Forest Service funding may be greener in 1992

By Brandi Tipps
Staff Writer

The Forest Service could see a surge in its budget, as well as in the forests in fiscal year 1992. Under the budget proposed by President George Bush, the U.S. Forest Service would gain $265 million over the next three years, $88 million in 1992.

The budget has three main focal points for which the money is to be used, said Tom Hagerty, public affairs officer for the U.S. Forest Service.

The points include maintenance and construction of recreational facilities, environmental education and forest area management.

Hagerty said special area management plans refer to the Shawnee National Forest’s seven new wilderness areas.

“This project would help us get rid of a backlog of forest trail construction,” Hagerty said.

He said the money will help the Forest Service meet the goals of the Resource Protection Act.

The proposed budget for public involvement every 10 years to determine how the use of the forest has changed.

The last public involvement was in 1990, Hagerty said. About $123 million would be allocated for land acquisition.

In addition, the Bush administration said it wanted $140 million to be used for funding tree-planting programs. About $30 million would be spent to encourage tree-planting in urban areas.

Hagerty said it will be difficult to say how the money will benefit the Shawnee National Forest until the dollar amounts are discussed in Congress.

Bill Cronin, member of Regional Environmentalists, said the proposed budget is an encouraging start, but it is just a start.

“That’s not very much money,” Cronin said.

PROPOSED FOREST BUDGET

in millions of dollars

123 Land acquisition
333 Recreational programs
140 Tree planting programs
30 Urban areas

Plans for greening

According to the Environmentalists, the proposed budget is an encouraging start, but it is just a start.

Birds eye view of the proposed budget

The budget for the Forest Service includes a proposed budget for public involvement every 10 years to determine how the use of the forest has changed.

The last public involvement was in 1990, Hagerty said. About $123 million would be allocated for land acquisition.

In addition, the Bush administration said it wanted $140 million to be used for funding tree-planting programs. About $30 million would be spent to encourage tree-planting in urban areas.

Hagerty said it will be difficult to say how the money will benefit the Shawnee National Forest until the dollar amounts are discussed in Congress.

BAS program gets tenure from Pettit

By Natalie Boehme
Staff Writer

SIUC’s Black American Studies Program is on its way to becoming a tenure-granting unit after recent approval by SIU Chancellor Lawrence K. Peteit.

Benjamin A. Shephard, vice president for financial affairs, said the benefits of being a tenure-granting unit is that faculty get to determine positions and promotions within their program.

The three BAS faculty members, Christine Brinkley-Carter, Julius E. Thompson and Mary E. Young, receive tenure through other departments whose criteria for tenure does not emphasize the BAS program.

The attention and energy of BAS faculty are divided trying to meet the criteria for another department’s tenure, said John Jackson, College of Liberal Arts dean.

The BAS program is a part of the College of Liberal Arts.

Jerry Lacey, associate dean for student services and acting director of BAS, said BAS will be able to offer classes if the program becomes a tenure-granting unit.

Administration pursues trustee criteria

Welch pushes to define position

By Amy Cooper
Staff Writer

Student government leaders and administrators will meet Tuesday to discuss creating SIUC student trustee criteria.

Although criteria exist for election of trustees, no rules exist after the student is elected.

At the request of Student Trustee William L. Hall, Vice President for Student Affairs Harvey Welch called a meeting for Feb. 12 to discuss trustee criteria.

Currently, trustee election eligibility criteria state that a candidate must be at least a half-time student in good academic standing with the University.

The candidate must have completed one full semester as a student prior to the semester of the election, and must not hold any elected office in the Undergraduate Student Government or the Graduate and Professional Student Council.

USG President Lisa Kuehne said the criteria only govern the election eligibility — not the time after the trustee is elected.

“It says (the trustee candidate) has to be a student to run but after he or she is elected, (the trustee) doesn’t have to stay in school,” Kuehne said.

Kuehne said the group will attempt to draw up criteria, but no particular qualifications have been decided.

“A trustee should be a student, that’s my main concern,” she said.

Paratore, associate vice president for student affairs, said no written guidelines state the trustee can’t be an University administrator who only is taking a few classes on the side.

“There is nothing in writing and we feel something should be there,” Paratore said.

Welch said SIUC has tried to convince the student governments to increase restrictions on trustee criteria since Hall was elected in 1989.

