Williams, Collum help Salukis return home in good shape for stretch run defeating Drake — again

The best way to push a disappointing loss out of mind is to take a win as easily as possible.

That's exactly what the SIU men's basketball team did Saturday, as the Salukis smoked Drake University 79-62 in front of 3,962 fans at the Enterprise Center in Carbondale, Ill.

With the win, SIU (13-9, 7-4) closes out the first half of MVC play and moved into a tie for third place in the Valley Conference west coast tournament.

"It's a big win for us, especially after the disappointing loss (against Northern Iowa)," Weber said on his post-game show.

Our guys kind of showed their character and their maturity. I think they really wanted the game and they were focused right from the start.

I talked before the game about being special. You cannot have an ordinary effort and win on the road, and we were special tonight."

Senior guard Ricky Collum, who scored 20 points, 11 rebounds, eight assists and eight steals for his first career triple-double, said the Salukis' switching defensive scheme allowed him to knock down some open shots from the perimeter.

"I just tried to step up and play a little bit more offensively," Collum said. "I felt comfortable against them."

Drake (10-10, 4-7) was able to keep up with the Salukis early, but an 18-7 Salukis spurt to finish the half allowed the Salukis a 35-24 halftime advantage. SIU sustained its momentum after the interval, quickly amassing a 48-30 lead and putting the game out of reach.

While SIU received a balanced scoring, Saluki freshmen guard Kent Williams was extra-effective on Drake, tallying 14 points and 11 rebounds. Williams used his trademark combination of long jumpers, slashing drives to the basket and free throws to terrorize the Bulldog defense.

Senior forward Chris Thuritt added 12 points for the Salukis, and junior forward Joshua Cross was a perfect 5-for-5 from the field in his first MVC game in an endanncce, it was SIU (6-13, 3-7) that answered baskets in the last two minutes of the first half to win 51-47. The Salukis turned up the pressure even more in the second half to win 51-47.

For the Braves, this loss will not be more important conference games at halftime, and provided a major spark in an endancce, it was SIU (6-13, 3-7) that answered baskets in the last two minutes of the first half to win 51-47. The Salukis turned up the pressure even more in the second half to win 51-47.

Fire Takes Toll on Residence Hall Room

Three sent to hospital for smoke inhalation

Rhoda Sciberras
Student Affairs Editor

A fire ravaged a SIUC residence hall early Sunday morning, sending three people to the hospital because of smoke inhalation and damaging the entire contents of the room.

The Carbondale Fire Department responded to the blaze at 1:33 a.m. in room 1208 of Schneider Hall. The fire was under control by 1:45 a.m., said Assistant Fire Chief Kerry Jones.

Two SIUC police officers discovered the fire after seeing smoke coming from under the room's door. The two female residents who occupied the room were not in the room when the fire started. Nate Kennedy from Burbank was not at home, and her roommate, Megan O'Laughlin of East Peoria was out of town.

The cause of the fire was accidental, Jones said, and damage estimates for the building and the destroyed contents of the room amount to about $18,000.

"It was a typical high-rise fire and there was nothing good about it," Jones said. "That is what makes it so hard, you have to carry everything out of the room."

Maintenance workers remove fire-damaged debris from the 12th floor of Schneider Hall Sunday.

College of Mass Communications and Media Arts leads enrollment increase

Recruiting efforts and general interest in advancing communications helps the college

BRYNN SCOTT
DAILY EGYPTIAN REPORTER

Dominating a hike in enrollment this spring, the College of Mass Communications and Media Arts grabbed 99 students for its program.

The college represented 27.5 percent of the 271 new students enrolled at SIUC, according to official enrollment figures.

Jackson said the budget may continue to compensate programs with increasing enrollment.

Jackson said recruiting is a major problem during serious budget models to recruit students.

"Our budget may continue to compensate programs with increasing enrollment."

