Student turnout substantial

Burke Speaker
Daily Egyptian Reporter

SIUC student voters charged the polling booths Tuesday, resulting in an increase in student vote turnout from previous years, according to county voting records.

Poll figures averaged about 20 percent of registered voters in precincts that have high student populations, although Jackson County Clerk Irene Carlton said that percentage is partially based on a population of students who no longer attend SIUC. "The percentage of students listed is based on the high student population precincts," Carlton said. "Those numbers are actually higher than expected because of the National Voter Registration Act."

The National Voter Registration Act states that voters cannot be removed from the list of registered voters for four years—which is a major factor considering the high transient population of students.

Carlton said there are precincts listed having a high number of registered voters, although the number is incorrect because of students who no longer reside in those precincts.

Areas with high student populations include Carbondale Precincts 3, 11, 21, 22, 23, 24, 25 and 26.

Carlton speculated that a higher number of students voted Tuesday than in previous elections, because of a registration drive sponsored by the Undergraduate Student Government.

Jackie Smith, vice president of USG, said the organization helped encourage student voting through the registration drive.

Beginning Aug. 30, USG registered more than 700 student voters until the Oct. 6 voter registration deadline.

Smith said she was pleased with the amount of students USG USG registered more than 700 student voters until the Oct. 6 voter registration deadline. "It went really well," Smith said. "We got a lot of students to participate."

Smith said USG kept track of voter names and phone numbers in a database which various political parties were allowed to access.

A high number of people accessed the site, and were able to call student encouraging them to vote.

Smith said USG plans to begin student registration Monday for Carbondale city elections this spring.

Cory Hieberkorn, College Republicans president, said voting is extremely important because the decisions students make in elections will affect their future.

"In a couple years these elected officials will have an affect on students," Hieberkorn said. "We need students who are graduating and getting jobs and paying taxes."

But some SIUC students choose not to vote from reasons ranging from not being registered to general distrust.

"Sometimes it's difficult to get your work done, finished and still take time out for your child," said Martin, a junior in special education from Oak Park, currently balances responsibilities as a mother.

Hondurans speak of suffering

CHAOs: Seven SIUC students educate local residents on damage caused by Hurricane Mitch.

By ASTREA L. DILLARD

Seven Hungarian SIUC students gathered at a conference at a local church Thursday to inform Carbondale residents that people are suffering from the disaster that Hurricane Mitch left behind but did not see the help needed.

The student said one third of the country's six million inhabitants were injured in the disaster that incapacitated the small food, water, medicine and other emergency supplies to help everyone who was suffering. Seventy-five percent of the natural economy has been damaged. Some people have not eaten in a week. People are now homeless and have lost their businesses and their jobs and many of the highways have been destroyed. Some families have been separated, as their family members have been killed in the hurricane.

Elisa Hip, an SIUC alumna, is devastated at the fact that many people in Carbondale do not have a clue about what is going on. "When I went to the store the other day, someone asked me why I was buying so much stuff," Hip said, "and I said, 'Did you hear about what happened in Honduras?' and they said, 'No.'" Hip, who is related to most of the people in Honduras, said, "It is hard to deal with everything that is going on, but she is truthful. Her sister is still alive."

President Clinton said the U.S. Government was providing $2 million in food, water, medicine and other emergency relief supplies; to help all of Honduras. Hip thinks it is a generous gesture, but she does not have any food or medical attention. "My sister was looking forward to什么东西, but her brother is still there feeling the pain that Hurricane Mitch left behind last week.

Cuba, a graduate student in computer science from Honduras, has relatives in almost every major Honduras city that was devastated in Hurricane Mitch's wake. "Most of my family has lost their homes and land. Some family members are out of work because the companies that they work for have been destroyed," Cuba said. "The natural disaster has left the country in distress."

It is not food, but gasoline, medicine," Cuba said. "The flood of people are homeless and hungry; people that need help." Hip said it has been a rough time for Hip because the wishes she would be gone for a family and friends to help them. But, her prayers are for all who are suffering. "My sister is looking forward to seeing her family again."

USG approves new fraternity

JOIN IN: Beta Sigma Chi awaits voting from Interfraternity Council to become part of Greek system.

KAREN BLATNER
STUDENT AFFAIRS EDITOR

Beta Sigma Chi fraternity was approved for Registered Student Organization status from University Student Government's board last Wednesday night.

Beta Sigma Chi is a local fraternity created by President Colstead and Inter-Greek Council. The letters Beta Sigma Chi were picked to stand for brotherhood, scholarship and character.

On Thursday, members of the fraternity will make a presentation to Interfraternity Council, a sub-council of Beta Sigma Chi and Phi Sigma Kappa to the STUCO greek system. Each fraternity in the council has the vote in Beta Sigma Chi.

For Gus Bode, he was impressed by seeing a room that looks bigger with people in it than it does when you have no one in it. The more people you have, the more the noise and the more movement.

His experience of hanging out in the USG office is just like everybody else's.

Gus Bode
Gus says: I sleep at the USG office like everybody else.

Sweet dreams around University

RELAXATION: Student Center, Morris Library among other favorite places for napping.

KAREN BLATNER
DAILY EGYPTIAN REPORTER

Ben Marin finishes his small pizza and settles down to take a short nap. He begins to drift off as he gazes at the television, undisturbed by surrounding conversations and the blaring TV set.

Marin's routine is just one of the usual stories from the depths of the Student Center TV Lounge, one of the many hot spots on campus for napping.

Horde of students flock to this haven with its cozy couches and benign hum of the ever-present television. Students gather here to relax and recuperate from the day's events.

