Till death does them part

Woman's love affair with death row inmate serves a life sentence

MOLLY PARKER

With a simple motion of her hand, Lisa Chitlin waves her long, thick braided hair behind her back. A self-professed "love child of the 60s," struggling student and recovering drug addict, she rambles some—often, when she drinks too much, coffee. But when she talks about her love for Victor Ganus, known to the Illinois Department of Corrections as inmate N10826, she blinks slowly.

Lisa and Victor's going together began their unusual relationship on the Internet two years ago. Lisa, who was born in Illinois but raised in California and Washington, spent her sophomore year of high school "stoned" and dropped out at age 16. She spent time in jail for dogs and was pregnant at 17. Now 32, she has developed an appreciation for a simpler way of life in Southern Illinois.

"I'm not some lonely prison groupie," Lisa said. "I don't talk people because they make it ugly and not ugly. I'm not stupid. I'm not going up things. I work. I go to school."

Lisa moved to Carbondale to be closer to Victor. She's now off drugs, working her way through college at SIUC, majoring in forestry, raising her 3-year-old daughter and taking care of two dogs. Her small white home is surrounded with gewgaws, but she wishes the neighbor would quiet her barking—she'll move it when finals week is finished.

Lisa ran across Victor's name on an inmate website run by a nonprofit organization and wrote him a letter out of curiosity. A connection was made and the pair has now been writing letters for two years.

"Like my girl," Victor says flashing Lisa a smile from the other side of the clear wall that separates them. Inside the small building, built with concrete blocks and glass windows, he sits on a small metal stool with his feet cuffed together.

Lisa has never met Victor—prisoners are not allowed any outside contact at Tamms. And it's likely she never will. Victor, who has been in and out of prison since his teenage years and at Tamms for three years, believes his only way out of prison is execution.

Victor was serving a life sentence at Menard Correctional Center for the 1985 murder of two women near Carbondale. See related story, page 8.

Brakes still set on fast-lane to St. Louis

Four-lane from Murphysboro to Pinckneyville more likely

JAY SCHERER

Area officials are continuing to voice support for a major transportation artery connecting the Carbondale area to St. Louis, which has long been advocated by Southern Illinois politicians, in a bid to receive the necessary Illinois Department of Transportation grants to get off the ground.

A proposed four-lane highway between the Carbondale-Murphysboro area and St. Louis, which has long been advocated by Southern Illinois politicians, in a bid to receive the necessary Illinois Department of Transportation grants to get off the ground.

A four-lane from Murphysboro to Pinckneyville would provide a major incentive for businesses to locate in Southern Illinois. A ties into the Gateway Archway, St. Louis, and mapy in the St. Louis area, even in the current jobless state, and many in the area place blame on the state for what they consider to be underdeveloped facilities that deter business from locating in Southern Illinois.

A feasibility study conducted in 1995 showed that traffic along a proposed toll highway between Murphysboro and St. Louis would range from 7,100 to 9,300 vehicles per day. The estimated range of costs would be $630 million to $750 million. See related story, page 8.

Education key to stabilizing population

Expert warns of population explosion

MARK LAMBERT

Internationally renowned population expert Werner Fornos advocated education as a means of stabilizing the burgeoning world population in a presentation to students Thursday.

Fornos, president of the Population Institute in Washington, D.C., said the world is heading for catastrophe if the population is not brought under control. He said the strain being put on the environment by the natural resources needs of the planet's six billion people will cause profound worldwide changes.

"This summer there will be 40 days of 100 degree-plus temperatures in the Midwest," Fornos said. "This has never happened before and people still say there isn't global warming.

"Bush chided President George W. Bush for his view that there was not enough information to make a decision on global warming. He said 14 of the last 20 years have been the hottest recorded.

"If we don't stop our Western appetite for fossil fuels we won't be able to save ourselves," Fornos said.

The solution, Fornos said, was a message of "growth and don't growth," but a message that what is happening cannot be changed. He said by preventing people from the classes the have in raising a family and using available means of contraception are the main factors in stabilizing the population.

"Infertile people make informed choices," Fornos said.

He said males need to take more responsibility in the reproduction process. Fornos spoke out against such practices of female infanticide and female genital mutilations. Infanticide happens predominately in India, Cius, Afghanistan and Pakistan. Families in these cultures sometimes practice infanticide because they want male offspring to help support the family.

