Reagan calls anti-U.S. terrorism 'acts of war'

WASHINGTON (UPI) — President Reagan charged Monday that Iran, Libya, North Korea, Cuba and Nicaragua "are now engaged in acts of war" against the United States and blasted their leaders' "strange collection of squallid criminals" since Adolf Hitler's regime.

In a speech to the American Bar Association, Reagan said the "real goal of the terrorists is to expel America from the world," and that the United States had the right to defend itself against "fanatical hatred.

"These terrorist states are now engaged in acts of war against the government and the people of the United States," he said. "And under international law, any state which is the victim of acts of war has the right to defend itself." 

"And we are especially not going to tolerate these attacks from outlaw states run by the strangest collection of dictators, Loney Tunes, and squallid criminals since the advent of the Third Reich," he declared.

Reagan named Iran, Libya, North Korea, Cuba and Nicaragua, saying the countries were "continents away, tens of thousands of miles apart," but all shared "the same goals and objectives.

But he did not include Syria, whose president, Hafez Assad, was instrumental in the returning of the TWA hostages, and who and the administration wants to help in the release of seven kidnapped Americans still being held in Lebanon. He said the strategic purpose "behind the terrorism sponsored by outlaw states is clear: to disorient the United States, to disrupt or alter our foreign policy, to sow discord between ourselves and our allies, to frighten Third World nations working with us for peaceful settlements of regional conflicts.

"In short, to cause us to retreat, retreat, to become Fortress America," he said.

‘Build Illinois’ nets $2.9 million for SIU

By John Krolowski Staff Writer

"Build Illinois" finally passed through the Illinois General Assembly Monday, giving the SIU System $2.9 million, said Republican Sen. Ralph Dun, Carbondale.

However, the $7 million that had been earmarked for a Small Business Incubator Project at SIU-C did not pass Monday, he said.

Carbondale will receive a little over $2 million from the bill in its first year. Of that money, $419,000 will go for sewer projects, Dunn said.

Local lawmakers, some of whom had expressed opposition to the public works program as recently as last week, were pleased with the final version of "Build Illinois," he said. "And under international law, any state which is the victim of acts of war has the right to defend itself.

"And we are especially not going to tolerate these attacks from outlaw states run by the strangest collection of dictators, Loney Tunes, and squallid criminals since the advent of the Third Reich," he declared.

Reagan named Iran, Libya, North Korea, Cuba and Nicaragua, saying the countries were "continents away, tens of thousands of miles apart," but all shared "the same goals and objectives.

University looks for more efficient health plan

By David Sheets Staff Writer

The University administration is looking into proposals for a more cost efficient health plan in addition to implementing an improved University health insurance plan. SIU-C President Albert Somit said.

Somit made the statement before an informal meeting with Undergraduate Student Council last Tuesday.

Somit had been invited to review the organization's status to date.

"The principal reason for the consideration is because the University operates its own health service and clinic in a community that already has a very fine hospital and a number of clinics," Somit explained.

BRUCE SWINBURNE, vice president for student affairs, said in a later interview that one proposal of a cost efficient medical program was critical for the upcoming 1987 fiscal year.

"If we keep the same plan we have had in the past into the next fiscal year we will have to raise the amount of the health cost absorbed by the student," said Swinburne.

Swinburne said the present health liability plan for each SIU-C student is $20,000. The new program, still to be detailed, said sponsored through Blue Cross and Blue Shield, will decrease the coverage to $50,000.

"WHAT WE are now doing is looking at many different alternatives in an effort to keep costs reasonable," said Swinburne. He could not say exactly when the new individual student plan will be implemented.

Swinburne described the three predominant ideas being considered for student coverage. The first is a student plan with private medical agencies or clinics for a campus service plan, said sponsored through Blue Cross and Blue Shield, will decrease the coverage to $50,000.

"WHAT WE are now doing is looking at many different alternatives in an effort to keep costs reasonable," said Swinburne. He could not say exactly when the new individual student plan will be implemented.

Swinburne described the three predominant ideas being considered for student coverage. The first is a student plan with private medical agencies or clinics for a campus service plan, said sponsored through Blue Cross and Blue Shield, will decrease the coverage to $50,000.

The second proposal, Swinburne said, would be a health care plan connected with the Family Practice Center in Carbondale. A third would be with the Carbondale Clinic Shield. Swinburne stressed that the specifics for each plan are still being worked on.

"WHEN WE say health care, there are five priorities we look at all the time: accessibility, quality, cost, the quantity of the available care and the amount of student involvement," said Swinburne.

Swinburne. "The student involvement part is very important because that helps us determine what we are going looking for, by the number of students that take part."

Swinburne explained that the individual student coverage plan takes into consideration such specifics as hospitalization, ambulance care, referral to other medical facilities, and other major medical insurance policies.

