Salukis Hold Series Edge

By Joe Cook

If previous encounters are any indications, Southern's Salukis should have their hands full with the University of Louisville Cardinals tonight. Game time is 8 o'clock.

The Salukis won in two previous meetings, but both games were close, hard-fought defensive struggles.

In 1963 Southern edged the Cardinals 13-7 with the help of a four-yard second-half kick off return by halfback Rich Weber. The run broke a scoreless tie.

Southern later scored on a four-yard pass from quarterback Jim Hart to end Tom Massey for the clinching touchdown.

Southern won last year's game, 7-6, in McAndrew Stadium. A one-yard plunge by fullback Monty Riffer midway through the first quarter yielded the touchdown.

Louisville countered in the third quarter on a 10-yard scoring pass from quarterback Tom LaFramboise to end Clarence Spencer but the extra point was blocked.

Southern will feature a balanced running and passing attack against the Cardinals.

The addition of halfbacks Hill Williams and Arnold Kee, who will run alongside Riffer, has been largely responsible for Southern's improved ground game.

The two-touchdown running attack in Saturday's victory over State College of Iowa equalled Southern's 1964 ground total.

The passing attack also perked up in last week's game. Hart completed 10 of 18 passes for 119 yards and one touchdown.

Hart's favorite receivers in the Iowa game were left end John Perence and halfback Kee.

Last season the Cardinals set a season record with 136 completed passes. Quarterback LaFramboise has graduated, but his place has been taken by another highly touted thrower, quarterback Benny Russell.

Russell is expected to throw primarily to end Spencer, Mickey Settle, and halfback Al MacFarlane.

Football Game Broadcasts Set

Broadcast time for tonight's football game between Southern and the University of Louisville is 7:45 o'clock on WSIU Radio.

Seven other stations, WJFP-Herrin, WKLO-Cairo, WEBQ-Harrisburg, WMIX-Mount Vernon, WSM-Litchfield, and KSGN-Chester-Ste. Genevieve, Mo., will join the WSIU network.

WGL - Carbondale and WHRA-Anna will be broadcasting SIU's day games only.
Church Bus Rides Offered

This year, as in the past, the Carbondale Ministerial Association is sponsoring a free Sunday bus service to member churches. Two pickups are made at Small Group Housing and Thompson Point at 9, 9:30, 10, and 10:30 p.m. and proceed to Woody Hall. Pickups will also be made at University Park at the same time. The buses will then also proceed to Woody Hall, where the loads will be combined.

Buses will return from the churches at 10:30, 11, 11:30 a.m., and noon. Questions concerning this service can be answered by calling 437-2232.

Auditions Planned For WSIU Jobs

WSIU-Radio will hold auditions for staff announcers and take applications for other positions Monday and Tuesday. The station is operated by students who program, write, announce, direct, and engineer the station's broadcasting.

Participation is not limited to upperclassmen or students majoring in broadcasting; any interested student may apply. Each year the station sponsors a number of social and educational events for its members.

Programs will include Friday seminars and afternoon discussions held from 9 a.m. to noon Fridays in the River Rooms of the University Center. Each evening activity will be held at noon Fridays in the River Rooms of the University Center.

Among social activities is the ladies' bridge group, which will meet each Wednesday at the center. The center will be open daily from 9 a.m. to 5 p.m. Evening activities for faculty groups will be arranged. The center has no formal dining facilities.

Two Coed Cyclists Injured

Fall quarter at SIU came to a painful end for two freshman coeds when they were involved in a car-motorcycle accident at 3:10 p.m. Thursday at the intersection of U.S. 51 and Harwood Avenue. Injured in the accident were Carole Hayes, daughter of Mr. and Mrs. Donald Hayes, Carbondale, and Carole Halstead, daughter of Mr. and Mrs. Thomas Halstead, DuQuoin, who suffered severe lacerations from the hip to the ankle. They were being south of U.S. 51 when they turned in front of a car driven by Maurice Ogur, professor of microbiology, who was driving north through the intersection. Both girls were taken to Doctors Hospital where they are in satisfactory condition.

Students and faculty of Christian Church preference are invited to make our church your place of public worship and Christian fellowship.

A Tradition With SIU Coeds
By Frederick C. Klein

The Wall Street Journal

Christopher Day's father and older brother were fraternity men; in their college days, but the lanky 13-year-old from Mt. Lebanon, Pa., had his doubts. He had set his sights on the Wall Street Journal, where he began his studies at the University of Pennsylvania. "I really can't see much point in joining a fraternity," says Chris, a National Merit Scholar and student editor of the newspaper. "I'm not sure they don't seem to accomplish much outside of purely social purposes. I need something to fill the void. I'll need for my studies. Besides, the dorm room where I'll live seems pretty nice."

