Bribe attempt story delays license work

By John Durbin

Carbondale Mayor David Keene said Wednesday that no new liquor licenses will be issued until changes are made toward strengthening the present application.

Keene said, "We (Keene and City Attorney George Fleerlage) were concerned about the possibility of strengthening the license application when the story of the bribe attempt broke."

The mayor said that now he and Fleerlage have not had the time to complete the work on the application. "But it will continue," he said.

Fleerlage explained that he is working on changes in the application so that each person or persons seeking a liquor license will be required to list all of the stockholders who have more than five per cent interest.

In this way, "we will know all of the owners of a particular license," Fleerlage said.

Fleerlage pointed out that each person or persons are required by law to report any "significant change" in either the ownership or location of a particular license or establishment.

For example, if two persons were approved by the mayor and the city council for a liquor license and then decided to take on a third person as a stockholder, the latter would also have to be approved, after the proposed changes in the application are made, any person or persons seeking a license would be required to list all stockholders and swear that the information in both complete and true. The application would also have to be notarized.

Therefore, if a person or persons were to withhold or falsify required information, they would be subject to having the license revoked.

Part-time employment?

A key question for first quarter students often is whether or not to take a part-time job. Some advice on this question is offered by the coordinator of on-campus employment.

Dick Gregory column

A syndicated column by former SIU student Dick Gregory, now a well-known civil rights advocate, is appearing for the first time today's Daily Egyptian. The column by Gregory, who became well-known as a stand-up comedian before abandoning that career to join the civil rights movement, is being offered to college newspapers for the first time this fall. Gregory drew a crowd of several hundred people when he appeared on campus last January. His column will appear weekly on the public forum page.

Med school endorsed

The president of the Illinois Medical Association has endorsed SIU's plans for a medical school here. He also suggested that more time be devoted to teaching and research at medical schools in order to produce more doctors to meet the state's growing needs.

Gus Bode

Gus says it's not hard to recognize the freshens in the woods; they're the ones with the "got lost!" look.

Aid fund may not be enough

By Margaret Nicely

Some 2,500 students on the Carbondale and Edwardsville campuses are expected to apply for jobs and scholarships this week and administrators of the financial aid program fear that there may not be enough money to go around.

Frank C. Adams, director of the Student Work and Financial Assistance Program, said, "It appears that the large enrollment this quarter is going to put quite a strain on this office. There are more students seeking employment than there are jobs to give them."

More than 15,000 students will be attending classes on both campuses this year under financial assistance plans, Adams said.

A minimum wage hike approved by Campus Senate in January threatened to reduce even further available jobs on both campuses, but Adams said hours have been cut instead in most departments, since there has been no appreciable budget increase to pay the higher salaries, most working students will be spending fewer hours on the job and in some cases making less money under the higher pay scale than they may have before while it went into effect.

Another wage increase under federal law goes into effect during the winter quarter, when hours are expected to be cut even further. Adams said fewer students will be able to get work then.

Applications for student employment are flowing into the office rapidly, Adams said, and "there should be well over 4,000 students working on the Carbondale campus by October." Because of the number of students seeking financial aid this year, new students who have never applied for campus work before and students who are not classified in low-income families must wait until October to apply.

The Student Work and Financial Assistance Office also plans to place some 2,000 students in jobs off campus.

There are more than 200 types of jobs available through the office, but a fifth of all student employees are coeds working as stenographers in campus offices. Highly skilled jobs and jobs relating to particular academic programs are primarily reserved for upperclassmen.

SIU paid more than $4 million to student help last year. Some departments and campus facilities, such as Morris Library and the physical plant, employ more than 200 students.

Adams said students who apply for work may stand a better chance of getting financial aid than some who seek scholarships and grants. Most of the 675 available SIU scholarships and awards have already been approved and granted, and the work office has already committed all its Educational Opportunity grants funds. The number of State Defense Student Loans available is also dwindling fast, he said.

Volume 50 Carbondale, Illinois Thursday, September 26, 1968 Number 3

Falling walnuts, the neutral weather Wednesday, and the gradual discolouration of the leaves are signs that fall is here. As these two observers, and others noticed, there are other signs also, notably the large number of students scurrying across campus trying to match class schedules to building names and numbers—and sometimes getting lost in the woods.

Aw, nuts!

Chancellor MacVicar offers praise to retiring Civil Service employees

Chancellor Robert W. MacVicar congratulates four retiring Civil Service employees at SIU at a dinner honoring them in the University Center. From left, Mrs. Lillian G. Williams of Desoto, George P. Riley of Carbondale, Ardell Crews and Ned J. Hagler, of Carbondale, and MacVicar.

SIU seeking federal grants

SIU will seek federal higher education facilities grants totaling $2 million toward construction of two new classroom-office buildings.

They are a humanities-social sciences building, whose complete construction budget is $8,500,000, and a central classroom-office structure at the Vocational-Technical Institute east of the Carbondale Department of Theatre announces play tryouts

Tryouts for "The Odd Couple," SIU Department of Theatre's first major production of the season, will be held on Friday and Monday at 7 p.m., in the University Theatre, Communications Building. All University students are welcome. This Neil Simon Broadway comedy, directed by Darwin Payne of the Theatre faculty, will be presented October 25-27 and November 1-3.

Correction

State Representative Gale Williams, not State Senator John Gilbert, introduced in the General Assembly in July a bill to permit any student to drive his motor vehicle between his residence and the campus.

Gilbert opposed the bill in committee where it died and is still opposed to it. Gilbert was incorrectly reported on page 3 in yesterday's issue as being the one who introduced the bill. The Daily Egyptian wishes to acknowledge the error.
‘London Echo’ on WSIU(FM) to discuss Negro opera stars

Fenstermaker article printed

J. V. a.m. Fenstermaker, chairman of the faculty in finance in the School of Business, has an article on bank service charge variations in the April issue of the Southern Journal of Business.

Titled “Service Charge Competition on Personal Demand Deposit Accounts,” the article resulted from a survey of the service charges of 547 commercial banks in the St. Louis Federal Reserve District.

Fenstermaker found that banks in one-bank cities tend to have lower charges than banks in multibank cities, and the average service charge in cities increased more than the number of banks.

Fenstermaker received his Ph.D. degree in economics and finance from the University of Illinois, and taught at Hunter College, City College of New York, and Kent State University before coming to SIU in 1966.

Campus activities

Silent movies will be shown at 7:30 p.m. and 9:30 p.m. in the Library Auditorium.

Youth movement creates new black majority

By Dick Gregory

Among the current crop of film offerings is a most interesting movie entitled "Wild in the Streets." It is based on the quite valid statistical observation that 52 percent of the nation's population is 25 years of age or younger. In another decade, 80 percent of the population will fall within that age group. Because I have always believed the moral revolution which is sweeping our country today is not a matter of black against white, it is simply right against wrong. The peace movement has brought this truth out in the open, especially on the college campuses, and has greatly benefited the civil rights movement by expanding moral outrage and protest activity to cover all wrong.

