**Hawkeyes Outshoot Salukis 69-58**

The Salukis fell behind Iowa early in the game Monday night and were unable to recover as they suffered their first defeat at home this season. The Hawkeyes, rated as one of the top teams in the Big Ten, took their superior height to the boards and stayed ahead from the start. The Salukis were never far down, however, and were definitely in the game until the closing minutes of the game.

Trailing only 28-25 at the half, the Salukis threatened to overtake Iowa several times early in the final frame. But the Hawkeyes overcame Saluki challenge and stayed on top of the dogged visitors.

With big George Peoples doing the rebounding and Gerry Jones the scoring, Iowa began to pull away in the last 10 minutes of the game and maintained leads of from seven to 12 points. John Jones and brother's George McNeil wound up as the game's high point men with 22 each. The Hawkeyes were the only other Saluki in double figures with 12 points. For Iowa, Chris Pervall had 17 points, Gary Olson 13 and Peoples 10.

The Salukis fell behind shortly after the tipoff when Gerry Jones, the former Carver prep star, dumped in a pair of free throws. Iowa came right back, however, and scored on the break by George McNeil.

But after that, the Hawkeyes were ahead to stay for the rest of the first half. After falling behind 43-39, Southern fought back and pulled to within two points of Hawkeyes, 55-53, with 14 minutes left in the half.

The two teams then traded a pair of 3-pointers, Iowa began to pull away again. Two goals by George Peoples, the Hawkeyes' high-jumping pivot, and another by Jones put the Hawkeyes ahead 20-13. That

"Look, Bouncing to the Oastel!"
"It's a bird." "It's a plane." "No, it's a Super Ball." "Super Ball?"
"Yes, Super Ball. Able to leap Morris Library in a single bound, faster than a speeding Saluki, and more powerful than an IC locomotive."

Well, the Wham-O Manufacturing Co. has come up with another million dollar idea—and it's quickly bouncing across nation's campuses as the find of the year.

In 1957, California-based Wham-O came out with Frisbees—saucer-shaped plastic discs that swished erratically through the air.

Not too long ago, the Wham-O people made some plastic tubing in the shape of circles, and called them Hula Hoops. Consumers used them not only as toys, but as weight reducers and conversation pieces as well.

Unfortunately, Wham-O lost money in 1958 when the Hula Hoop died out. Wham-O got stuck with millions of surplus hoops.

A Super Ball combines the best qualities of Hula Hoops and Frisbees—a circular shape and downright unpredictability.

The Super Ball is between the size of a golf ball and a tennis ball. It is compressed with 5,000 pounds of pressure to give it its zing.

Zectron, the material of which Super Balls are made, is described by Wham-O as "a recently developed exotic compound that gives the ball a high recovery rate, about 90 percent in other words, if you drop it at arm's length, it will almost return to your hand.

The high coefficient of friction in Zectron gives it unusual properties when it is bounced on the floor, and then strikes the wall. The friction will cause the ball to bounce back onto the wall.

For 98 cents you would think you couldn't go wrong in buying a Super Ball, but as Tom Schumens, sophomore from Sterling warns, "My roommate had one of those darn things, and nearly drove me crazy with bouncing it all the time while I wanted to study. But it even when I asked him if he wanted to play base ball with it, and I smashed it to pieces with the bat."

Grant Given SIU
For Math Institute
The National Science Foundation has given a grant of $71,330 to SIU to support a summer institute in mathematics for secondary school teachers.

The institute will be the eighth consecutive held at Southern, and will be directed by Wilbur E. McDaniel, professor of mathematics.

Designed to provide material needed to work with the new curricula and textbooks in secondary mathematics, instructors courses may be counted toward a master's degree from SIU.

NAT'S REEAL KOSHER SALAMI

VARITY TODAY AND WED

C. RAYMOND NOWACKI

Seminario Study Column Buckling
G. Raymond Nowacki, assistant professor of civil School of Technology, will be guest speaker at a seminar at 4 p.m. Wednesday in Room 110 of Building T-26.

Nowacki will speak on "Inelastic Lateral-Torsional Buckling of Beam-Columns."

Coffee will be served at 3:30 p.m. and anyone interested is invited.

Spudnut

Open 24 hours a day—7 days a week
UNIVERSITY SQUARE SHOPPING CENTER
**Activities**

**Meetings, Film Set**

**For Today**

The Women's Recreation Association Fencing Club will meet at 7:30 p.m. today in Room 114 of the Women's Gym.

The WPA Gymnastics Club will meet at 7 p.m. in the Women's Gym.

The Faculty Couples Bridge Club will meet at 7 p.m. in the Family Living Lounge of the Home Economics Building.

A Plant Industries Club meeting will be held at 4 p.m. in Room 308 of the Agriculture Building.

The Newcomers Bridge Club will meet at 7:30 p.m. in the Morris Library Lounge.

A film, "The Flaming Sky," will be presented at 12:10 p.m. in the Morris Library Auditorium.

The Thompson Point Spirit of Christmas (SOC) project, started early in November, fell $1,000 short of its $5,000 goal.

Money raised in the drive has been used to purchase gifts for members of the 1st Brigade of the 101st Airborne Division, formerly of Ft. Campbell, Ky., now stationed in Vietnam.