Still, a campus tradition shares his skepticism about the merits of fraternity life. As the burden of academic work grows, as the competitive pressures increase, and as society's discrimination rises on the nation's campuses, many fraternities are being ousted from their college homes; the formation of independent student houses; 11 diverse in membership, which would invite faculty membership, by placing more stress on scholarship and less on social gaiety, is coming into being. As with the books, the "gentleman's C" is a common standard. However, Rice and Negroes from most fraternities was tacitly accepted,

Survival in a New Era

Now, in the post-Sputnik, post-Birmingham era, fraternities are being asked to justify their existence. Many have reorganized or are trying to reorganize, by placing more stress on scholarship and less on whooping, and by widening their acceptance of society. Yet even as the Greeks move to anticipate the new academic requirements, it has been difficult to maintain their popularity, prestige and power on many campuses, and on others the Greek organizations have been forced out.

At Williams College in Williamstown, Mass., fraternities are being ousted from their chapter houses; 11 of the 15 Greek groups have already been required to sell their houses to the college, following case studies, and the remaining two are expected to comply by the fall. At Dartmouth, six housing units are being turned into dormitories, and the fraternities are being permitted to exist only as social groups.

Significantly, the move to reform the 132-year-old fraternity system at Williams started with a group of skeptical, anti-Greek fraternity men—when the university adopted the housing plan. An alumni-student committee was formed to study the problem, and the committee recommended the formation of independent student "societies," diverse in membership, which would invite faculty membership, and which would make efforts to bridge the gap between the academic world and the social world.

In its report, the committee said the fraternities are viewed by some of their members "as a means to achieve the social and civic goals of the nation. They have organizations and social, moral, and religious obligations of the college and general society," and further charged that "few of the fraternity groups, either national or local, maintain any educational functions beyond the 'fraternity cocktail party' for the purpose of socializing. Fraternities often the exercise of responsibility is confined to housekeeping, perpetuating the institutional traditions of the fraternities, and the pledge." The committee recommended that the fraternity against attack in the student housing movement.

At larger Rutgers University in New Brunswick, N.J., a similar committee recently studied fraternity houses and found that it could be shown that they were offering their ancient physical plants and that charged with racial discrimination in admitting pledges to housekeeping, perpetuating the institutional traditions of the fraternities, and the pledge.

The incident was followed by a statement from Francia Keppel, U.S. commission of education, warning many schools which allow their fraternities to discriminate on the basis of race face a cutoff of federal funds under the 1954 Civil Rights Act. This is not too likely still all-white, sometimes because few or no Negroes seek to join them.

At Brown, however, that the formal barriers have been dropped, and some chapters have been taking in more minority group candidates. The University of Illinois at Urbana has changed its practices, which are now considered "contemptuous" of the fraternity, its other chapters, and its rituals.

The incident was followed by a statement from Francia Keppel, U.S. commission of education, warning many schools which allow their fraternities to discriminate on the basis of race face a cutoff of federal funds under the 1954 Civil Rights Act. This is not too likely still all-white, sometimes because few or no Negroes seek to join them.

Some 'Go Local'

Fraternities are having to compete in housing," says Dean Minot, Dean Walsh at Brown adds: "Now that we see that alternative students are questions whether the $400 a year they spend on fraternity dues is worth it.

Interest Flags at Illinois

Similar signs of waning strength are appearing even in some of the big Midwestern colleges long located in the fraternity system. The University of Illinois at Urbana has the biggest Greek system in the nation—57 fraternities and 24 sororities. Yet Stewart Minot, dean of men for fraternity affairs, notes that the percentage of incoming freshmen who are members has been "decreasing somewhat" in recent years.

The decline in interest at Brown, Illinois and other campuses has been matched by a housing boom. Not too many years ago, fraternities often boasted the best housing on campus, providing a good reason for joining them. Now, however, many chapter houses are empty and the halls that once flew the Greek flags everywhere are building big, attractive modern dormitories.

Brown, for example, launched a dormitory building program several years ago "that resulted in the elimination of the independent living," says Dean Walsh. At the close of World War II, Illinois provided only 750, but this year there are all spaces for undergraduates. 11 fraternities are significantly fewer than the fraternities offered. Now dormitory spaces number 8,500 and, 1,500 more rooms are under construction. "Fraternities are having to compete in housing," says Dean Minot, Dean Walsh at Brown adds: "Now that we see that alternative students are questions whether the $400 a year they spend on fraternity dues is worth it.

Some 'Go Local'

Fraternities are also becoming more impatient with what they call "fraternities do someday fade away, government officials concede some formidable obstacles exist in proving racial bias by fraternities, and the whole matter has to be studied. But the rule is true: the more college students take a hard look at what their fraternities are doing, says an official of the American Council on Education.

Sigma Chi Threats Suit

Indeed, the Stanford incident spurred announcements from a half-dozen other schools saying they would no longer allow fraternities to use their facilities. The fraternity is not willing to make such an offer lightly; it said it would appeal the case. The fraternity's chairman said he would appeal the case. The fraternity's chairman said he had already been barred from the campus on academic grounds. The fraternity would not comment on whether it could not comply with that school's no-discrimination policy.