A simple illustration will serve to focus the current youth attitude. It is possible for me to check into a hotel some night and burn to death in my sleep if the hotel catches fire. But I would never check into a hotel which is already on fire with the intention of going to sleep! The young people of America, both black and white, know that this country is on fire and they have no intention of sleeping through the moral revolution. And those youth represent the greatest moral potential in the history of this country, perhaps even the history of the world.

To understand the ferment on the college campus today, you must have some perspective of recent history. When the civil rights movement first began, there were many honest and sincere white kids who wanted a piece of that action but their parents prohibited their involvement. It is like the mother who tells her son that he can't play football because he might get hurt. So the kid becomes an all-American basketball player. He had to get involved in some sports activity and basketball was all mother would allow. In like manner, the white youth who are seeing college administrations and protesting the war in Vietnam today really wanted to be involved in the early days of the civil rights movement. And parents who forbade that involvement fed and nurtured the resentment their kids are expressing now.

White youth all over America today are resisting the oppressor and identifying with the oppressed. It is the reverse of what we black folks used to do. We went from the bottom of our feet to the top of our heads trying to be white. When black folks came to this country as slaves, we didn't wear shoes or good clothing. But we put on the white man's shoes, his socks, his underwear, his shirt and his tie. We even tried to change our physical appearance in our effort to be white. Perhaps we now realize that tassels to cover up our thick lips. Since nappy hair is not a white characteristic, we got processen to straighten out that problem. But every effort we made to impress the white man had no effect on his determination to oppress us.

As a result, there has been a change in attitude. Negroes have developed a new pride in being black. Black folks consider it a badge of honor to be themselves, to be natural, and have rejected the unnatural obsession with trying to be white.

And the new mood of black identity is being shared by white youth all over America. Young white kids are acting colorfully, talking loud, playing their music loud, saying, "What's right is right, baby," and even cursing like black folks. There used to be a white way of crying and a white way of cursing. But today, when it comes to cursing, America is the "mother" country for both white and black youth. Blackness is not a color, it is an attitude. No matter what statistics the census bureau may publish, the youth of America are demonstrating a black majority.

The immediate byproduct of the July disorders at Columbia University was the passage by the U. S. House of Representatives and Senate of a bill which is designed to halt the flow of federal loans and grants to students who participate in serious campus disturbances.

The provisions of the bill call for a mandatory cut-off of federal money to students whose actions "were of a serious nature and contributed to the disruption of the administration of such institution."

The bill further stipulates that students found guilty at a university or college hearing would face loss of federal funds for a period of two years under these conditions:

"If convicted by a court of any crime involving use of force, disruption of campus activities or seizure of college or university property,"

"If he or she willfully refused to obey lawful regulations or orders of university officials."

Over the next three years the federal government will dispense $7.2 billion to colleges and universities in the United States. With an outlay of money of this magnitude, the American taxpayer deserves to receive full measure of effort from the recipient.

For too long, the college student has viewed his college education as a rock-ribbed, iron-bound right with no single person, persons or social structure having the right to abrogate that right. And to a degree, there is a certain amount of validity in that premise—but only to a degree.

A college education as a right is a well-propagated myth and it sounds good, but it isn't true. Attending a university or college is a privilege contingent upon the individual meeting and maintaining the accepted norms of the institution. Those who want need not apply.

The Higher Education bill, which will curb the funding of federal money to campus malcontents, has merit and should be signed. The only students who need be apprehensive about it are those majoring in campus excesses.

Whit Bush
Pollution in southern Illinois

By Don Johnson

"If you go to American City, You will find it very pretty. Just two things of which you must beware: Don't drink the water and don't breathe the air."

Unsanitary and industrial committee on rivers pollution sources. When Department sources have cooperated for flood control. But an allocation of southern Illinois have the standard use of recreation populations of Franklin County and limited parts of Perry, Jefferson, Williamson and Jackson Counties.

Most communities in the area began working on their public water supplies around the turn of the century, according to the Department of Business and Economic Development. These small-town water supplies use impounded surface water and put it through water purification plants.

"Water, water, everywhere; the river by the sea, Yet only fish can thrive."

Water falls and flows in many places in southern Illinois, but the problem is getting it free of pollutants and fit for city drinking water use in various towns.

In inter-city water supplies will be tried with the opening of the Rend Lake reservoir in the Big Muddy River near Benton in Franklin County.

The river will be dammed near Benton to create a reservoir 10 to 12 miles long and 3 to 5 miles wide. This reservoir will have the standard uses of recreation and flood control. But an allocation of 40 million gallons per day will be set aside from the reservoir for water supply for the city populations of Franklin County and limited parts of Perry, Jefferson, Williamson and Jackson Counties.

Most communities in the area began working on their public water supplies around the turn of the century, according to the Department of Business and Economic Development. These small-town water supplies use impounded surface water and put it through water purification plants.

Temperature—high temperature decreases industrial cooling efficiency and encourages algae growth.

Total Dissolved Solids—the sum of all dissolved material in the stream.

Color—usually an indicator of some other pollutant.

Phenols—can give a taste to the water and taste edible fish.

Organic nitrogen and ammonia—these can indicate how recently water has been polluted. Excess ammonia makes it harder to purify water with chlorine.

Detergents—can cause foaming in the water, but have been less of a problem since 1963 and the advent of detergents which can be fully decomposed.

Silt—eventual erosion adds soil runoff to all rivers. The Assistant Secretary of Agriculture reports 700 times as much silt as all other pollutants combined.

"The breakfast garbage you throw into the river. They have for lunch in San Joe."

The traditional method of disposing of municipal sewage is to dump it in a stream and let nature take it. If the amount of sewage is small enough and the stream fast-flowing enough, dilution will be dilution enough and natural decomposition will do a pretty good job on the organic materials. But many of the streams used in southern Illinois do not flow fast enough to properly dilute the sewage. There are 11 towns in the state with full sewer systems but no treatment plants. Thus the primary need is to get treatment plants established in all cities with sewer systems. The primary treatment for sewage has been straining and settling, with secondary treatment consisting of biological oxidation. This was traditionally the final step, but new water standards and stream conditions will make a tertiary treatment necessary. The removal of refractory chemical purification combined with additional filtering.

Another means of easing the problem of city sewage is dilution. Cities on the Mississippi River have been able to give primary treatment only to their sewage before dumping it into the river, depending on the fast flow of the river for proper dilution. But for smaller communities located on sluggish streams which almost cease flowing during a languorous summer, some additional water supply is needed. This can be provided as more water storage and recreation reservoirs are built. The water from these reservoirs can be used to build up stream flows for proper dilution during sluggish summer months, as well as for drinking water supplies and recreation.

"Pollution, pollution, you can use the latest toothbrushes, then rinse your mouth with industrial waters."

A look at a few of the rivers and streams in southern Illinois can point out part of the scope of the problem. According to a survey by the Technical Advisory Committee on Water Resources, several southern water-courses have pollution problems. The Embarass and Kaskaskia Rivers in southeastern Illinois are reported as being tainted with chlorides and sulfates. Much of this is believed to come from mining activities in the area. The Big Muddy and Saline Rivers are known to be well polluted in places by coal mining wastes. Fishing in the rivers varies from miserable to worse.

