Carter: Peace in Mideast inevitable

Meeting aimed at starting peace with Israel, Palestinians
PARIS (UPI) — Former President Jimmy Carter held unprecedented talks Wednesday with Palestinian Liberation Organization Chairman Yasser Arafat and said afterward "peace is inevitable" in the Middle East.
President Francois Mitterrand of France also participated in the 30-minute discussion at the Elysee Palace aimed at starting peace dialogue between Israel and the Palestinians.
"President Mitterrand and Chairman Arafat and I had a discussion about the Mideast peace process, about how it might be promoted and how it might be rejuvenated," Carter told reporters.
"We discussed the various delays that have taken place in recent years and we had a common view that these delays might now be overcome."
"I think it is necessary in the Middle East, I think peace is inevitable in the Middle East. The problem is among the leaders who don't adequately represent the yearnings of the people — in Israel, the Palestinians, the Syrians, the Jordanians, and the Libyans — for peace."
"This is a process that needs to be stimulated in the European Community, the United States and among the Middle East parties themselves," Carter said.
Arafat said only that "the United States and France are trying to unblock the peace process."
"Security was extraordinarily tight around the presidential palace. Police sharpshooters stood on surrounding rooftops and traffic was blocked in adjoining streets, causing long lines near the central Place de La Concorde.
Some 100 people responded to a call by Jewish groups to demonstrate outside Arafat's hotel, said police.
Forrest Morning, Foreign Minister Roland Dumas told reporters before the meeting that the three-day session "could be useful and happy" and that France hopes "to unblock the Middle East peace process."
Abu Iyad, Arafat's No. 2 Man, told Radio France Internationale the PLO charge in Paris for the meeting because of "the courageous position" of Mitterrand's government on the Palestinian question.
Arafat was to meet with Dumas before his talks with Mitterrand and Carter, but that session was postponed until Thursday evening, PLO sources said.
Diplomatic sources said Carter, architect of the 1978 Camp David peace accord and the 1979 Egypt-Israel peace treaty, unofficially is acting as an envoy of Secretary of State James Baker, who is eager to start talks between the Palestinians and the Israelis.

Bush lauds clean air, but has reservations

President wants sections toned down
WASHINGTON (UPI) — President Bush said Wednesday the clean air bill passed by the Senate is a "major step forward."
"There is no question that the Senate bill is a major step forward before administration officials promised there would be efforts in the House to water down some sections.
With the spotlight shifting from the Senate, Midwest lawmakers on the House Energy and Commerce Committee struggled to find support for changing the House version of the legislation to help their region pay for acid rain cleanup.
In a meeting with Senate leaders, Bush called the Senate bill — approved 89-11 Tuesday night — a "major breakthrough" in balancing environmental needs and economic growth, but said more work is needed to ensure the bill that finally reaches his desk will clear the air without taking too high a toll in jobs.
"There is no question that the Senate bill is a major step forward, " he said, "but it is only a first step and more progress is being needed if we're to achieve the balanced bill that I feel is essential."

March across campus marks anniversary of King's slaying

By Michelle R. Walker

"Dr. King was one of the greatest moral leaders America has ever known."
"Black and white America are in trouble," Conner said, "Martin's dream has turned into a nightmare."
"Conner said the only way out of the nightmare is to wake up. This became the theme of the event: "Wake up!"
Other speakers included Gajef McNeil, the adviser for Black Affairs Council, Craig Jackson, the adviser for Inter Greek Council and Antonio Washington, the president of Black Theoghenes Association.
"The topic of the speeches centered on the importance of the more than 100 different cultural groups at SIUC coming together and working toward a common future."
Mindy Holmes, the IGC chairperson for the event, said that she sees a lack of cooperation among student groups at SIUC.

USG passes rate hike for health insurance

By Richard Hund

The Undergraduate Student Government approved a resolution Wednesday night to raise student health insurance rates next year.
Blue Cross/Blue Shield insurance rates under the new resolution would increase from $44.59 to $72.57 in fall and spring semesters and from $26.75 to $45.29 during summer semester.
USG's proposed figures cover the 1990 fiscal year; they anticipate inflation, growth on the 1990 fiscal year's basic plan, additional benefits and enhancements to existing coverage.
These would include increasing accidental death and dismemberment from $3,000 to $10,000 and allowing out of area claims on major medical coverage. The resolution differs from those proposed by Health Service Director Sam McKay because it raises annual coverage limits from $30,000 to $100,000 and eliminates psychiatric claims.
McKay's proposal, which includes psychiatric care and annual coverage limit increases up to $150,000, would raise fall and spring semester fees to $109.50.

Census error forces personal delivery

Mailing mistake may increase responses

By Rob Coné

An error by the U.S. Census Bureau, which has kept 1.5 million census forms from being delivered by mail, may inadvertently help those census takers who will have to hand-deliver some forms to eight of the 21 largely rural counties served by the Carbondale district office.
The 1.5 million forms were not delivered because the U.S. Census Bureau failed to assign post office box numbers to the mailings. Census officials have said the forms must now be hand-delivered.
Max Sullivan, manager of the Carbondale Census Bureau district office, said the glitch will be an advantage because hand-delivery is "a lot better than mailing. Sullivan said his current figures show a 60 percent return rate for hand-delivered census forms as compared with a 40 percent return rate for mailings.
Because the bulk of Southern Illinois counties are "very rural," said Sullivan, census forms were hand-delivered in 13 counties.
La Salle star is honored a fourth time

LOS ANGELES (UPI) — Lionel Simmons of La Salle, who became the third-leading scorer in major college basketball history this season, Wednesday won the 14th annual Wooden Award.

The 6-foots forward, the lone player in Division I history to collect 3,000 points and 1,000 rebounds, averaged 30 points and 11 rebounds to push the Explorers to a 20-2 record, the best mark in school history.

Simmons, expected to be high pick in June’s NBA draft, had already been named United Press International Player of the Year, the James Naismith Player of the Year and Eastman Kodak Player of the Year.

"I never thought I would win," Simmons said after he was presented with a bronze 20-pound trophy at the Los Angeles Athletic Club. "My coach (Speedy Morris) had a cross in his hand and he was praying the whole way here from Philadelphia.

A thousand sports writers and broadcasters voted for the award, given to the nation’s top college basketball player. To be eligible, a player must have at least a 2.0 cumulative grade-point average. Simmons finished with 1,174 points on a 4.0 vote. He was followed by Oregon State’s Gary Payton (831), Syracuse’s Derrick Coleman (816), the late Hank Gathers of Loyola Marymount (532), Larry Johnson of NCAA champion Nevada-Las Vegas (489) and Louisiana State’s Chris Jackson (455).