"THIS NEW coverage would also help cover health costs for the students." See PLAN, Page 5

Mainstreet East ordered to close for 2 days

By Bob Titia Staff Writer

The Carbondale Liquor Control Commission on Monday ordered that Mainstreet East, 213 E. Main St., close for two days for serving beer to an underage patron, but agreed to drop another charge against the bar for allowing people outside the bar with open liquor.

The two-day closure was agreed to after Mainstreet's co-owner Paulette Curkin changed her plea from not guilty — guilty to the underage sale charge. The violation took place in January.

City Attorney Barbara Colvin told the commission, which is also the City Board, that the bar's past record should be taken into consideration when deciding on a proper penalty. She said that Mainstreet's other violations of the liquor code occurred in 1982.

"It is my impression that they are making a sincere effort to operate within the law," Colvin said. "The licensee and I have agreed to a two-day suspension to take place on July 15 and 16." The commission went with Colvin's recommendation, but changed the days that the bar will be closed after Curkin revealed that the business was not planning to open on July 15.

Curkin suggested that the bar be closed on consecutive Tuesday and Thursday.

The commission voted to close the bar on Sunday July 14 and Tuesday July 16. The commission also voted in favor of Colvin's recommendation on the charge for open liquor outside the bar, which also occurred in January.

French truck-bus crash kills 8, injures 5 Americans

SAINT-PIERRE-DE-VAUVRAY, France (UPI) — A Paris-bound express train slammed into a truck at a crossing Monday, killing eight people and injuring 47 others, including five Americans. The train, en route to the capital from the English Channel port of Le Havre, was traveling at about 80 mph when it hit the truck at 9:13 a.m. in northern France, said French National Railway officials.

Reagan, Congress work on new budget ideas

WASHINGTON (UPI) — Senate Republican leader Robert Dole said Monday he will look for "new ideas" from the White House when congressional leaders meet with President Reagan this week to try to break the budget deadlock. White House spokesman Larry Speakes said Monday the president hopes to help formulate a deficit-cutting budget with meetings Tuesday and Wednesday, but will resist any move to increase taxes.

Pentagon questions jet fighter cost increases

WASHINGTON (UPI) — The Pentagon has questioned the Air Force about a more than 40 percent increase in the prices of F-15 and F-16 fighters in the past five years, according to the contents of a memorandum obtained Monday. Both aircraft, which have been produced since the 1970's by two different contractors, form the backbone of the Air Force's fighter strength.

Suspect in slayings judged fit to stand trial

CALGARY, Alberta (UPI) — Charles Ng, suspected in as many as 25 sex-torture slayings in California, underwent a psychiatric examination Monday and was judged mentally fit to stand trial on attempted murder and theft charges in Canada. The development apparently will delay plans to have Ng extradited to California to stand trial for his alleged role in the slayings of up to 25 people at a mountain hideaway in California about 150 miles northeast of San Francisco.

Gunbattles spur more security plans for Beirut

BEIRUT, Lebanon (UPI) — Gunbattles between warring militias erupted Monday in Beirut and the northern port of Tripoli, killing eight people and pressuring Muslim and Syrian leaders to seek ways to bring security to Lebanon. A group of army commanders finished a plan to improve security at Beirut International Airport because of the hijacking of TWA Flight 847 last month and the 17-day captivity of 39 American hostages.

China says textile export bill will hurt trade

PEKING (UPI) — China said Monday that a bill in Congress that would reduce Chinese textile exports to the United States by more than 90 percent would "seriously" jeopardize trade relations between the two countries. "Passing of the bill would be detrimental to both sides," said an article a paper published by China's Ministry of Foreign Economic Relations and Trade.

Erratic winds aggravate California brushfire

SAN LUIS OBISPO, Calif. (UPI) — Erratic winds returned Monday to push a 35,000-acre brushfire into a coastal city where 2,000 people were evacuated and a state of emergency was declared as the toll from wildfires in the West mounted. Gains made during a weekend of favorable weather were wiped out as the flames roared through Central California, forcing the closure of the Cal Poly San Luis Obispo campus.

Greyford defense rests; judge declines testimony

CHICAGO (UPI) — A Cook County circuit judge accused in the "Operation Greyford" ease of accepting thousands of dollars from 1980 to 1983 to fix parking tickets and drunken driving cases declined to testify Monday, and the defense rested its case. Circuit Judge Richard F. LeFevour told U.S. District Judge Charles S. Norgle Sr. that he would remain silent and "knowingly waive" his rights.

Bicycler’s 2,700-mile ride helping dyslexia research

By Elizabeth Cochran
Staff Writer

Creating public awareness of the learning disability known as dyslexia and raising money for researching its cure are among the goals this year-old dyslexic college student is traveling 2,700 miles across country.

Andy Geiser began his trip March 14, near Carbondale, and expects to complete it July 31 in Washington, D.C.

His nonprofit organization, The Carbondale Turley Park 10 p.m. Monday to support awareness and understanding of dyslexia.

Geiser was welcomed by Barbara Gordon, director of Project Achieve, the SIU-C program for dyslexic students.

