY 94, design work started on the internal restoration of the former JC Railroad Passenger Depot. Actual construction will begin during FY 95 and will be complete in time for FY 96. Recent discussions with the Station Restoration Committee have raised $320,000.00 from a group of active business people in the downtown area in order to begin restoration on the depot. The City of Carbondale has elected to terminate the Corridor Design and Location Report for the Northern Connector due to the adverse neighborhood impacts of the only routes considered acceptable alternative corridors. The City’s support of the SWIFT project remains strong as a feasibility study for a toll road from Carbondale to the metro east St. Louis area is underway.

Several City workers have worked cooperatively with Southern Illinois University at Carbondale for the Cable Channel. Cable Channel Board meetings began to be broadcast. Revenue from continuing to offer City services to cable subscribers has increased to almost $150,000.00 per month as cable service is expanded to a new market. The Cable Channel continued during FY 94.

The City is very proud of the high quality programs that are broadcast. The Cable Channel began as a means of providing a unique communication medium for citizens to view both governmental and non-governmental activities. The Cable Channel has been accepted by the City Council. It is used as the basis for the development of Government Information Television (GITV). In FY 95, the Cable Channel will continue to function as the basis for the development of the community's tourism efforts.

Carbondale City Council meeting in order to present The Quill Award to City Clerk Janet Vaught. Although Vaught had been at the IIMC meeting in An­chorage to accept the award, Hayes noted that Vaught “worked at the IIMC due to the signific­ance of the award.” Hayes then went on to say “Janet is well deserv­ing of the award” and we wanted to underscore this by coming down and presenting the award to the clever clerk you have.” Hayes con­cluded her City Council presentation by awarding Vaught a plaque signed by the IIMC Region VII Directors commending Vaught on her “meritorious admin­istration presented the 1994 IIMC Quill Award.”

When Mary Hayes made her pre­sentation to the City Council, she noted that Vaught’s resume of ser­vice was lengthy. Appointed Car­bondale City Clerk in 1979, Vaught is a Registered Municipal Clerk through the Illinois Municipal Clerks Association (IMCA) and a Certified Municipal Clerk through International Institute of Municipal Clerks. She is Past President of IMCA, presently serves as the Chair of the Registered Clerk Program for IMCA and on the Legis­lative and Program Committees.

City Clerk Janet Vaught - one of many City employees of whom we are very proud!

Animal Control Officer

Don’t leave your pet in a parked car when it’s warm or humid outside - not even for a quick errand.

On a warm day, the temperature in your car can reach 160 degrees in a matter of minutes, even with the windows partially open. Your pet doesn’t perspire in the same way you do, so they can experience heat exhaustion and other dangers. A dog’s tongue is its cooling system - that’s why it pants! With panting, your pet can breathe, your pet can quickly suffer brain damage or die from heatstroke.

The Humane Society of the U.S. warns: open windows, shaded parking areas or air conditioning won’t save your pet’s life. When it is hot, leave your pet at home.

Healthy Summer Pet Hints!

Exercise your pet in early morning or late evening.

A fresh supply of clean water should be available at all times. If your pet tends to “knock” his bowl over, making it difficult to keep water available, a solution may be to dig a hole in the ground and in­corporate a plate at ground level. A cool, shady area is absolutely necessary to maintain the health of your outdoor pet. Dogs and cats can suffer from heat stroke if proper precautions are not taken.

During hot weather, animals are subject to skin and fur condi­tions. Fleas, ticks and lice are more plentiful during this time. Your vet­erinarian recommends a product which is best suited for your pet.

If your pet is a breed that desires clipping during the summer, be cautious on the amount of hair you remove. Don’t shave off the animal’s natural insulation and sunburn protection.

Certain animals’ diet in warm weather, cutting back on carbohydrates and starches.

1994-95 Dog Licenses are due now!

COUNCIL COMMENTS

The City has just dedicated our new medical building to the people of Car­bondale and surrounding area, well into the 21st Century.

Past and present City Council with city-half citizens in place to meet the needs and requirements of any business or service entity. With the efforts of many others we believe that Car­bondale and the greater Car­bondale area will be the location of many new jobs in the future. Retail sales and development continue to increase as more prospects study us and like us.

Many, new homes are being built in the community and annex­ation is continually expanding our boundaries. Top-of-the-line services will be made at a beautiful site to build, buy or rent and live.

Our Channel 16 Cable TV show­ing of Council Meetings and information on how to be well accepted. Other govern­mental meetings are accorded seating up front so that the council can be accounted for and the public’s position on issues before the council.

Your city finances and services are in very good condition, and we desire to keep them at a high level. Your City Council and sta­ff are constantly planning for the future of your city while maintaining these financial conditions and pro­viding essential services to our citi­zens and visitors.