Five thousand toothbrushes, 5,000 tubes of toothpaste and 10,000 bars of soap have been ordered, according to Mike Peck, president of Thompson Point.

The gifts will be sent to Richards-Gebauer AFB, Mo., where they will be flown directly to Vietnam. The shipment is expected to reach Vietnam by Dec. 12 and be distributed in time for Christmas.

The cost of the gifts was $2,600 and the remainder of the $4,000 collected will be kept in a special account for the 101st Division to draw upon as needed, Peck said.

**Lysistrata Auditions**

**To Be Held Tonight**

Tryouts for the classic Greek comedy, "Lysistrata," will be held for the last time at 7 p.m. today in the Southern Playhouse.

A cast of 17 women and 15 men is needed for the play which will be directed by Claude Mose of the School of Communications.

**Mental Patient Plots Future**

**On 'Boone' Show Tonight**

"Which Are the Nuts? And Which Are the Bolts?" is a story of how a former boxer, discharged from a mental institution, tries to figure out his future. The film will be shown on the Richard Boone Show at 9:30 o'clock tonight over WSHU-TV.

Morality First, Morale Second

Well, we’re in a war. Hardly a newsworthy statement. Yet, it is a war, a war for several years. Why does it hold with such force? Probably because a lot of people, mostly college age, are being told that it is going to happen. Wars are dangerous, but what can become even more dangerous are our attitudes toward war.

This year, a war was held, evil forces, and several types of nary. Today we are engaged in a global struggle to preserve the pillar of democracy.

Last year, a lot of people didn’t know we had boys (if you can call people who shoot and sound like boys in Viet Nam). Today, it is imperative to let them know that we are being told to be far more interested in the care and well-being of the students. There is a no-mercies policy toward traitors or people opposed to the policies of the students. There is a no-mercy policy toward traitors or people opposed to the policies of the students. There is a no-mercy policy toward traitors or people opposed to the policies of the students. There is a no-mercy policy toward traitors or people opposed to the policies of the students.

If You Don’t Fight, You Switch

It is undeniable that there is power in numbers. The IU student bodies are threatened with relocation, to the point of losing the local student government. The only answer is to support the IU student bodies.

The question is: what happened to the student-government government? The only answer is to support the IU student bodies.

Letters to the Editor

Don’t Take WSU-FM Away From Students

The Administration of Southern Illinois University, by its recent events, has shown itself to be far more interested in the administration of the University than it is in the welfare of the students. There is no more of a freelance spirit about the student than it is the Student Smith Hall affair. Something new, however, has occurred.

The SIU Athletic Dept. has decided that the by-passing of its sporting events by the student staff of WSU-FM is not in the best interest of the student. The Administrative Dept. has taken steps, with the approval of the Administration, to establish a commercial radio station which would use a "professional" staff, and which would compete directly with WSU-FM.

WSU-FM is one of the few wholly student-operated stations in the country. A powerful outlet (37.5 kw), WSU-FM not only provides radio service to a large area in Illinois, but also provides invaluable experience for students in all aspects of radio broadcasting. If the Administration continues its present policy of stepping into music broadcasting, if the Administration continues its present policy of stepping into music broadcasting, it will be the beginning of the end for any type of student-operated radio outlet at SIU.

If the SIU Administration continues its present policy of stepping into music broadcasting, it will be the beginning of the end for any type of student-operated radio outlet at SIU.

The Administration is going to allow the Administrative Dept. to step into broadcasting, it won’t be long until the Administrative Dept. steps into music broadcasting, etc.

WSU-FM is a teaching facility for students interested in radio. It is difficult to understand how this facility can continue to operate if a commercial organization is allowed to move in. This could be the beginning of the end for any type of student-operated radio outlet at SIU.

It is important that the Administration continue its present policy of stepping into music broadcasting, etc.

Satirize on a Grand Scale?

Satirical analysts of the present national and international situations seems to aid the public in realizing just what is going on in the world.

We feel that this method of world analysis can be carried on to a great extent at a more sober than it is at present. KA does an excellent job of satirizing local and university affairs, but that’s the only place it is being done.

The "Illustrious and Columbia University" publishes small magazines which feature satirical articles on national affairs, as well as local and school occurrences. These magazines are published about four times a year and are completely controlled by students. There is no censorship. We believe that the students who publish these magazines voice their opinions in such a way that they inject humor, yet still allow the importance of the subject to be recognized.

Because KA does such an excellent job of satirizing local and university affairs, we feel that KA could do an equally fine job on a national scale.

The Editor: do you at the Daily Egyptian think of the idea of publishing a magazine and selling it at a small cost to cover publishing expenses? Ken Kruger

Morality First, Morale Second

Costa Rica Intervenes To Halt U.S. Revolution

By Arthur Hoppe

Herewith is another unpublished chapter in that unpublished textbook, "A History of World Revolution," 1930 to 1959. This chapter is entitled "The Ratt of Phynkia."

The Johnson Doctrine, proclaimed in the 1960s, banned the staging of any unauthorized revolutions in any hemisphere. And by the early 1970s, American troops were engaged in guerrilllas in 43 nations on six continents. It was at this critical point that the trouble broke out in Phynkia, a small oants 420 miles southeast of Khartoum as the capital.