Geiser spoke enthusiastically of his coming to terms with his dyslexia.

"There is not a keen awareness of the disorder, I don’t think people want to pump their dollars into research of a subject they know nothing about," Geiser said.

Dyslexia is characterized by reversals in word and letter order, sometimes as accompanied by hearing and speech problems. He decided to bicycle across country and lecture about dyslexia because it would attract attention.

"Information in pamphlets distributed by the Orton Dyslexia Society, the group holding Geiser’s trip, says that a dyslexic might read the word "molecule" as unscire, or jumble the words in a phrase such as "please hurry up", to "pleased hurry up!". Geiser said that dyslexia does not mean lack of intelligence, and added that 25 percent of dyslexics are in the gifted range.

Geiser said dyslexia is often difficult to diagnose.

He was diagnosed as dyslexic his senior year of high school, although he has suffered the disorder all of his life.

After his diagnosis, he dropped out of school, because he had severe problems getting along.

Geiser took his high school equivalency test, and was later accepted into college because of his high ACT scores.

After flunking out of college twice, he went to brother’s school, received his brother’s diploma and opened his own real estate company.

Geiser was able to save enough money to return to college, and is now a junior at the University of Hawaii majoring in business, and maintaining a 3.5 average.

"I had the reading comprehension of an eighth grader, and I had to teach myself to read all over, he said.

Although his bicycle trip will end July 31, he will continue lecturing throughout October, and will not end his campaign until progress is made.

Senior center needs $100,000 for repairs

By Bob Tita
Staff Writer

The Carbondale Senior Citizens Center has collected $22,000 from a fund-raising campaign that began in February, but more than $78,000 is still needed to pay for building repairs.

The center, located in the former Spring View School, 409 S. Springer St., needs extensive roof repairs and a new furnace.

Carol H. Johnson, executive director for the center, said, stating the building will cost about $155,000.

The leaking roof has caused damage to the center’s dining room, a waiting room where the adult day care room. Johnson said roof repairs will cost about $11,000.

Carbondale residents have been affected by the damage, Johnson said. The center’s building was constructed in 1935, and has been owned by the city for 19 years.

"BECAUSE WE aren’t able to repair the damage last year, there has been additional damage this year," Johnson said.

A new gas furnace, costing about $80,000, will be installed by fall. The center is still needed to pay for building repairs.

SIU Law School gets acting dean

Edward Kionka has been appointed acting dean of the NIU Law School.

Kionka, an associate dean, will serve as acting dean until July 31. Rennard James Strickland, of the University of Tulsa, will become the Law School dean then.

Correction

Carbondale City Clerk Janet Vaughn has informed the city’s liquor license holders concerning the SIU-C identification cards and acceptable proof of age for buying liquor.

Vaughn said she misunderstood the liquor code as to what the SIU-C cards could be legally accepted by liquor establishments. She now news media that liquor establishments, prior to accumulating numerous counterfeit violations during a six-month period, could take SIU-C cards.

The state’s liquor code, however, are not legal proof of age under any circumstances. The amended version of the code which took effect July 1, states that only a driver’s license, a state-issued identification card, a state-issued license, a state-issued identification card or a visa or passport are acceptable proof of age.

Violent retaliation won’t end terrorism

AS IMAGES OF THE HIJACKING OF TWA Flight 847 fade into the not-so-distant past, and the anger and frustration of being a victim of terrorism abate, the question arises what to do to prevent another terrorist crisis has come to the forefront. Understanding what to do to prevent terrorism can only come from an understanding of what causes it. In the case of the United States and the Shiite Moslems, the group that held 40 Americans hostage, there have been a number of actions by the United States that have given the Shiite reasons, but not justification, to lash out.

Probably the most obvious action the United States has taken is the unconditional support for Israel. The Israelis have repeatedly committed violent acts against the Shiites. They broke international law with the massacre of 25 Shiites in a Southern Lebanese village and imprisoned over 700 Lebanese civilians in violation of the Fourth Geneva Convention. The United States connected itself to these acts by vetoing U.N. resolutions condemning the Israeli actions and by increasing aid to Israel from $32 billion to over $4 billion since the Israeli invasion of Lebanon in 1982.

The United States also provided political and military support for Lebanon’s Christian President Amin Gemayel, whose basic political philosophy is opposed to the Shiites. U.S. military personnel were involved with Gemayel, who shielded Beirut’s Shiite suburbs with U.S.-made tanks and artillery. The United States then occupied Beirut International Airport and shielded Gemayel positions with the battleship New Jersey and other U.S. warships.

IN SHORT, THE UNITED STATES has involved itself in the affairs of the Shiites, either directly or indirectly, far more than most Americans realize. The hijacking was not an unprovoked act, but a terrorist act perpetuated by a harrassed and oppressed group. It is not an excuse for brutal acts, and it makes the Shiites seem more like desperate human beings, rather than anamalistic anarchists, as the Reagan administration portrays them.

