Carter tabs Vance as secretary of state; Congress likes pick

By Lawrence L. Knutson
Associated Press Writer

PLAINS, Ga. (AP) - President-elect Jimmy Carter announced on Friday his nomination of Cyrus R. Vance, a seasoned diplomatic trouble-shooter, to become secretary of state, and the choice was acclaimed in Congress and the diplomatic community.

Carter then said there will be "a special effort" in the early months of his administration to fashion a peace settlement in the Middle East, and that he will press for agreements with the Soviet Union that would not only limit but would resolve the level of strategic nuclear armaments.

At the same time, the Democratic president-elect put new pressure on the steel industry to rescind its Dec. 1 price increase, which averaged six percent on the type of steel used in autos and appliances.

He said he has no intention of challenging the steel industry's authority to control prices and wages. He said, the constant threat of wage and price controls could prompt unwarranted price hikes by industries seeking to act while they can. Carter said he did not know why the steel industry chose to raise prices now, or whether the hike was "provoked."

"I wish... and still hope that the steel companies might forge this increase into a termination of the increase," he said.

SIU may withdraw offer to Canan-Amoros

SIU's decision to enter into any agreement with Canan-Amoros will be based on the language of the agreement. It is unclear how much longer can we keep it open? Huffman said. Huffman suggested that the agreement's fair, legally binding proposal, was highly unlikely to proceed with the ongoing threat of possible discrimination if the offer is approved.

Huffman said that since HEW considered the agreement fair, it was unlikely to proceed with the ongoing threat of possible discrimination if the offer is approved.

News Roundup

Ireland's sixth president inaugurated

DUBLIN, Ireland (AP) – Dr. Patrick Hillery, a former county doctor, was sworn in Friday as Ireland's sixth president - the third since 1971. Hillery, 53, took his oath in the ancient Gaelic language at a ceremony in the 15th-century Dublin Castle.

Hillery is a member of the opposition Fianna Fail party. He was elected unopposed when Cosgrave's Fine Gael-Labor coalition declined to put up a candidate.

Brink's truck spills millions on Interstate 94

RUSSELSVILLE, Ky. (AP) – A Brink's truck overturned on ice-slicked Interstate 94 near the Wisconsin border and split open Friday, spilling millions of dollars in currency and coin, authorities said.

The truck, making its regular run from Milwaukee to Chicago, slid off an embankment and split open about a mile south of the Wisconsin border, authorities said. The driver was not injured, but the truck was leaking its contents.

The truck will not be buried but will be kept at the Illinois State Highway Department in Springfield, opening on July 4, 2007, as the nation begins celebrating its centennial.

I'm through with Vietnam,' four-year-old girl tells judge

BENTON (AP) – Four-year-old Rachel is through with Vietnam, her teacher at a special education center told the county's Juvenile Court on Thursday.

The statement, made in a pre-trial conference, was possible because Rachel's case was one of 150 cases which were handled by the county's Juvenile Court.

Gilmore's execution delayed by court

By Ron Barker

Daily Egyptian Writer

Golden State Killer to be executed on March 23rd

By John Q. Public

Daily Egyptian Staff Writer

SALT LAKE CITY (AP) – Convicted murderer Gary Gilmore, who was scheduled to die Monday before a firing squad, has been granted a stay of execution by a federal judge on Wednesday.

Acting on a petition brought on behalf of Gilmore's mother, the court delayed the execution to give Gilmore time to appeal his conviction.

The court added that Gilmore needed to respond to the petition and the court's order.

Gilmore, who insists he wants to die rather than spend the rest of his life in prison, is scheduled to be executed on Friday.

Huffman said that since HEW considered the agreement fair, it was probably not going to proceed with the ongoing threat of possible discrimination if the offer is approved.

Huffman said that in fairness to the University, the offer should not be kept open indefinitely.

Arthur M. Samuelsen, who is scheduled to head the board of the board of directors, agrees that the offer should be held open indefinitely.

