A flock of Canada geese drink from puddles in a field near Old Route 13 near Crab Orchard Wildlife Refuge. The rain is expected to continue through the weekend.

Budget plan calls for drastic cuts
Plan is "flawed," Simon says

By William Walker

WASHINGTON (UPI) -- President Reagan Wednesday followed the glowing optimism of his State of the Union speech with the harsh reality of his 1987 budget — a $944 billion outline calling for drastic cuts in middle class programs, a continued military buildup and no new taxes.

Reagan's spending plan was peppered with cuts intended to meet the requirements of the Gramm-Rudman balanced budget law calling for a deficit of no more than $144 billion for fiscal 1987, which begins Oct. 1, Reagan proposed a $143.5 billion deficit — by claiming $38.2 billion in budget cuts in areas ranging from Medicare to education, health to housing assistance.

But Republicans and Democrats alike on Capitol Hill protested the severity of the cuts and called for a tax hike — especially an oil import fee — to help ease the pain. Reagan insisted that the "military get a 3 percent real increase in funding after inflation is taken into account, up to $31.6 billion; that drug enforcement and AIDS research money go up and that the space program funds and international security assistance be increased."

"We can hardly back away from our defense build-up without creating confusion among friends and adversaries alike about our determination to maintain our commitments and without jeopardizing our prospects for meaningful arms control talks," Reagan said in his budget message. "And frankly we cannot afford faith with those poor and elderly who depend on federal programs for their security."

The president kept to his repeated pledges not to cut Social Security or welfare benefits, but proposed large slashes from Medicare, Medicaid, child nutrition programs, health and veterans' and civil service pensions.

Reagan said government programs such as the Small Business Administration, Amtrack grants, Urban Action grants, the Appalachian Regional Commission among others are "outmoded," no longer affordable and should be drastically reduced or eliminated. Other federal programs can be better provided by the private sector, he said, including the sale of national power marketing administration facilities, the establishment of the Naval Petroleum reserve.

In his budget message, Reagan said the federal deficit is a "dark and threatening cloud on the horizon" but also an "opportunity to construct a new, leaner, better focused and better managed federal structure."

Reagan proposed no new taxes in fiscal 1987, though he did call for increased "user fees" on federally guaranteed wages, rent and utilities, parks and inland waterways. On Capitol Hill, there were warnings that Reagan's budget will not remain intact for long, and rumblings about using an oil import fee to stave off some of the harsh budget cuts at the same time reducing the deficit.

The Senate Budget Committee Chairman Pete Domenici, R-N.M., calling for a "summit" on the deficit, said at a hearing on Reagan's budget that tax increases should be included in a deficit cutting package as the "glue that binds the package together" along with "substantial domestic cuts."

"I don't see how we can get out of this without some kind of revenues," added Sen. Ernest Hollings, D-S.C. "We will recommend revenues."

But budget director James Miller insisted at a hearing later Wednesday that a "tax increase would jeopardize our plan to cut."

Liquor board concerned with laundry-bar

By Tricia Yocum
Staff Writer

The Carbondale Liquor Advisory Board tabled a request for a liquor license for Clothin Pin Laundry after members expressed concern about what type of precedent granting the request might set. If William Mau, owner of the establishment located at 115 S. Illinois Ave., were granted a liquor license, "we essentially won't have a leg to stand on" if 10 laundries wish to implement bar facilities, said John Mills, board chairman.

The board plans to discuss the request further at its meeting next month.

Mau said that there is a market for a laundry which serves liquor in Carbondale, and he expects more to open if his request is granted, although he said he would not add one at any of the other laundries he owns.

Some laundries have patrons who would not be comfortable in such an atmosphere and the lost business could not be offset by a bar facility, he added.

Mau said that a friend of his operated a laundry-bar establishments in Alton and better managed federal structures."

If William Mau, owner of the establishment located at 115 S. Illinois Ave., were granted a liquor license, "we essentially won't have a leg to stand on" if 10 laundries wish to implement bar facilities, said John Mills, board chairman.

The board plans to discuss the request further at its

"excellent location" for the venture, he said, because the coin laundry is already in operation and space for the bar is available in the area that previously housed Generic Copies.

Board members expressed some concern that the laundry would be the closest liquor establishment to the SIU-C campus and might receive traffic from students on their way uptown, some of them under 21.

City Clerk Janet Vaught said that although people under age 18 are not allowed in the bars uptown, they would be allowed in Mau's laundry.

Mills said the problem of underage drinking needs to be addressed, especially since minors would be allowed in the laundry part of the establishment.

"The location could be a blessing or it could be a curse," Mills said.

Adults would be allowed to carry drinks from the bar to the laundry area, Mau said. However, a full-time attendant would be on duty who could watch for people allowing underage friends to share their drinks.

Shuttle’s rocket booster might have been found

CAPE CANAVERAL, Fla. (UPI) — Space agency officials said Wednesday recovery crews were trying to determine if a large object detected on the debris-littered ocean floor was one of the destroyed shuttle Challenger’s solid rocket boosters. Search teams near the Florida coast spent the day concentrating on about a dozen underwater ‘‘chunks,’’ including an area where NASA officials earlier said one of the ship’s two solid rocket boosters was thought to be resting.

Bomb explodes in Parisian shopping complex

PARIS (UPI) — An explosion ripped through a sportswear store in the crowded Les Halles shopping complex Wednesday, injuring at least nine people in the third blast in Paris in three days. The nearby Georges Pompidou Centre was evacuated an hour later because of a bomb threat. The bomb went off shortly after 6 p.m. in the FNAC-Sports store in the subterranean level of the Les Halles Forum, a modernistic complex of boutiques built on the site of Paris’ famed central market that dates to the year 1110.

Report says U.S. can deter Soviet attack

WASHINGTON (UPI) — Defense Secretary Caspar Weinberger said in his annual report to Congress Wednesday the United States has strengthened its strategic nuclear forces to the point where they can adequately deter a Soviet attack. Weinberger’s statement marked the most optimistic assessment of the U.S.-Soviet nuclear balance since the Reagan administration came into office five years ago.

Hormel offers reward for extortion letter data

AUSTIN, Minn. (UPI) — Geo. A. Hormel & Co. offered a $10,000 reward Wednesday to catch those responsible for an extortion letter threatening to poison products of the Strubekound company, the FBI said. The offer came amid 40 reports of package tampering in the Minneapolis area and on the eve of a mass rally by Austin meatpackers to discourage replacement workers from entering Hormel’s flagship plant.

