Local AAUP Proposes SIU Judicial Committee

The SIU chapter of the American Association of University Professors last night announced its support for the proposed establishment of a judicial committee which would investigate individual student problems. As proposed the committee's purpose would be two-fold.

First, it would review appeals from students concerning disciplinary decisions made by the campus dean of students.

Also, the committee would review requests made through the dean for changes or additions to University rules governing student non-academic conduct.

Charles Stain, Department of Economics and chairman of the local chapter's committee on student concerns, said the SIU chapter had not yet approved Section 3 of the National organization's proposal which advocates the setting up of a model of court procedure for serious offenses.

Panelists for the discussion included: George McClure, Department of Philosophy; Wilbur Moulton, dean of students and Stuart Novick, student and administrative assistant to student body president Ray Lenci.

Also presented was a proposal for a campus ombudsman, and a general outline of the role discipline plans in the student-administration relationship.

The committee as proposed would consist of members of the student body and the faculty.

Novick said students would be interested in such a committee if it were required in advance that any action contrary to the committee's recommendation would have to be accompanied by a written explanation from the vice president who made the decision.

Before such a plan could be put into effect it would have to be voted upon by the faculty and administration and receive approval from the Board of Trustees.

By John Durbin

The overcrowded conditions of the Oasis and Roman dining rooms in the University Center have become a growing problem this quarter.

The primary cause of this overcrowding appears to be due to a great number of "sitters" taking table space away from persons who come to eat. A worker in the cafeteria explained Monday there were 21 tables of persons who were only conversing with one another.

Many who have purchased their food are forced to stand and hold their trays until a seat becomes vacant. According to Ronald Rogers, manager of the food service, the only solution to the existing problem is in the hands of the students themselves. "It is a matter of common sense that when a person is studying, and another is seeking a place to eat that the "sitter" give up his seat," Rogers said.

The manager said that "sitters" are not approached by cafeteria personnel to give their seats because they pay their activity fee the same as everyone else and are entitled to sit in their dining hall.

Gus Bode

Rogers said he had hoped the availability of the second floor for studying would take off the pressure. "It has worked to a certain extent. But during the peak hours of breakfast, lunch and supper there are still too many people and not enough tables.

One of the chief complaints about the crowded situation is that after a person patiently waits for a place to eat his food, it is cold and unappetizing.

The food service manager stated that the cafeteria was definitely not too small to accommodate those wishing to eat. "But counting in the number of "sitters", the cafeteria is unable to provide enough room."

Rogers pointed out that this problem is always worse at the beginning of each quarter and during bad weather. "At the first of each quarter students congregate in the cafeteria to discuss last quarter's grades and their professors for the upcoming quarter," he said. Bad weather has snowed the use of the outside patio to alleviate the heavy pressure during the peak hours, according to Rogers.

Although the majority of the students holding trays of food wait patiently for a vacant seat, there are individuals who will look pointedly at a "sitter" in the hopes of making him feel guilty.

Many of the individuals who study in the cafeteria do so because of the crowded condition of the Magnolia lounge, Rogers said. Students are found sitting on the floor of the lounge because of a lack of chair space.

The problem appears to be a permanent one or at least until the proposed student center addition is built. According to Rogers, "the new building will double the present eating facilities."

New Fire Procedures Follow False Alarm

Signs explaining fire escape procedures will be placed throughout Morris Library in the wake of a confusing false alarm in the building Monday morning.

Several hundred students were evacuated from the library at approximately 9:20 when an apparent malfunction in the building's fire detection equipment touched off the alarm.

Harold J. Rath, special services librarian, said that the building was cleared as a precautionary measure until SIU security police checked for any signs of fire. Rath said that by the time the staff and students were permitted to re-enter the library.

Several persons who were in the building when the alarm sounded said that they heard the buzzer but they were unaware of it was a signal to evacuate the building until library workers instructed them to leave.

A check with library officials showed that there were no signs in the building explaining the fire alarm system. In addition, there were only one or two signs describing how to report a fire in the building.

Rath said that Monday's false alarm showed the need for proper explanatory signs which would be posted in the library immediately.

Although several witnesses (Continued on Page 2)
Radio Station on Agenda

A plan for a student government-subsidized AM radio station may be submitted at Wednesday's Student Senate meeting, according to student body president Ray Lenz.

Lenzi said a group of student senators and other student government personnel have been working on such a proposal.

The University currently operates WSUI-FM, an educational radio station, along with an educational TV station. Lenzi also said the form of a questionnaire on women's hours will be considered for approval at Wednesday's meeting. If approved, the questionnaire will be distributed beginning Thursday.

Last week the Senate passed a resolution regarding a new survey of student opinion on women's hours, based on the belief that students wish to see some changes.

A committee of senators will be appointed Wednesday to study the entire structure of student fee collection and use, at the request of William Moulton, dean of students.

Lenzi said the study will cover such areas as medical care, athletics, and housing fees.

The Senate will discuss a proposal by the two Carbondale taxicab companies for an increase in rates.

Lenzi said Carbondale Mayor David Kenne has assured him that a student will be appointed to a city committee studying the rate increase proposal.

Recruiting for VISTA (Volunteers in Service to America) is underway.

At Health Service

The Health Service reported the following admissions and dismissals:

Admissions: Dennis Whatley, 510 N. Rawings; Roger Johnson, 510 N. Michaels; William Neustad, 510 S. University, and Vivian Turner, Home Economics Building, Jan. 5; Harold Down, 625 Green Acres Trailer Court, Jan. 6; and Karen Jones, B132 Woody Hall, Jan. 8.

Dismissals: Georgia Dorris, B140 Woody Hall; Gary Willis, Baptist Foundation; Russell Swallow, Route 1; and Wayne Pears, B172 main hall, Jan. 7.

VISTA Recruiting Seeks Students With Varied Skills

Talents of SIU students that could be useful to help eradicate poverty in the United States are being sought through Thursday of this week in a VISTA recruitment program at the university campus.

Lindsey Scott, Dorothy MacColl, and Jef Fitzgerald, all of the Washington branch of the VISTA corps, and David Steinbraker, a former VISTA volunteer, will be holding interviews and answering questions about preliminary applications of interested students in room H of the University Center.

Scott said the only hard and fast requirements are that the applicant be over 18 and have no dependents. He also said the student will be carefully graded in relation to what the applicant actually has to give that is useful.

According to Scott, useful qualities would include any type of volunteer social work as well as training in home economics, psychology, sociology, education, and many other fields.

