Springfield—Despite Thursday’s rainy weather, the dark cloud of higher education funding hung over the SIU Board of Trustees meeting. SIU Chancellor Lawrence K. Petit told the board members gathered at the ETU School of Medicine even if a temporary state tax surcharge is extended, education is facing a possible $300 million budget cut. Petit said the breakdown probably would result in a $100 million cut from higher education’s budget. Although this information is secret, Petit said many people still don’t realize what the effects could be. “Many people think the Legislature is playing games and will just pull a rabbit out of the hat as they have in the past,” Petit said.

“The income tax surcharge is the source of much debate concerning educational funding,” Petit said.

Last year $11 million was generated for SIU from the surcharge. Although it is still uncertain in what form the surcharge will be terminated, more money is needed for education, Petit said.

“We need not only the surtax, but an increase in the surtax,” he said.

Board chairman A.D. VanMeter agreed with Petit that more money is needed.

“Gov. Edgar’s budget shows no increase in funding for higher education,” VanMeter said. “The surcharge result ed in $11 million for SIU last year. A tax would result in devastating cuts.”

The Board of Trustees then passed a resolution expressing their support of the proposed Illinois Board of Higher Education budget, urging the governor and Legislature to See BOARD, Page 5

Going batty

By Wayne Frazer

Staff Writer

Jackson County Animal Control is busy dealing with the aftermath of finding a rabid bat.

Lloyd Nelson of Animal Control found the bat in Mapleworth Township afternoon. He tested three others bats this afternoon but none were found to carry rabies. Calls to Animal Control have increased dramatically over the last few days, Nelson said.

“We’ve been very busy since Wednesday,” he said. “There are always a lot of people who call after a rabid animal is found.”

Nelson said the recent heat wave coupled with a position, the bats test usually sits the public’s fear of rabbits.

“What’s happening is the animals are being pushed of their nesting numbers and are dying of heat pro traction,” Nelson said.

“There is no outbreak of rabies. Two to five rabid bats are normal during a year in Jackson County.”

Louis Strack, associate professor of animal science and veterinarian for the College of Agriculture, said the danger of rabies is not epidemic and must be headed.

“The program is relatively small but constant in the wildlife,” Strack said.

“Hes the skunks in this part of the county are very prone to rabies.”

He added that while skunks are the largest carrier of rabies, foxtails, raccoons and bats are also susceptible to the disease.

Strack said there is not a significant bat population in the Carbondale area, but there are places where they feed.

“Theres some buildings that seem to be attractive to bats,” Strack said. “They will spend the day in the attic.”

Rabbi is a virus that attacks the brain of the infected animal. It is spread through a bite or a scratch from the carrier.

Symptoms of the disease are fever, hooded eyes, nausea and pain at the site of the bite or scratch. The disease can progress to convulsions, inability to drink fluids, and death. Strack said there is a definite characteristic of rabies pet owners should watch for.

“Theres one constant sign in animals is a change in behavior,” he said. “It can range anywhere from frenzy to total lethargy.”

Nelson said people should not be overly worried about contracting the disease. He stressed pet owners should See BATS, Page 5

Yeltsin, St. Petersburg win Russian elections

By Leslie Colp

Staff Writer

Some city officials say they think a highway bypassing Carbondale is just a matter of time, but not all of their constituents agree with them.

An open meeting Thursday at the Student Center allowed residents to view maps of three possible routes for the highway and ask questions.

All three proposed routes would connect Reeds Station Road with Illinois 13 near Airport Road. The northern route would go north of the Bi-Centennial Industrial Park and the golf course, which is under construction. The middle route would cut through a small section of the golf course, and the southern route would go south of the golf course and Koppers Industries Inc.

Jim Gardner, who owns property near the southern route, said he is not in favor of having the highway, but if it does become a reality, he does not want the southern route because it would be too close to his property.

“I don’t think Carbondale needs that kind of highway,” he said. “(Carbondale) would lose retail businesses on Illinois 13.”

Moscow (UPI) — Boris Yeltsin swept the Russian presidential election and Leningrad residents voted to restore the cross-ear name of St. Petersburg to their city — repudiating decades of Communist rule in the Soviet Union’s largest republic, results showed Thursday. Early returns also showed clear wins for the pro-reform mayor of Moscow and Leningrad, Gavriil Popov and Anatoly Sobchak, who like Yeltsin quit the Communist Party last year and lead a growing opposition to Soviet President Mikhail Gorbachev’s central government.

While the results of Wednesday’s election in the Russian Federation will have no direct effect on the central Soviet government, voters in the largest and richest of the country’s 15 republics sent a definite message that they support faster reforms championed by Yeltsin.

Vasily Kazakov, chairman of the Central Election Commission, said Thursday night’s results showed that the majority required for election on the first balloting among six candidates.

“There will evidently be no necessity in the elections for Russian president,” Kazakov said.

Yeltsin’s campaign estimated his vote at 60 percent, the same independent Russian information agency and preliminary figures gave him 57 percent.

Three golfers lead after nine

CHASKA, Minn. (UPI) — John Huston, Craig Parry and Jim Haller shot 2-under par 35s on the front nine Thursday to lead the field by a shot halfway through the first round of the 91st U.S. Open at Hazeltine National Golf Club.

Huston, one of three two-time winners on the PGA tour this year, shot a shot back with a 35 over the par 36, 3,582-yard layout.

Huston, a former PGA Tour player who has missed the cut in both of his starts on the minor league Ben Hogan tour this year, birdied both the par 5s on the front nine, No. 3 and 7.

Parry, an Australian who plays in Europe, birdied the par 4 1st hole and the par 4 ninth for his 34.

Steve Ga is a PG Tour regular whose best finish was second place at the USF&G Classic at New Orleans. He also birdied the first hole and added another on the par 5, 518-yard 5th.

Pavin scored still another birdie on the first hole, and added a birdie-2 on the fourth before losing a stroke to par on the par 4 sixth and finishing with 35.

Steve Geatch of Great Bend, Kan., who plays Ben Hogan Tour as the tournament’s first leader. He birdied both par 5s on the front side and made the turn at 2-under-par 34. But he double bogyed the 12th hole, a 432-yard two-teeed par 12, and dropped off the leaderboard.

Australian Steve Elkington shot an even par 36 as did South

Bulls head home with NBA championship title

Chicago fans prepare to celebrate with Bulls

CHICAGO (UPI) — Joyous Chicago Bulls fans were outnumbered by the media at O’Hare International Airport as the National Basketball Association champions returned home Thursday to a red carpet welcome.

Most fans who hoped to see the Bulls arrival back home were disappointed. The team landed in a southwest corner of O’Hare, and only a limited number of fans and media were allowed in the area, said Chicago Department of Aviation spokeswoman Lisa Howard.