Anglo-Soviet spy swap set, newspaper says

HAMBURG, West Germany (UPI) — Soviet dissident Anatoly Shcharansky and 11 Western spies will be swapped for 11 East bloc agents next Monday or Tuesday, and the exchange will be followed shortly by a separate Anglo-Soviet swap, a West German newspaper reported Wednesday. The mass circulation daily Bild, which on Sunday broke the news of the imminent East-West swap, said Britain and the Soviet Union are secretly negotiating an exchange of “several imprisoned Britons and Russians.”

Stiff prison terms expected for neo-Nazis

SEATTLE (UPI) — Long prison terms are expected to be dealt Thursday to the first of 19 neo-Nazi sect members being sentenced for their crimes in seeking a white revolution based on holdups, assassination and terror. U.S. District Judge Walter Mc drover, who presided over the trial, has so far handed out the maximum sentences recommended by prosecutors for several defendants who pleased guilty in the extensive case.

Three more patients receive artificial hearts

By United Press International

Doctors said Wednesday the third patient in the United States to receive an artificial heart this week is awake and alert, but still in critical condition. On Sunday and Monday artificial hearts were placed in the chests of a 40-year-old woman in Tucson and a 39-year-old man in Pittsburgh and, on Tuesday, in a 41-year-old man in Houston. All three were on the brink of death.

Amateur’s photo shows shuttle in flames

CAPE CANAVERAL, Fla. (UPI) — A picture of Challenger’s launching taken by an amateur photographer shows what may be a section of the doomed spaceship emerging in flames from the explosion of its external fuel tank, an engineer said Wednesday. The photo clearly shows a large abnormal exhaust plume spewing fire near the base of Challenger’s right-side booster rocket seconds after the explosion that destroyed the shuttle and killed its seven-member crew.

City needs more insurance, report says

By Jim McBride  
Staff Writer

The city's current liability insurance coverage is adequate but should be expanded in the future to provide more comprehensive coverage, according to a report prepared for the city by an independent consulting firm. The report, prepared by the Wyatt Co. of Chicago, indicates that the city's insurance coverage should be expanded in several areas.

Major recommendations included in the report are for the city to add to its coverage:
- An "all risks" replacement cost coverage for all city property.
- The report indicates that the city now operates properties valued in excess of $15 million and that by obtaining an "all risks" policy, "all causes of loss" to the city would be covered, with the exclusion of floods and earthquakes.
- An Armed Forces Endorsement to waive a coinurance requirement of the city's current property insurance policy. The city's property coverage now includes a 90 percent coinurance clause requiring the city to purchase coverage equal to at least 90 percent of the total value of its insured property. Under the clause, the city would be liable to recover only a portion of its losses, if sufficient coverage limits are not purchased.
- Specialized service interruption coverage to protect the city's essential services from major service disruptions caused by power outages.
- Boiler and machinery coverage under a comprehensive basis to provide coverage to repair equipment in the event of an accidental breakdown.
- The definition of the named insured on all the city's liability insurance policies is broadened to include all city commissions, committees, authorities, voluntary associations and other units operating under the city's power of control.

USO award good, but needs action

THE UNDERGRADUATE Student Organization claims to represent students and has a number of officers. It has taken seriously its endeavors in this matter, but has a funny (not "ha-ha") way of expressing that desire. It recently presented the John Henry Cockrath Award, named after the "official USO mascot." The presentation of the award was meant to be a humorous protest against the council's recent approval of changes in the zoning laws. The USO thinks the changes will force unrelated students who want to live together to rent substandard housing. Where many of John Henry's relatives, it was pointed out, still reside is in not-so-nice areas of town. The USO hopes to point out, through the award, that code enforcement in these areas would eliminate the problems that caused the council to make the zoning changes in the first place.

WHAT A GREAT WAY to get taken seriously — presenting the council with an award named after a dead insect that probably never existed, the USO hopes to make its point. However, the award was intended to be humorous. Even when the USO's message was not popular, the giving of the award did not diminish its respect for his efforts in general.

THE CREDIBILITY of the USO, however, rests upon the slim shoulders of its officers, senators and commissioners, which change each school year. Their efforts to establish credibility can be quickly undone by questionable actions or statements, although this award was entirely appropriate. In that case, the USO commissioner presenting the award likened it to a Mr. Prokopenko's "Golden Fleece," awards, any true comparison might be unfavorable to the USO. Sen. Prokopenko is, after all, a respected man, having been a member of Congress for almost 30 years. And through his awards, he has managed to point out in an attention-getting manner waste and red tape in government by recognizing the wrongs. Even when the USO's efforts are not popular, the awarding of the award did not diminish its respect for his efforts in general.

Awarding a John Henry is fun — but real action must back it up. If by acting professionally, responsibly and rationally in protesting, the USO can make a point and win the USO's support, it may accomplish more towards helping students than awarding a John Henry. The USO's different and effective measures are essential for any flight into space, such as platinum, can have any sympathy of their students. But now that the laughing is over, it is time for the USO to get serious.

Awarding a John Henry is fun — but real action must back it up. If by acting professionally, responsibly and rationally in protesting, the USO can make their point and win the USO's support, it may accomplish more towards helping students than awarding a John Henry. The USO's different and effective measures are essential for any flight into space, such as platinum, can have any sympathy of their students. But now that the laughing is over, it is time for the USO to get serious.

Nathanson, the film's narrator, should know about abortion. He directed the world's largest abortion clinic and performed over 5,000 abortions.

Ian Donald, M.D., the inventor of ultrasound and the world's leading authority on its use and interpretation recently issued a scathing statement: "Having had experience in the ultrasound development and exploitation of diagnostic ultrasound from 1955 onwards to 1981, the last four years of which were taken up with the filming of "The Silent Scream" in South Africa, I have studied Nathanson's videotape film not less than four times and affirm that I am of the opinion that the fetal activities depicted by ultrasound real-time scanning in this film are not the result of artifact, intentional or otherwise."

GARRY TRUDEAU

Film facts well documented

The eyes of the world are once again directly on the teapot of abortion. For the recent "shuttle catastrophe" it seems only appropriate to have the teapot of abortion once again on the West Coast. To the many connections of the space shuttle and South Africa's apartheid policy are two different ball games. However, presently, one cannot exist without the other.

It is very unfortunate that the civilian astronaut would be aboard this particular flight. I'm sure the American people, as well as the rest of the world, sends the families of the deceased their deepest sympathy. But I wonder if the miners in South Africa, who work under extremely oppressive conditions in their search for the metals that are essential for any flight into space, such as platinum, can have any sympathy of their students. But now that the laughing is over, it is time for the USO to get serious.

Today there are approximately 50 American corporations still doing business in South Africa. South Africa is an apartheid country. For the recent "shuttle catastrophe" it seems only appropriate to have the teapot of apartheid once again on the West Coast.