The causes of most terrorism can be found in complex events that are not easily explained by simple solutions. And the United States is the start of the process. Calling for the court martial of those responsible for the murder of Navy diver Robert Stales and other Americans who have been killed by terrorist actions would probably do no more than undermine any hope in the future for Shiite-American peace and would only increase the rift.

Any preventive action taken should be done with the grace and dignity that President Reagan used to help arrange the hostages’ release. Calling for justice against the original hijackers responsible for the murder of Navy diver Robert Stales and other Americans who have been killed by terrorist actions would probably do no more than undermine any possible hope in the future for Shiite-American peace and would just escalate the violence.

The people of Southern Illinois need to let Rep. Ken Gray, D-Ill., know immediately that they support his decision to endorse the research phase of the President’s Strategic Defense Initiative (SDI). An early criticism by the media of President Reagan was the unfounded accusation that Reagan oversimplified complex issues. I suggest the media is the culprit when it comes to oversimplification.

No doubt the majority of the media and its personnel understand the complexity of Star Wars far better than they understand the complex nature of strategic nuclear deterrence, war and defense. Star Wars was first class, action-packed entertainment for moviegoers from Steven Spielberg — purely science fiction. SDI is a national military initiative intended to move U.S. nuclear defense policy away from mutual assured destruction (MAD) and towards mutual assured survival (MAS) by defending the United States against an intentional or inadvertent limited nuclear attack. But the media could not resist simplifying and distorting the meaning of SDI beyond comprehension by attaching the cute connotations with a movie made for summertime viewing pleasure.

The term “Star Wars” communicates nothing except either a movie or the critics’ presumptions and misinformation concerning America’s attempt to avoid nuclear destruction during the next 50 years. If the argument against SDI is that the system cannot be 100 percent efficient in destroying a total launch by the U.S.S.R. (thousands of missiles) and that even 10 percent of their arsenal is enough to “kill” our nation, then consider an intentional or accidental launch of a few (one to 30) missiles. Shall we allow them to vaporize our capital, cities and military bases? Launching a few of our missiles in retaliation would only escalate the MADness and wouldn’t restore the pre-war United States.

So let us reject the policy of MAD and move toward the policy of MAS. Let us shoot those missiles down with a non-nuclear defense and stay our finger from our own button which, if pressed, will spell the end of civilization as we know it.

Nuclear survival requires a new and radical approach if it is to be a reality. SDI is that approach. SDI will handle limited launches with near 100 percent efficiency. We have the talent and technical capability to research and develop the SDI system. Let’s build it.

Contact Rep. Gray and senators Dixon and Simon. Let them know you do not want to be held hostage to the threat of nuclear destruction. If you support America’s SDI effort and that they also — David S. Sadtler, Carbondale.

Letters Policy

Signed articles, including letters, Viewpoints and other comments, appear in the opinion section with the approval of their authors, only. Unsigned editorials represent a consensus of the Daily Egyptian Editorial Board, whose members are the student editor-in-chief, the editorial page editor, the managing editor, the faculty managing editor and a Journalism School faculty member.

Letters are limited to 150 words. Letters longer than 150 words will not be considered. Letters should be typed and are not subject to editing. Letters are not returned. Letters submitted by mail or directly to the editorial page editor. Room 1067, Communications Building, or submitted electronically must be double spaced. All letters are subject to editing and are not returned. Letters of less than 250 words will be given preference for publication. Students must include their names, addresses, phone numbers and college or major memberships. Letters from students in foreign countries will be edited for subject matter. Letters from non-students will not be published.

Letters submitted by mail should include the author’s name, address and telephone number. Letters for which verification of authorship cannot be made will not be published.
State high school students' reading, math ratings fall

By Paula Buckner Staff Writer

A 1984 Illinois State Board of Education report states that Illinois high school students show a general performance decline in mathematics, science and social studies compared to national and international students.

The study’s “Student Achievement in Illinois: An Analysis of Student Progress,” also provides strong evidence that the size of the school and student achievement are directly related.

The findings were discussed Monday at SIU: C in a meeting of the committee of the state education board and the Illinois Board of Higher Education.

“We seem to be getting further and further behind,” said Thomas Kerins, director of program testing and evaluation at the Illinois State Board of Education.

Although Illinois’ academic performance by Illinois students is “average,” said Kerins, the analysis “acts like a mirror” in challenging high school administrators to evaluate their institutions’ academic programs.

“What we’re asking school administrators is: What do your students know and what are they expected to know and if students aren’t learning, then do something about it,” Kerins said.

The report links school enrollments of fewer than 214 students to low achievement. It’s also assumed that reorganization and possible consolidation of these small high schools may result in students’ higher achievement.

“We’re looking at improving education quality instead of just adding more students,” Kerins said. “Perhaps there are better ways to provide education for students to be educated,” he said.

