Crime prevention group formed

By Jeff Wilkinson

Public support for Carbondale's Neighborhood Watch Program was urged by police spokesman right on Thursday at the first organizational meeting for the project.

Wright urged citizens to help police combat Carbondale's high burglary rate by "just being aware of what is going on in your neighborhood." "We're not asking you to sit at your window and watch your neighbor's house," Wright said, "but to be aware of suspicious activity." About 50 people attended the meeting at the Community Center, a number Wright said he had expected. "We set up 48 chairs. We got 50 people. I'm happy with that," Wright said.

The National Sheriffs Association organized the Neighborhood Watch Program in 1972 to combat burglary, which it said accounts for 21 percent of serious crime in the United States. The NSA said that 8 percent of all burglaries occur in private homes.

Wright said that Carbondale has a high burglary rate. "We have 48 percent per year since 1980. The average burglary is not the typical cat burglar in black gloves, breaking around the house," Wright said. "It just doesn't work like that. Today, the burglar has knocked on your front door. If you don't answer, he'll try the back door. If you don't answer them, he'll kick the door in."

Wright said measures can be taken to take property protection against such burglars. "Burglars are one of the few preventable crimes," he said. Wright said the Neighborhood Watch Program will instruct citizens in burglary prevention methods such as organizing property with identification numbers, proper use of window and door locks and correct procedures for informing police of suspicious activity.

To discourage burglars, he said, "We'll use all neighborhood Watch signs in neighborhoods participating in the program." See N-VIII. Page 2

John Glenn campaign office opens

By Phillip Florini

Staff Writer

While U.S. Sen. John Glenn, D-Ohio, continued his campaign in Georgia for the Democratic presidential nomination, David Glenn brought his message Wednesday to Carbondale.

Glenn opened his father's Southern Illinois campaign headquarters Friday in the Hunter Building in Carbondale. "That's the headquarters for a reason," Glenn said. "It shows that the campaign is active a center for a grassroots effort." Glenn, who has reduced his travel because of two-thirds to help his father campaign, outlined his father's platform on nuclear arms control and acid rain, which is of special interest to Illinois constituents.

Glenn said his father has the strongest voice on any policy of the eight presidential candidates.

Glenn said his father favors a nuclear freeze and believes in reducing and eventually eliminating nuclear weapons. He also wants to eliminate the MX missile program.

And he said there should be negotiations for reductions by combining SALT with intermediate-range missile talks. All counties possessing nuclear weapons should be included in the negotiations.

Glenn believes that nuclear proliferation is "not getting as much attention as it should," Glenn said. "They spread all over the country." The senator believes that the United States should "greatly decrease" its nuclear weapons sales to Third World countries.

Glenn said his father favors a tax cut, but added that New Hampshire, would help coal smoke producers in his state.

Saluki snowman

From left, Lee Wang Chang, junior in architecture, Kai Tao, junior in marketing, and Kit King, freshman in engineering, spent two hours collecting enough snow Saturday to put together a Saluki snowman behind their Grand Avenue apartment.

City's rental housing criticized

By Paula J. Fialaty

Staff Writer

Six of 10 Carbondale residents live in rental housing and 25 percent of it is considered substandard, according to a report from the Citizens Advisory Committee.

The two-year study will be reviewed by the City Council Monday.

"Most rental housing in Carbondale is old and a significant percentage is of poor quality," the report says. Carbondale's estimated 1,500 substandard rental units can be attributed to a shortage of rental housing, according to the report. Experts consider a 5 percent vacancy level to be healthy, but Carbondale's 3 percentage points below that mark. Vacancies range from 1.8 to 3.2 percent from 1975 to 1980, the report says. Because of that, prospective tenants have few choices. Landlords have less economic incentive to maintain or improve property and rents increase.

Many groups in Carbondale petition the University, much of the housing community, homeowners in nonresidential neighborhoods have "looked the other way for years," the report says.

The report cites a 1975 city-wide survey that found that 3.5 percent of the city's rental housing was not suitable for rehabilitation and was in need of demolition.

Twenty-one of 85 Carbondale landlords reviewed in a mail survey conducted by the CAC were asked if their tenants paid rent on time. All said they do. A majority said they had good care of their property.

Breaking leases, excessive noise and parties, failure to do required outside maintenance and having extra rooms are among the rental problems cited by landlords.

