Student fee allocation surveys will be distributed this month

By Jan Trachta
Daily Egyptian Staff Writer

Approximately 17,000 fee allocation surveys will be mailed during the week of Aug. 11, to students enrolled for fall quarter, Jack Baier, coordinator of student activities, announced Monday.

The new fee plan, proposed by Dean of Students George Mace, asks students to designate how activity fees should be allocated. Mace has required a 50 per cent return to allocate fees according to survey results.

A letter enclosed with the survey will request return of survey information by Sept. 7. Baier said student affairs anticipates completing tabulation of results by Sept. 15.

The activity fee budget will likely go to the Board of Trustees for approval at the October meeting. Baier said.

Organizations in need of money before October should submit descriptions of their budget needs to him, Baier said.

"We'll try our best to come up with emergency allocations until the final budget has been passed," Baier said.

Any emergency monies provided will be subtracted from the final 1972-73 budget allocations for a particular group.

Cost for the survey is estimated at $7,660. This includes a $3,500 printing charge for a 24-page brochure, $2,900 for first class mailing, $960 for return postage (based on a 50 per cent return rate) and $380 for miscellaneous expenses, Baier said.

The survey will be financed from a $75,000 student activity fee contingency fund approved in July by the Board of Trustees.

"The survey cost could increase or decrease depending on the number of survey returns," Baier said.

Included in the mailing will be the brochure on student organizations, an introductory letter from Mace, an optical scan worksheet and a scoresheet. Students will be instructed to designate the organizations and the percentage of activity fee money they wish the groups to receive, Baier said.

"No organizations receive mandatory support," Baier continued. However, 18 programs will be designated as "total University impact organizations" and will be briefly described in the booklet.

The total impact category is divided into five areas:

-Government organizations: Graduate Student Council and Student Government
-Publications: The Daily Egyptian, Obelisk and the Mirror.

Daley forces to vote on VP selection

WASHINGTON (AP) — A compromise was reached Monday on a threatened challenge to the Illinois delegation to the Democratic National Committee with a resolution postponing action until the next meeting of that committee.

As a result of the compromise, which amounted to withdrawing the challenge, the Illinois DNC delegation headed by Chicago Mayor Richard J. Daley will be allowed to vote on the selection of the Democratic vice presidential nominee.

Chicago Alderman William S. Singer, who led the successful fight to unseat Daley's delegation at the Democratic National Convention last month, agreed at a Credentials Committee meeting to delay his contest of the Daley state's right to represent Illinois.

The full DNC, newly composed of 303 members, is scheduled to meet at 2 p.m. Tuesday to hear the report of the Credentials Committee and then to vote on giving the party's vice presidential nomination to Sargent Shriver.

Sen. George McGovern, the party's presidential nominee, recommended Shriver to take the place on the ticket vacated last week by Sen. Thomas F. Eagleton.

Longtime Ohio political leader Frank King was outmaneuvered as the Credentials Committee ruled that Ohio State Sen. H. Morris Jackson should replace Rep. Wayne L. Hays, King's choice on the state's delegation to the Democratic National Convention.

Another challenge, from New York, cropped up as the Credentials Committee announced its decisions on challenges to DNC members from Ohio, New Jersey, Wisconsin and Virginia.

The New York challenge is scheduled to be heard at 8 a.m. Tuesday.

In the Ohio case, the Credentials Committee refused to accept the convention to King, the delegation chairman and chief of the AFL-CIO, that seating Jackson would result in an over-representation of blacks. Jackson had won the second-highest number of votes at a meeting of the Ohio Democratic delegation, 76. Hays was third with 69.

The Ohio delegation has five whites and three blacks.

Over 1000 books collected in drive for cultural center

A campaign to collect books for a community cultural center in Northeast Carbondale has netted more than 1,000 books.

C. K. Kumararatnam, campaign secretary, said response has been "very favorable" and the goal of 50,000 books is expected to be reached within the next few weeks.

Three thousand letter requests being sent for the books have been sent to 2,000 leading newspapers, publishers, enthusiasts, book clubs and other organizations throughout the world. Kumararatnam said that because of second-class mailing procedures responses from either coast have not yet been received.

The books are to be located in the Model Cities cultural center, currently under construction. The new center will replace Attacks Multi-Purpose Center.

The book campaign is a joint effort financed and supported by University Services to Carbondale, Black Mountain State music and Modern Cities Youth Program.

Hanrahan acquittal denied

CHICAGO (AP) — A Circuit Court judge denied a motion Monday for the acquittal of Edward V. Hanrahan and 13 codefendants convicted of charges of conspiracy to obstruct justice after a raid in which two Black Panthers were killed.