A controversial provision of a recently passed education reform package focuses on the elimination of schools with fewer than 214 students. Such mergers are not required by the reforms, but would take place only with voter approval.

A major educational challenge faces voters against district reorganization, said Ted Sanders, state superintendent for schools. “When they vote for smaller schools with fewer than 214 students, they’ll be voting for inferior education for students in those schools.”

Man charged with murder of girl

BENTON (UPI) — Murder charges were filed Monday in the death of a 14-year-old beauty-queen girl who apparently had been strangled.

Franklin County Circuit Judge Loren P. Lewis ordered the “Super” Jones, 24, of Benton, be held without bond in preliminary hearing was scheduled for July 31.

Barnhill had been held since Saturday, charged with murder, after being strangled.

Barnhill recently moved to Benton from St. Louis and was unemloyed, authorities said.

Officials were awaiting a pathologist’s report to determine whether other charges would be filed.

Bower’s body was discovered Friday about six blocks from her home by her brother, Mike, 20, shortly after her parents notified police the girl had not been seen since leaving her home on her bicycle.

Authorities believe the girl was strangled with a coat hanger about an hour after she left her home Tuesday night.

“Super” Jones told police they waited to notify police of their daughter’s disappearance until Friday because she thought the girl was staying with a relative.

“I’m happy to hear that there’s going to be action,” said Ted Sanders, state superintendent for schools.

“I think this program will be implemented come the fall term of 1985,” said Swinburne. In Swinburne said the possibility of added liability over and beyond what the University is covered for as a whole always exists.

The University has now $3,000,000 in health liability. This includes problems incurred by “acts of God.”

AN ADDITIONAL $1,500,000, called “stop-loss coverage,” goes beyond the $3,000,000 if the extra coverage is necessary as a kind of insurance for the insurance.

“The $2,000,000 could be extended through the Blue Cross and Blue Shield plan, essentially eliminating the need for stop-loss,” Swinburne said.

SINU: University shares ‘Build Illinois’

the final tally Monday, Richmond and Poshard said that although a few benefits are better than none at all.

“I did cave in and vote for the bill because an overall strength of the legislation thought the bill was important,” Richmond said.

“The $2,000,000 could be extended through the Blue Cross and Blue Shield plan, essentially eliminating the need for stop-loss,” Swinburne said.
Freshmen advised by MAGIC

By Michael Cavagnh

Faculty and staff volunteers are needed for the Maximize Academic Growth in College program. Volunteers meet informally with freshmen students at least three times each semester and act as mentors—offering counseling guidance and suggestions to students to help them reach their academic goals. They may also help students deal with financial or personal problems.

"It does show a commitment by the faculty and staff members to get involved with the students," says Nancy Hunter Pei, director of student development.

"We have 120 mentors," Pei said, "we would like to have at least 400.

Last year about 600 freshmen participated in the program.

"We would like to accommodate 400 to 500 this year," Pei said.

The program has grown by about 50 students each year, Pei said. "Word of mouth among the faculty, staff and students is responsible for the growth."

Students are being informed of the program by mail. Responses should be sent to the Office of Student Development by July 20. Students will be matched with mentors from then until the beginning of the fall semester. Pei said this creates an immediate need for volunteers.

"The staff and faculty have reacted wonderfully," said Pei. "We've had really good responses from the faculty, staff and students.

The MAGIC program is one of the largest in the country.

Briefs

A SEMINAR on the submission review process for National Institute of Health research grants will be held July 11 in Room 233, at 1:30 p.m. to 3 p.m.

SYNERGY will begin a training program to help people with their interpersonal communication skills. Training begins July 11 from 6:30 to 9:30 p.m. at University Christian Ministries. Cost is $20 for six weekly sessions. To register call Synergy at 549-3533.

TRAINED FOR new Synergy volunteers will begin July 10. Three hour sessions will be Wednesday from 6 p.m. to 9 p.m. at Synergy offices for the next five weeks. For more information, call Cynthia Vaughan of Synergy at 549-3533.

WORKING WOMEN and the demands they face will be the subject of a presentation by graduate students from the Department of Health Education from noon to 1:30 p.m. July 10 in the Student Center Thebes Room.

Music students get head start in St. Louis Opera Company

By Martin Folan

Entertainment Editor

Wasting no time to start their professional careers, Eric McCluskey, Gale Oxley and Scott Sikoon made their debuts as professionals with the St. Louis Opera Company in Monday's premiere of "The Barber of Seville" and "Idomeneo.

"We got our positions as a result of all our breaks, which could be accredited to Bard Best," said Oxley, now completing his master's degree in applied voice.

Best, a voice teacher at SIU-C and an internationally known bass, told St. Louis Opera representatives "they must find talented voices at SIU-C.

FOLLOWING UP on Bard's lead, the opera held auditions at SIU-C in February and hired McCluskey, Oxley, Sikoon and Rhonda McAfee.

McAfee, who is working on her master's degree in opera music and theater, sang in "The Beggar's Opera." She explained that she was one of nine who auditioned.

