Mace: Panel not rigged to pick Choate

By Ann Schottman
Daily Egyptian Staff Writer

George Mace, vice president for University relations, denied rumors Wednesday that the selection committee which recommended ex-legislator Clyde Choate for a University position was rigged.

"There are rumors the selection committee was rigged. That means that clandestine arrangements would have to have been made between me and all the constituency groups (represented on the committee)," Mace said. "I just don't think they would do that."

Out of eleven nominations for the newly created position of external affairs director, Choate was the only unanimous nomination, Mace said.

Mace said Choate learned of the position in a discussion between the two men during the first week in December. Mace also discussed the position with several other legislators while gathering information about future SIU-sponsored seminars for Illinois legislators, he said.

Choate was not the first person he discussed the position with, Mace said. "Choate was the farthest thing from my mind. I did not think he would be interested, because he had just been re-elected."

The Faculty Senate declined to name a representative to the search committee which recommended Choate until Mace had met with them to justify the job of external affairs director. Mace said if the Faculty Senate had sat in on the committee, he thought it would have nominated John Baker, political science department chairman.

Mace will attend the Faculty Senate meeting Tuesday and explain the necessity for the new position, which he had intended to do even if the appointment had not yet been made.

John Jackson, Faculty Senate president, said the Faculty Senate did not want to put a representative on the selection committee until Mace talked to it. The selection of Choate was made without Faculty Senate input. Mace refused to comment on what his explanation to the Faculty Senate would consist of, saying he owed his comments to the senate first.

When Mace was asked if he would have asked the committee to narrow the eleven nominations down to one without a consensus, he said. "At that point, I would probably have reviewed the folders of the eleven to see which candidate I would contact first."

Choate is already on the payroll, although his appointment has not been ratified by the SIU Board of Trustees. The board is scheduled to consider Choate's appointment at its February meeting.

Smoke screen

A Carbondale fireman got a face full of smoke as he battled a blaze in a house at 910 East Park Street Wednesday evening. The fire started in the attic of a home owned by Bryan Kimmel. High winds hampered the firemen's efforts to control the blaze, but the fire was brought under control in about 40 minutes. (Staff photo by Marc Galassini)

Prof vies for conservation directorship

By Charles Roberts
Associated Press Writer

SPRINGFIELD (AP) — David Kenney, SIU professor in political science, met with Gov. James Thompson Wednesday to be sized up for directorship of the Department of Conservation.

(Kenney said Wednesday night he thinks he has a good chance of getting the job, but he said he had not expected Thompson to name a director Wednesday.)

(Kenney, an informal adviser to Thompson's 1976 campaign, rates high on the list of candidates being considered, according to Thompson press aide Dave Gilbert.)

Kenney, 55, had said before the meeting that he had not had the directorship offered to him. "It may be, but it has not yet occurred," he said.

James Skillbeck, a Thompson aide, said he understood Kenney "has been very active in the Sierra Club and environmental movements."

But Kenney's University biography lists him only as a member of the Crab Orchard Sportsmen's Association.

American Brittanv Club and the Jackson County YMCA in the area of outdoor interests. Asked if he has any background in conservation matters, Kenney said, "What is background? I say that not to be flippant, but it's a wide-ranging department. It deals with parks, historical sites, monuments, fishing, hunting, outdoor recreation. And I have some background in some of those things."

Kenney is no stranger to Thompson's search for people to fill top state government jobs. He is a member of Thompson's Committee on Executive Appointments.

"I have been interacting with them, though I must say that work has been centered in Chicago, and they have not called frequently on people down here."

The present conservation director, John McGuire, said, "There is only one person (the governor) who knows who's going to be the next director of conservation, as far as I'm concerned. My conversations with the governor's office were limited to the time I'd be willing to stay until they found a replacement, at least a couple of weeks."

Kenney is a Carbondale native who took his bachelor and master degrees in government and history at SIU and his political science doctorate at the University of Illinois.

He was elevated to a full professorship in 1969 and wrote a book, "Basic Illinois Government," a year later.

He was an electronics instructor in the Army Air Corps during World War II.

Gus Bode

Gus says the other ten nominees probably didn't need the job as badly as Choate.
Ford leaves Carter clean desk

By Walter R. Mears
AP Special Correspondent

WASHINGTON (AP) — While Jimmy Carter prepared to leave office on Inauguration Day, President Ford cleared out his desk Wednesday and telephoned hisfarewells to world leaders.

Ford also approved what amounted to a token change in the rules on clemency for Vietnam-era military deserters, but rejected blanket amnesty.

The new guard of Democrats control the capitol to replace their man who enters the White House on Thursday. For Carter was on his way, promising "a new day, a new beginning, a new spirit for our country."

"I think it wasn't a bad day to be in the old Confederacy," Georgia draws were the language of the hour, from the airports to the hotels in the new Old Senate Pension Building, where Vice President-elect Walter F. Mondale greeted thousands of invited guests at two daytime receptions.

Carter went down to the depot in Plains to give his sendoff to the 380 folks aboard the Peanut Special, an 18-car streamliner bound for his inauguration.

Mace: Choate selection was not rigged by panel

Mace said he believes Choate will have a good impact as SIU's chief lobbyist because he is "well-known and well-respected by the legislature on both sides of the aisle."

Choate's duties will also include coordinating free seminars at SIU for Illinois legislators. Mace said he first got the idea for creating the new position, which Choate will fill, when several legislators approached Mace and said similar seminars at the University of Illinois had been helpful to them. Mace said the seminars will be non-partisan and will have a "public service thrust" and will deal with things such as ethics. He added. The seminars will be funded out of the general operating funds of SIU.

News Roundup

Bell wins approval from Senate panels

WASHINGTON (AP) — Griffin Bell was approved as President-elect Carter's nominee to be attorney general, making him the last of Carter's Cabinet nominations to win Senate approval. Bell was voted in 97-2.

The Senate Judiciary Committee voted 10 to 3, and one vote of present, in favor of Bell. In all three votes against Bell, the Republican position to the 56-year-old Atlanta lawyer had been based largely on his civil rights record.

Congress disapproves gas price controls lift

WASHINGTON (AP) — President Ford acted to lift price controls from gasoline, but the action on his last day in office ran into stiff opposition in the Democratic-controlled Congress, where moves to veto the action were immediately launched.

The efforts under way in both House and Senate to reject the gasoline deercontrol proposal seemed likely to succeed, with many members expressing concern about the consumer price impact while others saying the question should be left to the incoming Carter administration.

Carter leaves 10 days to nullify Ford's move. A negative vote in either chamber would kill the action.

Inflation rate curbed by 1976 food costs

WASHINGTON (AP) — A rare annual decline in grocery prices helped inflation to a four-year low in 1976, the government reported Wednesday. Year-end figures from the Labor Department showed consumer prices rose a moderate four-tenths of 1 percent in December. For the year, prices rose four-tenths of 1 percent, as economic expert John G. Glines of the Wall Street Journal said inflation was "moderate."

Deadlock continues: Ill. Senate recesses

SPRINGFIELD (AP) — With Republicans grumbling and grousing, the Illinois Senate recessed Wednesday until next week still deadlocked on the selection of a Senate president. No roll calls were taken Wednesday, although the Senate was in session for about an hour.
Gas arrives for CIPS; operations may resume

By Betty Boesia
Daily Egyptian Staff Writer

Central Illinois Public Service Co. (CIPS) gave the go ahead Wednesday afternoon for all industry and schools in Carbondale to resume normal operations. Now its Mother Nature’s turn to cooperate.

Daryl Smits, gas operations supervisor for the southern division of CIPS, said that because the forecast through Carbondale High School, said schools could resume normal operations. Now its Mother Nature’s turn to cooperate.

The Associated Press release reported Ralph Carter, grounds superintendent of Carbondale High School, said schools could reopen on Thursday, weather permitting. Exams scheduled for Thursday have been moved back Friday. But subzero temperatures expected over the weekend could cause a recurrence of both energy and road condition problems.

Sexton said the SIU Physical Plant could readjust thermostats and all campus buildings could turn up the heat. An Associated Press release reported Wednesday that CIPS received a delivery of 200 million cubic feet of synthetic natural gas to ease a shortage of fuel.

A CIPS spokesman in Springfield said the gas purchase will result in a bill increase of 71 cents a month for residential customers for a year.

Ed Biewald, weather observer at the Southern Illinois Airport, said snow moving into the area Wednesday evening would cause considerably warmer temperatures, but with clearing skies on Friday the temperature will again plummet.

Despite rising temperatures, the predicted three inches of snow due by Thursday evening could force schools to remain closed and cause additional traffic hazards. Reid Martin, superintendent of Carbondale High School, said schools would reopen on Thursday, weather permitting. Exams scheduled for Thursday have been moved back Friday.