The city planned its official party for the NBA champs Friday, with a noon victory celebration at the Petrillo Band Shell in Grant Park. The event will be “a rally for the entire metropolitan area of Chicago,” said Mayor Richard M. Daley.

Daley ordered a one-hour delay in the start of the the eighth annual Chicago Blues Festival, which was scheduled to open at the bandshell as soon Friday.

Banners commemorating the Bulls’ victory were hung from street poles near the Chicago Stadium, where the team plays its homes games. The same banners will be hung on the east side of Michigan Avenue Friday.

Daley planned to present each player with a new of the new Bulls banners, which are red and white and read: “Chicago Bulls above the face of a Bull and “1990-91 NBA Champions” below, a basketball.

The Bulls championship was “the best thing to happen to Chicago in a long time,” Daley said.

The bulls’ title proved to be a bonanza for manufacturers and distributors of Bulls merchandise. Workers at the North Side T-shirt printing firm were putting in long hours to keep up with the demand.

“They are working around the clock until they collapse,” said Cyndy Ignowski, an order entry worker for Shirts Are Our Business.

The company’s 20 employees are working both the day and night shifts and sleeping at the store, Ignowski said. They are making an average of 1,000 T-shirts an hour, she said.

Bulac Bulls fans took to the streets with their team the 108-1 victory Wednesday evening at Side tracked on East Street in Cardonale to watch the Chicago bulls take home the NBA crown.

Some of the street celebrations turned violent.

A 15-year-old girl was listed in fair condition with a thigh wound and a 19-year-old man was in good condition with a bullet wound in the shoulder, area hospitals said.

A 16-year-old boy was shot later Thursday morning in a Northwest Side incident. Police said that shooting may also have been related to the post-game revelry.

Police also reported 115 arrests.

Carbondale Bulls fans cheer from downstate

Downstate basketball fans helped cheer the Chicago Bulls to a 108-101 victory over the Lakers Wednesday, as the Bulls clinched the NBA Championship title.

SIUC assistant coach Doug Gerke and Steve Paten watched the game from their perch at Sidetrack on East College Street in Carbondale.

Gerke, a senior in political science from Woodridge, said he wasn’t surprised the Bulls won.

“They’ve been playing good the whole season,” he said.

To prove that they indeed were “steady Bulls fans,” Gerke and his friends arrived early at Sidetracks to get front row seats for the game.

They were caught out at a table closest to the television screen before most of the Bulls fans of SIUC arrived Wednesday night.

Patton, a finance senior from Woodridge, was watching the game with Gerke.

“I’d have to say defense is the key,” Patton said, referring to the defense the Bulls played against the Lakers and the pressure they put on the Lakers offense.

But Gerke pointed to Bulls’ star Michael Jordan for the team’s success.

“Michael—this year he’s putting it all together,” Gerke said.

Dan Peters, a senior in political science from New York City, was sitting at a table nearby.

“The Bulls have finally proven they’re a complete team,” he said. “This is the culmination of the Bulls building program.

Ash from mountain drops on U.S. base in Philippines

MANILA, Philippines (UPI) — Ash from Mount Pinatubo fell on Subic Bay Naval Base for the first time Thursday and authorities warned pilots against flying near the volcano that exploded after a 600-year dormer.

The Philippine Volcanology Institute recorded six explosions since the 5,722-foot volcano began erupting Wednesday in what an official said was "the big bang" scientists were predicting. Officials reported two deaths — a Filipino-American man who parachuted into a bus on an ash-covered highway and a 70-year-old woman.

Palestinian armies to be disbanded by Lebanese

BEIRUT, Lebanon (UPI) — President Elias Hrawi said Thursday that a U.S.-backed international force to be deployed in Lebanon within the next two days would include a multinational battle group of a few thousand troops. He said: "We will extend this plan to disband all private armies." The army "will move to the south of Lebanon to stop dangerous situations from taking place in all Lebanese authorities with no hostile intentions against anybody," Hrawi told visitors at the temporary presidential headquarters in Beirut. The president said the plan would take effect by the end of June.

Kingpin would be held in 'very ordinary prison'

MEDELLIN, Colombia (UPI) — Journalists toured the very ordinary Ejevido prison Thursday where Pablo Escobar, the world's most-wanted drug suspect, would be held if he keeps a promise to turn himself in. Although some reports had described the prison as "a five star hotel," journalists on a tour of the facility in Escobar's hometown outside Medellin saw an average jail with small cells each equipped with a bed, a toilet, a sink, a shower and a small bookcase. Along with the individual cells, the prison has a communal room, a patio, a kitchen and infirmary.

Pentagon to search for Iraqi nuclear capability

WASHINGTON (UPI) — The Pentagon wants the United Nations to search "every conceivable site" for Iraqi nuclear capability in case Saddam Hussein is hiding sensitive top officials said Thursday. Defense Secretary Dick Cheney, and Pentagon spokesman Pete Williams at a later Pentagon briefing, said the United States wants to be sure Iraq's nuclear program is crushed. "We have said we will take any steps necessary to make sure it doesn't come back. We will not allow a nuclear capability in the region." A U.S. military campaign to launch a unilateral strike against Iraq is not possible at this time, he said.

Lack of funds makes coping with AIDS difficult

SAN DIEGO (UPI) — The mayors of America's major cities have concluded that they will be unable to cope with the steady growth of AIDS cases because of a lack of money, a report released Friday said. The gloomy report, released Friday by the National League of Cities, warned that federal funding is running out for the full care of AIDS patients. The report recommended that the Congress provide $2 billion in federal funding to meet the needs of AIDS patients.

Madigan offers compromise on plan to cut Illinois budget

SPRINGFIELD (UPI) — Illinois House Speaker Michael Madigan extended an olive branch to Gov. Jim Edgar Wednesday, unveiling a compromise $1.34 million budget-cutting plan Wednesday that incorporates many of Edgar's proposed reductions but eliminates the deep cuts the governor had proposed in welfare programs. The announcement came as state budget forecasters predicted a further $98 million decline in state revenues when the fiscal year ends June 30, yet another sign the recession is still ravaging the Prairie State.

Professor returns from Guam

Fish poisoning expert brings back microorganisms for studies

By Christine Leninger
Staff Writer

An SIUC professor recently returned from a trip to Guam where he collected organisms for research on ciguatera fish poisoning — a world-wide problem that has close ties to both the collection of those contaminated fish.

Don Tindall, associate dean for the College of Science and a professor in the Department of Plant Biology, is one of the world’s experts on ciguatera fish poisoning and the microscopic algae that cause it.

"Ciguatera is a human illness caused by eating fish from coral reef habitats that have accumulated neurotoxins, a toxin that destroys nerves or nerve tissue, via the food chain," Tindall said.