Fornos said slowing down population growth is required to solve the threat of starvation, poverty and keeping the climate across the world from decaying more world-wide. In Africa, the desert regions are expanding by 10 miles every year. If this trend continues, Fornos said, the food supply in these regions of the world will shrink and cause more starvation.

The Population Institute was established in 1969 and includes 375 countries worldwide. The institute was established to address concerns of growing population and the impact that it has on the environment and social issues.
southern part of the state, has observed this issue closely for the past 30 years. He said that people from the region need to be pragmatic in their pursuit of better transportation access.

"It's a matter of folks wanting something and not being willing to address realities," Bartelsmeyer said. "The traffic in the area is not terribly high.

Although past feasibility studies have shown the traffic between the Maryville and Metro East area does not warrant a four-lane highway, Kimmel said he believes it could be expanded to a four-lane type route, which he asserts the traffic would come with a better transportation network.

"If we look at figures, probably from New York 30 years ago we couldn't justify new roads getting in and out of New York because there wasn't enough traffic," Kimmel said. "You have to justify before they're built — they're justified after they're built."

David Gillies, chief of staff for U.S. Congressman Jerry Costello, D-Bellefontaine, said that although Costello is a "strong supporter" of the creation of a four-lane highway between Carbondale and St. Louis, it is up to the state legislature to get the plan on the five-year IDOT construction plan before Costello can begin working to secure funding.

But State Sen. Dave Luechtefeld, R-O'Fallon, said perhaps the time for the highway project has expired.

"The department has sort of given up on the idea of a highway directly from Carbondale to St. Louis," Luechtefeld said. "But we as legislators will certainly continue to pursue something that improves transportation in the area."

State Rep. Mike Bost, R-Murphysboro, takes issue with the notion that the federal government must take a stake until IDOT includes the project in its plan.

"If the federal government decides they want to put an extension to an interstate, that is well within their call," Bost said.

Realistically, the original goal of building a four-lane highway all the way to St. Louis is all but dead, Bost said. The project has degenerated into a "polo match" effort, though he prefers the alternative of widening Highway 127 to Nashville.

"As far as we're moving to some type of direction to do something," Bost said. "Am I happy about it? No."

Bost said he is optimistic that the revised proposal of widening Highway 127 to Pinckneyville — estimated to be a $55 million outlay — will find a place on IDOT's five-year plan in the near future.

Bartelsmeyer said the state is conducting a thorough study on the logistics of widening Highway 127 into a four-lane highway to the northern edge of Pinckneyville. It is 42 miles from the 127 junction in Murphysboro to Interstate 64 north of Nashville, and Bartelsmeyer said the initial phase of the project would likely encompass the first half of that stretch.

The three-year study, which began earlier this year, will not be completed until 2004. Of chief importance in passing the project through the highway project would be securing funding. Out Highway 127, which currently winds through downtown Pinckneyville and also flows through Nashville.

Pinckneyville is the only town that presents a challenge if Highway 127 were to be widened. Pinckneyville Mayor Kevin Heisner said a major highway going through Pinckneyville is essential if the town is to avoid stagnation.

"We have some major manufacturers here that need to get to the interstate every day with their products," Heisner said. "We don't have the capability right now."

Heisner is confident that with the cooperation of IDOT, federal money would be easily attainable.

"Costello has told me if they figure out how to do it, we'll get the money," Heisner said.

One point of contention revolves around whether the highway would go through the heart of Pinckneyville, or be routed along the outskirts of town. Heisner is adamant in his request that the highway be built through downtown, in order to provide the town with as big of an economic lift as possible.

"A highway that bypasses the town often kills the downtown area," said Luechtefeld, who said IDOT will continue to analyze whether the proposed road should go through Pinckneyville.

Kimmel said that one option that has been considered in the past is extending Interstate 24 east into Paducah, Ky., so that it continues northwesterly toward St. Louis.

Currently, Interstate 24 merges with Interstate 57, which provides access to the community.

But Bartelsmeyer rejected the Interstate 24 option, but instead urged local and county officials to band together and rally behind the widening of Highway 127.

"What I don't see at this point is a regional push for expanding the highway between Murphysboro and I-64," Bartelsmeyer said. "I have my doubts that the local people will coalesce to support it."

Without that kind of support, it probably won't happen."
USG president wants new election in fall, allocations held mainly for general funding

CHRISTIAN HALE
DAILY EGYPTIAN

Undergraduate Student Government President Bill Archer is threatening to veto the ratification of the spring elections and the proposed spring fee allocations.