Even fraternities that have no formal bars to membership are now being run out of the dormitories, for example, at the "Greek way" over the past several years, fraternities have abandoned much of the chicanery, almost at the same time, as long-term changes still going on at many campuses and on the national level.

The incident was followed by a statement from Francia Keppel, U.S. commission of education, warning many schools which allow their fraternities to discriminate on the basis of race face a cutoff of federal funds under the 1954 Civil Rights Act. This is not too likely still all-white, sometimes because few or no Negroes seek to join them.

Stewart Minot, dean of men at the University of Illinois, says Roy C. Clark, ex-

### Summer Headlines

#### New Coach, Survey of Salaries, Construction Highlighted News

The appointment of a new baseball coach, results of a national faculty survey, and decisions to construct and relocate a number of campus offices were among headline stories appearing during the summer in the Daily Egyptian.

This is the last of three articles on highlights of the summer term on campus.

#### SPORTS

Glen (Ab) Abott stepped down as baseball coach and was replaced by Joe Lutz, former baseball pro and coach at Parkrose College, Iowa.

In their debut in the Midwest Summer Collegiate Baseball League, the Salukis fought their way out of the cellar at the last minute to finish third (13-18) in the four-team league.

The Salukis were coached for the summer by Richard (Itchy) Jones, whose players, most of them right out of high school, said he was the best coach they ever had.

Saluki gymnast Frank Schmitz was one of two American gymnasts selected to compete in a German meet this fall.

Former Saluki swimmer Ray Padovan was the sixth Saluki to be named to Sigma Delta Pi, national honorary fraternity in athletics.

#### FACULTY

A national survey showed SIU faculty salaries rate below the University of Illinois, Eastern and Illinois State universities, but above the national average.

John W. Hamblen, director of SIU’s Data Processing and Computing Center, resigned to accept a post with the Southern Regional Education Board at Atlanta, Ga.

William E. Simeone, SIU professor of English, was named dean of the SIU Graduate School, replacing David T. Kenney, acting dean.

P. R. Brammall, professor of educational administration and supervision, was appointed to the newly created assistant deanship in the College of Education.

Two assistant deans were named in the College of Liberal Arts and Sciences.

Elbert H. Hadley, professor of chemistry, and Bruce B. MacLachlan, assistant professor of anthropology.

Floyd A. Patrick, assistant professor of management, and his wife, were named associates at the Danforth Foundations to study faculty-student relations at SIU.

#### PHYSICAL

Grand Avenue, between Merica Library and Forest Avenue, was temporarily re-opened after being closed for more than a year. It will be closed permanently when the Mill Street widening is completed.

The University contributed money for widening on South Wall Street this fall.

The Board of Trustees ratified an agreement for improvements to make University and Illinois avenues one way this fall.

Plans were also announced to widen Harwood to four lanes, with a landscaped center strip. The project will include removal of temporary buildings on the side walk.

Construction of a footbridge over the IC tracks, for use by about 20,000 University Park residents daily, was postponed until the University announced plans to begin construction of two stories, 17-story residence halls this fall, plus a new administration building.

The University announced plans to begin construction of two stories, 17-story residence halls this fall, plus a new administration building.

The Board of Trustees approved $18 million for construction, including stage two of the Life Science Building, stage two of the Physical Science Building, and a new general office building.

#### Officials of Top Corporations To Take Part in SIU Seminar

Top industrial corporations in America and Canada are sending management officials to SIU Dec. 1-3 for the first International Work Measurement Seminar. Two noted British authorities will present findings on organizational structure and employee satisfaction.

Fremont Shull, chairman of the SIU Department of Management, seminar director, said response has been more than satisfying to the invitations to hear Elliott Jaques, who developed the work measurement theory, and Lord Wilfred Brown, whose research and applied theory.

Reservations include two from Canada: Universities of Canada, Ltd., which will send four representatives, and Northern Electric Co., Ltd.

American industries to be represented include General Motors Institute, Ford Motor Co., Standard Oil Co. (N.J.), International Business Machines, National Cash Register, Peat Millichemical Aircraft, Monsanto, Mead Johnson & Co., Eli Lilly & Co., Detroit Edison, Northern Electric and Union Electric.

In addition, representatives will be from schools including Harvard School of Business, Wayne State University, Illinois State University, Western Illinois College, Eastern Illinois College and Illinois State University, which will send four representatives.

Registration are being limited to 100 at the request of Jaques and Brown.

Jaques, head of the School of Science, is at the University in Acketon, England, and Brown, chairman of the board of Glacier Metal Co., Alpen, England, will be making their first appearance in the United States to tell results of their 18 years of continuous research in the areas of organizational structure and employee satisfaction.

The data include what has been described as the longest continuous study of worker satisfaction ever conducted.

Sessions will be held in the university Center Ballroom. Both program headliners will speak during the first morning session, and Jaques will address the meeting during the afternoon. During the banquet Vic Reback, managing director of Allen Industries, Herrin, where the Jaques-Brown theory has been applied, will talk on "The Application of Glacier Concepts in a U.S. Rank-Four Manufacturing Firm."