Group's study of CCHS money woes to be aired

As an advisory committee to the Carbondale Community High School (CCHS) Board of Education, the City Council is planning to discuss Hill House use permits in a special session Thursday night to discuss final reports on the school's financial situation.

Included in the discussions will be an analysis of Hill House's fundraising situation and future plans, according to PLIGHTS Secretary Peg Stufflebeam.

The committee has been meeting weekly to discuss the issue and make recommendations to the city's school board.

The committee will have an opportunity to comment on the recommendation in a meeting at 7:30 p.m. in the CCHS Center for the Arts, according to PLIGHTS Secretary Peg Stufflebeam.

The committee is made up of 14 members who are responsible for assisting the school's superintendent and the board of education to help the district's financial situation.

Following its investigation, the group is expected to present the findings to the superintendent and the board of education to help the district's financial situation.

Since the committee is an advisory panel to the city, it does not have the ability to take action on the recommendation.

According to a time schedule established for the committee, its final report should be submitted by Dec. 18.

Discussion of personnel at the high school and future plans are expected as well. The committee has been meeting weekly to discuss the issue and make recommendations to the city's school board.

Foreign children face learning obstacles

By Chris De Salvo
Daily Egyptian Staff Writer

Foreign children enrolled at Unity Point Elementary School in District 140 are placed in grade levels according to age and regardless of their knowledge of English.

Gale Predeellick, a nine-year-old boy from Thailand, enrolled in the fifth grade at Unity Point. Ebrahim Medamam, a 13-year-old Iranian boy, enrolled in the sixth grade. Both are learning beginning English reading skills from fast grade-level instruction books.

Gale and Ebrahim are among six foreign students from Thailand, Vietnam, Iran, Jerusalem and Taiwan who are placed in grade levels according to learning ability, scheduled for Thursday.

As a graduate student in elementary education from Vietnam, taught English as a second language to seven Vietnamese students for 35 hours a week. Paton said Dinh was not rehired this year because of a lack of funds.

Sixty-five of Unity Point’s 400 students are tutored by the remedial teachers. Of the 75 only six are foreign students, said Patricia Fitch, part-time remedial teacher of grades six through eight.

Fitch said it generally takes the newly arrived foreign child about three months to grasp first grade reading skills and about a year to reach the third grade level.

Ebrahim, the Iranian child, was at the top of his class in Iran, but at Unity Point he reads from a first grade reading book while his classmates study sixth grade-level science books, said Judy Daugherity, sixth grade teacher.

"He’s missing his science education but is above average in arithmetic and geography. To put Ebrahim in a lower grade level would be an insult to his intelligence," Daugherity said.

Linda Walker, Gale’s teacher, said Gale’s reading skills are equal to a first-grader. He is a fourth teacher in the fifth grade level. Six of the 35 are foreign children.

"I’d like to spend more time with Gale, but I have 34 other children to teach besides Gale," Walker said. She is able to give one-on-one instruction to Gale for an hour every day but she said Gale needs constant attention in the beginning stages of his reading instruction.

Walker said Gale will be placed chronologically in the first grade reading level for at least a year.

Margaret Lindbliast, second grade teacher, said the language barrier impedes only parts of a foreign child’s education. She said arithmetic and geography are more easily grasped by foreign students, because teachers and pictures can be used to illustrate the problems.

"They’re beating us in math," Lindbliast said. She said one Thai student’s parent complained that his son was taking too many courses. In Thailand, there is no emphasis on the three R’s—reading, writing and arithmetic.

With varying degrees of attention, the young minds in Mrs. Walker’s fourth grade class work on a newspaper assignment.
Hill House: Unacceptable to residential areas?

By James B. Hewette

(EDITOR'S NOTE: Hewette, a Carbondale resident, is an outspoken critic of Hill House, a non-profit organization dealing primarily with persons with drug problems by offering therapy in a residential environment.)