Shortly after Gathers’ sudden death March 4 during the West Coast Conference Tournament, the Wooden committee elected to include him among the finalists.

Each was two for three with an RBI.

Junior Jan Agrich, sophomore Billy Ramsey and junior Angie LeMonnier contributed with two hits.

Sophomore Dede Darnell got the winning decision for the Dawgs. Darnell gave up two runs on six hits. She retired 13 straight before getting into trouble in the sixth inning.

Junior Lisa Robinson came on in relief to shut down the Panthers’ threat. She pitched 1 2/3 innings and gave up no runs and no hits.

"Eastern is a feisty ball club. You can see that in each game the way they kept coming back at us. They led us up against the ropes a couple of times," Saluki coach Kay Brechtel-auer said. "We really had to work for these two wins today.”

The Salukis took a commanding 5-0 lead in the fourth inning when they collected four runs on three hits.

LeMonnier led the inning off with a single. She was chased home by an RBI triple by junior Shannon Taylor. Taylor was driven in by Hallaway’s triple down the right field line. Freshman Angela Finkler slapped an RBI single to left field that brought in Hallaway.

The Panthers attempted a comeback in the bottom half of the sixth when Lynn Ramsey and Rose Dirks singled and scored, but Robinson came in for the Salukis to put the fire out.

In the second game, the Saluki bats cooled a bit, but the four runs on five hits combined for four Panther errors was enough for the Dawgs to pull away.

Taylor was hot with the bat. She went 3-for-3, scored twice and had an RBI.

Ramsey contributed with two crucial RBIs in the fifth inning to give the Dawgs a 3-0 lead.

Saluki starting pitcher Jennifer Brown was roughed up a bit in the last inning. The Panthers scored two runs to tie the game, 5-5.

Brown worked her way out of the second and then breezed through the rest of the game when a walk to the sixth when a walk

Valvano decision may come sometime this week

RALEIGH, N.C. (UPI) — North Carolina State basketball coach Jim Valvano met with administrators Tuesday night in the smallest settlement he could accept from the university.

But despite that and a vote by the NCSC Board of Trustees to remove him, Valvano still holds faint hope he can return to lead the Wolfpack next season. Woody Webb, a Raleigh lawyer, said “We’re holding our breath here from the standpoint of the university.”

The university’s Board of Trustees voted 9-3 March 21 to remove Valvano. Monday, the University of North Carolina system Board of Governors gave N.C. State permission to sue Valvano for breach of contract.

Valvano, however, has made it clear he wants to remain, the coach is a realist about the situation.

"We’re holding out a glimmer of hope that he could continue, but it’s a glimmer," Webb said. "He’s tired of it. He’s frustrated and somewhat disappointed in the attitude of the university.

The university’s Board of Trustees voted 9-3 March 21 to remove Valvano. Monday, the University of North Carolina system Board of Governors gave N.C. State permission to sue Valvano for breach of contract.

"Apparently the university can envision no set of circumstances under which they want Jim Valvano as basketball coach,” Webb said.

Valvano’s contract has a buyout clause that says the university must pay him $500,000 if he is fired for any reason other than a felony conviction or involvement in a major NCAA violation.

The clause also states Valvano must pay the university $500,000 if he leaves the job he has held for 10 seasons.

Valvano’s problems started last year when C.D. Spangler, president of the UNC system, issued a report showing academic policies had been “lax” to accommodate Wolfpack basketball players.

That report led to an investigation by the NCAA that found 14 violations, including players selling complimentary game tickets and basketball shoes. The NCAA placed N.C. State on two years probation and banned the team from the NCAA Tournament this season.

At the March 21 trustee meeting, Larry Montieth, the university’s interim chancellor, gave a report showing that of the four players Valvano has coached at N.C. State, 39 had a grade-point average of less than 2.0 on a 4.0 scale.

The university will use such information in any legal battle, claiming Valvano broke his contract by allowing “academic” progress by his players.

Another problem for Valvano was his handling of star Charlie Shackleford, now with the New Jersey Nets. Webb said he took more than $60,000 from two men during the 1987-88 season.

Shackleford has denied allegations he used some of the money to pay teammates to play poorly to help gamblers.

Men golfers set for busy week of play

By Kevin Simpson

Stark, S.C. —

The Saluki men’s golf team has its hands full with two-day tournaments in the next six days.

The SIU-E Invitational begins Thursday and will conclude Friday with the sixth Annual Missouri Intercollegiate Invitational Golf Tournament covers Monday and Tuesday.

The Edwardsville Invite will be played on two separate golf courses. Action begins Thursday on the Belk Park golf course and concludes Saturday on the Valley Country Club. Both courses are par 72 and are located in the Edwardsville area.

Coach Lew Artzog said his team was possibly playing too much golf early in the season. He is looking for an improvement after giving the players a day off to get back into the mental part of the game.

"They had really been bogged down in golf," Hartzog said. "Sometimes when you’re playing that much golf, you’re helping yourself from a couple of positions but aren’t from another.

"Some times you bog down with a few bad habits," Hartzog added. "And you need a day or two to cool down and regroup. I feel like we’re ready to go. We’re getting ready with our confidence.

The Salukis will use the experience on The Oak Golf Course in Corsicana, Texas to benefit them at the Missouri Valley Conference Championships May 8 and 9.

"I will use the results of the tournament to determine who will play Monday and Tuesday at the Missouri Intercollegiate," Hartzog said. See GOLF, Page 19

Coming at you

Junior Saluki pitcher Al Levine works out at practice Wednesday at Abe Martin Field. Levine, a junior walk-on, leads the Saluki pitching staff with five saves.

"I’m not going to talk about the situation," Valvano said. "I’ve never been talking about the situation in the last couple of weeks. I’ve been talking about basketball.

"He’s talking with his tax people and financial consultants to see what kind of figure we could live with. We don’t have it now. That’s what we’re waiting for. I’ll meet with (Valvano) later today and probably have a figure in mind later this evening and give it to the university.

"Valvano’s contract has a buyout clause that says the university must pay him $500,000 if he is fired for any reason other than a felony conviction or involvement in a major NCAA violation.

"The clause also states Valvano must pay the university $500,000 if he leaves the job he has held for 10 seasons.

"Valvano’s problems started last year when C.D. Spangler, president of the UNC system, issued a report showing academic policies had been “lax” to accommodate Wolfpack basketball players.

That report led to an investigation by the NCAA that found 14 violations, including players selling complimentary game tickets and basketball shoes. The NCAA placed N.C. State on two years probation and banned the team from the NCAA Tournament this season.