"I was naturally elated to be hired by them," Oxley said.

"I think opera is an art form for the people who like the arts," Oxley said.

"For singers like us, chances are few and far between," Oxley said.

Oxley and Sikoon were chorus members and understudies for the two operas.

Singer Madonna ‘not ashamed’ about Penthouse photo feature

NEW YORK (UPI) — Sultry rock singer Madonna shushed off the uper Mon,day over sexuay explicit pictures that Penthouse magazine claims to have of her, saying she "has never done anything she's ashamed of.

Penthouse publisher Bob Guccione said he would print a 17-page section of nude Madonna photos in an upcoming issue after she drew court action from a photographer's wife who never agreed to sell them to Guccione.

The photographer's wife, Susan Kulkens of Brownsville, Tex, said in an affidavit Monday that he instead wanted the pictures to go to Playboy magazine, which had offered $50,000 to Guccione's $25,000.

U.S. District Court Judge John Keenan ordered attorneys for the magazine to appear in court Thursday to explain why he should not issue a preliminary injunction barring the picture's publication.

But it was unclear whether those pictures, allegedly taken while Madonna lived in Michigan, were the ones Guccione planned to publish or whether he had an additional set of nude pictures.

In a statement Sunday, Guccione said that "the pictures were taken in 1979 when she was living in New York and working as a professional figure model. She is completely nude and the pictures are fully explicit.

"I do see it as being the first step in my career, though, and I plan on doing things like this for a lot more years," Sikoon has returned to SIU-C, where he is continuing his studies and singing.

McCluskey's rendezvous with professionalism included daily six-hour music rehearsals, staging rehearsals, blocking on stage and an understanding of his chorus part and how it related to the performance.

"I took at this as being one of the stepping stones in my career," he said.

McCluskey attributes a great part of his acting talent to his training at SIU-C.

"You have to have a good education to be a professional singer. You have to have a good education to be a professional singer," he said.

"I think opera is a great art form for the people who like the arts," he said.

"You have to have a good education to be a professional singer," he said.

"You have to have a good education to be a professional singer," he said.

"I think opera is a great art form for the people who like the arts," he said.

"You have to have a good education to be a professional singer," he said.

He added that "a great number of Madonna nudes surfaced last year.

"Madonna, 26, catapulted to stardom from two hit albums in the past two years and as a featured role in the comedy film "Desperately Seeking Susan." Her current hit single, "Into the Groove," is from the film.

One source said the Penthouse pictures, both in color and black and white, stemmed from a New York photo session in 1979 for which Madonna was paid $30,000.

A spokeswoman for Madonna, who was in New York but refusing to speak with reporters, said the rock star is "not even really sure" when and where the photos were taken.
Consumers cautioned about con-artist tricks

By Justus Weatherby Jr. Staff Writer

Several consumer fraud incidents have recently been reported to Carbondale Police and to the Illinois At-
torney General's Office.
Carbondale residents should be aware of con-artists perpetrating to commit theft by deception, says Mayor Charles Basien, spokesman of the attorney general's office.
Carbondale police said a recent incident involved two men in a marked red pick-up truck with no license plates. The truck reportedly had a red tank and compressor in back. Residents said they agreed to have men blacktopping their driveways for $80 per square foot.
Residents said they became suspicious when the men completed the work in less than 30 minutes. They later discovered that the men had sprayed oil onto 500 feet of the driveway and subsequently charged the residents $140.
Basien said the residents apparently thought they got a “good deal.”

This crime is an example of consumer fraud crimes perpetrated by people who gravitate to small towns and rural areas this time of year to take advantage of unsuspecting consumers, he said, adding that the elderly and senior citizens are the primary victims of these crimes.

Similar incidents have been reported in and near Granite and to the Illinois Attorney General's Office.

Forestry research program helps minority students

By Erma Harrington Staff Writer

Minority high school students are gaining forestry experience at SIUC in the six-week Research Apprentice Program.

The program, funded by the U.S. Department of Agriculture, allows the Forestry Department to recruit minority students and to gain experience in forestry work.

Paul Yambert, forestry professor, said that of the minority students, the program allows to gain experience in the field of forestry.

“Forestry isn’t just cutting down trees, as most people may think,” Yambert said. “It’s a variety of things.”

The Forestry Department recruited three Upward Bound participants for the summer program. Upward Bound is an educational program at SIUC jointly funded by the U.S. Department of Education and the Undergraduate Academic Service department.

Donnell Wilson, Upward Bound counselor, said that the three partic-

ipants were chosen because of their grade point averages, classes taken during high school, and interest in science.

Yambert said working with the Upward Bound program was more feasible because it allowed to accept more participants, since Upward Bound is providing room and board for the supervision by the participants.

The Forestry Department is cooperating with the local Forest Service station, which is doing long-term research measuring trees in Decatur. The apprentices will be involved in other forestry research, including forestry growth on strip mining land and the effects of herbicide application on forestry growth.