An additional problem in the Big Muddy River and in Indian Creek in a water county comes from petroleum and the salt water from oil field recovery.

When an oil well is drilled, the bit usually passes through rock formations bearing salt water. If the well is not properly cased, this water can pollute underground drinking water supplies. In the Big Muddy River, for example, the water has to come to the surface and run off, it can also pollute surface water supplies. The state requires leakproof capping of the oil wells for the brine, but if these give way, pollution can occur. The salt water product is usually filtered and flushed more oil out of a well. If improper casing or procedures are used, more pollution can occur at the Dept., Mines and Minerals reports.

"Fish gotta swim and birds gotta fly, But they don't last long if they try."

Fish and birds can live in water that is not up to the most stringent standards. Pure water is better for all concerned. One way the problem of potable drinking water will be met in southern Illinois is through the creation of reservoirs on some of the major rivers. The formation of the Rend Lake formed by a dam on the Big Muddy River above Carbondale is an example. A large-capacity water treatment plant is proposed for the dam site. Treated and drinkable water could then be piped to nearly every community, including Jackson, Perry, Jefferson, Hamilton, and Williamson Counties. Sales of water from the reservoir could be the bond issue to be voted on in November. The budget of the Water Resources Board this would set up includes expenditures of $400 million for water pollution control and $150 million for water storage. The total size of the bond issue is indicated by the size of the proposed solution.

714 SOUTH ILLINOIS
WASHINGTON (AP) — Abe Fortas' critics scorned on a $15,000 lecture fee Wednesday as the Senate plunged into full-scale debate on his nomination to be chief justice of the United States.

Sen. Robert P. Griffin, (R-Mich.), a leader in the fight against confirmation of Fortas, did not contend there was anything illegal about the payment but said it was "clearly wrong in principle."

It was unfortunate, Mansfield said, because it "breaches the extraordinary insulation which must exist between the Supreme Court and other branches of the government and private business.

Senior leaders pushed aside all other business including the $71 billion defense appropriation bill and the nuclear nonproliferation treaty to meet the simmering Fortas appointment head on.

"Rather than keep the Senate in a state of suspense on the Fortas nomination," Mansfield said, "I decided it was better to face up to it now."

Opponents immediately announced they would seek to hold the Senate floor indefinitely against Mansfield's motion to call up the nomination for formal approval.

An Associated Press survey showed the opposition has enough votes to keep a filibustering going.

The warrant is not the $50 fee GM said the one a buyer finds on a car. The warranties do not include the 7 per cent tax and handling charges, considered properly in the price of the vehicle.

The Ford list before increases and well below tremendous markups when they set their prices.

Sen. Gaylord Nelson, (D-Wis.), said Tuesday he has obtained information which indicates the automakers make tremendous markups when they set their prices.

GM said its prices were up an average of 1.8 per cent and Chrysler said its were 2.9 per cent higher.

Officials of Chrysler Corp., which has rolled back its prices the past two weeks after facing smaller increases by GM, said they would study the Ford list before making a final decision on the cost of their new cars. List prices do not include the 7 per cent federal excise tax or dealer's handling and preparation charges.

The Ford increase would be $50 on its "sticker price," the firm said. The sticker price is the one a buyer finds on a car when he visits the dealer showroom, and it includes the excise tax and handling charges. GM said its sticker price increase would be $52, and Chrysler pegged its at $49.

President Johnson assailed the Chrysler price hike last week, but within hours after GM had reported its figures on Monday the President hailed the latter firm's action as improving "the outlook for the nation's prosperity and price record."

One law-maker, however, has charged that the auto industry's prices still are higher than they should be.

Sen. Gaylord Nelson, (D-Wis.), said Tuesday he has obtained information which indicates the automakers make tremendous markups when they set their prices.

American Motors, smallest of the five major domestic automakers, is expected to roll back their price hikes.

Ford, like Chrysler and GM, announced a reduction in its new car warranty coverage.

The company left the power train guarantee at five years or 50,000 miles, whichever comes first, but reduced the rest of the warranty from 24 months and 24,000 miles to 12 months and 12,000 miles.

The warranties will cover first owners only, although if the vehicle has been considered properly maintained, a second owner could get coverage by paying a $25 fee.

GM said its price increases ranged from a reduction of $89 on the Mustang fastback to a hike of $149 on the Continental Mark III.

Parking program raises pertinent question

By Nick Harder

One of the most pertinent questions on the subject of the new parking increases and policy changes at SIU is 'What is the objective of the parking program?'

Carbondale Chancellor Robert W. MacVicar said in mid-August that he hoped the fee increases and other changes would prompt more people to walk or ride bicycles. This has been the only definite declaration of sentiment on parking goals by a major SIU administrator, and it is difficult to generalize about the parking policy of the administration as a whole through certain trends in it can be seen.

The parking study by St. Louis architect George Anselvicious reveals alternatives which denote two possible policy changes: either severe limitation of parking with tighter controls than are prevalent now, or expand the cramped parking facilities to meet even peak capacity needs.

If the administration limits—or cuts back—on the number of vehicles permitted to register at SIU, there has been no indication from any official source on whether parking fees would decrease, or at least, cease to rise as rapidly as projected. For the 1969-'70 school year, the decal fees are expected to be $35 and $65 for red and blue stickers respectively.

If the parking facilities are expanded to meet the demand for parking space, SIU vehicle owners can expect no decrease in the projected fee hikes.

With such an expansion of facilities, parking fees might very well reach the $90 ceiling set by the Board of Trustees in August.

The University's explanation for the large increase in fees seems simple enough on the surface. With state appropriations no longer available for parking lot construction, the University must now start a local revenue fund to build more lots and to provide required reserves for financing revenue bond parking projects such as garages. Specifically, this means an underground garage for the proposed administration building to house 250 cars.

The State Board of Higher Education proposes that the Illinois Building Authority collaborate with state universities in financing parking lot construction. It has set fall, 1969, as a date when all institutions must set up parking fees 'to sufficient amount to meet the predetermined schedule of decreasing state funds participation for costs of parking facilities.'

This means that as state funds for parking are gradually decreased, SIU must proportionately increase their cash reserves for parking maintenance and expansion. SIU has two consecutive biennial periods, between 1969 and 1975 in which to apply for matching funds or partial support from the IBA. In the first period of about two years, SIU will match with the IBA on a 50-50 basis. In the second biennium, the University will furnish 75 per cent of cost construction costs while the IBA will contribute the remaining 25 per cent.

SIU will then have to meet all parking costs itself when the IBA fully draws. During the next year, while SIU is not participating in such financial arrangements with the IBA, parking expansion continues on what affirst seems to be a hunker-skelter basis.

The Board of Trustees recently heard the parking study report by Anselvicious. Its three possible solutions for SIU are basically:

- Adoption of above and/or below surface garages on the campus.
- A shuttle service from distant parking lots yet to be constructed for students and faculty.
- Continuation of the present parking program with either a general expansion of surface parking or a drastic limitation of the number of vehicles allowed to register with the University.

The Board has not acted upon any of the solutions presented to it because it is waiting for further studies to be made. Also, the new changes are not out of line with any parking plan the Board may adopt.