Wednesday night's meeting was rocked with controversy as the senators ratified the election results, only to be told by Archer that he refused to sign the ratification, halting the scheduled affirmation of Michael Perry as the new president.

Archer then said he would not sign the allocations bills, which would fund Registered Student Organizations.

However, Archer said he would allow funding for the two student constituency groups, the five Priority One RSO's, as well as the three Greek councils which make up the InterGreek Council.

He predicted that nearly $250,000 would go into general allocations, but he didn't specify which groups.

"It didn't become president to become popular. I became president to do the right thing," Archer said. "I can't sit by and let votes that I need to win become void because the Senate didn't think they needed to vote.

"It's in the middle of finals week," Archer said. "I don't know what Archer is thinking because we hardly get quorum at regular meetings." Archer said he is vetoing the allocations because of the finance committee's failure to prepare for all possible election results.

"A number of minority organizations were either completely overlooked or understudied," Archer said. "A number of groups were turned away because they filled the form wrong, incorrectly and didn't have time to correct their mistakes, mostly because the Senate committee gave them hardly any time to apply for money.

"To explain his decision to veto the ratification, Archer handed out a memorandum to the senators at the meeting prior to speaking in his last executive report of the term.

"Within the memorandum on 10 were reasons the election needed to be disqualified," Archer said. "In the fall, with Archer placing blame on the Senate for understudying the situation.

"I have no doubt that Perry got more votes than me and should be the next president," Archer said. "But I have problems with the way the election was run. It's retarded. The same thing happened last year but nobody would stand up to say there was a problem."

Nathan Stone, USG Chief of Staff and newly elected student trustee, said there is no doubt that there were problems with the election, but said that spring's election was better than previous years.

With Archer's threatened veto of the allocation, Stone said it could mean that SRS will remain in limbo until Larry Dietz, vice chancellor for Student Affairs and Enrollment Management, intervenes since members sworn into office may only remain in their positions for the maximum of one year.

Climo said Dietz has made it clear to Archer that he will appoint Perry as the president regardless of whether Archer vetoes or fails to sign the ratification.

As far as a new election occurring in the fall, Stone said that possibility is only an assumption.

"The biggest thing with the election this year was that everyone knew that there has historically been a problem," Stone said. "Mary Ober, (Election Commissioner), wanted to legitimately fix this problem."

Stone said the problem with spring's elections did not lie with USG, the Election Commission or the commissioner.

"The problems lies in the student," Stone said. "The voting system is not the best in the world. With it not working right, it is not possible to vote more than once in certain polling places."

Stone said options are being reviewed to come up with a better system and the possible use of an online voting system.

Archers veto election

Simon performs with SIUC Wind Ensemble

Real Simon will present the world premiere of the spring concert of the Southern Illinois University Carbondale's Wind Ensemble at 8 p.m. Sunday in Stroud Auditorium.

Silas Wright, SIUC music director, will lead the 45-piece orchestra in the premiere of "Let Every Man Remember" by William Campbeill. Campbeill composed the piece in remembrance of abandoned Civil War Dead.

Former U.S. Sen. Paul Simon, founder of the SIUC Public Policy Institute, wrote a book about Loyola and will receive the piece.

Proceeds benefit the SIUC music scholarship fund. Tickets are $5 and $3 for students. Contact the University Box Office at 453-2974 for information.

BattleBots draws crowd

A production crew from Comedy Central will be on campus today to shoot a segment for its "BattleBots" program, which puts homemade robots up against each other until only one remains standing.

A team of SIUC students from the College of Engineering has entered a robot in the "BattleBots" competition set for May 22 through May 27 in San Francisco.

Comedy Central will be documenting the team's preparations for the showdown.

The show will be led by Bill and Dave, a color commentator for the "BattleBots" program.

Midnight pancake snack

The Newman Catholic Student Center will offer a free midnight breakfast from 10 p.m. to 2 p.m. Sunday. Students can study for final exams and watch the Edwards Temple, 60 E. Main St.

Chancellor candidate's open forum today

Walter Wender, one of the two candidates for chancellor, will hold an open forum today to answer student questions.

The forum will be held at 5:15 p.m. in the Student Center Auditorium. Prospective chancellor candidates are eligible to attend.

SIUC students illuminate Quigley Hall with light fixtures

ANDREA DONALDSON
DAILY EGYPTIAN

Rays of light beam off the metal and glass luminarie fixture on display outside Quigley Hall, making the campus site a dark spring evening.