He was invited to Guam by Chris Lobban, a professor at the University of Guam, to give lectures in Lobban’s National Science Institute of Health Minor-ity Biomedical University.

The grant is for research on the distribution and ecology of microorganisms responsible for ciguatera fish poisoning.

Tindall and his wife Pat spent the two weeks after the lectures making extensive collections of toxic microorganisms in coral reef habitats in Guam, Truk, Pohnpei and Majuro, islands of Micronesia.

The collections were made with assistance from scientists from the Department of Fisheries of Truk State, The Department of Fisheries of Pohnpei and The Community College of Micronesia in Pohnpei, Tindall said.

The Tindalls have the largest collection of these types of algae, including organisms from Australia, Fiji and all over the world.

At SIUC, Pat Tindall assists with the preparation and research done on the collections, along with Kevin Aikman and Steve Morton, graduate students in Plant Biology. The preparation takes several months because the organisms first must be isolated and purified.

Tindall and Don Millar of SIUC’s Physiology Department have researched the organism that causes ciguatera fish poisoning for the past 12 years.

Ciguatera is a worldwide problem in that it affects all tropical and subtropical areas.

"This is not a problem caused by man, but man enhances the problem," Tindall said. "The increased demand for seafood brings the poisoned fish to the United States."

The problem begins in the algae community at the bottom of the food chain and by the time it reaches humans, it is extremely concentrated.

Symptoms of ciguatera poison include abdominal disorders, severe abdominal cramps and diarrhea. Within one week the symptoms intensify to neurological disorders, numbness of hands and feet, severe itching of the body and temperature reversal — he feels cold. The symptoms may persist for several years.

Rare cases of high-level toxicosis include respiratory failure that can lead to death or coma.

"There is no clinical treatment for every case — doctors merely treat the symptoms to make the victim comfortable," Tindall said.

The main objective for research on ciguatera causing organisms is to determine the organisms responsible for ciguatera poisoning, and then to determine the organism’s ecology and growth in a culture. Finally, toxins are isolated from the rest of the specimen to study chemistry and physiological effects.

Another important reason for research is to "provide a basis for clinical treatment and develop a method for quick and easy detection of toxins in fish," Tindall said.

"Cooperative fisheries have determined that ciguatera poisoning does have a negative affect on fish, but no data says how it affects them."

Trustee Elliott serves at last meeting, recalls on 24 years

By John Patterson
Staff Writer

Springfield — The man who has been acc. of setting tuition too high and hung in effigy by Gus Bodden, is the last board of Trustees meeting Thursday, ending a tradition that has lasted 24 years.

Ivan Elliott Jr. was given a tradition that has lasted 24 years.

Elliott, s aying an old lawyer friend, Monday, "I will not serve at last meeting, recalls on 24 years.

"He'll be a member whether he's here or not," Birger said.

"At times like this there's nothing more to say than thank you to Elliott," Birger said.

Elliott, saying an old lawyer couldn't leave without leaving behind an official paper, read a message to the board members.

He varied topics from his cartoon execution on the front page of the Daily Egyptian to the many food memories of being a board member for 24 years.

"Serving on the Board of Trustees has been a breath of fresh air in my life," he said.

"My fondest memory will be of the great personnel I have worked with."

John S. Brewer has been appointed by Gov. Jim Edgar to replace Elliott.

Brewer is a partner in the Marion law firm of Winters, Brewer, Murphy, Crosby & Patchett.

He joined the law firm in 1976 after graduating from the SIU School of Law.

Brewer is chairman of the SIU Foundation board and director of the SIU Alumni Association, besides holding several other titles.

University News Service contributed to this report.

Are the courses you need offered on campus?... at a convenient time?

The Individualized Learning Program (ILP) is offering 33 courses this summer, some of which are not offered elsewhere on campus. ILP courses can be completed without having to attend classes. So, you can set your own schedule. Each course carries full resident SIUC credit, and tuition is $51/credit hour this summer.

SIUC spring sports merit more support

SIUC SOFTBALL, TRACK, swimming and baseball teams capped off 1991 with some impressive statistics and top finishes. Although fan support for Saluki sports isn’t always the greatest, these four teams prove that SIUC has something to cheer about.

The SIUC SOFTBALL team was just about unstoppable in 1991. It finished the season with a 42-7 record and broke 25 school records and tied 14 others. These outstanding achievements do not just deserve a nice pat on the back. The exciting winning season the Salukis produced four All-Americans. Julie O’Brien, 18, has a female voice say “Avon calling.”

It also causes her to try to escape from the dog. Seeing a door slightly open, she ran to it, rushed into the room and closed the door. It turned out to be the downstairs bathroom. And in it, behind slicing shower doors, was young Eddie. Because of the noise of the shower and his own singing, and because the bathroom door had been almost closed, Eddie was unaware of the presence of the Avon lady and her encounter with his dog. All he knew was the bathroom door had suddenly opened and closed and through the glass he could see the silhouette of another human being. It scared the hell out of him.

And that’s understandable. When you think about it, there are few moments when we are as totally vulnerable as when we are standing bare-bottomed naked in the shower.

Eddie opened the shower door an inch or two and peered out. There, in his bathroom, stood a total stranger. True, the stranger was a woman. But who says women can’t be homicidal maniacs or friends?

So Eddie screamed: “Who are you?”

“I’m the Avon lady,” she said.

Now, what would you think upon hearing those words under those circumstances? Right? You would think you were dealing with a complete looney. Which is exactly what Eddie thought.

“I was bitten by your dog.”

“My dog bit you?”

“Yes, I’m hiding from your dog.”

“I don’t understand any of this,” Eddie said.

The woman explained and the thumping of Eddie’s heart subsided enough for him to say: “What do you want me to do?”

“Do something about your dog.”

“But I don’t have any clothes in here.”

That problem was solved when she handed him a towel.

“Tarn around,” Eddie said.

In a few minutes, Eddie had corralled the raging little beast in the kitchen and the Avon lady was on her way to seek medical treatment.

That wasn’t the last that the O’Briens heard from the Avon lady.

“The letter said that our dog caused her great bodily injury,” said Eddie’s mother, Maria.

“Well, I don’t know about that,” Maria said. “But I’ll tell you one thing. She didn’t do much good for Eddie’s nerves.”

Commentary

At one time or another, most of us have heard the doorbell ring and a female voice say “Avon calling.” But I doubt if we’ve heard it quite the way a young man named Eddie O’Brien recently did.

Let me start at the beginning.

O’Brien, 18, has a kid sister, Lisa, 15, and Lisa had a part-time job selling Avon cosmetics.

One day, Lisa’s supervisor phoned to ask about Lisa’s sales. Lisa hadn’t been selling much, so the supervisor said she would come over with some sales instruction books. They made an appointment to meet the next morning at the O’Brien home.