Phynkia (population 37) was governed by a hereditary ruler or "Ratt," who was invariably corrupt, despotic, rad in revolution and anti-American. He thus qualified for American aid and the title of "A Leader of the Free World."

In the spring of 1973, the current Ratt got in a fight with his brother-in-law over whose turn it was to use the Bentley. The Ratt appealed for American troops to preserve his "bastion of democracy" and a CIA agent was dispatched to investigate.

The agent quickly determined that the brother-in-law had neither signed a loyalty oath nor even made a preliminary application to the State Department for permission to return to his homeland. His report said, the populace supported his "Ratt," as evidenced by their daily custom of lining up in front of the palace and chanting, "Ratt, Ratt, Phynkia..."

The President went on network television to announce that "as Phynkia goes, so goes whatever else is around you."

The last troop remaining on American soil was dispatched, and it was a sad scene when his mother bade him farewell. On landing in Phynkia, the last troop, whose name was Corporal Homer T. Pettibone, handed out chewing gum to the kids and called for "Close air support.

For this crucial mission, the Strategic Air Command decided to throw in "every unencumbered aircraft," turned out to be a defauld helicopter with a myopic pilot who, through "a navigational error," found himself a bomb Mao Phynkia itself, thus blowing the Ratt, his brother-in-law and all 35 other Phynkians to smithereens.

The President went on television to announce that American military aid had never given a nation from Phynkia aid and the title of "A Leader of the Free World.

At that moment, unfortunately, 16 Mexican wetbacks crossed the Rio Grande and, finding no opposition, took California, New York, which had been without electricity, newspapers or running water for three years, surrendered to the kids. The President sent four buses on tour from Luxembourg. Washington lay defenseless.

This was quite misfit to discover no one wanted it. The President then dispatched the Vice-President to negotiate with Phynkia. Finally, "as a gesture of friendship," Costa Rica dispatched a regiment of Ma­ rines to "preserve an unau­ thorized revolution."

The Costa Rican colonel arrived on network television to promote the Americanapers that "free elections..." as soon as constitutional warrant."

They never did.
MULTIVARIETY LINKS SMALL UNITS

By Neil Morgan Copley News Service

SANTA CRUZ, Calif.—In the rolling forests savanna this is the site of the old Cowell Ranch, the first settlement of California at Santa Cruz and the location of a trailer community that rose up to utilize outlets like the spokes of a wagon wheel.

Dormitories were not finished in time for the first students, but that has diminished the enthusiasm of the students for lesser internation interest in the Santa Cruz campus.

This is a brave attempt to combine the best features of the big university and the small college. Now with Berkeley and the University of California at Santa Cruz and about 700 or 800 students, it's on the same cost as conventional campuses.

Some think it is a throwback to the Oxford-Cambridge system; that it is at least a century too late. Others see it as the answer to their obvious fears that the student-faculty relationship is steadily dying in the big universities.

The community of Santa Cruz still seems generally unconcerned about what is going on up above the town. When it was known that the University of California would build a new campus there, there was great rejoicing. Santa Cruz is one of those rare California communities which has been oblivious to any sense of alienation by the campus.

This is a Steinetown ranch, and it has seemed generally oblivious to any sense of opposition between the era of its old identity and the new era of its new hilltop university.

Some students from San Francisco are here, and they are not the only students coming to the university. They are not the only students coming to the new campus at Santa Cruz. You enter the campus on the Crane Grade Road among old ranch houses and stone walls that are caring carefully restored and preserved. There are even the remains of a narrow-gauge railroad built in 1560.

From atop the hill, where the major campus buildings will stand, you look on a clear view of the field house which is being finished at the edge of the forest beside the wagon-wheels of trailers.

This will be a bicycle and auto campus. The buildings are far apart by most standards, and Chancellors McHenry bans automobiles from the campus on the grounds that their enormous fumes would damage the precious groves, their coming and going would destroy the sequestered mood of the campus and their availability would disturb the students from campus life.

One of McHenry's plans is that buses will take students on weekends nights into San Francisco for entertainment. Something like it will have to work if McHenry's car ban is to hold, for there is little chance that the Rockies will be a convenient distance away. The nearest point of the Rockies for a campus on which student automobiles are not allowed. So far, there has been a minimum of grumbling.

Chancellor Clark Kerr of the University of California has said that Santa Cruz, Irvine and San Diego—the three new campuses—will be more different from any three other universities anywhere in the United States. He regards Santa Cruz as a "terribly important experiment."

"I've never been persuaded that an institution is insensitive that it must be impersonal," McHenry told me. "We can combine size with humanity and with diversity."

"The tutorial system will apply here to about 10 percent of the student's time—meaning that he will meet in groups from one to five students. We will emphasize seminar-sized groups, from six to 12 students. The typical undergraduate, over a four-year period, will have an equivalent of three quizzers in small groups of this size."

"Because the student-faculty ratio must stay the same for Storer and small groups, the fundamental principle of the university system, Santa Cruz will achieve these intimate classroom relationships at the cost of making medium-sized classes large."

"There should be a lot of learning over the lunch table," McHenry told me. "The provost will live physically with the students of his college, and eat with them. This will be a federal-demonstration project sprawling through the forest."

McHenry thinks he can avoid a repetition of the Berkeley rebellion which has gripped the Berkeley campus. He thinks the spell of the forest and the lack of crowding will work for him on his campus, but he is also expecting to exercise some hard common sense.