Gadafi calls on Moslems to release Western hostages

CAIRO, Egypt (UPI) — Libyan leader Moammar Gadafi called Wednesday on Moslems holding Western hostages in Lebanon to release their captives on the occasion of Ramadan, the Moslem month of fasting. Tripoli Radio reported. Kidnappers are holding 18 hostages, including eight Americans, hostage in Lebanon. While he pressed Secretary of State pancakes while Gadafi's call for the hostage releases. "The higher call for the hostage releases," he said. Kidnapped senator is threatened with death

BOGOTA, Colombia (UPI) — Drug lords threatened Wednesday to "execute" a senator kidnapped in Medellin and said they would bomb an exclusive neighborhood in Bogota in their renewed offensive on President Virgilio Barco's government. In a communiqué released to the news media, the traffickers said they would kill Sen. Federico Estrada Velez, 64, of the ruling Liberal Party unless authorities freed two cartel thugs wanted outside of Medellin.

Estonian president is warned by Gorbachev

MOSCOW (UPI) — Soviet President Mikhail Gorbachev warned Estonia to amend a declaration that it is breaking away from the Soviet Union or face a response similar to Moscow's tough stand in Lithuania. Estonian President Alar Roessler told the Estonian Parliament that Gorbachev issued the warning during a "long telephone conversation" with him Tuesday. The Estonian foreign ministry said.

More surrender in Bagram prison siege

LONDON (UPI) — More hard-core prisoners surrendered to authorities, leaving only a few to carry on an inhuman takeover of their overcrowded jail that has left at least 60 people injured and one dead, officials said Wednesday. Officials said a further 13 prisoners had surrendered, and the British Broadcasting Corp. said another nine had also left the building.

U.S.-Soviet talks may focus on Lithuania

WASHINGTON (UPI) — Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze, both appearing anxious to avoid a collision on Lithuania, opened three days of talks Wednesday expected to set a date for a superpower summit. As he waited for Shevardnadze at the State Department, Baker said there were signs "of some distance" between the Soviets and the Lithuanian leadership, but that he wanted to find out why a Soviet Interior Ministry official had called a meeting Wednesday with the Lithuanians.

Senate confirms Ryan as thrift regulator

WASHINGTON (UPI) — The Senate confirmed the nomination of Timothy Ryan as the nation's top thrift regulator Wednesday despite a haranguing by Democrats who charged he lacked the experience to deal with the savings and loan crisis. Ryan's admitted casual use of marijuana and one-time experiments with cocaine in the early 1970s was barely mentioned and even his chief opponent, Sen. Donald Riegle, D-Mich., said it should play no part in the decision of the Senate.

Jackson lauds King; calls for D.C. statehood

WASHINGTON (UPI) — Jesse Jackson Wednesday used the 22nd anniversary of the assassination of slain civil rights leader Martin Luther King Jr. to call for statehood for the District of Columbia. "In the spirit of Dr. King we shall escalate the struggle for New Columbia," Jackson said. "The statehood movement continues in the tradition of Dr. King's struggle to expand democracy to all of the people."
**Student party focuses on participation**

Kuehne: Student input essential to success of USG

By Richard Hund

Students need to tell the Undergraduate Student Government what they want or the government becomes inoperable, Lissa Kuehne, the presidential candidate for the Student Party, said.

The Student Party, running against three other parties in the April 11 Undergraduate Student Government election, will serve the students better than any other, Kuehne said.

“We want to do what’s best for the students,” she said. “That’s why we’re for the student, by the student.”

Kuehne, a 21-year-old junior in marketing from Gillespie, currently serves as a seat-side senator, a chairperson on the Committee of Internal Affairs, a disabled student service attendant, and a Delta Zeta member.

As a CTA member, Kuehne said she has worked with concerns of many registered student organizations.

“If any RSO’s have problems, they come to the CTA,” she said. “I’ve dealt with a lot of student problems before.”

Students need to tell USG what they want or the government becomes inoperable, she said. Her overall goal includes making student organizations more aware of USG in the future by going to registered student organizations for input as well as the entire student body.

Lissa Kuehne

Kuehne said USG becomes inoperable when students don’t tell their government what they want.

“Students think USG has no say in anything,” she said. “They don’t realize what it can do for them.”

“A big problem in the past was waiting for students to come in instead of going to them,” Kuehne said. “I think we, as a senate, have been at fault in the past (because) we were just as much at fault. The senate as a whole is guilty of that.”

Students would learn more about USG with more widely distributed information.

“I’d really like to see a weekly USG column in the D.E. (Daily Egyptian) because students don’t know what’s going on exactly,” she said.

Kuehne said the importance of student turnout matters because students don’t want to vote, “but they want the government to do things.”

“Obviously we want to win, but even if they (the students) don’t want to vote for us, we want them to vote,” she said.

By Richard Hund

Ed Walthers said he will solicit student opinion and act on student response if elected vice president under the Student Party April 11.

He said the Undergraduate Student Government needs to ask students attentively about their concerns instead of waiting for students to bring them up.

“You can’t sit up there (in the USG office) and expect students to come to you,” Walthers said. “Students are busy too, and if we want to know what they want, we have to go out there.”

“We want to work for the students because we are the students’ representatives to the administration and the public,” he said.

Walthers, a 22-year-old senior in education from Kankakee, currently represents the College of Education as a USG senator.

He also serves on the academic affairs committee as well as the general educators subcommittee of the faculty senate. He recently was appointed to the mass transit committee and currently is working on a campus shuttle service.

Walthers also has been working on optional teacher-evaluation forms that are available and available to students.

He also said he led the bill this semester to defeated the housing fee increase.

Runningmate Lissa Kuehne and Walthers have the most collective experience of any other party in dealing with students, he said, and have picked issues that deal with increasing student input.

By Richard Hund

Ed Walthers

Walthers said students are often too busy to come to USG with their concerns and it is important to seek out their input.

“The entire platform deals with student involvement,” he said. “The main thrust is student involvement, and we’re willing to go out and get that student involvement.”

He also would like to see double the amount of voter turnout on last year, in which more than 2,000 students voted.

“How can we say the Undergraduate Student Government represents the student body if only 10 percent (of the student body) votes?” Walthers asked.

“With student support, the Undergraduate Student Government has powers greater than what people realize,” Walthers said.

**Student platform and goals**

- Provide a public relations campaign for SIU-uc to show what the University
- Provide student awareness of USG with public agendas, a Daily Egyptian weekly column, and participation in raw student orientation
- Establish student control over the Student Center
- Provide equality for all Registered Student Organizations in terms of finances and space distribution
- Concentrate administration and effort in recycling
- Create awareness and records of Disabled Student Services
- Support cable television on the campus housing
- Continue seeking alternatives for the parking problems
- Support student opinion concerning football

Palestinian uprising is multi-faceted

If Dean Molch's letter of March 21 is intended to ridicule the Palestinian intifada, perhaps Mr. Molch should examine the causes that lead to this uprising.