The luminarie, designed by interior design and architecture students, is part of the ARC/2 2000 Lighting and Acoustical Systems class. The display, which is located at the south end of QUigley Hall, will be on display through this Friday.

Melinda LeQuerci, a professor in art and design, said the lights were designed to complement work done in other classes.

"I used the same concept so that the light could be used inside and outside," Hayunga said. "At night, when they are all turned on, it makes a nice addition to the world. With it not working right, it is not possible to vote more than once in certain polling places."

Stone said options are being reviewed to come up with a better system and the possible use of an online voting system.

Stone said options are being reviewed to come up with a better system and the possible use of an online voting system.

On the hunt for Illinois’ wild flora

Wild about Wildflowers

STORY BY MARLEEN TROTT

Jenny Skufca is a flower child.

Not the kind from 60s mythology, but a lover of both flora and blooms.

Skufca’s grandmother guided her through the woods near her childhood home in Chatham every spring, teaching her about every flower they passed.

"I learned that if you know what you're looking at, you can care for it and it will thrive," Skufca said.

Now, as an environmental educator at the University of Springfield, Skufca became one of only 25 site interpreters in the state.

Skufca introduces about 40 species of flowers on the daily wild-walk that runs through 80-foot bluffs and over winding streams. But she does more than just point out flowers’ names. She weaves together history and mythology of the plants, as well as the science behind them.

"I try to show the kids why these plants are significant and important," Skufca said.

The tour begins at the Woodland Period Indian site, and Skufca told how the Woodland Period Indians used plants in their ceremonies and daily life.

"The woodlands are a place of memory, a place we honor through the use of these plants," Skufca said.

She beckoned the troop of jeans and sneakers to a foot bridge over a natural stone step.

"This is the only place in Illinois where the native white trillium of the Woodland Indians can be found," Skufca said.

"The trillium is a symbol of the Woodland Period Indians, and it’s a reminder of the connection between nature and humanity.

As the tour continued, Skufca pointed out other significant plants and flowers, each with its own story.

"Every plant has a story, every flower has a reason for being here," she said.

The tour ended at the entrance of Giant City State Park, where Skufca said, "This is where it all began."

"This is where the woodlands met the river, and the Indians gathered here to trade and make a living."

The park is one of only 25 sites in Illinois that are recognized as significant by the National Park Service.

"The park is a reminder of the importance of preserving our natural history and heritage," Skufca said.

The tour ended with a group picture of a copperhead snake.

"Zoology students find the most mothers and sisters in these plants," Skufca said.

"But their beauty lies in their vibrations and they sway away."

"They are beautiful, but they are also dangerous."

The tour ended, but Skufca’s passion for preserving the natural world continued.

"I want to share this beauty with everyone, to make sure that future generations can enjoy it too."

As the tour ended, Skufca’s grandmother’s words echoed in her mind:

"Always remember, the world is a book and those who do not travel read only one page."
Girls gone wild

Indie rock trio looks to nab the Battle of the Bands title

KELLY DAVENPORT
DAILY EGYPTIAN

In a musty basement on West College Street, Christmas lights twinkle above hundreds of people who chew gum and talk. Missy Duxbary and Jessica Williams dress in black, but Erin Funk-Dublan and Jessica Noodles can be spotted somewhere drably. "I've never seen Missy without chocolate on my drums," Erin says, holding up a box of Honey Brown sugar in one hand and a bottle of old-fashioned Pepsi in the other.

"I've never seen Missy without chocolate on my drums," Erin says, holding up a box of Honey Brown sugar in one hand and a bottle of old-fashioned Pepsi in the other.

DEATH ROW

CONTINUED FROM PAGE 1

murder of Richard Minich. Three years later, he found guilty of first degree murder in connection with the death of Louis Cuna. He was found in a cell at Menard. Victor obtained a knife and fashioned a garrote, a device used to strangle a person, from pieces of wood and the wire from a boom and strengthened Gonzales in his cell. Victor reported to authorities that Gonzales "apologized the wrong 'blotch' out in the streets."

Vince has been confined in Tombs at the eastern edge of Alexander County and the southern tip of Illinois for three years, nearly six in opening.

"It is that every action has a reaction, so I've earned my horrible conditions," he said. "I've done more good things while in isolation."

But Lisa calls Victor a calm, religious man who received from his violent past, she said.

"Not the Victor I know now, but the Victor was a very, bad man," she said.