Paratore and Kuehne said the push for student trustee criteria is not related to Hall’s performance.

“It’s not against Bill Hall,” Kuehne said.

Welch said he has worked with Paratore to get USG and GPSC to establish trustee criteria, and it has nothing to do with the performance of Hall.

Paratore asked the student governments to draft trustee qualifications in various memory journals in the past year.

Kuehne said a need exists to draft qualifications, but it has never been a priority for USG.

Welch has suggested that USG and GPSC committees could not establish criteria, that he could advise them on doing so.

“My intention is to give to the students criteria for service if they don’t give it to me,” Welch said.

Hall said he did not believe the board of trustees would get involved in the issue.

“The Illinois General Assembly delegates the ability to determine eligibility qualifications to the students,” Hall said.

Welch said he thinks the student governments will determine criteria for themselves and he has not made any plans to take it to the Board of Trustees.

Gus Bode

Gus Bode says that criteria is being proposed without any opposing restrictions.
Salukis fall to 5-5 in conference race

By Eric Bugger
Staff Writer

The bad weather that kept the Salukis from leaving Carbondale on time Wednesday might have been a factor in why they were turned away with a loss. SIUC Salukis fall against LO Springfield, 79-70, on Feb. 4, 1987, a year after the loss all but eliminated them from the NCAA Tournament. They have made no more overtures since.

"There was a national athlete, and even though she was one of the best volleyball players... people said, "Flo Who?"" said Locke. "If that had been a football player certainly everyone would have known who he was."

But all that is changing. On Feb. 6, 1987, a year after Hyman's death, a day to celebrate the accomplishments of girls and women in sports was designed.

Many women in sports are doing their part to make people aware of the significance of the day.

Former SIUC All-American volleyball player Cyndle Oberle will tell high-schoolers the benefits of being in sports for the National Girls and Women in Sports Day today.

"I encourage it because it adds a lot of structure to your day and it also allows you to do something you are really good at and able to do," said Locke. "I've been to Hawaii twice and developed friendships. As you travel and as you play you meet people, and it's an ongoing process."

Locke, a former assistant volleyball coach at SIU, is the women's volleyball coach at Kaukaunea Community College. She will speak today at Fort Bradley-Bourbonnais High School in Bradley.

SIUC athletic research graduate Theresa Stratta will be attending a conference discussing topics of importance to women in sports at Slippery Rock University in Pennsylvania today through Friday. Topics include black women athletes, gender relations and coaching girls and women in sports.

"Most history is from a white middle-class male perspective," she said. "We have major voids in our knowledge base."

More research concerning women and blacks needs to be done Stratta said. Volleyball coach Pat Hagemeyer age-who, but adds that women's positions in sports have come a long way. When she was in high school there were no scholarships for female athletes, but she has seen them progress to where it is today.

"I think there's just so much more opportunity to have college," Stratta said. Volleyball coach Judy Auld said she would also see more support for the event.

"It think it's good," she said. "I think it's important that more people would see it; anything to help encourage women in sports in any means, I'd like to see even more."

"I think it's a good learning experience. Sports is good for early in the contest. He picked up his fourth foul with 11:57 on the clock and then picked up No. 5 shortly after. Amaya was held to a mere 9 points and three rebounds before leaving the game. He was averaging 14.8 points and 9.3 boards an outing going into action against Southeastern. The Salukis fell behind by as much as 12 points in the first half. They managed to climb within 6 points, but down the stretch the Bears were unstoppable from the free throw line.

Southwest picked up 28 points from the line shooting 74 percent from the charity stripe.

The game was an 11-point turnaround from when Southeastern lost 80-78 Jan. 8 in the Arena. Senior guard Sherri Mahan led the Saluki attack with 23 points. The Bears had four players in double figures, with Daryl Reid notching 22 points and David Brewer adding 19.

The MVC has turned into a two-team race with Creighton on the Bears' heels at 7-3. Creighton plays Friday at SIU. The season will probably boil down to three games in the MVC Tournament beginning Mar. 1 in St. Louis. The Salukis have finished as the runner-up in the tournament the past two straight seasons.