Less than one-third of the landlords reported "noise problem" and a second report, "we suspect most cases of tenant abuse are created by a minority of tenants," the report says.

At an April 21 town meeting, tenants complained of violations of health and safety codes, failure to maintain or fail to return damage deposits.

Seven recommendations to the City Council are included in the report. First, landlords and tenants should be under a uniform system of code enforcement and inspect each, rental unit annually. A certificate of compliance should be signed by both parties. Landlords and landlords should have the right to request early inspection of units.

The second recommendation calls for city council action on ordinances dealing with noise public consumption of alcohol and parking with increased use of lighting.

SUU and the city should make additional efforts and focus on consumer education, the CAC recommends. The group said landlords in the CAC ought to be reviewed on a routine basis and single-family zoning ordinances should be reviewed to include the nonresidential areas.

The CAC recommended that city council members be trained through the City Council. Page 2

Washington (AP)

William French Smith the multimillionaire lawyer who directed sweeping changes in the Department of Justice, resigned as attorney general, administration officials said Sunday.

The sources, who spoke on condition of anonymity, said it appeared that a leading candidate to succeed Smith is presidential counselor Edwin Meese III.

The sources, who said Smith was not preselected to leave but had decided that another year in office was time to go. They said they felt that he had yet to accomplish his major goals.

One source said Reagan's expected re-election campaign influenced Smith's decision. The sources noted Smith's active behind the scenes in every Reagan campaign and said he wanted to do so again but felt his resignation would be improperristically if he remained as attorney general.

The 45-year-old Smith, who raised civil rights controversies and criminal enforcement policies that stood through four previous administrations, kept even his close friends in the dark to the last minute.

The sources said he told the White House he may be present at the mountain top retreat in time to watch the Super Bowl on television, dodged reporters' questions about Smith and any successor. The sources said they expected Reagan to formally announce the resignation Monday.

Mooce was out of town Sunday and could not be reached for comment.
RABAT, Morocco (AP) - Scores of demonstrators were killed when troops and police clashed in recent days in the past few days in the major towns of northern Morocco, diplomatic sources reported Sunday.

Rumors of increases in food prices and school examination fees apparently caused the riots. It was officially denied Sunday that any increase was imposed in school fees.

Diplomats, insisting on anonymity, said they believed about a dozen civilians were killed in Tetouan. They said they did not have an "approximate estimate" of the overall casualty toll.

Spanish media said upwards of 100 people were killed at Tetouan, Alhucemas, Nador, Tangier and other towns in the region.

The Moroccan government imposed a total news blackout on the violence, refusing any official statement.

There were no disturbances in Casablanca. Morocco's largest city with a population of over 8 million, apparently because thousands of demonstrators were moved out of the city to protect the homes of students attending the three-day Islamic summit conference last week.

A week of riots, which started Dec. 29 in Tunisia, another moderate North African state, killed more than 80 demonstrators. "We are fighting to secure support in the world," an Agence France Presse reporter was later quoted as saying in France from the eastern town of Oujda.

The first references to the riots were in two papers Sunday that criticized the government's silence and quoting foreign press reports of bloody clashes.

Major cities in the formerly French-ruled areas of central and southern Morocco were reported quiet after demonstrations. High school and college students were said to have clashed earlier with forces in the capital, Rabat, and in the southern city of Marrakech.

There have been no rises in the price of the heavily subsidized staple foods since August, but other foods have gone up in Morocco.

A pound loaf of bread costs 14 cents and a quart of cooking oil 85 cents. The minimum monthly wage for unskilled workers is $5.

More price hikes for staples such as bread, oil and sugar were expected, with the government under pressure from the World Bank for austerity.

A communiqué from the Ministry of Education Sunday "categorically denied" rumors that high school students preparing for final exams would have to pay fees ranging from $7 to $14. It said the fees would be unchanged at eight to 12 cents.

WATCH from Page 1

Individual stickers will be provided for private homes.

Wright said the police department will also conduct an audit of all public apartments in those wanting the service.

The next step for Wright will be to secure support in the community through civic organizations such as the Jaycees, the Lions and senior citizen groups.

Wright said that a problem for the Neighborhood Watch is not in work in Carbondale that does not exist in other communities is the large number of transient residents.

"That is a problem," Wright said. "But we welcome students into the program.