"In VISTA the students can spend a year or two getting experience and gaining perspectives that will help them decide what they'd like to do. We don't worry about the draft," Miss Fitzgerald said.

The VISTA team will present the Academy Award-winning film, "A Year Towards Tomorrow" and "While I Run This Race" at 12:30 and 4:30 p.m. every day in the University Center.

Scott said the team would be available to groups for discussion through Thursday.

Judicial Board

To Rule on Nix

A campus judicial board will decide Wednesday at 7:30 p.m. today in the Student Government office in the University Center whether to seat Dennis Nix on the Student Senate.

Nix was elected to represent the junior class at the closing of the election process. His election was contested because of a letter to the editor he wrote which appeared in the Daily Egyptian just before the election.

Student body president Ray Lenz and vice president Richard Rider have recommended that Nix be seated.

First SIU President

Robert Allyn was inaugurated as first president of SIU at a dedication ceremony for the first building on July 1, 1874.
Candy sales, sponsored by Illinois Association for Childhood Education, will be in Room H of University Center from 8 to 5 p.m. SIU Sport Parachute Club will meet in Room D of the University Center at 8:30 p.m.

Collegiate FFA Chapter will hold a membership meeting in the Seminar Room of the Agriculture Building at 7:30 p.m.

The SIU Pre-Medical Pre-Dental Society will meet in Life Science Auditorium at 8 p.m.

Scientific Advances of 1967 Will Be Reviewed on Radio

A review of some of the scientific advances of 1967 will be presented today on BBC Science Magazine at 7 p.m. on WSIU-FM.

Other programs:
10 a.m. Pop Concert.

1:30 p.m. News Report.

2:30 p.m. This Week at the UN.

5:30 p.m. Music in the Air.

7:30 p.m. Vietnam Perspective.

8:35 p.m. Non Sequitur.

Motorists Beware

The hazardous crosswalk on Campus Drive (see editorial of Dec. 5) has not yet been corrected, and with the icy winter weather, motorists may be the crossing's first victims. The pedestrian crosswalk is the main crossing on Campus Drive used by students as access to the north side of the Technology Building complex.

The north end of the pedestrian crossing, feeds directly, into a much-used driveway servicing the offices of the Departments of Journalism and Printing and Photography, the Daily Egyptian and a blue-sticker parking lot.

With both students and cars using the same driveway, the threat to life and limb is obvious. Pedestrians must use a driveway for walking, and motorists are frustrated by having to inch their vehicles through crowds. But even more pressing is the problem concerning motorists traveling east on Campus Drive making a left turn into the driveway.

These motorists have their view of the left lane of traffic almost entirely obstructed by the "yield-to-pedestrian" sign located in the middle of Campus Drive.

With the tasks of watching out for student pedestrian sign itself and keeping tabs on the flow of traffic in both lanes, the motorist is totally confused—and understandably so.

Will the University architects and the physical plant wait until someone is seriously injured in connection with this crosswalk before the situation is corrected? 

Margaret Perez

Rights and Youth

Now and again a sociologist or political scientist takes a systematic look at how well high school students understand our basic American civil liberties. The conclusion, almost invariably, is: Not very well. The inference can fairly be drawn that, though there may be exceptions, the public schools are doing a poor job of education in this vital area.

This view is newly reinforced by the report of a survey made by Dr. John C. Pock, an associate professor of sociology at Reed College in Portland, Ore., among high school seniors in the Portland area. Some 3,000 of them answered a questionnaire based on legal cases or situations. The results, said the sociologist, "offer little comfort for those dedicated to civil liberties or for those believing that the school should be the principal agency for producing a citizen capable of putting the principles of civil liberties in action.

As one dispatch put it, Dr. Pock "found that the students, when confronted with situations in which they have been violated, approved the use of improperly gathered evidence, secret trials, search without probable cause, setting of excessive bail and the use of anonymous witnesses."

This is not unusual, the Reed College professor says, his findings jibe with other studies which suggest that only one out of five young Americans knows what the Bill of Rights is.

This is a matter that ought to be of utmost general concern. That is too much to expect, it is not too much to expect that all who recognize the vital importance of basic constitutional rights—freedom of speech and assembly, due process of law, and the rest—will do all they can to improve the teaching of them. The continuing health of our society depends in large measure on how well young people understand these rights.

From the Jefferson County Journal, Adams, N.Y.

Letters Welcome

It is the policy of the Daily Egyptian to encourage free discussion of current problems and issues. Members of the University Community are invited to participate with members of the news staff in contributing items for this page with the understanding that acceptance for publication will depend upon the limitations of space, the apparent timeliness and relevance of the material.

Letters must be typed, preferably typed and should be no longer than 250 words. Contributors should respect the generally accepted standards of good taste and the rights of others and are urged to make their point in terms of issues rather than personalities. It is the responsibility of the Egyptian to select the material to be used.

Word of Praise To Registrar

To the Editor:

When someone makes the slightest improvement in the overwhelming bureaucracy at the University, lavish praise must be given to those responsible.

After having attended Southern for nearly four years, I have seen the waiting lines for administrative work in general increase, the general administrative bumbling generally increase with each additional year.

I was especially pleased with the improvement in the procedures required to add and drop courses now understood by the members of the office staff that works through less than an hour from start to finish and I observed many other improved speedy service. Perhaps by now the procedures has broken down and the lines are waiting in line to Makanda, but Tuesday morning, all seemed to be well.

Newcomers to Southern may not fully appreciate the significance of a student completing the add-drop series in less than an hour, but old timers here will recall all day run-around which usually didn't accomplish anything.

The ever present bureaucracy which seems to engulf universities is not easy to overcome. The praise for eliminating some of it here at SIU should go to Dr. Robert A. McGrath, our Registrar.

I am sure that the procedures worked out by him and his staff were were not worked out over night. Maybe it takes four years for any administrative procedure to get unburdened, but in any case I was very gladdened by the fact that I was able to get my add-drop forms turned in without unnecessary delay.

Perhaps other administrators will follow the lead set by Dr. McGrath and eliminate some of the unnecessary details that seem to overwhelm most students here at SIU. Perhaps awards should be given to deans and administrators instead of students at the annual awards Convocation. In any case I would totally get my note for the "red tape killer of Winter Quarter 1968."

Brian J. Treusch

French Rollback

The French nation, people and leader, ever alert to the cause of la gloire, have recently unveiled a train that can travel 100 miles an hour—a good clip, as French headwaiters/chefs garde-manger customarily say of American visitors.

