Guyon receives OK for tuition hikes

By Christine Leninger
Administration Writer

The SIUC Budget Advisory Committee has recommended increasing tuition for the spring semester. This recommendation includes a 3 percent increase in tuition for the third year. These increases are in response to the Board of Trustees recommendation that tuition increases should be consistent with the University’s fiscal budget crisis.

Gus Bode

Gus says I wonder if this tuition increase and reallocation will force student decreases and reallocation.

Groups defy marching ban, rally thru downtown Moscow

MOSCOW (UPI) — Tens of thousands of communists defied a ban on marching through Moscow and paraded downtown to the Kremlin walls amid a sea of red Soviet flags Sunday, while across town at the Russian White House, democratic forces waving Russian flags rallied behind the reforms of President Boris Yeltsin.

Communists carried t-shirts saying, "Down with Yeltsin," and called for a return to Soviet power. Democrats, rallying a mile away at the Russian government building, chanted "Yeltsin Yeltsin" and "Freedom.

The real forces might converge and clash never materialized. Although police made no attempt to prevent the communist march from Gorky Park to Manezh Square near the Kremlin, police blocked roads leading to the Russian White House to keep the communists from veering off to the Russian government building where democrats rallied.

As communists gathered on Manezh Square, an army of police formed blockades using buses, trucks and cords of officers to keep the communists from marching onto nearby Red Square and the Kremlin.

SIUC officials: Campus parking abundant, no basis for complaints

SIUC has sold 12,742 red and 1,419 blue stickers to faculty. There are 5,047 red parking spaces and 1,866 blue spaces available, but not all spaces are filled at the same time.

By Brian Gross
Special Assignment Writer

SIUC student Andrea Williams does not know the difficulty in finding a parking space close to her classes.

She refuses to play the game anymore. Williams, a senior in electrical engineering from Milan, said she played the game of hunting and stalking parking spaces for two years, but this year she decided not even to buy a red parking sticker.

"I just got a yellow sticker and always park at the Arena," Williams said.

SIU has issued 12,742 red and red overnight stickers through Feb. 5 for the 1991-92 school year.

The total is less than the 13,180 sold in 1990-91, but the parking division continues to sell stickers until June.

Although more than 12,000 vehicles have red stickers, the campus only has 5,047 red spaces available.

Merilyn Hogan, parking division director, said the University can issue more stickers than spaces because not all 12,000 vehicles are on campus at once.

"If we've sold too many, why do we still have empty spaces with an eight-minute walk?" Hogan said.

Herbert Donow, parking advisory committee chairman, said the problem is not a lack of spaces but the willingness of students to walk for nine minutes.

"Parking doesn't seem to be any worse," said Donow, professor of English. "It's an attitude problem. Everybody wants to park as close as they can. In Chicago if you have to pay $50 a month to park in a garage, you may be willing to..."
Saluki cagers break spells on road

Men put stop to skid; regain tie for first slot
By Tony Mancuso
Sports Editor

The Saluki men's basketball team is back where it was expected to be: on top of the Missouri Valley Conference.

VIC, the preseason favorite to walk away with the Valley crown, had lost three straight games and dropped to third place. In those games the Dawgs had been held to an anemic 55 points a game—almost 25 less than their average through the first 16 games.

But Coach Rich Herrin's club got the win at the expense of the last-place Bradley Braves Saturday with a 60-54 win. The Salukis, 15-5, climbed back into a tie for first place in the MVC with 10-5 records. St. Louis remained at 16-6 overall.

The Dawgs jumped out to a quick lead in the game and, despite a late run by the Braves, never headed back. In the first half the Dawgs had piled up a 29-6 advantage with several fast break opportunities and a balanced scoring attack.

Herrin attributed the early success with the running game to a strong defense.

"We had a tremendous first half," he said. "We were getting strong rebounds on our own glass and some great transition buckets."

Herrin said sophomore center Marcelo da Silva, who led all scorers with 16 points, keyed the break. Da Silva, who pulled down a game-high 13 boards, made quick outlet passes to set the Saluki team in motion.

"Da Silva did a great job on the boards," he said. "He was very tough on the offensive end."

Herrin said the Saluki scoring improved because da Silva and junior forward Ashraf Amaya

Spring Rec show draws outdoor lovers to Arena
By Todd Welvaert
Special Assignment Writer

The large-mouth bass slips into the slow current from behind the safety of a submerged branch.

A blue-tailed side-to-side glide brings the 11-inch fish into position on the gray-rocky bottom. Its dull, black eyes regard all the activity on the surface. Off in the distance a goose calls out contentedly, attempting to lure fellow geese down from the glassy blue air.

A plastic, neon-yellow jig twitches across the water's surface, and the bass reacts. A blast of its tail sends the fish upward, leaving small bubbles as it swings in its wake.

The fish inhales the lure and attempts to dive back to the bottom. Invisible line zips through the water and momentarily stops the fish's progress, but the fish angrily spits out the lure and returns to the bottom.

All of this would seem quite natural if the setting were a lake or pond, but it happened in the middle of the SWC Arena.