Women in Sports Day celebrated nationally

By Jennifer Wise
Staff Writer

There's nothing worse than a bad vacation, but there's nothing better than returning home afterwards. The Saluki women's basketball team, in the past two weeks, has had a rough time on its four-game road trip. However, the Salukis are hoping to turn it around in their own SIUC Arena tonight against Bradley at 7:30 p.m.

"We're pleased to be back home," Saluki head coach Cindy Scott said, "but consider home on the road, every one of these conference games is a must win for us."

The Salukis went 2-2 on the road, the losses were to a mediocre Drake team and a red-hot, 11th ranked Western Kentucky squad. Everything points towards the Salukis needing another win over Bradley, seeing how the Salukis have beaten the Lady Braves 18 of the last 18 games.

Though the Salukis have always drawn a victory, they have never gotten away without a tussle. In the last three contests, the Salukis have won by a soul of 11 points.

In the most recent SIUC-BU game, the Salukis won by 56-55, "bora on Jan. 12."

"We were very well matched," Scott said. "We've been very lucky to win the past three games against them. They're going to come in here very motivated and it's going to be a difficult game."

Bradley's tendency is to keep things tight with SIUC could be because of the fact the two teams have very similar personnel and styles of play.

Saluki football team signs 16 more players for 1991

The first day high school seniors could sign letters of intent to play college football was one for the 1991 Saluki football team.

Sixteen players put their names on the dotted line Wednesday to add to the Salukis already large recruiting class. In the past month the Salukis have already welcomed aboard 11 junior college recruits.

If the football office has seemed barren lately, it's because the coaches have been spending most of their time on the road, closing the sale, on the players they have been talking to.

Of the 16 players inked Wednesday, most are from Illinois and the Midwest. Seven players signed from Illinois, while four are from Indiana and two from Missouri.

Assistants spark plugs for SIUC

By Cyndi Oberle
Staff Writer

It is said all good things come in threes.

The SIUC women's track and field team is having a spectacular season and one of the reasons for this is the work of assistant coach Pat Davis.

Patty Davis, Beth Alford and Kathleen Raske are the motor behind the scenes of the team which keeps it going.

Davis is a second year graduate student from Clinton, Penn., who works solely with the throwers, jumpers and multi-event athletes.

Alford is a second year graduate student from Minnetonka, Minn., who works with the distance and cross country runners.

DeNeon Davis, a second year graduate student from Minnetonka, Minn., who works with the distance and cross country runners.

"I am very fortunate in the respect of how my coaching staff works," DeNeon said. "I feel confident in turning the athletes over to them for workouts and training. Ever since I've had this staff, I haven't heard a word from the athletes about them not getting the right coaching."

For the first two weeks of this week, these graduate students said they can't spend enough time with the sports they love.

Davis, who is working on her master's degree in exercise science, said she doesn't have the time to dedicate her entire day to the team like she wishes she could do.

"I've had this staff, I haven't heard a word from the athletes about them not getting the right coaching."

"I've been fortunate in the respect of how my coaching staff works," DeNeon said. "I feel confident in turning the athletes over to them for workouts and training. Ever since

The renovation and expansion of University Mall is 95 percent complete, according to mall officials.

"All that's really left is for the individual stores to put up their storefronts," he said.

According to a University Mall press release, the expansion wing cost $33 million to construct and covers 290,000 square feet of new retail and dining space. The wing features Skylights, common areas, ceramic tile floors and soaring ceilings.

Mall officials gave an update on the new wing scheduled to open March 6.

The title floors are installed, the light fixtures are in place, and the new J.C. Penney's entrance is just about done, said Joel Erickson, executive vice president of retail for Heiman Properties, manager of the mall.

"We are pleased to have Montgomery Ward's, which opens Nov. 3. We are pleased to have Montgomery Ward's as an anchor store at University Mall. We feel that with them, we will continue to be the dominant retail facility in the area," Erickson said.

The Ward's store will fill the space that will remain when Sears, Roebuck and Company moves its retail store to Maion in August.

The four-court will take up 10,000 square feet of the wing with

Morris collects complete works of British novelist

By Jefferson Robbins

Staff Writer

Morris Library has purchased an extensive collection of notes and documents by the late British novelist Lawrence Durrell, said David Koch, special collections curator.

The addition makes the library the primary U.S. research center on Durrell and his writings, Koch said.