But subzero temperatures expected over the weekend could cause a recurrence of both energy and road condition problems. Ralph Carter, grounds superintendent for the Physical Plant, said SIU has seven vehicles capable of removing snow but no snow plows. SIU is also using cinders in place of salt on sidewalks and on parking lots to combat the ice.

Carter added that 460 bags of salt were ordered two weeks ago but only 200 were received. These will be used for emergency trouble spots.

S. Illinois stretch of Mississippi closed

S. Illinois stretch of Mississippi closed

St. Louis (AP) -- Coast Guard authorities, acting on a directive from R. Adm. Wayne E. Caldwell, 2nd District commandant, late Wednesday ordered a 160-mile section of the ice-choked Mississippi River above Cairo, III., closed to commercial traffic.

A spokesman said the closing of the river from Cairo to just south of St. Louis was ordered because navigation in the area "is considered hazardous to life, property and the environment."

The segment of the river closed off by the Coast Guard had been described as all but impassable for the past week, slowing barge traffic to a trickle. "What Mother Nature undertook on her own to do over a period of several days we have now done officially," a spokesman said. "It means we are authorized to stop motor vessels at tempting movement." Conditions on the river were at their worst north of Cairo, where an icejam extending 40 miles had formed.

Other lengthy gorges were reported south of Chester, Ill., and at the Chain of Rocks Canal just north of St. Louis. The Coast Guard estimated that more than 50 towboats and 200 barges were stranded.

A Coast Guard said movement in the area of the river closed would be "by permission of area captains for vessels seeking to assist others trapped within the zone."

The Illinois River, which empties into the Mississippi at Grafton, III., just north of Alton, was barely passable, according to the U.S. Army Corps of Engineers.

Five vessels that arrived at Locks 26 at Alton Tuesday told lock workers they spent three days traveling the 80 miles from La Grange, Ill., to Alton.

A spokesman for the St. Louis office of the Illinois-Best Western Waterway United, said 60 to 70 union towboat crewmen were out of work because of the ice.

C.A. Poeller, traffic commissioner for the Merchants Exchange, said the river was swamped with requests by members to find that the unit was not in service.

Coffee Prices

Coffee prices have been continually rising in the past few weeks. Tea and coffee substitutes are fine but there are those who can’t give up the real thing. The following is a survey of coffee prices in Carbondale for this week. The prices are based for two pound quantities except where designated otherwise.

Consumer Alert

The Attorney General’s Office in Springfield has issued a consumer warning about telephone solicitations for magazines.

An organization operating under the names Consolidated Readers Service and Neighborhood Periodicals has been calling prospective buyers and recording their conversations. The consumer is told that the conversation is being taped, but he is not told the organization considers the conversation to be a legally binding contract if the consumer appears to be interested.

The organization also neglects to tell the consumer the total cost of the magazine subscriptions. The magazines are sent, and the consumer later receives a monthly payment book. The cancellation period is within three days of the phone call, after that it is very difficult to get out of the agreement.

A lawyer for the Consumer Protection Division of the Attorney General’s Office, Ellen Shackle-Haskins, said the organization has operated in Chicago and Springfield and may soon come to Southern Illinois.

Got a problem? Feel you’re being harassed, ignored, or cheated by the system? Don’t know where to turn for answers?

If you’ve run up against a wall, write or call HELP! Presented as a public service by the Daily Egyptian in cooperation with the Illinois Public Interest Research Group and its Consumer Action Center, HELP! will try to help you — and readers with problems like yours — find a solution, snip the red tape, get some facts.

We can’t give legal or medical advice of course, but we might be able to tell you where and how to get it. Write HELP! or call 533-2146 or write to the Consumer Action Center, SIU Student Center, Carbondale. Your identity will not be made public, but we need to know who you are, so include your name, address and telephone number.

A Tape Deck Repaired

In January, 1976, I purchased a Song TC 377 tape deck from Southern Illinois Audio in Carbondale. When I received the unit after my final payment on February 6, I discovered it was defective. I returned it February 7.

On June 16, 1976, I received the unit from United Parcel Service discovered the box did not contain a warranty, patch cords, take up reel, head cleaning cloth or operating manual. Besides that, the unit’s pause button control only slowly slowed the tape.

The Consumer Action Center representative wrote a letter to J. Tushinsky, president of Superscope, in California. The letter explained R.V.’s complaint and asked for a replacement or repair. R.V. was then advised by the Consumer Action Center to send the unit back to Superscope. R.V. received the tape deck in December and found it had been repaired satisfactorily.
Editorials

Blind cheating the blind

“A blind man who sees is better than a seeing man who is blind.” Persian proverb.

You know who you are.

You are the chumps who ripped the braille tags off the elevator buttons in Schneider Hall.

The tags were attached over the holidays to make the running of the semester a little brighter for those students who view the world with inner vision.

After just one day of classes, the majority of the tags were gone.

Are the blind students a threat to the vandals of SIU? Is this senseless crime revenge? Of course not.

It’s the unthinking, unfeeling work of pea-brained people to show how bad they are.

You've shown us nothing... except that you are the blind ones.

The abusive antics of adolescence should be a thing of the past for SIU students. They should be something looked back upon with a grin and a confession: “I really screwed up that time.”

Carter change: penny ante

Jimmy Carter will be President at noon. So what.

As he takes office, he assumes the directorship of the nation’s largest employer. Not accompanying that directorship is control.

Tens of thousands of Americans run the federal government, and Carter will not have a iota of influence on the vast majority of them. Sure, he can change agency heads and he can even tell us he won’t lie or hide things from us. These things are relatively small. But in 99 percent of the affairs of government, he won’t be able to change a thing.

When he begins his reign, as the naive call it, he becomes the most unmanageable disorganization we know of. The surface changes he will make, and they will seem as though they are numerous, will be just the tiniest veneer.

The vicious mess won’t be solved by Carter. It won’t be solved by anyone.

In all of this gloom though, there are some bright spots. Mr. Carter has been publicly realistic over the past few weeks. He has said our problems of unemployment and inflation will not be solved for four years and perhaps longer. Government reorganization he tells us, will take time, as will the work in straightening out our ridiculously confusing tax system.

Yes, Jimmy will replace Jerry at noon, and in either four or eight years someone will replace Jimmy. A president is a president is a president...

—Steve Hahn

Auto accidents, deadly disease

More than 26,000 young people died in car crashes last year and at least that many will be slaughtered this year. Tens of thousands have been, and will be, crippled.

Had 26,000 Americans died of any one specific disease—swine flu for instance—there would be a national outrage. The automobile as a killer is quite different from a sickness of course, we generally control its destiny, it doesn’t creep up on us like a cancer.

Yet we never really think about just how many die. Maybe this is the time public in a way in which the splintered glass and steel slices the flesh that makes us form a hundred-thousand, an unforgettable number...for some.

—Steve Hahn

Letters

House priority should be low

It seems to me that the priority for Illinois University of the last deadly disease Carter change: penny ante

For this veteran of the now forgotten Letter to the Editor Department in the spring of ‘74, it was interesting to read the article “Rumble Around” inside the Daily Egyptian management written by Dave Parks Dec. 16.

What happened in 1973 now seems like a chapter out of “Mutiny on the Bounty.” It all started when, as editor of the editorial page, I published a letter which was highly critical of David Derge’s performance as president of the University.

Earthquake would be a better word than rumbling to describe the sequence of events that took place after the letter appeared. A directive came from Derge, to Orescanin, to Long, to Harmon, to me that the Daily Egyptian in the future, would not publish letters critical of Illinois University are not in good order.

To make a long story short, I chose to publish two letters to the editor which outlined exactly what letters were acceptable for publication. Then the staff hit the fan!

Some professors questioned the ethics of my action, but several of them along with most of the news staff, came to my support. The editor was vindicated.

Derge and Long are gone, but Bill Harmon remains. It was unfortunate that Bill Harmon, after the recent heat for the letter directive, but through it all, I was able to respect him as the editor each other’s viewpoint.

Perhaps, the larger issue in 1973 was control of the newspaper. The Daily Egyptian is the property of the public, as in the University, and the public has little to do with the control of the newspaper.

It has yet to be decided who bears the responsibility for control of the Daily Egyptian, whether it is the student editor, the managing editor, the director of the journalism school, the president of the University, or the board of trustees.

If it’s to be the managing editor, there is no inherent reason for the job but Bill Harmon. He taught me and countless others that journalism was more than what we could learn in a classroom.

—Jim Wisuri

DE history remembered by former editor

I found Daily Egyptian reporter Steve Hahn’s editorial of Jan. 17, 1976 rather interesting. I had been very recent bonuses to the football coaching staff as a point of discussion, but let fly by the men that are bringing success to Saluki athletics.