"If a student wants to involve himself with the migrant worker problem, for instance," McHenry said, "I will encourage it. I will tell him he is free to go over here in the Salinas Valley and pick strawberries. That will do him more good and the farmer more good than any college can do."

It will be years before the world knows if such dreams will work, but around Santa Cruz, the air is charged with the excitement of the experiment.
Student Body Vice President's Letter Gives Recognition for Record-Setting Vote Turnout

John Paul Davis, vice president of the Carbondale student body and acting chairman of the University Student Council, wrote this open letter to students on Dec. 3:

"Hello Students,

Yesterday's election and plebiscite surely deserve a word of recognition from the office which is forever urging wider student involvement and participation in the workings of the University's student government. I am pleased to offer that recognition.

The fact that 3,385 students exercised their right within the student community to choose those who would represent them, and to voice their individual opinions as concerns the athletic NCAA scholarship question, is indeed another mark of growth for the student body of the University. I would like to think of it, as well, as being another mark of growth for student government.

A hard and honest effort has been going forth as unusually large number of students and groups, usually, to an exceptional degree of activity—within the student government process at Carbondale Campus. Executives, senators, commissioners—I personally have seen well over 30 student leaders working diligently and rationally, since September, to represent the 17,000-plus students on the campus in many areas of student concern and student interest. In short, a considerable effort by many more than "a few" individuals is daily being recorded this year within the student government sphere of activity.

All the effort is toward one mutual end: to effectively and accurately represent the view of the total student community. Your participation in the voting of Dec. 2 in record-setting by more than 800 votes. Personally, I would like to construe it as a living indication of the feeling by an increasing number of SIU-Carbondale students that their student government can, in fact, represent their needs and their desires and their opinions.

It was certainly encouraging to those who song the goal of student government representatives to new heights on Dec. 2. And all good wishes for health, safety, and cheerful spirits in the holidays ahead of us.

Sincerely,
John Paul Davis, Vice President of the Student Body and acting Chairman of the University Student Council.

Educational Reasons

Girls Declare Goals: Bachelor's, Not MRS.

By Jo Ann Fischel

Apparently not as many SIU coeds are in college to get their "MRS." degree as one might think. Not one of the girls questioned in a recent survey gave marriage as her primary reason for coming to college.

Most of the girls said they came because they wanted a degree. The majority said they would work two to three years after graduation before marrying.

Typical of the reactions of the girls was this comment by Eva M. Poola, a freshman majoring in home economics: "I came to college because I wasn't ready to stop learning, I want a career and better than average College can give them to me." ..."I'm ready to stop learning, I want a career and better than average College can give them to me."

Nina K. Stebbings, a freshman majoring in government, has agreed. "I came for two reasons. One, I feel I have an obligation to myself to do all I can for my betterment and to help others. Two, with a degree I can increase my earning ability."

A different twist to the question of coming to college to get a husband was given by Constance E. Lowe, a sophomore majoring in nursing: "I came to college because I wanted to meet many kinds of people, not to become a husband," she explained. "It takes a long time to be a nurse, and not planning on getting married—that would waste my education."

By the way, a sophomore, Sharon A. Brenton, a junior majoring in psychology, came to college because she didn't want a man. "I didn't feel I was ready for college, I didn't feel I could spend the time learning and doing a vocation.

The practical aspect of college was foremost in many minds. Said Sally Bartle, a sophomore majoring in philosophy, "I came to college to learn, but on the practical side, today I want to do anything at all without a college education."

Peggy A. McKenzie, a sophomore majoring in business education, was of the same opinion. "I think I need to have a degree. If you ever have to support yourself, it's a good thing to have. Also, it increases your earning ability."

Melinda L. Engram, a sophomore majoring in interior design, said this opinion, and said, "A good second reason I imagine is that college is a good place to teach someone to marry." (Incidentally, Miss Engram was the only girl questioned to mention this possibility at all.)

Girls also came to learn as much as they could about a field of special interest. Marah L. Parcell, a sophomore majoring in foreign languages, explained, a college is important to me because I must have a degree in order to work in foreign relations. Also, I want to learn how to speak more than one language.

Another possible reason for coming to college was suggested by Carline M. Uberta, a sophomore majoring in occupational therapy. "I think most people come for the experience, so they say they have been to college, I can't find an education which will give me a better look into the future, but I learn mostly for the experience."

Gordon Asked To Serve on Testing Project

Roderick D. Gordon, professor of music, has been asked to serve as chairman of the Educational Testing Service at Princeton, N.J., on a project to study methods of assessing an individual's musical capabilities and knowledge.

The project, sponsored by the Carnegie Corporation, is a phase of a national assessment to obtain data on the strengths and weaknesses of the American educational system.

"Such information will then be available to determine the allocation of public and private funds, to provide data necessary for research on educational problems and processes not available, and to make possible international comparisons," Gordon said.

Gordon, well known for his work in the field of measurement, has served for 12 years on the editorial board of the Journal of Research in Music Education and for six years as a member and chairman of the national research council of the Music Educators National Conference.

He taught music and research techniques in the graduate schools of the University of Michigan, Boston University, University of Illinois and North Texas State University and will teach this course on the Carbondale campus during the winter quarter.