Marin, a senior from Danville, said he sometimes sleeps on the second floor of the Student Center instead of the TV Lounge for increased comfort and quietness.

"It is better to sleep upstairs," he said. "The more people we bigger, it is quieter and there are no soap operas blaring constantly."

Students find a quiet spot on all areas of campus at any hour during the day sleeping between breaks is classes.

Bill Colstead, a freshman in pre-finance and a member of Lambda Chi Alpha, said he found studying on the second floor of the Student Center One day, he was so hungry he fell asleep there for about 20 minutes, he said.

Colstead said the second floor is quiet and a good place to take a catnap in order to take a break from the everyday routine.

Morris Library is another common spot for napping. The second-floor study areas are crowded with students who are studying, conversing and napping.

When he needed a place to sleep, June Kim, a graduate student in the management business administration program from Korea, can be found lounging in the library an average of four times a week. The library has a great appeal for Kim because of its accessibility.

"This is the only place to study and relax," Kim said. "It is convenient and quiet and you don’t have to go back to your room."

Another popular napping spot is the lower level of Pulliam Hall. Students from an array of classes can be found catching some sleep in the hallways.

Kate McGinn, a senior in journalism from Carrolville, is a rookie at napping in Pulliam Hall. She happened to be reading an English assignment before dozing off there Oct. 14.

McGinn said she felt relatively safe when napping, because she usually is surrounded by people.

"I feel pretty safe when sleeping down here because my friends are around," McGinn said.

Another popular napping area is the lower level of Pulliam Hall.

Mourning: Caravan of students along the route ahead of the casket.

Gus Bode is a junior in linguistics from South Korea; he context of the drive to colonize a campus.

"I don't feel better," he said. "It's always good to know there are individuals out there with the drive to form their own fraternity. That is what this greek system needs."

Minnella said Beta Sigma Chi is one way to combat the loss of these other fraternities this year. Delta Chi, Phi Sigma Kappa and Phi Beta Sigma.

"One of the things with interested individuals, it's always a good thing," he said. "There is nothing negative about that."

Minnella said Beta Sigma Chi has already found a place on campus, but he is setting his goals for the fraternity in the future.

"I want to leave SUIC a better place than what it was when I came here," he said.
Sixty years ago this week, veteran MGM contract director Victor Fleming yelled "Action!" on the set of "The Wizard of Oz" at the studio's famed Los Angeles lot and began a journey down a yellow brick road that would lead its troupe of characters to the Emerald City and the film itself to the throne of the magic kingdom of children's movies.

There has never been one better. Earlier this year, when the American Film Institute released its list of the 100 Greatest American Movies, "The Wizard of Oz" was ranked 8th, an amazing high spot considering that only adults were polled and none of the films' movies (the others were No. 49 "Snow White and the Seven Dwarfs" and No. 58 "Fantasia") made the list at all. Add one more thing: Few people under the age of 50 have ever seen "Oz" on the big screen, where its magical qualities grow exponentially, and ... enough already, it's the most tolerance-friendly movie ever made.

I'm of a generation that first saw "Oz" in a theater. It was 1949, 10 years after its world premiere at the Strand Theater in the fantasy-sounding town of Oconomowoc, Wis. I saw it again in a theater when MGM gave it a second release in 1955, and again in 1962, with my wife and I drive to an archival theater in Paterson, Calif., and allowed Dorothy and the others to embed themselves in our memories, as well.

Of course, they'd already seen "Oz" on television. It was hard to miss it. It's been an annual TV event since the late '50s, when MGM deferred to the television audience and licensed it to CBS. But if you've seen "The Wizard of Oz," store it in your memory if you recall only the story, you have only an impression of how it looks and sounds, and you've felt only a fraction of its emotional power. To see it in a theater is to be overwhelmed by its color, sets, music, and imagination, and any opportunity to see it that way, especially if you have children, should be taken as a gift. So will you go? Warner Bros., which now owns "The Wizard of Oz," is lambasting large that you will. The studio has invested a lot of money in digitally restoring the negative, purifying the film's vibrant Technicolor images and remastering its fabulous sound track in Dolby stereo. Although the negatives for the Kansas sequences were destroyed in a fire decades ago, those images, too, were spruced up and returned to their original sepia toned black and white. And Friday, "Oz" will return to more than 1,500 theaters, bigger and better than ever, for the first time ever.
SINGLE continued from page 1

The complex situation of single parent schoolchildren can be problematic. "I think trying to balance school and children is a difficult medium to find," DeAngelo said. "They want to do good at both."

DeAngelo said providing a support group for single parents can help some of them realize they are not alone. "A lot of single parents can be going through the same kinds of problems and they can come together for a solution," she said.

"We would love to have single parents contact us to form a support group," Amelia Gordon, a junior in computer science from Chicago Heights, said. "I can understand the need to be able to manage time effectively as one raises her 2-year-old daughter, Felicia Clay."

Gordon said although studying is important, she insists her daughter must put academics on hold to spend quality time with her child. "If today is Thursday and I have a test on Friday, sometimes it's difficult to find time to study if my daughter needs some attention," Gordon said. "It's more than a test to me than a test."

Like Martin, Gordon works 25 hours a week in addition to attending her classes in order to afford Felicia's daycare.

"She said the obstacles she faces now will pay off when she receives her college degree. All of this is going to be worthwhile knowing that in a couple of years I will be able to pay for daycare without help from anyone," Gordon said.

