Our Opinions

Live It Up This Summer

The Social Senate and the Office of Student Affairs have worked hard to provide summer recreational programs...

which has no life to it and the "I don't care" attitude develops. This we would like to stop.

A special invitation is offered to those who are on the Southern campus for just the summer...

Together we can strive to build a better University, but such things will need the help of all...

JULY EXHIBIT FEATURES UNIVERSITY SCHOOL ART

An exhibition of art work done by students at University School during spring term is scheduled to be in the Allyn building art gallery early in July.

The display is in conjunction with an art education workshop being conducted through July.

Giant City Park Dates From Prehistoric Days

Area Known As 'City Where No One Lives'

By Jim Dowell

Seventy thousand persons eat, play, and relax every year in or around the city where no one lives. Giant City has been a center of importance in one way or another since prehistoric Stone-Agers wandered through its silent streets and alleys.

There are a few employees who look after things, and a very short distance away is the village, Markanda. But Giant City itself is a park, and the people who throng there to picnic areas list some other uses as home.

Not one out of a thousand who visit Giant City State Park suspects the drama to be found in the history and legend of this hilly area of Southern Illinois.

Another attraction in this section of the park is the giant carving of the head of an Indian chief. The usual visitor cannot help wondering if it could have been carved to commemorate a great Indian chieftain.

One faded carving of an Indian chief elsewhere in the park has been there for at least five generations.

been lost there by French Lieutenant Aubrey when he was journeying from Fort Kaskaskia to Fort Massac in 1720.

Just south of the stone fort, there is another bluff that with one of its corners chipped off, looks as if it had been struck by a giant chisel.

Smith relates that another resident, Phil Rendleman, heard his dog barking one night. Thinking the dog had treed a coon, Rendleman ran to pick up his gun and went to the top of this same bluff.

At present there is very little left of the original stone fort. The CCC called this area of the bluff to make a wall that now banks a creek running through the park.

Just south of the stone fort, there is another bluff that with one of its corners chipped off, looks as if it had been struck by a giant chisel.

Seeing a figure someone had recently built in the shelter which then existed, he decided to stop for a while to escape the weather.

Smith relates that another resident, Phil Rendleman, heard his dog barking one night. Thinking the dog had treed a coon, Rendleman ran to pick up his gun and went to the top of this same bluff.

At present there is very little left of the original stone fort. The CCC called this area of the bluff to make a wall that now banks a creek running through the park.

MAIL BOX

Dear Editor: Bouquets to JA for his analysis of the fly problem in the Student Council!

causing in the Student Union. At the present time, the little winged masters seem to be decreasing in number inside the building.

The Department of Health Education was nearly carried away last summer because of the flies. After much argument we were successful in getting the screened enclosure at the back end of the building to hold the garbage cans.

Students Find Summer Employment At Anna Fourteen Southern Illinois university students began summer employment at the Anna State Hotel June 16, according to Dr. R. C. Steck, superintendent.

We hope this will eliminate the problem. If it does not, we hope that more JAs will raise their voices in protest of this unsightly condition.

Glen Hudgens, Anna, is working in the recreation program. Charles Verbe, Anna, is working on the hospital farm.

How can we ever expect graduates to be aware and assume responsibility for community health problems. An awareness of public health problems and the steps necessary to cope with them should be an important part of every college student's education.

Jane Riley, Cobden, has been assigned to the nursing department. Jerry Duane, Galatia, is in the infantry department.

Ralph H. Boatman, Action Chairman, Health Education Department.

Christine Minkler, Carbondale, Lewis Fezoz, Pinckneyville, is working in the diagnostic ward occupational, recreation therapy program.

Help Wanted

The Egyptian needs reporters for the summer term. They do not necessarily have to have a great backlog of journalism experience or be a journalism major.

Reporting activities will not consume much of the student's time, for publication dates are bi-weekly.

Anyone interested in working on the summer staff should contact University extension 266 or stop by the Egyptian office in the Journalism House at the corner of Harwood and Thompson.

Try-Outs Scheduled For Summer Theatre Play

Try-outs for Southern's summer Little Theatre production are scheduled for Monday night, according to Dr. Archibald McLeod, director.

The readings will be held in the new Southern Playhouse in the blocked off area of Thompson street just south of the cafeteria beginning at 7 p. m.

Dr. McLeod urges anyone interested in any phase of dramatic activity to be at the meeting.

The play has as yet not been definitely set, but several are now under consideration.