A story in the Southern Illinoisan newspaper Nov. 11, which stated a 4 to 6 roll call vote by the Carbondale Planning Commission in connection with the Hill House special use permit hearing was misleading.

The vote was not unanimous on the seven special use performance standards as outlined in Section 15-2-3J, paragraph C, page 35 of the planning, zoning and subdivisions publication for the City of Carbondale.

Votes were taken apparently on each of the seven standards for each of the two Hill House facilities and there were dissenting votes on three standards for each facility. In fact, on special No. 3, there was a 3 to 1 standoff in the vote on whether each facility met the standard. Standard No. 3 states: "The Special Use will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, our substantially diminish and impair property value with in the neighborhood."

Obviously, three of the commission members present felt the Hill House facilities are injurious to other properties in the neighborhood.

Moreover, on the final evening of the hearings (Nov. 18) two of the Planning Commission members were absent. Judging from their questions and comments during the hearings on Nov. 3, we feel that these two commission members would have supported our case. Also, we feel the entire proceedings were inconsistent with the rules for conducting hearings of this nature. This is to say that unlimited time was allowed the the Hill House representatives to substantiate the issues. Therefore, we feel this testimony is irrelevant to the seven items required in the special use performance standards referred to above.

Our witnesses on the other hand were interrupted and in one instance prevented from pursuing their line of testimony which did relate to the seven zoning requirements referred to above. (A review of the tapes will confirm this evaluation if they haven't been erased.)

We objected to the staff report read by Mr. Roger Peterson (a member of the planning division staff), in that it omitted the human element. The violation of the established mores of a residential environment... although the resultis fear and volatile aspects that these correctional installations impose on our neighborhood are what this controversy is all about. Accordingly, when Mr. Peterson chose to eliminate the human element in his study he closed his eyes to the problem. Therefore, we feel that this study confuses the issues.

The element of fear prevails throughout our neighborhood despite Mr. Paul Reitman's (director of Hill House) efforts to minimize it in the Nov. 11 Southern Illinoisan article. It is a real depressing experience among those who live in close proximity to these institutions. There is more than ample evidence to substantiate these fears because these Hill House occupants who are users of dangerous drugs, committed by the Department of Corrections and the Bureau of Prisons are allowed to come and go as they please anywhere they wish.

We asked for, but were unable to get, the crime statistics of the Hill House occupants. However, we feel that even if provided this information it would not have been all that revealing. Since the conclusion of these hearings, we have received documentary evidence to substantiate the charges. A. Hogan of the Carbondale Police Department is also vice president of Hill House, Inc.

Mr. Reitman did admit that there was an average of three misdemeanors per week while the Hill House occupants resided in the City Hall complex on East College Street. This appears to have been the best place for them. Therefore we wonder why they were moved from there to our residential neighborhood.

Mr. Reitman also admitted that there were cases of drug overdoses and problems with the continued use of marijuana and beer. However, he refused to answer when asked how many such overdoses had occurred. Also it is significant to note that he did not say the violations were reported and that he did not state on record that drug overdoses had occurred. It is also significant to note that there is not effective rehabilitation being provided at Hill House, Inc.

We have known since August 1976, when Mr. Finch testified before the City Council that Mr. James Peterson, a planning engineer, had asked Hill House, Inc. to go anywhere but in the support of Hill House, Inc. According to Mr. Finch's testimony, Mr. Rayfield wrote letters to financial institutions in which he portrayed Hill House, Inc. as an acceptable business, one that was in compliance with city codes and ordinances, etc. With Mr. Hogan's connection with Hill House, Inc. as vice president, we are beginning to wonder if there could be other conflicting interests within other elements of the city administration.

Why promote nuclear energy when we've got the sun?

By Jim Wierz

Daily Egyptian Staff Writer

There is no good reason why we should have to worry about nuclear radiation. At least it seems that way, shouldn't be, and is.