Martin said she hopes the struggles she is facing now will set a good example for her son in the future. "I want my son to see me and know that nothing is impossible if you work hard," she said.
**Ground Zero**

**Disco Party**
The site-wearing, button-collared, leisure-suited, polyester-loving band, Funkytown, will be headlining the "Night of 100 Stars" at the Copper Dragon Brewing Co., 700 E. Grand Ave.

There is no admission for this disco party. For information, call 549-2319.

**Steppin’ Down**
Fraternities and sororities throughout the campus will join SIUC Greeks in stonking, chopping and shouting at 8:30 p.m. tonight at the Student Center Ballrooms.

Various Asian-American Greek organizations will be participating in this "Mighty Midwest Steppdown," a 90-year-old stepshow tradition. Tickets are $5. For information, contact Black Affairs Council at 453-2324.

**Ice Hot**
The local blues/alternative rock sensation, Blue Lava, will perform their variety of talents at 2 p.m. Saturday at My Brother's Place, 1012 E. Main St. Admission is Free. For information, call 549-3331.

**Blue Java**
The Musicians and gospel greats, the Gordons, will be returning for their fifth year at 7:30 tonight at Cousin Andy's Place, 1013 E. Main St. Admission is $10 for adults and $3 for students and low-income visitors. For information, call 453-2329.

**Southern Pride**
Santa Fe's country-western quartet from Montana will be rockin' it country style Saturday at Peace of One Earth, 700 E. Grand Ave., of the alternative favorites, Candlebox. Opening for the group is the radio sensation, Brother Cane's "Second Coming."

**Radio Revivals**
Tickets are available for the $15 Monday night show at the Copper Dragon Brewing Co., 700 E. Grand Ave., of the alternative favorites, Candlebox. Opening for the group is the radio sensation, Brother Cane's "Second Coming."

**If You Can’t Take the Heat**
The Copper Dragon Brewing Co., 700 E. Grand Ave., will be closing its kitchen Tuesday because of the lack of restaurant business. All menu items are 25 percent off until Monday. For information, call 549-2319.

**Video JUNKIES**
Students find video games to be a great stress reliever from academic life.

*Story by Kelly E. Hartigsen*

**While Riding on the Back of a Simulated Ostrich and Attempting to Land on the Tops of Foremost Creatures to Capture their Eggs, a Brand Gruetzmacher Pushes the Final Strokes of His Control to Maintain Success and Advance to the Next Demanding Level of His "Joust" Video Game.**

"I play at least a couple of times a day," Gruetzmacher, a junior in cinema and photography from Hoffman Estates, said. "We have Genesis and Computer games, but I'm a big fan of 'Joust' — it's an 80s arcade game."

Returning home from a restless day of classes, Gruetzmacher said he was looking in challenging his mind and reflex capabilities with his collection of video and computer games.

"I think quite a few students play video games here," he said. "I have friends who do nothing but play them, especially 'Golden Eye.'"

"I have always liked playing the games, ever since the Atari. It is just relaxing."

The popular entertaining and educational values formed through the video industry have created a new dimension in television history. Many homes are now fully equipped with a gaming console so that children as well as the outdoors, burrow themselves inside and engage in their daily routine of video gaming.

"As computer capabilities improve, the simplicity of many video games has erupted into near real-life encounters. Such games have posed many questions on the violent nature captured in such games as 'Residents Evil' by Capcom. The Entertainment Software Rating Board (ESRB) is now providing those with concern of the violent contents a rating system that allows parents and adults to determine if the violent nature and language involved is suitable for them.

Jack Ballard, assistant manager of Bobbege's in University Mall, takes time out and plays the Nintendo 64 Thursday afternoon.

"I'm not enforced yet by higher standards. There almost has to be a rating on some of these games, some of them deal with drug use, violence and the heavy use of body parts."

The complexity of these games has brought forth skepticism, leaving parents to wonder if the industry has lost sight of the original intentions to entertain their parents.

Gruetzmacher said he remembers when the transitions began, compiling the "older" versions of Atari and Nintendo into the super industrial capacities of the Genesis, 64, and Sony PlayStation.

**Rockabilly group will swing its way into the Hanger 9.**

*Story by Chris Kennedy*

"Guys, it is time to break out the Brillcheese and cramp your fingers into the guitar and jambilly—sincerely, Rockabilly is returning to your roots."

At 10 p.m. Saturday, the Hanger 9, 911 S. Illinois Ave., will be the backdrop to a rockabilly night on the stage at Bistro East. The band known as "The Bonetones" has been part of the Carbondale music scene for the last five years. The band originally started out as an idea between two friends for the project, Mr. Ace Lorenzo, and "it metamorphosed into Captain Rock and the Bonetones, but we decided 'Captain Rock' took too much out of Barbados and we had been seen since. But the Bonetones have played on without him with increasing success," Gruetzmacher said.

With the footsteps of success growing more audible, three of the five members originated "a way when the band could just stay out and play their music on bars, bigger city could generate bigger crowds.

"There's no better feeling than making a bigger crowd. "One of the amazing things that we've been able to do is have some of our songs on the radio," Gruetzmacher said. "We've been thanking us to show off on the radio."

Jack Ballard, assistant manager of Bobbege's in University Mall, takes time out and plays the Nintendo 64 Thursday afternoon.

Talking the Talk

DJ Tone Kapone brings a mix of music to students.

Story by Nicole A Cashaw

The club is packed with people dancing to the SOULFUL TUNES OF LAURYN HILL. Master P. R&B, Jay-Z and many other R&B and hip-hop singers.

Then a voice sounds through the microphone: “This is Tone Kapone coming live and direct.”

Once labeled a “motor mouth” in elementary school, Anthony Mase, better known as DJ Tone Kapone, uses his communication skills through radio waves for student listeners to enjoy.