I refuse to believe that the intelligent faculty at SIU looks at this recent football bonus with deixis to any degree of national pride in our Athletic Department.

The fiscal discipline of economics and athletics will always be evident. What both have in common on this campus is national recognition. That alone should please any "gaps," that Hahn mentions.

Joe Paschen, Sophomore

Radio-TV

Editor’s note: A fund drive to cover the $7,000 balance was conducted by the Daily Egyptian administration, however, the amount raised was only $6,000 and covered the $7,000 which were granted.

Football staff deserved bonuses

It seems to me that the priority for Illinois University of the last deadly disease Carter change: penny ante

UFOs: What does the Air Force want us to think?

By Janice Breneisen
Student Writer

"We need to stop arguing the existence of eggs and start cooking the omelet." This was one scientist's way of stating his opinion about the government's treatment of the UFO situation. In 1968, Dr. Edward Condon, a physicist, published a report entitled, "Scientific Study of UFOs." That report stated, "Careful consideration of the record as it is available to us leads us to conclude that further intensive study of UFOs probably cannot be justified in the expectation that science will be advanced thereby." Because of this report, the U.S. Air Force stopped a 28 year study of UFOs. They closed the files on some 12,000 UFO sightings, files which could possibly answer a lot of questions about the interesting and inviting world of outer space.

Dr. Condon and his fellow skeptics say that every one of these sightings can be explained as nothing more than weather balloons, helicopters, planets, ball lightning, ammonia vapors or gases. In reality, the U.S. Air Force has suppressed any scientific interest in these sightings by explaining them away in these ways.

Scientists say that most of these sightings were part of a chain reaction of hallucinations. They say that when one person sees something it becomes the popular thing. But scientists should wake up to the fact that these phenomena are no longer just a fad. These sightings should be examined with the treatment of the record as it is available to us leads us to conclude that further intensive study of UFOs probably cannot be justified in the expectation that science will be advanced thereby.

Scientists say that most of these sightings were part of a chain reaction of hallucinations. They say that when one person sees something it becomes the popular thing. But scientists should wake up to the fact that these phenomena are no longer just a fad. These sightings should be examined with the treatment of the record as it is available to us leads us to conclude that further intensive study of UFOs probably cannot be justified in the expectation that science will be advanced thereby. Together scientists should examine the sightings with the ultimate evidence: the fee statement.

If the fee statement is also easy to lose. So I confess to having only rudimentary knowledge in the field of student identification. The card was inserted into my semester card when I was registered for school. In addition to the semester card, each student also has a driver's license, student ID and, if you're male, a draft card, student ID and, if you're male, a draft card.

Don't you feel overly identified? The crowd of cards is especially annoying when the student I.D. is not at all useful except in tandem with the fee statement. It's insulting to have a host of cards backing my claim that I am Melissa Malkovich, but still not believable without the ultimate evidence: the fee statement.

The fee statement is like a kid brother. You don't want him tagging along, but if you don't take him with you, your mother denies certain privileges. Mother, in this case, is the University and many businesses.

And these are some of the privileges withheld:

- No tickets for most Arena events.
- No checks for cash or cashews.
- No books at the library.

I can't fault the business or even the University for the no-check-without-fee-statement policy. Too much revenue would be lost on bad checks and for the attempts at tracking down the students or former students who wrote them.

Loss of revenue does remind me of another problem fee statements present. Like a kid brother, the fee statement is also easy to lose. So easy in fact, that a cashier at the Burnar's Office estimated about one-third of the student body gets their fee statement replaced each semester. That has to cost money.

Commentary

A more durable system could be worked out in which both forms of identification are merged.

Though I'm not suggesting SIU mimic the University of Illinois, this University could learn from U of I's more efficient system of student identification.

After fees are paid at registration, a black and white picture is taken of the student and their fee statement. This is valid for only one semester. At registration time the next semester, the student has the same card validated with the director of admission's signature stamped in a designation color of ink.

This process makes it unnecessary to carry around an extra identification card that is as easy to lose as a fee statement. However, it does make it necessary to carry a student data carrier, computer jargon for the punch-card used to check out library books. I won't pretend I understand this process, but my solution to the problem of carrying two cards is feasible.

First, the original student I.D. could be laminated and punched as it is now. With the start of a new semester, the card would be validated when fees are paid by imprinting the signature of the director of admission, the bursar or some other administrator with a machine to prove the student is still enrolled. Then, each new year (i.e. student's year which begins in August) a new black and white card is made.

I confess to having only rudimentary knowledge of the present I.D. system's workings, but I know enough to see that it doesn't work very well, or at least not effectively. When one-third of the student body goes for a replacement fee statement and the entire student body lives in fear of being caught without, it's time for a change.
'Tokyo Rose' granted pardon

WASHINGTON (AP) — President Ford Wednesday granted a pardon to a well-known former radio broadcaster known to millions of World War II servicemen as "Tokyo Rose." Mr. Secretary of the Navy, Mr. D'Appio, who traveled to Japan to care for a sick must have been left behind the battle in the broadcast. After the war, he was held without trial for two years. Mrs. D'Aquino was indicted on nine counts of treason, but convicted of only one. Specifically, she went to prison for saying in a broadcast, "Orphans of the Pacific, you are really orphaned now. How will you get home once that your ship sinks?"

The statement followed a big U.S. naval victory over the Japanese fleet. Ford added a comment in part saying Mrs. D'Aquino was an officer of the "Anti-Japanese" Anti-Japanese feeling toward the war.

Jefferson's plans include research

Thomas B. Jefferson, dean of the School of Engineering and Technology, plans on teaching and doing research in the Department of Thermal and Environmental Engineering (TEN) as soon as a final decision on the number of the school can be chosen.

Jefferson, 52, requested that he be reassigned to full-time teaching after a request for reassignment was his decision. Jefferson then has been behind the request for reassignment.

Jefferson said Wednesday that the decision to assign for the assignment was his own, and that "Tokyo Rose" was his decision. Jefferson then has been behind the request for reassignment.

Jefferson said the second dean that has been a request for reassignment to break through the last of the future to a vice president in 1975.

Jefferson said he has been thinking about the change for several months, because "When you are considering the possibility of changing directions, you have to consider it for a while."

Jefferson became the dean in July 1974, after leaving the University of Arkansas, where he was associate dean of engineering and associate director of the Tennessee Engineering Experimental Station. Jefferson said he wants to get back into reassignment "going again" when he moves to TEN.

Activities

Thursday

Illinois Dept. of Transportation Meeting, 8 a.m. to 4 p.m., Student Center Room.

SCPC Maple Show, 5 p.m. to 9 p.m., Student Center Ballrooms C and D.

Student Advertising Association Meeting, 7 p.m. to 9 p.m., Student Center Mississippi Room.

SGAC Film, "Signs of the Dead," 7 p.m. and 9 p.m., Student Center Auditorium.

SGAC Video: "Cocaine Fights" plus "An Evening with Robert Elam," free, 11:30 a.m. to 1:30 p.m., 7 p.m. to 9:30 p.m., Video Lounge, Student Center fourth floor.

Black and Redbird Club Meeting, 8 p.m. to 10 a.m., Student Center Ballrooms C and D.

Magician: The Amazing Mendoza, 8 p.m., Student Center Balbrom B.

Saluki Saddle Club Meeting, 8 p.m. to 10 p.m., Student Center Activity Room A.

Association of Childhood Education Meeting, 4:30 p.m. to 10 p.m., Wham Faculty Lounge.

Saluki Saddle Club Meeting, 9 p.m. to 10 p.m., Lawson 121.

International Student Council Meeting, 5:30 p.m. to 7 p.m., Student Center Activity Room B.

Society for Creative Anarchism Meeting, 7:30 p.m. to 10 p.m., Student Center Activity Room B.

Social Environmental Center Organization Meeting, 7 p.m. to 9 p.m., Student Center Activity Rooms C and D.

Ford rules out blanket amnesty; some vets may change status

By Donald Sanders
Associated Press Writer
WASHINGTON (AP) — President Ford Thursday ruled out blanket amnesty for Vietnam military deserters and draft evaders but directed that wounded and decorated veterans who received other-than-honorable discharges under honorable conditions have their status changed to honorable discharges.

Ford late last month had said he would look into the possibility of a general amnesty for Vietnam war deserters and draft evaders after he was asked to do so by the widow of Sen. Philip A. Hart, D-Mich., who had been such a man.

In a letter to Mrs. Hart today, the President said he had "decided to maintain my position on earned amnesty" and added: "Within my clemency program, however, I have directed that the other-than-honorable discharges received by former service members who were wounded in combat or received decorations for valor in combat in Vietnam each be reviewed and upgraded to discharges under honorable conditions unless there is a compelling reason in the contrary in any case. Ford wrote." A White House spokesman said only deserters would be affected by Ford's new directive and that at most 730 veterans would be eligible.