The bass is in a 2,000 gallon tank, surrounded by the latest in campers and boats, and the goose call was provided by Joe Jaroski.

Jaroski was one of 45 exhibitors at the 1992 Sports and Rec Show, demonstrating his hand-carved goose and duck calls for anyone browsing in the Arena.

"It's great exposure," said Jaroski, who is from Du Quoin. "This is our first year and the show has been good. We have not sold much but the exposure is priceless. I figure we will get some people coming back. We should have enough before."

The show, which was sponsored by Bushweiser and WSIL TV-3, attracted about 9,000 people, said Russ Driver, assistant arena director.

The show offered seminars on fishing, hunting and retriever training from the Southern Illinois Hunting and Retriever Club.

The fishing simulator was provided by the American Fishing Institute from the University of Indiana. The 2,000 gallon tank consisted of a variety of lake fish species and provided anglers a close-up view on how fish react to different lures and lure motions.

"It's real interesting you don't get to see how the fish usually react," said Margret Howell, from Marion.

"It kind of gives you an insight into what the fish hit."

The show offered area outdoor retailers a chance to attract more customers and show their merchandise.

"The show went pretty well. We have been here every year since the show began," said Wildlife Refuge owner, Mickey Stewart. "We have quite a few people coming in and out of the store. Anytime you can get exposure for business it's great and if you can draw people in from the region it's good for everybody's business."

"The people that come into town might stop and each lunch or dinner or even breakfast. Anytime you get people into town it's great."

The campers and boats on the Arena floor gave potential buyers a chance to see how easy "roughing it" could be.

"It think it's a pretty good program," said Dave Fritz, a junior in exercise physiology from Amboy. "This is the second year I have been to the show. It offers a lot of variety, plus it gives a lot of people a chance to see the stuff."

"I might buy something small, but for the most part I'm just dreaming."

Austrians score big at Olympics

ALBERTVILLE, France (UPI) — Patrick Ortlieb signaled the start of a new skiing generation Sunday when he won the men's combined with countryman Ernst Vetter to make the first full day at the Winter Olympics a memorable moment for Austria.

The United States, however, was shut out in the race for the first 12 medals awarded at the Games and survived further embarrassment Sunday night by fighting off an upset bid by Italy in its opening hockey game.

The Americans, with a four-goal surge in the last period, beat Italy 6-3. Tim Sweeney led the rally with a hat trick, and Martin St. John added the late insurance goal.

Clark Donatelli of Canmore, Alberta, scored for the first time in a Winter Olympics, giving Austria its first medal since 1988.

Ortlieb emerged from the shadows of his more experienced colleagues to win the glamorous downhill race and Vetter soared past teammate Martin Hellworth to win the 90-meter ski jump.

Their efforts propelled Austria to the top of the medal standings at the end of another mild and delightful day in the French Alps.

With the first four medal events of a total of 57 complete, Austria had quickly piled up five medals, two of them gold. During the entire 1988 Games in Calgary, Alberta, the Austrians had won only three gold medals and 10 overall. No other nation could win more than two medals: Sunday.

Cornell: Men's track team flat at Indiana invitational
By James T. Rendall
Sports Writer

Despite competing against more than 600 athletes from more than 40 schools and placements, men's, women's, men's head track coach Bill Cornell said his squad was flat at the Indiana Invite on Saturday.

"There were a few bright spots at the meet but on the whole we seemed just flat," Cornell said.

"I'm glad this was not the conference championship."

One of the bright spots at the meet was a pending 5.5 seconds in the 55-meter hurdles. In addition to earning a state first place in the event, the time made him NCAA provisional qualifier.

Also earning a second place finish was the two-mile relay team of freshman Neil Pace, junior forward Angie Rongeau and senior Linda Legere.

Cornell lost by 10 points to Indiana in the meet.

"It was a good team effort on the track this week," Cornell said.
**Meningitis**

**Definition and Cause**
Meningitis is an inflammation of the membranes that surround the brain and spinal cord. Meningitis can be caused by viruses or bacteria.

- **Viral meningitis** (also called aseptic meningitis) is generally less severe than bacterial meningitis and usually does not require specific treatment. Viral meningitis is most frequently caused by a viral infection in the stomach and intestine (enterovirus). A small minority of cases are transmitted by insects such as mosquitoes or flies (arthropod-borne). These tend to be seasonal increases in viral meningitis cases in late summer and early autumn. There are an average, 550 cases of viral meningitis in Illinois annually, fewer than 1 percent are fatal. The highest attack rates are in children younger than one year.

- **Bacterial meningitis** is often quite severe and may result in permanent brain damage, such as hearing loss or, rarely, mental retardation. Bacterial meningitis can be spread through direct contact with an infected person or airborne droplets.

**Symptoms andSusceptibility**
Meningitis usually starts with sudden fever, headache and stiff neck. Other symptoms may include nausea, vomiting, attention to bright light, confusion and sleepiness. In newborns and small infants, the classic findings of fever, headache and neck stiffness may be absent or difficult to detect, and the infant may show only extreme irritability, irritability, poor feeding and sometimes vomiting. As the disease progresses, both infants and older patients may have seizures and decreased alertness progressing to coma. Meningitis can also produce very mild symptoms, such as a low-grade fever, malaise lasting 2 to 3 days and headache.