Chinese celebrate new year with Americans
TERRY L. DEAN
DAILY EDITION REPORTER
Carbondale's Chinese community wanted to make the first Spring Festival of the millennium a time not only to reconnect with home, but to help Americans understand more about the Chinese culture.
Chinese students and faculty celebrated the "Year of the Dragon," Saturday at the Carbondale Civic Center to commemorate Chinese New Year. The dragon is China's official symbol, much like the bald eagle is for America, making the 2000 celebration significant of the millennium.
In China, Spring Festival is a huge event because it marks the beginning of the Chinese lunar year. The festival is steeped in tradition, with singing and dancing as a part of the celebration. It is a time to honor many Chinese customs, including fixing old debts, honoring the elderly, and their homes from top to bottom in hopes of sweeping away any evil fortunes.
China's celebration, which began Friday, was taped and shown at the Civic Center to about 200 people. Many performers and audience members were sad, the only sign of celebration for the Chinese.
Saturday's celebration was a way to bring their traditions and culture to people in America who may have never experienced them before.
"First, it's for Chinese students to come together," said Ma Lingjie, president of the Chinese Student Association. "The importance of celebration is to bring American and Chinese people together to experience Chinese culture.
"That's why we have American people and Chinese people sitting together, so they can communicate with each other," he said.
Lingjie reiterated the importance of family, not just in terms of the celebration, but for his life as well.
"The relationship between family members is very, very important," said Lingjie, a graduate student in economics who came to America in 1997.
"In my life, I think about my parents and my sister a lot."
Others who also performed, including SIUC students and faculty, saw this as a chance to remember the celebration of China's new year in jail and a $500 fine.
National charter for hazing and other abuses
The Alpha Epsilon Pi fraternity chapter at the University of Michigan has lost its national charter for hazing and other abuses.
University officials approved of the national organization's decision to shut down the fraternity on Monday.
The Alpha Epsilon Pi Iona's national board also voted to revoke recognition of the Ann Arbor group's chapter, disbanding the 70-member group.
The decision stems from an incident in which a pledge was shot in the groin with a BB gun in December.
The victim, a 19-year-old freshman from New York state, required surgery and has not been identified publicly.
Chapter member Zachary Maxwell, a sophomore, told police he fired at six other pledges without harm before not seeing the seventh.
He has pleaded not guilty to a misdemeanor assault charge carrying up to a year in jail and a $500 fine.
School officials said the fraternity turned sour and feathered its pledges, screamed insults at them, and taped them to eggs and forced them to eat raw fish.
Last month, the chapter made headlines in the student newspaper after three pledges were hospitalized — two for alcohol poisoning and one to be treated for a cut on his head with a snowboard packed with rocks.
The group also earned negative attention when about 100 students demanded the fraternity house after winter break only to learn they had to find temporary housing because of extensive vandalism reported Dec. 22.
Seton Hall to install sprinklers in dorms
Seton Hall University has said it would install sprinkler systems immediately in two of its dormitories, including one where a fire recently killed three students.
Firefighters say destruction caused by Jan. 19 fire might have been lessened had the school officials said the prompted sprinklers.
More than 60 students were injured in the fire, which detectives reportedly believed was set intentionally.
Three students died in the fire. Four residents of a neighboring building sought emergency treatment.
One of the hospitalized, Darn Christmas, has yet to speak to investigators.
She is a resident assistant who was highest up of non-student visitors to leave the residence hall about an hour before the fire started.
Investigators believe the fire may have resulted from a feud between a group of students and the men, but they have not concluded whether the fire was started as a prank or intended to hurt someone. 
Our Word

Pros of Partnership Bridge greatly outweigh the cons

As SIUC grapples with internal conflict between groups and a lack of permanent leadership, the greatest danger facing its school is the institutional stagnation that will result from diverting energy from the future. Max Yan, an SIUC professor and director of the Materials Technology Center, has managed to keep his eyes on SIUC's potential with the proposed Partnership Bridge.

The 500-foot bridge will help clear up the dangerous congestion on Lincoln Drive between the Engineering and Neubert buildings, but, perhaps more importantly, it will provide hands-on experience to students and put SIUC on the mechanical engineering map.