Brown will talk during the morning and both he and Jaques will lead discussions during the afternoon of the second day.

#### I.C. 43939 goes to work

Here the couple of IC 43939 meets the couple of another freight car. The couplers click back together. The new 272-foot double-deck freight car is joined to the 228-foot double-deck "Steel Train" by simple couplers that permits the two units to be coupled together at high speed. The car is geared to run on the "Steel Train" for 2,500 miles on each run. A special pullman car, one of many attracting business back to the Illinois Central.

This year more than 2,000 new cars help the Illinois Central expand and vary its service as the "Steel Train" carries 200,000 shipments of 16-foot double-door cars for fast, mechanized loading. A special pullman car, one of many, is designed to attract business back to the Illinois Central.

I.C. 43939 goes to work
Estimated 600 Viet Cong Killed In Major Attack in Jungle Area

SAIGON, South Viet Nam (AP) - Artillery and planes repelled a Viet Cong attack staged by 1,000 to 1,500 men about 300 miles north of Saigon on Friday, a U.S. military spokesman reported.

He said the Viet Cong suffered heavy losses in the attack, the first big Communist thrust in weeks. Vietnamese army sources claimed 600 Viet Cong were killed in the fighting, which raged around the district town of Bong Son. Vietnamese losses were described as "moderate."

The only U.S. forces involved in the fighting were planes.

The Viet Cong launched the attack in regimental strength normally 1,000 to 1,500 men Thursday night in the jungle Scientists Find Clues To the Origin of Life

CHICAGO (AP) - New clues to the origin of organic compounds found in meteorites and, possibly, to the origin of life were reported Friday by three scientists.

The trio expressed belief that the complex organic substances in some meteorites may have sprung into being naturally and spontaneously in the clouds of gas and dust which swirled in space at the time the earth was formed.

If so, they added, the earth and other planets may have started their existence with a rich store of chemically produced organic material from which life could develop

Indo-Pakistani Clashes Reported Near Lahore Despite Cease-Fire

NEW DELHI, India (AP) - Pakistan broadcast a report Thursday that Pakistani and Indian troops were battling again near Lahore, in an apparent reply to critics who contend the 932 strikes are not effective, said the attacks by the giant bombare "are having a very good effect" and "providing a saturation of Viet Cong strongpoints and ruins which could not be reached in any other way,"

Indo-Pakistani Aid Expected To Be OKed

WASHINGTON (AP) - The United States is expected to approve early next week a request from India and Pakistan for more than 6.5 million tons of American surplus wheat, or more than 390 million, U.S. officials said Friday.

The requests of India for 5 million tons of wheat and of Pakistan for 1.7 million tons have been under consideration for some time, U.S. authori­ties said Friday they anticipate an announcement will be forthcoming by early next week on the continuation of the Food-for-Peace program to both nations.

The U.S. slapped an embargo on military aid to both nations as the result of the Kashmir fighting and held up any commitments of new loans or grants.

The requests of India for 5 million tons of wheat and of Pakistan for 1.7 million tons have been under consideration for some time, U.S. authori­ties said Friday they anticipate an announcement will be forthcoming by early next week on the continuation of the Food-for-Peace program to both nations.

The U.S. slapped an embargo on military aid to both nations as the result of the Kashmir fighting and held up any commitments of new loans or grants.
Gromyko Assails U.S. In Speech Before U.N.

Gromyko made the charges in a four-hour policy speech to the 117-nation General Assembly in which he also proposed a draft treaty to halt the spread of nuclear weapons and a U.N. declaration against the interference by one country in the internal affairs of another.

U.S. Ambassador Arthur J. Goldberg replied to the Soviet charges in a statement to reporters after the Gromyko speech.

He said Gromyko merely restated old positions which had never been accepted by any U.N. body, and added he had the impression Gromyko himself realized the charges were not convincing.

He added that most U.N. members are more interested in the U.S. bid for unconditional negotiations, which President Johnson has repeatedly made to Paris and Peking, rather than "in stalemate polemics about Vietnam," Goldberg renewed the offer of his policy speech Thursday.

As for the declaration on non-interference, Goldberg recalled this was banned under the United Nations charter. He also recalled the U.S. would study the treaty on spread of nuclear weapons, as well as other Soviet proposals in the disarmament field. He expressed hope the outcome would be quick negotiations on a treaty to limit "the further dangerous spread" of nuclear weapons to countries not now possessing them.

Gromyko devoted only one paragraph in his speech to support for Communist China's representation in the United Nations, contending it should have the seat now occupied by Chinese Nationalists.

Gromyko hinted strongly that Panama is in a position of preference as the site for a proposed new one-level canal. The United States government proposes to build somewhere in middle America. Administration officials outside the White House said this interpretation is correct.

As Johnson spoke before television cameras and reporters at the White House, Panama's President Marce A. Robles was making a similar announcement broadside to the people of his country.