Recital to Be Given By Music Senior

Leo Ruebsch of Percy, a senior majoring in music, will present his last recital at 8 p.m., Dec. 9 in Shryock Auditorium.

Ruebsch, seeking the bachelor of music education degree, will play the trumpet. Accompanied by Karen Tuxhorn of Springfield he will perform Joseph Haydn's Concerto for Trumpet and "Morceau De Concert" by A. Savard.

Ruebsch will be assisted by the University Brass Quintet, which will play two numbers. Henry Purcell's "Music for Queen Mary II" and the anonymous "Die Bankelangerlieder."

Members of the quintet are Ken Wille, of Granite City, and Robert Smider, of Carbondale, trumpets; Pamela Kennedy, of Chester, French horn; Charles Danner, of Urbana, trombone; and William R. Hayes Jr., of Springfield, tuba.

British Information Officer To Speak on Foreign Policy

Michael K. Newton, British information officer for a large area of the Midwest, will speak at 7:30 p.m., Thursday in the Studio Theatre of the University School.

His subject will be "Current British Foreign Policy," with special attention given to the present crisis in Rhodesia. This meeting is sponsored by SIU's international Relations Club.

Newton is a regional information officer, based in the British consular in Kansas City, Mo. He is responsible for covering nine states.

Before coming to this post in 1957, he had a teaching and journalistic background. Earlier he served two years in the British Army in the Mediterranean area, and was graduated from Cambridge University.

Newton has traveled and spoken in almost every state of the Union, delivered over 2,200 speeches, and made hundreds of radio and television appearances. He has also written articles for a wide variety of newspapers and magazines.

He also plans to be on campus Friday.

Meet the Faculty

Member of Technology Staff Is Former Space Scientist

A former National Aeronautics and Space Administration scientist, William G. Orthwein, has been named an associate professor of technology at SIU.

He was formerly a research scientist with NASA at Ames Laboratory in California and director of the Computer Center for the University of Oklahoma.

He attended Massachusetts Institute of Technology where he earned a bachelor of science degree in 1948. He then went to the University of Michigan where he earned a master of science degree in 1950 and his doctorate in 1959.

He has also served with the U.S. Army.

Orthwein is a member of Sigma Xi, American Legion, National Rifle Association, the American Society of Mechanical Engineers and the American Society for Engineering Education.

He has published numerous books and articles, dealing mostly with radar and radio.

The 41-year-old professor and his wife, the former Helen V. Polshoester, are from Toledo, Ohio. They have three children.

Christmas is a time for giving, and gifts from Z/C can be presented with pride. For Christmas, as throughout the year, Zwick and Goldsmith has been dedicated to serving the gentleman with fashion in a courteous manner. Shopping early at Zwick and Goldsmith gives you an opportunity to leisurely enjoy your Holiday season.

From our GIFT BAR

• Colleagues in fine names like Canon, English Linn, Jade East, and Royall Lyme
• Survival Kits for the playboys and misses on your list
• Dresser valets
• Assorted leather gifts
• Fine Shirts for the Gentleman
• Styles by Pendleton & Grant
• Manhattan Mens
• A Zwick and Goldsmith Gift Certificate

Beautiful Silk Neckwear
• All silk rep stripeds
• Short and medium lengths
• Beautiful ties by McGregor and Puritan

Rugged Outerwear
• Leather jackets by Ben Naples
• Medium lengths
• Hooded and unhooded styles
• Perfect for the season's smartest colors
• Fashioned in leathers, woods and corduroys
U.S. Troops Pursue Viet Cong To Avenge Loss at Plantation

SAIGON, South Viet Nam (AP)—A 1st Division infantrymen picked up their dead Monday and fanned out into the jungles 40 miles northwest of Saigon in search of a Communist force that engaged them in a weekend assault described as intense as the fighting at Ia Drang Valley three weeks ago.

The 1st Division infantrymen hacked through the jungles on the fringes of the Michelin rubber plantation seeking revenge for buddies who fell Sunday under blinding 50-caliber machine-gun fire and wave after wave of Communists springing out of the trees.

U.S. officials said the American forces whitewashed the attack well and killed up to 200 enemy troops while suffering moderate overall casualties in their battalion ranks. The officials said, however, the casualty rate in some battalion units was heavy.

Communist fire from the heavy machine guns, generally used against armored vehicles, came at the American troops six inches above the ground. Then, as the infantrymen dived into the jungles lining the road, crude grenades strapped on the trees began exploding. The Viet Cong had attached wires to the grenades and pulled them when the Americans dove for cover. Because they were crudely made, only about a third of the grenades exploded.

Stewart Reports Mission Failure

LONDON (AP)—Foreign Secretary Michael Stewart reported Monday complete lack of progress with the Soviet Union in organizing joint moves to end the war in Viet Nam.

Reporting on his recent conferences in Moscow, Stewart said the House of Commons be attempted to persuade Soviet Foreign Minister Andrei Gromyko to join with him in reconvening the Geneva conference for Viet Nam peace talks.

"I am sorry to say that the Soviet government are still not prepared to do that," Stewart said. "They take the view that this is entirely a matter for the government of North Viet Nam to decide," Stewart said.

