City Council clarifies law; bar employees must be 19

By Angela Hyland
Politics Reporter

The House of Representatives, in a 50-48 vote on Tuesday, declared that bar employees must be 19. The House's decision means that bar employees must be 19 to work in Illinois. The state's minimum age for working in bars was lowered to 18 in 1993. However, the new law only applies to bars. Employees of restaurants, which have separate licenses, may be 18 to work. The House vote also makes it clear that anyone under 19 cannot work in bars, even if they are working in bars.

Area children learn arts, crafts skills
By Gus Bode

It filled the Sistine chapel with angels, made the Mona Lisa smile, and now it's filling some children's summer with fun, with the help of local artist Gus Bode. The program is designed to teach local children arts, crafts and creative skills.

Recent graduate named as Law school dean
By Marc Chase
Administration Reporter

After only receiving his law degree a year ago, Edward Dorsey, a graduate of the SIU School of Law and former acting dean of admissions for the school, was selected July 1 to be the permanent dean.

The controversy centered on the age limit for bar employees, which has been lowered in Illinois. The new law only applies to bars. Employees of restaurants, which have separate licenses, may be 18 to work.

Dorsey's appointment is still subject to official approval by the SIU Board of Trustees. Dorsey, 46, enrolled at SIU after a 20-year career in the U.S. Army where he served as a Green Beret. He received his bachelor's degree in business administration from the University of Illinois in Chicago.

City Council clarifies law; bar employees must be 19

By Heather Burrow
City Reporter

The Carbondale City Council clarified the law regarding the age limit for bar employees at a meeting Tuesday, confirming that employees under 19 would have to be at least 19.

The first discussion on the agenda was centered around the question of whether employees under 19 would be allowed to work in bars.

Dorsey said his new position means that he will be responsible for reviewing applicants to the law school, selecting the best overall class possible based on the undergraduate grades and test scores of students and supporting students by answering questions when they have difficulties in the school.

Frustration erupts over budget

By Angela Hyland
Politics Reporter

The House of Representatives -met Tuesday to try to end a stalemate which has left the General Assembly without a budget for almost a week. The House's decision means that bar employees must be 19 to work in Illinois. The state's minimum age for working in bars was lowered to 18 in 1993. However, the new law only applies to bars. Employees of restaurants, which have separate licenses, may be 18 to work. The House vote also makes it clear that anyone under 19 cannot work in bars, even if they are working in bars.

Saving Sense
By Aleksandra Macys
Campus Life Reporter

Jimi Hendrix, Jim Morrison and Stevie Ray Vaughan may all be dead, but their music lives on in albums, tapes and now on compact discs. While tribute albums to these and other artists are springing up constantly, their music may be prohibitively high priced. Frugal students can still find the used original through some local merchants.

Second Chance, 214 West Freeman, formerly The Record Exchange, offers a wide variety of used albums, compact discs and cassettes.

Paul Frederick, a store employee, said they buy, sell and trade used music, but will only sell local bands' tapes on consignment. "We sell a variety of everything," he said. "You can’t pin it down to a certain type of music."

Frederick said one advantage of buying used music is the price. "Compact discs usually cost $15 or more in a retail store. Here they usually run around $7 or $8," he said.

Tapes, he said, are similar. "At Second Chance they are usually half the price of what they would cost in a retail store."

"We don’t sell easy listening music," he said. "People don’t really buy it." Frederick said those interested in selling or trading music can stop by the store with what they have, but those who want to sell a lot of albums at once should call first. Albums and compact discs see MUSIC, page 6

New store imports global goods; international students help out
By Diane Dove
Special Assignment Reporter

With the help of international students, three Southern Illinois residents began a home-run business last week that sells handmade imports from all over the world. Nancy Stetler said she and friends Sherry Miller and Wilma Reese began Lunar Imports, 102 N. Oakland, so they could bring handmade imports from all over the world to the people of Carbondale.

The workshop at Rend Lake Visitors Center, taught from a workbook containing numerous outdoor activities that are designed to teach children about the environment, according to Jerry Sauerwein, Rend Lake park ranger. "Anyone who comes will get a workbook for free," he said. "The activities in the workbook are designed to make confusing environmental subjects clear to children by giving them hands-on training. "They (the activities) take a difficult concept and break it down into an activity a child can understand," said Sauerwein.

New RSO proposal still needs polishing

A REPORT WRITTEN A YEAR AGO, WHICH proposes a new three-level system for SIUC registered student organizations, has been submitted to President Guyon. Guyon is expected to respond to the report when he returns to the University next month after recovering from surgery.

The 25-page report, written by the Committee to Study the Institutional Relationship with Student Organizations, offers several well-intended ideas. But will they work in the real world?

UNDER THE CURRENT RSO SYSTEM, GROUPS are divided into Priority One and Priority Two levels. Priority One, comprised of the mega-groups, last year received $219,000, 69 percent of the total student activity funding. The remaining groups, more than 400, received 31 percent, $132,000.

It would appear that some restructuring is in order. But the report does not specifically propose to redesign this imbalance of funds. Instead, the report, which speaks often of organizations which “should be educationally purposeful” and “protecting freedom of expression,” overlooks practical some of the applications of the proposal it contains.

UNDER THE NEW SYSTEM, GROUPS WOULD be categorized into three levels: recognized, affiliated and registered. Recognized groups receive the most funding and registered, lowest on the ladder, would be locked into that level and their growth discouraged. This strategy contains.