The next day, Lisa waited, but the morning passed without the Avon supervisor appearing.

Lisa had a babysitting job that afternoon, so she finally hopped on her bike and left for it.

Eddie was home at the time, but he didn’t know anything about Lisa’s appointment with the Avon supervisor.

A while after Lisa left, the Avon lady showed up. She rang the doorbell, but nobody answered. That’s because Eddie had gone into the bathroom to take a shower.

Seeing that the door was unlocked, the Avon lady let herself into the house. This was a mistake because the O’Briens have a dog. Although it is a small dog, a terrier, it has a fierce nature and sharp teeth.

As the Avon lady walked through the house, looking for Lisa, the dog darted out from under a table, leaped into the air and snipped the Avon lady on her bottom.

Natural, this made her scream.

How to submit a letter to the editor.
pass the surcharge or provide similar funding and for Chancellor Pettit to present the resolution to both the Legislative and Senate. Pettit said the board needed "to call for some kind of proportionality in budget cuts" and "do what we can to renew the surcharge and act now.

"We're getting right down to the deadline on what we can do," he said.

With the fiscal year ending June 30, SIU administrators are left up in the air for what to expect and how to plan for it. If the proposed cuts are enacted, it could result in the loss of 500 civil services job positions or 250 faculty members or a 25 percent tuition increase on top of the five percent already approved by BHE. Pettit said.

Although the cuts would come from a mixture or areas, there is no way to definitely go about it until a budget is approved by the Legislature, he said.

When asked if the administration should be drawing up plans for a budget with the deadline only two weeks away, Pettit said, "We don't know exactly when (to plan for cuts) until the appropriations committee is over." Both SIUC and SIUE however have made some provisions to ease the budgetary and administrative burden.

SIUC President John C. Guyon said the university doesn't have a hiring freeze, but each new position is being approved on an individual basis.

"We've put them in the refrigerator, but haven't frozen them," Guyon said.

SIUE President Earl E. Laarzon said if the SIU system suffers the cuts talked about there is no doubt there will be cut backs with in the University.

**STAFFORD, from Page 1**

their college of choice, Stricklin said.

The bill also would prevent the Secretary of Education from reducing Pell grant amounts after the funds already have been appropriated by Congress.

"Some federal aid for farms would be eliminated from need determinations for Pell grants, Work Study programs and Perkins loans. The Middle Income Student Assistance Act is an entirely different bill as a separate bill from the Reauthorization of the Higher Education Act, but may be combined.

"The SAA is the federal financial aid program. It must be reauthorized every 4 years. The reauthorization for 1991 is currently in progress. SIUC's director of financial aid Pamela A. Britton, said the act would provide needed assistance to some students who are currently unable to receive assistance. Britton said she thinks the act would be beneficial, as long as it doesn't take funding away from other financial aid programs.

"If the cost would affect other programs, such as Pell grant, I would have reservations," Britton said.

Britton said she is unsure whether the number of students enrolling in college would increase or decrease because of the availability of loans.

The bill is being sponsored by Posthard, Rep. Pat Williams, D-Mont., and Majority Leader Richard Gerhardt, D-Mo.

A specific time for voting on the bill has not yet been determined.

**CONNECTER, from Page 1**

Sandra Henry Bartelsmeier, Carbondale's newest park commissioner, said if a bypass is built, the northern route would be best because it would least affect the population. Bartelsmeier said she is not sold on the idea of the highway. "I'm not sure we need any one of them," she said. "I think they should wait to see how the traffic pattern stabilizes."

The East-Couple also is designed to alleviate traffic that is not yet finished. It will change the two-way sections west of Washington Street into a one-way segment of Illinois 13.

Others who attended the meeting were in favor of the highway.

Brad Simpson, who owns a farm on the north side of Carbondale, said he likes the northern route because it would increase his property value. He also would use Carbondale traffic and promote businesses.

City officials, however, say they want to wait for more information before deciding which route is best. "For every plan you have to look at the negative points," Councilman John Mills said.

"There's no doubt Carbondale will eventually need a bypass. But we realistically we need to look at the funding. We're talking a major amount of money here."

Mills said no accurate estimates have been made.

Mayor Ted Lillard also said he is waiting to make a decision, but he thinks the bypass is a good idea.

"We, the City Council, would be negligent not to pursue it," he said. "We would not be good planners."

John Coombe, vice president of Springfield-based Hanson Engineers, said this meeting was just part of a study his firm is conducting. The study is expected to take more than two years to complete. Hanson Engineers will consider resident comments when choosing a route to recommend to the city, but the no-build option is still open, he said.

**RUSSIA, from Page 1**

and the independent Interfax agency said the final total would be over 50 percent.

The election commission said more than 70 percent of the 105 million voters cast ballots in the republic, which covers three-quarters of the Soviet Union's area, has half its population and most of its wealth in oil, gold and other resources.

Yeltsin's nearest challenger and the candidate supported by the Communist Party, former Soviet Premier Nikolai Ryzhkov, had no more than 15 percent of the vote. Interfax said.

Yeltsin ran strongest in the large cities of Russia, with the official agency reporting his share is up to 82.9 percent of the vote in Moscow.

Interfax said Yeltsin won 85 percent in Leningrad and about 90 percent of the vote in his native Sverdlovsk in the Urals, Russia's industrial heartland.

**BATS, from Page 1**

have pets vaccinated and tagged.

"A vaccination is the buffer between a rabid animal and you," Nelson said. "If you see a bat flying around during the day or disabled it should be isolated and pets should be kept away from it."

"As for people avoiding bats and being afraid of bats, it isn't necessary," Nelson added. "Once we get one bat that tests positive, everybody panics."

Residents who think an animal has rabies should contact either Jackson County Animal Control at 684-3591 or a local veterinarian.

Story-telling machine part of mind's eye

By Annette Holder

Entertainment Editor

Release your imagination at the "Fabulous Fable Factory" this weekend with the help of a little boy.

A machine that generates stories is not working because the 2,000-year-old man who operates it is asleep.

It takes a little boy to awaken him and get the machine working again.

The stories generated by the cast of characters who run the machine are as timeless as the Aesop fables that come out of the machine.

Nick Earl of Cobden plays Aesop, the machine operator.

Earl said finding a character's personality traits that are similar to his own is an important part of acting, but is the most challenging aspect.

"I'm 37 and I can identify with a 2,000-year-old man," Earl said. "Especially in the morning."

Actors alternate from being a part of the make-believe machine to acting in the various Aesop fables.

Play director Richard Williams, university studies senior from Energy, said the play has been fun for him to do because the interpretation of the play could go in a lot of different directions.

For example, in the tortoise and hare race scene, a slow-motion replay is enacted.

"No pre-recorded sound is used so the actors create a new motion sound that's kind of bizarre," Williams said.