It is very unfortunate that the civilian astronaut would be aboard this particular flight. I'm sure the American people, as well as the rest of the world, sends the families of the deceased their deepest sympathy. But I wonder if the miners in South Africa, who work under extremely oppressive conditions in their search for the metals that are essential for any flight into space, such as platinum, can have any sympathy of their students. But now that the laughing is over, it is time for the USO to get serious.

Recently Shar Rednour wrote a letter attacking the credibility of the "Silent Scream." Although the accuracy of the film is well established, some may not know that All accusations have been answered in a book written about the film: "The Silent Scream," by Don Smith and Don Tanner, American Portrait Films Books, Anaheim CA, 1985.

In 1985, American University held the first conference in Atlanta, GA. John Henry, who was in attendance, asked the panel why it was a threat to justice everywhere. If America's claim of freedom, justice and equality is in fact a true claim, then it should be practiced, not just preached. Above all, it should be remembered that the American government that "God don't like ugliness" and the practice of racial separation, as in apartheid, is an ugly practice.

— Nevil Carril, graduate student, Rehabilitation Counseling and Administrative Services.

Finally, the facts are well documented. The cortex in the brain of the fetus is not developed enough to feel pain. The cortex is not needed until the final period when the head of the fetus is fully formed. The cortex is not needed until the final period when the head of the fetus is fully formed. Ultrasound procedure is not needed to "crush" the baby's head. Warren Herrn, practicing abortionist and author of a 1964 book on performing abortions ("Abortion Procedures"), says that forceps are used during week 12 and 13 abortions. The head of a 12-week-old baby is about 18 mm, and the cervix is not dilated more than 10 mm. If the fetus is still alive, it is not dangerous to perform abortion. Shar's solution: kill them off.

"If abortion is not allowed, there will be 1.5 million or more unwanted children would be born." Current estimates have that about 1 to 1.5 million couples in the United States who cannot physically have children would love to have children.

"It's my body!" The baby is in the mother's body, but it is not her body. If the mother were her body, she could have the same genetic structure as its mother; it does not. We have had over 13 years of legalized murder in our country through legalized abortion, and the mothers are just as much a victim of abortion as the babies. These mothers need our emotional, physical and financial support. But when someone attempts to flaunt the killing mentality, the error in that person's thinking must be exposed. — Wayne Helmer, associate professor, Mechanical Engineering and Energy Processes.
It (Reagan's budget) has the same unworkable mix of too much for the military and too little for people with great need.

— Gen. Paul Simon

Mormon bomb suspect linked to site

SALT LAKE CITY (UPI) — Witnesses placed Mark Hofmann at the site of bombings that killed two people, including one victim who warned the Mormon documents dealer his allegedly fraudulent deals were catching up to him, court papers say.

One witness, the papers disclosed, told investigators Hofmann could face criminal charges and excommunication from the Mormon church for his alleged dealings in forged documents.

Another witness cited in the document said he saw Hofmann carrying a package addressed to one of two bombing victims who later told police they saw the documents dealer near a site of bombings.

Steven Christensen, 31, told Hofmann the alleged fraud could "result in legal action, possibly "criminal charges," the court paper said. Hofmann's lawyer has said he will seek membership in the LDS (Latter Day Saints) Church, "the court paper says.

Hofmann was charged Tuesday with two counts of first-degree murder in the Oct. 15, 1985, bombing deaths of Kathleen Sheets, 50, wife of Christensen's business partner, J. Gary Sheets.

Christensen was killed when he picked up a booby-trapped package at his downtown office. Sheets died when she picked up a similar package, the paper said.

Hofmann was linked to Christensen and Gary Sheets by an early Mormon document called the "White Salamander letter," which Christensen signed as president of Hofmann's church, and later donated to the Mormon Church.

Court documents also allege Hofmann sold more than a dozen supposedly historic documents to two collectors, including the Mormon Church, and that all of them were fakes, forgeries, non-authentic copies or were not the items he claimed.
Chem lab explosion injuries five

By John Tindall
Staff Writer

An explosion in a chemistry laboratory which caused minor injuries Monday to five students was prevented by a Plexiglas shield from becoming a serious situation.

Chemistry Department Chairperson Richard Tyrrell said excessive heat may have caused a stopped bottle of chemical waste to explode in Room 303 in J.W. Neckel Hall.

SIU-C police reported that Maria Adamakou, who was about 15 feet from the bottle when it exploded, was treated for a hand cut at Carbondale Memorial Hospital. The other four students received minor cuts, but were not treated at the hospital, police reported.

Fragments of the exploding waste bottle were deflected by an exhaust hood behind the bottle and were not stopped by the shield, killing most of the injuries, Tyrrell said.

Besides Adamakou's injury there was "apparently nothing significant in the way of injuries," Tyrrell said. Other students washed off the chemicals they had been sprayed with, he said, but no one else was treated for injuries.

Tyrrell said the chemistry department had a policy of collecting chemical waste materials in bottles from all the labs. SIU Pollution Control disposes of them at the end of the week.

The problem with that system, he said, was that incompatible chemicals might accidentally be mixed together causing a chemical reaction. Since the accident, the waste chemicals are collected after each lab period and stored in a steel cabinet until Pollution Control removes them.

The temperature of the lab was increased by the explosion, but was not treated as a major contributing factor to the explosion, said Tyrrell. It was in the mid-90s in the lab at the time, he said.

He said the heat generated in the operation of the lab has always been a problem in the spring and fall because of variations in temperature and the unusual warm weather over the past few days duplicated the seasonal problem.

Summer Playhouse auditions scheduled

Auditions for the SIU-C Summer Playhouse will be held Saturday at McLeod Theater.

The Summer Playhouse is presented by the Theater Department and the School of Music. Productions will be "The Brothers Karamazov", the story of Dostoevsky's life, "George M.," a musical about George M. Cohan, "Chapter Two," a graduate assistantships or undergraduate scholarships and academic credit will be awarded to those selected for the Summer Playhouse.

The playhouse will also conduct auditions Feb. 21-23 at Loretto Hilton Center on the campus of Webster University for SIU-C students.

Secret police patrol streets in Haiti

PORT-AU-PRINCE, Haiti (UPI) - The feared "Tontons Macoutes" secret police patrolled the streets of Port-au-Prince Monday as the government ordered businessmen to reopen their stores and factories under threat of imprisonment.

A government spokesman, the Greek government said it turned down a request for asylum by President-for-Life Jean-Claude Duvalier, who last week denied U.S. reports he had fled the country to escape the strongest wave of opposition during his 15-year reign.