The White House released a copy of the letter to Mrs. Hart after Deputy White House counsel Edward Schults had telephoned Mrs. Hart and read the letter to her.

The President also sent letters to the secretaries of the three armed services and the commander of the Coast Guard asking them to evaluate how many people would be eligible under his new program.

Those who have their other-than-honorable discharge changed to honorable would become eligible for veterans benefits, including medical care and GI education benefits.

In 1974, Ford offered draft registrants, but not deserters, a form of limited amnesty by giving them the opportunity to "work their way back into society" through public service.

According to White House calculations, 566,072 draft registrants were eligible for the program but only 51,723 took advantage of it before it expired last year.

Inaugural ceremony includes prayer, parade, oath, speech

WASHINGTON — Jimmy Carter, who emerged from the obscurity of rural Georgia to become one of the political phenomenon of the United States' first 200 years, will be the first president to be inaugurated in the nation's third century.

This week's solemn pageant of ceremony Thursday: the oath administered by the chief justice of the United States, a dwindled audience of thousands, the inauguration parade which organizers say will last less than two hours.

Aimed at that come other festivities: a gala at the Kennedy Center for the Performing Arts with a wide assortment of show business personalities, a prayer service on the steps of the Lincoln Memorial featuring the Rev. Martin Luther King Sr.

Carter will take the 35-word oath to support and defend the Constitution, administered by Chief Justice Warren E. Burger, following the swearing-in of his chosen vice president, former Sen. Walter F. Mondale of Minnesota.

Carter then will become the 39th president, and Mondale will be 42nd vice president.

Carter, elected in a campaign in which he restated ancient values of Washington, proclaimed it a people's inauguration and his committee sent out invitations to hundreds of thousands.

For days there have been jazz and classical music recitals, poetry readings, lectures and square dances in churches, the branches of the Smithsonian Institution, the Library of Congress, Capitol Hill, and in the public parks.

For the more affluent, there were seven inaugural balls in public buildings and downtown hotels on Thursday night. Tickets to the balls cost $25 per person.

The 35-year-old Carter, the former Navy officer and Georgia peanut processor, represented a new face, the transition took on even more significance in his replacement of the outgoing President Gerald R. Ford.

Ford, narrowly defeated in November after trailing badly in public opinion polls for months, was the epitome of the Washington political figure whose prime goal for decades was to become speaker of the House.

He never made it, but he was chosen by former President Richard M. Nixon to be vice president under the 25th amendment when Spiro T. Agnew resigned. When Nixon resigned in the Watergate scandal in August 1974, Ford became president.

Ford chose a quiet departure from the Washington scene.

Associate quoted Ford as saying that after the formal inauguration ceremony beginning at 11:30 a.m. EST Thursday, he would fly with his wife, Betty, to Monterey, Calif.

Ford then planned to travel across the country, playing in several golf tournaments and talking with students on college campuses.

Auditions for three shows will be held

The SIU Theatre Department will hold auditions next week for Southern Players’ “Crime On Goat Island,” the Southern Laboratory Theatre’s “Quarter Nights” and Children’s Theatre tour production. Auditions will take place Saturday at 1 p.m. in the Calipre Theatre of Student Affairs. All roles are open to women and men. Prepared audition pieces are not required, but those auditioning may prepare an acting scene from any play.

Calipre casts for Gothic tale

Auditions will be held for “The Purified Princess,” a classic romantic Gothic, on Jan. 24 from 2 to 5 p.m. in the Calipre Stage and Jan. 25 from 7 to 10 p.m. in the Community Building. The story is a swashbuckling tale of love and high adventure. There are good guys and bad guys, pirates and princes, miracles and action. The show will have a cast of ten—six men and four women. The production is adapted and directed by Eric Peterson, graduate student in speech.

Disney to audition singer, dancers for summer work

The Disney Entertainment Work Experience Program at Disneyland and Walt Disney World, will hold auditions beginning February 11 for college students, soloists, dancers, and musicians throughout the U.S. The program provides summer work for students, including college credit. Auditions will be held in Chicago Feb. 11. Information and applications may be obtained from Disney Entertainment Work Experience Program, Entertainment Division, Walt Disney World, O. Box 46, Lake Buena Vista, Florida 32801.

OPEN Mon. through Sat. 10 A.M. to 5 P.M.

Next year you could be on a scholarship. If you are a Sophomore, Junior, or Senior with 2 years of Graduate or Undergraduate studies remaining, you may be eligible for an Air Force ROTC two-year scholarship which pays your tuition and gives you a $100 a month allowance. And it picks the tab for books and lab fees, as well.

After college, you'll receive a commission in the Air Force...go on to additional, specialized training...as you get your start as an Air Force officer. There'll be good pay and responsibility, and lots of other benefits...and a great opportunity to serve your country.

It all starts right here—in college—in the Air Force ROTC. Look us up...see what we have to offer, and show us what you can offer in return.

We are recruiting now for Fall '77

Drainage problem solution sought

By Brenda Hood
Student Writer

Pollution caused by strip mining for coal may be controllable in the future, according to a professor of geology at SIU, says a study developed by a SIU research project studying the mine drainage problem.

"The purpose is to develop a predictive kind of model for the quality of the run-off water, so problem areas can be located in advance," Energy Research and Development Agency (ERDA) in study the imp- pact of increased strip mining on the environment over the next 20 years.

"The characterization of the rocks over the coal beds (the overburden) are being tested for potential pollutants, Hood said. This is to determine if the overburden materials are likely to create or neutralize acid mine drainage."

Three mines in this area are being studied. Two are in Southern Illinois and one is in Western Kentucky. The cooperating coal company is Southwestern Illinois Coal Corporation's Captain mine, West, Pickensville Annax Coal Company's Delta mine near the village of Crab Orchard, Ill., and Ayrsgen mine, near Central City, Ky., according to Hood.

The students working on the project are analyzing the total heavy metal content of the overburden, which includes such metals as iron, cadmium, lead, mercury and zinc.

Overburden samples are collected and tested to see which metal can be leached out. The information can be used to identify which mines or which parts of the country may cause problems. "The overburden from these areas can be buried in the bottom of the mine so it won't oxidize and produce acids harmful to the environment," Hood said.

The quality of the water already draining the mines is also being analyzed, he said.

The graduate students in geology working on the research are Mike Mercier, Gary Cole and Jim Bremen.

The undergraduate students are Theresa Ward, Cathy Nondev, Kevin Crowley and Steve Drenne.

The project began last April and will end next October. The total cost will be just over $90,000.

Student jobs now available, current ACT on file required

The following jobs for student workers have been listened for the Office of Student Work and Financial Assistance.

To be eligible, a student must be enrolled full-time and must have a current ACT Family Financial Statement on file with the Office of Student Work and Financial Assistance. Applications may be picked up at the Student Work Office, Woody Hall, third floor.

Jobs available as of Jan. 18

Clerical—four openings, morning hours; two openings, afternoon hours; two openings, hours to be arranged; one opening, steno-typist, 1-5 p.m.; three openings, telephone receptionist. One position is 9:30 a.m.-1:30 p.m. Monday through Friday and one for 11 a.m.-2 p.m. Monday, Wednesday, Friday and 2-5 p.m. Tuesday and Thursday. One opening, general office duties. Two openings, 8:30 a.m.-2 p.m. Monday through Friday; one opening, general office hours weekly. Preferably 10 a.m.-2 p.m. Monday through Friday. Janitorial—four openings, 8 a.m.-12 noon; three openings, 12:30-4:30 p.m.

Miscellaneous—one opening, nurse's aid, 11:30 a.m.-1:30 p.m. Monday through Friday and one for 11 a.m.-2 p.m. Monday, Wednesday, Friday and 2-5 p.m. Tuesday and Thursday; one opening, general office duties. Two openings, 8:30 a.m.-2 p.m. Monday through Friday; one opening, general office hours weekly. Preferably 10 a.m.-2 p.m. Monday through Friday.

Child stars earn $10,000

NEW YORK (AP) — They're normal kids who go to school, ride bikes and play ball. But they also earn up to $20,000 or $10,000 a day.

They're the kids who appear on television commercials. There are hundreds of businessees, says Marilyn Henry, associate casting director for an advertising agency, who see close to 300 of them a year.

Henry, who has worked with both children and adults for the past seven years at Cunningham & Walsh, describes her work with youngsters as "a special, human experience. They're the fun half of surprise."

Most of the children in the business are the "natural performers" who are extroverted and like to entertain, she says. The others are "cute children" who their parents think should be on television, she adds.