Judge Philip J. Remitz, who is hearing the case without a jury, said the motion was "premature" and ordered the trial to resume with the cross-examination of Deborah Johnson, 21, the girl friend of Fred Hampton who, with Mark Clark, was killed in the raid Dec. 4, 1969.

China report cites health successes

By Wes Gallagher

PEKING (AP) — The Chinese Communists have wiped out such diseases as smallpox, polio, tuberculosis and venereal disease—all once endemic in their country—a high official of the department of health reports.

The drug problem is nonexistent, Dr. Chen Hui-fong said in an interview, because of a combination of education, strict control of drugs by the government and severe treatment of offenders.

'The new treatment for severe heroin and codeine is fast in development, and we believe the drug problem will be effectively solved in the near future,' he said.

The treatment will be used to help those who have become addicted to Chinese opium and who have been unable to escape addiction through willpower alone, he said.

Chen said he believes the new treatment can help solve the drug problem, but added: 'We have not had a drug problem for many years. Chen said, and the health department was extremely angry at a story by a European correspondent that China was giving up the drug war for export.

Promotes AIDS as a disease that is given a great deal of autonomy in many matters of agriculture, he said, but not in the growth of drugs. Opium cultivation is under the control of three central government departments and no province can grow opium without the consent of the three. The health department sets the amount China needs, and the internal agricultural department grows it and the commerce department produces pain killers.

'We grow only enough for our own use—none is exported,' he said. There are no drugs, there are no ad

Penalties for illegal drug sales are described as severe—he declined to specify the penalties.

China, however, still has the death penalty for major offenses. The Chinese Com

McGovern calls Nixon 'enemy' of U.S. labor

WASHINGTON (AP) — A month after resounding victories in his home state of Georgia, George McGovern is campaigning for blue-collar votes against President Nixon in the president's own home state. The 28,000-member AFL-CIO Amalgamated Clothing Workers, one of the most pro-McGovern labor unions.

Sunday, he is to fly to Miami, Beach to address the convention of 50,000-member AFL-CIO Amalgamated Meatcutters, who have endorsed McGovern.

In the tradition that Democrat presidential candidates have been coming to Miami Beach to address the white working class since the 1930s, the week he'll swing through New England and then to the West Coast, McGovern is due to handshaking stint at a factory gate. He's chosen to open his campaign instead of at the Miami Beach resort where he's been headquartered.

Before describing Miami world's first 100,000-member union, McGovern is expected to speak to some 5,000 members of the police, fire and other state employees.

And he's starting early this time compared to his appearance in 1972: he's an underdog.

McGovern appears to be concentrating his early campaign efforts on blue-collar workers, especially in southern states.

He's already had some success, despite the rejection of AFL-CIO President George Meany to McGovern's support. An Associated Press survey shows McGovern has won endorsement from the leadership of 13 unions with 8 million members. Leaders of the Teamsters union and four smaller ones, with a total membership of 15 million, have not endorsed Nixon.

Union chiefs representing another 18 million members still remain officially neutral.

Gary Dickerson

Fee surveys to be mailed this month

Sports, recreation and entertainment intramurals and recreation, lectures and entertainment and music activities.

Public interest groups: family planning, IPERG and Student Environment Center.

In addition to data for these 18 activities, blank forms will appear on the score sheet to enable students to list other organizations to which they want to allocate fees.

There are 322 other organizations. Baier explained that if individual survey allocations total more than 100 per cent, the fee will be prorated and allocations reduced proportionately.

One student allocates less than 100 per cent of his fee, the rest will be allocated administratively.

Baier said the Senate has enough to offer the group that will only have to be used in the eyes of the University community, but that I've spent this first couple of weeks in every community and sounding out opinions, he said.

"Things are still in the talk stage.

"I heard that he had decided that the University Senate has enough to offer the group that will only have to be used in the eyes of the University community, but that I've spent this first couple of weeks in every community and sounding out opinions, he said. "Things are still in the talk stage.

Mid East changes

On July 18, Egyptian president Anwar Sadat ordered major elements of the Russian military force out of Egypt. Although this has been interpreted as a sign that Russian influence in the Middle East has begun to wane, it does nothing to further the prospect of peace in that strife-torn part of the world.

Since the 1967 war, the Russians have poured about three billion dollars worth of military aid into Egypt, and the net value of their presence there has risen to about 20,000. These troops man air- and sea-aircraft defenses, fly the highly sophisticated and powerful aircraft the Russians have seen fit to give the Egyptians and serve in an advisory capacity with the Egyptian Army.