For over 20 years the Palestinians in the occupied West Bank and Gaza have been living under the harsh Israeli military rule. Confiscation of Palestinian land has exceeded 52 percent of the West Bank and 30 percent of Gaza. Palestinians are frequently arrested and detained for up to one year without charges or trial, and then subjected to torture. The Palestinian press regularly is censored and its editors subject to imprisonment and deportation. An inequitable system of taxation is enforced where by money collected from Palestinians is used to maintain the Israeli army and to build Jewish settlements on confiscated Palestinian land.

Vicious forms of collective punishment, such as house demolitions, curfews, closure of universities and schools, travel restrictions and tree uprooting, Israel's "Iron Fist" policy (as described by Israeli government officials) is strikingly similar to South Africa's apartheid. It is only with the presence of the Israelis that the Palestinians express their defiance and rage against the injustice and suffering inflicted upon them for decades.

The intifada is a result of Palestinian frustration with the continued denial of their basic human rights and the lack of progress in the "peace process." Israel's response has been to blame, malign and kill Palestinian civilians.

In defending the Israeli position, Mr. Molch has resorted to the all-familiar cry of "anti-Semitism." We are not talking anti-semitism here; we are talking international law and human rights. Until Israel observes these, it deserves to be condemned by the international community—Haltem El-Zahrawi, sophomore, political science.

Fast forward: Rider receives new equipment, but students use terminals to play video games

When the University installed new IBM PS/2 computers in the Faner computer lab, I was happy. Now students want to make some of the best personal computer equipment available to them for free, and I think that the University would be wise to make these computers available for free. The funds on them is not only a waste of computer time and power, but it also disturbs students working on serious projects. The sound effects and bright displays are concentration breakers, especially when you consider how tightly packed the terminals are now.

The University should have installed fifty Nintendo Machines, maybe even a few TurboGrafics-164's or a Sega Genesis or two. The University would have saved Rider hundreds of dollars on hardware suited for more than the serious game player. If you want to play games, go to the arcade. Let us compute in peace.—Chuck Sanders, senior, sociology.

Bicycle helmet cushions fall, saves day for rider

On March 21 I grabbed my mountain bike and started to head out the door for class. It was a perfect spring day free of ice, rain, or any other adverse conditions which made me feel like I needed a helmet. With modern tools such as these, one would think learning would be an easier task. Unfortunately, however, when I saw that the majority of these expensive, state-of-the-art machines were being used for playing video games, I thought, "Huh?" I didn't get me wrong. I own both a Nintendo Entertainment System and a portable Nintendo Game Boy.

When the University installed new IBM PS/2 computers in the Faner computer lab, I was happy. Now students want to make some of the best personal computer equipment available to them for free, and I think that the University would be wise to make these computers available for free. The funds on them is not only a waste of computer time and power, but it also disturbs students working on serious projects. Opinion & Commentary

Proposed tuition cap: no sure fiscal cure-all

UNIVERSITY student representatives indicated earlier this week that the tuition increase for next year is the current year's tuition rate, but that was later explained by the state legislature is that the student body, since it had not been consulted by the state legislature, should expect to see a lower tuition rate.

On the surface, it looks like a great plan. Anything to save the student some bucks, right? But the plan merits serious consideration. The student representatives met with the Illinois Student Association to express their support of the ISA's endorsement of a state bill that would freeze tuition levels one year at all public universities. ISA Field Representative Brian Monahan said, despite the fact that students and the general public supported the two-year tax increase installed by the General Assembly last year, tuition is still in Illinois colleges.

He also related that the general public feels a college education is becoming entirely too expensive. This also true. In fact, after all, concerns over growing education costs consistently ranks near the top of the list for public concerns.

MONAHAN then went one step further, comparing us with the General Assembly's cut in state funding to the situation facing struggling financiers. These fiscal officers have become addicted to tuition hikes as an answer for all financial needs. "Just like any other addicts, they need their hands tied so they can go cold turkey," Monahan said.

Monahan said his group had been hesitant to take on the problem because university boards of regents and boards of trustees have set the tuition hikes in their individual institutions since fiscal 1977, but with escalating cost, it felt the need to intervene. He said since this time, tuition rates have risen at an average of 12 percent annually, while the consumer price index and a number of other economic indicators have risen only 6 percent. This discrepancy in funding obviously has the potential to keep some students, particularly those from lower- and middle-income families, from getting the education they need. IsS, felt the need to intervene.

SO WHAT'S the problem? This solution works great in theory, but so do a lot other things. The bottom line is that this solution to the problem of funding higher education would be nice, but it just isn't practical or realistic.

By fiscal tying the hands of the administrators, we don't allow them any budgetary leeway. What happens if the state legislature won't approve the education allotments recommended by the Illinois Board of Higher Education? What happens if federal appropriations for education don't measure up to expected levels? Or grants and public donations aren't as bountiful as they have been in the past?

WHAT HAPPENS when the funds dry up and there's nothing left to turn to? Where are "addicted" administrators then supposed to make up the slack? There are no magic money wands to wave to pay the price tag attached to higher education. Should they cut into programs and services or possibly cut scholarships or departmental funding? Should the quality of education in Illinois decline because of a cash flow problem? Absolutely not.

We should strive to attain the highest level of literacy and education for our people. Educated people are the backbone of any democratic society. Because of this, state and federal governments should be more fiscally responsible and involved in the educational process. We must cut those state and government appropriations to take the burden from already strapped students. Until that time, however, the present system is the best way to go, tuition hikes and all.
CENSUS, from Page 1

while the eight remaining counties were delivered by mail. The Census Bureau has several thousand forms that will be delivered in the eight counties where previous deliveries have not been made by mail. But, he said, I would not know until the mail (truck pulls up how many we have to deliver.

The eight affected counties are: Williamson, Jackson, Franklin, Randolph, Jefferson, Saline, Clinton and Marion.

Sullivan admitted that it is cheaper to mail the forms, but he said the high-delivery rates is he is expecting to get because as the distribution of hand-delivered forms should be delayed the annual work's hours he workers are accounted for.

"They will get more hours," said Sullivan. But it won't have to be done as many," he said the glpich will also be to his advantage because Regulations will reduce the workload in May when we go to people who haven't returned forms.

The biggest part of my budget is (used for) non-response follow-up," he said. "If I'm required to make six attempts to reach non-respondents, If I can get a good percentage (of the forms) addressed forms back, I can save money.

Sullivan said it costs the bureau $15 to $20,000 a day just for follow-up surveys conducted in the Southern Illinois District.