"This is the largest and most complete collection of Lawrence Durrell's work in the country," said Shelley Cox, Rare Books librarian.

Durrell, who died at 78 in November 1990, was a prolific writer of fiction, poetry and travel books. In his career he published more than 15 novels and 20 books of poetry.

Durrell's most famous work is "The Alexandria Quartet," four critically acclaimed novels about modern love. The quartet was published from 1957 to 1960.

The collection was acquired prior to Durrell's death, Koch said.

"Hal (the collection) not come here before his death; it might have been dispersed to the four winds," Koch said.

The addition joins a set of Durrell materials purchased by the library in the early 1970s, he said.

"It came here with Durrell's blessing," Koch said. "He was glad to have it with the rest of the collection."

The addition, which is being sorted and catalogued, includes personal notebooks, sketches, letters and 50 books from Durrell's working library, Cox said.

Although the number of documents in the collection is not yet known, Cox estimated the volume of papers at about 30 cubic feet.

A signed first-edition copy of American author John Miller's "Tropic of Cancer" was among the acquired books, Koch said.

Durrell and Miller were good friends from their first meeting in 1935, and Durrell edited a volume of Miller's letters, Cox said.

The idea for Durrell's book, "The Memory of Love," was the inspiration for the letters, according to Koch.

"Anybody interested in the process of creativity, it's a really great collection to look into," Cox said.

Precaution needed on peace proposal

IF GEORGE BUSH AND SADDAM Hussein take a step toward Iran's proposal for peace talks, each will be walking into enemy territory. Iran has claimed repeatedly to remain neutral throughout this war, but its plan to mediate between two of its enemies must be taken with caution.

The recent reason obviously lies in Iraqi planes being flown to Iran for storage. Recent estimates show about 120 planes have landed there—more than 10 percent of Iran's air force.

But the recent history of these three countries gives more reasons.

THE 1980-1988 WAR BETWEEN Iran and Iraq left millions dead and crippled Iran's military force to the extent that the United States has little fear of its presence in the Persian Gulf war.

The animosity set up in those eight years was pierced with Iran's acceptance of some of Iraq's best aircraft.

The United States also has had its differences with Iran in the past decade since the holding of American hostages in the U.S. embassy in 1979.

And in the last year of the Iran-Iraq war, in which the United States supported Iraq and imposed economic sanctions against Iran, a U.S. warship accidentally fired at an Iranian commercial airliner in the Persian Gulf.

AT THE TIME, TEHRAN radio quoted Iran's acting commander-in-chief as saying, "We cannot allow ourselves to refrain from taking revenge, and the choice of timing is up to us and not up to America."

Hypothetically, these words, reminiscent of Bush's recent comments on starting a ground offensive against Iraq, have passed for the sake of peace between the involved countries.

This peace initiative shows that of the three points in this international triangle, Iran holds the strongest one.

While an enemy fights an enemy, Iran can choose to add tension between them in order to heighten the war and weaken each side.

But by proposing peace, Iran could find world opinion turn its way, as Soviets and Turks already have expressed, and perhaps find increasing support in the future.

Concrete proposals, however, take precedence over these conceptual ideas.

A strong demand for a withdrawal on the part of each side likely will be met with opposition. Iran cannot expect unconditional retreats from either side, and the plan may be viewed simply as an Iranian desire to decrease its enemies' military presence.

No matter how Iran proceeds, both the allies and Iraq better respond with as much caution as they would show toward each other.

In any war, blind hope can lead to a dead end.

Letters

Americans guilty of backpack abuse

It is a well-known fact that people from different cultures always pick on each other for one reason or another.

The United States has long been criticized for having an inferior and cheap culture.

The American culture is in my eyes not all that bad, but as a foreign student and a stranger to an American style of living I dare to say that the Americans have a tendency to do things differently.

As students, we are all familiar with the backpack. It is a handy device for carrying personal items. In the case of students it is used mostly for books.

The backpack, or the bookbag, is well used around the world and in the region of the world that I come from. The backpack is there used for the same purpose as in the United States. Europeans do however seem to utilize the backpack more to its full potential in contrast to the Americans.

The backpack in accordance with the name is designed to be carried on the back. It has two straps for the purpose of separating the weight to both shoulders.

I do not mean to be trivial in explaining these facts, but it seems to me that very few Americans are utilizing the backpack as it should be utilized.