The request was made through Constantin Dimadis, our ambassador in Caracas, and called for asylum and permission for permanent residence in Greece, but it was turned down, government spokesmen said.

Miltiadis Papaioannou said in Athens Wednesday that the request was made "two or three days ago in Caracas."

The Swiss government Wednesday also announced it had rejected a request from the Haitian ambassador that Duvalier be allowed to stay in that country temporarily with his family.

Aquino's motorcade attacked by soldiers on last campaign day

CONCEPCION, Philippines (UPI) - Soldiers attacked opposition presidential candidate Corazon Aquino's campaign motorcade Wednesday, shooting at one car, smashing windows in another and marring her final appearance before Friday's vote.

Aquino, facing President Ferdinand Marcos in the election, had not yet joined the motorcade and was not involved in the incident outside her hometown of Concepcion, 50 miles north of Manila.

No serious injuries were reported.

"This again emphasizes the repression of the Marcos regime," said Aquino, 53, as she stood for votes at her home Tarlac province on the final day of campaigning. "This is why I am fighting really even harder, that all of these injustices will be removed."

A military spokesman confirmed that soldiers attacked the car carrying Aquino's sister-in-law, Lapula Kashihwahara, but said his men were provoked by the taunts of opposition supporters. Aquino, wife of slain opposition leader Benigno Aquino, addressed a cheering crowd of 3,000 supporters in Concepcion. She later campaigned in the town of Camiling, where she drew another 5,000 supporters.

"We have won," Aquino said in a statement issued by her headquarters, adding that the 23-day campaign period officially ended Wednesday.

"Already, there are reports of the old tricks of intimidation and fraud that have protected him for so long in the corrupt luxury of his palace," she said of the president. "Don't, Mr. Marcos, because this time you will not get away with it."

Witnesses said six Philippine Constabulary troops stopped vehicles in the motorcade, saying passengers were taking pictures of a military installation, which is prohibited.

When Kashihwahara stepped from her car to photograph the soldiers, the troops attacked her vehicle, witnesses said. The soldiers pointed automatic weapons at motorcade participants, smashed the windshield and side windows and kicked the body of Kashihwahara's car, the witnesses said.

When they saw an American television crew filming the incident from another vehicle they seized the camera and severely damaged it.

Two British crew members from the NBC network suffered scratches when their camera was seized.

The soldiers fired one shot - which apparently missed - at a car speeding from the scene after an occupant had been seen photographing the incident.

Army ROTC wins Commander's Trophy

The Commander's Trophy for Program Excellence is an award recognizing school excellence in selecting, training, and maintaining qualified U.S. Army officers, has been awarded to the SIU-C Army Military Science Department.

The trophy was presented to the University Dec. 10 after a competition involving 14 large-division schools, including Notre Dame, the University of Illinois, Indiana University, Ohio State and the University of Michigan.

Capt. Michael Gough, a representative of the department, said the University has met or exceeded its mission to get juniors and seniors enrolled in the Army ROTC program, and "we will meet or exceed our mission in 1987 also," he added.

Gough said the schools are evaluated by monthly reports on how well students are performing.

Lecture on education set

Alexander W. Astin, a nationally acclaimed writer and researcher on higher education, will lecture on "Achieving Educational Excellence: A Second Opinion" at 8 p.m. Thursday in the Student Center Auditorium.

Astin is professor and director of the Higher Education and Research Institute at the University of California-Los Angeles, is one of the featured speakers of the Distinguished Lecturer Series organized by President Albert Sommers. The lecture is free of charge and open to the public. A reception will follow the talk.

Astin has written 15 books and more than 100 articles and reviews covering virtually all areas of higher education and more.

Gun, $350 cash taken in robbery

Carbondale police say Interstate Auto Brokers and Sales, 208 W. Main St., was robbed sometime Monday night or Tuesday morning.

Police say a plate glass window was broken and $850 in cash and a handgun were stolen. Police estimate the loss at $1,000.

The owner, Wayne A. Qualls, said the money was in a desk drawer.

New federal wildlife boss views refuge as unique

By William Walker

Staff Writer

He's a native Texan and has worked in places as diverse as New Hampshire, Washington, D.C., and most recently Minnesota, but Norrel F. Wallace, who recently took over as manager of the Crab Orchard National Wildlife Refuge, thinks Southern Illinois is just fine.

"Southern Illinois is an absolutely perfect spot to live," says Wallace, who has worked for the U.S. Fish and Wildlife Service for 21 years after 11 years with the Texas Parks and Wildlife Service.

"YOU'RE FAR ENOUGH east that you get sufficient rainfall, far enough south to avoid those terrible northern Minnesota winters and far enough north that you don't have really unbearable heat like you do on the Gulf Coast. It's a pretty good mix of everything and the people are very nice."

But the climate and the people are not the reason Wallace is here. He's here to manage the wildlife refuge, a job he considers exciting as well as challenging.

"CRAB ORCHARD is a very unique refuge," Wallace says, pointing out that not only is there the responsibility for wildlife maintenance, protection of endangered species and maintenance of recreation facilities, but there also are 24 industries operating within the refuge's boundaries.

"This was an ordinance depot during the second World War, where they made bombs and shells, and at one time there were 10,000 employees here," Wallace says. "There were railroad stations and fire departments, sewage treatment plants and water treatment facilities - all of the things that go with a military production unit.

AFTER THE war was over, the area was transferred to the Fish and Wildlife Service for operating the National Wildlife Refuge to avoid the massive unemployment that would have resulted from the total loss of industry. It was decided that the refuge would provide a transition by allowing industry to locate there, Wallace says.

"Today there are 24 industries with a total of 700 employees at the refuge, and although no new industries are allowed to locate there, it is Wallace's job to see that those who choose to remain are provided with such necessities as roads and fire protection.

BUT "OUR major responsibility" is to accommodate the migrant species that visit the area, says Wallace, who has a degree in wildlife management from Texas A and M.

"We have a substantial contribution to make to the migrant flock of waterfowl that come down the Mississippi Valley," Wallace says.

Valentines to be given to seniors

The Carbondale Park District is sponsoring a "Care Enough to Send a Valentine to a Senior Citizen" contest. The contest is citywide and open to all in kindergarten through sixth grades.

The cards will be delivered to senior citizens throughout the city on Valentine's Day.

Valentines will be judged by grade level and should be submitted to the district's office, 2500 Sunset Drive.

Woodwind quintet returns to states

By Wm. Bryan Devasher
Entertainment Editor

The New American Woodwind Quintet, SIU's musical ambassador, is back in the states following a successful European tour.

The quintet toured Europe for four weeks, performing in such cities as Amsterdam, Zurich and Vienna.