A MAJOR HITCH IN THE PROPOSAL IS THAT groups would be categorized by size? By educational value? By popularity or politically correctness? And who will do the deciding? The report does not clearly address the decision process.

A MAJOR CONCERN, especially for the smaller groups, is the access to facilities for meetings. According to the new plan, registered groups would compete for meeting places with on-campus groups and off-campus organizations.

Small groups, already stretched to their limit for resources and staff, would be further stretched to fulfill the same requirements of their larger neighbors. With the new proposal, they have nothing to gain and everything to lose.

Student organizations are an important part of the University and the college experience. These groups, both large and small, sponsor many positive events on campus and in the community.

BUT GIVING PREFERENTIAL TREATMENT TO one group over another because of size and popularity could cut off the lifeblood of the smaller, less visible organizations. As it is, SIUC has a variety of student organizations to meet the needs of the diverse student population. Unless the committee can fine-tune its proposal and clearly address the issues, the big fish are going to take over the pond.

Opinion

Columnist too close to source

By Sydney H. Schanberg

In the late afternoon of April 26, in Brooklyn’s Prospect Park, a 27-year-old woman ran up to a police car and, in tears, told the officer she had just been raped.

Two days later, a Daily News columnist wrote that the woman was a “hoozer” and her story a “lie.”

He repeated the accusations in a column in May, ignoring the corroborative evidence that had emerged in the meantime from the police lab.

Now the unnamed woman had filed a $12 million damage suit against the newspaper and the columnist, Mike McAlary, charging defamation.

These details are but the skeleton of a tangled story that involves the police department’s top officials, their close relationship with the columnist and the inability of both his newspaper and the police brass to see the dangers in this kind of personal connection.

McAlary is one of a handful of News staffers who occasionally share the sporting life with Police Commissioner William Bratton and his sidekicks at the commissioner’s table at trendy watering spots.

When McAlary wrote his first “hoozer” column, having it an unnamed police sources, Bratton was embarrassed, probably because he knew that inside the press, he would likely assume that someone at the top had fed it to McAlary. So Bratton, fearing backlash from the police lab, fed it back from women over the touchy subject of how the police handle rape victims, issued an apology.

He said he regretted that police “double about the case had been “sealed” to the press, particularly since some of the doubts have been refruted by the medical evidence that has now been surfaced.”

The evidence he referred to was the laboratory finding of semen in the woman’s vagina and on her running shorts.

But the commissioner also apparently feared backlash from McAlary, because in his remarks he carefully never mentioned the columnist or the Daily News.

Even later, when Bratton went further and said, “We have physical evidence that a rape did occur” — this was after McAlary’s second column claimed that the police lab was wrong, the commissioner nonetheless still did not refer to the columnist.

Meanwhile, the Daily News editors, citing McAlary’s “long track record of solid authoritative reporting,” kept saying “we stand by his columns.”

In his first column, McAlary said, “The woman was kind of vocal about being a victim. Of rape account, he wrote: “It is an outrageous story, really. The woman, who is black and 27 years old, describes herself as a social activist. All we really know about her is that she has an active imagination.”

His sources, McAlary said, told him she “invented the crime... to promote ... a gay and lesbian rally this weekend.” And he suggested she should be “arrested herself” because “a false report of rape by a woman looking for publicity is a crime against all women.”

In my reporting on the case, I almost immediately found confusion at police headquarters and a sense that the brass was juggling several agendas, trying to do police-relations damage control in an effort to mollify all sides.

About the lab tests, a police spokesman waffled back and forth on the reliability of the reports on the semen. (Semen need not be present to establish rape; in fact it is not present in a majority of rape cases either because the rapist did not ejaculate or was otherwise dysfunctional. But when it is found, it is viewed as strong corroboration.)

At one point, the police spokesman told me that what was found was a substance known as p30. He said this was “a fluid common to males and females but does not constitute semen.” (Similarly, McAlary, in his second column, said: “At best, the lab reported, the substance was saliva, male or female... No semen found. Period.”)

No one else, however, describes p30 in this manner, especially not medical experts. For example, the New York State Health Department’s director for collecting rape evidence describes p30 as a protein component of semen and says “its presence is regarded as a conclusive indication of semen.”

A 1985 article in the New England Journal of Medicine said that “the finding of any p30... establishes that semen is present.”

The police lab report itself, as revealed by New York Post reporter Murray Weiss, described rape evidence as p30, without any qualification: “The substance found in the victim’s swabs and on the (vaginal) swab is semen.”

Still, Daily News editor Martin Dunn said: “Mike McAlary has written twice on the issue and we stand behind him.”

The columnist who has sued the News saw it this way: “I have had the misfortune of being raped twice in my life: once in the park and again in the media.”

How to submit a letter to the editor:

A: You

B: Letter

C: Editor

Editorial Policies

Signed articles, including letters, viewpoints and other commentaries, reflects the opinions of the author only. Unsigned editorials represent consensus of Daily Egyptian Board.

Letters to the editor must be submitted in person to the editorial page editor, Room 205F, Communications Building. Letters should be typewritten and double spaced. All letters are subject to editing and will be limited to 300 words. Letters shorter than 250 words will be given preference for publication. Students must identify themselves by first and last name, major, faculty member by rank and department, non-academic staff by position and department.