The kids come in all sizes, types and ages, from infancy to 18. Since recognition ties easily, have a shorter attention span and may be self-conscious, Henry says that auditioning requires patience and an awareness of the child's needs.

Some of the children say they want to be stars when they start doing commercials, explains Ms. Henry. "But it's a fantasy. When they find out how much work is in 1,000 copies of yearbook sold

More than 1,000 subscriptions of the The Oelbehk II, the SU yearbook, have been sold said Doug Ulrich, coordinator of the Oelbehk II. The Oelbehk, scheduled to be printed in August, will be mailed to subscribers at their home addresses.

The Oelbehk II, the first yearbook the SU has had since 1973, will cover all aspects of campus life.

"We want to get behind the scenes and show situations not usually seen. We hope to have a lot of in-depth copy," Duru said.

The Oelbehk II is still on sale for $8.00. Students and faculty may place subscriptions by phoning 651-1111 or by stopping in at barracks 1466. Handbills promoting the Oelbehk II are now being distributed at several Carbondale bookstores.

The book will include senior pictures. Those students with senior standing can make appointments free of charge with the Oelbehk staff.

**HONORS AND BACKPACKING**

Participants in the course will gain the initiative, understanding and commitment necessary to enjoy backpacking and varied sports. Preparation, fitness, diet, first aid, equipment, outdoor ethics, and the joys of backcountry will be considered. The course will include a week-long backpacking trip. \( \text{See Textbook Cost: } \$15.00 \)

**PAINTING—MEDIA AND PROCESS**

This course will explore the theories and techniques of painting with oil, acrylic and watercolor. Demonstrators will cover topics such as color mixing, paint application and painting techniques and provide instruction in the individual student's problem area. Suitable subjects for instruction include traditional and contemporary approaches to landscapes, still life, figurative art and the use of metal and plastic welding, incorporation of found objects, etc. \( \text{See Textbook Cost: } \$25.00 \)

**PIANO FOR ADULTS**

Beginner piano instruction for adults with little or no previous experience. Basic skills will be instilled, allowing you to begin the piano lesson with the confidence of a beginner. \( \text{See Textbook Cost: } \$15.00 \)

**SPANISH CONVERSATION**

This course is open to both students who have had Spanish and those who want a course in Spanish conversation. The emphasis is on developing both conversational and writing skills. \( \text{See Textbook Cost: } \$15.00 \)

**BEGINNING ARCTIC MEDIC**

This course is designed for beginners and includes an introduction to the practices which will be used to help those who are injured or ill. \( \text{See Textbook Cost: } \$15.00 \)

**TUESDAYS**

**BEGINNING ARC WELDING**

This course is designed for drivers eighteen years of age or older. Each person will participate in experiments relating to ice, water, water currents and the effects of weather on welding. \( \text{See Textbook Cost: } \$15.00 \)

**TUESDAYS**

**BEGINNING ARC WELDING**

This course is designed for drivers eighteen years of age or older. Each person will participate in experiments relating to ice, water, water currents and the effects of weather on welding. \( \text{See Textbook Cost: } \$15.00 \)

**HOUSEPLANTS**

Cultural requirements, care, maintenance, and propagation of house plants will be studied. \( \text{See Textbook Cost: } \$15.00 \)

**CRAZY QUILTS**

Crazy quilts are made from scraps of fabric, ribbons, ruffles, etc. and joined by embroidery stitches. The quilts are pieced to form mosaic patterns and designed by the student. Creative techniques will be used with the fabrics. \( \text{See Textbook Cost: } \$15.00 \)

**INTERMEDIATE ARC WELDING**

A course designed for those who have had the beginning arc welding course or equivalent experience. Classroom instruction includes safety, overhead and vertical welding with a focus on arc welding of metals. Students will perform a variety of welds for review. Practical evaluation will be made of each student's welding performance. \( \text{See Textbook Cost: } \$15.00 \)

**HOME GARDENING**

This course will cover the following subjects: (1) Garden Soils and Their For- mula- tion—Dr. Gerald C. Rounds (2) Home Fruit and Orchard—Small Fruits—J. B. Messey (3) Flower Gardening—Gerald Courts (4) Home Vegetable Gardening—Irvin Hilsner (5) Care of Trees and Shrubs—Ray J. Weisner (6) Weed Control—P. J. K. Lassen. \( \text{See Textbook Cost: } \$25.00 \)
REGISTRATION INFORMATION

In Person at the Continuing Education Office, Washington Square C, SIU-Campus. Office hours are 9:00 a.m. to 12:00 noon and 1:00 p.m. to 5:00 p.m. Monday through Friday; 8:00-5:30; 775-7751.

By Mail using the non-refundable registration form provided as part of this publication.

SPECIAL EVENING REGISTRATION

For your convenience it will be held on Wednesday, January 26, from 6:30 to 8:00 p.m. in Washington Square, Building “C”. There is plenty of free parking available near the building.

ENROLLMENT CHARGE INFORMATION

Special for Senior Citizens—(20 and over) may register for classes for half of the enrollment charge unless otherwise specified.

BEGINNER—Those wishing to use their Bank-American may do so to pay class charges. The Continuing Education office requires the card’s account number and expiration date. Enrollment Charges must be paid before the registration can be considered official and complete.

Refunds—Students who find it necessary to drop an adult class may obtain a refund of enrollment charges if application is made to the Continuing Education office at the second session of the class. There is no provision for partial refund of enrollment charges on courses dropped after the second session.

No classes will be held on Monday, March 21 through Saturday, March 26. The University will be closed.

The Division can provide a permanent record of participation in continuing education programs by awarding the nationally recognized CONTINUING EDUCATION UNIT (C.E.U). The C.E.U is a standard unit of measurement for participation in non-credit, institutional programs of continuing education that meet established criteria. Attachment of the C.E.U. seal will be available upon request. Give us a call: 816-353-7751.

If the adult non-credit courses aren't enough, try the COMMUNITY LISTENER'S PERMIT PROGRAM. It allows persons not enrolled in a University degree program to audit on-campus classes.

The purpose behind the COMMUNITY LISTENER’S PERMIT PROGRAM is to allow persons who do not wish to be degree-seeking students to audit on-campus classes in a non-competitive atmosphere and on a non-credit basis.

And if you're an adult returning to school and have questions about a University office, department or service—look to the Division's new service "OPERATION START", can help you.

A professional staff member will be able to answer your questions, or will put you on the right path to getting them. Give us a call: 618-353-7751.

REGISTRATION FORM

The Division of Continuing Education reserves the right to cancel any course which does not have sufficient enrollment. Should it be necessary to cancel a course, those registered will be notified and a full refund will be made.

Textbook or Supply Charges are NOT paid to the Division of Continuing Education. Information about texts or supplies will be provided by the instructor at the first meeting of the class.

ADVANCED REGISTRATIONS ARE ENCOURAGED.

Some classes have limited enrollment.

Gentle thaw, rain needed for good planting season

By William Prater
Associated Press Writer

PRORIA, Ill. (AP) - Beneath the snow and ice from this century's coldest winter lies a serious problem for Midwestern farmers. The soil is bone dry.

Climate scientists fear that without a gentle thaw followed by persistent spring rains, soil moisture will be insufficient for normal planting season needs.

That means not only hardship for farmers, but potentially higher prices for products all along the food chain.

Last year, drought parched the Dakotas, Minnesota, Nebraska, Kansas, Iowa and Missouri, seriously cutting into crop yields. Iowa usually leads the nation in leading corn producers.

But last year, its parched fields yielded only 81 bushels per acre. Illinois produced 107 bushels per acre, nine bushels under the record state yield.

Farm specialists, who had predicted a worse yield for Illinois, belatedly credited the water retention qualities of the rich prairie soil for saving production.

Now, however, they fear the area of drought is spreading eastward.

Before an early January snowstorm blankets the Midwestern parts of central Illinois had received less than an inch of precipitation in November and December combined.

"Weather patterns have a tendency to gravitate eastward," said Jack Villmow, climatologist at Northern Illinois University. "This drought area likely will move this way. Looking at recent precipitation figures you could easily say we have already started in a drought."

The snow will not be a significant addition to soil moisture when it "melts because the ground is frozen," Villmow said. There is also the worry that if critically needed spring rains do come, the ground will still be frozen in March, and April, unable to absorb the moisture.

"If the snow melts with the ground still frozen, we're going to find winds blowing our top-soil away," Villmow said.

To prevent serious wind erosion and to adequately replenish soil moisture, "a slow, gradual thaw and four or six weeks of steady gentle rain" is required, said Letter Arnold, forester and soil erosion specialist with the Dixon Springs Agricultural Experiment station in Southern Illinois.

While the worst effects of the drought last summer were felt elsewhere, Illinois and Wisconsin also were affected. Central Illinois farmers were sufficiently concerned to hire a weather modification contractor to seed clouds for rain in August.