Costume designer Wanda Oakley from Carbondale said she was challenged most by the creation of the many key hooves for the actors.

She used plumbing pipe covered with brown and black elastic sleeve material.

The hooves slip over the actors' hands and extend to their elbows.

Oakley used tea strainers for grasshopper's eyes and the donkey's ears were gray hats with ears made of material.

All costume changes are made on stage in view of the audience.

Williams said "The Fabulous Fable Factory" is a play both adults and children will enjoy.

The play is June 14, 15 and 16 and June 21, 22 and 23. Performances are 7 each evening and Sunday matinees at 2 p.m. Tickets are $2.

Justin Morrise, an eighth grader from DeSoto Grade School, surprises his friend Leeanogo Garrett, a seventh grader from Lincoln Jr. High in Carbondale, with a blast of cold water from a water fountain. The two South Illinois youths were playing behind the SIUC Arena in the hot sun of Thursday afternoon. The weather this week has been typically hot and humid, encouraging everyone to find interesting ways to keep cool.

1991 Summer Playhouse

Oklahoma!

by Richard Rodgers
and Oscar Hammerstein II

June 27-30, July 5-7

Almost 50 years later, Rodgers and Hammerstein's innovative first collaboration delivers a stirring piece of theatrical American. Simple and thrilling, Oklahoma! is an electrifying display of dance and song.

Lend Me A Tenor

by Ken Ludwig
July 11-14

When an Italian tenor shows up too late and apparently too dead to perform in the opera, a series of comic complications erupts in this hilarious award-winning farce based on Broadway.

Drood

by Robert Holmes
July 19-21, 25-28

A musical based on Charles Dickens' incomparable novel, The Mystery of Edwin Drood. Drood and a host of other characters work in mysterious tale that's sure to be the season's grimmest. That is until the end, when the plot is thrown open to the audience.

Box Office: 453-3001 Monday - Friday 10:30 a.m. - 4:30 p.m.

And 1 1/2 hours before each performance

SOUTHERN ILLINOIS UNIVERSITY AT CARBONDALE
Eight ex-hostages request Iran detainee investigation

WASHINGTON (UPI) — Eight U.S. Embassy workers held hostage by Iran 12 years ago asked Congress Thursday to launch a full-scale investigation into allegations the Reagan-Bush presidential campaign delayed their release until after the 1980 election.

"We believe the American, whether a private citizen or government official, may have participated in delaying release of the hostages for political gain is disgusting," said a lawyer signed by eight of the 52 former hostages.

"Until recently, these allegations had been dismissed as unsubstantiated.

But substantial enough information has been presented by respected and persistent investigators to warrant a thorough examination of this matter," the lawyer said.

Two of the hostages who signed the letter — Barry Rosen and Moorhead Kennedy — told reporters that more of the hostages likely would have signed the letter had they been given a chance to get it out on the same day that a panel discussion was being held on the allegations.

David Marks, West Coast director for the Fund for New Priorities in America, the group that sponsored the panel, said he had contacted 34 of the 52 hostages, and believed at least a third would have signed the letter.

Some, he said, were opposed to the investigation, a few wanted to put the matter behind them, and others were reluctant to sign because they held jobs in the government or military.

Rumors that officials in the 1980 Reagan-Bush presidential campaign made a secret deal to permit arms shipments to Iran in exchange for a delay in the release of the 52 American hostages first circulated the day after Reagan's inauguration, when Iran agreed to release the hostages exactly five minutes after Reagan took the oath of office.

They were held for 444 days.

The issue was resurrected April 15 when New York Times printed an article by former Carter administration official Gary Sick, who wrote that he at first doubted any such deal but has since been confronted with significant evidence leading him to believe a deal may be true.

House Speaker Thomas Foley, D-Wash., announced Thursday he later had asked unnamed House members to "explore formally" whether there was sufficient justification for a full-blown investigation of the allegations.

House Rules Committee vice chairman Butler Derrick, D-S.C., who said he asked Foley to conduct the inquiry, told reporters a response could come as early as two weeks from now.

Bush calls for action to immunize America's children from measles

WASHINGTON (UPI) — Sounding an alarm on the rise of measles in the nation, President Bush Thursday asked every parent in America to "make sure your child is immunized.

An alarm is sounding in the Rose Garden, Bush and Health and Human Services Secretary Louis Sullivan both warned 1990 brought the largest number of measles cases since 1980, a year before the disease was eradicated.

It was noted that he has asked for an additional $40 million in the 1992 fiscal year budget to make sure every parent knows measles are a serious threat to children and to adults because the disease may be severe, even fatal.

"We have plenty of vaccine but we must do the hard work of logistics, planning and coordination to get the vaccine to the children," he said.

Sullivan said, "we still have a huge inoculation gap in some pockets of our inner cities and rural areas, less than 50 percent of our children have been immunized."
Baker mediates negotiation between Israelis and Arabs

WASHINGTON (UPI) — Secretary of State James Baker, trying to arrange direct talks between Israel and its Arab neighbors, met Thursday with Israeli Foreign Minister David Levy, who said afterward the Middle East peace process is not stuck.

Baker also met Levy for about two hours, said just before he entered the talks at the State Department, that he was not considering at this time inviting Israelis and Arabs to come to the peace talks again.

Baker also said, "No, when asked whether he was planning another meeting with the Middle East leaders.

"The process is not stuck," Levy told reporters after the meeting. "We will continue the consultations.

"Levy also said that "Israel has so far made many concessions" and it is up to the Arabs to come up with greater ones.

Baker, who did not make a comment following the meeting, said earlier Thursday that "the United States would be "talking about our mutual efforts to develop a process for peace" and we intend to continue those efforts.

"He praised Levy, saying, "I don't think there's been more active or outspoken in favor of a peace process."

Testing support before a Senate Appropriations subcommittee Wednesday, Baker responded to reports that the Chinese were selling Syria surface-to-surface missiles that could hit Israel.

He said that while the United States had no hard evidence that any of the missiles have been delivered to Syria, the administration nevertheless has warned China not to get involved.

"We have made it clear that there would be potentially profound consequences for our bilateral relationship if they were to sell these missiles and we would have several options that they might have represented to us," Baker said without offering any details.

"He also brushed aside criticism that the United States has warmed up to, "yia the exposure of Israel.

He said the Syrians are pivotal players that the administration wants them included in the peace process.

"On the point I want to make is that we have not changed our policy in any respect to Syria," Baker said. "We have engaged with them on the peace process, because we're trying to push them just like we're trying to push, encourage other parties to participate in these discussions.

"The United States still considers Syria a terrorist state but Baker said that the administration has seen some positive changes.

"There has been a marked change in their approach to this issue, as far as terrorism directed against the United States and Western European interests are concerned."