**Treatment**
Bacterial meningitis requires immediate medical attention by a physician and can be treated with a number of antibiotics. Appropriate antibiotic treatment of most common types of bacterial meningitis should reduce the fatality rate to less than 10 percent. The specific antibiotic regimen is based on the specific type of bacteria responsible for the infection and is selected based on the susceptibility patterns of the infecting strain. It is essential to begin treatment as early as possible.

**How It's Spread**
Meningitis is not highly contagious. Both viral and bacterial meningitis are transmitted from person to person through direct contact with nose or throat secretions. In addition, healthy people can have these bacteria in their throats and spread them to others. In addition, the virus that causes meningitis in infants can be spread to young children by close contacts who carry the bacteria in their throats and spread them to others. Army personnel can also transmit the disease by coughing or sneezing directly in the face of others, kissing a person on the mouth or sharing a glass or cup.

**Prevention**
Transmission of meningitis can be prevented by covering the nose and mouth when sneezing or coughing and eliminating secretions. Wash hands thoroughly following exposure to respiratory secretions or body fluids, such as handling of soiled bed linens, bandages and diapers. To avoid exposure, people should not share pinces, straws, cups, glasses or eating utensils. Eating and drinking utensils can be used by others after they have been washed.

**Vaccines**
Vaccines for HB and Neisseria meningitides are now available. Two vaccines for HB are licensed for use in infants beginning at 2 months of age. The American Academy of Pediatrics and the Advisory Committee on Immunizations Practices recommend vaccination of all infants beginning at 2 months of age. A third vaccine is only licensed for children 15 months of age or older. Neisseria meningitides can attack persons of any age, but is relatively uncommon in the United States. Therefore, meningococcal vaccine is recommended only for persons traveling to other countries where epidemics are in progress.
Eviction of Haitians
a sentence to hell

IN LATE 1991 THE UNITED STATES condemned the British government for its forced repatriation of Vietnamese boat people from Hong Kong. Now, despite international criticism, the United States has begun its own repatriation of almost 15,000 Haitian refugees from the U.S. naval base at Guantanamo Bay, Cuba.

HYPOCRISY? NOT IN LEGAL TERMS. The U.S. law on asylum for refugees gives favor to those who flee their country for political reasons. Haitians, according to a U.S. Supreme Court ruling, are economic expatriates, abandoning their poverty-stricken country in search of better opportunities in America. Thus, entry is denied in all but 200 cases.

This ruling overlooks a key event: the military coup that overthrew democratically elected President Jean Bertrand Aristide in September 1991. It was at that point that U.S. Coast Guard ships began plucking families of refugees from their makeshift boats on the Caribbean Sea.

HAITI HAS LONG BEEN THE MOST impoverished nation in the Western Hemisphere, yet a mass exodus to American shores such as this is unprecedented. Something more than poverty has driven these people into the sea.

"I have a feeling that in 1990 we will see 100,000 quests for asylum," said Duvalier in February 1990. Duvalier in September 1991 was executed. "It is an impossible situation that defines the Haitian people. It is a situation of terror. The Haitian is one of the few people on earth whose body has no value."

Teaching main goal,
not parking spaces

It happens every semester, without fail. Someone writes in to the Daily Egyptian, complaining about the so-called parking problem. The most recent is from Terri Bosovich. Well, Terri, allow me to point out some weak spots in your argument.

1) First you ask the question, "Is SIU for parking, or for making money off of parking tickets?" Yes, SIU is a place for students to learn. It is also an institution to conduct research, as well as a place to provide employment for professors, researchers, and administrative personnel. It is arrogant of you to assume that SIU revolves around students like yourself.

2) Then you make the observation that "at $8 a ticket, new lots could be built." I don’t know how much it costs to build a parking lot, but I think it is probably much more than $56,000 (7000 students multiplied by $8). The University is low on money. Why do you think programs are being cut, services being cut back, and no substantial raises being given to employees?

3) But let’s assume the money is available. Where do you propose to put these? It seems to me that while new lots could be built, they’re not going to be in any place where they’re not where the lots we have.

4) Then you (and this one I find particularly amusing) “With tuition increasing and financial aid decreasing, it’s becoming more difficult to get an education.” I will agree with you, I just bad $1000 of my aid rescinded. But I ask you, what does this have to do with the parking situation?

5) Finally you say that “parking for students should be a priority.” I believe that SIU is under no obligation to provide parking for you at all. You would do well to remember that driving and parking on campus is a privilege, not a right.

If you want a closer spot, then there is a very simple solution: arrive a few minutes earlier. I know from experience that good spots are available if you get on campus early enough.

Now, I realize that you or other people, for whatever reason, may not be able to get here any earlier. I sympathize with you. But you’re going to have to deal with that problem by yourself. SIU has enough of its own problems to deal with already.

I believe that Phil Swidersky, senior, aviation management.