In recent weeks, faculty members have stepped up in opposition to the project, saying the bridge is a misuse of University dollars and a needless threat to SIUC's climate.

Those concerned the bridge is taking food out of the mouths of hardworking professors or credit hours from potential scholarship applicants have not experienced the glory of government grants. The Illinois Department of Transportation has promised $249,000 toward the bridge and another $276,000 is likely to come from the Federal Highway Administration. At least $25,000 will be taken from Traffic and Parking funds. None of this money could be used to facilitate the hiring of more faculty or improve labs.

Not that the project isn't going to cost SIUC a chunk of change. It is a big project and unrealistic to insist that faculty pay's the only problem at SIUC.

The bridge will be the first of its kind in the United States, using a lighter, more durable material to build the structure. Not only are students taking part in its planning, but monitoring devices within the structure will allow future SIUC students to witness, first-hand, how the bridge holds up to its environment.

As for the trees, we are glad someone is looking out for our leafy friends, but this argument simply doesn't measure up to student safety, institutional advancement and student experiences. Yet has worked with many people on this project and even went so far as to name it the Partnership Bridge. Danger is the type of problem planners may overlook if concerned faculty don't make suggestions. What's more, Yan was quoted in the DAILY EGYPTIAN as saying every tree cut down would be replaced.

It appears individuals have become so frustrated in arguing for their own causes, they have lost the legitimate concerns to become blinders in a huge and complex institution. Once those with the loudest voices lose the ability to participate in meaningful dialogue about the many facets of SIUC, we will find ourselves in political gridlock, at a University going nowhere. Now is the time to step back and regain some perspective, where every issue will be evaluated on its merits, its benefits weighed against its defects.

An individual has yet to speak up with a problem that exceeds the contributions the Partnership Bridge will offer SIUC. Those concerned SIUC's future must not allow SIUC's growth to be stunted by those who can't see the forest through the trees, so to speak.

Made to be broken, resolutions are

For the ninth year in a row, I have broken my New Year's resolutions. Does this make me sad? Yes, it is upsetting to me. Do I feel like I have let myself down because the simple fact is this; I could not stop smoking my life depended on it.

My body was simply not nicotine smoking being inhaled into my lungs. Many fruitless attempts have been made, but all with the same outcome: sore throat, watery eyes and smelly fingers.

I thought maybe the problem lied within the brand I was smoking. This was not the case. I tried every type of cigarette on the market and still no success.

I had to try another route. I purchased a nicotine patch from my local Walgreens store. I followed the directions, stuck it on, breathed and... nothing happened.

I bunched a smoke off a friend, lit it, exhaled and watched the band that was smoking. Everything was cool. I felt good, no one around me was in any trouble, and in a way I had finally lived up to my resolution.

banana, a show piece and a cassette tape.

The paper towels weren't bad — had a decent after taste. The cardboard wasn't good at all, too harsh. The bananas didn't work out all — couldn't keep them in the shade. The smoker was disgusting, not to mention the fact that it kept going down and burning my Georgie. The cassette tape was good for the first day, but seven seconds I passed out in a coma. Three days later, I realized that smoking in the hospital is enough to make me sick.

As for me, I finally accepted the fact that I was not meant to smoke. I am glad that when making resolutions, you cannot aim for the stars. To avoid driving yourself crazy, you have to realize to do something that is within your grasp, like gaining weight perhaps.
Greek education for Millennium Initiative

Risk management a serious first step
Jennifer W
Daily Egyptian Reporter

More than 100 Greek members gathered Saturday for a presentation on risk management, the first step in implementing the new Millennium Initiative.

The members met for a presentation about preventing risks when having social events with alcohol, now allowed through the new Millennium Initiative policy. Every Greek member was required to attend.

The student-written Millennium Initiative replaced Select 2000 this spring, allowing 21-year-old fraternity members to drink in chapter house rooms and permitting chapters to have three alcoholic social events each semester.

Allen Groves, International Legal Council for the national organization of Phi Kappa Alpha, presented the risk management program.