Egalitarians will be forced to admire this latest exploit of Gen. de Gaulle. It is a good reason why he is happy about modern times and their willful disregard of French logic, French general concern. But who would have thought he'd begin his resignation earlier and happier epochs by uninventing the wheel?

From a Washington Star editorial

Briefly Editorial

Put together the two latest political polls and you will see that General Eisenhower is pointing exactly to the kind of decision which the Republican National Convention will almost certainly have to make this year.

1. Newseum magazine reports that Richards and de Gaulle, as you will see that General Eisenhower is pointing exactly to the kind of decision which the Republican National Convention will almost certainly have to make this year.

2. The New York Times reports that in a widespread survey of Republican leaders and observers, Gov. Nelson Rockefeller is found to be the only GOP presidential possibility who could defeat President Johnson.

From the Christian Science Monitor
Area Must Have Industry, Tourism

By Candace Dean

It is ironic that one of the richest states of America should have one-third of its territory undertdeveloped, its people poorly educated, that one-third of a state is not the wastelands of Alaska nor the swamps of Georgia, but the Southern third of Illinois.

The southern part of Illinois was the first area of the state to be settled. The settlers considered the heavily wooded areas to be agriculturally more productive than the prairies to the north. They considered the absence of trees a sign of unproductive land and the prairies a harborer of malaria. By 1830, they realized the error and began migration northward. The population decreased from 64 per cent of the state's total in 1820 to 27 per cent in 1840.

Cairo, Illinois, was supposed to be the great inland city, but with the completion of the Illinois River-Lake Michigan Canal in the latter part of the 1800's, Chicago undisputably became the most important shipping and marketing port in the state. Railroads were built through Chicago and it became a major railroad center.

Central Illinois offered fertile farm soil, and Chicago offered the promise of jobs for the anxious, no matter how low-paying. Southern Illinois was wounded badly by the drain, and it never recuperated. It never regained its population, nor did it ever attempt to instill new life into its economy by finding a way to profit from or explore its potential of becoming a wealthy section, but little has been done about it.

Coal Industry Decline

The coal industry temporarily served as a shot in the arm for southern Illinois by providing jobs for miners. The mining, which didn't begin until after 1900, declined after World War II and caused more unemployment. Some mine workers became welfare cases, and their families became part of the stagnant poverty-stricken class forced by destitution to abandon school and get any kind of job, no matter how low-paying.

This was followed by moves to the North, by those who could. Southern Illinois began to lose her youtha, especially the educated.

The mining of bituminous coal did bring new industries into the area, but it did not continue; the mining industry never brought any real new and permanent employment for the available labor of the area. There was, in effect, a complete reliance on the coal industry, and the whole class of the minds, there was a more devastating economic decline in the region.

Southern Illinois can boast of many natural resources—coal, oil, gas, lead and zinc among them. What else does an industry seeking a location look for? Water resources and power are plentiful in southern Illinois, surrounded by three sides by rivers, the Ohio River, to the south, discharges more than 15 billion gallons of water a day on the Wabash, to the east, has a minimum flow of one billion gallons and the Mississippi River to the west is the state for a major water way.

Three power plants: at Grand Tower, Horsenville and Joppa, provide much power for the area.

Southern Illinois is a territory with potential for becoming economically independent, and at least capable of building a poor area into a prosperous milieu of wealth as the northern part of the state has done.

Education Inadequate

The education of her people must be brought to a higher level. A 1960 census showed that the average number of school years completed by men 25 years and older in 16 southern Illinois counties was roughly 8 years. This means most of the managerial jobs are filled by outsiders hired by companies to move into the area.

Something must also be done about the minorities of southern Illinois, those races and nationalities which are "kept in their place" by the rest of the residents. In 1960, 53.6 per cent of non-white employed males were recent arrivals or workers who only 15.6 per cent of white employed males were of the blue-collar status.

Southern Illinois has been isolated, and the reluctance of her limited number of capital holders to invest in new industry and their unwillingness to cooperate to attract new industry is another major factor in its stagnation.

But progress is possible. One only has to consider Southern Illinois University as an example of this. From 1950-1960 Carbondale grew by 34.3 per cent, five times faster than any other city in the southern counties. The University is a stimulating industry for the employment problems of the area. The 830 employed faculty and staff of 3,300, SIU is a means of employment as well as a center for most of the cultural events of the southern part of the state.

Yet, even though the city has increased at such a fast rate, the attitude of presentment rather than cooperation still exists among the townpeople toward the University.

It seems the isolation of many years and the pride of the people stand in the way of real progress for southern Illinois. In the case of SIU and Carbondale, both have much to gain by mutual cooperation and progress.

Rend Lake, which is to be completed in 1970, will help provide more new jobs for southern Illinois, but it should not be thought of as the answer to southern Illinois' economic problems. The lake will embank 18,900 acres with a 162-mile shoreline. It will be situated in Franklin and Jefferson counties and be easily accessible from Interstate 57.

The new man-made lake will be a step toward turning southern Illinois into a tourist attraction. It will provide recreation enjoyment.

The lake is a major step in shaping up southern Illinois and putting it in the same class with many resorts of Wisconsin and Michigan. It also means a new water supply and a help for flood control.

Southern Illinois does have a hilly terrain and its land is most scenic. With 25 per cent of the land in forest, lakes that offer the pleasures of water sports would be ideal.

Southern Illinois does have potential for industry, but it requires a tourist's paradise catering to campers, fisherman and hunters is preferred, or more practical, then perhaps this will fill the role of recreation, the area temporarily. But the real cure lies in a sound, stable, industrial base which southern Illinois now lacks. Complete reliance on tourist trade as an industry would be as bad a mistake as previously relying on the coal industry alone.

Southern Illinois has in the past insisted on relying upon the coal industry for employment. This coupled with its marginal farming and lack of a shift from primary production and manufacturing to providing services has kept the area economically below the rest of the state. All have been major factors in its stagnation.

Area isolated

"Isolation of the area, distance from market centers, and lack of local community aggressiveness for new industry have retarded the growth immensely."

Southern Illinois could be developed into a thriving territory, Industry and a broad case of employment is needed, as is ready access to other parts of the states. More education, and its consequent enlargement of the middle class, also is essential.

If a-do nothing attitude continues, Southern Illinois will be passed by as the rest of the state progresses. But with enlightened leadership, it could become prosperous and successful. The potential is not lacking. Exploitation of that potential is,
2 Films Receive Awards

The two motion picture films produced by the Film Production Unit at SIU have been presented Golden Eagle Awards by CINE, a national committee which selects top American-made films to represent the United States in international film festivals.