We plan to have a great fiscal and ac­ademic year and all of us working together positively we can make our Carbondale Community the most desirable area in which to live and prosper.

The The Man

Continued from Page One

for special visitors that had come from a distance on the car and de­cided to get away early, but the hun­dred crowd had massed around the building, including a large number of the large sliding doors in the center of its sides, so it was impossible to be present when the five hundred were puffed early to a private en­trance at one end. Afterwards we opened one of the side doors and al­lowed enough outsiders to enter to fill up the tables, when we closed the doors, announcing to those who were still outside that we had plenty of food for and requesting them to be patient.

They were, and no such body of hungry and hungry people had ever behaved better or more sensibly than they. The first that were ad­mitted fared no better than the last. As soon as one tableful was satisfied and got along fairly to a con­clusion, there was a rush to take up the dishes and wheels and rockets all the wonderful things to make up the show. Everyone was eager to see the mishap that might occur.

I commenced by sending up rock­ets and got along fairly to a con­clusion, it buzzed and fluttered, and instead of ascending into the outer darkness, as a well­behaved skyrocket should have done, it gyared around sometimes up a little and again down, and finally ended its course by tumbling. Fire-end fore­most, right into the open box con­taining the rockets. The flames and fuses took fire, and then the fun started in earnest. Fortunately the object we had expected was entirely in a box and not on the ground, as we had expected. The behead­ed skyrocket was pointed away from the assembly, west­wardly up the main street, which had been cut out and pretty well cleaned by brush some distance up the hill. A number of canines were prowling in the rear of my position, anxious and ex­pecting. The sparks of fire emitted by the rockets were somewhat dis­turbing to the beholders. Chagrined and abashed, I said but little. Soon, however, that Vaught's resume of ser­vices was accepted. Many, new homes are being built in the community and annex­ation is continually expanding our boundaries. Top-of-the-line services will be made at a beautiful site to build, buy or rent and live.

The City of Carbondale Continues To Accept Rehabilitation Applications

Applications for participating in the City’s Housing Rehabilitation Grant program are still being accepted. The City began accepting applications in mid-May and closed the first round for funding on June 17, 1994. Applications received after June 17 will be processed for funding in subsequent grant rounds. The City received grants from the Department of Commerce and Community Affairs and the Illinois Housing Development Authority to rehabilitate approximately 20 homes. Grant awards will continue to be made until all grant funds have been used. The City intends to apply for additional grant funds if there is a demand for the program.

In order to be eligible, applicants must be owner-occupants of homes located in Northeast Carbondale. Applicants must also meet low and very low-income eligibility criteria established by the Federal government. Maximum family incomes by family size are as follows: 1 person, $19,200; 2 persons, $21,950; 3 persons, $24,700; 4 persons, $27,450; 5 persons, $31,200; 6 persons, $34,950; and 7 or more persons, $38,700. Applicants who meet the eligibility criteria and desire to receive more information and a Housing Rehabilitation Grant Program Application should contact the Development Services Department at room 318 in City Hall or by calling 457-2348.

The housing rehabilitation work will be performed by private contractors. The City will establish a list of qualified contractors who will be eligible to bid on the housing rehabilitation projects. Contractors interested in doing work under this program should contact the Building and Neighborhood Services Division at 457-5302 or 529-5113 and set up a convenient time for a free inspection. If you would rather not have a firefighter come to your house and do a safety inspection, we ask that you do your own inspection. Some things to look for are as follows:

- Make sure you have an outside street address that is easily seen from the road and is well-lighted at night. This makes it faster for the fire, police, or ambulance personnel to locate your home in case of an emergency.
- You should know where the outside utilities are located (gas and electricity) and how to shut off the gas in case of an earthquake or other emergency.
- If you have a fire hydrant in your yard, we ask that you keep it accessible by clearing shrubs or obstacles away from the hydrant. Remember, seconds count when a fire occurs and firefighters do not have time to clear a path to the nearest fire hydrant.
- If you store flammable liquids in a shed or garage, please keep them in a proper container, locked and away from children.
- Do a yearly cleaning of storage areas and get rid of unused papers, magazines, or anything that contributes to the fire load in your home.
- If you have any electrical problems, call a licensed electrician and have your electric service checked.
- Use extension cords only on a temporary basis, not a permanent wiring. Do not overload the cords because overloaded cords will start a fire.
- Practice safe cooking techniques. Never leave food unattended when it is cooking. If there are children in the home, always turn the pots handles inward. This makes it less likely for a child to reach up and pull a hot pan down on him/herself.
- Please, Please, Please check your smoke detectors. They will save your life and the lives of your family if there is a fire in your home. The detector is useless if the batteries are dead or missing.
- We want to help you with suggestions on how to make your home safer. Please give us a call at 457-3399 or 529-5113. We will gladly answer questions or schedule a free safety inspection at your convenience.