Letters for which verification of authorship cannot be made will not be published.
P.SOPHIST: THE POLITICAL Science Society is hosting a presentation by Dr. John Foster at 7 p.m. in the Student Center. The presentation is a result of recent actions by the Student Center. The presentation is a result of recent actions by the U.S. health care policy. An open discussion follows.

INTRAMURAL SPORTS is now forming teams for a beach volleyball tournament. Register now through July 13 at the Student Recreation Center to join in the fun.

SCPC SUMMER CINEMA will be showing One Flew Over the Cuckoo's Nest at 6:30 p.m. and 9 p.m. in the Student Center Auditorium. Admission is $1.

CALENDAR POLICY. The deadline for Calendar entries is 12:50 p.m. on Friday. For an entry to be submitted, please include name, date, time and location of the event, and the name of the person submitting the item. Items should be delivered to the Office of Communications, Building 1263.

Rock climbing, beer ad combo draws criticism

By Paul Farhi
The Washington Post

Beer marketers, like tobacco companies, have always been wary of regulating their products, and they want to place restrictions on their advertising. That's the bottom line, through its leading trade group, the Beer Institute, has a voluntary advertising code that proscribes what member companies shouldn't do in their ads. But the code is open to, shall we say, some interpretation. Consider two new commercials from Coors Brewing Co. and Anheuser-Busch Cos.

Coors's commercial for its Coors Light brand spoofs a snappy jingle. "Keep on Movin'," is a series of quick shots of young people engaged in rock climbing, bike riding, long jumping, windsurfing and other activities.

Anheuser-Busch's Budweiser ad, meanwhile, tells a story about a rock climber who runs into some trouble and is saved by his fellow climbers (everyone resides in the bar afterward for a few beers).

The Beer Institute advertising code, to which Coors and Anheuser-Busch submit voluntarily, prohibits boring beer before or during activities "which require a high degree of alertness or concentration.

Such as, maybe, rock climbing.

Both companies say their ads are within the voluntary spirit of the code. "We don't think there's any public confusion," says one spokesperson. But it's obvious that rock climbing is used in both.

Tokachiwa, a recent graduate of the SICU School of Art, hired some local artists to create sculpture and paintings to help keep the kids entertained and creative.

The artists train the high school students who then teach the kids."It works out good for everyone." So far the children have made candles, tapestries, sculpture and paintings. We have some good artists coming," said Musawi, "We have had people from Malaysia and England as well as people in the community.

He said he looks for artists who not only are good at what they do, but also work well with children. Musawi said, who also finances the program, said the teen-agers reap benefits as well.

They learn how to be creative with the children, he said, "and they learn how to use social skills in dealing with the children.

Even worker Yelle Jackson said she enjoyed working with the children and she is building friendships in the same time.

"This is the best summer job in Carbondale," she said.

Even though Musawi said her job is peaceful, she said the nature of the job keeps her on her toes.

"You have to be really creative to keep the kids interested," she said. "It's not a classroom atmosphere-the kids are allowed to be themselves.

Mostly said the popularity of the program is growing because of word-of-mouth advertising. We have five new people today, she said. "We have our hands full right now."

---

That's why the beer industry, tobacco companies, have drawn criticism for their voluntary advertising code-to which Coors and Anheuser-Busch submit voluntarily. "We don't think there's any public confusion," says one spokesperson. But it's obvious that rock climbing is used in both.

As he heads to Naples for the economic summit hoping to allay widespread doubts about his ability to lead the world's largest industrial democracies, Clinton has the advantage of a year's worth of economic growth.

The United States enjoyed the highest growth rate in 1993 and 1994 among the Group of Seven countries attending the meeting. But his overall appeal ratings have dropped recently. Last summer's poll of 43 percent had dropped nine points since the beginning of the year, to 50 percent approval and 44 percent disapproval.

The last year has also seen the pullout of U.S. troops from Somalia, ongoing troubles with Haiti, abandonment of the effort to tie China's preferred trade status to its human-rights record and a roller-coaster of advances and defeats in Bosnia.

Nancy Stetler, from Carbondale, and Pragyan Mohanty, from Orissa, India, show some of the goods sold by Stetler's new business, Lunar Imports, 102 N. Oakland. They sell jewelry, silks and other goods from places like India.

"We didn't know how this would go, but everyone is interested in seeing things from other countries," she said. "I've made a lot of friends.

If the business expands, the next step will be to rent spaces in other locations, such as the Student Center or the Small Business Incubator, to sell the imports, she said.

Stetler moved to Carbondale last fall where she met Miller and Forrest.

Stetler said the idea for the business came when Miller, a cosmetologist and halls, many of the imported gifts in her home, which included jewelry, scarves, books and wooden items.

"People would come into my house and say, 'You have such beautiful things, how do you get them?'" she said.

Eventually Stetler began to have students, whom she met at Penn State University, try the items her friends wanted when they went home to visit their families, Stetler said.

Stetler gave money to the students, who would purchase the goods from shops in their home countries and give them to her when they returned to school.

Eventually Miller and Stetler decided to start their own business which they, along with Doshi, did with help from a free course on business from the Small Business Incubator at SIUC, she said.

The business incubator helped give tips to the women on how to start the business, and told them what they should legally be allowed to import and sold, she said.

Stetler said her former students provided her with contacts in India, so she ordered items to sell.