Yambert said the program is also planning a trip to Lusk Creek where botanical research is being conducted.

Yambert, a former apprentice, is wrapping up his 9th year in the program. He is turning again to a position as an assistant professor in the Forest Service laboratory and supervisor, four days a week doing continuous research.

Yambert said the apprentices also work with various scientists once a week.

University to pay cold cash for hot money-saving ideas

By Michael Cavagnagh Staff Writer

University employees may win up to $1,000 for submitting ideas that will save money for the University.

University President Albert Somit invited the Cost Improvement Program in the hope that the ideas will help the University save time, energy, equipment and money.

All University employees are eligible to compete in the program — except the coordinator, the president and his immediate staff.

An idea will be decided by projecting the idea’s annual savings to the University. If the assistance is $50,000, the award will be $1,000. $50,000 will be saved for saving $5,000 for saving $1,000 or more and $25 for savings between $100 and $999.

Ideas must result in a yearly savings of at least $100. Awards will be paid from the SIU Foundation, the fund raising arm of the University.

Baseball talks focus on individual clubs’ woes

NEW YORK (UPI) — Major League players and owners Monday haggled over the financial condition of individual clubs in an effort to reach a collective bargaining agreement.

The negotiation session, the 25th over the last nine months, lasted four-and-a-half hours and left both sides in dispute over the issues the owners have put forth in hopes of convincing the players of the woes they claim plague baseball.

Donald Fehr, acting executive director of the Major League Baseball Players Association, said figures were examined for 12 American League clubs. He has asked the owners to review the club finances submitted for 1984.

“We’ve asked them to tell us ‘How much are you trying to save?’” Fehr said. “They still aren’t telling us and I don’t know how to tell you exactly.”

The owners insist they are in a financial tailspin, claiming 25 of the 30 clubs lost money and would fail if the placing projected losses at $155 million over the next five years.

Fehr said with attendance figures going “through the roof,” prices on the rise and player salaries escalating at a lower rate than previously, “management’s claims of hardship are misplaced.”

“An attempt to slow the rate of player salaries, the owners are seeking adjournments in such areas as free agency, salary arbitration, pension contribution and league expansion.”

MacPhail has said he believes if there is a strike it would come during the first two weeks of August when the pennant races begin to intensify.

The players have authorized the union to set a strike date when it meets July 15, the day before the All-Star Game in Minneapolis. The players once talked of boycotting the game but have decided to play regardless of any decision made the previous day.

Rend Lake Triathlon to be held

Rend Lake Triathlon III will be held on Sunday at Rend Lake, located 38 miles north of Carbondale.

The event will include a half-mile swim, a 29-mile cycle race and a 6.2 mile run. All proceeds from the event will help fund the American Heart Association of Mount Vernon.

Bike inspection will begin at 6 a.m. and the first event will begin at 6:30 a.m. There will be nine different ages categories for both male and female participants. The ages categories are: 16 and under, 17-25, 26-30, 31-35, 36-40, 41-45, 46-50, 51-60 and 60 and over.

First, second and third place awards will be given to the American Heart Association of Mount Vernon. Bike inspection will begin at 6 a.m. and the first event will begin at 6:30 a.m. There will be nine different age categories for both male and female participants.

“Lori is very aggressive from the mound,” Brechtbauer said. “She drives off the mound hard and really challenges the hitters. She’s 5 feet, 9 inches tall, and when she drives off the mound, she’s only about 36 feet away from the batter, which makes it difficult to hit her pitches.”

Day, who chose SIUC over 18 other schools, said the quality of academics at the SIC’s athletic department was a factor.

Winter hired as assistant Bulls’ coach

CHICAGO (UPI) — The Chicago Bulls Monday announced the hiring of Fred "Tex" Winter as assistant coach.

Winter, 61, has been a major college coach for 22 years and also was an NBA head coach with the Houston Rockets for the 1972-73 seasons.

For the last two years, Winter, a native of Wellington, Texas, has been an assistant coach at Louisiana State University. Before he held coaching positions at California State University at Los Angeles, Northwestern University, Washington, Kansas State and Marquette, Winter was a 33-year-old coach at Harvard University, where he compiled a record of 543-136-11.

Bulls coach Stan Albeck said of the signing, "I'm thrilled that we were able to bring "Tex" to the Bulls organization. He's one of the great technicians in the coaching profession."

Winter said, "I'm looking forward to working for the Bulls organization. I've known Stan for a number of years. I've been the general manager at Jerry Krause for many years and I was tremendously impressed with his intellect and his ability to build a great organization from top to bottom."

Sports
Cubs still struggling

CHICAGO (UPI) — Kevin McReynolds highlighted a 14-hit attack with a two-run double and four RBIs, as the Chicago Cubs continued their season-long hot streak by downing the Pittsburgh Pirates, 9-6, at Wrigley Field.