The quintet, which consists of SIU music faculty members, includes French hornist William Hammond, flutist Jervis Underwood, bassoonist Charles Filig and oboist George Hussey. Clarinetist Kevin Murphy, a graduate student at the University of Illinois, performed with the group during the European tour and will continue doing so until the end of his master's degree schedule. Murphy has performed with the Veracruz Symphony Orchestra in Mexico, the Rochester (N.Y.) Symphony and the Champion-Urban Woodwind Quintet.

The quintet received "very positive" reactions from its European audiences, Hammond said. He added that at the Brahmsaal of the Konzerthaus in Vienna, Austria, the Austrian equivalent of America's Carnegie Hall, the quintet performed two encores and received 10 curtain calls.

"In some ways European audiences are different," Hammond said. "They are more selective about their music."

Hammond said that the group was glad to receive high praise from the Europeans because, he said, "Europeans believe that the best chamber music groups are European or have made their reputation in Europe if they are American."

The quintet was complimented by the Glasgow, Scotland, Herald for giving a "stylish performance" and its music was described by the paper as being "exciting, stylistically, robust with a variety of color." In Amsterdam, Holland, the city's top music critic called George Hussey's oboe playing "the best" the critic had ever heard in a woodwind ensemble.

When the group performed in Amsterdam and Frankfurt, West Germany, its performances were broadcast on the two countries' national radio stations.

The quintet performed mainly 20th century works during their tour. The group performed "Partita for Wind Quintet" by American composer Irving Fine, "Allegro and Arioso for Five Wind Instruments" by Ingolf Dahl and "Kleine Kammermusik" by Paul Hindemith. The only classical work performed by the group, "If you consider classical music from the 18th century," Hammond said, was "Woodwind Quintet, Opus 56, No. 2" by Franz Danzi.

The group has been together since 1983. It has performed in St. Louis, Kansas City and had its Carnegie Hall debut in New York last spring.

Their recent European tour was their first.

Hammond said that although the group tours often, its main function is as musical ambassador for the University.

"We have always felt whether we are playing in New York, Kansas City or Vienna that we are representatives of SIU," Hammond said.

The group will perform next week at Shryock Auditorium. Hammond said that the group is happy to be back in Carbondale to perform for its hometown audience.

"WE'RE EXCITED to be able to share with them what we did in Europe," Hammond said. He said that next week's performance will be similar to the group's European performances.

The New American Woodwind Quintet will appear Thursday, Feb. 13, at Shryock Auditorium. The performance will begin at 7:30 p.m. in the Morris Library Auditorium.

The performance is free and open to the public.

Two plays slated for free showings

The Renaissance Drama Society will offer an alternative to those not attending the John Cougar Mellencamp concert Friday by presenting two Chekhov plays.

The society will present "A Wedding" and "The stride," two Chekhov one-act plays, at 7:30 p.m. in the Morris Library Auditorium.

The performance is free and open to the public.

Why are woodwind quintets popular?

Woodwind quintets are popular because they offer a unique combination of sound and flexibility. The four woodwinds in a quintet—flute, oboe, clarinet, and bassoon—provide a wide range of timbres and textures that can be used to create complex and expressive music. The combination of these instruments also allows for a rich contrapuntal interplay, which is a hallmark of many classical compositions. Additionally, the woodwind quintet is a relatively small ensemble, making it accessible for many musicians and ensembles to perform. This accessibility, combined with the unique and rich sound of the ensemble, has made woodwind quintets a popular choice for composers and performers alike.
Nature exploited, speaker says

By Tom Mangen
Staff Writer

Overpopulation and expanding technology used to exploit natural resources present the greatest danger to the earth's plant and animal life, said famed British naturalist Sir David Attenborough in a news conference Wednesday.

Attenborough greeted the media before his lecture "The Travels of a Naturalist," Wednesday night in the Student Center Auditorium. The lecture was not finished at press time.

Attenborough, who produced and narrated the acclaimed television series "Life on Earth" and "The Living Planet," said that technology is being used to damage the environment at an expanding rate.

"The tools with which we exploit the earth - chemical tools, mechanical tools, nuclear tools - are becoming more and more powerful. It becomes easier than ever to devastate a forest, to poison a lake, to pollute the atmosphere," Attenborough said.

Attenborough said the greatest current ecological challenge is the increasing number of people competing for limited space.

He said the U.S. space program's sending home pictures of the earth set against the backdrop of the universe made clear that the earth is a finite mass and that there is only so much room to go around.

Although the human race is endangering the environment at an alarming rate, Attenborough said that more attention is being directed toward saving the earth's ecosystems.

"Twenty-five years ago, nobody new what the word 'ecology' was," he said. "There is an increasing awareness of the dangers, and what we are in danger of losing."

Attenborough said it's not too late to fight to preserve the earth's resources.

CITY, from Page 3

The City Council requested that the Wyatt Co. and city staff submit a prioritized listing of its recommendations to the council at its next meeting on Feb. 17.

cheap," Mau said, either in laundry prices or drink prices. Drinks would be sold by-the-glass or by-the-ounce.

The proposed bar area is about 10 feet from the shopping center and would have a few stools and couches, but no tables and chairs.

"We're not going to provide room for people to get comfortable in the bar," he said. "We want people to flow in and out, so clothes aren't just sitting in machines.

Plans call for the two areas to be separated by an open doorway. Michael Greer, board member, suggested that the bar not be immediately accessible from the laundry, but rather for patrons to enter the bar area from an outside entrance.

Mau said that although he didn't want to have such a set-up, if it were required before he would be granted a license, he would consent. He added that the bar would be similar to his laundry in the Murdale Shopping Center, where patrons often go down the street for a drink while waiting for clothes to finish.

He has not had a problem with vandalism or stolen clothes at that location, he said.

"We can't sit on our hands and forget about it - to say it's a disaster and it's lost. If we do something about it, we can prevent some of the disasters.

"It may be too late in some instances, but the marvelous and exciting thing about the natural world is that if nature is given the tiniest chance, it will recover," he said.

"Animals once thought to be nearly extinct have been saved through careful preservation techniques," Attenborough said.

Attenborough was invited to Carbondale as the first of four speakers in the University Honors Lecture Series. Talks by specialists in science, business, humanities and the arts are scheduled for the series.

Six zoology and two botany students from the Honors Program will meet with Attenborough during a workshop at 10 a.m. Thursday in the Student Center Wahash Room. Zoology students Stephen Reilly, Karen Borkowski, Rachel Budensky, Ken Dulik, Bret Tobalske and Amy Moser, along with botany students Bryan Adams and Jeanette Baker, will join Attenborough in a discussion of the scientific aspects of his career.