German unification to be praised at summits

BONN, Germany (UPI) — Canadian Prime Minister Brian Mulroney told German Chancellor Helmut Kohl Thursday that German unification helped the reunification of the eastern and western parts of Europe to the West, which he said would be reflected at the upcoming CSCE and summit meetings.

The Foreign ministers of the 34-nation Conference on Security and Cooperation in Europe are to meet in Bonn next week to discuss the terms of states and governments of the Group of Seven most industrialized nations are to hold a major summit in London. Soviet leader Mikhail Gorbachev is expected to attend post-summit meetings with the delegates.

"It is astonishing that you have largely engineered in regard to the states in eastern Europe and in regard to the Soviet leadership is now in the process of paying some remarkable dividends in terms of opportunities which I hope we will grasp at the CSCE and at the G-7 meetings," Kohl said after one-hour talks with Kohl at the start of a four-day visit to Germany.

Egypt agreement with Israel frozen to protest opposition

CAIRO, Egypt (UPI) — Egypt has frozen its cooperation agreements with Israel to protest what it sees as the United States' unhelpful stance toward achieving peace in the Middle East, an Egyptian newspaper reported Thursday.

The right-wing daily Al Wafd declared Thursday that it was freezing all official cooperation ties with the Egyptian step as a serious development in Egyptian-Israeli relations.

Egypt 12 years ago became the only Arab country to sign a peace treaty with Israel but relations have remained chilly because of what Cairo views as Israel's continued occupation of Arab land.

"I do not freeze all signed agreements with Israel and halt the exchange of visits between Israeli and Egyptian officials to protest the Israeli government's stance toward the peace process," the newspaper said.

The newspaper also said Egypt decided to terminate the work permits of all but four Israeli specialists working on Egyptian agricultural projects. The daily did not say why four Israelis would be allowed to stay and the government spokesman declined to say how many Israeli work in the country.

Al Wafd said that Egypt recently received an Israeli memorandum demanding that it honor agreements made between the neighbors.

The newspaper reported coincided with a visit to Cairo by a seven-man delegation from the Israeli opposition Labor Party intended to improve strained relations and help persuade the Israelis to resume talks.

The Israeli delegation, led by Haim Ramon, met Thursday with Egypt's foreign minister for foreign affairs, Boutros Ghali, and Anwar Al Bu, Muftahar's senior political adviser. The delegation also met with Foreign Minister Amr Moussa.

One delegation member, Israeli Arab Nawaf Masalha, said after talks with Ghali that Israeli Foreign Minister David Levy may be invited to visit Egypt with a delegation from the ruling right-wing Likud bloc to discuss the peace process.
Hudson hokey

Silver production not up to standards of previous four movies

By Annette Holder
Entertainment Editor

"Hudson Hawk" is supposed to be an action-comedy, but the mediocre humor flew over the audience's head.

Bruce Willis plays Hudson Hawk, a famous cat burglar. Hudson Hawk is determined for the first five minutes of the movie to have a legitimate career. When his best friend’s life is threatened unless he steals three pieces of art by Leonardo da Vinci, he returns to his illustrious career. "Hudson Hawk" is produced by Joel Silver. Silver has also been responsible for the great action films "Lethal Weapon," "Lethal Weapon 2," "Die Hard," and "48 HRS."

Unfortunately, the talent of this well known producer was not enough to pull the movie up to the quality it could have been.

Willis is a good actor, but the movie was unbelievable and a silly. For example, Willins and friend Tommy Five-Tone, played by Danny Aiello, sang songs and danced their way from heavily guarded museums.

To add to the silliness, four C.I.A. members who are involved in the plot to steal the art objects are named after candy bars. The C.I.A. members carry in their pockets the candy bars they are named after.

In the movie, Willis and Aiello climb a rope to reach the roof of a museum they want to rob. Aiello throws the rope back to the other building, leaving them trapped on the roof of the museum.

AfterWillis asked Aiello why he did that, Aiello replied that they were leaving through the basement. It was supposed to be funny when Willis said that now they don’t have a choice.

Another example of humor that misses is when Aiello asks Willis what all the rocks on the ground are when they are in Rome. It is not as funny as it is meant to be when Willis tells him they are ruins.

Soviets boycott American videos

WASHINGTON (UPI) — Responding to reports of widespread video piracy and apparent participation by the Soviet government, Jack Valenti, chairman of the Motion Picture Export Association of America, announced that the Soviet Union has stopped distribution of American films to the Soviet Union.

Anti-noise rules enforced by theater

LOS ANGELES (UPI) — AMC Theaters announced Thursday it will be enforcing aluminum foil as part of its official policy.

"When we asked people what one thing we could do to encourage them to return, 72 percent of them said it would be to do something about people who talk during films," said Jack Holliday, vice president of marketing for AMC. "It was far and away the biggest concern." AMC executives announced the new "Silence Is Golden" policy, which goes into effect Friday, at a news conference at their 14-screen multiplex in the upscale Century City neighborhood of Los Angeles.

Census reports population down, housing harder to buy

**WASHINGTON (UPI) —** The Census Bureau released its preliminary version of population figures Thursday, but said it is not certain they will be used.

The problem stems from differences in the bureau's surveys and numbers pulled from birth, death, emigration and immigration records.

Peor A. Bourgane, associate director of the Census Bureau, said the bureau will tell Commerce Secretary Robert Mosbacher by the end of the month if the bureau thinks the files should be used to revise census data.

Mosbacher will then announce whether he deems census numbers will be adjusted by July 15.

The new figures showed the population at 247,681,000 down from the 253,917,000 estimated in April. But, the department said, the margin of error remains the same.

Still, statisticians at the bureau estimated that the new figures cut the margins of error in figures from previous surveys by a greater degree of confidence in the figures, culled from post-enumeration surveys, or PES.

Eventually, these are interviews done in order to compare the data collected with figures from census data.

"Some states changed very dramatically between the preliminary PES estimates and today's," said Bourgane. "Of course, some benefit more than others."

Many big city mayors have pressed the bureau to increase the numbers for their cities.

At stake are billions of dollars in federal aid that is distributed on the basis of population. A federal suit is pending demanding an adjustment of the figures.

Some tricky problems remain for the bureau, not the least of which is an acknowledged undercount of blacks and Hispanics and a discrepancy between the number of women found in the PES count and the number counted using birth and death records.

"We have estimated an undercount of 5 million people," Bourgane said.

When bureau officials compared its survey with demographic data, especially an analysis of births, deaths, immigration and emigration records — they found a discrepancy between figures for women and Hispanics.

While illegal and detected immigration can explain the discrepancy in the number of Hispanics, census officials were baffled by the higher number of women.