Nonetheless, two weeks ago a radioactive cloud penetrated the United States courtesy of the one billion curies of iodine-131 released by the Nuclear Regulatory Protection Agency (EPA) said the possibility of heavy contamination depended on whether a rain fell while the clouds drifted ominously through our air.

I was more than relevend to see clear blue skies over Carbondale on the Saturday when the radioactive cloud was passing through.

So we lucked out that time. However, we must never remember the future and the past.

Remember the future because the effects of radiation linger on forever. Remember the past because it provides us with the first clues of the monster we created and have no use for now.

Nuclear power is a step forward, but in the end it has become outmoded and unreliable because of radiation's devastating effects. Future generations will look back on the nuclear plant explosion with nuclear power lines with the radioactive waste produced. When marks come up, with an adequately sensitive instrument, to the height of this criterion.

Some or later, the marks will cut right through the earth and the sun.

Whether it takes 30 years or two centuries, it's a monkey that should be on anyone's back, either our own or that of our descendants.

You can't bury the juice, as the radiation will contaminate the soil and underground water supplies. Your town, your state, the world will be worse off if the decision is made to develop nuclear energy.

Why promote nuclear energy when we've got the sun? It is a waste of money that should be spent on other energy sources.

Jack Kloever, owner of the Dairy Queen, sells ice cream by summer and Christmas trees by winter. Kloever, who has been selling trees for 23½ years says this may be his last. (Staff photo by Marc Galassini)

Activities

Saturday

Alpha Kappa Alpha, meeting, 10 a.m., Student Center, University & Southeast Missouri State University, Pullman Pool.

Sunday

aSU College Republicans, meeting, 9 a.m., Student Center, Ballrooms A,B,C,D.

SGAC Film, "Touch of Evil," 6:30 p.m., Student Center, Omaha Main Room.

SGAC Lectures, "Powerful New Tools for Research," 8-10 p.m., Student Center, Omaha Main Room.

SGAC Lectures, "Heavyweight Championship Fight," Free, 8-10 p.m., Student Center, Third Floor.

Tree Trimming Party, 8-10 p.m., Zeta Phi Beta, Room C.

Women's Swimming, SIU v. University of Missouri at Columbia, Memphis State University.

Father dies, mother critical, faulty heating system blamed

A Murphysboro man has been found dead and his wife critically ill from an apparent malfunction in the heating system of their trailer, a spokesman for the Jackson County Sheriff said Thursday.

John S. Etherton, 31, of Eastgate Trailer Park, Murphysboro, was pronounced dead on arrival Thursday night at St. Joseph's Memorial Hospital in Murphysboro.

An Elberton's wife, Kathy, 36, was listed in guarded condition at the hospital Friday afternoon, the spokesman said.

Their one-year-old boy Charles was unharmed, the spokesman said.

According to the spokesman, the cause of death was listed as carbon monoxide poisoning, the furnace apparently malfunctioning, sending the poisonous fumes into the trailer.

Elberton was a Murphysboro policeman. The trailer court is located just east of Murphysboro on State Highway 15.

East Campus Resident Affairs Council, "extravaganzas," free bowling, pool, football, and free rental of shoes, 5 cents noon-8 p.m., Student Center.

Special Advent Workshop Service, 10 a.m.-12 p.m., 815 S. Illinois Ave. Cozg Supper, prepare and share a meal, 5 p.m., 815 S. Illinois Ave.

Campus Crusade for Christ, meeting, 7:30-10:30 p.m., Student Center, Activity Room D.

"I am the living death" the memorial day on wheels I am your food that destroys your john wayne home come home thou art the bough of July firecrackers exploding in the grave.

July 4, 1976, was Ron Kovic's 30th birthday. He is living proof of the horror of war being painless and not to be feared. And his second tour of duty in Vietnam, the young Marine sergeant caught a bullet that shattered his spinal cord. He would never walk, never again feel anything in his life. He would never know that kind of pain.