However, because it is illegal for international students to sell goods in the United States, the students do not take part in the sale, she said.

Stetler said she pays retail price for the items, which are priced low because of the cheap cost of labor in India.

"I'm not getting any sort of a bargain per se, but it is a bargain," she said. "It's all hand made, and the makers will back it up.

For more information about Lunar Imports, call 529-5067.

Hispanic council offers support, cultural base for ethnic students

By Tre' Roberts

The Hispanic Student Council is an important forum for providing SIUC's Hispanic and Latino students with a sense of community, said the council's faculty advisor.

"One of the functions of the Hispanic Student Council is to give SIUC's Hispanic and Latino students a support," Jesus Baeza, advisor of the council and assistant professor in educational psychology and special education, said. "Generally those students come from very tight-knit families and it is tough for them to leave their homes, to come here with little support culturally thus having many knowing many people."

Baeza said Hispanic and Latino students are a large, often under-represented segment of SIUC's population.

The council gives students a forum in which they can communicate in a relaxed atmosphere and share experiences of being away from home. The council also gets students involved in activities such as dances, picnics and other social events each sports event, he said.

Ilea Dominguez, assistant professor in the SIUC School of Law who acts as an assistant advisor to the Hispanic Student Council, said the council provides an important service to Hispanic and Latino students.

"The council has done a lot to create a community for the students, to provide them with cultural support."

Baeza said although there are about 450 Hispanic and Latino students on campus, only 20 to 30 are fairly active.

"Hispanic and Latino students often take very heavy class loads," Baeza said. "Getting involved in the council takes away from the time which they have to study, so many are not able to get involved very often."

Baeza said in the past the council had trouble with organization due to the difficulty getting students to meetings.

Monica Rogers, president of the Hispanic Student Council, said although there has been some trouble in the past with participation, she hopes the number of students active in the council will increase in the fall.

"Many students don't even know we are here," Rogers said. "During orientation week we will go to the dorms to greet incoming students, particularly those of Hispanic and Latino heritage.

Rogers said many of the students do not know what is available to them, from financial aid to social events. The council's activities alternate between social and business, said Rogers.

"One week the focus is on council business, the following meeting is mainly for socialization," she said.

Baeza said the council is not just for Hispanic and Latino students.

"All races are welcome to the council," Baeza said. "One of the council's goals is to promote inter-cultural understanding between people."

Experimental spray may be solution to migraines

The Washington Post

An experimental nasal spray is getting high marks for controlling migraine-headache pain.

University of Kansas researchers report that a nasal spray containing the long-used migraine headache drug DHE-45 (dihydroergotamine mesylate) is safe and effective in offering rapid relief of the severe pain of migraine headaches and controlling the nausea often accompanies them.

Migraines afflict an estimated 25 million Americans annually. They account for 80 million annual visits to doctors' offices and cost $50 billion yearly in lost wages and medical expenses.

Various medications, including DHE, are used to treat migraine headaches.

But in pill form, the drugs often are hard for migraine sufferers to keep down because of the nausea and vomiting that often occur in many migraines.

For this reason, doctors in recent years have experimented with alternative ways to administer medications, including injections and nasal sprays.

The recent study of 112 people who suffer from migraine headaches found that administering DHE as a nasal spray is not only effective in controlling migraine pains and other symptoms, said Dewey K. Ziegler, director of the headache clinic at the University of Kansas Medical Center and lead author of the multi-center study.

Half the participants in the study received a nasal spray containing DHE. The other half used a nasal spray with inactive ingredients. Seventy-one percent of patients who took DHE reported at least fair to very good relief, compared with only 38 percent of those who took the placebo spray, Ziegler and his colleagues reported in the journal Neurology.

The findings demonstrate that treatments can achieve a rapid and acceptable high degree of relief with the nasal spray, Ziegler said.

The nasal spray version of DHE "could particularly benefit patients who are experiencing nausea, vomiting or both with migraine, he said.

DHE is approved for use by the Food and Drug Administration as a migraine medication nearly 50 years ago. DHE in nasal-spray form is still undergoing testing for final FDA approval.

In addition to its easier administration, the nasal spray also is preferable for those who can't take pills or tolerate injections and would result in "possibly fewer visits to health centers and hospitals for acute treatment," Ziegler said.

Study shows exotic coffee blends have least caffeine

The Washington Post

When they set out to get the lowdown on coffee highs, the editors of the Tufts University Diet and Nutrition Letter expected to find lots of caffeine in the mushrooming varieties of chic continental expressos, lattes and espressos.

What they found, to their surprise, says Larry Lindner, executive director of the 10-year-old newsletter, was that these exotic blends actually were lower in caffeine than an ordinary cup of brewed coffee.

In the July issue of the newsletter, Lindner noted that the arabica beans used in espresso, cappuccino and late (copoacuccino and late are milky varieties of espresso) impart a stronger taste but contain less caffeine than the robusta beans used in regular coffee.

Lindner and his team, in response to questions from their readers about coffee, sent samples to a laboratory for analysis of caffeine, fat and calorie content.

"Coffee with cream, especially the chic ones with whirpped cream or whole milk, may have as many calories and fat as some extra-rich ice creams. Shots of hazelma or vanilla syrups can escalate the calories."

A Starbucks' Cafe Mocha, for example—a shot at that—may have nearly 200 calories. Even with skim milk, it will have 156 calories and, according to whether it has skim, 5 percent or whole milk, it will have 11, 13 or 15 grams of fat.