Among possible plays are "The White Headed Boy," an Irish play by Lennox Robinson, the director of the Abbey Theatre in Dublin.

RUDY STAHLHEBER NAMED TO HEAD SOCIAL SENATE

Rudolph B. Stahlheber, Pinckneyville, has been chosen to head Social Senate activities during the summer term.

A junior in the College of Education, Stahlheber will remain as Social Senate president until fall term begins.

Dr. McLeod urges anyone interested in any phase of dramatic activity to be at the meeting.

"NOT A BULLSEYE, but close to it," says Mary Ann Naris, West Frankfort senior, as she retrieves some of her arrows while going through a two-week training period for Little Grass Lake counselors.

Mary Ann is at the left, others in the group from left to right include Miss Cleo Ulin, instructor in women's p. e.; Roger Adyt, Dahlgren junior; Emily Goetz, U. High student, and Bob Whelan, Park Ridge senior.

A Housemother's Life Is Not An Easy One

MOST MOTHERS think that taking care of a family of three or four is a full-time job, but that number is trivial when compared to the task of Mrs. Althea Stucky, Delta Sigma Epsilon housemother, who acts as the mother-away-from-home for approximately sixty girls.

In the above photo she gently shakes Teresa White, Murphysboro senior, to tell her she has only fifteen minutes to make her three o'clock class. Afternoon naps for the girls are not uncommon, and Mrs. Stucky many times assumes the responsibility of awakening them so they can get to class on time, won't be late for work, or to keep an appointment.

FORMAL DANCE nights always mean a lot to do for Carolyn Walston, West Frankfort junior.

She helps the girls get ready, adjusting a corsage for someone, slipping on another's shoes, or fastening the back of a formal such as the dress for Carolyn Walston, West Frankfort junior.

Nor does Mrs. Stucky quit for a day everting, for she must see that they get back to the house before closing hours and then make sure all the men have left at the designated time.

Area Workshops Teach Gardening

Three summer workshops in agriculture are being offered in the area this summer through the Southern Illinois University Extension Division, according to Dr. W. V. Keeper, acting director of the SIU Division of Rural Studies.

Dr. Lowell R. Tucker, SIU associate professor of agriculture, will teach Landscape Gardening as the workshop course. Each workshop will be in session from 7:45 a. m. until noon, Monday through Friday, for two weeks. Interested persons may enroll and earn three quarter-hours of college credit in agriculture, Keeper said.

The first workshop opened June 14 in the Benton high school building, serving persons in Franklin and adjacent counties. The second will begin July 12 in the Nashville grade school building for persons in Washington and nearby counties. The final workshop will open a two-weeks session August 16 in the Eldorado high school for persons for the Saline county area.

Subject matter is concerned with lawn and garden plantings, with emphasis on plant culture and care more than on landscape design.

SIU COUNSELORS AID IN DEPAUW GUIDANCE CLINIC

Dr. Betty Greenleaf and Dr. Jack Graham, both graduates of DePaul University, participated as visiting counselors at the eighth annual Educational Guidance Clinic at DePaul June 17-19.

The clinic, limited to 100 students, is intended to bring together students and their parents with educational counselors experienced in determining youngsters' capabilities for college level work on both educational and emotional adjustment phases.

Each counselor works with only two students and their parents in order to become well acquainted with individual problems.

ENTERTAINING fellows while they are waiting for their dates is another little matter that Mrs. Stucky tends to. Many times the chatter runs into long and interesting stories and it ends with the Delta Sig waiting rather than the boy.

In this picture, she listens to Jim Mitchell of Mascoutah as he explains the day's happenings.

Southern Pots Picked To Appear In Exhibits

Leon Moburg, Ruth Gilliland, Don Brown and F. Carlton Ball have won acceptance for examples of their pottery work in exhibitions in Denver and New York City.

In New York, at the Young Americans show sponsored by the American Craftsmen's Educational Council, Inc., Moburg, Miss Gilliland and Brown each have two pots on display from June 2 through Sept. 8.

Three pots of both Moburg and Ball are entered in the 60th Annual Exhibition for Western Artists open to artists from 24 states, between June 14 and August 1. Miss Gilliland has one entry in this exhibit.

Veterans Under Korean Bill Must Choose Carefully

The quarterly clinic as conducted by the Bureau of Child Guidance in cooperation with the Illinois Institute for Juvenile Research began in campus yesterday and will continue through this afternoon.