The Russian interest in Egypt is purely political, maintaining the status quo by balancing the American presence in Israel. Although it seems ludicrous to suppose that the entire Russian military presence in Egypt will vanish, Sadat's statement is cognizant of the fact that Russian military and political influence within the Egyptian political structure will be greatly diminished. This is not a good sign.

The Russians have been walking a tightrope with regard to the Middle East, and Sadat's mandate will have severe political repercussions for all parties involved.

With President Nixon's trip to the Soviet Union in May came many of the trade agreements which the Russians had hoped for. They do not want to antagonize the Americans and jeopardize this newfound affluence by an confrontation in the Middle East would do nothing to aid this relationship.

The Russian leaders must face the dilemma of giving in to the Egyptian demands for more weapons may mean a Middle East confrontation into which both the U.S. and Russia would be dragged. To give in to this demand means an end to Russian influence with the Egyptians, the government, which, to date, has been a restraining one.

Egypt, since 1967, has sought with a desire for revenge, that is, for Israel's downfall. Increased political influence could possibly allow these subdued passions for a military solution to the Middle East problem to flame brightly against Egypt.

John Roberts

Protect newsmen

The judicial branch of the U.S. governmental system has flatly east newsmen and reporters into the role of government agents, a position which should be left strictly to the Federal Bureau of Investigation (FBI) and similar agencies.

By passing the new FBI law, reporters do not have the constitutional right to withhold confidential information from grand juries. This law should disturb any person in a grave position in respect to their careers. Consequently, when the reporter's source discovers he is testifying before a grand jury, the "free flow" of information supplied by the source would be halted immediately.

After testifying the report would needless lose the trust he has built up with his source. This could cause the investigative reporter his job, if he has no access to information. The court's ruling, above all, could provoke the ending of domestic and foreign investigative reporting. No news source will hand out reliable information if something he said could send him to jail.

A prime example of this is the case of a New York Times reporter, Earl Caldwell. Caldwell refused to testify before a grand jury which wanted notes that Caldwell had obtained in an interview with the Black Panthers. If Caldwell gave in, the court would have stopped later, publishable information that made the headlines.

Where can newsmen seek support for their right to keep confidential information received from their sources?

Congress. Congress can challenge the Supreme Court. With the support of many congressmen, legislation can cut down this ruling by the Court. Already, impressive sponsors such as Senators Fulbright, Mansfield and Church are heading the list of those favoring two bills in Congress that protect newsmen and their sources.

If nothing is done to reinstate reporting may become filed under the statutes. Reporters should not be required to answer all questions put to them before a grand jury like other citizens do, but he should have his sources and himself protected by law, so that the continual flow of information can be made available to the public. This reporter's general and his job to society are at stake.

Richard A. Milirato

Flying solo

To the Daily Egyptian:

Wish to call attention to one particular sentence in Anthony Marconi's letter. The sentence reads, "Obvi­ously no government could operate effectively if the funding of its individual parts was left to the whims of an unformed mass." This brings into clear focus the reasoning behind any form of socialism, i.e., it fascist, communist, or socialist. It's reasoning is that no individual could or should decide what is in his best interests. This statement is a vicious insult not only to the students on this campus but to every thinking man in the world.

Every student has the right to spend his or her money on whatever he or she deems in his or her best interest and to withhold his or her money from anything he feels is not in his or her interest. Con­trary to Marconi's next statement, this will not lead to "petty quarrels and madadved activities." (I) I remind Marconi of just what the hell happened this spring under the present system. If a student wishes to support the chess club, he may do so. This will not infringe on the rights of those who do not. If there is an organization which many believe to be in their best interest as students, then they may convince others into funding it.

To the students on this campus, the responsibility for funding activities is your own. Support what is in your own interests and let others support what is in theirs.

Letters to the Editor

‘Uninformed mass’

R. W. Bebing, Graduate Student, Philosophy

There are many stories we have heard about Professor Hoa from the Vietnamese at SIU and throughout the U.S. These are stories about Americanization, relationship to Saigon, fear of deportation, repression and corruption. In the coming months, this will be exposed.

This "preview of coming attractions" has us all on the edges of our seats. Just think, in the months to come, even the uninformed will learn what the (word) "this" is in her last quoted sentence.

Spending of stories, I’ve heard some good ones too! For example, there’s one about Senator Tom Eagleton’s record of drunken driving. In the coming months, this will be exposed.