"Born on the Fourth of July" is a sensitive, painful, first account of Ron Kovic's journey through a nightmare that scarred and ended when a 30 caliber-shrapnel ripped through his back and left him unable to walk in Vietnam.

He had to walk back, read, and defend the American way. He retained a "living corpse" and slowly began to choose his way with those who had served America in Southeast Asia.

A new Ron Kovic emerged, a person shaped by rage, pain and disillusionment. This is his story.

A Review

It is his story, his indictment of those who would have us believe Vietnam was right.

In one big bang, they have taken all it from me, in one clean sweep. Kovic writes. His moving story recounts the anger he felt at not being able to control or even feel his body, the living he had been robbed of. His honesty is painful but necessary, in allowing us to see what he has been through.

Kovic recounts tales of military pay, how there is nothing he can do. Kovic write. His moving story recounts the anger he felt at not being able to control or even feel his body, the living he had been robbed of. His honesty is painful but necessary, in allowing us to see what he has been through.

It is his indignation queal that brings his point home to us. "He had never been anything but a thing to them, a thing to put on a uniform on and train to kill, a young thing to run through a mock grenade, a cheap, small nothing to make mince meat out of, to use and throw himself," writes Kovic.

Ron Kovic is the American hero, the person who fought for what he believed in. His "Living Death" is a lesson for us all. Through his honest, emotional account, we see firsthand the awful reality of war, of those who were killed and maimed. "I sometimes feel that the only way to buy the war is to kill those who has been killed in the war," Kovic says. He was beaten and jolted for his trouble.

Recreation Building to offer unduplicated sports facilities

By Brenda Gamble
Daily Egyptian Staff Writer

Pipe brightly painted in shades of orange, yellow, blue and green are the first thing that catch the eye of anyone who walks through the Grand Street entrance of the new Recreation Building.

Due to be finished sometime in February, the building is in varying stages of completion. Bill Beyer, assistant dean of student life for campus recreation, estimated the building has cost about $9 million.

The Olympic-size pool is just over 66 feet long and 25 feet wide. "It is so wide across an Olympic pool is long," Jean Paratore, coordinator of women's intramurals, said.

Sixteen feet deep at its deepest point, the pool has four one-meter diving boards, three three-meter diving boards and a free-rolling diving platform. Observing the pool, one can see glass-enclosed observation areas, a spectator area at one end of the pool or from the underwater observation window.

You could have recreational diving in the middle, recreational swimming on one end and intramural swimming on the other end, and none would interfere with the other," Beyer said.

Along the bottom level of the pool several activity rooms look into the pool area including a weightlifting room, a martial arts room with a padded floor, and a golf room with computerized golf machines and nets for practicing drives.

Immediately behind the pool observation deck will be a dance studio which will double as a practice room for fencing.

A gallery runs between the eight baseball courts and a huge room containing three basketball courts, side by side. In the room will be two extra basketball hoops, six volleyball courts and 12 badminton courts.

Recessed floors are being installed in the basketball and handball courts. Beyer said the contractor estimates it will take at least six weeks to install the floors, which contain no nails.

Lounge will be located in several areas of the building. Along with the equipment rooms inside, the building will feature a drive-up window for issuing equipment to students who wish to use it elsewhere.

Students will not have to pay for using the equipment "unless they don't bring it back," Paratore said.

Beyer said they hope to expand available equipment to include cases, backpacks and other equipment.

Locker rooms in the building have been designed for maximum space efficiency. Four saunas are adjacent to the locker rooms—two for men and two for women. Each is operated independently so the individual temperatures may vary. Beyer said.

One multipurpose room has not been equipped for any particular use. Beyer said its use will depend on what the students want, perhaps archery, table tennis or an arcade.

"We will not duplicate any of the facilities currently available elsewhere on campus," Beyer said.