Inside the super-maximum security prison, Victor is locked inside a tangible 10 feet by 10 feet cell with a bed, toilet and a stainless-steel mirror. It is served food through a small slot in the wall.

He is allowed four visits a month just a place to incise. - and lack of effectiveness. In a subject highlighted by his thin mustache and compliments her purple shirt. Purple is his favorite color.

Before meeting Lisa, Victor said she thought about death the death penalty, but he supported the death penalty, "I don't think they will ever get rid of the death penalty," Victor says, shaking his head and looking at the shackles on his feet.

"I've seen much suffering here in Illinois," Victor then says, "I've been through much suffering here in Illinois."

There is large entertainment in the Illinois House of Representatives to advancing the death penalty, but it has become part of her reaction, so I've created my horrible conditions," Victor said. "It's my favorite color."

And it will be the last place Victor ever lives.

A year has passed since Gov. George Ryan put a moratorium on the death penalty and appointed a 14-member panel of high profile attorneys, former U.S. Sen. Paul Simon. The panel was assigned to make recommendations to legislators on the justice system, which has proven to be flawed.

Since the death penalty was reinstated in 1977, 12 inmates have been put to death and 13 inmates on death row have been cleared after an investigation report by the Chicago Tribune questioned the legality under which their convictions were convicted.

Nineteen states are considering executions on the death penalty. Illinois is the only state to have officially executed it. Rep. William Delgado, D-Chicago, sponsored legislation in the Illinois House to abolish the death penalty, completely calling for a need to "fix broken machine that killed the death penalty in Illinois."

"I'm for the death penalty, which was introduced Feb. 26, died in the House Rules Committee."

Rep. Mike Bost, R-Murphysboro, said he supports the death penalty, "It's a no brainer," he said. "I support the death penalty."

But Lisa calls Victor a calm, religious man who received from his violent past, she said.

"Not the Victor I know now, but the Victor was a very bad man," she said.

Nathan Steele sits behind the controls of the Cessna 152. Steele is preparing for a practice flight prior to the May 15 competition at the University of North Dakota.

**Flyers prep for competition**

Saluki flight team to undertake 34th consecutive national competition

Matt Brennan  
*Daily Egyptian*

Nathan Steele prepares his Cessna 152 for flight Tuesday afternoon. He checks the wings and other mechanisms on the plane to make sure that the plane is ready for use.

The hum of the propellers and engines was strong as the Flying Salukis practiced accuracy landings in preparation for the National Intercollegiate Flying Association SAFECON competition. The five planes fly in a circle and land on the runway, trying to hit a specific mark each time. The Cessna 152 planes being flown have two seats and weigh about 1,200 pounds — less than some cars.

The group of nine students from SIUC will be driving to the national competition at the University of North Dakota May 12. They will rent planes to use in the competition, but Steele does not see this as a problem.

"We used to the airplanes we have out here, but because of the rules, they will not let us take them," said Steele, a senior in aviation from Plymouth, Indiana, Kentucky, and Tennessee.

In mid-October, they finished first at the regional competition at Purdue University. After practicing every day since spring break, flight Coach Kim Carter has a bright outlook on the event.

"We always have a shot," he said. "We're competing against some real good teams."

Some of the more competitive teams that he named were Western Michigan University, University of North Dakota and Embry-Riddle Aeronautical University.

The Flying Salukis have competed nationally for the past 33 years. In order to go to the national level, the team had to finish in the top three teams in the regional competition. They have finished in the top 10 at nationals for the last seven or eight years, Carter said. About 30 teams will be competing in this year's competition.

Purdue University and Lewis University are the other two teams from the same region as SIUC. The division covers schools in Illinois, Indiana, Kentucky and Tennessee.

There are nine events in the competition, five on the ground and four flying. Some of the flying events involve precision, landing in a specific spot, or flying over a specific spot designated on a map.

Kathy Hargadine is another member of the team who is excited about the competition. She has participated in the program for the past two years. Hargadine loves both the flying and the competition, and is looking forward to her final competition.

"We're competitive people, we like to fly and this involves both," she said.
Raku firing demonstrates artistic ceramic process

EMILY OSTENDORF
DAILY EGYPTIAN

A 1,000-degree trash barrel lined with the material used in the Apollo space suit houses the beginnings of an ancient art form.

Twenty-five spectators who gathered on the south side patio of the Student Center on Thursday afternoon just how Craft Shop workers like Marie Kosuth, a freshman in ceramics from Makanda, could bring glowing art from the smoke and flames.