Though no definite predictions can be accurately made on the parking issue, in all probability, students and faculty will have to pay more for parking privileges and face an eventual major policy change in parking rules by the University.

It seems safe to forecast that no radical changes will be made during next school year. After that, no one seems to be making bets.

The new parking fees: a shifting?

ATTENTION

1968 OBELISKS can still be picked up if you hold a legitimate receipt. Bring receipt or I.D. to office. $1.00 added for any terms not paying activity fee last year.

Obelisks will be sold to those students who signed the waiting list in June.

Cost is $2.00 plus $1.00 for each term not paying activity fee.

Office is in Chautauqua Bks. At edge of Ag. Parking Lot

Hours: 1-5 p.m.
Students who work part-time carry higher grade average

Should students take part-time jobs their first quarter at SIU? Yes, if they want to, according to William French, coordinator of on-campus employment.

“Employment counselors used to advise students to wait one term before getting a job,” he explained, “but all studies show that working during the first term is not detrimental to grades. In many cases, it helps the student learn to budget his time. It’s also a good way to meet people.”

French pointed out that student workers at SIU carry a slightly higher grade-point average than non-workers.

On-campus jobs range from clerical to farm work. Students may work up to 30 hours a week, 40 in emergencies and during special events.

Undergraduates earn from $1.15 to $1.80 an hour with automatic 10 cent an hour increases when the student has worked 1,500, 2,500 and 3,500 hours. Merit increases of 5 cents an hour can be earned for outstanding performance each six-month period, beginning July 1 or Jan. 1. Also, a student with previous experience in his job must be given a 10 cent an hour increase for each year of experience up to a two-year maximum.

“One problem with the student work program,” Mrs. Millicent Swift, personnel officer, says, “is that a student, having turned in his application, thinks our office will call him as soon as we find a job to suit him.”

“Because we have names of more than 10,000 students on file, it is impossible to sort through all of them every time a department requests a worker. Instead, we list all openings on cards and match it with the first qualified student who comes in. So if we can’t find a job for a student immediately, he should keep checking with us.”

The SIU student work program, one of the largest in the nation, employs nearly 5,000 students at a given time and pays them a total of more than $4 million annually.

“Providing financial aid to the most people in the best way is our main purpose,” French said. “We have to have available work for all who need it. To do this, we must live within our budget and cannot compete with wages in the professional world.”

Most students work about 20 hours a week and at the average salary of $1.25 an hour can earn enough to pay half of each school year’s expenses. Some students pay all their expenses by part-time jobs.

Spring quarter, 111 students were honored for having worked more than 3,500 hours at SIU. Eight had posted over 5,000 hours. This is equivalent to 125 40-hour work weeks or about 2 1/2 years of actual job experience, which can prove invaluable when looking for a job after graduation, French stressed.

“SIU has a very, very successful and workable program. You get the full impact when you see students graduating who couldn’t have afforded it without working,” he concluded.

Library schedule

incorrectly given; revision reported

A revised schedule of hours for Morris Library has been issued. The schedule given in the Tuesday, Sept. 21, edition of the Daily Egyptian was incorrect.

The correct hours are as follows: Monday through Thursday, 7:45 a.m. to midnight; Friday 7:45 a.m. to 11 p.m.; Saturday, 9 a.m. to 11 p.m. and Sunday, 2 p.m. to midnight.

The hours for use of the reserve reading room are: Monday through Friday, 7:45 a.m. to midnight; Saturday, 9 a.m. to midnight; and Sunday, noon to midnight.
Otis B. Young has been able to keep Otis B. Young, an SIU physicist who retired last month, away from his old laboratory. The 68-year-old educator still visits his old lab on campus daily to keep up with research projects underway and talk with former colleagues and students.

Young's teaching and research interests date back to when he was a student at the University of Mahlon Loomis, an inventor who left you more time to devote to Chicago, a city it is with SIU has been fully utilized, thanks in part to his work on a campaign he launched for the formation of the Southern Illinois Airport Authority, which developed in 1946 after he had studied and reported on local airport needs for some seven years. Young was the Authority's first commissioner.

Young resigned his department chairmanship in 1953 to get back to his major research interests. Those studies of cosmic radiation led him deeper into more urgent everyday confrontations with the facts of atomic life, so he launched the first radiological defense courses in southern Illinois and went to the Nevada atomic bomb proving grounds in 1957 as a member of the Civil Effects Test Group.

This primitive Aaron Phillips painting of New Salem focuses on the Rutledge mill erected in 1825 by the father of Ann Rutledge. At the right is the Offut store where Lincoln obtained his first job. Also among other Phillips paintings now on exhibit is the SIU Museum.

Four deposit boxes

SIU Post Office installs drive-ins

SIU Post Office has installed "drive-in" deposit boxes for campus, metered and stamped mail. Primary purpose of the service is to provide a drop-off point other than the main post office for offices where mail is not ordinarily delivered or picked up, but the boxes may be used by anyone who finds them convenient, said service foreman Richard King.

Mail deposited is picked up at 3 p.m., 3 p.m. weekdays and at 8 a.m., Saturday.

The units were purchased, painted and installed Sept. 13 in front of Anthony Hall, at the Personnel Office at 805 Elizabeth St., on Campus Drive behind the Wham Building, and at the parking lot exit at Marion and Grand Avenue.

Thomsen endorses med school plans

Philip G. Thomsen, president of the Illinois Medical Association, Wednesday publicly endorsed Chancellor Robert MacVicar's plans for using the University of Illinois Hospital at Springfield for the purpose of increasing the output of medical school graduates in the state.

Speaking at the weekly meeting of the Carbodine Rotary Club, Thomsen said there is a growing need in the state for more doctors and that better use should be made of current facilities.

"I am sure we need another medical school here at SIU," he said, "but we need to make the better use of the facilities that are already established.

Chairless room greets professor

A bare classroom greeted the chairman of the Illinois Medical Association's Medical History 330 for their opening day of classes.

Edward Wagenknecht, associate professor of history, went to Pullman Hall in University Hall to discover that no chairs had been furnished, according to the office manager of the registrar's office, the miss-oc-ccu-

Variety of positions accepted by Home, Family graduates

Seven 1968 master's degree graduates from the Department of Home and Family at SIU have accepted positions, according to Betty Jane Dan-son, department chairman.

Those placed are: Nicole Reid Coward, intructor, teaching at Bradley University; Janis Mackey Land of Herrin, teaching at Adrian College in Michigan; Barbara Ahring Rice of Joliet, home economist with the Dairy Council, Houston, Tex.; Patricia Melott of Herrin, teaching at Marion College; Roger Han nan of Grand Chain, mental health aide and creek bed slably water, of the State Department of Mental Health, Springfield; and Barbara Cofer of Venniges, home advisor in Perry County, and

Carolyn Gass Hardimon of Fraktin, homemaker teaching at, Belleville East High School.

Robert E. Schellenberger has been named chairman of the Department of Management, according to Dean Rob-ert S. Hancock of the School of Business.

Schellenberger joins the SIU faculty after five years at the University of Maryland, where he was an associate professor of business administration.