New soil scientists are experimenting to find the best way to farm under drought conditions but are reluctant to recommend switching from traditional crops to those like sorghum and drought-resistant strains of soybeans.

Experts point out, however, that the threat of drought is far short of actual drought.

Abramson M.D. Thorne, of the University of Illinois, recalled a similar threat in March about 25 years ago. The extension service "got out an emergency publication on alternative ways to plant under droughty conditions," said Thorne. "But before it got to farmers, there was a four-inch rain."

New course in male sex role offered for spring semester

The psychology department is seeking ten men interested in participating in a new course entitled "Exploring the Male Sex Role." The five-credit course will be offered on Wednesdays from 2 p.m. to 4 p.m. and will be taught by John Morabito, assistant professor of psychology. Fred Oberg, junior in general studies, will facilitate the course.

The purpose of the course is to give male a place where they can discuss their feelings towards sex-role conditioning, Oberg said.

The objective of the course is to show other males that the male sex role is learned to the environment in which they are raised. Also, the course will offer alternatives for those wishing to understand ways in which alternative lifestyles can be incorporated into their own experiences, Oberg said.

Possible discussion topics include power and competition; feminism and the men's movement; men and their emotions; gay lifestyles; media and the male image; class, race and ages behavior. Various films will be shown and guest speakers will offer their viewpoints.

If interested, see Morabito at Life Science II, room 232, or phone 536-2361 ext. 222. The first class will meet Jan. 31.

Experimental college: custom education

PREScott, Ariz. (AP) — Under the pressure of soaring oil costs and massive revenue cuts, a small experimental college here is offering tailor-made education as an alternative to the conventional university.

The Prescott Center for Alternative Education exposes an active, innovative education based on supervised work in fields and lectures, according to James Stuckey, the center's president, who is also the fund-raising director, communications coordinator, psychology professor and mountain coach.

"It's the education of the whole person — emotionally and intellectually," he explains. "There are no spoon-fed lectures, textbook answers or perfunctory examinations. For the student without goals, the student who has learned only how to play test-taking games, the Prescott Center experience can be completely unsparing."

There are no institutionalized requirements. Stuckey says, but rather individualized requirements giving students expertise in their fields. "Students actually sign a contract (we call it a proposal) drawn up by the student in collaboration with faculty and upperclassmen in that field. In the beginning, research projects, specific courses, reading assignments and working experiences are tailored to the student. Later, the student recommends his own projects, shouldering the responsibility for learning."

To meet the center's mandatory graduation requirements of "self-direction" and "professional competence," upperclassmen increasingly use the professional world as a classroom. Students can be found working in veterinary hospitals, at the Scripps Institute of Oceanography, organizing wilderness programs for juvenile delinquents and conducting wildlife surveys under contracts from the Bureau of Land Management. Prescott Center is a college without time requirements. Stuckey explains. "If after six years a student cannot give proof of professional competence (with resumes, portfolios, working experiences, outside activities or job offers, for example), the center will not graduate him. If it can be done in less than four years, that's fine." Orientation here is a three-week wilderness immersion, including a three-day "sojourn without a supply of food, "designed to prepare students emotionally for the higher education experience," says Stuckey. "Using the wilderness as a classroom, students develop the same techniques for survival and self-reliance they will need to survive in the professional world."

And in the field of survival techniques, the center can justify its claim expertise: as a direct extension of the new defunct Prescott College, it survived a financial disaster.

The center's predecessor had been described as everything from "a wild West dude ranch" to a first-rate academic institution. Students from around the country were attracted by innovations that had established the 10-year-old liberal arts college among academia's upper echelons. But as the recession accelerated, declining endowments spelled disaster for the overbuilt college.

"Within 24 hours of Prescott College's demise, a handful of students and professors began the task of rebuilding a college using the techniques for survival and self-reliance the school had taught," Stuckey recalls. " professors agreed to massive salary cuts and a curriculum was devised so the instruction could function on the basis of student fees."

Operating in the cramped basement of a 4-year-old hotel, the school began its first semester as scheduled while the 30-million dollar campus lay abandoned. Through a grant from the Max C. Fleischmann Foundation, the center recently made a down payment on a new campus.

Mock law exam delayed for week

The Mock Law School Admission Test, scheduled for Saturday but postponed a week because the best lawyers have not arrived, Browning Carroll, Pre-law Committee chairman and adviser, announced Wednesday.

The test will now be given at 8 a.m. on Jan. 29 in Lawson 151. Prof. Carroll said students who had not previously registered for the test may do so until noon Jan. 28 at the Testing Center, Wing B of Woody Hall. There is a $3 fee.

Admission to the test requires a ticket and receipt showing payment of the fee. Those who previously registered for the test do not have to reregister.

Government jobs listing available

Information concerning summer jobs with the federal government is now available in the Career Planning and Placement Centers, room 204, Woody Hall B.

Persons may pick up copies of the job list at the Placement Center or by writing to the Federal Job Information Center, 225 S. Dearborn St., Chicago.

Eastern women underrated, according to Asian experts

By Harl S. Maniam
KUALA LUMPUR, Malaysia (AP) — Most should be done for women in Asia, according to labor and other experts from Indonesia, Thailand, the Philippines, Malaysia and Singapore who met here recently.

Experts from the Association of Southeast Asian Nations (ASEAN) member countries observed that, with the exception of Singapore, Southeast Asian women were engaged in agriculture. They felt women contributed significantly to this work, but that their contributions were underrated and often ignored.

One delegate said that not only in the agricultural sector but elsewhere, too, married women needed a threesome effort of two wage earners and a housewife, with the woman carrying the dual role.

A Malaysian paper at the seminar pointed out that a housewife who is not working is still a "contributor to employment," because when she looks after the house others are freed to work.

The paper computed her monetary value at between $40 and $60 Malaysian ringgit (about $16 to $26 U.S.) per month. A clerk at the government services begins at a salary of about $130 ringgit (about $50 U.S.) per month in the ASEAN region.

The pay was broken down into $77 for work inside the home and $7 for the food of the domestic help. $25 to pay for a part-time nurse when children fall ill or for other purposes and $8 for the services of a public relations officer each time the man entertains.

A greater value for her services could be computed if the children were toddlers and the domestic help demanded more money, and if the wife drove the children to school and carried out other chores.

In Indonesia equal opportunities for education and training exist, but in reality few females are educated, the Indonesian paper said. It blamed social and cultural barriers.

The Philippine group said females outnumber males in Filipino schools and there are more female professional graduates than males, but males outnumber females in managerial, proprietary and other high-salaried positions in private and government employment.

An additional problem facing women in the region was conflicting roles at work and home, resulting in many leaving work once they marry.

About half the female labor force is married.

The Southeast Asian woman, and perhaps the Asian and African woman has the problem of where to leave her baby when she goes to work.

Head of the Thai delegation, Mrs. Khunying Boonleun Kruathruck, said, "I personally would not send my children to a day nursery. We prefer to send our children to their grandparents or relatives."

But she said lower-income women have had no choice but to put their children in the nursery and added it would hurt their other functions.

Others said nurseries organized by employers would be the best, as the children would then be near where the mothers worked.

The seminar said it felt equal pay for women was provided by law, but too often not enforced. It called for greater government effort to enforce such laws. It added that if it felt the hardest thing to fight in order to give women a better deal was male prejudice, if a girl and a man with equal qualifications go for a job the man gets it, bosses just prefer the men, it said.

The seminar said for women it would continue to be an uphill battle, especially when many women in the region were not sure if they wanted the burden of an equal say in running things.

WILDLIFE PRESERVE
MIAMI (AP) — Miami Seaquarium, 45 acres of bird and marine life on Virginia Key, has been declared an official wildlife sanctuary by the Dade County Park and Recreation Dept.

This land and sea area provides a home for hundreds of species of fish and birds, bottlenosed dolphins, killer whales, sea lions, sea turtles, alligators and iguanas. The area is also a rookery for many varieties of wild birds.

Campus Briefs

The talk by Professor Joseph P. Streika originally scheduled for 3 p.m. Thursday in the Faner Museum Auditorium will be at the same time in the Illinois Room Student Center.

The proficiency exam for Botany 200 will be given at 9 a.m. Feb. 5 in Life Science II, room 480. All interested students must register with the botany department by Feb. 2. To register, students may either call 536-2331 or visit Life Science II, Room 480.

The SIU Film Society will hold a meeting at 5 p.m. Friday, and anyone interested in joining is welcome. For additional information and meeting location, contact Dave Eubank at 457-6239 or Ed Horton at 549-5168.