R. W. Bebing

Comming attraction

To the Daily Egyptian:

In a recent letter to the Egyptian, Marianne Rosen­zweig goes about the business of correcting the opinions of "...monu... who do not know better" regard­ing Professor Nguyen Dinh-Hoa, newly-appointed director of the Center for Vietnamese Studies. Please be to him—I for one had been duped into thinking that Professor Hoa is a distinguished scholar. His record of his accomplishments not withstanding, now feel compelled to agree with Ms. Rosenzweig’s account to the contrary. She writes:

"There are many stories we have heard about Professor Hoa from the Vietnamese at SIU and throughout the U.S. These are stories about Americanization, relation­ship to Saigon, fear of deportation, repression and corruption. In the coming months, this will be exposed."

Carbondale has some problems with its new plan. The most serious problem occurred during summer, 1974. A racially unbalanced plan would have sent 45 children from Winkler to Thomas. The change was needed, the board claimed, because Winkler was overcrowded and Thomas was undercapacity.

At the June board meeting, some 11 parents from the Emerald Lane area walked out of the meeting. Emerald Lane was the area in which the 45 children lived. Parents were angry and the school board was supposedly going to defend all the board members when they came up for election. The parents said they were afraid to having their children bused if the plan would be altered to include pupils from the nearby Parrish Acres area and other neighborhoods rather than the predominantly white residential area. The board struck by its own decision. In a move that did not sit well with the incumbent board members ran unopposed, and the superintendent is still on the job.

Why have some resident accepted integration and busing?

Reasons for acceptance

A higher level of achievement on national tests might be one of the reasons. A report sent to Michael Blake, the state superintendent of public instruction in December, 1971, contained figures that show children in grades six to nine in the Carbondale system rank higher than the national average. The Iowa Test of Basic Skills, administered between March and April, showed a significant achievement gain.

Back upon all the schools in the United States which use the Iowa test, Carbondale's third graders are in the upper 16 percent, fourth graders in the upper 20 percent, fifth and sixth graders in the upper 22 percent.

Another reason why the Carbondale system has worked is the consciousness of the city. As one school board member remarked, "We are in an unique situation, there is no precedent. During the past year, around 15 minutes from each other. We are not faced with the problem of a one or two hour trip as some urbanized cities are."

Superintendent Lawrence Martin said the system uses 14 buses. None of the buses leaves before 7:30 a.m. or returns after 3 p.m. The ride takes about 30 minutes. Originally, the cost for the busing was paid by the school district and the parents. Last year, the cost for busing was about $78,000 in a total school budget of $2,328,000.

Still another area where Carbondale's integration plan has survived is in the manner in which the plan was initially adopted. Instead of being court-ordered, the plan evolved from the initiative of the city's residents. The citizens had a chance to make it, not into the determined plan of some visor committee or at the public meeting.

There was a public meeting on March 2, 22.9: Thomas, 22.9: and Lakeland. 36.4.

WASHINGTON (AP) -- The nation's air is getting cleaner, but the nation's water is getting more polluted, the government reported Monday.

The decrease in air pollution signals that "we're making progress," as Secretary of the Interior James Watt put it, "but more must be done." Watt released the government's first comprehensive report on national water quality, saying that pollution had increased 40% during the past eight years, "in one of the most significant water-quality declines in U.S. history." Watt called on states to do more to protect water resources and to set water-quality standards by the end of 1983.

The report indicates that about 33,000rens of water in America are seriously polluted, with most of the pollution coming from urban or suburban areas. The report estimates that 32,000 rivers and streams are polluted by pollution from agriculture, industry, cities, and sewage. The report indicates that 10,000 miles of rivers and streams are polluted with lead, mercury, copper, and zinc, and that 4,000 miles are polluted with hydrogen sulfide, ammonia, and iron.

The report also indicates that 3,000 miles of rivers and streams are polluted by gasoline, oil and grease, and that 1,000 miles are polluted by phenols, cyanides, and nitrites.

Police report bicycle thefts; wood saw stolen from Humanities site

A saw was taken from the construction site of the Humanities Building and five bicycles were reported stolen during the weekend. University police said Monday.

Police said a Porter aluminum cable tool saw, valued at $130, was apparently stolen between 8:30 p.m. Thursday and 7:15 a.m. Friday from a tool shed at the construction site. Clarence Niehaus, of Baker Forms Co., told police that entry was gained by cutting the lock of the tool shed with bolt cutters.

Niehaus said the tool shed is located inside the fenced compound and the gate to the fence was locked when work stopped Thursday afternoon. He said a labor foreman noticed the saw was gone early Monday morning.

Police said there was no indication that any other tool sheds at the site had been tampered with.

A boy's spring green 16-speed Mercier bicycle belonging to Maryline D. Skinner, 22, of RR 2, Carbondale, was taken Friday evening from in front of the library. It was parked near the library, a girl's blue 10-speed Ward's bicycle belonging to Jean Vagel, 198-2 Southern Hills, was also taken Friday.