Vietnam heroes got short shrift
compared to Gulf War troops

Recently, I realized something that seems to have been at the back of my mind. It’s been a little over a year since we were involved in a war and things are returning to normal as far as the hype is concerned. No more publicity, no more “support our troops” type of movements—life seems to be normal again.

Over a recent trip home to see my folks, I learned that my father had served two tours in Vietnam. I never knew that until now. At first I thought, "Hm, my dad’s a Vietnam vet." Then it hit me, he never showed signs of being at the war. There were no stories of what he did, the things he saw, or the times he had. It seemed that the pride in a war veteran was missing. I find that he isn’t alone. Many of my buddies are in the same boat too.

Then I think about all of the hype and glory that the troops from Desert Storm received. When I think about how long my dad served, I feel that he didn’t get half the glory that we gave our Desert Stormers.

Don’t take me wrong, I’m happy we did something for our troops. They were willing to put their lives on the line for the things we take for granted. And in a way, the message we gave pointed in the direction that something like Vietnam will never happen again. Now I’m thinking later in my life I’m finding that folks from Vietnam are still hiding their past.

One thing is evident, their pride is still tarnished. And to boot, some of their buddies are still there. It makes me want to cry for them. In fact, if it were me that were in my dad’s shoes, I’d probably say:—Alex Malinian, senior, finance.

D.E. assists in promoting ignorance

I am not writing this letter to debate the issue of homosexual morality, nor to argue the use of "statistics," Professor Helmer provided a letter to "the Daily Egyptian" which has been reading his letters in the DE for years. In fact, I, along with other students are finding Helmer’s letters to be incomprehensible.

His letters provide amazing simple examples of narrow, uninformed, and therefore biased, from a minority or vocal, hyper—righteous individuals. Because I believe Professor Helmer knows not what he says, I, through his morsel of contention, not him with the Daily Egyptian.

I am a firm believer in First Amendment rights and the freedom of speech. Professor Helmer has every right to put his ideas and attempt to share them with the Daily Egyptian.

The Daily Egyptian is not obligated to follow the style of the process. Newspapers have a responsibility to not contribute to the endangerment of any group within the American public. Had the content of Helmer’s letter been aimed at ethnic or racial minorities, I seriously doubt that the editor would have published it. The public outcry would be uncontrollable. Such beliefs about any group of people are unacceptable.

The Daily Egyptian has assisted in promoting ideas which I consider evil. I do not think Professor Helmer’s views are any less evil than those of Nazis or members of the Ku Klux Klan. In fact, his form of gay-bashing is more dangerous than many forms of hatred because he is against gay relations, but his thoughts do not cause harm. By printing the letter of Feb. 7, the Daily Egyptian has assisted Professor Helmer in spreading ideas obviously based on ignorance and fear.—Elisabeth Lehr, graduate student, history.
March, from Page 1

"With anti-Western rhetoric and waving pictures of Lenin and Stalin, Communists listed pictures of Yeltsin and addressed their supporters, 'Comrades.' Democrats called it a smear.

Communists cheered when a air balloon rose above the crowd uttering a large red hammer-and-sickle banner - powered from the Kremlin for the last time after Mikhail Gorbachev resigned as Soviet president Dec. 25 - then became solemn during the Soviet national anthem. Democrats observed a moment of silence for the men killed defending the White House from tanks and hard-line Augustus coup, but communists called for release of imprisoned students.

"Communists praised the 'Soviet people' who let them pursue a $24,000 business skating to Moscow government ban on marches.

Joining the communists at their anti-government rally were the emerging ultra-nationalist forces of the far right. Communists and nationalists injected another element into their political battle against Yeltsin - anti-Semitism. Signs said, Yeltsin is a Jew. Oligarchs chanted the slogan, 'Down with Yeltsin' signs were emblazoned with the Jewish star.

The anti-Semitic nationalist group Pamyat did a brisk business selling its newspaper to the mirror of left-wing and right-wing demonstrators.

Communist bemoaned the demise of the Soviet Union and threw its weight behind the Commonwealth of Independent States.

"USRR - Yes, CIS - No" said a placard. Communists called Gorbachev and Yeltsin traitors. Signs urged, "Gorbachev - no justice" and "Gorbachev and Yeltsin the chopping block." Another said, "Yeltsin doomed as much of the country in five months as Hitler did in five years."

A speaker from the Russian Communist Workers Party said, "We would like to help with the help of their friend (U.S. President George) Bush have domination over poverty."

Many demonstrators complained of high prices and the government's reaction halted against capitalism as a "cruel experiment on the people." A 63-year-old pensioner who gave his name, said, "I can't afford to pay a part of the pension. That's why people are acting like this, they think they're defending at the White House - higher prices."

A welfare briefly darted from the crowd, "Tell your readers the people are acting like this, they support socialism, and we're planning an armed uprising. We have no weapons. We've set Yeltsin Red. The.strategy can't be done by peaceful acts."

I believe that only dictionary can save us," said another communist. "Our country isn't ready for democracy."

But the pro-demonstrators rally, organized by defenders of the government building during September coup, said, "We defended the White House. We will defend Russia."

A spirit of August is still here," Russian parliament deputy Georgio Zordon told the crowd.