The awards were presented in ceremonies in Washington, D.C., on Nov. 17.

The first film, "World Population 1,000 B.C. to 1965 A.D.," is an animated film which depicts graphically the increase in world population over the past twenty centuries.

It was selected for showing at the 9th International Competition for Short Films in Barcelona, Spain; the 9th International Review of Films on Social Documentation in Florence, Italy; and the 20th International Film Festival in Salerno, Italy.

It was also selected by CINE for showing at the awards ceremony in Washington as an example of an award-winning film. The film was directed by Howard Cotton, assistant director of the SIU film unit.

The second Golden Eagle film is titled "Vergette Making a Pot." It shows the work of Nicholas Vergette, SIU associate professor of ceramics and a nationally noted authority in his field. It was selected for showing at the Salerno festival and also was cited for excellence and shown at the San Francisco International Film Festival.

Alumnus, the official SIU alumni magazine, has taken on a new look this year.

"We felt that the contents simply didn't keep pace with the needs and interests of our readers," said Robert G. Hays, editor.

"With 75 per cent of our graduates having come in the last dozen years, more emphasis was needed on the here, now and why and less on the 'Old School Days,'" important as it may be.

Hays emphasized that the better alumni magazines are drifting towards topics of controversy, whereas the poorer magazines will emphasize news of past graduates.

"Purdue has an alumni magazine which contains a lot of class notes and personal columns," he said. "On the other hand, UCLA's magazine which received the award last year for best alumni magazine, goes into depth with its reporting.

Hays, who became editor of Alumnus in September, 1966, is the one-man stuff of the bi-monthly publication. He does the writing, layout and planning with the only help being that of a student worker who handles the class notes.

Originally, instead of having a one-man staff, records of Alumnus indicate that Pi Delta Epsilon, the professional journalism fraternity at SIU, published the magazine.

"Because of the hectic demands on one man performing various duties, it was difficult to initiate the in-depth kind of reporting we sought," Hays said.

Consequently, the most obvious and immediate answer was reprints, he said.

"By concentrating on reprints for two issues, we were able to work far enough in advance to begin to get good original material for coming publications."

For example, the November issue emphasized an "on the spot" report on the beginnings of the revolution in Nigeria by J. Joseph Leonard, a member of the SIU Department of English.

"The cover of Alumnus usually coincides with the main article," Hays said.

In the November issue, Hays obtained a picture from an old African travel book and enlarged it for use in Alumnus.

One problem which Hays faces with the Alumnus is keeping up to date with the alumni.

Although Alumnus emphasizes in-depth reporting on controversial issues, there is a section which concentrates primarily on activities of past students.

"Information comes from virtually every source," Hays said.

Information cards are obtained when alumni pay dues to the Alumni Association. Other sources of information are public relations, military service and news service releases, according to Hays.

In the future, readers of Alumnus can look forward to reading more in-depth reporting, Hays said. For example, a man-on-the-street view of the 50th anniversary of the Bolshevik Revolution by Bob Allen, an SIU alum whose works at the Library of Congress, is scheduled for the January issue.

An article on the student teaching program at SIU is planned as the lead article for the March edition.

"Attempts at greater depth spilled over such sections as sports coverage are also planned for the future," Hays said.

Hays, a journalism major, graduated from SIU in 1961. He worked formerly at a newspaper in Granite City and at the SIU Information Service.

Fourth Heart Transplant Patient Listed in Critical Condition

STANFORD, Calif. (AP) — Mike Kasperk's condition became critical two days after his heart transplant — the day after his falling heart was replaced by another — doctors managed to halt internal bleeding that threatened his life.

They said his new heart appeared to be functioning "well."

Doctors at Palo Alto-Stanford Medical Center said Kasperk was conscious, the bleeding from stomach and intestines two days after the operation stemmed from liver disease, they said.

They said the many complications suffered by the 54-year-old Air Force veteran "severe but tolerable."

He had been operated on in satisfactory condition, and was expected to be out of danger by the day despite expected difficulty, in breathing.

Kasperk's condition became critical when the bleeding began and blood transfusions and other measures apparently stopped the bleeding.

Kasperk's operation was performed in a mid-afternoon bulletin.

Dr. Norman E. Shumway and a team of Stanford Medical School performed the transplantation Saturday night. They gave Kasperk the heart of a 43-year-old housewife.

The housewife, Mrs. Virginia White, had died about 24 hours after suffering a massive brain hemorrhage, a stroke.

In their bulletin, the physicians said Kasperk's prothrombin time, another index of blood clotting ability, was low, only 23 per cent.

They said his function was poor because of the heart condition which led to the heart transplant. Kasperk's heart had become fibrous and had grown to three times normal size, doctors said, in failing attempt to pump blood.

Kasperk received fresh blood transfusions in a desperate attempt to save his life after the internal bleeding began.

Earlier, doctors said Kasperk had cattaped through the night and was communicable to nurses who read his lip movements. He was unable to talk because a tube had been inserted in his throat to help him breathe.

Johnston Gains in Polls

WASHINGTON (AP) — Two public opinion polls released Monday that President Johnson is in a four-way race he was riding a new crest of popularity with the favorite over all four leading Republican presidential contenders if the election were held now.

This is a reversal of the situation two months ago when a Harris survey indicated that any one of the four GOP possibles could defeat the President.

The Gallup Poll reported that in a two-way race John-

Johnston and Eshkol were talking, new wires at the ranch chattered out reports that Jordanian artillery had cut loose across the Jordan River at Israeli settlements on the Jordan side and Israeli je t fighters flashed into action to silence the guns.

This appeared to be in a way Eshkol's contention that his country is up against a dangerous rearmament by Russia of the Arab neighbors Israel had overwhelmed in a six-day war last June. The Prime minister is using this position as leverage behind a pending request to obtain 50 F-4 Phantom jet fighters from the United States.

U.S. Resumes Talks With Chinese

WARSAW, Poland (AP) — Envoys of the United States and Communist China met Monday for the first time in seven months and discussed for more than two hours the "positions and intentions" of their governments.

The 134th session of the Warsaw ambassadorial talks was marked by frank and serious discussions on a number of problems which faced the United States and the Chinese People's Republic, U.S. Ambassador John A. Gronouski told newsmen after the meeting.

The talks are the only direct official contact between the two powers and details never are divulged.

Gronouski, former U.S. postmaster general, said: "I hold these talks to be invaluable because they provide a private forum for both sides to state and clarify their positions and intentions.