Morning sessions are being given to the study and analysis of the educational difficulties and problems of adjustment relative to children who are brought here from various communities in Southern Illinois. Guidance is being offered to both parents and teachers of children brought into the clinic.

The professional staff on campus from Chicago includes Dr. Marian Cohen, psychiatrist and Mrs. Mary Aken, social worker.

Child Guidance Clinic Ends Sessions Today

In addition, the staff of the clinic also conducts clinics in various communities held in cooperation with public and private schools.

Sessions on the SIU campus are being held in the University School Auditorium.

Labunski was added to the program as a replacement for Rudolph Ganz, former conductor of the St. Louis Symphony Orchestra, who was forced to cancel his engagement here because of illness in his family.

Health Nutrition Workshop Begins

Southern Illinois University's health education and home economics departments have combined forces to offer a two-week workshop in health and nutrition at Giant City State Park. The course ends July 2.

Living in the park barracks, workshop participants will supplement four hours of class work a day — from 1 to 5 p. m. — with fishing, hiking, swimming, music, and games. Coordinators of the program are Mrs. Mary Louise Barnes of the home economics department and Dr. Ralph Boutman, chief chairman of health education at Southern.

Instruction is in foods, nutrition, sanitation, and other public health problems related to the school luncheon, camping programs, and other quantity feeding programs.

The workshop is designed primarily for supervisors of school lunchrooms, school administrators, camp leaders, and school nurses.

ADVICE IS ONE of the excellent points of a housemother. Every day new problems arise for some girl and the fact that the advice of an older person is needed, and when this happens, the housemother is usually the one that is confided in such as Miss Moore, Housemother now is doing.

Maybe a boyfriend has had a little 'n' with his girl, or her grades are just a little low, or in some cases it may not be a tale of woe, but a happy secret such as a forthcoming engagement or pining.

Book Gift Brings Thanks Missionary Tells War's Effect On Island School

Wheeler Library has reported receiving a letter of thanks for a gift of books to the Mayombong Catholic Mission in the mountainous Nueva Vizcaya province of Luzon in the Philippine Islands.

Four parcels of books from Southern Illinois University material, scheduled for disposal, were sent to the mission late in January in answer to an appeal from Rev. Godfrey Lambrecht, the missionary in charge of the area, who furnished the required transportation fee.

The Rev. Lambrecht writes that he now is broken in health after 32 years of mission work because of cruelties and overwork suffered during World War II when the mission's church, schools, and records were completely destroyed by bombing and fire, obliterating 25 years of work. Seven members of the staff lost their lives during the Japanese occupation.

"When the American GI's liberated us it was just in time," he writes, "because exhaustion was very near. Some hundreds of children flocked to my bamboo school, and it was decided to reopen the college because there was dire need for teachers here and all around in the mountains. Things have now improved and I have been able to erect new buildings. My greatest worry is my library. . . . What I need most of all are books of education. . . . but any book you can send is welcome. . . ."

Wiktör Labunski Appears At First Piano Workshop

Wiktör Labunski, pianist, composer and director of the Conservatory of Music of Kansas City, is taking part in Southern's first piano workshop which ends tomorrow.

Labunski was added to the program as a replacement for Rudolph Ganz, former conductor of the St. Louis Symphony Orchestra, who was forced to cancel his engagement here because of illness in his family.

A native of Poland, Labunski has appeared as soloist with symphony orchestras in Minneapolis, Cleveland, St. Louis, Kansas City and Toronto. Among his best-known compositions are Symphony in G Minor, Piano Concerto, and Duo-Piano Concerto and Concert Variations.

Making his professional debut at the age of 18 in St. Petersburg, Russia, Labunski later became a professor of piano at the Conservatory of Krakow, one of the oldest institutions of music education in Poland. He made his American debut in Carnegie Hall in 1928.

Preliminary plans for the relocation of highway 51 to bypass campus were begun in Feb. 1952.

Schroedel Sneaks Before Relatives

The Rev. Martin P. Schroedel, Staunton, who delivered the invocation and benediction at commencement exercises Sunday evening, June 15, faced a unique situation in that he was speaking before three members of his family who were among 304 seniors graduated.

His son, daughter and son-in-law all received bachelor's degrees. The son, Martin Schroedel of Pinckneyville, majored in mathematics; the daughter, Maxine Hood of Murphysboro, majored in health education, and her husband, Donald, studied sociology.

Rev. Schroedel, pastor of the St. Paul Evangelical and Reformed Church of Staunton, received his master of science degree from Southern only four years ago.