How to Enrich Your Education $1,100 a Month

If you're a middle-aged professional, you can be earning $1,100 a month during your junior and senior years.

This excellent opportunity is part of the Navy Nuclear Propulsion Officer Candidate Program. This excellent way of earning the nuclear field. It's rewarding, too. And it's a $2,000 month when you complete your nuclear training. You also receive a year of paid graduate level training that's the most comprehensive in the world. And you'll acquire a high level of nuclear reactor and propulsion plant technology.

This is the professional to the professional advantages, navy trained officers get an unbeatable benefits package, travel opportunities, promotions and a solid salary.

Call the Navy Nuclear Propulsion Officer Candidate Program, and make your education start paying off today.

Call Navy Management Programs 1-800-322-6289, Ask for Lt. Chas Rampenthal

Navy Officer You and the Navy, Full Speed Ahead.
Radkte appointed to research review committee

By Jeremy Finley
General Assignment Writer

Robert Radkte has his finger on the pulse of all research conducted in Carbondale.

Radkte has been appointed member of the Carbondale Committee on Research involving human subjects.

"The committee is charged with the responsibility of reviewing and approving all research conducted by anyone who has any affiliation with the university that involves human subjects," Radkte said.

"Whether we're reviewing records of past activities, or we're looking at psychology experiments or research involving children, all research must be reviewed by the committee," he said.

Crime, education not related says UNM sociologist

CHICAGO (UPI) — Better education and opportunities have had the opposite effect on black crime rates versus whites, according to sociologists studying violent crime in America. They predict an explosive future if changes aren't made, beginning with the children.

Gary Laffee, a professor at the University of New Mexico, Sunday released his findings at a news conference at the annual meeting of the American Association for the Advancement of Science.

Laffee used data from 1958-1988 to examine the effects of economic well-being, educational attainment and family stability on rates of robbery, burglary and homicide for blacks and whites.

"The results show that measures have different — usually opposite — effects on black and white crime during the period," he said.

"If you look at the Free Society and look at New Freedom of the Kennedy Administration, there was this idea that if you get better education attainment, that will lead to a better place in society and therefore, you will reduce the crime rate," Laffee said.

The committee consists of 15 individuals, ranging from SIUC faculty to members of the Carbondale community.

Radkte and fellow members review hundreds of research activities in Carbondale.

"It is mandated by the federal government that we have the committee like this, and the government has established some rigorous guidelines for the research," Radkte said.

"Before researchers can gather any data or before they can make any contact with potential subjects, they must submit a protocol of their experiment procedures to the committee," he said. "The committee then reviews the procedures, either approving it or suggesting changes. The researchers then respond back to us, but many times the procedures are very routine and get approved very quickly," Radkte said.

"There are no real checkups on the procedures. If we rely on the integrity of the researchers," he said, "we believe that the researchers are students or graduate students. Occasionally we hear of procedures that are not following protocol, and then we proceed to get a hold of those people and make changes."

"This committee has three major concerns, Radkte said.

The overall concern is the committee controls much of the data. The first major concern is that people participating in the research give all the information. The second concern is minimizing any risk, physical or psychological, to the individuals who are participating."

The third concern is the confidentiality of the participants, he said.

"We just hope to safeguard all the participants as many ways as we can," Radkte said.

Radkte said the committee also does not want to impede the research process.

"We do not want to hold up people from doing legitimate research," Radkte said.

Denis Mofles, a professor of psychology, recently retired his position, leaving the committee with an opening at the Behavioral and Social Sciences department at SIUC.

"It was difficult to leave those people I have worked with for so long," Mofles said.

Mofles was a member of the committee for 17 years.

President John C. Caygill, along with the members of the committee, appointed Radkte to take the open position.

Radkte was an active researcher himself before he became a member of the committee.

I have been on both sides of the research fields, and I have an interest in keeping the process that has been going on," Radkte said.

Belly Dance

Try something different this Spring! Middle Eastern Dance is a fun and effective form of exercise. Learn all about the music, exercises, and movements involved in belly dancing.

Registration and fee pre-payment are required at the SRC Information Desk by February 21.

Golf

Register at the SRC Information Desk by February 14 for 8 basic lessons.

Yoga

Registration and fee pre-payment are required at the SRC Information Desk by February 18.

Don't let the semester "stress you out"— learn yoga! Learn breathing techniques for relaxation and efficiency, along with relaxation, meditation, and stretching exercises.
Doctors develop new way to detect growth problems

By University News Service

Doctors can get a leg up on diagnosing growth problems in children by measuring the height of the children’s knees.

"Using standard height measurements don’t give you an accurate growth rate in a period of less than six months," said Christine E. Cronk of SIUC’s anthropology department. "Using knee height, you can get an accurate rate in one-third of the time."

Cronk and colleague Virginia A. Stallings, a doctor at Children’s Hospital of Philadelphia, detailed their methods of pinpointing growth Saturday during the American Association for the Advancement of Science’s annual meeting in Chicago.