Walk around campus and notice the number of students who have their backpacks hanging from one shoulder. I would roughly estimate 98 percent of all students.

Do they hang the backpack from one shoulder because of pure laziness? Is it fashion? Or are they all trying to ruin their backs?

According to the trend I am surprised to discover that no producer or backpack has yet produced backpacks with one strap or in that case it would perhaps not be a backpack.

I am not trying to put American students down for missing the backpack but rather to inform them.

Try once to put both straps on. See how it works and how it feels.

Do not be surprised if you find out that it actually works quite well.—Gisle Hovik, senior, business administration.
efforts to persuade the U.S.-led alliance to accept a cease-fire. He also said U.S. forces had detected nerve agents that they will regret their decision.

Ned said two U.S. Air Force F-13 Brellas on patrol over Iraq spotted two SU-25 attack planes and two MI-24 jet fighters and opened fire. The SU-25s were hit, and the pilot of one "possible" MI-24 was also killed.

The Iraqi planes apparently were heading for Iran, he said. The number of such planes now grounded in Iran was 120, officials said, with nine of those fighters on Iran's front line with Iraq.

At a House Foreign Relations Committee, Secretary of State James Baker warned Saddam that the use of chemical or biological weapons would have "the most severe consequences." He would not be more specific, but he said he had nothing more.

Baker said the final decision is one for Bush to make, suggesting that a nuclear response could be on the list of options.

"We have heard, and we take at face value, Saddam's threats to use biological or chemical weapons," Baker said. "We have warned him that he would be well advised to heed our warning — that we will not tolerate the use of such weapons. Any use of chemical or biological weapons will have the most severe consequences."

Although coalition air raids are reported to have destroyed chemical and biological weapon manufacturing sites, it is known that Iraq has extensive stockpiles of both kinds of weapons.

"The warning came as Baghdad decided to suspend diplomatic relations with the United States as well as its key allies, Britain, Italy, Egypt and Saudi Arabia, effective immediately, the official Iraqi News Agency reported. The dispatch, monitored in Cairo, did not elaborate.

A State Department spokesman said the United States had not heard anything from the Iraqis about sophisticated chemical or biological relations. All U.S. diplomats have been pulled out of Baghdad and Geneva, though both envoys officially are "open but untaught."
SEC to discuss biodiversity, views on local timber sale
By Brandi Tippin
Staff Writer

A group of environmentalists will take a hike to the Shawnee National Forest at Lawson Hall tonight.

The Student Environmental Center will show a 45-minute film at 7 p.m. about biodiversity in a closed canopy forest and discuss the Fairview timber sale, said Jan Wilder Thomas, SEC member.

"After all you've heard about Fairview, now's your chance to take a hike there," she said.

Once the canopy (created by the trees) is open, the forest's soil base is more susceptible to erosion, Thomas said.

The group will also present a 23-minute slide show. The slides will include a view of the endangered grandparent trees, so named because most are more than 100 years old.

Slides also will be shown of trees marked for clear cut destruction and the Shawnee jewels, which are an array of wildflowers and a number of rare endangered orchids, Thomas said.

Thomas said anyone interested is welcome to attend.

The group wants to get the word out about the environment and biodiversity, she said.

The Student Environmental Center is an organization with the mission of educating students about the environment and the protected areas of Shawnee National Forest.

Engineering week to include games, student job day
By Kylee R.bertson
Staff Writer

The SIUC College of Engineering and Technology will participate in National Engineers Week Feb. 17-23.

The celebration is set on the week of George Washington's birthday, he was the founder of West Point, the first U.S. engineering college.

As an introductory event there will be a precision pacing competition at 1:30 p.m. today outside the Technology Building. The competition involves the pacing out of areas as a standard measurement tool.

Events during the week include a Mind Games Competition day where students from local schools and the general public compete in an "Engineering Ponsanhill." One of the competition games is "Open the Door First," in which contestants attempt to get the most sand into a container using a remote-controlled toy earth excavator.

Representatives from more than 12 companies will discuss career opportunities with students at Career Day on Thursday.

Local bands battle at bar in third round

By Tracy Gargante
Entertainment Writer

Three local bands duke it out at 9:30 tonight in Gatsby's Battle of the Bands. In its third round, Moonlight Mile, Dissident Aggressor and Bum Funk will take to the stage in hopes of becoming king of the battle.