**Study: American dream unattainable for families**

**WASHINGTON (UPI) —** The American dream of owning one's own home is becoming more difficult, the Census Bureau said Thursday. In 1988, less than half of the families and individuals could afford the median price home in their region.

In the dry, number-crunching way of census reports, the study — using the information from the bureau's Survey of Income and Program Participation (SIPP) — reports finding many home seekers already know from their house-hunting experience.

According to the survey, over one-third of current owners and 91 percent of current renters could not afford the median-priced home in the neighborhood where they live.

In the category of maximum-priced houses, it said the median-priced house that could be afforded by married-couple owners is $126,000.

But it said married couple renters generally did not have enough assets or cash to afford any house or only a house priced below $20,000, which are virtually impossible to buy.

Overall, a house purchase was least affordable for families headed by a female and most affordable for a married couple with no children.

The census study used information on income, assets and debts to determine whether a family or individual can afford, or qualify, for a home using both conventional and FHA mortgage guidelines for a 30-year mortgage.

"About one-fourth of all married-couple families could not afford a house or could only afford a house priced below $20,000," the study found. "Compared with 22 percent that could afford a $200,000 home."

About three-fourths of black families and Hispanic families could not afford the median-priced home, the study compared with 43 percent of white families and 46 percent of non-Hispanic families.

It said the ability to afford the median-priced home increased with age, with 94 percent of families with the head 65 or older able to qualify but only 50 percent of families with heads between 55 and 64 unable to buy a home.

**Births to unwed moms 26 percent of all babies**

**ATLANTA (UPI) —** More than 1 million infants are born to unmarried women in the United States, accounting for 26 percent of all births, the federal Centers for Disease Control reported Thursday.

The agency cited the health risk of low birth weight common among such infants, said there is a growing need to focus prenatal care programs on women least likely to receive timely prenatal care and those at greatest risk of having an unwed infant.

The number of births to unwed mothers increased from 665,747 in 1980 to 1,051,299 in 1988, the last year for which statistics were available, the CDC said.

But the increasing trend of unwed women having infants apparently is continuing, said Suzanne J. Venuta, a statistician and demographer with the CDC's National Center for Health Statistics.

"There has been no letup in the proportion of infants born to unmarried mothers," she said.

Based on recent trends, there has been an increase.

Abortion levels, she said, "will not change much, indicating that more teenagers are sexually active and more are getting pregnant."

Of the 1,051,299 children born to unmarried women in 1988, 426,605 were born to white and 335,696 were white, the CDC said.

"Although rates of childbearing among unmarried women remained highest among black women, during the 1980s the increases were greater for white women," the CDC said.

From 1980 through 1988, there was a 51 percent increase for white women — from 17.6 to 26.6 per 1,000 respectively — compared with 7 percent for black women — from 82.9 to 88.9 per 1,000 respectively, the CDC said.

Teenagers also were having more children, the CDC said. From 1986 through 1988, the overall birth rate for women ages 15 to 19 increased 6 percent — from 50.6 to 53.6 births per 1,000. There was a 10 percent increase for women ages 15 to 17 years.

The CDC said these findings could reflect either an increase in the teenage pregnancy rate or a decline in the abortion rate.

However, it cited a previous report indicating that the abortion rate for teenagers changed only minimally during the 1980s, "suggesting that the increased birth rate from 1986 through 1988 represented an increase in the pregnancy rate."

"Data from the National Survey of Family Growth... indicate that during the 1980s the proportion of teenage women who had sexual intercourse increased substantially," the CDC said.

For those ages 15 to 19, the proportion increased from 42 percent in 1980 to 52 percent in 1988, and increases were even greater among younger teenagers, the CDC said.
Columbia crew prepares for return trip Friday

CAPE CANAVERAL, Fla. (UPI) — The Columbia astronauts, using a new kind of sample by which they could freeze samples freezing, tested the shuttle's re-entry systems Thursday and cleared the way for a weekend landing, NASA said.

Despite the shuttle's trouble and a handful of other minor problems, procedures were completed to prepare the shuttle for landing Thursday. The first totally dedicated research module, the spaceplane is ready for the long glide back to Earth.

At the same time, Jernigan, Bazian, Seddon, Gaffney and Hughes-Fulford began wrapping up extensive battery of medical experiments inside the crew's roomy new research module. Throughout the flight, the astronauts had no access to two Spacelab units as one freezer, and then the other, failed to maintain the proper temperature, without ever having been used, to prevent the experiment from freezing.

It was an extra 90 minutes or so, the astronauts spent the morning working through a troubleshooting procedure to eliminate the problem.
Chopper hauls jumper from Mississippi River

ST. LOUIS (UPI) — A helicopter pilot who does broadcast traffic reports flew his chopper just a few feet above the Mississippi River to rescue a man who had fallen Thursday from an interstate bridge.

The dramatic rescue occurred about 6 a.m. during rush hour and was witnessed by hundreds of commuters on the eastboundbound 640 New Street Bridge, which connects St. Louis to St. Louis County.

The incident began when police received reports of a man standing on the bridge railing apparently contemplating a jump.

Authorities closed but one eastbound lane of the bridge as police tried to persuade him not to jump.

Officer Gerald Harrell of the St. Louis Police Department managed to grab the man's arm, but the man struggled and fell about 125 feet into the river.

That was when Allen Barklage, who was piloting the helicopter, used his hands to do traffic reports for two radio stations and a television station, went into action.

"It looked like (the man) either slipped or started to jump," Barklage said in a telephone interview. "The policeman grabbed him by one arm and held onto him for a minute, then the man fell into the river. We were right on top of him.

Barklage immediately swooped his helicopter down to within a few feet above the river, where the man was struggling to stay afloat.

"I think he changed his mind and somehow fell between the bridge and the water," the pilot said of the man who fell. "When we got down to him, he was right there, about to jump into the water."

Jim Cavins, a firefighter from O'Fallon, who was a passenger in the helicopter, opened the rear door of the aircraft and pulled the man as he struggled in the river.

"I opened the door, and the river and the jumper were just right there," Cavins said. The firefighter told him he sold tobacco to a man in the water to grab the helicopter's landing skid and hang on.

"We lifted him up out of the water," Cavins said. "(Barklage) kept telling me to watch his feet so he didn't fall in."

Court ruling makes it easier for cops to question inmates

WASHINGTON (UPI) — The Supreme Court on Friday gave police greater leeway to go into jails and question some inmates about crimes unrelated to those for which they were arrested.

The court, in a 6-3 ruling, said, in the Sixth Amendment's right to an attorney in court does not require that the attorney be present when a lawyer later present in jail if being asked about other incidents.

In 1984, the court said if an inmate requested a lawyer under his Fifth Amendment Miranda rights when being questioned about a crime, a lawyer must be present at the questioning.

The court said Thursday the Sixth Amendment right to have counsel present as a judicial hearing, however, is "offensive specificity and not as comprehensive as the Fifth Amendment Miranda right.