When kids grow too little or too much, it could mean they have kidney problems. Cribb’s disease or cystic fibrosis. Cribb’s disease is a bleeding ulcer on the lower intestinal tract.

Based on growth measurements help doctors spot those diseases early and get a fix on how well their treatments work.

Cronk and Stallings developed their findings by measuring knee height—the distance from the floor to the top of the knee cap—in 164 Illinois and Pennslyvania grade schoolers. To help them track growth patterns, the researchers created a measuring device so precise it could detect changes of half a millimeter, roughly the thickness of three sheets of paper.

Area Kiwanis help health department with computer aid
By Trumier Camphor

The Carbondale Early Bird Kiwanis Club and the Murphysboro Kiwanis Club are pitching in to help the Jackson County Health Department with immunizations.

The Kiwanis clubs of Carbondale and Murphysboro are raising $1,000 by displaying and laptop computers for the Jackson County Health Department to keep immunizations records.

All of the health department's immunization records are kept on film cards.

Virginia Scott, director of the JCHD said the health department does not have to do 10,000 immunization records this year and the computerized files should enable them much more.

"Besides being able to do work in a number of other clinics, we will also be able to use the computers to notify parents when newborns need immunizations," Scott said.

Scott said people wanting to be immunized can get a form from the JCHD and bring it into the office.

The JCHD will not do immunizations outside of the office because it does not have the proper immunized supplies.

Evelyn Kidd, co-chairwoman of the Carbondale-Murphysboro Kiwanis major emphasis program said the other alternative is to go to a private physician who will charge for the shot and the vaccine. The health department only charges for the vaccine.

"Most physicians recommend you go to the health department," she said.

"The Kiwanis International program helps us a lot because the needs of children from prenatals to age five," said Kidd. "We survey the community and find worthwhile causes to do home emphasis projects." Kidd said the idea came about after the Kiwanis Cub approached the health department.

"We approached the health department because of the increased spread of communicable disease and then we found out about the Kidd Cub," she said.

Scott said measles cases have spread in Chicago and near St. Louis so the JCHD has been giving measles boosters.

"The outbreaks have not affected Southern Illinois we are just taking precautionary measures," Kidd said. "The computers will improve our shot record keeping system."

For further information about the major emphasis project write to Kiwanis International Major Emphasis Project, P.O. Box 208, Carbondale, Ill. 62901.

Psychologist: diet 'cultural induced fraud, 'masochism'

CHICAGO (UPI) — Diets don't work. Cookies do, "TRIM your appetizers: elevated to an art form," said Dr. Sarah Mailman, a Los Angeles-based psychologist. "It's a cultural induced fraud that we have to like that people look.

She specializes in positive self image at the Mailman Nutrition System where eating by psychology improves the societ and ensures her patient face to feel deep, perfect. She has little to do with for she should include erging a diet plan depending on her needs. She makes a diet that some would deep within the psyche. Ninety percent of diets which are self-imposed, self-initiated, fail because outside influences are not considered.

Condon week to boost safe sex kit sales
By Trumier Camphor

Condom kits are becoming the latest craze in promoting safe sex and with National Condom Week running February 14 to 21, condom companies also have started promoting mail order sales.

Cliff Farhase, spokesman for Pro-safe, a new condom kit marketed through mail order sales, said because a big sports figure has come forward everyone is interested in safe sex.

"People have not stopped having sex, they have just started buying condoms," Farhase said.

Farhase is the company's Dimension, Inc. of Arlington, Va., subsidiary.

The U.S. Centers for Disease Control reports that 88 percent of all deaths from causes of death are untraceable by the medical profession. Nonetheless, the United States is raising upon the fallacy that heroic doctors, high-tech therapy and heroic surgery can solve all of its health problems.

In reality, the job of the medical profession is to care illness, not improve everyone's health and wellness — remains a responsibility which every individual must assume.

U.S. citizens may become increasingly interested in self-care and self-medication including all kinds of things individuals do to themselves to enhance their health.

Health care important part of leading healthy lifestyle
By David Bargere

To Your Health

It has been said that "an ounce of prevention is worth a pound of cure." Although this statement is seemingly archaic and trite, the adage nevertheless holds much truth and relevance for a United States challenged today by serious problems with its health care system.

In the early 1990s, the primary causes of death in the United States were infectious diseases such as pneumonia and tuberculosis. With advances in medical technology, however, the major causes of death have shifted to those related directly to lifestyle choices such as heart disease and accidents.

The U.S. Centers for Disease Control and Prevention reports that 88 percent of all deaths from causes of death are untraceable by the medical profession. Nonetheless, the United States is raising upon the fallacy that heroic doctors, high-tech therapy and heroic surgery can solve all of its health problems.

In reality, the job of the medical profession is to care illness, not improve everyone's health and wellness — remains a responsibility which every individual must assume.

U.S. citizens may become increasingly interested in self-care and self-medication including all kinds of things individuals do to themselves to enhance their health.

Metallica's career has taken heavy metal to new heights with the release of its fifth album, "Jury's Verdict," released in September 1988. The band's first album, "Kill Em All," was a departure from the glam-metal glitz of the time and has been hailed as the beginning of thrash metal. Metallica continued to redefine "trash metal" with its albums "Ride The Lightning" and "Master of Puppets," released in 1984 and 1986 respectively, elevating the genre with complex song structures and socially conscious lyrics.