“Tone has a great rapport with people,” said Jay Alan, the station’s evening personality. “He love people. Tone can talk about anything, from the weather to sports or music. He can talk about it and make it funny.”

Kapone has been involved with radio disk jockeying for four years. He can be heard as a DJ from Monday through Thursday on the WIDR radio station located in the Student Center.

His enjoyment is music and seeing people dance-protected Kapone to pursue a career in radio disk jockey. He said the essentials of being a DJ include having a thorough background of music and being able to know what the public wants to hear.

“You have to have a good knowledge of music,” he said. “You have to be versatile and know your music, and be able to draw back on songs that get certain reactions out of people and comparing them with other songs.”

Kapone combines several different types of music into one program. He plays music that includes jazz, R&B and rap and into a little of everything. “I like to play a mix of R&B and rap and I like to play a little street,” he said. “I try to stay away from music that has been done before. I like to keep things new and fresh.”

Jason Little, a graduate student in rehabilitation administration at SIUC, and popular known as DJ Tone Kapone, now uses his communication skills through radio waves for student listeners to enjoy.

“Tone is the man,” said Jay Alan. “He’s a real DJ. He can talk about anything, from the weather to sports or music. He can talk about it and make it funny.”

Kapone is a graduate of WIDR Radio Station and has been a DJ on the station for four years. He has been involved with radio disk jockeying for four years. He can be heard as a DJ from Monday through Thursday on the WIDR radio station located in the Student Center.

“You have to have a good knowledge of music,” he said. “You have to be versatile and know your music, and be able to draw back on songs that get certain reactions out of people and comparing them with other songs.”

Kapone combines several different types of music into one program. He plays music that includes jazz, R&B and rap and into a little of everything. “I like to play a mix of R&B and rap and I like to play a little street,” he said. “I try to stay away from music that has been done before. I like to keep things new and fresh.”

Jason Little, a graduate student in rehabilitation administration at SIUC, and popular known as DJ Tone Kapone, now uses his communication skills through radio waves for student listeners to enjoy.

“Tone has a great rapport with people,” said Jay Alan, the station’s evening personality. “He love people. Tone can talk about anything, from the weather to sports or music. He can talk about it and make it funny.”

Kapone has been involved with radio disk jockeying for four years. He can be heard as a DJ from Monday through Thursday on the WIDR radio station located in the Student Center.

His enjoyment is music and seeing people dance-protected Kapone to pursue a career in radio disk jockey. He said the essentials of being a DJ include having a thorough background of music and being able to know what the public wants to hear.

Not losing their religion

Some SIUC students find attending church helps them concentrate on school, some don't.

KENDRA THORSON
DAILY EGYPTIAN REPORTER

Many students involved in religious activities at SIUC believe that religion is a great way to have a more meaningful college life and make long lasting relationships.

John Scarano, director of The Newman Catholic Student Center, 715 S. Washington St., said he believes the best reason for students to get involved in church is because students involved in religion while in school usually enroll and graduate with a higher percentage rate from the University.

The Newman Catholic Student Center hosts more than 600 students per week as well as 150 community members at its services.

Scarano said about 100 of the community members that attend the church are related in some way with the University.

The Newman Catholic Student Center is involved in numerous service projects: students visit nursing homes and area mental institutions once a week; students participate in Habitat for Humanity; organize Bible studies, prayer groups and faculty lectures.

Scarano said the reason more students do not attend church is because of a lack of effort and that students may be involved with other activities.

“In the first two years of school, students are more involved in studying, making relationships and having fun,” Scarano said. “When students become juniors and seniors, they begin to realize that religion will affect the rest of their lives.”

Dr. Austin Guest, a political science professor from Lake Villa, attends the Newman Center on a regular basis. Guest said that helps her focus on what is important in life.

“Going to the Newman Center has helped me to calm down and concentrate on what is needed. It is very beneficial,” she said.

But not all students feel the same way as Guest.

Kimberly Lewis, a junior in administrative justice, France Grand Rapids, Mich., does not attend church regularly because she has not found a church in the Carbondale area that appeals to her.

Lewis attended church regularly while at home but said she does not have the motivation to do so now.

“A big reason for me to attend church at home was because my parents and friends always wanted to go,” Lewis said. “I am much happier today, truthfully. I’d rather sleep.”

Dana Maaks, a senior in psychology from Edwardsville, strongly believes in religious activities while at home.

Religion affects more students on a weekly basis than any organization at the University, with the exception of sports,” Scarano said jokingly.

may change."

Another forward that has been impressive in the absence of
Daniell, has been junior Derrick
Thomas. He along with senior guard Monte Jenkins led the way
for the Salukis with 20 points each Sunday.

Weber said Thomas's work ethic
is a solid example of the way to
play hard everyday. "He loves the game," Weber
said. "He plays with enthusiasm
everyday. That's something we're
trying to instill in the kids and say,
'look what Derrick did.' He's like
that all the time, now he
comes in the game and there's no
change over.

Weber was also pleased with
the play of his two point guards.
Junior Ricky Collum and freshman
Brandon Wells against AAU's
Calvin Rayford, a former point
guard for the University of
Kansas.

"I thought Collum and Wells
delivered themselves very well,
WILLY
continued from page 16
said. "You know, Rayford got
one and stripped (Collum)
early, and then he got a little tenta-
tive, but after that he was fine. He
controlled the game, that was his
only turnover the whole game." Collum said he has been adjusting
to running the point for the
Saluki petty well.

"Everybody's still learning," Collum said. "There's a lot
of moving and picking, so we just
have to keep practicing and hopeful;
ly, we'll get this going, and it
will give us a lot of freedom to
just move and create.