Media accused of promoting premature control of acid rain

By Rod Stone
Staff Writer

Although acid rain is a problem, Congress should not prematurely pass legislation regulating industry out of fear generated by media attention to the issue. This was the view expressed by John Meister, director of SIU-C's pollution control division, and Jonathan Wheeler, industrial service engineer for CIPS, who spoke about acid rain Thursday night at a meeting of the Carbondale chapter of the Sierra Club.

Both Meister and Wheeler said the media are oversimplifying a complex issue, receiving the public into thinking there are clear-cut solutions to the acid rain problem.

"When we have the popular mass media picking up a topic that's far from simple and communicating it in simple terms, it's very easy to come up with simple, easy answers," Wheeler said. "As a scientist, I'm not sure the evidence is there to make those conclusions.

Meister agreed, saying the media have hyped the acid rain problem out of proportion.

"Acid rain has fit very nicely into our environmental newscast, and a decision that we have to have a new crisis every two years," he said.

Meister and Wheeler agreed that there is a great deal of crisis mentality usually muddied and incorrect. Meister said that it would be a mistake to pass a national law to solve a regional problem.

"Our solution to a problem there is to pass a national law," he said. "To apply a law for a regional problem nationally is very easily and very difficult."

Meister said that politicians trying to turn the problem to their own political advantage are also a cause of ill-advised, unworkable laws.

"What's good for the environment is going to be the last thing considered because it's a political process that's going to be used," he said.

Meister and Wheeler emphasized that they were not saying that acid rain problem doesn't exist, only that solutions should not be rushed into and more study should be done.

Meister said that the technological solutions to acid rain, such as smokestack scrubbers and filtering devices, have been implemented prematurely.

"We're dealing with a technology that's been forced into legislation," he said. "It's not mature."

"I'm against forcing a technology because we feel we're in a crisis situation," Meister said. He said that acid rain technology has yet to be proven effective.

The term acid rain is misleading, Meister and Wheeler said. The phrase is commonly used, acid rain means moisture containing sulfuric acid falling onto the earth, damaging lakes, statues and other things with which it comes into contact. It is thought to be caused by sulfur entering the atmosphere, which has put pressure on industry to stop using high-sulfur coal, such as that mined in Southern Illinois, in favor of low-sulfur coal.

But Meister said that rain is not the only form the acid containing moisture takes, and there are such things as "acid snow," "acid fog" and "acid dew." He said the problem is not the moisture falling to the ground, but the interactions once it hits the surface.

Wheeler said that industry is not the only source of sulfur in the air. He said natural phenomena, such as peppers, rifts in the ocean, decaying vegetable matter, soil organisms and lightning-induced reactions put sulfur into the atmosphere.

Wheeler also said that solving the acid rain problem will cost money, which many people may not want to spend.

GLENN from Page 1

eastern, southern and midwestern states to reduce sulfur dioxide emissions by 8 million tons in 12 years. Fossil fuel power companies would be taxed in Glenn's plan to pay for smoke-cleaning equipment.

Glenn said his father supports closing tax loopholes to combat the federal budget deficit. He also proposes support for education and efforts to combat hunger in the United States.

Sen. Glenn also wants to defer indexing of income taxes and proposes a 10 percent income tax surcharge to reduce the budget deficit.

Glenn said his father believes there are limits to what the country can afford to spend.

He said his father has been "responsible enough to put prestigeful, dollar amounts" on the programs he is planning to establish. Glenn claims that his biggest battle, Walters' mandate, has not been pricing his proposals.

The first primary of the campaign will be next month in New Hampshire. On March 13, COUNCIL from Page 1

the city will pass licensing or company, permit ordinances or add a standard rental contract to its ordinances. The council will also review a Planning Commission recommendation that voters supported a proposed change in the zoning ordinance which would not. The old library building and 'Rendel House have been offered for sale to the city by the Library Board and the council

will consider the purchase of these properties. State law allows the city to purchase surplus real estate "for public or corporate purposes by meeting bids acceptable to the board." A special use permit requested by James Whitt for a drive-in window for a proposed liquor store at 661 E. Illinois will also be considered by the council.

Dancing bees simplify speech

Skepticism is laid down in the breath of the bee.

VIRGIN

Patrick Williams

Full Professor

telling where the flowers are, whether there are any girls to pick up along the way.