The Jackson County Historical Society will present a program by Mrs. Katie Fiene, president of the Illinois State Historical Society, at 2 p.m. Sunday in the meeting room of the Sallie Logan Library, Murphysboro. Fiene, a past president of the Randolph county Historical Society, is the second woman in the society's 77-year existence to hold the position of president. Officers for 1977 will be nominated at this meeting. Members and guests are invited.

The SIU Employees Credit Union office, 903 W. Whitney, is open from 9:30 a.m. to 2:30 p.m. Monday through Friday.

A chapter of a novel written by Steve Teitz, graduate teaching assistant in English, has been published in the Fall 1976 issue of the Randolph county Historical Society. The selection, "Peach Melba," is taken from Teitz' novel, "The Team that Played Away," currently in progress.

Jimmy Carter's inaugural latest of presidential firsts

CHICAGO (AP)—When Jimmy Carter of Plains, Ga., is inaugurated today, he will be the first president from the Deep South since before the Civil War.

This White House "first," however, is only the latest in a lengthy list of similar distinctions since 1800, when John Adams became the first president to live in the White House. He was also the only chief executive whose son also served as president.

Theodore Roosevelt was the first to live in the White House in 1901, because he was inaugurated in Washington, D.C. Andrew Jackson was the first president to be nominated by a national political convention. John Tyler was the first president to be married while in office.

White Ford and Carter gained national exposure through television debates. Woodrow Wilson was the first president to make a radio broadcast, when he spoke in 1919 from a ship to World War I troops aboard other vessels.

Calvin Coolidge's inaugural address in 1925 was the first to be broadcast. But it was not until Franklin Delano Roosevelt's "fireside chats" of the '30s and '40s that a president realized the power of this medium and used it extensively both to address the public and elicit its support, according to The World Book. F.D.R. was also the first president to appear on television, speaking at the opening ceremonies of the New York World's Fair in 1933.

Two consumer projects receive federal grants

By Debbie Smith-Short Daily Egyptian Staff Writer

The Family Economics and Management Department at SIU has received two one-year grants for consumer education projects in Illinois.

The grants, one to be used to develop a handbook for consumer economic teachers and the other to develop a consumer education program for prisoners, total $41,746, according to Thomas Brooks, professor in family economics and director of both programs.

Appropriating $31 million for the programs, $8 grants were awarded out of approximately 565 applications which totaled approximately $750 million. The grants are supported by the U.S. Department of Health, Education and Welfare's Office of Education.

The emphasis of the program is to meet the special needs of target populations that educators have not concentrated on. Work began on the projects Sept. 1.

For the teachers' project, Brooks' program has conducted surveys and testing in 80 Illinois high schools to identify outstanding consumer economic teachers. The results of this survey have not been tabulated.

The next step in the program is to hold a workshop to meet with the selected teachers to determine the secrets behind their success. Brooks explained. The information related in the workshop will be used to compile a handbook.

In order to develop a program meeting the prisoners' needs, Brooks is using a task force of prison residents, House of Glass residents, parolees, Corrections Department employees and community residents to help determine the best teaching methodology for the prisoners.

"Many of the prison residents have been in prison for years," Brooks said. "Things have changed. This program will help prepare them for the outside world. It will also teach them to better handle their money, a weakness which may have caused some of them to end up in prison."

Company finds comic relief for finance report explanation

By Georgia Eizer
Associated Press Writer

HAMPTON, N.H. (AP) - A cure for financial jargon-gook? It's child's play as far as one company is concerned.

The firm issues annual reports in five-grade reader style with cartoon characters.

"The Big Pie," the latest report form Wheelabrator-Frye Inc., showing a cutting up a financial pie to illustrate the firm's income, expenses and savings in simple terms.

Each report also contains a basic lesson in economics.

"Imagine that all the money people receive from their jobs is represented by a big pie," says the text. "We can cut the pie into smaller pieces so everyone shares, but they all get a piece. Or else, we can make more jobs by making the pieces bigger. By doing this, everyone will be better off and get a bigger piece."

One of the characters is the smiling saigon who is used to illustrate how new plants create new jobs. He is standing on a garbage dump on which Wheelabrator-Frye built a new plant.

"Only the saigon was happy about the garbage dump because they had left their dinner behind," Brooks said.

RARE THAI JAR

NEW YORK (AP) - A rare, 12th-century Thai ceramic jar is part of an exhibition of Southeast Asian Ceramics on display at the Asia House Gallery here.

The jar was donated to the Asia House by the Thai government as a token of friendship.

Long lost male German Shepherd, white head, black body, 245 S. Main. Returned to 12 year old owner. Please call 545-7402.

**Video Tapes for Teaching**

Initial lessons for the teaching material include basic sciences, child care, consumer problems, introduction to business, world cultures, and mathematics. Teaching centers could be set up in schools, libraries, free rooms or other public places.

First, because it should pay for itself through small tuition charges, it could have great impact on mass education. Properly tailored by experts in the various fields of knowledge, it would eventually stir today's poorly informed public to demand government action for crucial, unmet problems such as crime and energy shortages, he said.

Secondly, over a longer range, the teaching system could help to revitalize rural areas and play a role in reversing urban competition that has caused many of today's social ills, he said.

By Dan Hall

Associated Press Writer

STAMFORD, Conn. (AP) -- A group of U.S. community colleges is courting adult minds with a portable video tape machine that can do the job of eight teachers.

An attendant drives the $30,000 device to any building equipped with a special television set for each class. Hooked up, it can deliver up to eight-hour-long lessons chosen from as many as 60 lessons recorded on the single tape.

Annually large number of lessons can be grouped on the conventional one-inch magnetic tape because still pictures, not moving ones, accompany the voice record.
Three unbeaten head AP Top 20

By The Associated Press
San Francisco, Cincinnati and Alabama — all unbeaten — were the top three teams after the ballots were counted Tuesday in the weekly Associated Press major college basketball poll.

The San Francisco Dons stretched their record this season to 19-4 after lopsided victories over Pepperdine and Los Angeles Loyola last week. The Dons received 38 of the 52 first-place ballots and 962 points from a nationwide panel of sportswriters and broadcasters.

The Cincinnati Bearcats, ranked No. 1 in early January, picked up four first-place ballots and 796 points. Kentucky, which had held the runner-up spot in last week's poll, fell to sixth place after dropping its second game of the season, a 71-63 overtime loss to Tennessee.

Banks in Hall of Fame

NEW YORK (AP) — The Baseball Writers Association of America voted Ernie Banks into the Hall of Fame Wednesday and the longtime Chicago Cub slugger repaid the compliment with the humility and humor that have always marked his Field , he uses the adjective “beautiful.”

“From players and family that molded Banks' outlook on life. "I like to do everything in my life with a smile on my face and a good thought in my heart," he said.

"So everytime he mentions Wrigley Field, he uses the adjective "beautiful." And everytime he mentions the fans there, it's a family atmosphere." For Banks, Chicago is heaven and Wrigley Field is home.

"There's nothing in the world like being in beautiful Wrigley with a hot dog, sitting in the bleachers, taking off your shirt and enjoying the game," he said.

Banks became the Cubs' ambassador of happiness. Traditionally, he would come out on the field for batting practice and greet the fans and writers with a standard line. "What a beautiful day for a ball game," he would say. The clouds could hang low over Wrigley Field and not rain, it was always "a beautiful day."

Banks admitted that the Cubs' steady diet of day baseball affected his outlook on the game.

"My wife left the house and he'd leave for work when it was dark," said Banks. "I remember saying to myself that some day I'd like that job where I could work days."

PURCHASES MAY BE CHANGED
Glenn third in Valley scoring

Mike Glenn is third in scoring in the Valley with 25.4 points per game, according to statistics recently released by the conference. Indiana State's Larry Bird leads the league with a 29.9 mark, which puts him sixth in the nation. Bradley's Roger Piegley is second in the conference at 26.5.

Gary Wilson of SIU is tenth in rebounding at 7.4 per game. The conference league leader is Wichita State's Robert Elmendorf, who is third in the nation.

These Salukis dominate the conference field goal category. Cory Abrams leads with a .540 mark, while Glenn is sixth at .586. No Salukis are among the ten leading free throw shooters.

In team statistics, SIU ranks first in the nation with a .704 points per game average. However, the Salukis lead the Valley in defense, letting up only 47.1 points a game.

SIU is fifth in team rebounds with a 41.5 mark and third in team shooting percentage with a .534 mark. West Texas leads the conference with a .589 clip which ranks second in the nation.

The Salukis are last in free throw percentage, hitting only .597 per cent of their shots. SIU ranks second in scoring margin, with a plus 12.0 mark. Eight Valley teams have a plus scoring margin over their opponents.

The two newest teams in the Valley, Creighton and Indiana State, have a combined 64 record against Valley foes, and would be leading the league if eligible. Both squads have combined records of 25-5 this year.