"If you have a policy and you don't follow it, the first thing someone's going to do is hold up the policy and hang you with it," Groves said.

He listed numerous cases in which Greek members suffered serious consequences because of drinking or hazarding.

"It is frightening, but it shows the risk free," Groves said, citing the ups and downs during the last few decades.

The difference this time is that fraternities and sororities are competing in the marketplace. Some evaluate the way they handle alcohol and decide the effects of alcohol.

"We don't want to have a policy that people can't follow," Groves said. "We need to make a change and that's why we're here."

Groves, who offers his services free to Rockford, said the new program states what they're about.

"If you have a policy and you don't follow it, the first thing someone's going to do is hold up the policy and hang you with it."

Allen Groves
International Legal Council of Phi Kappa Alpha

Toni Tialdo, president of the SIUC chapter of Pi Kappa Alpha, was impressed with the seriousness of the presentation.

"It basically comes down to the chapters. Most of the chapters can solve these problems," Tialdo said.

The Inter-Greek Council and the Inter-Greek Council president said this presentation will improve Greek members' awareness of the seriousness of the Millennium Initiative.

"Seeing the reality before we fully implement the Millennium Initiative is a good thing for everyone," said Cichella, a junior in speech communications from Belleville. "This new program states we need to make a change, and that's what we're trying to do."
you are going to be using up with you.

Terry had a scholarship in biological sciences from Chicago, was a senior in his room on the 5th floor when the alarm sounded. He grabbed his bucket and headed outside, thinking he would be back in his room within 20 minutes.

"I've always taken fire alarms seriously because there is always a chance they will be real," Jasper said. "I just never thought it would be last night."

Schneider residents were given the option to spend the night in Grinnell Hall. About 15 students living in the A-wing of the 12th floor were relocated Sunday morning to a makeshift in place due to the fire alarm pro-

ANA HARK TAYLOR

When冨isa Curtis decided she wanted to spend last summer in Greece, she knew she was going to need some help.

So she called her grandmother and asked for a special graduation present. Before Curtis knew it, she was in Greece as part of SIU's study-abroad expedition.

"I wanted to see another side of the world," Curtis said. "Curtis's trip was one of the yearly programs. The theme of this year's expedition is "Myth and Cosmology: Searching for Self in Ancient Egypt (Greece)."

Robert Hahn, associate professor of philosophy, said the theme is directed at answering four fundamental questions: Who am I? Where did I come from? Where am I going? and What is the meaning of life?

President L. Cook Smith said the program is interdisciplinary and combines 30 students with a team of six or seven professors from across the country for about two weeks in either or both countries.

Each professor directs a hands-on project, which offten has students doing things similar to what would have been done in ancient times.

In past years, students have participated in Olympic games in a Greek coliseum and put on Greek tragedies in theaters where similar plays were seen centuries ago.

While on the expedition, students are usually spread throughout five of the sites. Students then have access in the afternoon to explore the site they are staying. In the evenings, the faculty give lectures on the ancient civilizations.

"We don't need pictures and descriptions of the theatre of Zeus on Olympia," Williams said. "We believe, we tell it ourselves.

Curtis said one of the best aspects of her trip was having professors from numerous fields learn from, By having professors of art history, philo-

Bridal show provides solutions for wedding plans

Rhonda Sciarras
Daily Egyptian Reporter

Shelley Clark is in the middle of planning one of the biggest events in her life.

"The junior in chemistry from Carbondale will get married this September after getting engaged a year ago. The month before then will be filled with tasks including finding a dress, deciding on a place to have the wedding, a disc jockey and a caterer."

"I have yet to get to the point of becoming stressed yet," she said, "but I probably will soon."

The ninth annual Bridal Extravaganza, which took place at the Student Center Saturday, provides vendors a place to show off clothing, music and formal wear for their big day.

Susan Coriasco, assistant director of the Student Center, helped coordinate the bridal show and began planning weddings and receptions at the Student Center nine years ago. She has helped coordinate anywhere from 20 to 30 weddings or receptions at SIUC each year.