Black labor officials may back McGovern

WASHINGTON (AP) -- Some key black labor officials will meet in Miami Beach Wednesday to shape a coalition for George McGovern and counter the opposition of some of labor's white kingspins to the Democratic presidential nominee.

The meeting was called by Charles Hays of Chicago, vice president of the Amalgamated Meat Cutters, AFL-CIO; Nelson Jack Edwards, vice president of the United Auto Workers, and Bull Bryce, secretary-treasurer of the American Federation of State, County and Municipal Employees.

Letters signed by these three went out to their colleagues in the labor movement following the Democratic National Convention last month and after AFL-CIO president George Mundy said he would not support the party's national ticket headed by the South Dakota senator.

About 15 to 20 top black union leaders are expected to be at the Miami Beach meeting. One of the organizers conceded "their concern is the presidential campaign."

"Several individuals who plan to attend have expressed concern about black Americans and working people who have much at stake in the 1972 election," he said.

"They feel that the re-election of Richard Nixon will almost certainly result in further developments of national policies designed to slow or reverse civil rights progress and to undermine federal provisions which promise decent and equitable treatment of American workers," the official said.

The same official said there also "is some concern over the role of black trade unionists in the American labor movement" generally.

Some of them have expressed concern that their interests have taken a beating from the attitude of the national AFL-CIO leadership toward the presidential election. Best estimates are that about three million of the 18 million members of organized labor are black. About half of the UAW membership is black and some 40 per cent of the AFSCME is black.

Symphonic Band to give concert

The Symphonic Band will hold a summer season concert on the west patio of the Student Center at 7 p.m. Thursday.

Direction of the band will be shared by Mel Simon, director of bands, and Nick Koenigsen.

The program will include "New Mexico March" and "Chant and Procession of American Workers" by Charles Gershwin and Duke Ellington will round out the program.

'Dolly' displays excitement, talent of company members

By Pat Neumann
Daily Egyptian Staff Writer

'Hello, Dolly!,' the last of the Summer Theater musicals, was the first of the series to display the professionalism, excitement and general togetherness that make a genuinely fine show.

Cast members, before the Thursday dress rehearsal, had described the show as the best ever by the music company and this description can be taken as gospel. In other productions, there had been some samples of the talent of company members, but in 'Dolly!' these have joined into an effort that really worked.

The general quality of the production compared favorably with professional productions—and, in fact, was much better than some I have seen.

From the very first number—'I Put My Hand In'—the musical sections of the show fair smoothly, containing the best singing and harmony to be heard in the music company productions this year.

Unfortunately, the weakest musical number was the one that is generally a show-stopper—the 'Hello, Dolly!'—sung by Laurene Baker as Dolly Levi lacks the punch and presence which should make her a dynamic, central presence during this dance-song number.

The dancing in the show is nearly above reproach. Choreographer Jo Mack has again done a dynamic job with a group of actors who are essentially non-dancers. Most of the dance numbers move quickly and adroitly and serve to this show.

Particularly good is the "Waters Gallery" in the scene at Harmonia Gardens. This is entertaining and a high point of 'Dolly!' The 'Hello, Dolly!' script is both warm and humorous and the cast generally exploits the good points well, turning out a production full of both touching and funny moments, in addition to the exhilarating dance numbers.

A Review

The most memorable performance of the show is Cynthia Rose as Mrs. Irene Malley. Ms. Rose has done fairly well in the past, but in 'Dolly!' she is really great. She looked beautiful and acted beautifully, making Mrs. Malley a very watchable character and doing an excellent job in his singing—particularly during "It Only Takes a Moment." Although Ms. Baker as Dolly does a good job, my praise cannot be unqualified here. She exhibits the toughness, the domineering part of the role, but at times she does not come on quite strong enough. And during some of the dance numbers, she simply stood there while the others danced.

That is not to knock her performance altogether—generally it is pretty good—but it could use some improvement.

Al Hagoe, as half-a-millionaire Horace Vandergelder and Dolly's target as husband, does not seem to quite capture the personality of the man. He is too blustering and rough and his turn-about in the end is unconvincing. His singing is far below the level of other performers.

The scenery, as is usual in Summer Theater productions, was strikingly good, and the costumes here were above the level usually seen, although Dolly's could have used some improvement.

Admittedly, the production isn't perfect, but is very entertaining and professionally done. And it is 100 per cent better than any other production this summer.

Grad to display art in St. Louis

A one-woman show of the works of Cheryl Christenson, 1972 SIU graduate, will be presented through Aug. 17 at Harmon Gallery, 800 Market St., St. Louis, Mo.