"We continue to hope that these meetings can serve to reduce tensions between our two countries and ultimately throughout East Asia," he added.

Gronouski said the next meeting will be held on May 29.

The discussion partner of Gronouski at this session was not his Chinese counterpart but instead the Chinese Embassy charge d'affaires, Ch'en Tung.

Speaking through an interpreter, Ch'en told newsmen: "Owing to administrative reasons our ambassador Wang Kuo-Chuan has not been able to return to his post in time for this meeting. As a provisional measure our government has delegated me to attend." Wang left Warsaw in midsummer and has not returned. "Because of Ambassador Wang's continued absence we agreed to meet this time with Mr. Ch'en Tung," said Gronouski. "I will meet next with Ambassador Wang on May 29.

Both representatives refused to answer newsmen's questions on contents of the talks. Asked if there were any light moments during the two hours and ten minutes of talks, Gronouski replied: "We smile occasionally."
New Regulations Improve Student Services

By Dan Van Att

The SIU Social Senate, a branch of the Activities Programming Board, has had difficulties establishing firm room regulations this year, however, steps have been taken to move forward. The Senate from toppling into the crowded domain of useless student regulations.

Gag B. Hartlieb, president of the Social Senate, commented on the progress from the top—Wilbur Moulon, dean of students—in balance of the newly-revised Social Senate regulations.

"We feel that they (the new regulations) will help us provide a more effective service to the students," said Hartlieb. "We intend not only to approve or disapprove funds—raising activities but also to make the scheduling more effective."

"We have made a call for an advance notice of three weeks for all money-making activities of the associations. The notice is to come in the form of a petition, which is to be picked up and returned to the Student Activi ties Board."

"In the past, the deadline on petitions was one week," said Hartlieb, "but this was being ignored. We finally decided to come up with a more realistic plan or do away with Social Senate."

According to the new rules, a student association must petition for a money-making activity could be penalized with anything from a letter of warning to loss of University recognition.

"The three-week notice is not unreasonable," said Anthony J. Giamnelli, coordinator of Student Activities.

Deciding on complying failure of groups to meet the deadline will be determined by students on the Senate. Each case will be viewed individually, on the basis of the seriousness of the offense."

The list of new regulations, which is available at the Student Activities Center, states that a group failing to meet the deadline may send a member to the Senate before the request is acted upon by the Senate. If actions concerning it. Also, petitions must be approved before any publicity is released.

Education Instructor to Receive Award for Distinguished Service

George S. Counts can add another award to his list of honors which he receives the American Association of School Administrators' Award For Distinguished Service Medal at the AASA's Atlantic City Conference in May.

Counts, distinguished professor of education at SIU, was named for the award by the association's executive committee. Previous honors include Columbia University's Distinguished Service Medal in 1964, election to membership in the select National Academy of Education founded in 1967. Award for Distinguished Education Wins National Travel Writing Contest Award

John T. Opel, editor of the Boca Raton News and a resident of Florida, has been named winner of a national travel writing contest for weekly newspapers. The contest was sponsored to inspire local editors to tell their readers of travel adventures in the area, was conducted by SIU and the American Tobacco Company in support of the President's Discover America program.

Howard R. Long, chairman of the journalism department, and James M. Patterson, American Oil director of publicity relations, announced that Opel is the contest's national and Florida winner. Included in Opel's awards will be $1,000 as the national winner and $100 for the state first place. Opel's winning article was selected from more than 500 entries from weekly newspapers editors and writers in 42 states, according to Long, contest judge.

Florida Editor

Two SIU students facing charges Saturday in Circuit Court at Murphysboro.

Lewis A. Rose, 22, Carbondale, was fined $50 plus court costs and placed on probation for six months. He pleaded guilty to theft of property valued at $150 at Cousin Fred's.

Mark R. Ingalbe, 18, Streator, pleaded guilty to disorderly conduct and was fined $10 plus court costs.

New Baptist Center

A $1 million Baptist Student Union building was constructed adjacent to SIU's Carbondale Campus.

Area Farmer to Raise Heifers for SIU Farm

Robert B. Moody, a Murphysboro area part-time farmer who operates a petroleum products route for the Twin County Service Company, is raising dairy heifers for the SIU Dairy Test Farm. The decision to have replacement heifers raised under contract resulted from an SIU farm management study indicating that a dairy farmer with an operation of the size of the University's two-man Dairy Test Farm could use his time more profitably in milking additional cows than in raising his own herd replacements.

The dairy farmer used as a case sample for the management study. It showed the operator could add seven cows to his milking string and increase net farm income $1,187 under optimum conditions by buying rather than raising heifer replacements.

The Dairy Test Farm is a farm management unit run as a tenant-operated commercial dairy farm by the SIU School of Agriculture to test and demonstrate to the farming public management practices under actual farming conditions. Blaised Roper, who operates the farm with the help of his family and occasional hired help during peak labor periods, averages milk production of about 65 cows from a herd of 90 animals, including dry cows.

The barn contains 250 acres with about 800 acres used for growing forage and grain crops. He manages the herd on a dry-lot basis the year round. The per-cow average annual milk production for the herd is more than 12,000 pounds. Grade Holstein cows are selected for high milk output and good economy.

As a result of the SIU study, raising of replacement heifers on the farm was discontinued nearly two years ago. After using 'the replacement purchase price for more than a year, the idea of contracting for raising of heifers was started last winter.

After nearly nine months, Moody says he is pleased with the project. Roper and instructor William Doerr, supervisor of experimental and test farms for the SIU School of Agriculture, both say the results are promising.

Under terms of the contract, Moody furnishes all the feed, labor, shelter, and care for the selected heifers from the time they are six days or less old until they reach a weight of 950 to 1100 pounds at a normal rate of gain. He also picks up the calves at the test farm and will return the animals at the end of the period. Moore will receive 24 cents per pound for the gain in weight while the calves are on his farm. The terms also include provisions governing maintenance of animal health.

Moody is also allowed to buy all the bull calves and unwanted heifers at $2 per head for his own purposes providing they are picked up at the dairy farm as calves within a week of birth.

I.P. Brackett to Present Talk
On Proper Speech Stimulation

I. P. Brackett, chairman of the Department of Pathology and Audiology at SIU will be guest speaker at the monthly meeting of the Association for Childhood Education. The meeting will be held Thursday at 7:30 p.m. in the 3rd grade room of University School.

Brackett’s topic will be, “What classroom teachers can do to stimulate proper speech.”