Each Keepsake setting is a masterpiece of design, reflecting the full brilliance and beauty of the center diamond...a perfect gem of flawless clarity, fine color and meticulous modern cut. The name, Keepsake, in the ring and on the tag is your assurance of fine quality. Your very personal Keepsake is now at your Keepsake Jewelers' store. Find him in the yellow pages under "Jewelry."
U.S. Interest Hike Hits World Centers

NEW YORK (AP)—The Federal Reserve Board's boost in the basic price of money rippled across the economies of the nation and the world Monday in a widening circle of cost-price reactions.

Sunday night the Reserve Board raised the discount interest rate for loans generally was paid for deposits. The prime rate for loans generally was raised to 5 1/2 per cent from 4 per cent. It also boosted the ceiling to 5 1/2 per cent on interest banks may pay to attract deposits of 30 days or more.

The increase in interest rates had these immediate domestic reactions:

-Prices of stocks and bond plummeted.
-
-Banks increased the interest rates they charge, though there was no quick indication they intended to raise the level of rates they pay for deposits. The prime rate for loans generally was raised to 5 1/2 per cent from 4 per cent.
-
-Long-simmering economic concern the economy broke into the open.

President Is Unhappy

WASHINGTON (AP)—The Supreme Court called anew Monday for a stopgap timetable of school desegregation, warning again that delays "are no longer tolerable.

With its ruling the court cemented the immediate transfer of Negro high school students who challenged the Fort Smith, Ark., grade-a-year plan as unduly slow.

Reversing lower federal courts which found the plan legally sound, the court said the Negro students "are entitled to immediate relief."

The court acted summarily on the students' appeal, filed only two months ago, and ruled in their favor without holding a hearing.

The Arkansas plan, adopted in 1957, called for desegregating the Fort Smith public schools one grade at a time.

Sikkim Claims Chinese Move

NEW DELHI, India (AP)—The maharaja of Sikkim claimed Monday the Chinese Communists have moved up troops all along the Sikkim border, the United News of India reported.

A dispatch said the ruler, Paldon Thondup Namgyal, told a news conference one Communist Chinese battalion has stationed in the area.

Graduate Teaches in Nigeria

As Baptist Layman-Missionary

Ellie Harper, of Alton, an SIU graduate, is working in Nigeria as one of 48 young men and women who are in 27 countries as the first missionary journeys of the Southern Baptist Foreign Mission Board.

Holding both bachelor's and master's degrees in education from SIU, Miss Harper went to Nigeria in August after completing an eight-weeks training course at the First Baptist Church, Richmond, VA. She is teaching at the Newton Memorial School in Oshogbo, a city with 129,000 population.

The school is for fifth to tenth graders. Working 10-12 hours a day, seven days a week, Miss Harper's assignments in the school range from teaching sixth and seventh grade geography and reading, to Saturday night activities and Sunday school. She also teaches piano.

In her travels in the country, Miss Harper has visited several elementary schools, high schools and colleges.

SIU's Role in Area

Communities Develop Under Joint Action

By Bill Marchese
First of Two Articles

Gov. Otto Kerner pro-claimed last Oct. 30 a Southern Illinois Day. The fact that it fell on the same day as SIU's Homecoming was coincidental. Kerner felt that SIU and the surrounding communities have much in common, over and above the University's strong identification with the area.

F. DDaily W. Morris, who came to SIU in 1948, the campus seemed to have a unique place in the community. The school stood ready to render services to the area. For the business man, there is the Small Business Institute. Or if a town is trying to establish a library, there are SIU specialists ready to help.

President Morris believes SIU, the University has an obligation to meet with the community. In Missouri, as stated in "The Ordeal of Southern Illinois University" by George Kimball Plechman, Morris felt that:

"We have a dual relation to the community: the University serves to extend the community consciousness, to provide cultural benefits, to harbor all that is worth-while from the arts, from the sciences, from literature, and art, and science; and on the other hand, the area in return contributes to the culture of Southern Illinois. It is a mutual relation and for that reason this University is almost unique."

SIU's commitment to the region is apparent in many ways, for example the Community Development Service. Now in its 12th year, Community Development has assisted more than 50 communities with programs and projects that have cooperated in projects of a special nature in about 40 other areas.

Specialists and consultants are making visits to communities in the area. Two of these visits were made at Grand Tower, Smithton, Carlinville, Lebanon, Salem, the Saline-Gallatin area and to a five-county pilot project in the Mattoon area. But one visit was made to Oshogbo, a city with 129,000 population.

In her travels in the country, Miss Harper has visited several elementary schools, high schools and colleges.

Record in NDEA Fellowships

Allocated to Graduate School

A record 24 graduate fellowship applications under Title IV of the National Defense Education Act have been allocated to SIU, William Simmons Department of the Graduate School, said. Simmons, who said the purpose of these fellowships is to encourage training of students to become college teachers, explained that they are awarded persons just entering the graduate program.

The fellowships, for three years of study, start with the academic year beginning in September, 1966. Stipends begin at $2,000 for the first year and increase to $2,400 the third year. There also are dependency allowances.

The NDEA fellowships, Simonsen said, were awarded SIU, on the basis of submissions made to the U.S. Office of Education by SIU departments with doctoral programs.

The federal office announces allocations after reviewing the submissions.