During a headlining European tour, bassist Cliff Burton was killed when a tour bus skidded off an icy Swedish road. Jason Newsted, formerly of Flotsam & Jetsam, replaced Burton to record the 1987 cover-song collection, "Garage Days Re-Revisited."

"...And Justice For All," was released in September 1988 to critical acclaim. Metallica began a world tour, which included 120 shows in the United States. The band received its first Grammy last year for its version of Queen's "Stone Cold Crazy." Tickets are $19.50 and are available at the SIU Arena, the Student Center, Disc Jockey Records and Country Fair.

**By William Ragan**

**Entertainment Writer**

Metallica, a heavy metal band that has sold millions of albums and attracted a devoted following without compromising its musical vision, will perform March 4 at the SIUC Arena.

The band's stage setup is based on the shape of an Indian arrowhead. The stage features a moving drum platform and multiple microphones that allow the band to move freely and the audience to see the show from anywhere.

Tickets went on sale Saturday morning, and wheelchair tickets will be sold this morning at 9 a.m. at the SIU Arena Special Events Ticket Office. Special tickets are available to anyone who wants to record the show on tape.

**County officials test new devices for home inmates**

GENEVA, (UPI) — Gary Johnson got the answer to his biggest question. Michael Colwell reconsidered walking out his front door.

They were adjusting to the idea of being prisoners in their own homes. Johnson, as state's attorney, and Colwell, as chief judge, knew what it was like to put people in jail. On Thursday, they with other county officials, began testing an increasingly popular way to deal with jail overcrowding — electronic home monitoring devices.

"It's the size of a credit card, the depth of an inch and a wire is around it," Johnson said of the device around his ankle. A coated wire that worn completely aroused a signal that would tell if he broke his home confinement.
Legislator doubts Pentagon on Persian Gulf war report

WASHINGTON (UPI_STATES) — Wisconsin Rep. Les Aspin has warned House colleagues to be skeptical of the accuracy of an upcoming Pentagon assessment of last year’s war in the Persian Gulf.

"Press and other accounts suggest that the report will not be a rigorous, chips-fall-where-they-may-analysis," Aspin said in remarks prepared for the Congressional Record.

"Rather, these accounts suggest that the Pentagon assessment will be a document negotiated among the services so that no one comes off looking much worse than the others. Aspin noted that the war records of the Army, Navy and Air Force last year will help Congress decide how much to spend on various competing weapons systems in the future.

"There will be much that can be drawn from it," Aspin, chairman of the House Armed Services Committee, said of the upcoming Pentagon report.

"But I ask that you read it with some skepticism," he said.

Game conference attracts players from many states

Two members of a five-man expedition died from sword wounds in the Student Center Saturday night. The third one lost in a black nothingness.

"We were playing a game. "There was a lot of death and destruction," said Sherry Motley, a Carbondale Community High School senior and witness to the scene. "It was pretty funny." This was a scene from one of the more than 100 games played in the Egyptian Campaign 92 "TAG" run Friday to Sunday night.

Sponsored by the SUIC Strategic Game Society, the Egyptian Campaign is an annual gaming event that draws crowds of 300 people from not only Southern Illinois but also the surrounding states.

The Strategic Game Society is dedicated to strategic and role playing games. It meets every weekend for gaming. Members pay a $2 fee for use of the society's facilities.

The convention featured many different modes of gaming. Books, role playing modules, jerseys and costumes were just a few of the things being sold.

Joel Nadler, president of the society, said the primary games played at the convention are the role playing games. "Advanced Dungeons and Dragons" is the most played.

Nadler said, "All the characters for the games were pre-made. Someone who knows nothing about the game should sit down and play." he said.

Deric Elkins, sophomore in computer science at SIUE, hesitates before moving his Space Marines to counter an attack by the Genestealers. Elkins was playing Warhammer 40,000 at the Egyptian Campaign 92 convention.

The campaign was divided into seven "TAGE" during three days in which 20 different games were played. Each game was given four-hour blocks of playing.

Players could come in and sign up for the time and game of their choice, including "Champions," "Chill" and "Huntens Planet."

Moler, who took part in a "H-110e Planet" game, said this is her second year attending the convention.

"This year has been a lot better than last year," Moler said. "It's been a little bit smoother and there were more dealers. The game selection was bigger. What I've played so far I've liked."

DAWGS, from Page 16

crashed the offensive boards and
gave the Dawgs some second chances. In the 66-47 loss to
Indiana State Thursday, SIUC had seven offensive rebounds all night
Sunday, the two big men nabbed five each.
The Dawgs also played better in
the half-court offense throughout
the game, Herrin said.
"We did a much better job...making cuts and slashes," he said. "We were able to create
shots against the Bradley defense."  
The Braves collapsed their defense around Amaya, who scored 11 points. The tactic left the rest of the Salukis with open shots--shades that had not been falling in the past two weeks.
The SIUC cagers hit 40 percent from the field, led by a five-of-seven performance by senior forward Kelvin Lawrence.