Rep. Leonor K. Sullivan, D-Mo., chairman of a House subcommittee on Panama Canal affairs, told a reporter the preliminary agreement is "one of the most foolish, unnecessary and saddest things which could be done."

DIKE BROKEN—Surrounded by water from two flooded creeks, cattle huddled together on high ground north of Kingfisher this week as much of their pasture land went under water. Heavy rains flooded streams throughout central Oklahoma Monday night and Tuesday, forcing some 1,500 persons from their homes. (AP Photo)

U.S. Decides to Draft New Panama Treaty

WASHINGTON (AP) — President Johnson announced Friday a decision to scrap the controversial Panamanian Canal treaty of 1903 and draft a new one offering Panama a share in management and profits of the waterway and other benefits.

The President said success of preliminary negotiations with Panama—which began after anti-U.S. riots in January 1965—brought death to 21 Panamanians and four U.S. soldiers—show nations can solve their differences "honorably and decisively without violence and conflict."

In addition to a share of management, Sullivan said it has been agreed that "the new treaty will effectively recognize Panama's sovereignty over the area of the present Canal Zone."

In addition, the statement listed strongly that Panama is in a position of preference as the site for a proposed new one-level canal. The United States government proposes to build somewhere in middle America. Administration officials outside the White House said this interpretation is correct.

As Johnson spoke before television cameras and reporters at the White House, Panama's President Marce A. Robles was making a similar announcement broadside to the people of his country.

Support Sans Straps

Fashion Expert Poses Project for Scientists

LONDON (AP) — A fashion expert appealed to world scientists Friday to meet the uplifting challenge of the strapless bra.

"Just take one scientist off the space race," urged Judy Innes, "and let him concentrate on the strapless bra."

Writing with feeling in the Daily Mail, she said: "Men on the moon can wait. We need the perfect strapless now."

The problem has become urgent — at least in Europe — because of two late jet age developments:

1. The return by the astronauts to the cosmodrome at Paris to the strapless dress.

2. The current rage for the Shake and other more violent dances.

The engineering challenge still is — how to fight the forces of gravity with a comfortable lift from below instead of the normal heave from above.

"Wires and bones have helped," says a big bra boss, "but with wires and bones you can't avoid weight, bulk and rigidity."

This coupon, plus just $2.00, will thank Mom and Dad five days a week.

One of Few in World

She 'Writes' Dances Like Music Scores

Toni Intravaia, SIU dance teacher, is one of the few persons in the world who can "write" dances so that others may perform them.

The system she uses is Labanotation, or dance notation. The word stems from the name of the originator, Rudolf Laban, who developed the system about 60 years ago. Instead of the musical scale of five horizontal lines, Mrs. Intravaia uses a three-line vertical staff, drawing rectangular symbols to the right of the "score" to indicate the dance counts for the beats of music.

"It took 300 years for music notation to reach its present status and be readily intelligible to all musicians," Mrs. Intravaia said. "Labanotation has come a long way in a comparatively short time. It has been accepted by the Bureau of Standards, and scores now can be copyrighted. I predict that before too many years have passed, composers will write music for the dance as well-known in the dance field as music notation in its field," she said.

Mrs. Intravaia has also studied "event notation," a somewhat similar method of graphically picturing the motions of industrial procedures, sports activities and other physical actions.

Tiny, slender, with sleek brown hair, she looks little older than her college students, and her energy and verve are amazing. She teaches mornings at the University, then works with private pupils at her home studio in the afternoons. She also takes on assignments such choreography for the dance workshop or a musical, works with boys at the YMCA, crowds in late hours of notation, ... and, for her husband and baby.

Mrs. Intravaia has studied techniques of some of America's top artists in the dance field - Martha Graham, José Limón, the late Doris Humphrey, Hanya Holm, Jan Veen, Jean Leon, and has directed from notation dances composed by them.

She is now in the process of notating from film some of the early works of Miss Graham and is working on the scores of Miss Humphrey's "New Dance" and "Partita." She directed the Humphrey composition "Shakers" at the Connecticut College Summer School of the Dance and the following year directed the SIU Dance Club in the same composition. She will direct a repeat performance here this fall.

Mrs. Intravaia taught ballet and modern technique at the National Music Camp, Interlochen, Mich., for eight summers. While her husband, Lawrence J. Intravaia, associate professor of music, was teaching at West Virginia University, she taught folk and modern technique at St. Francis High School, Morgantown, W.Va., and also served as dance consultant at the university. Later, she taught in Trenton, N.J., and at the Connecticut College Summer School of the Dance.

When the Intravaia's came to Carbondale in 1963, she accepted a part-time appointment on the faculty of the Department of Physical Education for Women, teaching dance.

Mrs. Intravaia studied at a half-dozen universities - Kansas, Michigan, Wichita (Kansas), Texas Christian, and Connecticut College - and completed the ballet of fine arts degree at West Virginia University, where she also did graduate work.