Most people, being at least as smart as the average bee, could probably master a few steps to tell a little about themselves. Imagine how much wasted verbiage, embarrassment and anxiety this would save if it just took a little time to tap one's own personal background, political leanings and religious persuasion before they start talking.

THIS BEING an election year, I've even taken time to devise a few steps to help people locate others of the same political persuasion. For instance, supporters of any of the cacophonous candidates for the Democratic nomination for President could signal their preference by doing the Zomber.

Reaganites, especially those supporting his handling of the budget deficit, have a little more complex dance. First, they perform a step called "Right."

To do "Right," one must say, "Go to Howard Headly's Chicken Dinner, then say the wrong thing so you've devised a simple way for people to match themselves with others likely to share the same opinions — and who want to talk about them."

It's called dancing.

Honey-bees, the old Walt Disney nature films tell us, communicate quite effectively through dance. Whenever a scrawling little bee notices the promising field of flowers, it buzzes back to the hive, slips on a white feathered organ — his chosen instrument — and with the rest of the hive, forms a sort of "Soul Train Chain," dances out a message.

Several years ago the internationally famous classical musician E. Power Biggs died of a brain tumor while playing the keyboard while performing the organ — his chosen instrument.

Dancing bees simplify speech.
‘Smoke’ enjoyable, but acting shallow

By Terry Levecke
Staff Writer

The Stage Company succeeded in bringing an enjoyable presentation of a Tennessee Williams play to the stage in Thursday night’s dress rehearsal of ‘‘Summer and Smoke,” but the lead actors failed to grasp the subtext of his characters.

Directed by Roy Weshinsky, an SIU-C English professor, ‘‘Summer and Smoke’’ explores the relationship between a plantation owner’s daughter and the decadent boy next door.

The play begins with a prologue revealing things about Alma Winemiller and John Buchanan Jr., that stay with them throughout their adulthood. Alma, whose name means ‘‘Immer’’ in Spanish, is deeply religious and is truly driven by her beliefs, while John is slightly rebellious because of his mother’s death early in his life.

Although their performances only scratch the surface of Williams’ characters, the play is still worth seeing. The set design by Archibald McLeod is splendid, with much attention to detail and good use of restricted space.

One of the most delightful performances comes from Barbara Cordoni, who plays Alma’s slightly neurotic mother. The twist in this character is that she is regarded by Alma and her father as a ‘‘heavy cross to bear’’ because of her frivolous behavior. But Cordoni successfully delves into the character and portrays a Mrs. Winemiller who knows exactly what she’s doing and has simply refused to lead the pious life her husband chose.

Mary Runtz Reticker, a 1983 SIU-C graduate, conveyed more emotional depth that is needed to lead the pious life her husband chose.

Mary Runtz Reticker, a 1983 SIU-C graduate, conveyed more emotional depth that is needed to lead the pious life her husband chose.

Student to display landscape scenes

“Landscapes and Figures,” an exhibit of painting and charcoal drawings by David Ryan, a senior in art, will open Monday in the Vergeott Gallery, Allied Building.

Ryan’s landscapes include paintings done in oil and crayons of scenes of Southern Illinois in summer.

An opening reception will be held 7 to 9 p.m. Monday in the gallery. The show runs through Friday.

Candidates see people as key to New Hampshire primary

But the most publicized post-debate effort by Glenn was radio commercials that purported to interview people after the confrontation between the eight Democratic candidates. The commercials were pulled off the air when it was disclosed the interviews took place before the debate.

Ashken spent 37 days in New Hampshire from April 1982 through January 1984. His state organization is bolstered by periodic visits by his Sunshine Brigade, Florida residents who canvass the state in his behalf.

The most conservative of the Democratic contenders, Ashken hopes to gain support among blue-collar voters in Manchester, helped perhaps by the Manchester Union Leader, which has described him as "refusing to march in lock-step conformity" with the other candidates.

Cranston: Phil Grandmaison, running Sen. Alan Cranston's campaign in New Hampshire, described the strategy this way: "He comes here and he talks about arms control and he goes to his next stop and he talks about arms control and at the end of that he talks about arms control."

Hart: Sen. Gary Hart of Colorado is often mentioned as the candidate most likely to do better than expected in the primary. His campaign has brought hundreds of students to the state over the past month, and its telephone banks soon will be fully operational.

"Our goal is to reach 70,000 voters," she said.