The building's unique architectural style includes this exposed stairway, which maintenance workers must climb to reach some of the facility's plumbing.
### Orienteers among nation's best

By Pam Bailey

Junior cage sign-up slated

The Carbondale Junior Sports basketball program will be held at the Carbondale Park Community Gymnasium at 10 a.m. on Dec. 4. The registration deadline is Dec. 11. The fee is $5 for ages 8 through 14. For information, call Charles Reno at 437-9937.

Road Runner club will race Sunday

The Southern Illinois Road Runners' winter race series will be held Sunday in Carbondale. There are 10 miles and 15 miles scheduled in the race series. For more information, call Bill Sassen at 222-5552.

Flag football champs crowned

The Carbondale Park District flag football champions are the Roadrunners in the 10-and-under division and the Buffaloes in the 11- and 12-year-old division.

USOF-sanctioned meets held across the country through the year.

Orienteering is a combination of running and navigation with a map and compass.

On the elite course among men aged 25-30, rankings were Jim Hertz-4, Lou Strubhart-4, Pat Dunlavy-4, and Myron Lovce-4. On the elite course, Kathy Sharp ranked seventh among women aged 25-30 and Ken Ackerman, 84, in the junior varsity division, ranked 37th of 117.

The 11th-ranked basketball team will play Missouri-Kansas City at 7:35 p.m. Saturday in the Arena. It will be the Salukis’ last game before the next AP poll comes out, and a win could move the squad farther up in the rankings. URI’s first regular season poll will also come out Saturday.

The game could turn out to be a high-scoring affair because the Fighting Kangaroos average 100.7 points per game in their first five games of the season. The Kangaroos suffered their first loss of the season Wednesday and are now 4-1. Corky Abrams will start for SIU and is in good shape following an ankle sprain last Sunday. He missed the William Jewell game the following day. Although the Kangaroos are in the NCAA, SIU Coach Paul Lambert feels that his school is 9-12,000 has a good basketball team.

"The play a full-court zone press, and it will be good for us because it will be the first time we face it this year," he said. "The team will need to work on it because they will see the full-court press again Friday against Pittsburgh in the first game of the Pittsburgh Classic. Lambert added, "We’ll see it numerous other times this year, also."

**Tickets on sale for cage games**

The SIU Athletic Ticket Office said Friday that tickets are still available for the Saturday and Monday Saluki basketball games, at the Arena. SIU hosts Missouri-Kansas City Saturday and Northeast Oklahoma State Monday. Both games start at 7:35 p.m.

For the general public, chair seats cost $4, and bleacher seats cost $2.50. Children get in for $1. Tickets for SIU students cost 50 cents. The ticket office in the Arena is open from 9 a.m. to 4:30 p.m. The box office opens at 7:35 p.m.

**Basketball radio coverage set**

Three area radio stations will broadcast Saturday’s and Monday’s Saluki home basketball games.

KSIU, 92 FM, will air Basketball Preview at 7:15 p.m. The pregame show starts at 7:35 p.m. The game broadcast with Bill Criswell as play-by-play announcer will start at 7:35 p.m.

WJPF, 1340 AM, airs its pregame show at 7:20. The game broadcast features Ron Hines as play-by-play announcer and Mike Powell as color commentator.

**Payton can beat Sayers’ Bears rushing record**

SEATTLE (AP) — Chicago’s Walter Payton, the National Football League’s leading rusher, will be out to break Gale Sayers’ single-season team record Friday when the Bears visit the Seattle Seahawks at the Kingdome.

The 5-foot-9, 217-pound Payton, a seven-year veteran, leads the NFL with 1,158 yards on 270 carries, and an average of 4.3 yards per attempt. Sayers set the Seattle to break Sayers’ club record of 1,381 yards set in 1968. Payton, who averaged 12 touchdowns down, is also within striking distance of Sayers’ rushing total of 1,747 yards on 218 in a season set in 1965.