He also has taught at the University of Wisconsin-

sin, and was a research assistant at the University of North Carolina.

His business experience has included work with Libbey McNeil and Libby of Janesville, Wis., as an industrial relations manager as a consultant to the North Carolina Memorial Hos-

Mexican students burn buses in riots

WASHINGTON (AP) - The House Commerce Committee, on the third time around, requested by the mayor of a busing that could make possible television coverage among Richard M. Nixon, Hubert Humphrey and George C. Wallace.

But even as it passed this busing, the fear of skepticism in some quarters about the U.S. Attorney General's investigation of violence, said he was kidnapped by the White House Commerce Committee but a vote on a bill that would make possible television coverage among Richard M. Nixon, Hubert Humphrey and George C. Wallace.

But even as it passed this busing, the fear of skepticism in some quarters about the U.S. Attorney General's investigation of violence, said he was kidnapped by the White House Commerce Committee but a vote on a bill that would make possible television coverage among Richard M. Nixon, Hubert Humphrey and George C. Wallace.

The equal time requirement of the bill opening the way for the Democratic and Republican nominees cleared the Senate this year, leaving a decision on what to do about Wallace up to the networks. This version made it past the House committee but a vote to reconsider last week brought the bill back and opened the door to approval of an amendment designed to give Wallace an equal chance to appear on the same program with Nixon and Humphrey.

A Republican-backed bill that would have blocked final action at that time but the modified bill was approved Wednesday.

Rep. William L. Springer of Illinois, ranking Republican member of the committee who offered that motion, for the past several days has avoided reporters who wanted to question him about reports he was acting in behalf of Nixon.

The bill that would take part in a debate with Humphrey but not in a three-way affair with Wallace, Humphrey has indicated he would go along with a three-man appearance, President Gustavo Diaz Ordaz has repeatedly accused professional agitators and Communists of leading the demonstrators. The students have admitted that outsiders took part in the demonstrations, but they said efforts were being made to discourage such "help."

Police reported Mexico City was "under control."

Newspapers published photographs of Czechoslovakia-manufactured machine guns that police said were confiscated after an eight-hour battle on the campus of the National Polytechnic Institute.

Congressional Commerce Committee approves TV presidential debates

WASHINGTON (AP) - The House Commerce Committee, on the third time around, requested by the mayor of a busing that could make possible television coverage among Richard M. Nixon, Hubert Humphrey and George C. Wallace.

But even as it passed this busing, the fear of skepticism in some quarters about the U.S. Attorney General's investigation of violence, said he was kidnapped by the White House Commerce Committee but a vote on a bill that would make possible television coverage among Richard M. Nixon, Hubert Humphrey and George C. Wallace.

But even as it passed this busing, the fear of skepticism in some quarters about the U.S. Attorney General's investigation of violence, said he was kidnapped by the White House Commerce Committee but a vote on a bill that would make possible television coverage among Richard M. Nixon, Hubert Humphrey and George C. Wallace.

The equal time requirement of the bill opening the way for the Democratic and Republican nominees cleared the Senate this year, leaving a decision on what to do about Wallace up to the networks. The students have admitted that outsiders took part in the demonstrations, but they said efforts were being made to discourage such "help."

Police reported Mexico City was "under control."

Newspapers published photographs of Czechoslovakia-manufactured machine guns that police said were confiscated after an eight-hour battle on the campus of the National Polytechnic Institute.

Keene said he was doing everything under the legal advice of the city attorney.

At the beginning of the meeting, the mayor announced he was going to make a statement during the informal session. Councilman Frank Kirk asked the mayor to read the statement during the formal session. He did.

Keene's statement explained what action he has taken to assure the failure of the alleged bribery offer. The mayor explained Wednesday that he had not planned to make a statement at the meeting. But the city attorney advised him to do so, he said. Keene said he and Ficlerage drew up the statement Tuesday afternoon.

Cross country team

Tough schedule

With an even 1-1 record the SIU cross country team is looking forward to a tough and rugged schedule, according to Head Coach Lew Hartzog.

The Salukis lost the opening meet against Miami of Ohio 20-23, but rebounded to take Illinois 25-30.

"They are very young and none of them have very much experience," Hartzog said. "I really was surprised that the boys beat Illinois, but I was very proud of them."

Only one of the runners is an upperclassman, junior Melvin Hohman, Nashville, III. Hohman placed eighth in the Miami meet with a time of 22:34, but took a third place finish against Illinois with a 20:19 performance.

Freshman Gerry Hinton, St. Catherine, Ontario, has out-classed all of the runners in both meets with times of 21:12 against Miami and 20 even against Illinois.

"Hinton was a 40th 2 mile in high-school, his chances at Southern are outstanding," Hartzog said. "He has the natural physical and mental desire to be in the same calibre as Oscar Moore."

Another member of the team is sophomore Glenn Ujiye, another Canadian, who placed sixth against Illinois with a time of 20:46, Bobby Morrow, East St. Louis, and John Hohn, Syracuse, N. Y., both sophomores, will be first year members of the varsity squad. Freshmen Bill Backenzos and Glenn Blackstone round out the squad.

The team will participate in seven dual meets and five other events this season and will try to improve on last season's 0-4-5 5-ate.

Headlining this year's home schedule will be powerful Kansas on Oct. 12 and Murray State on Nov. 9.

"Kansas is always good even with miler Jim Ryun gone," Hartzog said. "Murray has two real good boys. One was ineligible last year, but he is eligible now and he is really great."

SIU plans to participate in the Illinois Intercollegiate Championships, which are open to all colleges in Illinois. Southern will be making its first appearance in that meet since 1961.

"It's difficult to pick any one team to say that that particular one will be the stiffest test of the season," Hartzog added. "All of them will be tough."

"Any way you look at it the going is going to be tough," Hartzog said. "We have a good bunch of kids and I'm sure that they'll give it all that they've got."

The complete schedule:

Oct. 5, at Kansas State; Oct. 12 Kansas; Oct. 15, at Southeast Missouri State; Oct. 19 at Western Illinois; Oct. 26 at Tennessee Invitational, Knoxville, Tenn.; Nov. 2 Murray State; Nov. 16 at Central Collegiate meet, Chicago; Nov. 25 at NCAA Championships, New York City; and Nov. 28 USTFF.

On the cover

Pictured left to right: Bobby Morrow, Mel Hohman, John Hohn, Gerry Hinton, Glenn Blackstone, and Bill Backenzos joust across SIU's cross country track.

DAILY EGYPTIAN September 26, 1968
Patience — NCAA scholarships are coming

By Dave Palermo

The magic word is patience. It is that truism which followers of SIU football must possess in waiting for a winning team at Southern. Not only patience during the first few games of the season when Southern faces some rough competition, but patience for the next three years or so when SIU finally puts the 95 recently acquired NCAA scholarships to work and begins playing in a new football stadium.

For the last couple of years SIU football mentors have been trying to get players with good collegiate potential but all they could offer were scholarships that required the student athlete to work and a football stadium that sat 13,000. Few jumped at the chance when other schools were offering much more in terms of financial aid and prestige.