Recommendations for fellowship recipients are made by departments to Dean Simmons. Recipients will be announced at a later date. We are pleased with the recognition the office of education has given the growing program of our graduate program at Southern," Dean Simonsen said. "By awarding this largest allotment ever of NDEA fellowships, they give us the opportunity to further strengthen our program."

Hoshiko Awarded $14,484 Grant

Michael S. Hoshiko, SIU speech correctionist, has been awarded a $14,484 grant for 12 months of research and study at Johns Hopkins University School of Medicine.

Hoshiko, associate professor of speech correction, will engage in research in biomedical engineering. He said he also will investigate post-doctoral education with the view that such a program might be initiated in speech correction here in the future.

His work will be done in the institution's Post-Doctoral Research Center at Bethesda, Md., under a grant from the National Institute of Neurological Diseases and Blindness.

During the past few years Hoshiko has engaged in research under a grant from the American Cancer Society, on ways to improve the speech of persons whose larynx have been removed.

Hoshiko said he hopes to be able to leave after the spring quarter.

Hoshiko, who holds a Ph.D. from Purdue University, came to SIU in 1965.

ON-CAMPUS JOB INTERVIEWS

Appointments for job interviews should be made as soon as possible at the Placement Service in Anthony Hall.

Dec. 9
SOCONY-MOBIL OIL CO., Niles, Ill.: Seeking marketing, management, business administration and chemistry majors for positions in production and management.

BEST FOODS, DIVISION OF CORN PRODUCTS, St. Louis: Seeking seniors for sales management trainee positions in Carbondale and Quincy, Ill., and St. Louis.

ARMOUR AGRICULTURE CHEMICAL CO., Crystal City, Mo.: Seeking chemistry, engineering and technology majors for production-trainee positions in Florida, Alabama and Missouri.

UNIVERSITY OF CHICAGO GRADUATE SCHOOL OF BUSINESS: Interested in talking with students in the School of Business who wish to pursue graduate work at the University of Chicago.

DWIGHT D. EISENHOWER HIGH SCHOOL, Blue Island Ill.: Seeking teachers for vacancies in home economics, chemistry, general science and physics, and comprehensive social studies.

SAGINAW COMMUNITY TOWNSHIP SCHOOLS, Saginaw Mich.: Seeking teachers for all elementary grades and all secondary subject areas.

Dec. 10
DOLTON, ILL., PUBLIC SCHOOLS, COOK COUNTY: Seeking teachers for kindergarten, primary, intermediate and all subject areas in junior high.

OLIN MATHISON CHEMICAL CORP., East Alton, Ill.: Seeking seniors in all areas of business for positions in accounting, business and personnel.

Dec. 13
PAN AMERICAN WORLD AIRWAYS, INC., GUIDED MISSILE DIVISION, Cocoa Beach, Fla.: Seeking electrical engineers for design of range instrumentation systems.

E. I. du PONT DE NEMOURS AND CO., Wilmington, Del.: Seeking PhD candidates in chemistry, physics, mathematics and engineering for positions in research and development.

CLEVELAND, OHIO, CITY SCHOOLS: Seeking teachers for vacancies in all elementary grades, all secondary subject areas and all fields of special education.

INTERNATIONAL VOLUNTARY SERVICES, Washington D.C.: Seeking candidates with B.A. or B.S. degrees in education, liberal arts, agriculture, engineering, public health, and home economics for positions in education and rural development projects. There will be a film showing in Macelroy auditorium at 10 a.m. and again at 2 p.m. on the IVS activity overseas.

Growing Up on the Game

Basketball-Mad Downstate Area
Produced SIU Guard Bill Lacy

By Pam Gleaton

"It's the only game I ever played since I was big enough to remember." In one sentence Bill Lacy, a 6-foot-1 guard on SIU basketball team, spelled out the devotion it takes to become a college basketball player.

Lacy, who is from Pocahontas, right in the heart of basketball-mad Southern Illinois, participated in track, football, baseball and cross-country in high school, but gave up football after his sophomore year to concentrate on basketball.

Lacy's hometown is only 20 miles northwest of Carbondale. This, plus his being the only son in a family of three, insure his parents' presence at every home basketball game.

Home support this strong is typical of the area, and Lacy, or "Lacy" as his friends call him, seems to grasp his good fortune.

The hard work and local support paid off for him in the form of a basketball scholarship at St. Louis University.

"I had offers from the University of Michigan and North Carolina State, but I chose St. Louis because they played a good schedule and the school was close to home," Lacy said.

Lacy transferred to SIU in 1965, after playing for St. Louis for two years. He became eligible to play here last year.

Besides his interest in basketball, Lacy likes outdoor sports such as hunting and fishing. "I like them enough to have considered forestry as a major at one time," he said.

Lacy, now a physical education major who plans to coach after graduating this year from SIU, feels that high school coaches have a lot to do with whether players are able to make the grade.

"Most of them have their boys play too slow a game," he said. "When they come to college they can't take the faster pace of the college game.

The pressures are different too, according to Lacy. "In high school, you can't take the slower pick your shot brand, there seems to be little question that the high schoolers coaches will have the speed, the moves and the will to be successful college athletes.

Coach Pleased

10 SIU Gymnasts Qualify

As Finalists in Chicago Meet

The chief threat to Southern's string of 37 consecutive dual meet gymnastics victories will come from Iowa State.