WOMEN, from Page 16

pulled through for the Salukis
sinking the first and last bucket.
Freshman forward Rocky Ransom started off sinking a
quick bucket for SIUC. Clark countered Ransom's bucket
setting the game. A bucket by Rougeau and a free throw
by junior point guard Anita Scott put the Salukis on top, 68-65.
Jalie Ritters hit two charity
tosses for Drake, but Rougeau came back and hit a big 3-
pointer for the Salukis to make the score 71-67.
Clark hit two more free
throws for Drake on a foul by
Firth, her fifth, but a layup by
freshman center Kelly Gesler with 19 seconds left made the
score 69-73, and finished the
victory for the Salukis. The
Bulldogs nabbed one more
basket with two seconds left but
were unable to pull ahead.
Coach Cindy Scott said SIUC
struggled offensively against
Drake's 2-3 zone.
"They started out man-to-
man, and we were able to "be
their man," said one.
"We also struggled the whole game with free throws, but Kelly was able to hit them when we needed. I think a win like this will do more for us. It gets us pumped to play hard, and harder."  
In the first half, the Salukis
pressed the Bulldogs offensively
taking off on a quick 6-0 run. The Bulldogs led by as much
as nine but were unable to keep up the pace on defense. The
Bulldogs were able to close
within 2, 53-31, by halftime.
Drake pulled ahead five
minutes into the second half and
never surrendered the lead, but the
Salukis were able to tie. Drake led by as much as eight
during the second half.
Senior guard Karrie Redeker had 15 points, including four 3-
pointers, and Firth had 14 points and 14 rebounds. Rougeau had 13 and Anita Scott had 12.

Deb Haroldson had 14 points, Jenny Stansall had 12 and Ritters had 11 for Drake.

The 1991-92 Undergraduate Student Government
Outstanding Educator Award
The Outstanding Educator Award is to formally recognize
instructors who significantly contribute to the overall
academic excellence of Southern Illinois University
through their outstanding efforts and achievements in

Nomination Requirements
1. You must be a full-time undergraduate currently
enrolled at SIUC.
2. The instructor you nominate must be a full-time
faculty member. (Graduate assistant instructors are
deemed eligible).
3. Nomination forms must be turned in to the
USG office (3rd floor, Student Center) no later than
February 14, 1992.

Forms Available at USG Office
Defence rests in Tyson trial; panel to decide boxer's fate

INDIANAPOLIS (UPI) — The defense rested its case in Mike Tyson's rape trial Sunday and prosecu-
tors in final rebuttal focused on the contradictions between his trial testimony and grand jury account.

Closing arguments and jury instruc-
tions were slated for Monday.

The defense rested after playing a videotape of his accuser in a bid to show how Tyson changed little after their sexual encounter.

Tyson, 23, is on trial in Marion County Circuit Court for rape and deviate criminal conduct for the rape of a Miss Black America contestant. It convicted, the former heavyweight champion could face up to 60 years in prison.

Both sides appeared confident after testimony ended. Tyson joked and made hand gestures, as he has periodically throughout the two-week trial. Prosecutor Greg Girris-

TRACK, from Page 16

Emerson, sophomore Jarrin Williams, senior Nick Schwarz and freshmen James Widom and Scott Westfall.

With sophomore Todd Schmidt taking the place of Schwartz, the squad placed fourth in the distance medley relay.

In the 3,000-meter, senior Danny Litten placed fourth, but his time was 1.2 off the course record, set by teammate Henry earlier in the season.

Henry also placed third in the 1,000-meter with a time of 2.91.55.

The Salukis' lone lone in the field events was freshman Mike Chojnowski, who placed sixth in the high jump with a height of 15.12 feet.

Even with the backscatter performance of his team, Cornell said he is not overly concerned about the team's future.

"You just cannot get up after week," Co-nell said. "You have to take into consideration that we had very little time between when we arrived and when we had to compete.""Senior half-miler Darren Plab, who competed at the Melleose Games at New York's Madison Square Garden, was not with the squad.

Before the Melleose meet, Cornell said it was one of the most prestigious meets that a track athlete can compete in during his career. It would be a good test for Plab.

SIC's and Plab will reunite next week at home as they host the University of Illinois, Indiana State and Eastern Illinois at the Recreation Center.

"All of these teams are very good, and we had better be ready," Cornell said."

resort and a huge crowd lining the .9-mile downhill course, Garibaldi was the Fina-
m an d m 'an the mountain. And he se a standard no one could match.

"The waiting was more excruciating than the race itself," said Orlieb, 34, who after turning in a time of 1:50.37 had "no chance," as one potential challenger after another tried his luck on the dangerous Backwards Face course. "I had nothing to lose and no pressure on me. I just went for it.

Orlith's winning time was just five seconds behind the second fastest of the silver medalist Franck Picord of France, who thrilled the home crowd by grabbing the third Olympic medal of his career despite having to fight through the slowly deteriorating course as the 23rd man.

The difference between first and second place was the smallest in the history of the Olympic downhill.