McReynolds' sixth career double stranded a runner at third in the fifth inning as the Pirates, who had scored six runs in the previous two games against the Cubs, struck out 10 times in the contest.

McReynolds' performance also highlighted the fact that the Cubs, who entered the game with a 5-1 record, are hitting .300 as a team.

Baseball fireworks explode

Fireworks were not the only thing exploding this 4th of July weekend, as the world of baseball showed several strange and wonderful occurrences.

For starters, the Mets beat the Braves 16-13 in 19 innings, a game which took over seven hours to complete, including rain delays. The two teams used 43 of the available 50 players on the rosters and each club used seven pitchers. Fans that stayed for completion of the game saw 46 hits, 29 runs and Mets first baseman Keith Hernandez hit for the cycle.

The primary example the athletics directors use is the $23,000 price tag for football stadium clean-up.

Stuck shocked if fractional is revenue and fixed costs be included to do the job for less. Grading rules and union considerations maintain that $24,000 price tag is used.

"I've learned a lot about how much expenses are charged back to the University," Stuck said. "We keep siphoning our dollars for other programs in the University. It's a serious problem to address in the future because it keeps eroding our budget."

If things such as field maintenance could be done in another, less costly ways, savings could amount to all individual budgets of several sports. Says director of women's athletics, "Athletic department is a real class person and comes from a nice family." Daily, who is first on the Normal Community High School, has compiled a 4-2 record with six saves in baseball and a 1.15 earned run average. In 158 innings, she struck out 222 and walked 87.

In her four year high school career, the campus rules and said, "Men's basketball will be a candidate for first base or the pitching staff by signing Lori Day of Normal."

SALUKI SOFTBALL

Bretchelsbauer signs high school pitching sensation

By Steve Merritt

Lori Day, called "the best pitcher in the state" by SIU-C softball coach Kay Bretchelsbauer, has signed a letter of intent to play softball for the Salukis this fall.

"Lori is the current player who is capable of coming in as a freshman and stepping into our varsity starting rotation," Bretchelsbauer said. "In addition to her athletic ability, she is a real class person and comes from a nice family."

Day, who is first on the Normal Community High School, has compiled an 8-3 record with four saves in baseball and a 1.00 earned run average. In 158 innings, she struck out 222 and walked 87.

In her four year high school career, Day posted an overall record of 51-19, with an ERA of 0.03 and struck out 567 batters and walked 79 in 398 innings pitched.

When swinging at pitches in the strike zone, Day has a 333 average in four years, hitting 11 home runs and collecting 111 hits. Entering her junior year, Day had a school record 268 average, while also setting new marks for home runs and hitting in the leadoff position.

"Her knowledge of the game, combined with her drive and determination, makes her a real quality player," said SIU-C head coach. "You can't outpitch or outplay a player of her caliber, but she's been nothing but help to me and the other members of the team."

"She'll be able to help us a lot in the future," Bretchelsbauer said. "Not only will she pitch, she can also hit well. When you have a pitcher who can hit like this, you'll want to compete for a candidate for first base or the pitching staff."

LAZANSKY

Lazansky said he "was sure it was the only Cubs hat in Berlitz."

On Sunday, White Sox hurler Tom Seaver moved closer to career win number 300 as the Sox defeated Cleveland 8-3 for win No. 296.

Ryne Sandberg, Cubs' second baseman and the 1984 Most Valuable Player, established a National League season high with an 18-game hitting streak. Sandberg passed Dave Parker and Dave Concepcion, who had hit in 17 straight games earlier in the season.

On Saturday, veteran hurler Don Sutton gained his fifth consecutive win and career win No. 287 at the A's defeated Toronto.

On the "Game of the Week," speedy Dodgers shortstop Mariano Duncan opened a first inning Dodger outburst with a bunt double, his third of the season. Outfielder Ken Landreaux then followed with an inside-the-park home run, as the Dodgers defeated the Cardinals by a final of 8-3.

Lanier Ryan, considered one of the 4000 strikeout milestones as the Dodgers beat the Expos 8-7. Although Ryan was lifted and got no decision, his final tally ended up at 2075.

In the same game, Astros shortstop Dickie Thon hit his first home run since the 1983 season. Thon was hit by a pitch in a head of April in 1984 by former Mets pitcher Mike Torrez and his return to baseball had been questionable because of vision problems. Thon apparently had no vision trouble in this game, as he also homered that drove in the game winning run and ended up going 2-for-4 with two runs scored and two RBI.

On Sunday, during the Yankees-Twins doubleheader, Yankees' first baseman Don Mattingly committed his first error in 153 games. The Yankees swept the doubleheader as former president Richard M. Nixon looked on from the stands.

ROUNDING OUT the weekend of bizarre happenings, end up at the Houston Astrodome, where the Astros and the Expos decided to play a 19-inning marathon, which the Montreal Expos eventually won 6-3.

With explosive action like this building up as the season progresses, let's hope that next weekend won't be the last that we see for a while.