All suspects still retain their Miranda rights to request a lawyer during questioning, but the Sixth Amendment cannot substitute, the court said.

Justice Antonin Scalia, writing for the majority, said the Sixth Amendment only applies to a criminal case and not to judicial proceeding, such as a hearing in family court.

In 1986, the court said once a suspect invoked his Sixth Amendment right to an attorney at a pretrial hearing, he could not be questioned again by police without an attorney present.

Thursday, the court said that applies only to the specific crime for which a suspect has been incarcerated.

Justice Paul Stevens called the court's fears "grossly exaggerated."

Drug user asks for help getting refund on coke

BALTIMORE (UPI) — A cocaine userdecided he wanted his money back so he could visit a prostitute and took his dilemma to police said, authorities said.

Officer Louis "Hop" Hopson, taken aback by the man's temerity, asked him if he was really trying to purchase a good.

"I think I can help you out, my man," and asker him to the nearest cell at the Northwestern District police station.

"He had cocaine residue on his nostrils and up his nose," someone said.

"I was supposed to get his money back so he could purchase the services of a prostitute."

Hopson says the suspect was carrying a $50 vial of cocaine in his pocket. The man apparently had already sampled the product before going to the police to arrest the dealer.

Instead, police showed the man to a jail cell and warned him not to sell or use cocaine for him — the dealer.

"He was evidently unsatisfied that he had spent his money on drugs and could not longer afford the paraphernalia," Hopson said. "It's a good story. I like it. Every day's it a different story."

James Daniel, 23, was charged with possession of cocaine. He was released on personal recognizance.

Liddy admits plotting murder of journalist

NEW YORK (UPI) — Watergate mastermind G. Gordon Liddy plotted to kill a probing journalist, James Anderson at the height of the Nixon Administration's Watergate. An interview with Liddy says he and fellow political operatives considered several methods of assassination, including slipping Anderson LSD and setting his car on fire.

"We had a very full discussion about how to do that," Liddy added.

CLASSIFIED ADVERTISING POLICY

Please Be Sure To Check

Your Classified Advertisement For Errors

On The First Day Of Publication

The Daily Egyptian cannot be responsible for more than one day's incorrect insertion. Advertisers are responsible for checking their advertisements for errors on the first day they appear. Errors not the fault of the advertiser which lessen the value of the advertisement will be corrected.

All classified advertising must be processed before 12 Noon to appear in the next day's publication. Anything processed after 12 Noon will go in the following day's publication. Classified advertising must be paid in advance except for those accounts with established credit. A $25 charge will be added to billed classified advertising. A service charge of $7.50 will be added to the advertiser's account for every check returned to the Daily Egyptian unpaid by the advertiser's bank. Late cancellation if a check is not cancelled will be charged a $20 service fee. Any refund under $20 will be forfeited due to the cost of processing.

All advertising submitted to the Daily Egyptian is subject to approval and may be revised, deleted, or cancelled at any time.

The Daily Egyptian assumes no liability for of any reason it becomes necessary to omit an advertisement.

A sample of all mail order items must be submitted and approved prior to deadline for publication. No ads will be missed.

Cubs sneak by Giants 4-3

CHICAGO (UPI) — Ryne Sandberg's two-run single and solo homers by George Bell and Andre Dawson boosted the Chicago Cubs to a 4-3 victory Thursday over the San Francisco Giants. Andre Dawson threw out the potential tying run at the plate to end the game. Paul Assenmacher is relief of Mike Bielecki, and Willis McGeen with one out, and then induced pinch hitter Mike Kingery to fly to Dawson in right. Dawson's throw caught pinch runner Tony Perez.

Bielecki, 8-4, got the win in his first relief appearance of the season while Assenmacher picked up his fifth save. With the Cubs trailing 3-2, Sandberg's single to left in the bottom of the seventh drove in pinch hitter C.J. Walker, who singled, and Doug Dascenzo, who doubled. The Giants opened the scoring with two runs in the third. With one out Robby Thompson singled to left. Willie McGee was safe on an error by first baseman Mark Grace and Mark Leonard singled sharply to right, loading the bases and setting the stage for a two-run double by Matt Williams. The ball dropped just inside the left-field line. The Cubs tied the game in the fourth on back-to-back solo home runs by Bell, his 12th, and Dawson, his 11th.

CAMP, from Page 16

staffed by Saluki coaching staff, area junior college coaches, high school coaches and Saluki players. "Our staff includes coaches and people we think are competent instructors in the game of baseball," Riggleman said.

Steven Wallace, a 14-year old from Tipton County High School in Cadiz, Ky., hopes to play college baseball one day.

"I've been to several baseball camps, and I like this one the best because you get a lot of one on one instruction from the coaches," he said.

Campers stay in Pierce Hall at Thompson Point and have access to University recreation facilities, said Jesse Griffin, a 15-year old from Paducah doesn't mind the camp atmosphere.

"The walk is kind of far to the park but suprisingly the food isn't that bad," he said.

The fee of the camp is $220 for off the course, but there was very little protection available for 40,000, Adams said. It was the first lightning strike at the U.S. Open since Oakmont in Pennsylvania in 1983.

One person was hit by that strike but survived. David Fay, executive director of the USGA, said tournament officials had been tracking the storm with their own radar equipment for an hour.

He said as soon as officials saw a lightning bolt on the horizon, play was called with the use of three or four airbornes. "We have not come to a solution of what you do under a large number of people on a golf course to get them to a safe place," Fay said.

He said the partners carry a message warning spectators to stay away from tall trees, hilltops and metal fences. A three or four foot chunk of bark was ripped off the willow tree. Another strike knocked off the branch of a tree behind the 10th tee but no one was hurt.

Play resumed at 3:35 p.m.

OPEN, from Page 16

Lightning, from Page 16

listed in stable condition.

All six men were struck as they stood near a tall willow tree along the 11th fairway, Dr. Kent Moldt said.

Play had been suspended at 12:49, about 10 minutes before the lightning struck.

A three-course including Corey Pavin, Craig Parry and K.J. Feltz had just teed off at the 11th, and when the alarm went off they marked their balls and walked within several feet of the tree on their way to the clubhouse.

Officials said they did not know whether the strike was a direct hit or a flash after it struck the tree.

"People were doing the worst possible thing, standing under the tallest, trees," said Dr. Bruce Adams, a volunteer at the tournament.

Tournament officials moved quickly to get the crowd quickly off the course, but there was very little protection available for 40,000, Adams said. It was the first lightning strike at the U.S. Open since Oakmont in Pennsylvania in 1983.

One person was hit by that strike but survived. David Fay, executive director of the USGA, said tournament officials had been tracking the storm with their own radar equipment for an hour.