With a new stadium planned and about 95 NCAA scholarships to work with, the hardships in recruiting high school athletes and scheduling top-notched competition should be lessened considerably; already Oklahoma State, Bowling Green and Marshall have made commitments to schedule Southern in 1973, which shows the program is headed in the right direction.

But the SIU football coaching staff is not sporting a crying towel. The young men from Kansas State have been talking of a winning season this year all during the summer and they are not letting the 33-10 loss to Louisville in the home opener dampen their optimism.

Head Coach Dick Towers and his assistants have established a team that comprises a number of players who could make some big conference schools and hopes are alive for the first winning football team at Southern in seven years.

While Towers hasn’t got a great deal of depth on the squad, he does have some outstanding players on the team in Carl Mauck, Bob Hudspeth, Doug Hollinger, Barclay Allen and Roger Kuba.

Mauck, billed as a possible All-American by the coaches in the preseason evaluation of the team, is one of the finest linebackers in the country and captains the defense for Southern. A senior from McLeans¬boro, Mauck played his most outstanding game against Tulsa in last season’s 16-15 upset victory.

Hudspeth, who was billed as a possible All-American last season, before he suffered an arm injury, highlights SIU’s weakest area, the offensive line, at his tackle position. The JC transfer from Kansas in quick and agile for his 6-4 270 pound frame and has the experience to go with it.

Safety and split end Doug Hollinger is Mr. Versatile on the team and played every backfield position for the Salukis last season. His 54.9 punt return average and 22.0 kickoff return average were among the tops in the nation.

Allen specializes in kicking. He did well with a 40 yard punting average last season. He also doubles at the quarterback spot.

Kuba is Mr. Reliable. An excellent blocker, he is a sure bet to get that necessary yard or so for the big first down. Last season he gained 191 yards in 60 attempts and was only thrown for losses amounting to 13 yards.

With Tulsa, Lamar Tech, Dayton and Drake coming up in the next few weeks after Saturday’s open date, football fans may have to wait a few weeks for the young and inexperienced Salukis to come around. The remainder of the schedule lists Youngstown, Northern Michigan, Tampa and Southwest Missouri State and by then Towers hopes to have the players operating as a team and the chances for a few victories will increase.

By the time Youngstown University journeys to McAndrew Stadium the Salukis should be a much improved ball club and by the time the new stadium and high school athletes begin to get wind of the 95 NCAA scholarships, losing football at Southern may begin to be a thing of the past. All it takes is a little patience.

Five Salukis make Olympic team

By Barb Leebens

SIU athletes have been very busy this summer preparing for the stiffest competition of their athletic careers—the Olympic try-outs.

In all areas of the Olympic teams Southern fared well. Five SIU students or SIU graduates have won berths on the various U.S. Olympic teams.

Leading the contenders is Larry Kristoff, a 1966 graduate of SIU, a standout wrestler at Carbondale Community High School and SIU. Kristoff has compiled a record of 217 victories, 13 defeats, and seven ties since he began as a senior in high school in 1960. To add to this admirable record, Kristoff has won 10 national championships; placed first in the Pan American Games in 1967, second in the World Games in 1966 and placed third in the World Games in 1965 and 1967.

The Olympic Games are not new to Kristoff who made the 1964 Olympic team. In the 1964 Olympics Kristoff was quartered in the early rounds. No American wrestler was able to gain the finals in the freestyle wrestling events.

Kristoff will represent SIU in the heavyweight division of the freestyle wrestling team. Senior Bob Roop who worked out with Kristoff this summer in the SIU Arena gained a berth on the Greco-Roman wrestling team this past weekend, also in the heavyweight division.

Last season at SIU Roop, a native of Lansing, Mich., compiled a record of 9-3-1. Earlier this summer Roop won the Greco-Roman trials and placed second in the AAU trials.

As to the chances of both winning a medal in the Olympics, retired SIU wrestling coach Jim Wiklander commented: "I think that Larry has a very good chance to win a medal or first place—Roop worked very hard in practice and has impressed many of the coaches. They now think he may have a good chance at a medal."

Roop posted a 2-1 decision over Greg Wojcikowski, Toledo, last weekend.

"He did not look too good," Wiklander said, "but he knew his opponent had to beat him twice to make the team. He just waited for the other fellow to make a mistake, and then took him down for the points that he needed."

A holder of both the indoor and outdoor SIU shot put records, George Woods, a 1967 graduate, recently won a place on the U.S. track and field team.

Woods placed first with a throw of 68 feet and 3/4 inches beating two of the best shot putters in the country—Randy Matson and Savoy Haggard.

"This is one SIU athlete we feel can win a gold medal," SIU track coach Lew Hartzog commented, "if Woods can beat Matson, the holder of the world shot put record with a toss of 70 feet 7 inches, three times in one year then we feel he has a good chance at it."

At Southern Woods compiled a long list of impressive accomplishments. He won the NCAA indoor shot put in 1963 with a throw of 61 feet and 3/4 inch; placed second in the NCAA outdoor meet in 1963 and fourth in 1964 after an illness.

"He is one of the most decorated athletes I know," Hartzog said, "when he came to SIU he weighed 205 pounds and through work with weights he now weighs 305."

The Los Angeles Rams have invited Woods to play professional football after the Olympic games. Woods has not made a decision as to whether or not he will sign once he has not played football since high school.

Another Saluki, Ross MacKenzie, in a member of the Canadian track and field team. With a time of 46.5 MacKenzie placed second in the quarter mile and he will lead off the 1600 meter relay.

"MacKenzie stands a good chance for a medal," Hartzog said, "He is a good strong runner and shows lots of determination.

Although MacKenzie ran a 46.4 in the NCAA this year he did not place. During the season MacKenzie placed second in the Arkansas Relays in the mile relay with a time of 41.9, and third in the mile relay with a time of 41.2.

Four women of the SIU gymnastic team made the trip to Long Beach, Calif. for the trials. Terry Spence, an SIU freshman who graduated from Carbondale Community High School in June, made the U.S. Olympic team.

Terry finished seventh in the competition in California to make the squad of 10 members.

The other women gymnasts making the trip were Joanne Hashimoto, Sue Rogers, and Linda Scott. Joanne finished 12th and did not make the team. Sue injured her left knee on the first vault of the first day of trials. Linda failed to place.

"Terry didn’t have a bad event, all 16 events were very well," Coach Herb Vogel said. "Joanne’s first day of competition is what stopped her from making the team.

Athletic expansion aided by student fees

By Dave Palermo

Somewhat university decisions that most affect the student population are made during the summer. The administration cracked down on modern American college life in the summer of 1966, it made widespread changes during the following summer, and K.A. was temporarily suspended during the summer of 1967 and placed on college probation.

Most, if not all, of the rule changes made while the students were on campus were displeasing to them, making the summer quarters an annual season of discontent.

This summer, however, the SIU Board of Trustees picked up a few lost student admirers when it approved 250 NCAA scholarships for 1968-69. The athletic expansion program will mean an increase in the caliber of athletics at Southern in the years to come.

Coaches will now be able to offer prospective SIU athletes the same aid as another big name college. With this, it will be easier to schedule the top competition in the country and the cost of traveling will be taken care of more efficiently.

