13,277 Opinions of SIU Tabulated

Coeds’ Hours
Alterations
Under Study

A tentative decision to extend all women’s hours by one hour and to eliminate late leaves has been reached.

The decision is the result of a survey of women in supervised housing conducted by Mrs. Loreta Ott, assistant dean of the Office of Student General Affairs.

Also tentatively approved was a proposal that freshman coeds be allowed one overnight leave a week and unlimited overnight leaves during final week.

Freshman women are currently not allowed overnight on Sunday through Thursday.

Final approval of the proposal is pending discussion on the implementation of the new policy.

Next week, area heads and housing office officials will discuss the new problems, such as quiet hours, that will be created by this decision.

The response to the call for opinion was very good. Mrs. Ott said. In previous years, proposals for modification of the current women’s hours policy have met defeat by SIU women.

Library Hours
To Be Reduced During ‘Break’

Special vacation hours for Morris Library will go into effect June 10. The hours of operation are as follows:

June 10, and Monday through Saturday, June 13 to 18, the library will be open from 8 a.m. to 5 p.m.

June 12 and 19, the library will be open from 2 to 5 p.m. only. Entrance to the library on those Sundays will be through the South door only.

The reserved book reading room will close June 10 and will reopen June 19.

Regular hours of library operation will resume June 20.

Graduation Announcements
Imprinted With Wrong Seal

Because of a mistake made by the commercial printer, the Commencement announcements arrived bearing the word Carbondale. The official University seal indicates no location.

The University has registered a complaint with the company, and has notified the company that if it doesn’t destroy all the SIU plates and engravings with the word Carbondale, the company will receive no more business from the University.

It should be made clear to all interested persons that the seal as printed on the announcements is in error, and does not indicate any reversal of policy concerning the University seal, according to A. B. Mifflin, editor of central publications.

Time will not permit a re-printing of the announcements with the correct seal if the students are to receive them in time for mailing.

during the previous part of the year.

The announcement of the administration includes four vice presidents responsible for suggesting and formulating policy.

These men are Robert W. MacVicar, vice president for academic affairs; John S. Rendsleme, vice president for student affairs; Ralph W. Burhner, vice president for student and area services, and Charles D. Tenney, vice president for planning and review.

Even with the various segments of the University divided among a small group of over-seers, problems still arise.

Problems dealing with University housing come under the direction of two of the vice presidents. Tenney said.

“When this happens, both of the men must meet and resolve what is to be done to correct the situation,” he added.

The results of the mass survey, which was designed to allow students to express their opinions on some of the hottest questions on college campuses all over the nation, have not been compiled.

Students in Carbondale seem to reflect the opinion of the SIU student body as a whole in many of their reactions. For example, 63 percent of the Carbondale students felt that student discipline should be handled by a combination of student judicial boards and the office of the dean of students. The same percentage answered this way among students on both campuses.

Below are some figures from the Carbondale poll, with percentages for the total student body in parentheses:

- Sixty-three percent (63) of the students felt that class attendance should be voluntary; only 7 percent (6) felt it should be compulsory.
- Academic standards were excellent as far as eight percent (10) of the students were concerned, 64 percent (78) found them satisfactory; and 16 percent (10) thought them to be unsatisfactory.
- Most of the students, 80 percent (78), thought that instructional quality was satisfactory, and the same percent (81) overall felt that grading standards were about right.
- Eight percent (9) felt grading standards were too high; 11 percent (9) felt they were too low.

General Studies, long a bone of contention on campus, was considered beneficial by 45 percent (45) of the students. Thirty percent (31) thought the program was not beneficial, and 22 percent (22) had no opinion.

Coleman Survey
Results Compiled

SIU students seem to be content with academic standards and classroom requirements, but unhappy with the place they have in an academic community, according to results of a recent 100-question student survey.

Early this term 13,277 SIU students from both campuses answered questions ranging from “What is your sex?” to “Do you want to buy your textbooks?”

The results of the mass survey, which was designed to allow students to express their opinions on some of the hottest questions on college campuses all over the nation, have not been compiled.