"It attracts a lot of people because of the fire," Toddley said. "You can actually feel the heat through clothes." Turning up the heat is a part of a pottery firing process called Raku, and it is a part of a class offered by the Craft Shop.

Pottery is placed on a shelf, and an inverted trash barrel is placed over it. A propane tank at the base of the kiln ignites the trash barrel at 2,000 degrees for 30 minutes.

"It's pretty exciting when you get down to the pot," said Ben Loomis, a resident of Anna who enrolled in the course with previous experience in ceramics.

The metallic luster comes from the next part of the process. The ceramics are placed in trash cans filled with sawdust. The heat from the pottery causes the wood shavings to ignite, and the lid is placed to burn up all the oxygen inside.

"The glaze is what it's all about," Kosuth said.

Workers carefully lift the lid for one moment -- a term called flashing -- which results in different coloration and crackle patterns on the pottery. Paul Kenn, a Carbondale resident, was one of those enrolled in the course this semester. He said that the unpredictability of the firing process is what most appeals about the craft.

"You put the pottery in the ashes and you see what happens," Kenn said.

"It attracts a lot of people because of the fire," Toddley said. "You can actually feel the heat through clothes." Turning up the heat is a part of a pottery firing process called Raku, and it is a part of a class offered by the Craft Shop. Raku originated in Japan during the sixth century to produce dishes used in monastic tea parties.

The pottery has a unique metallic glaze, which is the result of an oxidation reduction process. A shelf system is built with brick tiles over a brick base. Fiberglass, an insulation material used in spacecraft, is lined on the bottom. Pottery is placed on the shelf and an inverted trash barrel is placed over it. A propane tank at the base of the kiln ignites the trash barrel at 2,000 degrees for 30 minutes.

"What we are trying to do, with respect to those three issues, is to identify how well we are doing, and if we identify areas that we need to improve," said Renee Joyce, a senior in advertising, Melissa Amend, a ceramics grad student, and Marie Kosuth, a freshman in ceramics, at the University. "We need to checkbook," Brandt said, adding that the force for the study, said they are trying to do, with respect to those three issues, is to identify how well we are doing, and if we identify areas that we need to improve, "we need to checkbook," Brandt said, adding that the force for the study, said changes and enhancements will be an ongoing process after the study is completed.

"They are going to review recommendations and give us feedback on what works and what does not work," she said.

Track and field begins breaking, building

Teams finish individual record-breaking season, begin building for future

JOSEPH D. JOHNSON
Daily Egyptian

Intently beamed through Cameron Wright’s voice as he expertly delivered his drill, while jarring through the high-octane shouts that clock his eyes: “I want to beat all the teams, but especially Illinois State. I don’t want to give anybody any bulletin board information, but we want against Illinois schools all the time and we beat [University of] Illinois every time and we beat [University of] Illinois=--

Reporters took notes on this weekend’s meeting of the Southern Illinois Valley Conference Championships in a couple weeks.

Wright hopes that the Salukis can break into the top three at conference.

The distance meet indoors, 880-meter run indoors, mile indoors, weight throw indoors, hammer throw indoors, and 200-meter run outdoors all saw new school records set this year.

SIU women’s track and field coach Don DeNoon has his own expectations for conference, which will conclude after visiting Butler University for the Woodall Mortgage Twilight Meet.

“Thats the potential for us to score somewhere in the 150 points if everybody comes together and does their individual best,” DeNoon said.

The future is in question for the women’s squad as the more will have a few seniors.

“We graduate a bunch of kids this year,” DeNoon said. “Caryn Fuglister is not an easy person to fill the shoes of, Deaky Car is not an easy person to fill the shoes of and Yulianda Mack, again, not an easy person to fill the shoes of.”

DeNoon has successfully recruited five top athletes for next season and is feeling optimistic.

“We have some good athletes and maybe one or two of those can step up as freshmen and perform the other freshmen we love to have,” DeNoon said.

A plethora of injuries cast a shadow over this season, though.

“I just feel like there’s been a lot of disappointments through this season,” DeNoon said. “We lost a number of people before we even got through the indoor season.”

Wright said the same sentiment.

“We had an extraordinary amount of injuries and I think that’s really been frustrating for me as a first-year coach,” Wright said.

Regardless, if Wright’s intensity is accompanied by a healthier squad next season, SIU could be downhill from there.