To say that this decision was long awaited would be an understatement. It was two years ago that the SIU Study Commission on Intercollegiate Athletics began sending out questionnaires to students and faculty members asking their opinions on expanding the athletic program at SIU. The response was pro-expansion.

About three months ago, the Board decided to expand the program but did not give the necessary details as to how many NCAA scholarship grants they would allow the athletic department and how these grants would be distributed among the various sports. The athletic committee requested 250 NCAA’s for the current academic year with an addition of 10 for each of the next two years so that the total by 1971 would be 250.

The final decision made by the Board called for a minimum of 220 for the next five years. Any increase in scholarships in the next five years is thus not specified.

A fee of $10 for each full time student will pay for both scholarships and a portion of the building of new physical facilities such as a football stadium, recreation center and completion of the second phase of the SIU Arena. The initial proposal made by the athletic committee called for a $3.50 fee for each full time student but the final decision of $10 did not cause any vocal disagreement among the student body.

There has been no decision as to how the scholarships, which provide for tuition, fees, room and board and $15 a month, will be divided among the various sports. It is assured, however, that football will get at least 95%.

In addition to the NCAA fee will partially finance the building of a new football stadium, to be completed by 1971. Plans for the complex have not been released and there is still some question as to the seating capacity of the stadium. There is talk that it would be somewhere near 27,000.

The importance of a football stadium to the success of a team is not to be denied. When queried about the expansion program and building of the complex most of the coaches questioned placed the stadium as equal in importance with the scholarship increase.

When the plans are finally drawn up, prints of it will be sent to high school players and possible opponents as a means of recruiting time high school players and scheduling top-notch competition.

Olympics: a sporting drama

By Barbara Hartung
(Copley News Service)

The modern-day Olympic Games are more than a series of athletic events, they are dramatic pageants which capture those magnificent human achievements which make them unique in the utmost to excel.

Through the years competitors who have shown the world their human side, their qualities, their courage, their hopes and their fears mirrored in international settings. To match the high level of the competitive situation, the host countries have outside themselves to present a showcase for the throngs of visitors who now attend the Olympics. Highly organized and already well established as the greatest competitive ground for the amateur athlete, such was not always the case.

After nearly 1,500 years, a few European nations and the United States sent amateur athletes in 1896 to compete in the first revived modern Olympic Games held appropriately in Athens, capital of the originating country.

The Olympic Games, always an expensive event for the host country, got off to a good start when a merchant prince of Alexandria deposited nearly $400,000 in the Olympic committee's account for a 60,000-seat stadium, providing a setting for the 3,000 competitors and officials who attended.

That year, 1896, a devoted and the high level of the named Spiridon Loues from the Greek island of Samos who became the winner of the marathon, considered the top event by the Greeks.

So elated were the Greeks hearing a nation so were leading the marathon that the Emperors Constantine and George left their royal box at the stadium to personally escort him across the finish line.

Loues became a national hero and was showered with gifts and prizes.

Each competition since has been marked by excitement, challenges and disappointments. A marathon runner in one year...
Hartzog owns winning record

By Barb Leebens

When his team at Northeast Louisiana couldn't compete against Negroes because of the segregation problem, Lew Hartzog decided to accept a job as cross country-track coach at Southern.

Since coming to SIU, Hartzog's record speaks for itself. In the fall of 1965, Hartzog's team went undefeated in 10 meets and won the National Association of Intercollegiate Athletics title, the IAAC and the National Junior NCAA championships.

At Northeast Louisiana his team won 14 straight dual meet victories in an undefeated season. It was that year that the Louisiana Sports Writers Association picked Hartzog as "coach of the year." The coach of the year award was the third in as many seasons for Hartzog.

Born and raised a Texan, Hartzog attended Texas A&M college and graduated from southwest Missouri State College in 1949.

After five years with the Marine Corps in World War II, Hartzog became a track coach, in the hometown of Harry Truman—Independence, Mo.—for three years.

He coached at Rocky Ford, Colo., High School for three years winning the state championship in 1956 after an unbeaten season. His 1955 team lost the state title by one point. In 1957, Hartzog coached at Wheat Ridge High School in Denver, Colo.

Towers says mononucleosis not cause of Mauck's trouble

SIU Football coach Dick Towers announced at a press conference Wednesday that tests on linebacker Carl Mauck showed he did not have mononucleosis.

Mauck was hospitalized Saturday when it appeared that he was overcome by the 85-degree heat.

Mauck's chances for an All-American bid will be somewhat dampened unless he can resume playing in the Tulsa game. Mauck has been released from the hospital, but tests are continuing to determine his specific problem.

Towers said that John Quilien had dislocated his thumb, one of the most serious of the injuries suffered in Saturday's game.

Workouts were light on Monday and Tuesday and will begin to pick up by the rest of this week and next in preparation for the Tulsa game Saturday, Oct. 5.

Towers said that his main concern was the defense at secondary and he planned to work on that in the upcoming practices.

Towers said that he was disappointed with the performances of the quarterback group, but not to the extent that he is really worried about it. He thought that it was a below par performance from both Jim McKay and Tom Wins.

Terry Goatham will replace Jim Malone at center as Malone's legs are weak from an injury.

Towers praised tackle Bob Hudspeth, Roger Alba, Quilien, Bill Grainger, and Leonard Council for their football action against Louisville.

1968 Olympic Games to sponsor 19 sports

The 1968 Olympic Games will sponsor 19 sports, one less than in the 1964 Games in Japan. The Japanese included judo. Such varied events as horseback riding, boating and shooting are scheduled for Mexico City.

Feature This Golf Special

For The Rest of Season for $1.00

You May Play Continually from 1-10p.m.

ALSO

- Miniature golf
- Driving range
- Paddle boats

Marching band performances

By Margaret Nicely

The Marching Salukis, who performed their first halftime show of the quarter Saturday, arrived on campus a week early to get in shape for the football season. Their schedule includes performances at SIU home games, St. Louis Cardinals game Oct. 20, a Green Bay Packers game Dec. 7, and the SIU-Southwest Missouri game Nov. 27 at Busch Stadium in St. Louis.

During their pre-season workouts, band members spent some 15 hours reading musical scores to be used in these performances and in last Saturday's home game against Louisville. They also worked on a football halftime routine which they performed on a ballroom floor at a banquet in St. Louis Monday night.

While SIU athletes were scrimmaging, the band was marching four and a half hours a day the week before school opened. Much of the rest of their time was spent in impromptu sectional rehearsals.

SIU to receive St. Louis red carpet

SIU students and faculty will receive the red carpet in Downtown St. Louis during Gateway Classical weekend, Nov. 22, 23 and 24.

Kicking off SIU weekend in St. Louis is the football game between the Salukis and Southeast Missouri State Bears. The teams will clash in Busch Memorial Stadium at 5 p.m. Friday, Nov. 22.

Following the game is a football dance in Kiel Auditorium featuring Bob Kahan and the "In'N' Men Show and Revue. The SIU Athletics and Activities offices in combination with Downtown St. Louis, Inc. have planned lodging and entertainment at reduced prices for the remainder of the weekend, Nov. 23 and 24.