"He's the guy that's going
to make their offense go," Quarless
said. "That's a great quarterback in
terms of running the football."

As far as the game plan goes for
stopping Taggart, the Salukis expect
their outside linebackers and cor-
nerbacks to be the decisive force.
Linebackers Andre Bailey, Jason
Mills and Luther Claxton and cor-
nerback Jeff Baptiste and Orlando
Rogers will be asked to handle the
quarterback.

The two positions are key when
it comes to stopping the sometimes
unbelievable option. The quicker
outside help can get to Taggart,
the less of a chance he will have to
make big plays.

"We've got to stop him behind
the line of scrimmage and force the
pitch,' Quarless said. "I think we've
got to knock him down."

Taggart will not be the only one
with a homing device on him
Saturday. The Salukis have an
impressive runner of their own.
Junior running back Karlton
Campence is fourth in the nation in
rushing with 1,570 yards on 275
carries.

The only problem is the Salukis

The sign of winners

UNIFICATION:

Seniors play first home games of their Saluki careers over weekend.

Paul Wilkening

DAILY HERALD REPORTER

The stylized sign of Places — the symbol of unification — is seen at almost every stop on the 1998 SIUC volleyball team, from the Missouri Valley Conference to the Saluki Alumni Association — along with Lindsay Resmer, who played for the Saluki volleyball team this weekend — and Sunday — to see an essential example of life.

The union of various skills and talents of this class has brought a dynamic offensive and defensive force to this year's squad. All four seniors among the team leaders in kills and total blocks, which includes the team's assist leader.

Montroll is currently 25th all-time in the MVC with 414 career kills and ranked fifth in career digs at SIUC (942). With 48 double-doubles in her four years, the Saluki setter averages 1.00 in her career.

“Lynn is probably our best attacker,” Locke said. “I'm going to focus her up on our weaker blocker so she can score a lot easier.”

As a group, they have been in two MVC games this year, against the University of Wisconsin and the University of Illinois at Urbana-Champaign, where they won both games.

The Salukis came up short after falling in their final two games of the regular season. Locke said, “This year, we want it more than last year. We lost four times to the MVC champions, and this year, we're going to be dog fights.”

The Salukis' season ended with a 1-10 record in MVC play and a 1-16 record overall.

SPORTS BRIEFS

MEN'S BASKETBALL

Two forwards verbally commit to SIUC

Two versatile big men have given coach Bruce Weber a boost for the upcoming season. They are Kelly French of the Class A for this year and Siobhan Morland of the Class A for this year.

Kelly French, a senior in health care management from Barrie, Ontario, had a season-high 10 points and 13 rebounds per game at Illinois High School Association Class A for his season. Morland, a sophomore, showed his potential — he has grown eleven inches in the past two years and is still aging.

Kelly French was named to the McDonald's All-American team for his senior year at Plano High.

**BIG WILLY STYLE**: Salukis look to end six-game skid; stop dangerous quarterback:

**SUNIEL RICHARDSON**

**Sports Editor**

The Saluki football team's defensive scheme used on Oct. 25, 1997, might as well have been thrown in the dustbin. Maybe, they're thrown in the garbage can; there has been no sign of them being sprinkle kicked through the air over the campus lake.

On that unforgettable autumn day, Western Kentucky University option quarterback Willie Taggart had the SIC defense at its wits end. Taggart, the most dangerous quarterback in the league, completed 17 of 31 attempts for 202 yards, intercepted just 20 times and three touchdowns. His yardage for just one third of the season.

The Hilltoppers ran away with a 52-31 win at M.A.C. Stadium and the only thing missing from the performance was the interface of computer. From the SIC coach Paul Weckler was left with only the.turnovers of the Hilltoppers.

Query: What did Paul Weckler say following last year's game?

**Paul Weckler**

**Sports Writer**

Well, here is the Salukis' chance for redemption. WKU's loss in the season opener is their only blemish in the series 4-2 and has not won since 1995. In the last two meetings between the schools, WKU has been the home team.

**GAME TIME**: Watts to get additional playing time with Chris Thune out with injury:

Upon popular demand and in observance of Veterans' Day, we are publishing the Keynote Address given by Col. Larry Magnuson at the 1998 Carbondale Memorial Day Services.

I am in your debt... 1998 Memorial Day Speech by Col. Magnuson, Professor of Aerospace Studies, AFROTC Detachment 202, Southern Illinois University Carbondale, IL.

Your honor, Veterans, and all the men and women of Carbondale and the people of this area. It's with a sense of pride and humility that I stand here today and as an American, I would like to give voice to the sacrifices of so many.

I was especially humbled by the significance of Woodland Cemetery. This was the first cemetery in Carbondale. I walked around here a few days ago. I saw many names of those who fought in the civil war—some more famous than others. I saw the grave of Gen. Abner Doubleday, who fought in the Civil War, then became Lt. Governor of Illinois. I saw his passing in 1864 was noted by the community. But I also noted Pvt. Lewis Martin who died on Christmas Day, 1869. His passing may have only brought tears to those finally reunited, left behind wondering why a person must die for the next holy day of the year. These are real people and I love them a debt. Therefore, I'd like to place the emphasis of this speech on our military members and their families.

Memorial Day is a day to remember all those who have passed on before us, including those that have fought and died in war, to celebrate the freedoms we enjoy today and to look forward to the challenges of tomorrow.