Baseball plays final conference series against Bradley University in Peoria

JAVIER SEBRA
DAILY EGYPTIAN

With its last conference series of the season on the front foot, the Saluki softball team hopes it will be heading to Peoria to take on Bradley. Showing West Thursday through Sunday for a pair of doubleheaders at Port Venetian Stadium Saturday and Sunday.

The Salukis, who finish the season on the road, have won the conference series against Bradley and will now try to keep the streak alive against the conference. In order to make the MVC Tournament, the Salukis need to win the first two games.

The Salukis are coming off a hard-fought weekend series against the Missouri Valley Conference teams and will be looking to continue that success. The Salukis have had a successful season so far and are looking to continue that success with the Bradley Series.

The Salukis have a lot to look forward to with the Bradley Series. The Salukis are coming off a hard-fought weekend series against the Missouri Valley Conference teams and will be looking to continue that success.

Newcomer McDaniel and Incumbent Flanagan Elected To City Council

Vying for two four-year terms on the City Council, Carbondale businesswoman Corene McDaniel came out on top in the April 3rd City Council election, followed closely by incumbent Margaret "Maggie" Flanagan. Finishing in third position was Carbondale Park District President Carl R. Flowers. Although he did not succeed in his Council bid, Flowers was re-elected to his position on the Carbondale Park District.

At the April 17 City Council meeting, Councilman Briggs received a plaque and a resolution thanking him for his service to the City and was honored with a reception following the meeting. Flanagan, who is beginning her third term as Councilwoman, and McDaniel, who has served on the Planning Commission since 1999, were administered their Oaths of Office at the May 1st City Council meeting.

Carbondale Police Exam

The Board of Fire and Police Commissioners will conduct an examination for the position of Patrol Officer in the Civic Center, 200 South Illinois Avenue, Carbondale, Illinois at 8:00 a.m. SHARP, Monday, June 4, 2001. A Physical Fitness Assessment will begin at 2:00 p.m. for candidates who pass the written examination.

To be eligible to take the exam, candidates must be a citizen of the United States, possess a valid drivers license, be 20 years of age, have attended 60 semester hours from an accredited college or university and have completed or be in the midst of their law enforcement convictions. Applications must be on file in the City Clerk's Office by 5:00 p.m., Friday, May 18, 2001. Applications are available at the City Clerk's Office, 200 S. Illinois Avenue, or print online from our website, or call (618)530-5304, ext. 281.

We encourage females and minority applicants. The City of Carbondale is an equal opportunity employer.

Youth Appreciation Day

The City of Carbondale's 2001 Youth Appreciation Day will be held on Saturday, May 12, 2001 at the Town Square Pavilion. Nominees will be honored at a 10:00 a.m. ceremony with live entertainment beforehand and after by the Carbondale Community High School Jazz Band, directed by Jennifer Woyles. The program will consist of Honorary City Officials, nominated CCHS students in grades 11 and 12, chosen from a lottery, being sworn in at the end of the ceremony. They will be given an opportunity to see how City government works on June 4, 2001.

Youth Appreciation Day allows young people in grades 7-12 to be honored based on the following criteria: 1) the young person has had a difference in another person's life or in the community; or 2) has achieved tremendous growth or accomplishment in his/her personal life, which ultimately impacts our community as he/she participates in it.

Please support our young people on May 12th. These individuals have made a commitment to giving back to their community; we can give back to them by attending.

PUBLIC WORKS MAINTENANCE SCHEDULE... Page 3 EMPLOYEE SPOTLIGHT... Page 3 ZONING/SUBDIVISION BOUNDARIES... Page 4
"Thoughtfully directed economic growth, increased awareness and development of our vast cultural and natural resources, and a continually enhanced quality of life for citizens of all ages." This is what it was all about back in January when two hundred Carbondale area residents gathered in City Hall for a day of deliberation to brainstorm and prioritize goals for the future of our community.

Since January 27th many of the ideas generated have already taken root, but there is still plenty of room for participation. The three tracks, Cultural Planning, Economic Development and Quality of Life, blended significantly. Presented here are pictures of people on a Saturday afternoon deliberating and creating a vision for Carbondale.

Watch for a full outline of committee priorities in the next issue with more pictures!

Look for the "Hot Button" on the city's web page www.ci.carbondale.il.us that will bring you updates of Millennium Committee activities!

PUBLIC WORKS SETS ANNUAL MAINTENANCE PROGRAM
Street Program for FY 2002 - Summer of 2001

Carbondale’s Maintenance and Environmental Services Division have designated the following streets as those that will be included in its annual street sealing and resurfacing program this fiscal year. Work will begin soon and continue until completed. Residents will normally experience minimal inconvenience while maintenance procedures are being performed on their streets. Any questions should be directed to the office of the Maintenance and Environmental Services Manager at 457-3273.