Evolution for Survival

Rx for Greeks: Communication, More Flexibility, Better Rush

By Rick Birger

"Fraternity organizations and sororities at Southern are all in the best interests of the student member, the fraternal group and the University," To Harold L. Hakes, assistant coordinator of housing at SIU, this seems to be the key to Southern's Greek-letter organizations and their hopes for survival and expansion.

"The participation and leadership of both students and the University."

Hakes based his comment on the steady progress made by the Greeks in scholarship, their increasing ability to meet their financial responsibilities, their continued involvement in campus activities and their efforts to meet the new social pressures placed upon them.

However, their future is not clear cut.

"Like any prediction," he said, "solving the issue of survival depends upon a number of variables. It depends upon student reactions. And it also depends upon the attitude of the fraternities themselves.

The Greeks, are, at present, suffering from a lack of communications and relations between themselves and the University's students."

"This lack of public relations," said Phil Schuerr, assistant coordinator of student activities, "between the Greeks and unaffiliated members of the University has been the main contributor to the many rash judgments that have been offered as criticisms to the Greek system. As increased awareness of the communications problem and positive steps taken by the groups to alleviate them would certainly aid in any future plans."

Rush presents another problem in the future of the fraternities. It is important, for it is through this activity that the fraternity perpetuates its membership.

If one should compare the number of prospective rushes to the number of fraternities and then to the relative scarcity of men who avail themselves of the system during the rush period, it can clearly be seen that something is lacking.

Schuerr believes that fraternity men have not fully taken upon themselves the responsibility for building the membership of the chapter.

The doors to the fraternity houses are thrown open for several days; posters are distributed and miracles are expected to happen.

In many instances this simplicity does not happen.

He submits that each member has a responsibility to take a prolonged personal interest in prospective candidates at least for the three-day-a-quarter system now in effect.

Ralph E. Bock, associate dean of students, notes too that the system used at SIU is too restrictive.

Many administrators understand certain advantages to the Greek system. They have seen many of the contributions the fraternities have made, and appreciate them.

But they have also seen the fraternities' shortcomings in their scholarship, financial and social problems. Until these problems can be solved and ironed out, and, as one put it, "until we can show that the system is a complement to the University and that we cannot hope to expand."

THETA XI OFFICERS -- Kenneth L. Adams (second from left) was recently elected president of Theta Xl social fraternity. Other officers are (left to right) W. Allen Meiding, secretary; Andrew B. Bernhardt, internal vice president; and Rodney E. Bradley, treasurer. Not shown are Carl E. Adams, external vice president; Gery E. Hanell, social chairman; Peter F. Stoltz, pledge chairman; David J. Husted, scholarship chairman; Daniel J. Ross, house manager; and Ronald L. Geraci, steward.

Delta Zeta Social Sorority

Initiates Nine Into Chapter

Nine members were initiated recently into the Gamma Omega chapter of the Delta Zeta social sorority.

They are Joann Baker, Marcia J. Daub, Joanne Fischel, Stairlit A. Hicks, Sandra A. Landry, Marlene Messermit, Merratip Schulte, Barbara J. Wingo and Kandy Wood.

Delta Zeta also announced a number of engagements, pinnings and lavaliers.

Engaged are Carol A. Bartels and Richard P. Birger, Delta Chi; Jody Erwin and Noel Legendre; Carole Sue GUYOT and Fred Benson, Tau Kappa Epsilon; Merratip Schulte and William McDevitt, Chi Phi; Kathleen M. Sliaz and Ronald J. Whitney, Pi Sigma Epsilon; and Kay M. Wiss and Thomas T. Jason, pinned are Kathleen S. Haloran and Bernard J. Ness, Delta Chi.

Lavaliere are Marlene Messermit and Roger W. Anderson, Tau Kappa Epsilon; Margaret E. Perez and John W. Epperheimer, Delta Chi; Margaret M. Simpson and Michael D. Vollen, Tau Sigma Epsilon; and Diane L. Thiberg and Kenneth R. High tower, Theta Xi.

Officers Elected

The Junior Inter-Greek Council, composed of pledge class presidents, recently elected officers for the fall quarter.