"Zines new way to trigger thoughts"

Katarzyna Y. Bulka
General Assignment Reporter

Underneath a table there is a box full of Manila folders. Inside these nondescript covers is an off-beat outburst of thoughts and ideas from magazines expressing a myriad of unconventional thoughts in the English and Philosophy from SIUC students are producing these 'Zines to trigger unconscious forces through images and ideas on how to catch the perfect worst and to lose weight in two days.

Craig Wilson said, publisher of the English and Philosophy from conceives the same allures of the time—its -like an English classic. "I said."

Cassandra Davis, a junior in Government and Social Work from DeQuinl is producing her second 'Zine to come out in the fall called 'Zine Inside the Milk Bar." My first issue primarily had art and poetry, Davis. "The second will consist of interviews with local bands."

Davis started her 'Zine when her roommate and friends were producing one of their own. She said she was surprised at how simple it was to express her ideas.

"The production of my 'Zine comes out of my own pocket," she said. "Production costs, such as printing, usually range from $400 to $500."

Sports

SIUC football to punch in for overtime

By Bill Kugelberg
Sports Reporter

Billing purgers around the nation can breathe a sigh of relief now that the Gateway Conference, home of the SIUC football team, has implemented an overtime system, ridding its teams of dreaded tie balls.

The new system, the first in league history, will utilize the NCAA I-AA Ironman format to decide the outcome of conference games that end in regulation.

Saluki head coach Shawn Watson said the new format will make games more interesting.

"We are going to have to have a real plan as to what we will do in the series situation," he said. "All kinds of variables will come into play. Depending on the strengths of the team, we will have to decide whether to let the offense or defense take the ball first. This is going to make league play very exciting."

The new format replaces a system which awarded one point for a tie if its scores matched at the end of regulation play.

The tie-breaker works as follows:

- In an overtime, one end of the field is used and each team gets an offensive series beginning at the 25-yard line.
- Each team retains the ball during a series until it scores or fails to make a first down.
- A possession ends on an interception, fumble or unsuccessful field goal try.
- Teams are awarded one point per extra point attempt, not used during regulation may not be carried over into the overtime.
- Unused extra-period timeouts may not be carried over to other extra periods.
- The team scoring the greater number of points after the completion of both possessions is the winner. A team may score on defense.
- If, after both possessions, there is no score of the score is tied, there will be 15-record overtime periods until a winner is declared.
- The final score will be the total of all points scored by each team in regulation and overtime periods.

Watson said the conference's coaches decided to implement the new system for two reasons.

"The coaches felt it was the only thing to do since the Gateway Conference is the only NCAA I-AA league that didn't use an overtime system," he said. "And we felt it was a good plan because it gives everyone a fair opportunity to score. Unlike the NFL's sudden death which doesn't give everyone an opportunity to score. We felt this was the best, fairest way to go about it."

Hart to name new coach for Saluki baseball today

A press conference is scheduled for today at 1 p.m. to announce the new SIUC baseball head coach.

SIUC Athletics Director Jim Hart finalized interviews with the four candidates last Thursday and will name one of them demanding attention.

Someone offered $152 million for the Minnesota Timberwolves.

The once-gregarious superstars are slowing down.

The game is slowing down.

The once-gregarious superstars are being replaced by a new crop of ranks. Free-agent powers like the 81 Laker and Boston Celtics are being replaced by walk-off pros, the free-agents who kick coaches.

A year ago, if you had asked how the league was doing, the answer would have been: "Never been better."

This spring it would be: "It's been better."

League relations—never been worse.

The collective bargaining agreement has expired and the Players Association is showing its teeth at every turn.

However, the owners might be so upset, they might refuse to open next season without a contract and lock the players out.

Jerry Reinsdorf runs the Chicago Bulls as a hobby but the Chicago White Sox is his real passion. He is a pariah in the NBA after suing the league to televise games on a superstation.

State of the National Basketball Association: Despite the mud-wrestling finals, TV ratings falling to Jim Jordan levels and the threat of a strike, the fundamentals remain solid.

Attendance is near 90 percent of capacity.

Franchise prices are skyrocketing. Toronto and Vancouver are coming in at $125 million. Some have offered $152 million for the Minnesota Timberwolves.

Magic Johnson bought into the Los Angeles Lakers and the Los Angeles Times said Johnson will buy into the Los Angeles Times.

It almost seemed like it was planned that way, the underdog United States taking on mighty Brazil on the Fourth of July with over 8,000 screaming fans watching possible history unfold in Stanford, Calif.

For 73 minutes the impossible seemed possible as the game remained scoreless and the United States had an extra man, because of a Brazilian player, Leonardo, who elbowed American Tab Ramos in the face late in the first half. However, when Brazil's Bebeto shot slide past U.S. goal tender Tony Meola in the 84th minute, American hope of an upset evaporated with the heat.

The upset would have even been sweeter had it come in "Ole" when the U.S. Olympic hockey team beat then thought unbeatable Soviet Union in the 1980 Olympics in Lake Placid, NY.

The United States team was completely outplayed especially in the second half as Brazil controlled possession and had several scoring opportunities, while the United States had only a couple scoring chances even with a man advantage.

Still the U.S. team held the second World Cup since 1990 and in 1998 they lost all three games by a combined margin of 8-2.