The show will include 38 drawings and eight watercolors.
A fire hydrant testing program is scheduled to begin in Northeast Carbondale Tuesday, Charles McCaughan, fire chief, announced Monday morning.

He said about 430 hydrants in the city will be flushed and tested for water pressure and rate of water flow during the next two or three months.

"The program will provide a record on every hydrant in the city," he said. "and will allow the city to repair or replace hydrants as necessary." He said that following the inspection and testing, the hydrants will be painted according to the national code to indicate the ability of a particular hydrant to deliver a specified rate of water.

A red top indicates the hydrant will deliver from zero to 500 flow gallons of water per minute, he said. An orange top indicates 500 to 1,000 flow gallons per minute and a green one indicates more than 1,000 flow gallons per minute.

City Manager Carroll J. Fry said the program will also point out which hydrants are inadequate so the water department can be made aware of necessary repairs and improvements.

"We will keep records for both the fire department and the water department to develop and improve our own water supply system in the city," he said.

The best fire department in the world could not adequately fight fires without "availability of water," he stressed.

"We don't have any big lines to obtain great quantities of water to fight fire in Carbondale, so the program will also help in the development of transmission lines to improve the city's water supply system.

McCaughan said the fire department will make recommendations concerning the location of new hydrants and also permit firemen a chance to become familiar with the present location of hydrants in the city for more 'effective and efficient' firefighting.

"We will use two firemen and one captain each day," he said, "and they will use radios so that they can leave from the hydrants and go directly to a fire if necessary."

He said the program will start Tuesday in the Northeast section of Carbondale and "residents living east of the Illinois Central Railroad and north of East Main Street can expect to have problems of muddy or rusty water during the testing."

"Ordinarily, the water pressure in the Northeast is weak," he said, "and after we finish, which may take two weeks, we'll go into the Southeast, then the Northeast and finally the Southwest areas of Carbondale."

He said that flushing will be limited between the hours of 9 a.m. and 4 p.m. Tuesday through Friday until all hydrants have been tested.

Fry said washing of clothes should not be undertaken in the sections of town being tested during testing hours to avoid getting rust stains on clothes.

He said announcements will be made each Monday to inform the public which section of the city will be tested that week.

This means that washing of clothes should be limited to Saturday, Sunday and Monday or before 10 a.m. and after 6 p.m. on the other work days in the area being tested.

Robert E. Davis, chairman of the SIU department, said he was pleased that the department had been included in these groups of schools. "That's fast company photographically," he said.

Curriculum in these schools range from professional technical emphasis to fine art. "This really says something about the strength and range of our department," Davis said.

We try to provide a strong base in the fundamentals of photographic communication. Then the student is allowed to arrange his own field of specialization," Davis said.

"No school can turn out a finished photographer at the end of its program," he said. "We can only give the student the basic skills and let him apply his knowledge to the situation.

The department was unaware of the award until two days before the presentation when Davis was called by Getty to accept the citation.

"It makes us feel great because this is the kind of department for which we have been working," Davis said.

Van of learning

ELGIN, III. (AP) - The Elgin-YWCA Action Van, a self-contained camper trailer, has lived up to its name during the year it has been in operation. Mrs. Vernon Patton, YWCA urban affairs director, said the van has been used for activities ranging from children's cooking classes to a standing-room-only meeting of parents and school faculty.

On Thursdays the van is open for women to sew, knit or type.

Rusty water expected during tests

Fire hydrant testing program scheduled

The Department of Cinema and Photography at SIU has been cited as one of seven departments in the United States and Canada for its contribution to photographic education by the Professional Photographers of America.

The presentation honored the department for "its outstanding contribution through consistent high educational standards and excellence in photographic curriculum development.

Other schools cited included Rochester Institute of Technology, Rochester, New York; the Art Center College of Design in Los Angeles; Brooks Institute, Santa Barbara, Calif.; Ohio University, Athens; Ohio Northern Alberta Institute of Technology, in Canada; and the Layton School of Art and Design in Milwaukee.

Robert E. Davis, chairman of the SIU department, said he was pleased that the department had been included in these groups of schools. "That's fast company photographically," he said.

Daily Egyptian, August 8, 1972, Page 9
Under the old rule, which will be in effect until Oct. 1, a student may borrow up to $1,000 during his freshman year and up to $3,500 per year for his remaining years at SIU. A student is not required to repay the loan by the student in graduate school. The total of all loans should not exceed $7,500.