This was Coach Bill Meade's opinion after the Midwest Open Gymnastics Championships in Chicago Saturday night.

No team scores were kept but Southern had 10 men qualify for the finals, while Iowa State had nine. Both teams will meet January 15 in Ames, Ia.

"I was very pleased with the overall work of the team and particularly the four sophomores, Paul Mayer, Ron Hardin, Dale Hart and Fred Dennis, and juniors Frank Schmitz, Mike Boegler and Rick Tucker, who qualified in one or two events," said Meade.

Two Salukis placed among the top eight in free exercise, trampoline, high bar, parallel bars, and one placed in side horse and rings.

The only event in which the Salukis didn't place was long horse, an event which was supposed to be a strong point this season.

Meade, however, had an ex-

I'M Student Board

Will Meet Thursday

There will be a meeting of the Intramural Student Board at 6:30 p.m. Thursday in the Arena.
Magnificent Five Break Tie
To Capture IM Bowling Title

The Magnificent Five won the team Championship and the
quarter intramural bowling league by beating the Wood-
nockers. When Goin was a special roll off at University Center
bar.

They won two games of a
three-game match.

The champions rallied after
absorbing a 1015 to 937 loss
in the opener and scored a
second flight 1024 to 868.

They won the third and de-
cisive encounter 991 to 947
with a 67-pin margin.

John Rousseau set the in-
dividing scoring pace in the
final with a high 652 tally
for the Magnificent Five.

Members of the winning
and their bowling aver-
games are Bob Williams,
Ken Snider, 169; Bill Dell,
154; Jack Capace, 158; and
Roussou, 293.

The Magnificent Five and
Woodockers quality for the
special roll off by
ripping a field of 34 teams.

So at 1 a.m., Saturday, Goin
was finally reunited with his
companions in Cedar Falls,
leading scorer in the victory
over State College of Iowa.

The situation started
Friday when Goin was left
be cause it was thought then that
he had fractured his right
hand during the Northeast
Missouri game Thursday.

When X-rays of the hand
were read, however, doctors
found that the injury was just
a sprain.

SIU’s First Stop in Iowa
Proves 68-43 Success

State College of Iowa bas-
ketball Coach Norm Stewart
may have been especially
overtim e this week on shoot-
 ing up a good team. Stewart
lost the game to the Salukis
68-43 Saturday night, and
thus failed to score any points
or fouls for the second year
in a row that Southern had
won.

Last year the Panthers lost
67-45.

Saturday night’s total was
the fewest scored by one of
Stewart’s teams since he took
over at State College five
years ago.

The frustrated Panthers
were held to only 13 points
in the entire second half by
Southern’s highly-touted de-
defense. The Salukis held a 38-30 lead at the half, but the
final 20 minutes saw the Sa-
lukes score away from the
Panthers and score the final 11 points of the game.

Southern was on the short
end of the score only briefly
and that was at the very start.
The Panthers jumped out to
a quick 4-0 lead on goals by
Jim Vederich and Craig
Knepe.

The teams by George Mc-
Neil and jump shot by
“Randy” Goin, how-
ever, put the Salukis at-
head to stay short of after
that.

Southern maintained a sub-
stantial lead over the Panthers
throughout most of the first half. The havoc
low Southern’s margin to 25-21 toward the close of the

SIU Cagers Suffer 1st Defeat
Of Season at Hands of Iowa

(Continued from Page 1)

was their biggest margin of the
half as the Salukis came
back in the final eight minutes
to cut Iowa's lead to 23-25.

McNeil, who was
high man for the Salukis Satur­
day in their victory over State
College of Iowa, placed Salu­
ki's scoring in the first half
with 11 points. He was followed
by Dave Lee, Ralph Johnson
and Boyd O'Neal with four
apiece. Randy Coin had two
points in the first frame.

Jones was high man for the
Hawkeyes with 10 points.

The Hawkeyes were able
to control the boards in the
first half, but Southern's alert
defense kept the Salukis in
the game. Southern stole the
ball four times and scored on
all but one occasion after a
theft.

McNeil dropped in a layup
at the start of the second half
to cut Iowa's lead to a slim
one-point. The Hawkeyes
followed up, however, with a
pair of goals to move ahead
by five.

But Southern bounced back
again on goals by Ralph
Johnson and Lee to cut the
margin to 32-31. The Salukis
then had two chances to move
ahead, but the heavily favored
Hawkeyes came back again and
moved ahead 35-31.

Lett then posted a 20-footer
to make it 35-35, but that
was as close as Southern came
the rest of the way. After
After that Iowa kept its lead
on short spurs with the last
troming in the final minute
of play.

Southern had the ball with
less than 20 seconds
remaining and trailed only
35-35 before the Hawkeyes put
together a rebound and a steal
for four points in the final
10 seconds.

The victory was the third
straight for Iowa, which
already held a 111-50-decision
over Pepperdine College and
an 80-75 win over little giant
Evanseville Saturday night.

The loss for Southern was
its first to go with two
victories. It also marked the
Salukis' fifth straight
unsuccessful attempt in as
many tries to knock off a Big
Ten team. Southern has lost
once in the past to Illinois
and Michigan State and twice
to Indiana.

The next game for the
Salukis will be Friday night
when they return home to play
the University of Chattanooga.