Hollings: Sen. Ernest Hollings of South Carolina is quietly spending a lot of time in the state and hoping to parlay one-on-one voter contact into support.

"We hope to fit Ms. Hart narrow enough so he can get to Alabama and Georgia with some credibility," said Jackie Maginnis. Hollings. campaign manager. Jackson: The Rev. Jesse Jackson isn't spending money on radio or television advertising. "Let's take our budget and feed the hungry."

Jackson also may be the first presidential candidate to come to this northern New England state and announce, "I'm on the shelf."

McGovern: Former Sen. George McGovern also is spending little time in New Hampshire. If it's a surprise out there for McGovern, he is counting on it coming from voters in Iowa rather than New Hampshire.

AUDITIONS for the 37th Annual All-Campus Variety Show will be held from 6 to 9 p.m. Monday through Thursday in Student Center Ballroom B. Applications can be picked up at the Office of Student Development on the third floor of the Student Center.

THE NETWORK, a 24-hour phone line for crisis intervention, counseling information and referral service will hold two training sessions for prospective volunteers from 6 to 9 p.m. Monday through Friday and from 9 a.m. to 5 p.m. Saturday and Sunday. Both sessions will be held at 604 E. College St. Call 549-3351 for information.

U.S. legal system unfair, author says

BOSTON (AP) — Author Shana Alexander says women are victims of discrimination in courts because the legal system was set up by men.

In a seminar Saturday on women and criminal justice, Boston Business and Professional Women's Club, Ms. Alexander said women are often unfairly treated by male-dominated courts.

"At best women are treated with condescension. At worst they are treated with blatant discrimination," she said.

"Women are not treated equally because the system was organized by men according to male agendas of power."
In the second overtime, Wichita State scored first but Birch quickly countered with a 10-foot baseline jumper to tie the score. After the Shockers failed to score, Van Winkle put SIU-C into its fourcorner defense.

With Birch, Hubbard, Weiss and Bufford exchanging the ball, Bufford dribbled to the circle on three occasions and fired in tie-breaking jumpers.

"We told Nate not to turn down the shot if he had it," Van Winkle said. "We felt Nate's shot was as good as anything else we could create."

On two of Bufford's shots, he stopped short of driving to the basket through a lightly-guarded lane, choosing the 12-and 15-footers instead.

"That's my spot," Bufford said. "I'd rather shoot it from there than take it in the lane and loft it over the big guys."

After Bufford's final jumper of the afternoon gave the Salukis an 8-point lead, Weiss stole a pass from his position in the Saluki zone and immediately drew a foul from Sherrod with 1:08 left. Weiss' subsequent free throw bounced in and out. "Even though he missed it, it made them hesitant against our zone the next time down," Van Winkle said.

That's when Hunter fouled McDaniel, who converted one of two free throws with 55 seconds left, trimming SIU-C's lead to one point. The Salukis then surrounded the ball under full-court pressure and got it to Hunter just over the time line. He was fouled by Zarko Duricic after a furious scramble, sending him to the line for his dramatic free throws.

When the game was over, Van Winkle and the Salukis rushed off the floor, but returned for a curtain call with Van Winkle leading the way, waving a triumphant fist in the air.

"That is so unlike me," Van Winkle said. "It's something that will probably never happen again, but the players and the fans deserved the right to take two minutes on the floor."

The fans poured out onto the floor and carried Hunter off. Hunter, responding to chants of "Haf-ee, Haf-ee," threw kisses to the crowd.

"Just my way of saying thanks," Hunter said. "I'm a joking kind of a guy and that was one of my practical jokes. They loved it and I loved it."
Saluki Gabriel Coch was shutout as were the rest of his teammates against Vanderbilt Friday, losing No. 2 singles in straight sets to Rex Cvetella, 3-6, 5-7.

Men netters blanked in opener

By George Pappas
Staff Writer

It wasn’t the best way to start off the spring season for the men’s tennis team Friday. The Salukis were blanked by Vanderbilt 9-0 at the Egyptian Sports Center.

The Salukis, 6-1, won the first set in five of the nine matches, but they did not have enough energy to win the next two sets in those matches.

“We ran out of gas,” Saluki Coach Dick LeFevre said. “They were a good team and took advantage of our sluggish play.”

LeFevre did not consider the match with Vanderbilt, 9-0, a complete wipeout.