The Carbondale Fire Department began its annual hydrant flushing program on Monday, April 2, 2001. Hydrants are tested between the hours of 9:00 a.m. to 4:00 p.m., Monday through Friday. Hydrant testing is expected to be completed in approximately eight weeks. Customers may notice a change in water pressure and possible discol­

- What is a CPTED?

By Sgt. Don Priddy
Carbondale Police Department

Every day we visit places where we feel safe and comfortable. Likewise, we sometimes visit places where we feel uncomfortable or possibly even fearful. These impressions are based on our perceptions of the environment - how well we know the area; what we see, hear, and smell; or our personal history, making decisions about our activities and risks based on these impressions.

Criminals react to their surroundings in the same way. They consider how well they know the area and what or who is around. They assess their risks before committing crimes in those areas.

CPTED (Crime Prevention Through Environmental Design) principles reduce the risk of being victimized by increasing a criminal's perception of risk. CPTED is a concept first coined by researcher Charles Ray Jeffrey in 1971. His definition now is accepted nationally: "The proper design and effective use of the built environment can lead to a reduction in the fear and incidence of crime, and an improvement in the quality of life."

CPTED is based on three principles: (1) Access Control; (2) Natural Surveillance, and (3) Territorial Reinforcement. Access Control uses doors, fences, shrubs, gates, etc. to deny access to an area. It creates a perception that there is a risk in selecting that target. Physical access controls, such as locks, alarms, and bars supplement access controls. An example of an access control would be a fence or prickly shrubbery surrounding a playground; it keeps children from wandering out and lets offenders know the area is restricted.

Natural Surveillance uses design features to increase visibility of an area. Proper design and placement of windows, lighting, and landscaping increases visibility to existing individuals or police patrols. This increases the risk to a potential offender, inferring him/her to search for easier targets.

An example of improving surveillance would be trimming hedges and trees to eliminate hiding places.

Territorial Reinforcement uses sidewalks, landscaping, porches, etc. to distinguish between public and private areas. They exhibit "ownership" and send a "hands-off" message to unwelcome persons.

Several members of the City's Police, Planning, Public Works and Neighborhood Services staff are trained in applying CPTED principles. They can review proposal construction or other projects to help incorporate CPTED principles. The Police Department will do security surveys that also address these principles.

For more information about CPTED, contact Sgt. Don Priddy at 457-3200, ext. 435.

The City of Carbondale exercises zoning and subdivision jurisdiction on property within the city limits and extending one and one-half miles from the City. The City's control over the subdivision of land automatically extends out one and one-half miles anytime the City annexes property that expands the extra-territorial limit. Expansion of the zoning boundaries occurs once the City Council adopts an ordinance zoning the property after the formal process of public hearings on the zoning of new area.

The map depicts the current City zoning/subdivision boundaries. The shaded areas on the map indicate areas in which the City has subdivision control only. On the west side of the boundary an agreement with the City of Murphysboro limits zoning control to the east side of County Club Road, north of Chautauqua Road. On the east side of the map the City has recently expanded in the Reed Station Road area and has not yet gone through the process of expanding the zoning boundaries in this area.

Anyone having questions regarding the zoning or subdivision boundaries or how these regulations may affect their property should contact the Planning Services Division at 457-3225.

**Break Out That Bathing Suit and Join Us At Poplar Camp Beach**

The City's swimming beach on Cedar Lake opens Friday, May 25, 2001 and will remain open through Labor Day. The beach is known for its family atmosphere and beautiful scenery. Poplar Camp Beach's sandy waterfront leads to a swim and play area, an area for rafts and floats, and a "lil' lane". Red Cross certified lifeguards are on duty at all times. Cedar Lake personnel and the Carbondale Police patrol the beach area. Restrooms, picnic tables, and a concession stand are also available.

Regular hours are Monday-Friday 9:30 a.m. to 5:30 p.m. on weekends and holidays from 9:30 a.m. to 7:00 p.m. When weather is too cold or rainy for swimming, the beach will be closed. For information about beach closing, call 549-8441 or 549-5302.

The fee for a single admission is $1.50, and children four (4) years of age and younger are admitted free. A pass for 10 admissions is $12.00, and for 25 admissions, $20.00.