"We want it to be special for them. We want them to feel like they can come in here and have a good time," Coriasco said. "A wedding is a one-shot deal."

Jerry Taylor of Carbondale makes a living out of weddings. "What she says is one of the most important days of any wedding - the cake," Taylor began planning wedding cakes in 1982 for her family and it eventually evolved into a profession.

"People like the taste of cake and it is the showpiece of the reception," Taylor said. "Making cakes is an art for me. It is something I truly enjoy."

As a bridal consultant, Abby Pechan rendered a wedding gown. "I used to come to the bridal show to help her friends' grooms ideas before her friends' weddings."

"I probably did more errands than she," said Fred, a junior in journalism from Carbondale. "I got my bridal gown, and I was always getting it out and holding it up."

Paul Frenzke, a senior in chemistry and textiles from St. Louis, donned a tuxedo and modeled formal wear during Sunday's show for a local bridal shop.

"This is what I like doing when I'm not taking for a midterms," Frenzke said. "It brings back memories of prom. I miss you find sweet.

For Coriasco, along with planning the weddings come the pre-wedding frets, the photo-shoots, the wedding gift, the disc jockey who comes late and other small-scale disasters. Weddings1stool.

"I see you change in the dress, their colors, and their tastes," Coriasco said. "However, Coriasco said seeing all of her students work in a meaningful experience for each couple is the most rewarding.

"It is street finding when they see your things change," Coriasco said. "I make it happen in a good feeling. It must be. That's why I keep on doing it."

**POLICE CONTINUED FROM PAGE 1**

Field operations and investigations are coordinated with the Operations division and administrative services, and support services are carried out by an administrative division.

The changes will increase the amount of supervision that are on the street, rather than having agencies spend more of their time in the department doing completing administrative work. Proby said the change in organization is amongst the things he wanted to do in a way to improve the department. Since becoming police chief in April, Proby has produced many changes in the department and in the city. The presence of the police on the streets when students stand in the street is positive and non-aggressive, which is vastly different from years past.

Also, since becoming police chief, Proby has removed questionable-looking people in the local baseball field and is switching the department to new uniforms.

Although the City Council did not have to approve the changes to the structure of the department, it did change a residency requirement for the new police chief - choosing a city resident, all city personnel who are in an executive position under a given per-capita are required to live within the city limits within six months of being hired or promoted.

Without the approved change, the ordinance would require the deputy police chief position, which falls in the given per-capita, to abide by the residency requirement.

The council voted 3-2 to allow the person who fills a new deputy chief of police position to live outside of Carbondale city limits.

Conradson Brad Cole did not approve of the change in residency requirements, but does approve of the changes in the department.

"The police department is doing a great job, but there who protect and save a community should live in the community," he said.

The previous exceptions were only for police lieutenants and the assistant/first chief.

The changes in the department should occur in the next two weeks, according to Proby. Proby said the department is in the process of taking internal applications for the position and will fill the two positions with present staff.

**Enrollment CONTINUED FROM PAGE 1**

The enrollment increase.

"Instead of just automatically canceling people when they do not pay a bill and such, now we give them a call," Proby said. Vale Mitchell, chief academic advising for the College of Mass Communications and Media Arts, said wonderful faculty and top-notch programs have advanced enrollment at Carbondale's campus.

Mitchell said enrollment program involving educators from Chicago-area schools in the fall was successful.

"We welcomed Chicago-school educators into the pep band and several students, as well as faculty," Mitchell said. "The next day was filled with programs and introductions to our students and faculty."

"They really got a positive feel for SIU and hopefully they went back to their schools, encouraging students to apply here," she said.

Mitchell said the growth job market in communication may have the enrollment increase.

"The college that increased its enrollment for the third time in a row was given an extra funding the past three years for enrichment efforts."

New coins distributed at Wal-Mart

Golden dollar yet to make much of an appearance on campus

David Osborne
Daily Egyptian reporter

Consumers can find plenty anything they want at Carbondale's Wal-Mart, and now that includes the new Golden dollar coin.