From 1957 to 1965 she took advanced work in Labanotation at the Dance Notation Bureau, Inc., New York City, receiving a teaching certificate in this field.

This summer Mrs. Intravaia created and directed the choreography for two productions of the SIU Summer Music Theater, "Flower Drum Song," presented on campus during the summer.

Low-Cost Health Insurance Offered Students' Families

Low-cost optional health insurance under which SIU students can insure their families will be available until Oct. 6. The insurance provides the same hospital, accident, medical and surgical coverage as the policy for all students who have paid their activity fees, according to SIU Health Service Administrator Robert W. Cron.

If both husband and wife are students and have paid activity fees, the additional coverage is not necessary.

The cost of coverage for a spouse is $2.00 per quarter. For a spouse and all children over 14 days old, it is $6 per quarter. Application cards are available at the Health Service and must be filled no later than 15 days from the start of the quarter.

Weekend Visit Planned

By Professor Emeritus

Mary Lou Barnes, professor emeritus in home economics at SIU, will visit the campus this weekend.

Mrs. Barnes and her husband, a retired railroad worker, now live in Arizona.
SIU Dairy Judges To Participate In 2 Competitions

SIU’s dairy judging team will compete at Memphis, Tenn., Thursday and at Waterloo, Iowa, Oct. 5.

Howard W. Olson, associate professor animal industries, who is team coach, said five students comprising the squad (three team members and two alternates) will judge in an intercollegiate dairy meet at the Mid-South Fair in Memphis. Southern’s livestock judging team also will compete at the fair.

Olson will take the same squad to the country’s top event at the National Dairy Cattle Congress in Waterloo. The students are Steven Taylor, Macon; Dale Bona, Kampsville; Phillip Cook, Macone; Keith Howland, Gardner; and Daniel McCance, Centralia.

The dairy team competed against 10 other teams at the Kansas Intercollegiate Dairy Cattle judging contest in Hutchinson, Sept. 20. The team ranked eighth-overall, second in the Milking Shorthorn division and third in the Brown Swiss division. In individual scoring, Taylor was second in the Milking Shorthorn and fourth in the Guernsey cattle classes. Benz ranked fifth in the Ayrshire cattle class.

SIU Team Is Third Judging Livestock

The School of Agriculture livestock judging team won third place in judging swine and hog carcasses at the National Barrow Show Sept. 13 in Austin, Texas.

It was the first time the team had entered the national event which attracted teams from a dozen Midwestern universities. Team member Oliver H. Dorn ranked second by one point in individual scoring. Robert C. Unland was ninth. Howard W. Miller, associate professor of animal industries, is coach.

Women’s Honorary Tea Set for Sunday

The members of Alpha Lambda Delta, freshman women’s scholastic honorary, will hold a tea at 2:30 p.m. Sunday in the Seminar Room of the Agriculture Building.

Leadership Parley To Be Held Here

A leadership training conference will be held Tuesday in Morris Library auditorium for school administrators and directors interested in beginning an introductory course on education of gifted children.

Participants in the conference, to start at 1:30 p.m., include J. Murray Lee, Southern Illinois University; Herman Chavez, Marion Public Schools; Joe Smolitz, Edwardsville Schools; and David M. Jackson and William Rogge of the University of Illinois.

Funds to support such courses are available from the Office of the Superintendent of Public Instruction.

The SIU College of Education and Division of University Extension are sponsoring the conference.

Eoin O’Mahony (Left) Parades At Lourdes With Desmond M. Tresourt and Patrick Harrington (Right), All Are Irish Knights of Malta

Irishmen Visit SIU During U.S. Tour

Eoin O’Mahony, a papal knight and knight of Malta, renowned for his knowledge of Irish and European genealogy, and Michael O’Hae, director of productions for Irish Radio, visited SIU Thursday and Friday as a part of a tour planned for them by the Irish Tourist Board.

On their tour of the United States, the pair will tape conversations with some of the millions of Irish-Americans. Portions of these taped conversations will be used on O’Mahony’s popular radio shows about Irish families.

Although there is a growing number of Irish in this country, O’Mahony points out that the majority of Irish emigration is now to England and he estimates that the Irish will be ruling Britain in 80 years.

In Carbondale, O’Mahony and O’Hae were dinner guests of Robert W. MacVicar, vice-president of academic affairs, and members of the Yeats Committee who are in charge of SIU’s year-long observance of the 100th anniversary of the birth of Irish poet William Butler Yeats.

Also, the pair taped conversations with Alan M. Cohn, humanities librarian, and Ralph W. Buesche, rare books librarian, concerning the Yeats and Joyce holdings at Morris Library.

Friday, O’Hae and O’Mahony left for Chicago to tape a talk with Mayor Richard Daley.

Their itinerary will include stops in St. Paul, San Francisco and Detroit, including a possible talk with Henry Ford II.

Spaghetti Dinner Set

A free spaghetti dinner will be served at 6:30 p.m., Sunday at the Newman Center. Dance will follow and all students are invited.