Julian C. Pel, of Theta Xi social fraternity, was elected president for the fall quarter.

Other officers are Jon D. Carlson, Tau Kappa Epsilon social fraternity, treasurer; and Rose A. Astorino, Sigma Kappa social sorority, secretary.

The council is planning a service project which will be completed in the fall.

Policy Spans Two Campuses

(Continued from Page 1) talent developments that arise.

One of these groups recently organized to study situations will investigate athletics on both campuses," Tenney said. "At Carbondale there is a full athletics program while at Edwardsville there is only an intramural program. The group will study this problem and try to determine just what the nature of the athletics program on the two campuses should be."

"The principal idea is to have similar procedures on both campuses," Tenney said. "It is desirable to recognize differences when differences exist, and it is desirable to recognize like­nesses when similarities exist," Tenney added.

Morris said the administration is trying to keep both campuses focused under one university.

"Our main advantage has been having functional vice presidents who have worked to achieve success in their undertakings to solve the problems that have faced us in the past and face us now," Morris said.

"There is not now any major undertaking or switch that we advocate. When such a change arises, the administration will make it known to the students as soon as possible," he said.

Morris believes that plans will proceed along the same road as they have in the past, and problems will be dealt with as they arise.

He also emphasized that the two campuses have one president, one board of trustees and four vice presidents.

"This system has worked as well as any," Morris added.

The future of SIU relies on the decision-making of persons in the administration. The outlook for the present and the future would appear to be good.

Today's Weather

Cloudy

Clear to partly cloudy. Chance of showers late today. The temperature will range from the mid to upper 80s. The record high for today was 90° at Carbondale and the record low was 42° in 1929 according to the SIU Climatolgy Laboratory.

Anyone who has ever visited the facilities at Morris Library is probably aware that SIU has a modern and well-stocked library.

The collection of equipment, computers, personnel, etc. necessary to keep the library functioning so that it would seem to be a smooth and efficiently operated building is the result of the library staff's quite contrary.

Any student who has ever used the library facilities has probably had a number of complaints with it. Indeed, every time a student wants to check out a certain book, it is either gone or nobody knows where it is. But when a student finally due date is not longer valid and it can't be returned before the original due date, or a fine will be immediately imposed—and it isn't the small change either.

Many students are fined each time an overdue book is returned and is over five days overdue. The fine is $0.50 for each day that it is overdue in addition to the fine. The fine is doubled each time an overdue book is returned, and there will be a second fine on a book if it is returned after the third day. The fine is $0.50 per day for overdue books, yet Morris Library, which probably has more than one copy of most books on its shelves, has to charge heavier fines. College students aren't the richest people in the world and those high library fines are a direct result of the student that can't obtain his advance schedule card until the library is open. It has been cleared, it seems that a different system has been used out whereas the fantastic prices for overdue books could be done away with or drastically reduced.

Pleasant Hill Road Tracks Need Rail Crossing Signal

The fog blows out the stars overhead, guiding the homeless to nothing else on your car or in back and tightly on both sides. Your headlights bounce off the fog bank just ahead of the front bumper so you can see only a few feet ahead. The fog is bad but you can keep on the road if you drive fairly slowly. Your radio is blaring out the Top 10 when a vague it's a railroad crossing but you're already on the tracks. Suddenly there's a bright light, a loud roar, a bone-splitting crash... and then, you're safe. If you're lucky your wake up in a hospital... if not, you'll never wake up again.

A hypothetical situation? They have recently been extremely controversial and dangerous, and there will doubtless be more in the future. The much-used

Gemini Meets Target; Shroud Complicates Hookup

CAPE KENNEDY, Fla. (AP)—The eager Gemini 9 pil- oters were forced to delay their target-run to a new, higher like-target in a chase through 75,000 miles in 12 hours and 36 minutes today, and said it looked like "an angry alligator"—possibly disabled and unavailable for a space hookup.

"We have a weird looking machine here," reported command pilot Thomas P. Stafford at the end of a 4 1/2 hour space chase. The space glass protective shield was still hooked onto the tumbling space target, but the only thing holding it to the target were some wires.