The World Cup has been embraced by Americans as stadiums are filled to near capacity and television ratings are doing well. Fans, who did not understand the game before the World Cup was played in the United States, came to the stadium in droves to see the red, white and blue and would stand in lines for hours to get their hands on tickets to these games.

This event is more than a soccer tournament. It is a time when fans from 24 counties come to paint their bodies, wave their flags and go into a hysterical frenzy. Soccer, known as football to everyone outside the United States, is the world's most popular sport for several countries in a way of life.

For soccer fans to see soccer more seriously than Americans take football, basketball and baseball.
The Man, The Railroad and The Fourth of July

How Daniel Harmon Brush, Founder of Carbondale, and 2,500 people celebrated Carbondale's first Independence Day, on July 4, 1854.

The following are excerpts of Daniel Harmon Brush's own words taken from his memoirs, 'The Pioneer Memoirs of Daniel H. Brush', written by John Y. Simon.

"In September 1852, I purchased from John Alseyne of New York, the southwest corner of South 6th Street and South 9th Street, for $500. Later in the year the town was laid out, the timber removed from the principal streets, and the square of about twelve acres in the center of the plot appropriated for railroad purposes. The railroad divided it in half, wide streets being reserved all around the square. A portion of the 360 acres was laid off into small lots for business purposes, each alternate lot of which was allotted to the proprietors. Leaving the others was sold at the highest bidder, and they were so offered and sold off. The land was sold by the hammer on January 4, 1853. The rest of the land was divided into lots, twelve of which on the north and south, and twenty on the east and west. Each lot was sold at auction and stricken off to the highest bidder.

Work on the road was being prosecuted vigorously from the north, and strong efforts were made to connect the south. and strong efforts were made to connect the two parts of the village. The railroad was spaced along the ends excellent storing bars, while occasionally the scream of the freight demon was heard in his approach from the south. I had completed the freight house for the Company, but it was still under my control. It was fresh and sweet with the odor of green-cut lumber, and by putting shelves in the corners and along the ends, excellent storing places for cooked food were made, while the body of the building afforded space for tables of plank from end to end 100 or more feet in length, arranged so that 500 persons could be seated at one time.

We had sent invitations to Cairo, Frederick, Calhoun and Marmaduke. On the morning of the Fourth all was in readiness for the train to run up to the north line of the square and work on the road was suspended for the day. Early in the afternoon we had with us a large body of families in each of the household dogs following, with persons on horse back and on foot, began to arrive. They came from all the country round - men, women, children and dogs - and kept coming until at least two thousand were on the ground, most of whom have never seen a railroad or an engine or a car.

About noon the rumble of the train was heard, then came the shrill cry of the steam whistle, and soon the locomotive and cars slowed up and came to a stop opposite the freight house. The wonder-struck people shouted, some in terror and all in surprise. The horses evaded and tried to break away. The dogs howled and with tails tucked between their legs stood not upon the order of their own-making haste strides toward tall timber. The horses, scared and trembling, were held in with bit and bridle and the startled multitude, perceiving no one was hurt, soon quieted down. A Fourth of July oration was pronounced in a grove near the station under a Union banner that I had purchased for the occasion, and the first one I ever hoisted in the country.

I did not hear the speeches as I was busy inside the building, where the tables were being prepared for the dinner to be served and where the women were busy and the carvers were at work. My business being headman and waiter-in-chief, a corps of young men had been selected to wait on the tables, and I drilled them for an hour or so in their duties and allotted each one his theater of action so that conflict and confusion should be avoided. We kept the house closed and allowed no one inside but the workers until all was ready for the eaters, which was at about one o'clock. Then I sent out

City of Carbondale

Founder's Day Celebration
July 2, 3 & 4 -- Town Square

This Fourth of July weekend, July 2, 3 & 4, the citizens of Carbondale will have an opportunity to participate in the 140th anniversary of the founding of Carbondale. The Founder's Day Celebration, sponsored by the Carbondale Convention & Tourism Bureau, Carbondale, Ill., and the City of Carbondale, will be held in the Town Square. Throughout the three-day celebration, community and family-oriented activities and events are planned. Children's activities scheduled include kids games, stage shows, and a clown school. Music, from gospel to jazz, will be performed by local groups at the Pavilion each afternoon and evening. Over two dozen arts and crafts vendors and demonstrators will be selling and exhibiting their work. Other activities include the dedication of the Carbondale Freighthouse Pavilion as a local landmark on July 4th, a community picnic on July 3rd, horse carriage rides, hayrides, walking tours of the downtown, a model train exhibit, and much more.

City Clerk Janet Vaught Receives International Recognition

At the May convention of the International Institute of Municipal Clerks (IIMC) held in Anchorage, Alaska, Carbondale City Clerk Janet Vaught was recognized for superior achievement as a municipal clerk. The International Institute of Municipal Clerks is a professional organization of municipal, county, and township clerks with over 9,900 members from 13 overseas countries, the United States and Canada. The Quill Award is the highest award given by IIMC and recognizes selected municipal clerks for their professionalism, for their strength of involvement in IIMC and their state professional organization, for service to their municipality and participation in their community.

The Quill Award has been in existence for eight years, and in that eight-year period only 36 municipal clerks have received this prestigious award. Janet Vaught became the 31st worldwide recipient.