Cross-Country Runners to Vie In 3-Way Meet on New Route

Four miles can be a long way when you're on foot, especially if you're a runner on Coach Lew Hartzog's cross-country team.

The varsity runners have held intense workouts to condition for today's 11 a.m. opener with Southeast Missouri. It will be a three-way meet, with SIU varsity men competing against the Salukis' freshman squad, in addition to the Southeast runners.

Hartzog feels that his varsity men aren't as strong as they could be, but that the meet should toughen them. He says, however, that the freshmen are in excellent shape, and this augurs well for next year's varsity.

"Southeast Missouri started working out about two weeks earlier than the SIU team, and this will probably be to our disadvantage", the SIU coach said.

Six SIU varsity men will compete against the Southeast team, which Hartzog predicts will be "young, but tough."

The meet will be on a new course that loops around the Arena parking lot and practice fields south of the Arena. Spectators should be able to see all but about a fourth of the route.

The SIU team will be led by undefeated Dan Shaughnessy, a sophomore from Alliston, Canada. Three veterans will be backing Shaughnessy. They are Al Ackman, a junior from Mount Vernon, who will be in the second spot, Jack Leydig, a senior from San Mateo, Calif., and John Throwbridge, a junior from Alton.

Sophomores Tom Curry, of Chicago, and Art Sommer of Jamaica, N. Y., round out the team.

Many freshmen will be running unofficially in the meet. A standout among them is Oscar Moore, of White Plains, N. Y., who is in top shape.

Duck Season Set For Oct. 30-Dec. 8

The Illinois Department of Conservation has scheduled a 40-day duck season for this year from sunrise Oct. 30 to sunset Dec. 8.

The goose season will open in all but four counties at sunrise, Oct. 15 and close at sunset, Dec. 8. The exceptions are Alexander, Jackson, Union and Williamson counties where the season opens at sunrise Nov. 8 and closes at 3 p.m. Dec. 23.

Faculty Bowling

An organizational meeting of the faculty men's bowling league is set for 9 p.m. Monday in the Ohio Room of the University Center. Departments are invited to send representatives.

ILLINOIS AT MILL
Six of Southern’s future football opponents won their first games. Two lost and one didn’t play.

Tonight’s opponent, Louisville, lost 17-13 to Western Michigan. Coach Don Shroyer said earlier in the week that Louisville was a factor. It gained ground in the game than he had expected.

The next home opponent, Lincoln University of Jefferson City, Mo., got its season off on the right foot by dumping Pittsburg State, 21-0. The game was plagued by mud and rain, however, keeping Lincoln from its usual display of fine running. Lincoln had been a touchdown favorite going into the game.

Drake’s Salukis’ rival in the Missouri Valley Conference is Western Illinois. No one knows exactly when or why, a group of young males mounted on a caisson With fixed bayonets, somewhere on the stands a few hours before the game. Lincoln had the cannon probably wasn’t used in its first outing by Iowa last time the South­erners faced Illi­nois.

The scene is a drill field in the late afternoon, with a�ing sky and rain falling in sheets. The signal drill is in progress, w 11 students, complete kit­chens, private bathrooms, indi­vidual study lounges. Air condi­tioning, washers and dryers, shower and washroom facilities. An all­inclusive in building where lunches and dinners may be pur­chased — no cash tickets re­quired. Reasonably priced. Hitched in hobby, for information call 457-2453 or 457-2457, Wild Street Quadrangle.

In 1891 military organiza­tion was discontinued and the cannon probably wasn’t used until its mounting en­tered active service.

Little more light is shed on the history of this small part of campus tradition.

Four:30. 976 mph. $1850.

SIU Receives $2,500 Grant For Nitrogen Fertilizer Study

Phillips Petroleum Co., with headquarters at Bartles­ville, Okla., announced on Tuesday that it has donated $2,500 for continuing nitrogen fertilizer research at Southern Illinois University.

The grant is the first in a three-year consecutive annual grant-in­aid for Vavra’s fertil­izer laboratory. The funds have increased gradually from the initial grant of $600 in 1957. Vavra says the current grant will be used to explore chemical activity brought about in the soil by micro­organisms and how this af­fects the amount of nitrogen available for field crops from applications of ammonium nitrate.

For several years he has been studying various aspects of nitrogen losses from sur­faces of nitrogen fertil­izer carriers, fertilizer appli­cation procedures and rates, and nutrient uptake by plants.

Vavra has been a member of the SIU agriculture faculty since 1940 and is master’s degree from Purdue Uni­versity. He is a native of Union Pier, Mich.

Bridgestone MOTOR CYCLES

BATES SERVICE COMPANY

515 S. ILLINOIS

---

People are wearing the Union blue, and markers with fixed bayonets are re­ally to the right, side.

A shining artillery piece mounted on a caisson with wooden­spoked wheels flanked by the colors of the United States and the State of Illinois stands proudly at the head of the ranks.