Robbie Stokes, live entertainment buyer/chief sound technician for Gatsby's, said he has had difficulty in filling all the slots.

"Battle of the Bands" usually goes six bands with 18 bands competing. Right now we are still looking for five or six bands," he said.

Stokes explained, in the past most bands that entered were cover bands.

"(But)- a cover band is more or less a death sentence (in the competition)," he said. "That's why Gargante oversized our standard bands.

"(But)- a cover band is more or less a death sentence (in the competition)," he said. "That's why Gargante oversized our standard bands.

Stokes added that nothing was set at this time and he is still looking for entries.

The winner of the Battle of the Bands will receive studio time from Sound Core Inc., guaranteed jobs at Gatsby's and $250 in cash. Runner-up will get gifts and $50 in cash.
Facilities for non-trads need upgrading; lounge proposed

By Tiffany Youther
Staff Writer

Growing numbers of non-traditional students need improvement in the services and facilities available to them, Mary Gasser, Non-Traditional Student Services Director, said. Gasser said the office is working to find a lounge area specifically for non-traditional students. More than 20 percent of SIUC undergraduates are non-traditional students, she said.

"Having a place to meet is a way of bonding together a community of students, such as non-traditional students." —Mary Gasser

The stereotype of a non-traditional student is a divorced woman, but 60 percent of non-trads are "men, she said. "Non-traditional" refers to students who are back in school to being out of formal education for a period of time. It also applies to students who are married, students who have children and students who are 24 or older. McCaleb said many people at SIUC do not know the Non-Traditional Student Services office exists.

"I would like people to know we are available and can help non-trads," she said. McCaleb is a non-traditional student working toward a master's degree in educational psychology at SIUC. She said she will probably get her doctorate and work in referral counseling at a university.

"Having a place to meet is a way of bonding together a community of students, such as non-traditional students." —Mary Gasser

"I don't think we're going to hit (50 percent) here because we are not an urban school," she said.

Gasser said the nationwide increase is due to the desire of many adults to upgrade or even change their careers. She said a good example of this type of non-traditional student was a successful business executive in his late 30s who came back to school at SIUC because he had always wanted to be a veterinarian. Gasser said many people are coming back to school to make "early mid-life" career changes.

Cathy McCaleb, graduate assistant at Non-Traditional Student Services, said many displaced homemakers and workers are coming back to work to improve their earning power.

Many married people also are coming back because of a need to support their family incomes, she said.

"It seems like more and more a family needs to have two people working to keep a family going," McCaleb said.

It also applies to students who are married, students who have children and students who are 24 or older.

McCaleb said many people at SIUC do not know the Non-Traditional Student Services office exists.

"I would like people to know we are available and can help non-trads," she said.

McCaleb is a non-traditional student working toward a master's degree in educational psychology at SIUC. She said she will probably get her doctorate and work in referral counseling at a university.

"Having a place to meet is a way of bonding together a community of students, such as non-traditional students." —Mary Gasser

"I don't think we're going to hit (50 percent) here because we are not an urban school," she said.

Gasser said the nationwide increase is due to the desire of many adults to upgrade or even change their careers. She said a good example of this type of non-traditional student was a successful business executive in his late 30s who came back to school at SIUC because he had always wanted to be a veterinarian. Gasser said many people are coming back to school to make "early mid-life" career changes.

Cathy McCaleb, graduate assistant at Non-Traditional Student Services, said many displaced homemakers and workers are coming back to work to improve their earning power.

Many married people also are coming back because of a need to support their family incomes, she said.

"It seems like more and more a family needs to have two people working to keep a family going," McCaleb said.

The stereotype of a non-traditional student is a divorced woman, but 60 percent of non-trads are "men, she said. "Non-traditional" refers to students who are back in school to being out of formal education for a period of time. It also applies to students who are married, students who have children and students who are 24 or older.

Pilot of USAir jet sees smaller plane too late

LOS ANGELES (UPI) — The co-pilot at the controls of a USAir jet that crashed into a commuter plane at International Airport did not see the smaller jet until an instant before the crash that killed 34 people, Federal investigators said Wednesday.