Square Dancing Tuesday On Anthony Hall Lot

Drag out your checked shirts and blue jeans fellas and girls. . . Sing and swing square dancing will be sponsored by Mr. Amos Black of the Mathematics Department, and Mr. David McIntosh of Southern's Music Department on the Anthony Hall parking lot, Tuesday, June 29, from 7 to 9:30 p. m.

In case of rain the dancing will be held in room 202 of the Algeba building.

Music will be by recording and the calling will be done by Mr. McIntosh and Mr. Black. Any students wishing to call the square dances are urged to do so.

Sing and Swing square dancing will continue during the summer each Tuesday night.

CURRICULUM FOR YOUNG STUDENTS NEW AT USC

It is now possible for a six-year-old to attend the University of Southern California.

Under a new curriculum recently established at the university, the toddlers are now eligible to take courses in rhythm, piano, and orchestra.

It is not known what degree (if any) is to be awarded graduates of the course.

BRYANT APPOINTED TO EDUCATION COMMISSION

Dr. Rose R. Bryant, Southern Illinois University Placement Services director, was notified of his appointment as a member of the Commission on International Education for Phi Delta Kappa, professional education fraternity. He will serve two years.

VTI STUDENT KILLED IN VACATION AUTO ACCIDENT

Alva Evans, VTI student majoring in accounting, was killed Tuesday, June 15, in an automobile accident on a gravel road two miles northwest of Wolf Lake.

The accident occurred when Evans and two companions were returning from a fishing trip. A hole on their steep faded, backing a school, and threw the vehicle into the hillside.

Evans, 41, was a resident of Cobden. Funeral arrangements were in charge of the Broadway Funeral Home.

LIBRARY HOURS LISTED DURING SUMMER SESSION

Elizabeth O. Stone, Assistant Director of Libraries in charge of public services, has released library hours for the summer session.

Monday through Thursday, the library is to open at 7:15 a. m. and close at 9:30 p. m. On Fridays, the library will be open from 7:15 a. m. until 4:30 p. m.

The library will be closed all day on Sundays.

PICTURED ABOVE is the auditorium for lecturing which will soon be put into use in the new Life-Science Building. The room will seat approximately 250 students and is equipped with a special type of ventilation. Novel features include a large, built-in projection screen with blackboards which slide over it and a complete movie projection room. Classes in the new building will begin in the fall.

THIS IS SOUTHERN'S first elevator and it is located in the new Life-Science building. Students will not have access to the elevator though, since it will be used mainly for maintenance purposes and for transporting heavy equipment. Part of the extensive fire alarm system is next to the elevator. The building is built completely of steel, brick and cement and fire-proof throughout.

Move Begins To New Life-Science Building

By Bill Hollada
Next link in Southern's huge expansion program—the Life-Science building—is being readied for its opening at the beginning of fall term in September.

This week equipment is being moved into the four-story building which will house the botany, zoology, microbiology, and physiology departments.

Total cost of the building, which was built by the Mayfair Construction Co. of Chicago, is \$1,496,000, while the equipment costs \$227,943, according to Charles Pulley, University architect.

Some present equipment is being moved into the building, but about 75 per cent of the furnishings will be new. Moving in and setting up of the equipment for the four departments probably will take the rest of the summer.

The modern Life-Science building has several special features, including Southern's first elevator. The elevator, however, won't be for students' use, but is to be chiefly for the moving of equipment.

Other features of the new building include modern fluorescent lighting, classrooms with an entire wall of glass, three staff lecture halls (each holding about 60 students), and a large auditorium with a seating capacity of 250.

Another special service of the building are lockers built into the wall. These lockers may be used by students who need to change clothes for field trips or for classroom work.

Graduate students will find special small rooms for their use. Teachers will have modern offices. The building is large enough to accommodate all four departments and their activities.

The building, which is located on Chautauqua Street just east of the Veterans' Housing project, was begun in April, 1951.

Also nearby is a new animal house to be used for breeding and care of hamsters and other experimental animals. Close to it is a sub-station to house transformers for the Life-Science building and also the new library, which is on Chautauqua Street.

Both the Library and the Life-Science building will be heated by tunnels from the University power plant.

The departments which will move to the new building now have offices and classroom space in Alfeld Hall, first floor of Old Main, and part of the gym. Their move will give other crowded departments more office and classroom space.