The explosive bolts connecting the shraddled target had fired, but the springs that were to shove the clamp-shell covering away had not been strong enough to break the shield.

Stafford and co-pilot Eugene A. Cernan, the space rookie who will perform Saturday's marathon walk across the highway, reported the cool and businesslike—in contrast to the heart-racing excitement of Buddhists Threaten Election

SAIGON, South Viet Nam (AP)—The militant wing of South Viet Nam's divided Buddhist movement threatened Friday to wreck renewed government peace efforts.

Further clouding the issue was a series of nationalist political fights that could eventually influence American involvement in the war against the Viet Cong and against social and political ills of South Viet Nam.

Influential Thich Thi Quang, chairman of the Buddhist-line of the National Assembly, said the Buddhists prepared to boycott any elections held by the government this year. The Buddhists had declared that means the vote, scheduled for Sept. 11, to be a constitutional assembly.

Heckled since he led Buddhists into a compromise with government representatives Wednesday to halt calls for the addition of 10 civilian soldiers to a ruling 10-man military directed, moderate Thi Ch Tham Cham Chua issued a resignation as head of the Buddhist-lined National Assembly. He said "I have failed." A special council will be convened to weigh the resignation.

the blast off when Stafford yelled "We're on our way." They calmly maneuvered the Gemini 9 in pursuit of the target, which narrowed the original 640 miles between them to the dwindling distance toward rendezvous.

Looking into the bright moon, they had trouble seeing the target from a distance—and had to come very close before making a definite detailed inspection of the shraddled. Barely 2 hours and 25 minutes from the 9:39 a.m. blastoff, Stafford fired his thrusters to settle the Gemini 9 into a circular orbit 170 miles high.

That was just 15 miles below and 125 miles away from the target. Stafford and Cernan were closing the distance at 126 feet per second. It was the third in a series of precise maneuvers as the pilots—working with computer calculations and guiding needle stars—took dead aim on the fleeing Augmented Target Docking Adapter—ATDA.

They soared into space two days after the target was launched—breaking 17 days of flight frustration with the fiery and perfect blastoff of their 11-storied Titan 2 rocket.

"It's fantastic," said Stafford, 35, veteran of the Gemini 6 space flight.

It was the third time and a charm for Stafford and Cernan, 32, who twice before had climbed defiantly from the grounded spacecraft, when rocket trouble scrambled the May 19. It was nothing new for Stafford. He had to make three tries to get spaceborne in Gemini 6.

Peking Mayor Loses Party Post in Purge

TOKYO (AP)—The antiparty purge of Communist China may be tapping at the door of Peking Mayor Peng Chun, one of Red China's most pow- erful figures. A Peking announcement Friday disclosed he had been absent from his office in the capital's party appar- atus.

Peng, 67, has been mayor of Peking and a member of the Communist party Polit- bureau and Secretariat since 1951. A Chinese-language broadcast, without mentioning his name, reported he had been placed as first secretary of the Peking party Central Committee. Peng had held that position since 1955.

It was the third in a series of events that was where most of the current crackdown on the antiparty purge sweeping Red China.

It said that Li and Wu Teh, 50, named as his second secretary, and the Peking committee members hereafter would be responsible for pursuing China's cultural revolution in the Peking area.

Johnson Proposes Benefits Increase

WASHINGTON (AP)—President Johnson proposed Friday a blanket increase in Social Security benefits for all those on the rolls plus any who will be in the future. He mentioned no specific fig- ures.

Johnson said he had directed Secretary of Welfare John Gardner to have a program for increased benefits ready for the next session of Congress.

And the President promised the increases would have "a high and major priority." Johnson's pledge to strive for higher Social Security benefits was made in a White House speech to delegates to a conference of the National Council of Senior Citizens.

Johnson told the delegates that while he has signed into law increases of more than $1.5 billion a year in Social Security benefits, "too many of our older citizens are still struggling along on shoestring incomes, suffering real hard- ship and real need."

Those accepted will earn in excess of $135 PER WEEK

IT'S THAT TIME AGAIN

Student Procrastination

Writing Is Put Off Until Last Minute

By John Lurie

The going thing seems to be procrastination.