Valley teams are 48-34 against non-conference competition this year for a 64 per cent winning effort.

Matmen, men top wrestlers, face nationally-ranked Oklahoma squads

By Jim Mumaas

Daily Egyptian Sports Editor

Southern Illinois' wrestlers embra the 1972-1973 season. Three meet Oklahoma road trip with three of its top wrestlers. The Salukis are currently seventh in the nation in team points. The Salukis are fourth in team rebounding with a 43.5 mark, third in team shooting percentage with a .519 mark, and fifth in team free throw percentage with a .589 clip.

Radio coverage

Two local radio stations will broadcast Thursday's and Saturday's SIU basketball games. The Salukis face West Texas State Thursday and New Mexico State Saturday.

WJFP, 1340 AM, will go on the air at 6:30 p.m. with the Paul Lambrecht Show on Thursday. The Salukis vs. New Mexico State game will start at 8:30 p.m. On Saturday, the Paul Lambrecht Show will be aired at 7:30 p.m. and the Salukis vs. Cornell game will start at 8:15 p.m. Mike Fowell will handle the play-by-play.

WSIU, 91 FM, will go on the air at 7:30 p.m. Thursday and 8:30 p.m. Saturday. Bill Crowell will handle the play-by-play.

IM basketball state changes

The Office of Recreation and Intramurals has announced these changes of the intermural basketball schedule printed in Wednesday's Daily Egyptian. Effective immediately:

• Noon: Saturday High Times vs. Ethical Eagles (instead of Delta Chi "A" vs. Sigma Tau Gamma).

• 3 p.m. Saturday: Delta Chi "A" (instead of Alpha Gold) vs. Chiomega.

• 7 p.m. Monday: Delta Upsilon vs. Alpha Chi Thetas (instead of Delta Chi "A" vs. Sigma Tau Gamma).

• 7 p.m. Saturday: Delta Upsilon vs. Alpha Chi Thetas (instead of Delta Chi "A" vs. Sigma Tau Gamma).

VETS

The SIU Vets Club will hold its first meeting of the spring semester this Sunday. If you attend, you might just find out that the Vets Club has something to offer you. Such things as friendship, help, sports, social goodties and a chance to participate in our community service projects are available to you. All we ask is that you give us a chance and come to our meeting. We need your ideas and we need your support.

TIME: 1:30 p.m.

PLACE: Truck-On-In

DATE: Sunday, Jan. 23

SPEAKER: local VA representative to explain the recent changes in Veteran benefits and how they affect you.

TOPICS: semester activity schedule including our bus trip to the SIU/Bradley basketball game.

Trade to Atlanta gave Joe C. starting role

By Rick Rorsch
Daily Egyptian Sports Writer

Forty-Six All-Americans Joe C. Meriwether has already come into his own in his short 1 1/2 year professional basketball career. He has starred at center. But in the NBA, he has been coached forward for the Atlanta Hawks.

It's an adjustment playing forward, Meriwether said during an interview in April. "I played forward my whole career (with the Houston Rockets), but now I'm strictly a forward, although I do play a little 5. It's different, but I don't know.

"That's up to the coaches," he said. "Satisfied with his scoring average but only if he can improve over the years. What he isn't satisfied with is his rebounding average of 8.7 a game, even though it's a pretty good average for a forward."

"I want to average double figures," he remarked. "I'm also leading the league in another category, one that I'm not very proud of." He said Lambert.

"I lead the league in fouling out," he meekly commented.

Getting into foul trouble was always his biggest problem at SIU. He fouled out of about one-third of his Hawk games.

"I don't know why it is. Maybe the other teams pick on me," he said, although he really hadn't meant it.

Surprisingly, Meriwether's best games have come against Jabbar, who some consider the best player in the world. Joe C. has had both 24- and 29-point performances against the 7-2 giant, and he usually covers Jabbar when the two teams meet.

"I think I might be up when I play against him. But who wouldn't?" Jabbar said.

Meriwether wouldn't call Jabbar the toughest foe he has faced.

"It's hard to say one is tougher than another. They're all good up here. I respect Artis Gilmore a lot.

With the rigorous NBA schedule of 82 games a year, Meriwether hasn't been able to keep up with the current SIU team as much as he would like to. He was pleased that the Salukis made it to the Top 20 in December, something they were unable to do when he was at center.

Meriwether thinks current Salukis Mike Glenn and Corky Abrams both have good chances to play in the NBA after they are graduated this spring.

Saluki defense to challenge Buffs' high-powered offense

By Dave Hens
Daily Egyptian Sports Editor

The Salukis' cagers' defense, which is tops in the Valley allowing only 62 points a game, will get the supreme test Thursday night when it challenges the West Texas State offense, which is No. 1 in the Valley with an 84.5 average.

Tippelf is slated for 7:30 p.m. (CST) at the Amarillo Civic Center in Amarillo, Tex.

West Texas State leads the Valley with 194 points a game. They are powered by a balanced attack that features double figure scoring from all five starters.

For the Salukis (9-3), the game is the first of a tough two-game road trip that will pit them against the early season Western Valley leading teams. They will face New Mexico State (1-4 in the Valley) Saturday.

"They (the Buffaloes) have four guys that started against us last year," said Saluki Coach Paul Lambert. "And they have three returnees in (Maurice) Cheeks, (Melvin) Jones and (Eugene) Smith."

"They like to get the ball out and run, run, run, run," he repeated.

Cheeks, a 6-foot guard from Chicago, usually gets the job of covering Mike Glenn, the Buffs' 6-6 center, and probably will be matched up against the other Saluki guard.

They play both a straight man-to-man and a 1-3-1 zone," said Lambert.

Appropriately the high-powered offense of the Buffaloes has not hurt the defense any. They are rated No. 2 in the Valley, allowing 69 points a game.

Smith, a 6-4 forward, leads the Buffs in scoring with a 15.7 average. Filling out the rest of the starting five are: guard, (Melvin) Jones and (Eugene) Smith.

The situation has the other Valley teams wondering what will happen if West Texas State is to win the tournament. The team will play in the post season Valley tournament, however.

But for the Salukis, their only worry now is what West Texas State will be doing Thursday night. And then the Buffaloes bringing in some impressive Valley statistics, like a .422 field goal percentage and a .767 free throw percentage, is a pretty tough proposition.

So assuming my quest to follow a winner or see a good contest was impossible, I left Florida, not bothering to stick around for the USF-SMU swim meet. And wouldn't you know it? In one of the most exciting meets of the year, the Salukis upset the Hurricanes in their home pool.

And finally the worst of all. Trading the 75 degree sunshine, tennis, golf and bikini watching for a foot of partly cloudy is worse than even Notre Dame, Bear Bryant, Woody Hayes and Curt Gowdy rolled into one.

This year's games went down with a flush

Christmas season usually is one of the most exciting times of year in the world of sports. This year it was nothing short of an anticlimactic.

It seemed that all the wrong teams were winning in the college bowl games. The only bowl that was correct was the Mississippi State game with Alabama mangling UCLA in the Liberty Bowl.

One of my greatest pleasures in past-season college football was that every year you could count on Bear Bryant losing. It really hurt watching them whip the Brackets with his Ironclad defense.

It got worse. In fact it got so much worse, instead of Sugar Rose and Orange, they should have used the word Toilet.

I was in Jacksonville, Fla., during the Gator Bowl. Apparently the Gator fan club brought a bargain at a bargain—$1 ticket for $4—and fell asleep watching Kansas City running back Larry Johnson. Notre Dame beat Penn State and then having to listen to all the congratulations to the Irish. I nearly tear down the Jacksonville Howard Johnson's.

Then I turned down as even better offer for the Orange Bowl. Apparently the Gator fan club was selling Sugar Bowl tickets. The Gator ticket was Notre Dame beat Penn State and then having to listen to all the congratulations to the Irish.

As a matter of fact, the only team I rooted for that won was Pittsburgh. It was nice to see an Eastern team get a piece of the cake for a change, but what a harry the MAN!"

Mike Glenn and Corky Abrams both have very good chances to make it, Meriwether said of his former teammates for two seasons.

"Well man, I have to go," he said, as his long, slender frame got up to leave. About ten of his friends from his SIU days were waiting to talk to him before he headed back to Atlanta.

Editor's note: this is the second of a two part series on former Salukis Joe C. Meriwether, who now plays for the Atlanta Hawks.

Joe C. Meriwether

"Mike and Corky both have very good chances to make it," Meriwether said of his former teammates for two seasons.

Off the post

By Lee Feltsavage

The Salukis were on the outside looking in at the NCAA tourney picture. They had been out of the Top 20 for two weeks, and the only way they could get back in was by defeating Western Kentucky.

The Salukis were favored by seven points against the Hilltoppers, who had just lost to Ohio State.