“I might be a little disappointed,” LeFevre said. “But, I’m not all that discouraged. It was a tough break (Christmas) and it’s going to take some time to get the boys back into top condition.”

LeFevre, though, said he thinks the team will be “tough” midway through the season.

LeFevre said he was especially pleased with the performance of freshman Lars Nilsson who jumped into the No. 2 singles position while still nursing a sore arm. Nilsson replaced Rolle Oquino, who is out with a knee injury.

Nilsson lost to Alan Ben нароч 6-4, 4-6, 6-7 (5-7 Tiebreak) midway through the season.

Gymnasts finish last at Mizzou Quad

By Jim Lexa
Sports Editor

"Glimpses" of what women's gymnastics Coach Beth Vogel said he hoped would come through for his Saluki squad did, but not much else did as SIU-C finished last in the four-team Mizzou Quad Saturday night.

"It was a tough, tough meet," Vogel said.

Georgia won the meet with a 176.95, while Winona State took third with 170.85 while SIU-C scored 167.55.

Pam Turner, expected to be the squad's all-around leader this season, scored just 32.40. Stevy Cook from Georgia scored 36.35 to win all-around honors.

Vogel, though, said he is not too concerned about Turner.

"She's started out badly like this the last two years," Vogel said. "It's typical of Pam. It was disappointing for her. She's able to hit the 36 point range."

One bright spot for the squad was Nichelle Spillman, who "emerged as a good competitor," Vogel said.

On the vault, Spillman took fourth with a 9.15 after losing a half point on her vault.

"It's a tough, tough win for the squad. Vogel said.

"Pam, easily the strongest performance. She's a tough, tough girl," Vogel said.

"Five of six of the girls never hit the routine as planned, but they didn't quit," Vogel said. "On the balance beam, Stevy scored an 8.85 to lead a disappointing event for the Salukis. Scores of 7.9, 7.5, 6.0 really hurt the squad, Vogel said.

"You can't survive one score in the sevens, much less three," Vogel said.

The Salukis host Jacksonville State at the Arena 7:30 p.m. Monday. Vogel said he thinks his squad will score "maybe five points or more." Monday night was the first time it did at the Mizzou Quad.

"It's a matter of time and development," for the gymnasts, Vogel said.

**CAREER PLANNING AND PLACEMENT CENTER WORKSHOP SCHEDULE FOR SPRING 1984**

The Career Planning and Placement Center is pleased to announce the following workshops for Spring 1984.

Students are invited to attend these one-hour programs focused on developing skills specific to the job search and employment.

Individuals may register to attend the workshops at Woody Hall B-204; there is no charge to participants.

Men cagers dump Shockers; Saluki subs prevail in 2 OTs

By Dan Devine
Staff Writer

Salukis' Cleveland Ribbens (15) and Bernard Campbell box out a Shockers while Aubrey Sherrod (22) looks on.

Raiders win 38-9; Allen named MVP

TAMPA, Fla. (AP) - Marcus Allen rushed for a record 191 yards, including a 74-yard touchdown run, and the Los Angeles defense shut down Washington's John Riggins and Dave Thomas as the Raiders crushed the defending champ Redskins 38-9 Sunday in the most lopsided Super Bowl ever.

Understudies Derek Jensen and Jack Squire turned alert defensive plays into instant first-half touchdowns before Allen, a unanimous selection as the game's Most Valuable Player, took control in the second half and paced the Raiders to a Super Bowl record 38 points.

Allen picked up his yardage on 26 carries and broke the record of 166 rushing yards set by Riggins in last year's 27-17 Washington victory over the Miami Dolphins.

Salukis vault past Iowa as Price sparks win

By George Pappas
Staff Writer

If there was a most valuable player in the men's gymnastics dual meet Friday night it would have been Saluki Brian Price.

Price's 9.8 on the vault sparked the Salukis to a 276.35-267.8 victory over the Iowa Hawkeyes at the Arena.

"Brendan's vault was the turnaround for us," Saluki Coach Bill Meade said.

The Salukis, 4-2 in overall MVC Conference with a 1-0 record in the league, used 191-3/4 points to the Hawkeyes' 189-1/4 to move into sole possession of first place in the league. Iowa fell to 3-3 overall and 0-1 in the conference.

With the Raiders holding a 14-13 lead, Ray Guy's 27-yard punt buried the Redskins at their 12-yard line with 12 seconds remaining in the first half.