This is the last time the artillery piece will be seen on this field or any other. It has served it well in the Civil War and now the young men of Southern are ready to use it for its last task of looking mi­nutiae.

Sometime between that time and 1940 the cannon was mounted on a stack of blocks in front of Old Main. No one knows exactly when or why, but it’s there.

In Tuesday’s edition of the Daily Egyptian, a feature article by Diane Keller specu­lated about the mystery be­hind the cannon’s silent snout. The Egyptian had only been on the stands a few hours before Willard Hart, associate university archi­tect, called. He said his grandfather had attended Southern in the late 1800s. He was William D. Crews and he was one of the young men who had drilled with the “militias” as it was then called.

In 1891, military train­ing was discontinued and the cannon probably wasn’t used until its mounting entered ac­tion.

Mardi Gras will be held on Friday.

Northwestern, Indiana to Clash In Big Ten Grid Opener Today

CHICAGO (AP) - Northwestern and Indiana clash today in a conference football opener while eight other Big Ten schools try to improve a shaky league record against outside foes today.

The Big Ten emerged from last week's opening round of play with four victories, three defeats and two ties. One of the loop's poorest starts in years.

If today's eight non-conference tangles, two Big Ten teams are regarded underdogs and a third a very slight favorite.

With national prestige at stake, 10-ranked Notre Dame is picked by six points over Purdue, a Big Ten power and ranked No. 6 in the Associated Press poll headed by the fighting Irish.

The game is expected to pack a record 61,746 into Purdue's Memorial Stadium.

Wisconsin rates a 10-point underdog against invading Southern California, held by surprising Minnesota to a 23-23 tie last week. No game this week.

Iowa's aerial-armed Hawkeyes, upset by Washington State 7-0, are a shaky three-point choice at Oregon State in the nationally televised contest.

Other Big Ten teams range from a tie to a win in their first games today, Saturday, including Michigan over California, Ohio State over North Carolina, Minnesota over Washington State, Illinois over Southern Methodist and Michigan over Penn State.

All are at home except Michigan State facing the season-opening Nittany Lions at Penn State.

ABC Will Televisc Playoff Games If... 
NEW YORK (AP) - If the National League race ends up in a tie and a playoff is necessary, the games will be televised by the American Broadcasting Co.

The format and dates for any playoff games will be announced next week by Warren Gile, president of the league.

SETTING HIS SIGHTS - All America football captain Jim Grabowski aims the 65 yards he needs to reach one mile in running yardage in his University of Illinois football career. The Illinois co-

League Start Was Poor

It's the season's start for Ohio State's strong Buckeyes, who play an over-all nine-game card, one tilt fewer than the rest of the Big Ten.

The Northwestern-Indiana league opener introduces new Hoosier Coach John Pont, formerly of Yale, to Big Ten competition.

Pont, who also once coached Miami of Ohio, directed Indiana to a 19-7 opening triumph over Kansas State. His Hoosiers are rated six points better than Northwestern which bowed to fast-starting Florida, 24-14.

Because Big Ten teams now can play three outside games, the conference race will be slow gaining momentum.

Next Saturday brings only two league contests - Illinois at Michigan State and Iowa at Wisconsin. Michigan's Wolverines won't begin their Big Ten title defense until an Oct. 9 invasion by Michigan State.

Nimrods Can Seek Permits To Hunt on State's Areas

Applications are now being accepted by the Illinois Department of Conservation for permission to use public hunting areas.

Applications must include the hunter's name and address, a partner's name and address, the area and date desired and an alternate date in case the area is filled.

No applications will be accepted by telephone, and a hunter cannot apply for more than one permit each for duck, goose, or pheasant hunting.

The three duck areas open to permit holders are the Sangamon-Knapp Island area at Browning; Anderson Lake north of Browning; and Rice Lake, south of Banner.

The hunting season in these areas is from Oct. 30 to Dec. 8, or until the areas freeze over. Shooting hours will be from sunrise to noon.

The two goose hunting areas are in Union County, south of Ware, and Horshoe Lake, north of Cairo. These areas will be open from Nov. 13 through Dec. 23.

The pheasant hunting areas will be open from Nov. 13 to Dec. 5. There are seven areas: Chautauqua Lakes, north of Fox Lake; Des Plaines, south of Plainfield; Iroquois County, north of Beaverville; Green River, northeast of Ohio; Shelby County, west of Cowden; Richland County, southeast of Glnesy; and Clinton County, northeast of Carlyle.

Record Enrollment Reported at VTI

Students are enrolling in record numbers at the Vocational-Technical Institute campus on Crab Orchard Lake.

The institute occupies the former administration area of the old Illinois Ordnance Plant in the Crab Orchard National Wildlife Refuge. The 138-acre tract and its buildings were deeded to the University this year by the federal government.

Extensive refurbishing of classroom and shop buildings was completed this summer. VTI offers 26 one- and two-year technical and vocational training programs, ranging from accounting to electronics and wood technology.

The two-year programs award associate degrees, and the one-year programs award certificates.