DARE graduation
at Wintler School’s 6th grade was held on May 17th and Mayor Neil Dillard and Police Chief Hope Cunningham presented the awards and pins of honor in congratulating the DARE graduates.

Fire Department Offers Free Home Inspection

In an ongoing battle to reduce the number of house fires in Carbondale, the Fire Department has launched a home fire-safety inspection program. This is a complimentary service; there is no charge for an inspection. The inspection is an advisory visit, done only to help Carbondale residents stop home fires before they start.

The firefighters will look at both the interior and exterior of the home for safety problems. They will also give helpful fire prevention recommendations to the residents. Some of the things they will look for are: proper house identification (visible street addresses), kitchen safety, smoke detector operation, home escape plans, and proper storage of flammable liquids.

Our department is excited about this program and looks forward to visiting with the people of Carbondale to share fire safety and prevention information. If you would like a home safety inspection, please contact the Fire Department at 457-5302 or 339-5113 and set up a convenient time for a free inspection. If you would rather not have a firefighter come to your house and do a safety inspection, we ask that you do your own inspection. Some things to look for are as follows:

- Make sure you have an outside street address that is easily seen from the road and is well-lighted at night. This makes it faster for the fire, police, or ambulance personnel to locate your home in case of an emergency.
- You should know where the outside utilities are located (gas and electricity) and how to shut off the gas in case of an earthquake or other emergency.
- If you have a fire hydrant in your yard, we ask that you keep it accessible by clearing shrubs or obstacles away from the hydrant. Remember, seconds count when a fire occurs and firefighters do not have time to clear a path to the nearest fire hydrant.
- If you store flammable liquids in a shed or garage, please keep them in a proper container, locked and away from children.
- Do a yearly cleaning of storage areas and get rid of unused papers, magazines, or anything that contributes to the fire load in your home.
- If you have any electrical problems, call a licensed electrician and have your electric service checked.
- Use extension cords only on a temporary basis, not a permanent wiring. Do not overload the cords because overloaded cords will start a fire.
- Practice safe cooking techniques. Never leave food unattended when it is cooking. If there are children in the home, always turn the pots handles inward. This makes it less likely for a child to reach up and pull a hot pan down on him/herself.
- Please, Please, Please check your smoke detectors. They will save your life and the lives of your family if there is a fire in your home. The detector is useless if the batteries are dead or missing.
- We want to help you with suggestions on how to make your home safer. Please give us a call at 457-3399 or 529-5113. We will gladly answer questions or schedule a free safety inspection at your convenience.

It’s That Time Again... National Night Out

National Night Out is fast approaching. What is National Night Out you ask? National Night Out is a celebration designed to increase awareness of security and bring neighbors together to let the criminals know we are united as a community to combat them. Last year over 8,000 communities nationwide participated. Carbondale will be having it’s celebration on August 1, 1994 at Turley Park from 6pm-9pm. There will be entertainment, food, refreshments and prize giveaways for both young and old. Safety displays will be set up by local Police and Fire Departments and other local businesses. Plan to come out and join the fun, and learn about how to make your neighborhood safer.

On August 2nd we are asking everyone to turn on all their porch lights as a show of unity against crime. We will give out prizes to the neighborhoods with the most participants. Organize your neighborhood now to join the competition, if you want to get in on the competition contact Don Pridy at 457-5302 or 339-5113 to register your neighborhood. We hope to see everyone at National Night Out!!

Board of Fire and Police Commissioners Career Opportunities

Write examinations and physical fitness assessments will be given for Carbondale Firefighters on September 10, 1994. The last day to submit an application is Friday, August 19, 1994. For additional information, please contact the City Clerk’s Office, 549-5302, ext. 281.

Tornado Safety

* It’s that time of year again when we have to worry about severe weather. Take a few moments to review tornado safety precautions with your family or friends. The City’s emergency sirens are activated when a tornado warning is issued that puts Carbondale in the path of a tornado. If you hear the sirens, take cover immediately.

“Taking A Stand”
DARE graduation at Wintler School’s 6th grade was held on May 19th. Members of the DARE Class chosen to read their essays to the assembly of guests, parents, family and friends are pictured with DARE Officer Chris Strom. Not in order shown in picture are: Leash Simon, Nicholas Shaw, Jodie Dingman, Waudlech, Delmar Albre, Marra Simon, Rocky WOugh, Brittany Randolph, and Alicia Cremen.