Under the new rule, which will go into effect after Oct. 1, a student may borrow up to $1,000 during his freshman year and up to $2,500 in his sophomore year, up to $2,500 per year in his junior and senior years, and up to $2,500 per year in his graduate years. The total of all loans should not exceed $10,000.

A student has the option of repaying the loan either over a five- or ten-year period.

According to Dutz, the passing of the Education Amendment Bill changed the Illinois Guaranteed Loan Program from a non-need program into a need-based program based on the ACT family financial analysis.

The new loan application supplement, required to all loan applicants, stipulates the criteria under which the amount of loan will be determined and the criteria under which the amount of loan will be increased.

-Cost of education. This is a major criterion, and it includes tuition, fees, room and board and student-organized books, transportation, clothing and personal expenses. To accurately estimate costs, according to Dutz, apply to only two groups of students a) those students living at home and commuting back and forth to school, and b) independent students who require transportation to and from school.

-Demonstrated family condition. This is computed directly from the ACT family financial analysis form.

-The AAIC defines a family as that group of students who can contribute to the loan repayment and this group will be figured in according to the student's classification. Although the student may not get any money from his family, information provided through recommendations by the educational institution, therefore, is determined by subordinate factors such as financial aid and other resources plus the expected family contribution from the cost of education.

To help attract new enthusiasts, the Army is offering to anyone who signs up a $500 investment in the program. The Army will pay this amount to be repaid in weekly installments over a period of five years.

WASHINGTON (AP)—The Army Mountain Warfare School has nearly doubled the size of the Women's Alpine Division, the school said. The WAC's almost all type job except combat with recruit them in paratroops. It's a part of plan to use more women in the military and to ease the Army's problems in achieving an all-volunteer Army by 1978.

"By bringing in more women, the Army will be able to reduce the number of men required in noncombat jobs," explained the WAC director, Brig. Gen. Mildred C. Bailey.

The opening of new job opportunities at the school is part of an agreement between the Defense Department of "more women make it easier to fill the armed services." While many women were interested in the WAC's, most of WAC's almost all type job except combat with recruit them in paratroops. It's a part of plan to use more women in the military and to ease the Army's problems in achieving an all-volunteer Army by 1978.

"By bringing in more women, the Army will be able to reduce the number of men required in noncombat jobs," explained the WAC director, Brig. Gen. Mildred C. Bailey.

Towers sizes up season

Ivory trades track shoes for helmet

By Eliot Tompkin
Daily Egyptian Sports Writer

Dick Towers has 34 lettermen returning to the Saluki football team this year, but all eyes will be looking toward a new leader.

In addition to returning lettermen, football fans will recognize a familiar face on the Saluki roster. Larry Crockett has undergone a serious knee operation last year. "He's his green that great speed and he's conscientious. He has a real good chance of making it at one of the flanker spots."

"The question is, Do we have a reliable quarterback?"

Larry Perkins, a junior from Memphis, Tenn., has the starting job. All he lacks is playing experience. Last year, Perkins played second fiddle to Brad Pancost, the record setting Saluki quarterback.

Pancost completed 48.9 percent of his passes for 1,289 yards, a Southern Illinois record.

Perkins last year completed only eight of 28 passes for a poor 28.6 completion percentage. He had two passes intercepted. Only one of Perkins' passes was good for a touchdow.

But that was last year. This year, Towers says, "We definitely have a top caliber quarterback in Perkins. He has shown his ability and the quarter­back we've had since I've been at Southern Illinois.

"Perkins is fast and strong," Towers continued. "He can throw the ball 76 yards in the air."

There is little question that Perkins is going to have problems early in the season. "Larry is the type of guy who can use his abilities to overcome any problems caused by inexperience," Towers said.

"Perkins is better equipped physically than Pancost," Towers said. "If Larry misses a hand off or blows a play, he can make up for it by running with the ball. Pancost couldn't do that," Towers said. "Of course, Pancost's speed was two years ahead of Larry's."

If Perkins should get hurt, the Salukis are in big trouble. Back-up men are Jim Sullivan and Terry Klein.

Sullivan is a long way from being a top­flight quarterback, according to Towers. He is a strong runner, but that's about the extent of his abilities.

"Klein, only a sophomore, is a good future prospect," Towers said. "Right now his arm is weak and he lacks speed." Being only 5-9 is going to hurt Klein's chances.

And then there's Billy Richmond. Richmond, a 5-10, 175 pound junior, would undoubtedly be the starting quarter­back for the Salukis had he not undergone a serious knee operation last year. "There is no doubt that if he was well, Billy would be our man," Towers said.

Defensively the Salukis look strong. "This is the best spring showing defen­sively since I've been here," Towers said.