The students were chosen from a list of top honors students in the departments of botany and zoology, said Richard Peters, director of the Honors Program.
Involvement in community goal of local NAACP leader

By Ken Seeber
Staff Writer

The Carbondale chapter of the National Association for the Advancement of Colored People was founded in 1939 to serve as the eyes of Carbondale’s black community.

Now, a little more than 46 years later, the president of the organization says he wants to take on a more active role in getting SIU-C’s black community involved with that of the city.

“I want to do is work with the SIU campus to help me achieve that goal — from President Somol to student government,” says Carl Flowers, Carbondale NAACP president. “I just think the Carbondale NAACP has not taken advantage of the relationship it could have with SIU.”

Flowers, a St. Louis native and SIU-C graduate, replaced Albert Ross as president of the NAACP last August when Ross left for a position in Indianapolis. Flowers has been associated with the NAACP for four years.

Flowers says that in 1986 he also worked to increase the awareness of the community to the NAACP’s purpose, thereby adding new members to the group.

He said the group now has 80 to 100 members in Carbondale.

Flowers added that there has always been a division between the black communities of SIUC and Carbondale and that he would like to see that division eliminated.

He said the SIU Black Coalition and its member organizations are divided and spend much of their time fighting for themselves, not the community as a whole.

Any cooperation the NAACP can get from the members of the coalition would help, he added.

“There are a lot of different organizations on campus and their primary goals are their own success,” Flowers said. “If they would work toward the success of the whole coalition, it would aid their productivity.”

Flowers also says SIU-C staff members could provide a great service by aiding the youth of Carbondale.

“There are young people in Carbondale looking for direction.” Flowers says. “Right now, they are getting the wrong direction. Black SIU staff members could provide positive role models and I don’t think that is being done.”

Another problem Flowers says the NAACP needs to tackle is getting the youth of Carbondale involved with the community.

“Basically, the youth of Carbondale is not aware of the existence or purpose of the NAACP,” Flowers says. “We are trying to educate them that the NAACP is here to be looked to for help only when they are in trouble.”

The NAACP recently offered job training seminars and seminars on residents’ rights when they are stopped by the police. The latter seminar was offered following charges against that Carbondale Police Department was harassing black citizens last year.

“I met with Police Chief Ed Hogan and we agreed that his department has a job to do and we agreed there is a right way and a wrong way for that job to be done,” Flowers says.

Grad student’s play wins first at festival

Kenton Kersting, a graduate student in theater, won first place in the American College Theater Festival’s playwriting competition. Kersting was given the $100 prize for his play “Pontauba,” a story about an 1850s New Orleans baroness. Kersting competed against three other playwrights in the competition, which was held Feb. 1 at Northern Illinois University.

“Pontauba” will be performed during the Theater Department’s “Evening of New Plays” festival, slated for April 2 through 6. The plays will be performed in the Laboratory Theater in the Communications Building.

Senior center group meets goal for repairs

By Darcia Allen
Staff Writer

The Council on Problems of the Aged, which operates the Senior Citizens Center, has topped the goal of $75,000 it set last March when it launched a "Buy a Shingle. Stop A Leak" campaign.

According to Carol Johnson, director of the center, the goal was surpassed on Dec. 17.

Johnson said the campaign officially ended in August, but "people kept giving us money." Donations are tax deductible and always accepted, she added.

Most of the funds from the campaign went toward a new roof and heating system for the center. Surplus funds will be placed in a general fund and used for future repairs.

"The painting of the interior and exterior, and new floor tiles are really the major things that need to be done next," Johnson said.

Johnon said the center, located at 408 N. Springer, is always having fundraising events like yard sales and Sunday dinners, but another major fundraising event like the campaign is not foreseen.

"We told the people it would be a one-time event," she said.

The center offers a variety of services to Jackson County senior citizens. As well as providing home-delivery meal services and adult daycare facilities, classes in woodcarving, ceramics and oil painting are offered, said Johnson.

United Nations

INTRODUCTORY MEETINGS

Thursday, February 6th, 7:00 p.m., Lawson 201

"You can become an Ambassador to the United Nations"

COMMITTEES FORMING TO CONSIDER:

1. Issues of Nuclear Disarmament
2. Third World Debt Crisis
3. Political Terrorism in the Middle East
4. Issues of Diplomatic Immunity

If you are interested in becoming more aware of these issues and how the United Nations operates.

This is your chance.

Further seminars dealing with the issues above will be conducted.

The actual simulation will be held on April 3, 4 & 5

For further information, look for tables set up in the Student Center.

Daily Egyptian, February 6, 1986, Page 15
AD’s think new NCAA rules may hurt I-AA

By Steve Merritt

New rules passed by the NCAA will cut the number of scholarships available to student-athletes in Division I-AA schools. The new rules, which apply to all sports, reduce the number of scholarships available to student-athletes in Division I-AA schools to 2.0 per team, down from 2.05 for the 1989-90 season.

The new rules will affect all Division I-AA schools, including Saluki football, basketball, and volleyball. The new rules will also affect Division I-A schools, which will be limited to 2.05 scholarships per team.

The new rules are part of a larger effort by the NCAA to reduce the number of scholarships available to student-athletes in all sports. The NCAA has been under pressure to reduce the number of scholarships available to student-athletes, and the new rules are part of a larger effort to reduce the overall number of scholarships available to student-athletes.

The new rules are expected to have a significant impact on Saluki athletics. The Salukis are currently limited to 2.05 scholarships per team, and the new rules will reduce that number to 2.0. This will force the Salukis to limit the number of student-athletes on the roster, and the Salukis will have to be more selective in their recruiting.

Top men swimmers to meet in 3-day event

Bonn, West Germany (UPI) -- West Germany’s Michael Gross and the Soviet Union’s Vladimir Salnikov, the most successful male swimmers of the 1980s, compete in a three-day international short-course swimming championships in the 25-meter pool Friday.

American backstroker Rick Scrafford and German breaststroker Ulrich Baumann and Holland’s Jobie Hoff are among other Olympic champions who take part in this 32-nation meet.

Gross and Salnikov, since Mark Spitz to hold world records on two different strokes, will not race the Soviet swimmer, who is unbeaten over 1,500 meters since 1987.

Last year, the West German broke Salnikov’s world 800-meter short course best with a time of seven minutes, 28.43 seconds, but this weekend Gross will concentrate on his specialties - the freestyle, sprints and butterfly events. Gross will be joined by fellow American Stephan Carson, the European champion.

Salnikov, 26, who missed last

Page 10, Daily Egyptian, February 6, 1989

NCAA academic rules may ‘close the door’

By Steve Merritt

Sports Editor

The new academic guidelines passed by the NCAA will cut the number of student-athletes available and hurt the chances for Division I-AA schools to recruit student-athletes.