In remembering those who have gone before us, we must give honor and respect to those who have died in defense of freedom. The numbers are staggering. Some one-half million for World War I, the war to end all wars, and World War II (during which my father fought for almost four years in Italy and Africa). Over 33,000 died in the Korean War. Over 58,000 in the Vietnam War. On a personal note, to me that's an overwhelming number. My first flight as an Air Force Navigator was flying from Phnom Pehn to Saigon. It's quite an experience to be in a place the emphasis of this speech on our military members and their families.

Speech FROM PAGE 1

Kwiat is not a third world country. It's a very modern country with enormous wealth and emphasis on education. It made me realize how vulnerable a community can be. This is truly a day of celebration and reflection we are free. I am convinced that in 1863, when Abraham Lincoln was declaring it a battlefield at a cemetery where he gave the Gettysburg Address, his simple message rings as true today as it was then. He told his audience that government is not for people, by the people and for the people shall perish from the earth,” our system of government is one of the few that places people first and is envied by most of the world.

But what of the future. Over the past 27 years I’ve had a unique perspective to view many young men and women that have volunteered to defend our country. I say volunteer because it was in 1973, twenty-five years ago this year, that the military draft was eliminated. I have viewed these volunteers as they come on active duty, and now have the opportunity to view our college students as they struggle with the APRTC college commissioning program here at SIUC across the river at Southeast Missouri State University. As they come on duty, they are inheriting a world much different than the one I entered. They have the challenges of combating terrorism. Not so much of trying to conquer countries but of small bands and even individuals with enormous power. These terrorists have their own selfish view that what is best for them must be imposed upon the rest of humanity. And, now, they have the potential of arming themselves as never before. In addition, after almost a generation of nuclear arms reduction, the genie is once again out of the bottle. India has exploded five nuclear bombs within the past two weeks in spite of US and other nations of the world deploring such actions in the strongest of terms.

Over the past 27 years I’ve had a unique perspective to view many young men and women that have volunteered to defend our country. I say volunteer because it was in 1973, twenty-five years ago this year, that the military draft was eliminated. In addition, after almost a generation of nuclear arms reduction, the genie is once again out of the bottle. India has exploded five nuclear bombs within the past two weeks in spite of US and other nations of the world deploring such actions in the strongest of terms. Its neighbor and historical enemy, Pakistan, is threatening to do the same. Civil wars in Ukraine and threats of escalating actions in Saudi Arabia still keep our young men and women away from home in their attempt to keep the peace. But I’m here today to tell you that tomorrow’s Americans are just as dedicated, just as patriotic, and in many ways more intelligent and definitely more worldly than my generation. The job of keeping America free in the 21st century is in good hands.

When I was growing up in the 1950s, I didn’t quite like to reflect on a message sent out to all military members from General Henry H. Shelton, Chairman of the Joint Chiefs of Staff. In this message he reminds us that “...our ideals and way of life will continue to be challenged and will be imposed upon the rest of humanity. And, now, they have the potential of arming themselves as never before. In addition, after almost a generation of nuclear arms reduction, the genie is once again out of the bottle. India has exploded five nuclear bombs within the past two weeks in spite of US and other nations of the world deploring such actions in the strongest of terms.

But what of the future. Over the past 27 years I’ve had a unique perspective to view many young men and women that have volunteered to defend our country. I say volunteer because it was in 1973, twenty-five years ago this year, that the military draft was eliminated. Civil wars in Ukraine and threats of escalating actions in Saudi Arabia still keep our young men and women away from home in their attempt to keep the peace. But I’m here today to tell you that tomorrow’s Americans are just as dedicated, just as patriotic, and in many ways more intelligent and definitely more worldly than my generation. The job of keeping America free in the 21st century is in good hands.

The City of Carbondale applied to the Illinois Department of Commerce and Community Affairs (DCCA) for a grant to rehabilitate additional homes in Carbondale. Recently DCCA announced the approval of a grant to the City for $30,000. A grant application for $30,000 has also been given preliminary approval by the Illinois Housing Development Authority (IHDA) for the City’s rehabilitation program. "These grants enable the City to rehabilitate up to 18 homes.

Once again this year the rehabilitation funds are targeted to northeast Carbondale and a small part of northwest Carbondale. The part of the northwest area that is eligible for the housing rehabilitation grants is generally bounded on the south by Sycamore Street, on the north by Willow Street, on the west by Oakwood Avenue, and on the east by University Avenue/illinois Avenue. Homes on both sides of the boundary streets are eligible. Thus homes apsioning both sides of Sycamore Street, Oakwood Avenue, and Willow Street are eligible. The entire northwest remains a target area for this year.

Eligibility for the housing rehabilitation grants is limited to low- and moderate-income families who are owners or occupants of the homes. Income limits set by the State for participation are as follows, based on the number of persons in the household: 1 person—$22,100, 2 persons—$25,200, 3 persons—$28,450, 4 persons—$31,640, 5 persons—$34,315, 6 persons—$36,650, 7 persons—$39,070, 8 persons—$41,500. These figures may be adjusted upward if new ones are received from the state before the applications are reviewed.

Once the grant documents have been processed by the two state agencies and signed by the City, implementation of the grant will begin. It is anticipated that it could be January before grants can be made to homeowners from these new funds. The City will mail new application forms to persons in the target areas who applied last year, but were not able to be funded. Persons who did not apply in previous years can contact the City to request an application form. They will be mailed out when the applications are available. Questions about the application process or requirements for an application should be directed to the Development Services Department at 457-0248.

EMPLOYEE SPOTLIGHT

Jennifer Guthrie has accepted the position as Community Youth Coordinator.

David Kemp is a new Patrol Officer for the Police Department.

Amber Nation has also accepted a position as a Patrol Officer for the Police Department.