Life Science building will not be air-conditioned, but it will have a special ventilating system. Its dimensions are 98 feet wide by 237 feet long with a total of 57,865 square feet of floor space.

Next big building project planned by Southern will be a new agriculture building and dormitories to house 480 men.

The dormitories for men will be built on Thompson's Point near Thompson Lake south of the present Veterans' Housing.

The new agriculture building will be built nearby. Estimated cost of the ag building is \$2,600,000. The new dormitories are scheduled to have a capacity of 120. Dining facilities for all the dormitories will be under one roof and will be built so that enlargement can easily be made when more dormitories are constructed.

Community Needs Cooperation For Growth: Brownell

Industry alone is not enough to make a community healthy, says Prof. Baker Brownell, director of Area Services, in the current issue of the Southern Illinois Business News Letter.

"Without a sound economic base a community becomes parasitic or dies," Brownell states. "But without good educational facilities, without decent living conditions, without health or recreational, artistic, or religious development, it also dies as a community."

Brownell, author of a half-dozen books on philosophy and community life, says the first step toward developing a town is to get individuals and cliques to work together.

"The assumption of many an expert that a community performs only one function and has but one aspect, namely the experts' specialty, is fatal," he declares.

The business man or economist assumes that the only problems are economic; the clergyman is likely to say the only need is the church; the teacher says everything depends on the schools, and the coach may say that sports make the town.

"But this segregation of function in respect to the community not only fails to meet the critical problems that the community faces, it tends to disintegrate the community," Brownell believes. "All of these functions, of course, are important. But any one of them alone is worthless."

Chem Professors Design Air Bath

Two Southern Illinois University chemistry professors have developed a thermostatic air bath which has an average temperature deviation of only a fraction of a degree.

Constructed by Drs. Kenneth Van Lente and Elbert H. Hudley after two years of research, the air bath was described in the May issue of the Journal of Chemical Education.

When the thermostat was set at 25 degrees centigrade the air bath maintained an average of only .05 degrees in three days, the scientists reported, and the same control should be effected at any temperature.

The thermostat is inside a square box which has a false bottom containing heating and cooling units. Air circulates around the units through the box, reaching the false bottom through a hole directly behind the thermostat.

A column of mercury in the thermometer rises or falls as the temperature begins to vary, making air-blowing contact with a metal pipe which turns the heating and cooling systems on or off.

Placement Service Finds Positions For Graduates

DEAN BARRINGER, Dongola, who will be graduated from Southern Illinois University in August has accepted a teaching and coaching position in the Dongola High School, according to the SIU Placement Service.

A government major in the SIU College of Education, Barringer is a member of the SIU Government Club and the Arnold Air Society.

ELLIS T. BICK, Hardin, who graduated from Southern Illinois University in June has accepted a position as accountant with the Southwestern Bell Telephone Company in St. Louis, according to the SIU Placement Service.

Bick majored in accounting in the SIU College of Vocations and Professions. He is a member of the University Honor Society and received the Wall Street Journal award.

JAMES V. FEE, Herrin, who graduated from Southern Illinois University in June, has accepted a position as speech teacher in the Marion Community Unit District High School, according to the SIU Placement Service.

Fee, a speech major in the SIU College of Education, has been a member of Pi Kappa Delta, honorary forensic organization, and a member of the Future Teachers of America.

MILDRED YVONNE HART, Murphysboro, has accepted a position as home economics teacher in the Venice High School, according to the Southern Illinois University Placement Service.

Miss Hart majored in home economics at SIU where she was graduated in 1953. She was a member of the Home Economics Club and Kappa Omicron Phi, national home economics honorary fraternity.

WILLIAM LAURENCE JOHNSON, Freeburg, has accepted a position as accountant with the St. Clair Frigate Sales, Salem, according to the Southern Illinois University Placement Service.

A business major in the SIU College of Education, Johnson was graduated in 1953. He was a member of the University Honor Society, Pi Omega Pi, honorary business education fraternity, and Kappa Delta honorary education fraternity.

NORMAN A. REUSCHER, Coulterville, has accepted a position as industrial education teacher in the Edwardsville High School, according to the Southern Illinois University Placement Service.

Reischer has done graduate work in the SIU College of Education.

MRS. JAMES PARKER, JR., Carrier Mills, has accepted a position as home economics teacher in the Marion High School, according to the Southern Illinois University Placement Service.

A home economics major in the College of Education, Mrs. Parker, the former Betty Lou Wall, was graduated in 1953.