The new guidelines, which apply to all sports, will reduce the number of scholarships available to student-athletes in Division I-AA schools to 2.0 per team, down from 2.05 for the 1989-90 season.

The new guidelines are part of a larger effort by the NCAA to reduce the number of scholarships available to student-athletes in all sports. The NCAA has been under pressure to reduce the number of scholarships available to student-athletes, and the new guidelines are part of a larger effort to reduce the overall number of scholarships available to student-athletes.

The new guidelines are expected to have a significant impact on Saluki athletics. The Salukis are currently limited to 2.05 scholarships per team, and the new guidelines will reduce that number to 2.0. This will force the Salukis to limit the number of student-athletes on the roster, and the Salukis will have to be more selective in their recruiting.
Women gymnasts seek to improve 2-2 record

By M.J. Stone — Staff Writer

The women's gymnastics team, currently places second, will meet at Northern Illinois University Saturday, but will attempt to improve their 2-2 record in a meet against the Cyclones of Iowa State University Thursday.

Junior Micbelle Spillman, who led the Salukis to a victory over Jacksonville State Jan. 27 with her all-around score of 36.13, was not nearly as effective against NIU and CMU, scoring only a 34.65. Seniors Lori Steele and Maggi Nidiffer, who scored a 35.50 and a 34.90, respectively in the meet against Jacksonville, fell far below those scores. Steele scored a 32.90 in the all-around and Nidiffer scored a 32.10.

The Salukis will meet Iowa State University at Ames, Iowa. SIU was victorious in the last contest between the two schools (March 1, 1985 at SIU). The Cyclones have three top all-arounders returning for the 1985-'86 season.

Senior Kathy Edwards, whom Vogel said was on the same level competitively as Spillman and Steele, was injured and underwent knee surgery last season but has returned and is doing "really well," according to Vogel.

Edward's will prove to be tough competition for the Salukis because she holds an ISU vault record of 9.40 which she set in a meet against the Salukis in March 1984. She has previously held records in uneven bars, floor exercises and all-around.

Ann Lohnm, ISU's most valuable gymnast last season, returns as a sophomore to compete with Edwards and Tracy Remien for the spot as the team's top all-arounder.

Remien, also a sophomore, set an ISU record on bars with a 9.25 against Winona State in February 1985. Vogel called Remien "a good, solid all-arounder," and said that Edwards and Remien are ISU's best gymnasts.

The Salukis will send a team that includes Spillman, Lori Steele and Jennifer Moore against ISU's record-holders.

Spillman, an All-American last year, holds a few records of her own, including SIU's top all-around score of 38.20.

Georgia president says school let athletes in with bad grades

ATLANTA (UPI) — The president of the University of Georgia, Dr. Jan Fogel, said Wednesday that his school admitted athletes with bad grades to improve its "inferior teams" and that the Salukis realized that they have not been working hard enough.

"We were the best team Saturday night," said Vogel. Junior Michelle Spellman, who led the Salukis to a victory over Jacksonvile State Jan. 27 with her all-around score of 36.13, was not nearly as effective against NIU and CMU, scoring only a 34.65. Seniors Lori Steele and Maggi Nidiffer, who scored a 35.50 and a 34.90, respectively in the meet against Jacksonville, fell far below those scores. Steele scored a 32.90 in the all-around and Nidiffer scored a 32.10.

The Salukis will meet Iowa State University at Ames, Iowa. SIU was victorious in the last contest between the two schools (March 1, 1985 at SIU). The Cyclones have three top all-arounders returning for the 1985-'86 season.

Senior Kathy Edwards, whom Vogel said was on the same level competitively as Spillman and Steele, was injured and underwent knee surgery last season but has returned and is doing "really well," according to Vogel.

Edward's will prove to be tough competition for the Salukis because she holds an ISU vault record of 9.40 which she set in a meet against the Salukis in March 1984. She has previously held records in uneven bars, floor exercises and all-around.

Ann Lohnm, ISU's most valuable gymnast last season, returns as a sophomore to compete with Edwards and Tracy Remien for the spot as the team's top all-arounder.

Remien, also a sophomore, set an ISU record on bars with a 9.25 against Winona State in February 1985. Vogel called Remien "a good, solid all-arounder," and said that Edwards and Remien are ISU's best gymnasts.

The Salukis will send a team that includes Spillman, Lori Steele and Jennifer Moore against ISU's record-holders.

Spillman, an All-American last year, holds a few records of her own, including SIU's top all-around score of 38.20.

Georgia has slow academically.

"That gives our school something to talk about, something to do. We have sports at the University of Georgia because our people sponsor it. Those 80,000 people are in that (football) stadium because they want to be there."

Fogel was the last witness in the school's defense.

"We were Jerry after being told by the league that i don't understand to what can legally be done in this situation, so we believe we have an argument there." Less than four hours before Tuesday's game, a woman identifying herself as Lois Stafford called Chicago Stadium and told team trainer Mark Pfeil that Dailey was in the process of fixing a flat tire on his way to the arena. The Bulls hadn't heard from Dailey since an early Monday afternoon practice. "On, things have hit rock bottom with the Bulls," Coach Stan Albeck said during a workout. "But if there is anything I have learned about myself and about human nature, you have to look to the bright side of life."

Evert Lloyd still winning, improving

NEW YORK (UPI) - Three days after winning her 142nd professional tournament, Chris Evert Lloyd tried to explain what keeps her motivated against opponents half her age.

"Sitt' - in a downtown restaurant, surrounded by four TV sets all showing a tape of her match against Martina Navratilova, Evert Lloyd insisted Wednesday she continues to push herself for as long as she wants to become an even better player.

"I don't feel I've reached my potential," she said. "I've always wanted more concentration and very good groundstrokes and that's why I'm still an all-court player. When I practice I can volley for an hour, serve for an hour and feel there is room for improvement.

"You want to milk it until you're nervous. You don't feel you've reached your limit. It's too hard to retire when you're on the top."

At 28, Evert Lloyd finds herself continually tested by younger competition. Following a six-week break, she returned to action at Key Biscayne last week in the Virginia Slims of Florida. All five of her opponents were in their teens and Evert Lloyd swept them aside with the loss of only 16 games in capturing the title.

"That was the best tournament I've played in such a long time," she said. "I was pleased with the way I concentrated and it makes me realize how good I can play when I concentrate."

As for playing against a string of what she calls "teeny-boppers," Evert Lloyd said: "I used to get too nervous when I'd play Tracy (Austin) or (Andre) Jaeger for the first time, but almost everyone is 17 or younger, so it's not a factor."