A new system, a monster-type 5-3 defense, has been set-up by Towers and his staff.

Last year the Salukis found it necessary to change their defensive style to fit their opponents. It didn't work.

If a defensive weakness has to be noted, it would have to be the monster position. Towers optimistically says, "It's only a matter of time before we solve that problem."

The offensive line could turn into a real trouble spot for Towers. There is no question that the loss of Lionel Ant­onine is going to hurt. "We have no one near with the talent Antonine had," Towers said.

Craig Rowells' graduation has left a vacancy at center. His replacement will most likely be Bill Jackson, a 6-3, 215 pound junior from St. Louis.

Naie Stahlke and Mark Otis have the inside tracks on the tackle jobs. Stahlke has good size (235 pounds) but lacks quickness. Otis has a problem. He only weighs 205 pounds. He is full of talent though. Towers said.

Paul Dumas and Bob Krol could be the starters at the offensive guard spots. Dumas is capable of playing both guard and tackle. He stands 6-1, and weighs 240.

Krol, a senior has loads of expe­rience, but he lacks size. He only weighs 230 pounds.

Tight end is a Salaki strong spot. Jerry Hardaway returns from last year. He played in the shadow of An­tone. Along with Hardaway are Habbe, if he doesn't go to monster. and Mike Kaczmarek.

Kaczmarek is the fastest lineman we have both offensively and defen­sively," Towers said. "We have to find a spot for him." His speed would be a tremendous asset at the tight end spot. Towers said.

Kromarek, but Towers, according to Towers.

The monster man has to be strong enough to force a run, and he has to be quick enough to play back to cover the pass.

If Nails can't cut the mustard, Her­schen Lane, a senior, is another possibility. A 6-1, 215 pounder he can keep an eye on is sophomore Bob Habbe.

Habbe performed last year as a tight end for the freshman team. He catches the ball well and has good speed, according to Towers. At 6-2, 215 pounds he might be the monster man Towers is looking for.

Bill Story and Craig Schaeute have both been moved off offense to defense to help in the effort to add a little size to the line.

"We had to move Story and Schaeute to fill gaps caused by Billy Richmond. They're big men, and they should help us," Towers said.

Story, a senior from Memphis, carries 253 pounds on his 6 foot, 3 inch frame. Schaeute is a 6-4, 265 pound sophomore from Staunton, III.

The linebacker spot appears to be strong. Bob Thomure, Brian Newsom, and Mike O'Boyle and Nails all have the needed experience.

But Chambers, a 216 pound senior, may also see some action at the linebacker spot. "Chambers is bound to be one of the keys of our defense regard­less of where he plays," Towers said.

The defensive secondary should be stronger than last year. Russ Hailey, two-time letter winner has the safety spot nailed down.

Jim Powell is expected to be a top­notch defensive half­back for the Salukis. Towers said.

The defensive end position will be handled by Gordon Richy, last year's top start­er. Ken McNally, another strong physically or psychologically."

Towers said.

The football should be in good hands when the Saluki backfield has hold of it. George Loukas and Thomas Thompson, both return from last year's squad.

Loukas led the team in rushing with 1852 net yards for a 4.3 yards per carry average. He scored 11 touchdowns (t) to lead the team.

Thompson covered 461 yards in 129 attempts for a 3.0 yards per carry average. He scored seven TD's.

Complimenting Loukas and Thomp­son are Rich Kasser, Pat Fors and Gary Powell.

Phil Jett and Dean Schmeller should add lots of speed at flanker and end. Add Crockett and you have a pretty strong attack.

Southern Illinois may have the best punter in the midwest—at least Towers thinks so. "Russ Hailey has averaged 46-30 yards a punt. We antici­pate a 40 yard punt season plus from Russ," Towers said.

There is going to be a good fight for the field goal and extra point kicking job. Gregg Goodman is healthy again, and Mike Stoner, his mid­season replacement last year, also returns. Stoner also boots the punt well, according to Towers.

The Salukis look good on paper, but now about under game conditions. That's a question that we can answer in one month when the Salukis open on the road Sept. 16, against a tough East Carolina squad.

Canoe races

The Office of Recreation and Intramurals is still accepting applications for the intramural canoe races to be run at 6 p.m. Wednesday, at the Lake­front, Sept. 16. Any questions should be directed to the intramural office Room 128, SIU Arena, or phone 452­2719.

Slippery road

Who says only little kids play in the mud? This was the scene Sunday afternoon at Green­berry Raceway, six miles east of Carbondale. Gary Brooks, of Carbondale was the big win­ner in the day's Muto Cross races sponsored by Cyclops, Inc., a Carbondale based cycle club.