At least among students, that is, when it comes to studying for final examinations and preparing term papers.

In interviews conducted with 10 students last Wednesday, the fact came up that nine of these students had not yet begun to study for final exams, the remaining student had made only what he called a "half-hearted attempt."

Out of eight term papers and themes which the student were to turn in by today, none were completed at the time of the interviews.

James T. Baker, a freshman majoring in engineering, said he had two themes and a math final due Thursday, but had not really started studying for the test until Wednesday morning. He said he planned to write the two papers Wednesday night. "I guess I should have started last week," he said, "but I just never did get around to it."

Two freshmen coed majoring in dental hygiene at VTL, Sharon K. Newell and Jean M. Nebel, seemed somewhat apalled over the fact that a term paper assigned at the beginning of winter quarter was due to be turned in at 1 p.m. Thursday.

One of the girls had finished writing the paper, but had not yet typed it. The other had only gathered some information and had not written a single word.

To make matters worse, each of the two girls had six finals coming up, with the first exams being on Monday. Asked about the preparation they had made for these exams, both said they had not yet started studying.

Miss Newell said, "I think I'll begin sometime around Saturday."

Somewhat less emphatically than her friend, Miss Nebel responded with, "I'm gonna start tomorrow."

Perhaps the most interesting answer given by any of the interviewees came from Tim F. Merriman, a junior majoring in zoology.

After explaining that he planned to begin studying Thursday night for a final examination scheduled for Saturday morning, and that he had not yet "cracked a book" for the rest of his exams, he added with a grin, "I'm also behind on my laundry."

Tourney Trail Ends

Salukis Lose 4-3, In 12th, to ‘Valpo’

Valparaiso ended SIU’s hopes of staying in contention in NCAA tournament action Friday, arrowing off the Salukis 4-3 in a 12 inning contest at Columbus, Ohio.

The loss, the second in the tournament for Southern ended, its season with a 27-19 record.

After losing the opener to Western Michigan Thursday 18-4, Southern went all out to remain in the field, but a two-run 12th inning by Valparaiso proved too much.

Loser Jim Panther went 1 1/3 innings before bowing out in favor of Bill Linkey. Panther allowed just four hits, but the Salukis could manage only three hits in the brilliant mound duel.

Tex Sandstead, the big bat for the Salukis with two RBIs, broke the extra-inning deadlock in the 12th.

South Bend Meet Includes Salukis

The varsity SIU trackmen will be competing in the Central Collegiate Conference at South Bend, Ind., today.

As usual, three outstanding Salukis will lead the squad.

John Vernon will compete in the triple jump event, Oscar Moore will run the mile and the 2-mile, and George Wood will compete in shot put.

Dephers Win Title In Softball Play

The Dephers, winners of the 16-inch intramural softball league, will play in the Chicago Maker Softball League this summer.

The league, which starts June 10, will play until the end of summer.

Dephers will play softball in Chicago this summer are Michael D. Polk, Ronald L. Kierach, Torben H. Hartmann, Richard H. Goldstein, Jordan L. Goldstein, Gary H. Peckler, Barry J. Bass, Lester W. Callas, Frank R. Schenibel, Richard J. Anseline, Tom Judd Hayden, Larry E. Davies, Robert J. Bernstein and Raymond L. Smith.

Action Party to Offer Free Coffee, Cokes

Free coffee and cokes will be offered by the Action Party Monday, Tuesday and Wednesday from 7:30 to 10:30 a.m. in the Family Living Lounge of the Home Economics Building.

Montross Pitches, Alkies Win Tournament

The 12-inch intramural softball tournament came to a close with the Alkies defeating Phi Kappa Tau 9-0 for championship honors.

Carl S. Montross, of the Alkies, pitched no-hit ball until the sixth inning when Phi Kappa Tau’s Michael S. O’live doubled but was thrown out trying to make third.

The Alkies ended the season with a perfect record of five victories and no defeats, Montross was the winning pitcher in all five.

Montross, a graduate student, has participated in the intramural softball program for the last six years. Every team for which he has pitched has become champion.