Sullivan explained that he looks for additional savings by canceling the various canvassing operations.

As part of the census bureau's "undeliverable clean-up" operation, Sullivan said surveys will hit the streets soon to verify addresses that don't match or aren't found. Surveys will visit nursing homes, campgrounds and other types of groups quarters or non-residential domiciles. He said that while the workers are completing these tasks, he will have them hand-carry the census forms in complete addresses.

A spokesman for the U.S. Census Bureau district office in Peoria by definition his district-and all the other districts in the state except southern Illinois has been thrown a slight curve by the glitch.

Unlike the Carbondale district, Don Leadliff of the Peoria office said he was not geared up for hand-delivery. He said he estimated the agency must get between 27,000 and 30,000 forms to hand-deliver.

"Southern Illinois is largely a hand-mail operation, but the rest of the state is mail-out, mail-in," Leadliff said. He said he had people on a list ready to hire for hand-delivery, "but down south they are all hired and working."

The Peoria district covers 12 counties and 285,000 households in west-central Illinois, Leadliff said. He said he expected to begin hand-delivery by the end of the week.

A spokesman of the U.S. Census Office at Illinois office was Westchester a suburb of Chicago while it was not known how many forms needed to be hand-delivered in Illinois.

"We don't have exact numbers," said Marilyn Sanders of the regional office. "In developing mailing lists for the largely mail-out, mail-in census, attemps were made to obtain accurate addresses so the mail could be delivered. With nearly 90 million addresses in the list, some errors were made."

The regional office covers Illinois, Indiana and Wisconsin.

Alf, from Page 1

changes made as we go through the House," Fitzwater said.

Among other concerns with the Senate, White House officials cited:

- Provisions to phase out ozone-destroying chlorofluorocarbons by the turn of the century. Officials said the administration did not want to engange in an unilateral U.S. pursuit at a time negotiated international agreement for greater cuts was in the works.

- Sections seeking to reduce carbon monoxide emissions during the summer.

- Measures allowing environmental groups to sue the Environmental Protection Agency to force emission reduction actions the agency has failed or refused to act on.

USG, from Page 1

and summer semester fees to $65.75.

Blue Cross/Blue Shield claims it lost about $57,000 on SIU-C as of March 27, 1990. The company has not asked for any increases since 1987 and must continue to lose money at some point in time, McVay has said previously.

The Graduate and Professional Student Association was planning to vote on the proposal next Wednesday, and the item will be presented to the faculty at the Board of Trustees meeting the following day.

After the meeting, several students from the campus' east side complained that they were not contacted by their representative senators, which he is a senior in criminal justice at the University of Illinois.

Blake, Penny Felton and John Nugent-regarding the health

poisonation, leaving acid rain as the last major hurdle.

The main controversy centers on efforts by Midwestern lawmakers to get "cost-sharing" legislation that would provide assistance for pollution control equipment to reduce emissions from coal-burning power plants.

The Midwesterners held marathon closed-door meetings Wednesday and last week Tuesday night and all day Wednesday in an attempt to draw up a cost-sharing compromise.

Two students hurt in crash

By Chris Walka

Two University students were hospitalized in St. Louis after being injured in a two-car crash early Wednesday morning. Carbondale Police said.

John Zedella, 21, a junior in criminal justice, was transported to St. Louis University Hospital from Memorial Hospital of Carbondale following the accident. A spokesperson from the hospital said Zedella is in critical condition.

Daniel Gibson, also a senior in journalism, is being hospitalized at Barnes Hospital. No comment was available from Barnes on Gibson's condition.

Art Wright, public information officer with the Carbondale Police Department, said the crash occurred at 2 a.m.

Wright said a car driven by Steven Griss was on Poplar Street when it apparently was struck by the car driven by Gibson on West Cherry St.

Wright said the Gibson's car, travelling on West Cherry failed to stop at a stop sign, broadside the car on Poplar.

The names of the remaining victims are John Commend, 21, a passenger in the car Griss drove.

A spokesman with Memorial Hospital of Carbondale said Griss and Commend were treated at the hospital and were released.

A spokesperson with St. Louis University Hospital said Zedella was listed as in critical condition. The spokesperson was not elaborated on the extent of Zedella's injuries.

March, from Page 1

and that the purpose of the march was to encourage everyone to work together to increase our strength as a country, the American Peace Project showed that "we will never forget the power of unity and peace. Fight the division of hate with these words." Speakers reminded the listeners that King, who was awarded the 1964 Nobel Prize for Peace, died for his cause of promoting peace and unity.
Science major receives top employee award

By Dale Walker
Staff Writer

Michael Pence advanced from washing dishes to scaling up a lab at Edwards Air Force Base, where mold samples fresh from the space shuttle were tested in January.

The biological science major was invited to lecture at the National Museum Auditorium of Kingsolver's latest novel, "Animal Dreams," and at Arizona State University. Pence was among the first five space shuttle astronauts at SIU-C and Ames Research Center in California.

Michael was told that he was one of the six finalists for the award, he said. After hearing the persons who nominated the five other candidates for the award speak of their nominees so highly, he said, "what other people nominated did is definitely important. I'm kind of surprised."

When Michael told of the things he had done, that was surprising.

"Last June we worked with the crew, we taught them the theory behind what we were doing," Michael said.

"What we were doing was seeing if a certain bread mold exhibited the same daily cycles in space as it did on Earth," Michael said of the experiment for which he waited on the ground at Edwards AFB to gather the samples from the shuttle.

Michael said his plans for the future include a field studies program in the Bahamas this summer and then grad school.

The Student Employee of the Year contest was part of the National Student Employment Week, which runs from April 1 to Sunday.

Research policy to be voted on

By Eric Reyes
Staff Writer

Procedures for investigating researchers who allegedly falsify information will be noted on by the Graduate Council at 8 a.m. Thursday in the Student Center Mississippi Room.

The research misconduct policy and procedures, formed under the research committee, defines research misconduct as an act of deception, distinct from error, and the misconduct identified by the committee includes falsification of data, plagiarism and misappropriation of other's ideas.

The research committee said there is already a research misconduct policy, but this one was laid down by the legal department, and the research committee is seeing if it is all right.

Sid Miller, Graduate Council chairman, said the committee was developed to ensure the integrity of research at the University and so that research is conducted in an ethical and appropriate manner.

The research committee said there is an obligation to fund- ing agencies as well as scientists.

The drafting policy says the policy applies to everyone involved in funded or unfunded research activities at SIU-C.

There is also an amendment being proposed to the policy on doctoral planning that has been an ongoing issue of the Graduate Council for the last three years, Miller said.

Miller said the policy tries to determine how doctoral programs should be evaluated and what criticisms should be used.