On-Campus Job Interviews Slated

The following are on-campus job interviews scheduled at University Placement Services for the beginning of winter quarter. For appointments and additional information interested students may phone 453-2391 or stop by the Placement Office located at 511 South Graham, College Square, Building B.

Jan, 17

SWIFT & COMPANY: Operations research, sales, marketing, production trainees, advanced market research, purchasing, transportation, hatchery trainees, and sales promotion.

H. J. HEINZ: Sales representatives.

ILOINCE CENTRAL RAILROAD: Accountants.

KANKAKEE SCHOOL DISTRICT NO. 11, Kankakee, Illinois: All areas of secondary and elementary schools.

COMMUNITY UNIT SCHOOL DISTRICT 300, Carpenterstown, Illinois: All elementary levels, junior and senior high English and industrial arts.

Swine Nutrition Project

Moisture Object of Study

Whether hogs will finish out faster on less feed by using wet corn rather than dry corn in the ration is the object of a SIU swine nutrition research project.

The question developed from research results at other institutions indicating that cattle fed hydrated barley and milo rations showed increased average daily gain and feed utilization. Feeding cattle hydrated barley increased average daily gain and while swine are simple-stomached animals, they are classified with cattle as ruminants while swine are simple-stomached animals.

Some feeding of high-moisture corn to hogs has been reported, but there has not been any reported study of reconstituting the moisture in dry corn under controlled conditions, according to Joseph E. Burnside, SIU swine specialist who is supervising the project. David Hammel, SIU graduate student from Crossville, is doing the experimental work.

The storing and feeding of high moisture corn has become increasingly important to cornbelt farmers with the wider use of picket-shellers and larger corn acres requiring earlier and faster harvesting. For safe storage in most available holding bins on the farm or for marketing, the shellled corn must be at about 15 per cent moisture.

Usually the grain must be dehydrated with drying equipment because corn may be harvested at 20 per cent or may never dry below that in the field during rainy, cool falls such as this year. Drying is an expensive operation. Wet grain intended for feeding on the farm may be stored in some kind of airtight silo for a time without drying.

To assure good experimental controls, corn used in the SIU hog feeding experiment was dried to 10 per cent moisture content. Part of it was reconstituted to 20 per cent moisture and part to 30 per cent moisture by adding water and storing for a specified time in sealed plastic bags from which the oxygen had been removed by using carbon dioxide gas. Hammel says this created an inert atmosphere in which feeding-spoilage organisms could not grow to cause unwanted variable in the experiment. During the holding period, some fermentation of enzymes in the corn occurred in bags containing wet corn.

After the specified holding period, the shellled corn from the various groups of bags will be ground and mixed with other ingredients essential to a complete swine ration and fed to experimental pens of hogs for study and comparison with dry corn feed.

I. P. Brackett to Present Talk
On Proper Speech Stimulation

I. P. Brackett, chairman of the Department of Pathology and Audiology at SIU will be guest speaker at the monthly meeting of the Association for Childhood Education. The meeting will be held Thursday at 7:30 p.m. in the 3rd grade room of University School.

Brackett’s topic will be, “What classroom teachers can do to stimulate proper speech.’"
Renew Grants
Two Agencies For Training

Isaac L. Stockmeier, professor of microbiology at SIU, has received renewal of grants from two federal scientific agencies to support a program for the training of graduate students.

A $36,000 grant from the National Institute of Infectious Diseases and Allergy provides funding for research in virology and immunology, while the National Institute for Dental Research has increased its annual grant in oral microbiology for the training of graduate students.

Instructors Attend
Speech Convention

Seven faculty members of the SIU Department of Speech attended the annual convention of the Speech Association of America at Los Angeles.

CUPID IS HERE AT S.I.U.

Cupid Computer - smooching success at the University of Illinois for two years -- is now matching computer dates at S.I.U.

Facts About Cupid

Cross referenced - answer all questions twice - once for yourself and once to describe your date! You value the importance of each question!

Until June - perfect matches keep coming for five months!

Pretty last-first dates mailed to you 2 weeks after posting.

Inexpensive - only 54! Cupid is organized! Happy students - run for students!

Directions - read them - then fill out the questionnaire and mail to Cupid!

DIRECTIONS

The Cupid Computer questionnaire contains 25 questions which are multiple choice. Please choose one answer which best describes you. After filling out the form, you can place your choice in the box at the right in the column corresponding "YOU".

Then go back and answer the questions again - this time describing your ideal date. Notice that there are 5 boxes corresponding to each question in the column marked "YOUR DATE". The first box on the left marked 1st is reserved for your first choice. In this, write the number corresponding to that characteristic which you feel is most essential. Then move on to the second choice, enter the box to the right in the column marked "2nd". Next, select the question which ranks second in importance for you and place a 3 in the box to the right. Continue this process for your 3rd, 4th, 5th, 6th choices until all the boxes in the column marked "IMPORTANT" are filled. You should have used the known 1 through 24 inclusive.

E X A M P L E

If you are 21 years old and would prefer a date 22 but would accept a date between 21 and 26, you must answer question 1 as follows:

4. Age (in years):
   YOU: (1) 18 or younger (2) 19 (3) 20 (4) 21 (5) 22
   YOUR DATE: (6) 22 (7) 23 (8) 24 (9) 25 (10) 26

1. Sex: (1) Female (2) Male
2. Race: (1) Caucasian (2) Negro (3) Other (4) Other
3. Religion: (1) Protestant (2) Catholic (3) Jewish (4) Other (5) Agnostic (6) Atheistic
4. Age (in years):
   (1) 18 or younger (2) 19 (3) 20 (4) 21 (5) 22 (6) 23 (7) 24 (8) 25 or older
5. Height (in feet and inches):
   (1) 5' 5" or shorter (2) 5' 6" to 5' 9' (3) 5' 10" to 5' 12" (4) 6' 0" or taller
6. Weight (in pounds):
   (1) underweight (2) average (3) overweight
7. Physical Attractiveness:
   (1) underaverage (2) average (3) above average or good looking (4) beautiful or handsome
8. Color of hair:
   (1) black (2) brown (3) blonde (4) red
9. Length of hair:
   (1) short (2) average (3) long
10. Color of eyes:
    (1) blue (2) hazel (3) green (4) brown
11. Intelligence:
    (1) low (2) moderate (3) average (4) high
12. Age:
    (1) Freshman (2) Sophomore (3) Junior (4) Senior (5) Graduate
13. Sex:
    (1) Male (2) Female
14. Social status:
    (1) upper (2) middle (3) lower
15. Area of Interest:
    (1) Fine Arts (2) Humanities (3) Science (4) Social Science (5) Business
16. Importance of Importance:
    (1) very important (2) important (3) not very important (4) not important
17. Moral code:
    (1) very liberal (2) moderately liberal (3) conservative (4) extremely strict
18. Scope of readings:
    (1) wide (2) average (3) narrow
19. Drinking:
    (1) heavy (2) light (3) moderate
20. Smoking:
    (1) heavy (2) light (3) moderate (4) no
21. Dancing:
    (1) well (2) average (3) poor
22. Sexual Experience:
    (1) none (2) little (3) average (4) much
23. Dress and grooming:
    (1) neat (2) casual (3) well dressed
24. Sense of humor:
    (1) very serious (2) sometimes (3) serious (4) very funny
25. Political awareness:
    (1) unconcerned (2) average (3) interested

12. B.M. Hill was serving as an artillery forward observer aboard a U. S. Marine Corps battalion when the action occurred.