Peoria City Clerk Mary Haynes, who serves as IIMC Region VII Director and represents Illinois, Missouri and Kansas on the IIMC Board of Directors, attended the June 7

© SEE CITY CLERK, Page 3
The Carbondale Convention and Tourism Bureau developed a three year plan to increase tourism and attract new visitors to the area. The bureau also began representing all of Jackson County.

The City's largest full service hotel has been awarded a $780,000 grant for extensive renovation, the Days Inn and Relax Inn were renovated, and a new $1 million addition was completed.

The City continued to work on completing an upscale full service hotel on campus.

Efforts were initiated to establish a multi-county, multi-agency task force for community revitalization. Discussions among banks are ongoing about the best structure to create an agency that can provide gap financing for economic development ventures.

PROVIDE QUALITY SERVICES WITH FINANCIAL RESPONSIBILITY

Although the City is facing financial conditions in FY 95 City Budget estimates the General Fund balance for FY 94 to be $3,165,301, a net increase in the fund balance during the fiscal year of $927,454. The increase was due to the receipt of non-b Budgeted Illinois State Income Tax Surcharge revenues in the General Fund and will have a net of $94,322 in amounts received by the City from the Illinois Housing Development Authority. In FY 94, the Municipal Government Property Tax Fund had a surplus of 2.4% and will provide a deficit of $94,232 in the General Fund.

The Child Care Services Fund experienced an estimated actual operating deficit of 5.7% for the year. The City's Child Care Services Fund will continue to invest the alternat available to provide child care services to low and moderate income families without a family income at the significant operating deficit.

The Water and Sewer Fund will be required to increase rates in order to improve the financial status of the City's water and sewer systems. The City's water and sewer rate increases will be implemented in FY 95 and will have a deficit of $94,232 in the General Fund.

During the summer of 1994, Work Committee and the City Commissioners will be elected to terminate the Corridor Location and Design for the Northern Connector due to the adverse neighborhood impacts of the only表达了同替代的 corridors.

The City's support of the SWIFT project remains strong as a feasibility study for a toll road from Carbondale to the metro ex- St. Louis area is underway.

Several City agencies will cooperate with others to expand the City's area of influence. The Carbondale Convention and Tourism Bureau, the Carbondale Community Foundation, and the City's Solid Waste Management Fund will be involved in the development of a 20 year region-wide Solid Waste Management Plan.

STRENGTHEN AND PROMOTE NEIGHBORHOOD LIVING

During the past year, the City adopted a Mandatory Rental Housing Licensing and Inspection Ordinance. The ordinance is designed to increase the City's rental housing licensing and inspection capacity. In addition, the City has been in discussion with the City of Murphysboro regarding a joint rental housing licensing and inspection program.

The City has been working on developing a plan to address the housing needs of the City's residents. The plan includes the development of a multi-family housing project, the development of a community garden, and the development of a community center.

CONCLUDE RECORD OF ACCOMPLISHMENTS

The Citizens Advisory Committee completed the Carbondale Community Action Plan in 1994. A $750,000 federal grant was accepted by the City Council. The grant will be used to support the development of an overall strategic plan in support of the Community Action Plan.

Downtown Carbondale continues to be the focal point for several citizen groups and a successful market in the Bicentennial Industrial Park. Community pride, Uptown, Inc., Downtown Steering Committee, Preservation Committee, and Grand River Board, Station Carbondale Restoration Committee and many other Carbondale citizens have been active in Downtown redevelopment efforts. The City is investigating the possibility of a "walk in" Downtown in view of first hand past improvements and the need for new improvements.

The annual Lights Fantastic Parade again was a big success and drew thousands of spectators into the Downtown area.

The Carbondale Community was distributed on a pinboard basis as inserts in the Southern Illinois and Daily Egyptian newspapers.

The development of Government Center, the City's new government center, is complete and the City is now in the process of moving into the new facility. The City is currently in the process of developing a new government center plan for the future.

The City is now working on developing a plan to address the housing needs of the City's residents. The plan includes the development of a multi-family housing project, the development of a community garden, and the development of a community center.

The City's annual report is available for review at the City Hall or online at www.carbondale.com. For more information, please contact the City of Carbondale at (618) 544-5200.
Summer Work Program Is In Full Swing

Summertime brings about the need for additional workforce due to the increasing number of visitors to the Public Works Department and at Cedar Lake. The summer work program is a great opportunity to continue providing its citizens with quality service. This year's participants include students (9-17 years), Eric Bach (Cedar Lake), Charles Brown (Cemeteries), Louis Butcher (Cedar Lake), Jennifer Donow (Engineering), Tyangela Sylvester (Engineering), Mike Greer (Building & Neighborhood Services), Sheila Harris (Mueller Park), Thomas St Denis (Cemeteries), Craig Kelly (Cedar Lake), Roger King (Cedar Lake), Niala Lewis (Cedar Lake), Teresa Marshall (Cedar Lake), Casey Mill (Cedar Lake), Tim Palmer (Cedar Lake), Michael Parker (City Management), Susan Spurgeon (Police Department), Cami Wheelan (Cedar Lake), Mark Vanhoe (Cedar Lake).

The City has just dedicated our new community garden to a project that will provide an adequate quantity of environmentally friendly water for the people of Carbondale and surrounding area, well into the 21st Century.

Past and present City Council with city employees from the Parks Division in place to meet the needs and requirements of any business or service entity. With the efforts of many others we believe that Carbondale and the greater Carbondale area will be the location of many new jobs in the future. Retail sales and development continue to increase as more prospects study us and like us.