Investigators also disclosed that there had been a struggle among passengers trying to get out of the flaming Boeing 737-300 after the crash.

James Burnett of the National Transportation Safety Board said at a news conference that interviews with survivors revealed that two male passengers aboard the plane had "trampled" a woman trying to get out of an over-the-wing exit.

The two men then "caucused" over which would go through the exit first, Burnett said.

Another male passenger pushed both of the passengers through the exit, then helped the woman out, Burnett said. He refused to describe the scene as a panic.

Investigators who interviewed the jetliner's first officer said he did not see any sign of the SkyWest commuter plane, which on the evening of Feb. 1 was waiting to take off on the same runway on which the jetliner was landing, until after both the rear wheels and nose gear of his plane had touched down.

The impact was virtually instantaneous after the nose gear touched down," Burnett said.

The co-pilot's first officer, David Kelley, told investigators that in the moments between the nose gear touching down and the crash, he saw a red light, the tail of the SkyWest plane and the reflection of the USAir jet's landing lights on a propeller of the commuter plane.

As the planes collided, Burnett said, the co-pilot saw a "flash" of light and felt the nose drop down as he tried to put on a brake. The cabin then went dark as the captain tried to shut off the plane's engines. Investigators said previous information taken from the USAir Boeing 737's flight data recorder showed its main landing gear had touched down on the runway six seconds before the impact with the SkyWest plane.

The smaller turboprop was obliterated. All 12 of its passengers and crew were killed when they were ejected from the plane. A crowd of 1,300 people were on the tarmac at the time of the accident.

The fuselage of the 737 split as both planes skidded in flames for more than 1,300 feet.

The state asked the commission to delay imposition of the tax to await the outcome of court challenges and avoid a potentially complicated refund process.

ICC spokesman Cathy Monroe said that set off a legal process, under which the request will be assigned to a hearing officer who will handle it "in an expeditious manner" and make a recommendation. No time frame was set immediately.

"There are already 22,000 people enrolled in the program and they are not going to be removed from service as of Feb. 1," Monroe said.

"Until the commission decrees otherwise, they will receive the service and the surcharge will be collected," Illinois Bell spokesman Larry Cose said the first bills containing the charge were mailed Wednesday.

ICC Chairman Terry Barnich earlier recommended the tax be delayed. But on Wednesday he said the commission first would hold public hearings to study the program before acting on delaying the charge. Barnich said, however, he considers the program legal.

Jack Tharp, executive vice president of the Illinois Telephone Association, said the group also feels the tax is legal.

"In today's world, a telephone is a necessity, like food or shelter. The intention of the program has merit. Our quarrel has been over the funding," Tharp said.

The program will allow as many as 620,000 poor residents in Illinois to receive their phone bills reduced to a maximum of $7 for Illinois Bell and GTE customers.

Today's Puzzle

Today's puzzle answers are on page 14.
styles of play. Both teams live off their own play and use physical pass play.

"He's usually a physical game," Bradly concluded. "But we're not going to
stay down. Our defense has been ranked number one, and they can't
match us up so well because we use our strength against theirs." 

RECRUITS, from Page 16 —

The broad recruiting areas the Salukis have been covering brought in
players from Florida and one from Virginia.

Both the Salukis offensive and defensive lines received a splash of
depth by the sign," Saul.

The offensive line received three more rookies, while the defensive line added four more players. In addition, SUIC now has three more quarterbacks (two, though one of the QB signees also play defensive positions) and a pair of quick running backs.

Anthony Perry and William Tolman could be the Salukis backfield of the future. Perry (Illinois Valley Community College) is a 5-fooe-10, 185-pounder who is known for his breaking ability. He averaged 10.5 yards a carry this past season and had runs of 97, 90, 87 and 80 yards.

Tolman is more of a workhorse, despite his small 5-fooe-7 frame. The Lutheran North High School (St. Louis) graduate rushed for an amazing 2,200 yards and 30 touchdowns this past season. The first-team all-star pick runs a blazing 4-4 second-interior dash.

"William has amazing quickness and speed," said LaRue head football coach Mike Trigg. "I think you will see a great player at SUIC. He is a tough lad, so he is not
afraid to take it inside."