Three of Kingsolver's books, "Holding the Line," "Homeland and Other Stories" and "The Bean Trees" are available at the Women Studies Library.

Professor wins award for outstanding service

By Wayne Wallace
Staff Writer

Nobody has to recruit Donald D. Paige when something needs to be done. He usually volunteers. This attitude along with his service to University students made Paige the choice for this year's Service to Student Affairs Award.

The service presented annually to an individual who has contributed in a significant way to Student Affairs programs and services, who has had an extraordinary impact on the lives of students and who has earned the respect of students and colleagues alike.

Paige, professor of curriculum and instruction, has sponsored international students from as far away as Nepal and Thailand to come to SIU-C. By his own count, he has provided personal advisement for 16 freshmen in Project Magic, a one-on-one orientation program for new students.

Already into his second term as president of the Faculty Senate, Paige also serves as faculty adviser to one student organization and one fraternity, and now he says he can't wait to sponsor a third.

Paige has spent nine of his 24 years at SIU-C overseas, establishing teacher training colleges and developing elementary education programs for Botswana, Nepal and Thailand.

Paige recently found out that he's been nominated to set up elementary math programs in Pakistan.

"If I get it, I'll go," Paige said.

Paige said most of math programs he initiates abroad are funded by the U.S. government through the University and carry a $2 million price tag.

In Nepal, aid was distributed to teachers throughout the country, and Paige supervised broadcasts of one-hour programs on teaching techniques.

"In the western part of that country, there were no roads whatsoever. We walked everywhere," Paige said of Nepal.

In Thailand, Paige had headquarters in Ram Kham Haeng, a university with a student population of one million. The broadcasts were done over television.

While overseas, Paige came into contact with many students and even sponsored a few as international students at SIU-C.

Since the inception of Project Magic in the Office of Student Development, Paige has volunteered as a faculty sponsor, and for one reason, he said.

"It means I get to meet more students," Paige said. "I like to interact with students. That's where the fun is."

"It's a super program for freshmen, especially for those who are a long way from home," Paige said.

Paige is one of the founding faculty advisers for the 2-year-old Elementary Education Student Organization, which has raised more than $31,000 for a scholarship fund via telefunds and bake sales.

Paige has been faculty adviser to Tau Kappa Epsilon Fraternity since 1972, when he first met the post. Paige himself never joined a fraternity while in college.

Paige was the chairman of the Greek Advisers Council in 1987 and 1988. He doubled as a blackjack dealer for Inter-Greek Council's new student orientation Welcomefest program.

In his spare time, Paige has authored 20 books, most of which are math education textbooks.

"Writing fiction is more fun than writing math books," Paige admitted, noting that "Living in Bolivia" is so far his only indulgence in the world of futuristic fiction.

"I'll probably start another fiction book within the next year," Paige said.

Every Wednesday evening, Paige opens his home to 30 or 40 students for discussion groups about the New Age religion.

"We've had discussions about reincarnation," Paige said. "We've had health presentations. Recently we had someone come in to speak on posture techniques."
Local entrepreneurs receive award

ACE chapter gets national recognition

By Omonpee O. Whitlefie d
Staff Writer

A group of University students aspiring for success has received national recognition for its hard work.

Having only been in existence since August, the University chapter of the Association of College Entrepreneurs received a plaque in recognition of starting more programs and earning more money than any other ACE chapter in the nation.

ACE received the award for excellence at its national convention March 8 through 11 in Atlanta. One of 250 nationwide chapters, University’s ACE chapter was one of only three chapters to receive an award.

The group was chartered at the University as an alternative to the other types of business clubs and organizations offered. Members say that ACE differs from the other business clubs because it doesn’t cater to people of any particular major but encourages people to join who want to start their own businesses.

Phil Walsh, executive vice president, said that the whole concept of the organization is to bring together entrepreneurs and to give student entrepreneurs a chance to become familiar not only with each other, but with entrepreneurs who have attained a high level of success.

Members consider the group an alternative to the corporate world because it affords students the opportunity to become self-proprietors instead of working for someone else.

"ACE provides you first-hand experience and skills that you don’t get form the classroom.” —Brad Rust

Members say the corporate world provides limited career advancement and financial gain. They say they believe that starting one’s own business, on the other hand, has unlimited possibilities for career advancement.

Although its primary focus is students under 30, members are exempt from all age groups and majors. To benefit its members, ACE has a four-part goal.

The first part of this goal is to establish a network of resources for its members. This network includes communication between members and people who are influential in the business world by meeting the right people. ACE members can more easily establish themselves as proprietors.

The second part of ACE’s goal is to inspire its members to succeed. Members strive to do this through workshops, regular meetings, and conferences. The third, and perhaps the most important part of ACE’s goal to help young entrepreneurs establish credibility.

Members are educated about the world of business through pamphlets, workshops, and conferences.

Members also say that there are many benefits to belonging to ACE. "ACE provides you first-hand experience and skills that you don’t get from the classroom,” ACE member Brad Rust said. “ACE teaches you how to negotiate deals and how to make the best financial decisions.”

Most entrepreneurs are the type of people who don’t want anything to confine them. They are usually extremely original. They can be business man, artist, or anyone who simply wants to own their own establishment.

Unlike the corporate world, ACE encourages creativity in business.

"Unlike the corporate world,” Lisa said. “ACE encourages creativity in businesses.”

There’s a great adventure destination not far from you. And with a Canrailpass in your pocket, it’s all yours. Enjoy up to 45 days of unlimited train travel throughout Canada’s VIA Rail network. Make as many stops as you like. Change direction whenever you want. Canrailpass is the most flexible, hassle-free way to see Canada. And the train is terrific for meeting fellow travellers.

If you’re 24 or under, a systemwide Youth Canrailpass costs just $249 in low season, $379 high season. An Eastern Region pass costs even less and gives you exciting cities like Niagara Falls, Toronto, Ottawa, Montreal, Quebec City and Halifax.

For complete details, see your travel agent. And see a great country the Canrailpass way!
S.A. Lukis vying for Macintosh computer wares

By Jackie Spinner
Staff Writer

Creating an advertising campaign for a national corporation beats sitting in a classroom learning theory says a team of University students.

The team of 10 journalism advertising students is competing against six Midwest university teams for first place in the Apple Computer, Inc. Advanced Academic Marketing Program. "This is as close to real as you can get because it is real," said Bill Park, account supervisor for the team of students, which calls itself S.A. Lukis Advertising Agency.

Apple puts the students in charge of creating an advertising campaign for its company that increases awareness of Apple Macintosh computer benefits on campus, increases knowledge of the Apple purchase program and announces Apple's Student Financing Program.