15. Hill received a bachelor's in accounting in 1964.

Oblisk Office Moves

The office of the Oblisk, the SIU yearbook, will move to Barracks H-IIa this year. The building is located in the second row of barracks, parallel to campus drive, west of the Agriculture Building. Oblisk phone numbers are 3-2607 and 3-2578.

Part of National Growth

Region Prospered in 1967

The year 1967 saw southern Illinois participating in the general economic growth of the nation, according to a SIU business research professor.

Arthur Ely Prell, director of the SIU Business Research Bureau, reviewed the economic picture in the lower part of Illinois during the past year based on a developing region on such tangible projects as (a) Franklin County Industrial Park; (b) Kaskaskia Development Project; (c) Rend Lake Development Project; and (d) development of the Greater Egypt Regional Planning and Development Commission and the establishment of growth centers in southern Illinois.

Prell said that southern Illinois still lags behind the average rate of development for the state and nation, and gave some positive factors which indicate the rate is progressing.

One big plus, according to Prell, is the excellent low record of work days lost through strikes and other interruptions.

“Another record,” according to Prell, is the excellent labor-management relationship in the area.”

Business Election

Elections for four-at-large representatives of the Business student council will be held from 9 a.m. to 5 p.m. Jan. 19. Polling places will be located on the first floor of the Classroom Buildings.

Petitions for the four seats are available at the School of Business and must be returned by Jan. 15.

City Editor from China

To Study at Southern

George Chu, city editor for the past three and a half years of the English daily China Post of Taipei, Taiwan (Formosa), has arrived in the United States to begin a study tour toward a master's degree in journalism at SIU.

Chu, who joined the China Post in 1961 as a reporter, had previously spent six years as an officer in the Nationalist Chinese Navy. During much of his service he held a liaison officer between the Chinese Special government and the U.S. Navy. Chu was particularly close contact with American forces during the late 1950's crisis over the Chinese offshore islands of Quemoy and Matsu.

A graduate of the Political Staff College in Taipei with a major in political science, Chu was the only one of his five brothers and five sisters who escaped mainland China in 1949 after the Communist takeover.

The relationship between the China Post and SIU dates from 1958 when Howard E. Long, chairman of the Department of Journalism, visited Taiwan for a seminar. The China Post agreed to send an editor of this publication while teaching journalism at Chenchu University in Taipei.

Long is preparing to leave for a monthlong tour of several countries in the Far East which will include a stop in Taipei.

$53,200 Project

Granted to SIU

A project grant totaling $53,200 in federal and state funds has been received by SIU's Rehabilitation Institute for modernization and improvement of its Employment Training Center for the Handicapped located in the Oriental Industrial Complex east of Carbondale.

Three-fourths of the grant comes from the U.S. Rehabilitation Services Administration and the remaining one-fourth from state funds, said Dr. Domestic Evans, director of the center.

The purchase of workshop equipment such as sewing machines, welding equipment, small tools and the like will amount to $31,852, and the remaining $11,348 is earmarked for the acquisition of audio-visual training equipment.

SIU Matmen Face Colorado State
In Dual Competition Wednesday

A strong Colorado State wrestling team will provide SIU dual men with their first dual competition of the season Wednesday at 7:30 p.m. in the Arena.

Colorado State has the advantage of experience in two previous dual meets before coming into the encounter. The Bears opened their season with a 20-19 upset win over defending national champion Michigan State and then pinned Northern Iowa, 17-13.

"Colorado State has a tradition of fine wrestling," commented SIU Coach Jim Wilkinson. "They had 84 up to tough to beat Michigan State."

The Bears, who return their entire starting lineup of last year from the 115 to 160-pound divisions, are capable at both ends of the scale. They are particularly strong in the lower and middle weights. Against Michigan State they won the 115, 123, 130, 141, 160 and 160-pound divisions.

Wilkinson admits that his Salukis are not as strong as they could be in the lower weights. "But if we can hold our own in the higher weights we're sure to give a good account of ourselves," he said. "All my wrestlers are tough enough."

SIU wrestlers recently finished among the top 10 teams of a 50-team field in the Midland Tourney at Las Cruces, N.M. Ed Massotti, with a time of 1:52.7 in the 200-yard breaststroke, was the Salukis' top performer of his career. Bill Noyes, who swims in the longer of the freestyle events, drew praise from Essick for his second place finishes in the 500 and 1,000-yard freestyle.

"Noyes gave us the best performances of his career in these two events," Essick said.

"I was also particularly pleased with the performance of John Holben," Essick continued. "He finished third in the 200-yard breaststroke with a time of 2:28.3, his best performance, and turned in 4:46.03 in the 500-yard medley. He gave us a terrific performance."

The Salukis combined for a victory in the 400-yard medley relay, with Tracey, Noyes and Mossotti turning in a time of 3:32.9 for the win.

The freshman tankers fared better at Oklahoma, storming to a 51-49 victory over the Oklahoma Frosh. The Frosh established a new freestyle record, with John Curran, Bob Schoos, Brad Glenn and Vern Dasch contributing.

Dasch took first in the 100 and 150-yard freestyle, with Glenn coping a first in the 200-yard butterfly and Henry Hayman winning the 50.

"Our big problems will probably be health and academics," he continued. "To win from now on, we've got to swim a little faster. We've got to come up with the competitive feeling."

14 Games Set In Intramurals

Fourteen games have been carded for today's intramural basketball action.

The schedule is as follows: 6:45 p.m. -- Sonic Boomers vs. The Dribblers, court 1, U. School; Road Runners vs. Boomer Broncos, court 2, U. School.