Many, new homes are being built in the community and annexation is continually expanding our boundaries. Top-of-the-line services are provided to make a place to build, buy or rent and live. Our Channel 16 Cable TV showing of Council Meetings and informational shows of Illinois being well accepted. Other government services are available at the facilities, as is the Park District.

We are a volunteer community with many people serving to well on our Boards and Commissions as well as other agencies and civic groups. Please come forward and be more involved in your community.

The relations with SIU-C's students and administration is very strong. We have had good relations with the faculty, students, and the public. The relations between both parties. The Undergraduate and Graduate Professional Student Representatives are provided the City Council with reports at each council meetings and are accorded seating up front so that the council can be more aware of the student body's position on issues before the council.

Your city finances and services are in very good condition, and we desire to keep them at a high level. Your City Council and staff are constantly planning for the future of your city while maintaining these financial conditions and providing essential services to our citizens and visitors.

We plan to have a great fiscal and academic year and with all of us working together positively we can make our Carbondale Community the most desirable area in which to live and prosper.
The City of Carbondale Continues To Accept Rehabilitation Applications

Applications for participating in the City’s Housing Rehabilitation Grant program are still being accepted. The City began accepting applications in mid-May and closed the first round for funding on June 17, 1994. Applications received after June 17th will be processed for funding in subsequent grant rounds. The City received grants from the Department of Commerce and Community Affairs and the Illinois Housing Development Authority to rehabilitate approximately 20 homes. Grant awards will continue to be made until all grant funds have been used. The City intends to apply for additional grant funds if there is a demand for the program.

In order to be eligible, applicants must be owner-occupants of homes located in the City of Carbondale. Applicants must also meet low and very low-income eligibility criteria established by the Federal government. Maximum family incomes by family size are as follows: 1 person, $19,300; 2 persons, $21,950; 3 persons, $24,700; 4 persons, $27,750; 5 persons, $31,850; 6 persons, $34,000; and 7 persons, $36,200. People who meet the eligibility criteria and desire to receive more information are encouraged to contact the Development Services Department at room 318 in City Hall or by calling 457-3248.

The housing rehabilitation work will be performed by private contractors. The City will establish a list of qualified contractors who will be eligible to bid on the housing rehabilitation projects. Contractors interested in doing work under this program should contact the Building and Neighborhood Services Division at 459-5032 to be on the qualified bidders list.

Fire Department Offers Free Home Inspection

In an ongoing battle to reduce the number of house fires in Carbondale, the Fire Department has established a home fire-safety inspection program. This is a complimentary service; there is no charge for an inspection. The inspection is an advisory visit, done only to help Carbondale residents stop home fires before they start.

The firefighters will look at both the interior and exterior of the home for safety problems. They will also give helpful fire prevention recommendations to the residents. Some of the things they will look for are: proper house identification (visible street address), kitchen safety, smoke detector operation, home escape plans, and proper storage of flammable liquid.

Our department is excited about this program and looks forward to visiting with the people of Carbondale to share fire safety and prevention information. If you would like a home safety inspection, please contact the Fire Department at 457-3001 or 335-5113 and set up a convenient time for a free inspection. If you would rather not have a firefighter come to your house and do a safety inspection, we ask that you do your own inspection. Some things to look for are as follows:

- Make sure you have an outside street address that is easily seen from the road and is well-lighted at night. This makes it easier for the fire, police, and ambulance personnel to locate your home in case of an emergency.
- You should know where the outside utilities are located (gas and electricity) and how to shut off the gas in case of an earthquake or other emergency.
- If you have a fire hydrant in your yard, we ask that you keep it accessible by clearing shrubs or obstacles away from it. Remember, seconds count when a fire occurs and firefighters do not have time to clear a path to the nearest fire hydrant.
- If you store flammable liquids in a shed or garage, please keep them in a proper container, locked and away from children.
- Do a yearly cleaning of storage areas and get rid of unused papers, magazines, or anything that contributes to the fire load in your home.
- If you have any electrical problems, call a licensed electrician and have your electric service checked.
- Use extension cords only on a temporary basis, not a permanent wiring. Do not overload the cords because overloaded cords will start a fire.
- Practice safe cooking techniques. Never leave food unattended when it is cooking.

We want to help you with suggestions on how to make your home safer. Please give us a call at 457-3359 or 329-5113. We will gladly answer any questions or schedule a free safety inspection at your convenience.

"It’s That Time Again... National Night Out"

National Night Out is fast approaching. What is National Night Out? National Night Out is a celebration designed to increase awareness of security and bring neighbors together to let the criminals know we are united as a community to combat them. Last year over 8,000 communities nationwide participated. Carbondale will be having its celebration on August 1, 1994, at Turley Park from 6pm-9pm.

There will be entertainment, food, refreshments, and prize giveaways for both young and old. Safety displays will be set up by local Police and Fire Departments and local businesses. Plan to come out and join the fun and learn about how to make your neighborhood safer.

On August 2nd we are asking neighborhoods to get together and turn on all their porch lights as a show of unity against crime. We will give out prizes to the neighborhoods with the most participants. Organize your neighborhood soon to join the competition, if you want to get in on the competition contact Don Pridy at 459-5032 or 457-3359 to register your neighborhood. We hope to see everyone at National Night Out!!