Kathy Hall, a senior journalism major from Beckemeyer, said working for the agency has taught her about group communication, something she never learned in the classroom.

"They teach you how it's supposed to be done theoretically, but that's not how it's done in real life," she said.

S.A. Lukis Research Director Diane Springer agreed.

"They can teach you everything by the books, but they can't show you how it works," said Springer, a junior from Fisher.

Jim Hedges, radio production manager for the agency, said working on the campaign taught him the true association between advertising and marketing.

In conjunction with the School of Journalism and Computer Corner media, S.A. Lukis sponsored a day Wednesday at the

"It is their campaign slogan, 'It's to the Max,'" the students will give away a free Macintosh computer and $100 in software today at noon.

Apple gave each advertising team two Macintosh Floppy systems, a keyboard and a $2,000 budget and loaned each a Macintosh and printer and word processing and DeskTop Publishing Software to conduct the campaign.

S.A. Lukis Creative Director Janet Hines said she thinks the

Environment threatened by chemicals

WASHINGTON (UPI) - Chemicals intended to be less destructive to Earth's protective ozone layer may aggravate another environmental woe - the threat of global warming from the greenhouse effect, scientists said Wednesday.

In the first detailed studies of substitutes for environmentally harmful compounds called chlorofluorocarbons, also known as CFCs, researchers said the substitutes appear at least 10 times less destructive to the ozone layer than CFCs.

But researchers also found that, like CFCs, the substitutes act like a greenhouse to increase global warming.

Those results "allow us to see whether ozone friendliness implies greenhouse friendliness," said Keith Shieh of Britain's Reading University in a commentary on the studies published in the journal Nature.

group will have a good showing when it presents the campaign April 12 in Chicago.

At that time, the students will present their completed campaigns, and judges will choose the best overall campaign.

The winning school will receive a Macintosh workstation worth $25,000. The second place winner will receive a LaserWriter, the third place team an Apple Scanner.

Other students working with S.A. Lukis include Debi Edwards, Regina Dawid, Rachel Coston, Dave Balkemom and Heidi Diedrich.

McDonald’s executive says chain may remove beef tallow from fries

CHICAGO (UP) — Fast food giant McDonald’s said Wednesday it may eliminate beef tallow from its recipe for french fries but condemned a nationwide newspaper advertising campaign calling the chain is “poisoning” consumers.

“Let’s start with the obvious,” said John Howie, University professor of philosophy and chairman of the Leys Lecture.

The lecture is slated for 7 p.m. Thursday in the Feser Museum Auditorium.

Howie is the author of numerous books and essays, including “The End of Life: Euthanasia and Morality,” “The Elements of Morality Created from Animals: The Moral Implications of Darwin’s Work,” a book which is scheduled for release later this year.

The Leys lecture is named in memory of Wayne A. Leys, professor of philosophy at SU-C from 1964 until his death in 1973.

According to Howie, it was with Dr. Leys’ help that the University’s small department of philosophy was developed into a major graduate program capable of awarding doctoral degrees.

Each of the Leys lectures are compiled in sets of six by the Southern Illinois University Press and the latest volume, “Ethical Principles and Practice,” was published in 1987.
**Work of area artist depicts ties that bind lives together**

By Jeanne Bickler

Entertainment Editor

Sue Stollar isn’t lazy. Last fall she was commissioned by the aircraft carrier U.S.S. Abraham Lincoln to paint a portrait of Lincoln to hang in the ship.

After finishing the portrait and going through all the ceremony that went along with it, she began to prepare for her show at the Associated Artists Gallery. This was late last year. But she got it all together in time to open her show Tuesday at the gallery.

Stollar is a mother, wife and grandmother who has lived in Bellingham for the past 40 years. “Benton,” she said, “is a great place to raise your kids.”

This familial coziness features prominently in her show, “Ties That Bind.”

The name of the show came to Stollar after she finished a painting called “A Lot of Old Ties.” The painting is an intertwining of different types of men’s neckties.

After painting this, she began to think about all kinds of ties that she has in her life.

“Ties That Bind” is about family ties and places I like well and things from home,” Stollar said.

Stollar’s husband, son and grandchildren are all subjects in her paintings. In fact, some of her favorite portraits are of her son.

Stollar has won awards for her portraits of her son, and said they would be hard for her to part with.

“Some works are harder to part with than others,” she said. “But when you’ve got them all piled up, they aren’t hard to part with.”

Stollar credits her husband for her beginning in art.

“One Christmas my husband gave me a set of oil paints,” she said. “So I took a night class. And that was it.”

She has been painting, and really into it since 1963, she said. Now she mainly works in pastels today.

**Director’s British experiences aid in work with Shakespearean play**

By Stephanie Steiner

Staff Writer

Director Paige Newmark will give McLeod-Teather’s spring production of “A Midsummer Night’s Dream” an authentic English touch.

Newmark feels that because of his English background and formal education, he can offer the actors a different perspective on the play, more so than an American director could.

“Because of my background, I am more familiar with the language of Shakespeare,” he said. “I was trained in classical literature and have a strong religious background, which allows me to understand the Elizabethan language of Shakespeare.”

Newmark went to the United States from England in 1984 to take part in the Olympic Arts Festival, worked with the Olympic Games in California.

“It was good exposure,” Newmark said. “I met many people who were involved with music, dance and theater groups from all over the state.”

Newmark decided to stay in California and get his masters of fine arts degree in directing from the California Institute of Arts in Valencia.

While working in Ashland, Ore., at the Oregon Shakespeare Festival, Newmark heard about a possible job opening for a director at SIU-C, and he sent in his resume.

Newmark received the news that he got the directing job at SIU-C just in time. “The play I was working on in L.A. had just closed,” he said. “It was good timing. The gods were smiling on me.”

“A Midsummer Night’s Dream” is a Shakespearean play which embodies two different worlds — reality and the dream world.

When the characters travel to the dream world and then return to the real world, they bring with them a new perspective on life.

“The dream world, their passions run rampant. Their characters are in touch with their natural selves,” Newmark said.

Newmark likes this play to be “The Wizard of Oz,” which also gives an in real life to fantasy. “I plan on using some of the themes from the ‘Wizard of Oz’ in the music, costume and setting of ‘Midsummer,” he said.

Newmark feels that the SIU-C students act in “Midsummer” are a good, solid bunch.

After the spring production, Newmark plans to go back to L.A. and look for work in television. “An actor gets greater exposure from television,” he said, “It gives you leverage to do more theater.”

“A Midsummer Night’s Dream” opens April 26 at McLeod-Teather and runs for two consecutive weekends.
COLUMBIA, S.C. (UPI) — Imprisoned soul singer James Brown, who has been termed "hardest working man in show business," is going back into the job market through a Department of Corrections work release program.