8 p.m. -- Rooster 3-Beavers vs. OW's, court 1, U. School; SalukiSwimmers vs. Wright Guards, court 1, U. School.

8:15 p.m. -- Chemistry vs. Tasmanian Devils, court 2, Arena; Cedar Mansion vs. Vet's Club, court 2, Arena; Beta Tau vs. E'Clat Hall, court 3, Arena; Omega vs. Alpha Chi, court 4, Arena.

9:15 p.m. -- Allen III vs. U. Park Staff, court 1, U. School; Last Bashers vs. Light I-Rebels, court 2, U. School.

9:30 p.m. -- English TA's vs. Beveridge St. Boomers, court 1, Arena; The Meatmen vs. French, court 2, U. School; Park Staff vs. Omega, court 3, Arena; Beta Tau vs. Alpha Chi, court 2, Arena.

The successful candidate must possess the following qualifications:

The ability to quickly learn and adapt to all phases of the meat packing industry.

The desire to develop as a leader in the area of management and decision-making.

The capabilities of advancing to responsible management positions.

Our company, a well-established and growing meat packer, has openings available in both management training program for young, aggressive and ambitious college graduates.

Fisheral or Masters Degree in Business or Agriculture preferred, but not essential. Top salaries, and excellent fringe benefits offered for those with outstanding academic records and management potential.

NCAA Considering Super Bowl To Compete For TV Receipts

NEW YORK (AP) — The National College Athletic Association and the Chicago Bears will play an own football Super Bowl to compete with the pros for the television dollar.

"This is just one of the several proposals submitted," Paul Brechler, commissioner of the Western Athletic Conference, said Monday after the first meeting of the nineteen NCAAs committees named a year ago to study the feasibility of a college football championship playoff.

"Our purpose is to find out if there is a workable plan and, if so, to submit it to the convention a year from now. It's found impractical, that's the report we'll make."

Brechler said he had been advised and accepted, Brechler, chairman of the committee said, it could be put into effect the fall of 1969. Brechler denied that escalating television monies were a factor in the NCAA's play-off interest—interest added. "We have to be practical. We know there would be television consideration. I have heard $15 million mentioned, but I wouldn't think of estimating what such games might be worth." The NCAA's decision will be dependent on the feasibility and the convention a year from now.

Some have already dubbed the possible game the NCAA's Super Bowl. "Other suggestions are that we hold the playoffs the first three weeks in December and have them over before New Year's," Brechler added, "but some insist this would take the luster off the bowl."

The committee chairman said the American Football Coaches Association, the official body of college coaches, had expressed opposition to a football playoff. There have been objections from other sources also been heard.

The Southeastern, Big Ten and Pacfic Eight Conferences are known to be strongly opposed to a playoff that would endanger the bowl. The bowl themselves are lobbying against the plans.
Salukis Beat Petrels, 63-52

By Charles Springer

Southern got a taste of its own medicine Wednesday night, swallowed it and still came up with a 63-52 win over Oglethorpe. The visiting Petrels, sporting a 7-2 record and the 17th spot among small college teams, made the salukis play their game for nearly 30 minutes before the SIU offense started rolling.

Leading by a slim margin of 10-9 after the first quarter, Coach Jack Hartman's forces outscored the visitors by 15-5 after hitting a field goal until after three minutes had elapsed.

Chuck Benson broke the spell at 16:35 with a one-handed dunk, and the basket at the end of the first half lowered the score to 34-31. SIU was never seriously contested thereafter.

Petrel Coach Bill Carter provided the highlight for an otherwise eventless night when he slapped with a pair of technicals with 3:40 remaining. Carter seemed to be headed for a third before Hartman calmed him down.

Garrett led the Salukis scoring attack with 26 points. The 6'-3" junior forward hit 9 of 15 from the field and five of eight from the free throw line. Garrett was 15th among NCAA free throw shooters in latest statistics. Next in line was Willie Griffin with 19, followed by Benson with 15.

The win was the fifth for the Salukis against four defeats. The next travel to battle with Kentucky Wesleyan in an 8 p.m. encounter Thursday at Owensboro.

Billikins Down Fresh, 87-84

The SIU freshman basketball team lost its second tough battle in a week when it bowed to the St. Louis University Billikins by an 87-84 score.

The Saluki yearlings had earlier on the season, only one of the better junior college teams in the country, by five points.

The difference in the game lay only 14-27, the basket lane where the fohit on only 18 of 32. The junior Salukis were outrebound 45-32.

The leading scorer for the Saluki freshmen was Tom McBride, who finished with 27 points to lead both teams. McBride hit on 11 of 16 from the field, but made only five of 10 from the field. The lead is in contrast to McBride's first game of the season when he hit on only 7 points.

As a team, SIU shot 50 percent from the field. The Billikins fished hit 52.4. Both teams sank 33 shots from the field.

The big game for the Billikins were Jim Irvin and Jim Bryan, each hitting for 24 points.

SIU shot now have an 0-2 record. The Billikins depart with a 6-1 slate. The next game for the Salukis is Thursday against the Kentucky Wesleyan freshman at Owensboro, Ky.

Gymnastics Clinic Plans Unaffected

A widening split between the Amateur Athletic Union and nation's collegiate coaches apparently will not affect a women's gymnastic clinic scheduled to meet here in February.

AAU officials have interfered with previous attempts to conduct training clinics elsewhere. They charge that the meetings, open only to members of the U.S. Gymnastics Federation, do not represent all amateur gymnasts.

Bill Meade, head of gymnastics at SIU, said Tuesday that the February clinic will be conducted primarily as an educational program and would meet with approval of the Federation of International Gymnastics.

The clinic is being conducted, according to Meade, to acquaint local gymnastics officials with the latest rules and requirements for compiling excellent scores. It will also make available U.S. judges for the 1968 Olympics in Mexico.

Frank Bare, of the USGF, declared in a Jan. 7 story appearing in the St. Louis Post-Dispatch that the AAU had attempted to impede cooperation between the two groups. Referring to efforts to stage a clinic for gymnastics officials last year in Arizona, Bare claimed that the AAU made it impossible for European gymnastics experts to attend.

Meade, manager of the 1968 U.S. Olympic team, says that the USGF is trying to prove that his group is the organization that is trying to improve gymnastics in the United States.

"Every time we attempt to conduct a clinic," he declared, "the AAU sends a wire to FIG officials saying that nobody knows about it or that everyone is allowed to attend."

The clinic will be conducted by a Scandinavian team, composed of players from Sweden, Finland, Norway and Denmark.