An agreement between the U.S. Mint and Wal-Mart Stores Inc. allows customers to obtain the new dollar coin change from purchases made at one of more than 2,300 Wal-Mart retail stores and Sam's Clubs nationwide beginning Jan. 30.

The Federal Reserve System began shipping the new coins to commercial banks Jan. 27, but because of a trickle down effect, area banks are not expected to receive the coins until early March.

The new coin, authorized by the United States Coin Act of 1997 to replace two of the coins, was launched in October 1999. The Susan B. Anthony dollar, and meet an increased demand by the vending industry and transit systems for a one-dollar coin.

The law required the new coin to be gold and have features on the edge that would allow it to be easily distinguished from other coins by touch alone. The features include a smooth edge like the nickel and a wide border.

The new dollar coin is the same diameter as the Susan B. Anthony dollar and has a similar electro-magnetic signature allowing it to be immediately used in machines designed to accept the Susan B. Anthony.

Mike White, a public affairs officer of the U.S. Mint, said while it approached more than one retailer with the distribution plan, Wal-Mart came back with the first proposal that met the plan's goals.

"That's the first of a whole new practice, the ability to build a plan where we can begin to roll out the coin," said White.

Solutions
NCAA failing to clear eligibility

The announcement was met with indifference by Michigan State coach Tom Izzo, who said a lengthy delay before Richardson was ruled eligible.

America’s Cup match without U.S. entry

The announcement was met with indifference by Michigan State coach Tom Izzo, who said a lengthy delay before Richardson was ruled eligible.

Prada, overtaking from stern, was required by rules to hold a proper course; America One as well. Both could keep both sides flagged on-water umpires, claiming the other transgressed. A penalty was assessed on Cayard, requiring him to perform a 270-degree penalty course.

A severe wind was a loss and instead of tied at 2-2, America One was up 3-1. Cayard insisted it was a bad call by the umpires, hastily made at a key moment in the race.

America One, on the ropes, fought back valiantly with three straight wins in difficult conditions and strong winds but the comeback came too late. If it were a best-of-seven series, like the one Conner raced to victory in 1983, Cayard would have won the Louis Vuitton Cup at 4-3.

But it was best of nine, and the loser’s world championship. One winner in eventually gave way to moderate breezes and strong winds in the was, Prada’s best condition.

Prada tactician Torben Grue, working toward the advantage, went conservative and let the boat work its magic. The Salukis, who as the 75-tonne former-foiler forged up the course, were at the mercy of the better-boat, the more-practical crew, the fresher skipper.

Prada, with its $50-million-dollar budget, and 12 years of preparation, with an on-board team that could devote minds and bodies exclusively to killing, not fund raising or running a business, didn’t know how to lead and extended on each leg.

Cayard took his lumps and alone. Will he be back?

I’ve been in this game long enough to know you never say you’re out of the game good at and what I do. Sorry, honky,” said the skipper with weary smile, glancing that the man knew and she, their two little gals.

With the Missouri Valley Conference Championships around the corner, SIU mens track and field head coach Bill Collum says determining how it is the most challenging part of the equation.

"We put some old things," Collum said. "We are not the balanced enough."

Once again, the distance runners and distance relay relay team were the only major point contributors for the Salukis this weekend at the Valley Championships, where the Salukis finished fifth overall. Northeast Indiana University won the meet with 113.5 points, followed by Ball State University (98) and Eastern Illinois University (95.5).

The Salukis scored 75.5 points and finished first among the 17 teams.

"I thought it was a pretty good meet," Collum said. "We were a little bit ahead of what we expected."

Collum said the balanced team is "on the right track to doing great things."

"I'm happy with the way they are doing," Collum said.

"We need to see everyone come together as a team," Collum said.

The Salukis are weighing down SIU's chances of making it to the NCAA Championships.

"We need to get more depth," Collum said.

"We have to get more depth, we need to get more depth," Collum said.