But Brown, 56, has been a major source of job openings in Aiken and Barnwell Counties Community Action Commission, headquartered in Aiken.

"Mr. Brown's duties will involve community appearances, talk with the people and raising the consciousness of the people to the plight of those who are poor, hungry and homeless," said Corrections Department spokesperson Eddie Archibald.

The prison spokesman said Brown has served a 22-year sentence for rape and was sentenced to six years in prison for trying to run down police officers during a 1988 car chase along the South Carolina-Georgia border, will spend nights and weekends at the Lower Savannah Work Center, a minimum-security prison in Aiken County.

Legendary jazz singer dead at age 66; critics pay tribute to Sarah Vaughan

By Wayne Wallace

Sarah Vaughan's death wasn't a surprise to her fellow singer, Rob Coné. He said he knew there was a chance to take this world with Sarah Brown is expected to begin his job in about two weeks when the job space at the work release center becomes available.

The Grammy-winning entertainer had several offers, ranging from disc jockey to singing trolley conductor. Archibald declined to reveal the salary Brown will receive from the Action Commission, saying only that "it meets the federal minimum wage guidelines and is in between the employer and employee."

The job in Aiken was approved by Commission Commissioner Parker Evatt, whose selection was influenced by the fact that Aiken is near Brown's home in Beech Island, S.C.

"The opportunity exists that he may qualify for extended work release later in the summer," Archibald said. "With that in mind, Commissioner Evatt moved a job that is consistent with work release and extended work release in an area near to Brown's home."

Corporate competition topic of panel

By Rob Coné Staff Writer

Corporate America's ability to compete in the global marketplace will be discussed Friday at 2 p.m. in the Student Center Video Lounge.

Panelists include James Podraza, executive director, Corrective Chamber of Commerce; William Hamilton, manager Industrial Marketing; Wildlife Materials Inc.; Ronald Mason, assistant professor of political science; and K.C. Chiu, business manage-er, international Montero Chemical Co.

Sanatan Borah, a spokesman for the College of Business and Administration Society for Professional Trends in Business, said the panel discussion is designed to help students catch up with the gap created by a world that is changing so rapidly that current textbooks appear outdated or irrelevant.

Among the questions to be discussed are: How do you explain to young people the world; how do you address the mounting pres-sure of practicality and short-term performance; How do the Japano-nese develop and introduce new products and processes more quickly and cheaply than organizations in the United States; and What role should the government play in the resurgence of industries in the United States?

Organizers: Final Four a success

DENVER (UPI) - Tournament organizers Wednesday called the Final Four an unqualified success for the city's businesses and tourism.

Praise was so glowing it appeared the only ones unsatisfied were the losing teams and fans who couldn't get a ticket or had to wait as much as 33 hours for a seat to see Nevada-Las Vegas rout Duke 103-73 Monday night's championship.

Organizers hope the NCAA might select Denver for another Final Four.

"No matter how we've gotten from the NCAA and everyone involved, it was a tremendous success," said Roger Kinney, head of the local organizing committee.

"We had some really nice compliments from the NCAA people," Kinney said.

Jim Marchiony, head of communications for the NCAA, called a return to Denver for the Final Four "not out of the question."

The next three Final Fours will be in domes (Indianapolis, Minneapolis, New Orleans). However, the 1994 (Charlotte, N.C.) and 1996 (East Rutherford, N.J.) venues will beArena that hold only several thousand more spectators than McNichols does.

"I think there's a strong group of important people within the NCAA and among college coaches in the country who feel the Final Four should be played in a true basketball facility," Kinney said. "So I don't think the idea is completely closed for a Final Four down the road in Denver."

Rugby club to battle WIU, EIU Saturday

The SIU-C rugby club kicks off its home schedule against Eastern Illinois and Western Illinois Saturday.

The tournament begins at 11 a.m. Saturday at the fields southeast of the Arena.

The Saluki rugby squad kicked off its 1990 spring schedule by splitting two games last weekend.

The Saluki ruggers were shut out 6-0 in the opening game against Indiana University but bounced back with an 18-0 drubbing of the Fort Knox Army club.

Senior John Hendrick added three extra-point kicks (two points each) while junior Norm Smyth and sophomores Dave Grady and Pat Cheal each collected try's (four points) in the second contest for the Salukis.

The ruggers posted an 8-6 record during the fall slate.

Women’s tennis team to play three Gateway matches here

By Peter Zalewski  Staff Writer

One small step. The women’s tennis team will take its first step toward winning a conference title this weekend. The Salukis will host three matches against Gateway Conference foes Illinois State, Indiana State and Western Illinois at the University Courts.

“I like playing at home,” coach Judy Auld said. “It gives our players the opportunity to play in front of people and it gives us a chance to concentrate on the event.”

But, sometimes it’s more difficult to concentrate with the extra distractions.

The Salukis will try to continue what has been a successful season. SUU-C is 11-2 overall following a 5-1 loss to Arkansas-Little Rock last week. For Saluki fans, there’s good news. It helped us see what we need to work on. A-SUU also proved we could break even with the number of players available. The next day, the 11 victories have Auld hoping for their third Gateway Conference title in eight years.

1990 Masters begins new decade of major golfing championships

AUGUSTA, Ga. (UPI) — Another decade of major championship golf begins Thursday with a picture perfect landscape that has evolved from an indigo plantation to the world’s most famous sporting venue. "I love it here," Greg Norman said on the eve of the event, "because it is an institution.

That institution — the Masters — would have been without a host at this time a the Augusta National Golf Club with the 85-man field repressed by Pickens" and it’s gone. The game’s past, present and future.

Golf's 50th birthday present will include a 50th birthday present for Sam Snead, the winner of 135 tournaments.

They will be followed by a steady stream of players, once again test the halls, valleys and topographical surfaces that make up what has become one of golf’s treasured courses.

On display will be 19 former Masters champions, five amateurs and 21 players who are making their first appearance in the tournament. The opening round was expected to be played in sunny, mild weather with westerly winds of 10 miles per hour.

As the defending champion — Nick Faldo — will play in his first Masters as an amateur champion — Chris Patton. But the twosome is certain to be the focus of the field. And the first player will be made up of Jack Nicklaus, winner of three tournament titles, and Tom Kite, the ninth-round leader at last year's Masters.

The field features player of the year and first-time winner at the U.S. Open, Ken Dye, who will be looking to make an early move in the tournament with a win.

The field also features player of the year and first-time winner at the U.S. Open, Ken Dye, who will be looking to make an early move in the tournament with a win.

The field also features player of the year and first-time winner at the U.S. Open, Ken Dye, who will be looking to make an early move in the tournament with a win.