Kent Burnis has retired after serving 25 years as a Carbondale Police Officer.

Preservation News

Submitted by Carbondale Preservation Commission

Eleven preservation awards were presented at the Landmarks Preservation Council of Illinois' 18th Annual Statewide Preservation Conference and Awards Dinner and Ceremony held in Elgin, Illinois on September 15, 1998. Carbondale Preservation Commissioner Gail White, AIA, of White & Engberg Architects, was presented the Richard H. Driehaus Foundation Preservation Award. The Foundation’s Award honors an individual who has exhibited an exceptional long-term commitment to preservation. Through their architectural firm, preservation commission work, and board membership, Gail White has influenced the field of preservation in Southern Illinois and the state. She is widely recognized for her firm’s restoration work, her commitment to preservation solutions in Southern Illinois, and is known as an authoritative preservation voice through out the state. Congratulations Gail!

Earlier at the conference, the Carbondale Preservation Commission was honored as the recipient of the State Preservation Award from the Illinois Association of Historic Preservation Commissions for the Carbondale Town Square Walking Tour Program. The plaque project consisted of installing ten interpretive signs within the Town Square to provide a self-guided walking tour of the development of the area. The interpretive plaques enhance the Town Square’s appearance and present as "open air" museum for Carbondale residents and visitors by promoting the Naudy and architecture of the Carbondale Town Square. The Commission invites everyone to visit the Town Square and enjoy the improvements completed this year.

And finally, please note on our next page! The Commission will be hosting the 2nd Annual Carbondale Archive Photo Copying Workshop on Thursday, November 12, 1998. The purpose of the Carbondale Photo Archives is to make photographs in private collections available for research purposes to the general public. Individuals can bring their photographs to the workshop and have them copied. The original photographs are returned to you, but a copy is retained and stored with the City’s photo archives. We greatly appreciate your help with this ongoing project.

2nd Annual Carbondale Archive Photo Copying Workshop

The Carbondale Preservation Commission is looking for old photographs depicting local history!

- Buildings/Sites
- Events/Utilities
- Personal
- Lifestyle/Traditions
- Early Commerce
- Schools/Churches
- Architecture
- Neighborhoods
- Early Transportation

Photographs will be copied and registered with the Carbondale Photo Archives on THURSDAY, NOVEMBER 12th at the City Hall/Civic Center 200 South Illinois Avenue, Carbondale Doors open 10:30 am - 12:00 Noon

For additional information, please call 459-5021, ext. 215 sponsored by the Carbondale Preservation Commission
For the City Managers' Desk
Police Sergeants Brown and Shiplett Graduate From Management Program

Carbondale Police Sergeants Luanne Brown and Chuck Shiplett have successfully completed the Illinois Law Enforcement Executive Institute’s Executive Management Program. Sergeants Brown and Shiplett participated in the graduation ceremonies held on October 27, 1998 at the Rend Lake Resort.

The Executive Management Program was established by the Illinois Local Law Enforcement Training and Standards Board to provide top-level law enforcement personnel intensive training that will help the meet the needs and changes they face in their administrative and management capacities. Topics of instruction include management issues, administrative law, media relations, total quality management, leadership, stress management, and community policing. The program is presented in six sessions consisting of three days each over a two-month period.

Sergeant Luanne Brown has been a sworn police officer with the Carbondale Police Department since 1985. She was promoted to sergeant in 1994. Prior to becoming a police officer, sergeant Brown served as a city clerk for the city of Carbondale, and in 1979 she was a graduate of the University of Wisconsin with a bachelor’s degree in education. Currently, Brown has been assigned as the Administrative Division Sergeant and has worked previously as a Field Operations Sergeant.

Sergeant Chuck Shiplett was appointed as a police officer with the Carbondale Police Department in 1983. He was promoted to sergeant in 1993. Sergeant Shiplett was assigned as a police officer with the Carbondale Police Department in 1983. He was promoted to sergeant in 1993. Sergeant Shiplett served as the Administrative Division Sergeant and has worked previously as a Field Operations Sergeant.

The Carbondale City Manager, who is a member of the Illinois Local Law Enforcement Training and Standards Board, congratulated Brown and Shiplett for their completion of the management program. "The executive management program is excellent training for these outstanding police officers," he said.

A snow emergency is automatically declared whenever an accumulation of snow and/or ice exceeds two inches. When this happens, parking on any portion of a street designated as a snow route is prohibited.

Permanent signs are posted on each snow route that is designated as a snow route and those streets will be given primary attention during snow removal operations. If possible, move your car to the driveway or garage. That way, your car won’t be towed or dismantled and your driveway will be plowed.

As those streets designated as emergency snow routes become substantially clear of snow and ice, edge to edge, for the length of an entire block, the “no parking” emergency is terminated and you can park on the street. If you have questions about snow emergency routes call 457-3275.

Parking Prohibited During A Snow Emergency

Just a Reminder!
Keep Sidewalks Free of Ice and Snow
Snow and ice on sidewalks are hazardous to pedestrians, particularly the elderly and disabled. Carbondale has a large number of school and college-age residents who get to and from school as pedestrians. In recognition of the hazards caused by snow and ice on public sidewalks, there is a ordinance which requires the owners and occupants of properties adjoining public sidewalks to keep their sidewalks clear of snow or ice accumulation.

The city ordinance requires that a sidewalk path of at least 30 inches wide be cleared within 48 hours after the end of snowfall or other freezing precipitation. Sometimes snow, ice, sleet or freezing rain on the sidewalk becomes so hard that it cannot be reasonably removed without damaging the walk. In these situations, the city will not be held liable for the expense of removing the snow. If you have questions about the snow/ice removal requirements, please contact the Carbondale-Neighborhood Services Division at 549-5302, extension 301.