Although the 1985 season does not officially end until the Pan-American Games in New York March 17-22, Evert Lloyd concedes the No. 1 ranking is "out of the question." "I wish I didn't feel that way but I'm playing against major tournaments," she said.

In the past, Evert Lloyd relished competitive non-baseball game, but now she is working to become more versatile. "The serve was one area that's always been a mediocre sort of shot for me," she said. "I never put emphasis on it, just trying to put the ball in to start a rally."

"I'm trying to go for more serves now, to be more aggressive and make it more of a weapon. I feel I can be a better player because I see the results of the work I've been putting in."

Olympic meeting in Seoul attracts largest number of delegates ever

SEOUL, South Korea (UPI) - As the Antarctic Sunshine, the largest in the Olympic games this year, was coincident in April at the site of the 1988 Summer Games, it was announced here Wednesday.

Juan Antonio Samaranch, president of the International Olympic Committee, and Mario Vassenesi-Rana, presiding president of the National Olympic Committee, said they received the 700 participants at the fifth ANOC conference April 23.

"We are proud that this will be the largest-ever ANOC conference," said Dr. Lee Han-wook, chairman, president and secretary general of the Seoul

CAGERS, from Page 20 speedster with a 22-inch vertical leap grabbed just two rebounds, but against Drake, he wound up just one shy of Ford with 12 total.

"I didn't get many rebounds or make many three-pointers because I was so far outside trying to stop what's-her-name from Michigan State," said Bonda said later of the Bulldog forward who hit 16-15 for 21 points.

In order to achieve the victory, the Bulldogs had to be rebounding in the second half. As a result of 3-10 from the field in the first half, Saluki fans grew quiet, but Jenkins said it's almost like a slap in the face to be left wide open to consider the game a "five-point game," but "they were giving me way too much time to look at the basket."

Jenkins hit 5-9 in the second half, but still scored his final 10 points on a few second-half dunks on outside bombers. "I stopped thinking and a few went in. The coaches could've lost confidence in me. but they didn't and that's unknown. I know the ones I missed, Bridgett or somebody else just really started crushing the boards," Jenkins said.

Jackson says rebounding statistics are deceptive "I've been born with my own misses -- because the shooter ought to have the best idea of where the ball will end up."

So in the second half, the screen play broke up and Jackson knew her forced shot would likely not go in, she charged into the lane, "but I saw Mary (Bergius) got it and hoped she'd put it in," and when it fell, "hallelujah!" Jackson said.

Bergius watched the screen play break up in prepared to shoot the ball. Although DU Carole Baumgartner said the game was played 40 minutes were not tired, Ford definitely appeared weak and flat footed to allow the 6-2, 235 lb. Bergius to grab half the ball away. Prior to that, Bergius had only managed two caroms.

"I got three lousy rebounds the whole game and one of them was the most important rebound of my life," Bergius said.

The Salukis could get no rebounding -- but each says they want to keep playing to win instead of trying not to lose. Or the Salukis could get some work done to self-centered -- but each quickly adds to the efforts of every team member -- even the manager Jackie Chapman as critical to the success thus far.

"I'm showing in for regular starter Ann Kaithe, the thoughts of Anne Thovinna sum up the team attitude best.

"If she can't play, I'll be ready. If she can, I'll be ready when the coaches need me. I'll be ready. There is no talk of nuttin'".
Rebound reach

Saluki guard Brian Welch got the jump on teammate Ken Dusharm for a rebound at last Creighton's Ed Johansen, center, and SIU Saturday's game.

Gymnasts peg another win; still undefeated

By M.J. Starshak
Staff Writer

SIU's undefeated men's gymnastics team scored a convincing 278.55-265.35 victory against Indiana State Tuesday night. This overwhelming win erased Coach Bill Meade's disappointment in the team's narrow margin of victory against Northern Illinois and Western Michigan Universities Jan. 26, when SIU's team score was 270.55, their lowest of the season.

"We should've gone 278," Meade said. He added that Indiana's team was much better than NIU and WMU, but that was not what stimulated the team.

"We were stimulated by our own performances," he said. Junior Preston Knauf, who scored a 54.76 in the all-around competition Friday against University of Iowa, was slowed by illness and competed in only two events. Knauf was too sick to compete in the first event (floor exercises) so SIU used five gymnasts but when it was time for the still rings, Knauf bolted from the bench and scored a personal season best of 9.35 to tie with Mark Ulmer for first place. Knauf also scored well in the vault, where he tied his University of Iowa score of 9.55 and took first place, edging out teammate Brendan Price who took second (9.50). The Salukis took the lead after the first event and never looked back, winning everything thereafter.

The number one all-around consultant was senior David Luterman, who scored an impressive 8.965 in the parallel bars to take first place in that event. SIU also took second and third places in the all-around with key performances by senior Price and junior Mark Ulmer (54.46). Price tied for first with his 8.965, which is 0.10 below Saluki Ken Clark -- both scored personal bests of 9.05. Other Salukis scoring season-best scores during the meet include, Phil Armand on pommel horse (9.0), Tony Spiess in parallel bars (9.05) and Price on high bar.

The team is more consistent now than earlier in the season, Meade said. "We scored a 4.6 last week on the high bar against Iowa and we contributed to the team score, whereas we still miss on some of its routines, but it is more of a rare occurrence, he said.

Women cagers get solid stats; strive for more

By Anitra J. Stoner
Staff Writer

The Saluki women's basketball team received some national attention, with 30 votes in the AP poll, a total which would rank the Salukis 22nd if the poll extended that far.

Saluki Coach Cindy Scott said, "I'm pleased that we're getting national respect, but we've got to build on that and get better. So we're not going to be concerned with it because it doesn't mean a lot at this point."

In Gateway statistics released this week, the Salukis rank above all other schools in five of eight categories, third but climbing in two others, and with the only bad mark in freethrow shooting. The Salukis broke into national rankings in the NCAA news with 12th in scoring defense, and are on the verge of national rankings in three other categories.

Although the individual performances of Petra Jackson (16th in free throw shooting in country) and Bridgett Bonds (18th in field goal shooting in country) continue to stand out in this week's averages, others might be first to admit that strong team effort is what has propelled the Salukis -- especially in the key win over Drake at Des Moines last Friday.

Upon seeing the circus-like defensive minded game with cameras zooming in on DU's Wanda Ford before the game, Jackson told a fellow Saluki, "Why do they promote this game so much when we don't let people watch them get beat?"

"I don't know if they have anything better to do than that. I saw nothing but people spread out everywhere in the stands. Before the game, she would also tell you not to pay any attention to the game even if it might be an outstanding game. For instance, the