The Salukis managed to add both speed and size to their recruiting class. One of the big men who could make an immediate impact is Mark Marykiewicz (Rock Island Alleman High School). The 6-foot-4, 225-pound all-star selection plays both tight end and defensive end. As a senior he caught 14 balls, but was a team captain on the defense as he blocked
11 sacks to go with his 92 tackles.

The Salukis combination of veterans Amyi Rakers and sophomores Angie Rougoue and Kelly Fird will have to corral the
harshest of Shelia Jenkins, Eileen Yerkes and Heidi Nelson. SUUC's big three are averaging 36 points a game, while
BU's trio are averaging 34 points a game.

As Scott said, the rest of the Salukis Gateway Conference games will be critical if the team wants to repeat as conference champs. Just behind the Salukis and
BUC's 9-1 record in the conference, are Southwest Missouri State and Illinois State, both at 9-2.
Kiam's missile joke falls short

BOSTON (UPI) — New England Patriots owner Victor Kiam said his jest about a missile slammed as "sexist and inhumane" about Patriot missiles and a terrorist group was sexually harassed in the team's locker room.

The National Organization for Women said it was "disgusted" and sportswriters "dismayed" over the joke about Boston Herald sportswriter Lisa Olson.

Kiam told the joke Monday at a sales-only sports banquet in his hometown of Stamford, Conn., Rob (Bob) Roenick (young straw advocate)

"What do Lisa Olson and Iraqis have in common? They both are seen Patriot missiles up close," said Kennedy, who attended the banquet.

The joke, referring to Iraqi missiles used to set off sons scud missiles in the Persian Gulf war, has been circulating for years.

In a statement released by a public relations firm and the team, Kiam said he and Olson exchanged by speakers at the banquet.

"I spent the best of several I used had judgment in repeating one particular joke. The comment was intended to be light, I apologize to those who are offended," Kennedy said.

Kiam said he "got a good laugh and then I think quite a few people just sat back and said, 'I don't believe he did that.'"

Kennedy sometimes "There's no way he could figure there was nobody from the press there. He's sitting next to someone from the New York Post," Kennedy said.

SPARK, from Page 16

have enough $ for track other.

"I think we can do that. The class I'm enrolled in, my thesis, I just trained myself to run and I think enough $ for track other.

Davis said.

Alford said with the research for the NFL department, the two classes the teachers and her own classes, there aren't enough hours a day for her to do.

"It's frustrating to me," Alford said. "With all my other commitments and involvements, I can't even teach a gym class to the tribe as I would like."

DeNoon said they are all accepting their responsibilities on a full-time basis even though they have to cut time for other studies.

"They are very busy women," DeNoon said. "And the pay for those classes is not all that and I have to give them credit. They all give their quality time to track and field.

DeNoon said he is fortunate to have such an outstanding student because the sport is only given a budget for one full-time graduate assistant.

"Patty and Kathleen split the money for the position and both

SPARK, from Page 16

people. They all volunteered all her time," DeNoon said. "I guess we are very lucky that our assistants and most of our athletes all came to us last year. It gave us a chance to develop and be coaching staff along with the athletes.

Alford thinks the coaching staff is fortunate because of what each individual brings to them. We have such diverse backgrounds," Alford said. "With the personal knowledge and each bring to the team, we end up working well together. We are also very busy, they have had no trouble off the field, hard work, they don't seem to mind."

"It is a love, a passion that I just can't get away from," Raake said. "I have always been involved with some sort of coaching whether it be in a camp, a clinic or just helping out on our own. I am seriously thinking about coaching as a collegiate level later on in life."

Track and field has given so much to me, I just want to give back some back to it."

Alford said what she enjoys most is educating the athletes about the sport.

"I just love running," Alford said. "I have been having to do it. I just want to help others enjoy it as much as I do." Teaching the athletes about their best events is what Davis said she stresses the most and "... to get them to really work hard, they don't seem to mind."

"The more they understand their event, the more they like it," Davis said. "The more they like it, the harder they workout. These girls are full of potential—potential they don't even know they have. Once they see that they're in themselves, their hard work is paying off. Then I think they'll be able to do anything." They said the most rewarding aspect about their job is they get to see the girls develop both as athletes and people.

"It is so nice to see the athletes achieve what they've done," Raake said. "I love watching their development throughout the year. It is very satisfying and rewarding to be a coach to help them achieve their goals and off the track."