If you have any questions about the City’s snow/ice removal requirements, please contact the Carbondale-Neighborhood Services Division at 549-5302, extension 301.

There is a bicycle network along certain streets in Carbondale. Some streets have striped bicycle lanes. The five streets with striped bicycle lanes are Sycamore Street east west of Oakland Avenue, Poplar Street between Walnut Street and Mill Street, Lewis Lane between Grand Avenue and Walnut Street, Marion Street between Walnut Street and College Street, and Sunset Drive from Emerald Lane to Parish Lane. When Grand Avenue is rebuilt between Lewis Lane and Giant City Road, it also will have striped bicycle lanes.

Several streets with relatively low motor vehicle traffic volumes in residential areas are signed as part of the bicycle network but have no designated bicycle lanes. Bicycle riders are encouraged to use the street instead of the more heavily traveled arterial streets.

Notice: Parking Prohibited During A Snow Emergency

It’s hard to believe that I have reached the home stretch of my first term as city councilman. Every day brings a new challenge and a new opportunity. It has been a very rewarding experience to serve the citizens of Carbondale.

Hopefully, my campaign goal of creating a new recreational complex for our community will come to fruition. Although progress has been made, there is a long way to go. The land acquisition is yet to be completed. To be truly successful, an agreement must be reached by four units of local government plus numerous community organizations. As long as everyone continues to work together, we can create something that will make us all proud. If built correctly, it can help draw more families and eventually more business opportunities to our city.

Anyone who is interested in serving on the city council for the next term should start making plans now. The filing deadline is in December for two council seats plus the mayoral seat. With three seats open, complete control of the council will be at stake. The April election should generate a higher voter turnout because school board elections will now be on the same day. I encourage anyone with a willingness to serve our community to run for the council, the park district, or one of our school boards. Carbondale will not move forward without the encouragement of our best citizens to lead our units of local government.

DID YOU KNOW?
It is not legal to ride a bicycle on a public sidewalk in Carbondale except in the following circumstances:

1. Children under the age of 12 may ride a bicycle with a wheel size of less than 24 inches on any public sidewalk in non-business areas.

2. The Drainways/Greensways Path between Grand Avenue and Walnut Street can be used by bicycles. This path is signed with pedestrians, and bicycles must yield to pedestrians.

3. “Sidewalks” signed as bicycle paths may be used by bicycles. Examples include the “sidewalks” on the south side of Grand Avenue between Washington Street and Wall Street, on the south side of Pleasant Hill Road between Illinois Avenue and Wall Street, and on the south side of Walnut Street between the Drainways/Greensways path and Lewis Lane. The segment along Walnut Street shared with pedestrians, and bicycles must yield to pedestrians.

4. Sidewalks on the SIU campus can be used by bicycles unless designated by SIU to prohibit bicycles.

CRITTER CORNER

By Cindy Nelson, Animal control officer

I want to take this opportunity as your Animal Control Officer to share a very personal segment of my life. This is about my dog "Foxy" who was_note, companion and family member from 1988 - 1998. In 1988, I was the manager of the Humane Shelter and had recently lost my dog, "Collie," a Gooden Setter. Foxy had been picked up by Animal Control in the roadway in Morphény and brought to the Humane Shelter.

"Foxy" was too small for the stray kennel so she had a special cage in our isolation area. It didn't take her long to get my attention and she soon took up residence on her rug next to my desk. It wasn't long before I was taking her home with me for lunch and she was soon installed as a permanent member of the Nelson household. "Foxy" loved riding to pick up pizza (one of her favorite foods was pizza sausage). She also enjoyed quiet evenings swinging in the backyard two-seater with her head in my lap. She loved getting attention and I loved giving it to her.

For almost a year, Foxy battled lymphosarcoma cancer. We made numerous trips to the University of Illinois for chemotherapy treatments. My husband and I patiently tried to make the effects of the treatments as comfortable for her as we could, but in the end, we had to make the decision to not her to her suffering anymore.

We said goodbye to "Foxy" on July 28th. My husband and I consider her a permanent member of our household, a City license. The cost is $7.00 for an un-neutered and $10.00 for a neutered dog. Call the City Clerk's Office at 629-3301, ext. 281 for additional information.

CITY OF CARBONDALE

1999 SIDEWALK AND CURB CUT REPAIR PROGRAM

The Partnership For Disability is currently in the process of preparing a list of sidewalks or curb cuts needing repairs to submit to the City of Carbondale for its annual Sidewalk Repair Program. If you are aware of any sidewalks or curb cuts within the city limits that may need repairs, the Partnership For Disability is asking that you identify these areas by designating the street and the section of the sidewalk that needs repair. Don't ever feel like "Well, it's no problem." Stairs or ramp will always have a special place in our hearts. It is really okay to give over the loss of your family pet. This is a natural reaction that we need to experience. Our feelings toward pets are so special that they have a term for the relationship: the human-companion animal bond. When this bond is severed, the sense of loss can be overwhelming.

I am writing this letter to the pet owners in the Carbondale Community to tell you that experts have found that pets give love and comfort when they are needed. A pet gives love unconditionally and asks for nothing in return. We will always remember the joy "Foxy" brought to our home and she will always have a special place in our hearts. It is really okay to give over the loss of your family pet. This is a natural reaction that we need to experience. Our feelings toward pets are so special that they have a term for the relationship: the human-companion animal bond. When this bond is severed, the sense of loss can be overwhelming.