Fred Huff, sports information director at SIU, said complete and detailed plans are still being made for the students.

Ex-Saluki Jim Hart, who is currently calling the signals for the St. Louis Cardinals of the National Football League, completely dominates SIU passing records.

His records include most attempts in a game (47 vs. Ball State in 1965), attempts in a season (267 in 1964) and most attempts in a career (671). He also has the record for the most completions in a game (21 vs. Ball State in 1965), most completions in a season (511 in 1964) and most completions in a career (283). His 327 yards against Northern-Michigan in 1964 stands as a record for Southern against its overall total of 1,594 yards during the same season and his career yard total of 3,779.

Hart holds the record for the most plays in a game with 48 against Ball State in 1965, most plays in a season with 504 in 1964 and most plays in a career with 770.

Hart's 307 yards against Northern-Michigan in 1964 stands as an SIU record, as does his 1,362 total yards during the 1964 season, his career total of 3,384 yards is also an SIU mark.

Thank You
Muchas Gracias

KSU ‘gives’ SIU 5 coaches

Kansas State University’s greatest gift to SIU is a football coaching staff. Five of the six football mentors now plying their skills here had Kansas State University scribbled somewhere on their application blanks.

Bob Mazie, SIU’s defensive line coach, is the lone member who never walked the Kansas State campus either as a student or coach.

Dick Towers, who came to Southern two years ago before accepting the head coaching job last year, led the KSU invasion.

Towers graduated from KSU as a two-sport star in 1953 and spent six years in the prep ranks before moving on to Hutchinson Junior College and guided the Dragons to a 9-2 record and the Kansas Juco crown. The following season he moved to K-State as a backfield coach and served there for two seasons before coming to Southern.

While attending KSU, where he won the “Most Inspirational Athlete” award in 1953, he roomed with no other than SIU’s Offensive Line Coach, Ron Marciniak.

Tom O’Boyle, who coaches defensive linebackers and ends for Southern, also played football at KSU with Towers and Marciniak and earned four varsity letters in the sport from 1950-54.

Jerry McGee, also a product of you-know-where, played his collegiate ball for Duke where he was voted “Most Inspirational Athlete” in 1961. He coached freshman football at Kansas State two seasons ago before coming to Southern last season.

Mark Bolick completes the KSU domination of the football staff. A graduate of KSU in 1966, Bolick stayed on to assist McGee with the K-State freshman team.

Both Bolick and McGee journeyed to Southern last year and joined the rest of the KSU Alumni.

As a collegiate, Bolick played the 1963 and 1965 seasons with Northern Oklahoma Junior College before completing his playing career with K-State in 1966. He was the conference’s leading scorer at Oklahoma and the 10th leading pass receiver in the nation. Mazie, who despite his background detects no prejudice from the rest of the staff, was still not a stranger to the staff on his arrival in 1967. He was a high school teammate of Marciniak’s at St. George High School in Pittsburgh from 1949 to 1951.

Mazie came to SIU from Southwestern State College in Weatherford, Okla., where he was line coach for two seasons. He played his college ball at Wayne State in Pennsylvania and earned four varsity letters from 1953-57.

Top athletes

The 1968 Olympics will field the most competent athletes in the history of sports. Each year world records are set in nearly every sport, and many of the record holders will lead the competition in Mexico City next month.

Southern freshmen football players

open season with Evansville Oct. 6

SIU’s freshman football coach Mark Bolick will take on a stiff test when a large group of freshman gridders report for equipment.

Bolick will have just two weeks to prepare them for the first of the six scheduled games.

The freshmen will try to improve last year’s 3-3 mark when they open their campaign Oct. 6 at Evansville.

The yearlings defeated the Aces 39-0 last year.

Except for defensive line Coach

Bob Mazie (right) the entire SIU football coaching staff either attended or coached at Kansas State University. From left: Ron Marciniak, Dick Towers, Jerry McGee, Mark Bolick, Tom O’Boyle and Mazie.

SALUKI CURRENCY EXCHANGE WELCOMES YOU!!!

SIOUX FALLS MALL

Campus Shopping Center
Lamar Tech—A lack of experience due to a loss of lettermen via the graduation and transfer of several players who made the Southland Conference this year, will hurt coach Vernon Glass' chances of improving on last year's 2-3-3 record. Senior speedball Kenny Montgomery gained 587 yards rushing and 430 yards passing from his running back position, and when all fall on the defense where eight of the starting eleven have graduated, there is little hope for the quarterback duties are ability of coach McDowell and Jim Jackson. Drake's biggest key in the Writers' chance of improving on last season's 6-3-1 record as most of the backfield will be returning. Ohio State's Bobby Madden, who averaged 5.7 yards rushing last season, and Bernie Koesa, who averaged 4.9 yards, will run with the ball along with linebackers Mike Wilson, who is tabbed as a definite professional prospect, and Gary McCoy and Bert Fortuna both can throw the ball well. Wallace's biggest problem in recovering from his first losing season (4-9) in his 14 years at Drake seems to be his defense, which allowed an average of over 27 points a game last season. Youngstown-Southern's biggest key this season is the defense with freshmen who aren't even listed on the team's roster. Standout fullback Dick Adipoff is gone and the signal-calling duties will be shared by two sophomores.

Saluki appropriate mascot for SIU

Jim Deering and Dick Zents. Linebacker Chuck Joseph will key the defense with Dave DelSingore, who caught 23 passes for 441 yards last season, sparking the offense.

Northern Michigan—The gridders from Marquette will probably give the Salukis a traditionally tough contest with Little All-American halfback Louis Holton and halfback Jim Lindstrom, along with fullback Ken Kynes giving the Wildcats a potent scoring punch. Rich McCarthy will handle the signal-calling duties for coach Roille Dieck. Defensively the Wildcats are hurting except for a strong secondary keyed by John Otsimat, who twice gained All-American status as an honorable mention.

Tampa—A new stadium, a new coach (Fran Curci) and 33 returning lettermen give the Spartans spirit for a winning season after a dismal 2-7 mark last year. Jim Del Gaze will handle the quarterbacking job with wingback Wallace Jones giving the squad a potent scoring threat. The offense can do the job for Curci the defense will more than measure up with 17 lettermen returning, along with Ed Nizawakwiczi, who was last season's starting QB, shifting to the defensive halfback position.

Southwest Missouri State—The Bears may well improve on last season's 4-5 record with 27 lettermen returning. Coach Jim Menitis will be out to average last season's 19-0 loss to the Salukis. The backfield of Ardie McCoy at tackle, Jay Cummings and halfback Mike Rowell, an All-Conference choice, will all be returning. The quarterbacking job is a tossup between Hunseker and Bart Hager, a pair of talented sophomores. Tackles John Shomeaker and Clark Kyoni will key the defense, along with all-conference halfback Fred Harle.

Old stadium used

Beginning and ending ceremonies, as well as track and field events, at the Olympic Games in Mexico City will be held in the enlarged main stadium built for the Pan-American Games in 1955. It seats 80,000. The new Aztec Stadium seats 98,500.
